P R E F A C E.

IT has been the aim of the Author to render THE MANUAL OF DATES a concise and trustworthy compendium of the principal events of Ancient and Modern times. As the value of a Book of General Reference must necessarily depend upon the character of the sources whence information is derived, the Writer has, in all cases, consulted the best authorities; and their statements have been carefully considered and compared. On disputed points, conflicting accounts have been submitted to rigid scrutiny, and the view supported by the most conclusive evidence has been invariably adopted.

Biographies, with the exception of short notices of English sovereigns, are not included in the alphabetical arrangement; but the reader will find that the lives of many great men of every age and country are illustrated in various articles.

In so large a collection of facts—the number of Articles in the volume being nearly double that contained in any similar work—certain errors and inaccuracies could not by any possibility be avoided. The critical reader, who understands the labour involved in the extensive researches required for a Book of this kind, can make due allowance for the same. The Author will feel greatly obliged to

Critics and Correspondents if they will kindly point out inaccuracies, that they may be corrected in a future Edition.

The work is furnished with a carefully-prepared Index, and a list of the principal Authorities.

The Author deems it only an act of justice to Messrs. COX & WYMAN, to express his warm commendation of the very great care which they have bestowed on the Printing of this Work.

LONDON, *September*, 1862.

LIST OF AUTHORITIES.

AMONGST the numerous Works which have been consulted in this Manual, the following may be mentioned:—

- ALISON's History of Europe, from the Commencement of the French Revolution in 1789 to the Restoration of the Bourbons in 1815. 9th edit. 12 vols. 1853-55.
- ALISON's History of Europe, from the Fall of Napoleon in 1815 to the Accession of Louis Napoleon in 1853. 8 vols. 1852-59.
- Almanac de Gotha. 1787 to 1862. 16mo.
- Anderson's History of Commerce.
- Annals of England: an Epitome of English History. 3 vols. 1855-57.
- Annals of the Wars of the Eighteenth Century. By Sir E. Cust. 5 vols. 1858-60.
- Annual Register.
- Arnold's History of Rome. 3 vols. 1838-43.
- Asiatic Register.
- Baker's Chronicle of the Kings of England, with a Continuation by E. Phillips. 1730.
- Bayle's Historical and Critical Dictionary.
- Berry's Dictionary of Heraldry. 4to.
- Bohn's Antiquarian Library. Various Works.
- Bohn's Classical Library. Various Works.
- Bohn's Scientific Library. Various Works.
- Bohn's Standard Library. Various Works.
- Brande's Dictionary of Science, Literature, and Art. 3rd edit. 1853.
- British Almanac and Companion. 1829, &c.
- Broughton's Historical Dictionary of all Religions, from the Creation of the World to this Present Time. 1756. Folio.
- Burn's Ecclesiastical Law, by Robert Phillimore. 9th edit. 4 vols. 1842.
- Calendars of State Papers.
- Camden's Britannia. By Richard Gough. 2nd edit. 4 vols. 1806.
- Carte's History of England. 4 vols. 1747.
- Cave's Antiquitates Apostolicæ.
- Cave's Antiquitates Ecclesiasticæ.
- Clarendon's History of the Rebellion. 7 vols. 1849.
- Clinton's Fasti Hellenici. 3 vols. 1834-51.
- Clinton's Fasti Romani. 2 vols. 1845-50.
- Collier's Ecclesiastical History of Great Britain.
- Comyn's History of the Western Empire.
- Cotton's Fasti Ecclesiæ Hibernicæ. 4 vols.; supplement, 1 vol. 1847-60.
- Creasy's History of the Ottoman Turks.
- Cunningham's Handbook of London. 1850.
- Dictionnaire de la Conversation, et Supplément.
- Disraeli's Amenities of Literature. 2 vols. 1859.
- Disraeli's Curiosities of Literature. 3 vols. 1858.
- Ducange's Glossarium ad Scriptores Mediæ et Infimæ Latinitatis. 6 vols.; supplement, 4 vols. 1733-36.
- Dugdale's Monasticum Anglicanum. 6 vols. 1817-30.
- Dugdale's Origines Juridicales. 1666.
- Ecclesiastical and Civil History. By the Rev. Geo. Townsend, D. D. 2 vols. 1847.
- Encyclopædia Britannica. 8th edit.
- Encyclopædia Metropolitana. 4to edit, and the revised treatises in 8vo.
- Encyclopædia of Antiquities. By the Rev. T. D. Fosbrooke. 2 vols. 1843.
- English Cyclopædia. By Charles Knight.
- Fairholt's Costume in England. 1846.
- Finlay's Greece under the Romans. 1844.
- Finlay's History of Greece and Trebizond. 1851.
- Finlay's History of the Byzantine Empire. 1853.
- Foss's Judges of England. 6 vols. 1848-57.
- Froude's History of England. 6 vols. 1856-60.
- Gibbon's History of the Fall and Decline of the Roman Empire. By W. Smith. 8 vols. 1854-55.
- Grote's History of Greece. 12 vols. 1846-56.
- Guizot's History of Civilization.
- Gwilt's Encyclopædia of Architecture. 3rd edit. 1854.
- Hale's New Analysis of Chronology and Geography, History and Prophecy. 2nd edit. 4 vols. 1830.
- Hallam's England. 9th edit. 3 vols. 1857.
- Hallam's Middle Ages. 11th edit. 3 vols. 1855.
- Hallam's Literary History. 5th edit. 4 vols. 1855.
- Hamilton's East-India Gazetteer. 2 vols. 1823.
- Herbelot's Bibliothèque Orientale. 1697.
- Historical Notes, 1509-1714. Compiled by F. S. Thomas. 3 vols. 1856.
- Historical Register.
- Hook's Church Dictionary. 6th edit.
- Horne's, Rev., Introduction to the Critical Study and Knowledge of the Holy Scripture. 10th edit. 4 vols. 1856.
- Humboldt's Cosmos. Bohn's edit.
- Hume and Smollett's History of England, continued by the Rev. T. S. Hughes. New edit. 18 vols. 1854-55.
- Knight's London. 6 vols. 1841-44.
- Knight's Popular History of England. Vols. I. to VI.
- Koch and Schoell's Histoire abrégée des Traités de Paix. 15 vols. 1817-18.
- Lardner's Cabinet Cyclopædia.
- Lascelles' Liber Munerum publicorum Hiberniæ. 2 vols. 1724.
- Layard's Nineveh and its Remains. 5th edit.
- Layard's Nineveh and Babylon.
- Le Neve's Fasti Ecclesiæ Anglicanæ. By T. Duffus Hardy. 3 vols. 1854.
- Lewis's Credibility of Early Roman History. 2 vols. 1855.
- Liber Albus.
- Mahon's, Lord, History of England. 2nd edit. 7 vols. 1839-54.
- Marsden's History of Christian Churches and Sects. 2 vols. 1856.
- Martin's Histoire de France. 4th edit.
- McCulloch's Dictionary of Commerce and Commercial Navigation. 1859.
- Mill's British India.
- Milman's History of Latin Christianity. 6 vols. 1854-55.
- Montfaucon's L'Antiquité expliquée. 5 vols.; supplement, 5 vols. 1719-24.
- Moreri's Dictionnaire Historique.
- Mosheim's Ecclesiastical History. 4 vols. 1850.
- Müller's History of the Literature of Ancient Greece. 3 vols. 1858.
- Mure's Language and Literature of Ancient Greece. 5 vols. 1850-57.
- Nares's Glossary, edited by James O. Halliwell and Thomas Wright. 2 vols. 1859.
- National Cyclopædia and Supplement.
- Notes and Queries. 1st and 2nd series.
- Palmer's Origines Liturgicæ. 4th edit. 2 vols. 1845.
- Parry's Parliaments and Councils of England.

- Petrie and Sharpe's *Monumenta Historica Britannica*. 1848.
- Pictorial History of England. 8 vols. 1849.
- Prescott's Charles the Fifth. 2 vols. 1857.
- Prescott's Ferdinand and Isabella. 2 vols.
- Prescott's History of the Conquest of Mexico. 2 vols. 1860.
- Prescott's History of the Conquest of Peru. 2 vols.
- Frideaux's Old and New Testament connected. 2 vols. 1845.
- Public Records and State Papers.

- Wilkinson's Ancient Egyptians.
- Wright's History of Ireland. 3 vols.

A NEW MANUAL OF DATES.

AARGAU, or ARGOVIA (Switzerland), which for some time formed part of Berne, was made an independent canton by the Act of Mediation, published Feb. 19, 1803. Part of the Frickthal, which Austria, by the sixth secret article of the treaty of Campo-Formio, in 1797, had relinquished, was incorporated with it, in consequence of which a treaty between Argovia and Baden was signed at Aarau, Sept. 17, 1808. By the new constitution, finally settled in 1815, Aargau ranks amongst the twenty-two Swiss cantons. A diet assembled at its chief town, Aarau, on the invasion of Switzerland by the French in 1798, was the last summoned under the old confederation. An insurrection occurred in Aargau, Jan. 10, 11, and 12, 1841; and in 1844 the people demanded the expulsion of the Jesuits. The castle of Habsburg, the seat of the ancestors of the imperial family of Austria, is situated in this canton.

ABACOT.—Mention of the cap of state worn by some of our kings occurs in the Chronicle of Fabyan, who includes amongst the spoils that fell into the hands of Edward IV., after the battle of Hexham (1463), Henry the Sixth's "bycocket, garnysshed with ii. crownes of golde, and fret with perle and ryche stone." This account is repeated by later authors. Grafton uses the term "abococket," and Camden says: "In that fatal battle fought here, 1463, on the plains called the *Levels*, was taken the cap of state called *Abacot*, adorned with two rich crowns."

ABANCAY (Battle).—At this place, in Peru, Almagro, during the civil war amongst its Spanish conquerors, gained a complete victory over Alvarado, July 12, 1537.

ABATTOIR.—By 4 & 5 Hen. VII. c. 3 (1490), butchers were made subject to a fine for slaughtering beasts within the walls of the city of London. The act extended to all towns of England except Berwick and Carlisle. The butchers having constructed drains to carry off the filth, &c., petitioned to be relieved from its operation, and this was done by 24 Hen. VIII. c. 16 (1533). Stow (Survey, b. v. ch. 12) relates that on the visitation of the plague in the reign of Elizabeth, an ingenious Italian gentleman and physician assigned one great cause of it to be the killing of cattle within the city, and proposed that slaughter-houses should be erected in the suburbs of London and other cities. By a decree of Napoleon, dated Feb. 9,

1810, it was ordered that five abattoirs, or public slaughter-houses, should be erected in the vicinity of Paris. They were opened in 1818. Roule and Villejuif each contained 32 slaughter-houses; Grenelle 48; and Menilmontant and Montmartre each 64; making in all 240 slaughter-houses. Similar establishments have been erected in the precincts of all large towns in France. The abattoir erected in Edinburgh in 1851 was the first introduced into the United Kingdom. Petitions for the removal of Smithfield, and the substitution of these useful establishments, were presented to Parliament April 23, 1833; and abattoirs form part of the new Cattle-market in Copenhagen-fields, opened June 13, 1855.

ABBACOMITES.—Lay-abbots, who, during the Middle Ages, obtained from the sovereign certain monasteries in the way of benefices, became very numerous in France, and several decrees on the subject are found in the records of the period. Fosbroke (British Monachism, c. vii. p. 83) states that "there were anciently lay-abbots, which, it seems, was owing to the laity seizing the church lands, and leaving only the altar and tithes to the clergy. Lay-abbots were also called *Abbacomites*, and *Abbatas milites*,—'noble abbots,' and 'knightly abbots.' They were great persons, under whose protection the monasteries voluntarily placed themselves; but these protectors became their oppressors. They had another title, that of 'Commendatory Abbots,' and often filled the first offices in the court and army." Bernard, the youngest of Charles Martel's six sons, was lay-abbot of the monastery of Sithin, or St. Quentin, in the middle of the 8th century; and Prince Eugene, when he made his first campaign (1683), was commendatory abbot of two ancient monasteries.

ABBASSABAD.—This Persian fortress was captured by the Russians July 31, 1827, a battle having been fought here June 20; and another, called the battle of Djevan-Boulak, July 18. The Russians were victorious in each encounter.

ABBASSIDES.—This race wrested the sceptre of the Saracens from the house of the Om-miades, and occupied the caliphate for more than five centuries. They were descendants of Abbas-Ben-Abul-Motalleb, uncle of the Prophet. Gibbon remarks: "In the visible separation of parties, the *green* was conse-

crated to the Fatimites; the Ommiades were distinguished by the *white*; and the *black*, as the most adverse, was naturally adopted by the Abbassides. Their turbans and garments were stained with that gloomy colour: two black standards, on pikestaves nine cubits long, were borne aloft in the van of Abu Moslem; and their allegorical names of the *night* and the *shadow* obscurely represented the indissoluble union and perpetual succession of the line of Hashem." They rebelled against the Ommiades, 746, and gained several victories. Merwan II., the fourteenth and last caliph of the Ommiades, having suffered a terrible defeat on the banks of the Zab, fled into Egypt, and was slain in a mosque at Busir, on the banks of the Nile (Feb. 10, 750). Abul Abbas, or Al Saffah (the Sanguinary), became the first caliph of the Abbassides; and their empire lasted until Feb. 20, 1258, when the Mongol leader, Hologon Khan, stormed Bagdad, and put Mostasem, the last of the race, to death. The Abbassides removed the seat of empire from Damascus to Bagdad, in 762. The following is a complete list of these caliphs, with the date of their elevation to power:—

	A.D.		A.D.
Abul Abbas	750	Al Radhi	934
Al Mansur	754	Al Motaki	940
Al Mahdi	775	Al Mostakfi	944
Al Hadi	786	Al Moti	945
Haroun Al Rashid	786	Al Tai	974
Al Amin	809	Al Kader	991
Al Mamun	813	Al Kaim	1031
Al Mutassem	833	Al Moktadi	1075
Al Wathek	841	Al Mortader	1094
Al Motawakkel	847	Al Mostarshed	1118
Al Mostanser	861	Al Rashid	1135
Al Mostain	862	Al Moktafi	1136
Al Motaz	866	Al Mostanjed	1160
Al Mohtadi	869	Al Mostadhi	1170
Al Motamed	870	Al Naser	1180
Al Motadhed	892	Al Zaher	1225
Al Moktafi	902	Al Mostanser	1226
Al Moktader	908	Al Mostasem	1240
Al Kaher	932		

ABBAYE (Prison of).—Among the fearful scenes enacted under the rule of Danton, Robespierre, and their associates, may be mentioned the terrible massacres at the prisons of Paris in the year 1792. The prison of the Abbaye, in which many of the Swiss soldiers, and members of the aristocracy, were immured, was the first assailed. The attack commenced at 3 o'clock in the morning of the 3rd of September, when many of the wretched inmates were put to death, under circumstances of unparalleled atrocity. A mock tribunal was formed for the trial of the unfortunate captives.

ABBESS, the lady superior of a religious house of females. Martene says that the abbesses, in early times, exercised some of the spiritual functions belonging to the priesthood, and even confessed their nuns. This practice having led to various inconveniences, was suppressed. Bingham (Antiq. b. vii. c. 3, s. 13), referring to the statement in the Saxon Chronicle, that abbesses were present at the council held at Becancelde, in Kent, in 694, remarks: "It is justly noted

by learned men as a new thing, to find abbesses, as well as abbots, subscribing in the council of Becancelde, in Kent, anno 694, and that before both presbyters and temporal lords, as the author of the Saxon Chronicle reports it. For this is the first time we meet with any such thing in the records of the ancient church."

ABBENVILLE (Treaties). — Wolsey met Francis I. here, and, on the part of Henry VIII., concluded three treaties with the French king, Aug. 1, 1527; they were ratified at Amiens, Aug. 18.

ABBEY, a religious house, presided over by an abbot or abbess, into which persons retired, dwelling in seclusion from the world. In times of persecution, the primitive Christians took refuge in mountains, caves, and desert places, and were afterwards collected together and formed into religious communities. The practice arose during the Decian persecution, in the middle of the 3rd century. St. Antony, one of the fathers of Christian hermits, formed his cell at Phaim, in Upper Egypt, between the Red Sea and the Nile, in 305. Hilarion, about the same period, according to Mosheim, introduced the system into Syria and Palestine. St. Pachomius was the first to introduce regular monasteries. He built several in the Thebais, in Egypt, during the 4th century. Bingham says (Antiq. b. vii. c. 1, s. 4), "Till the year 250 there were no monks, but only ascetics, in the Church: from that time to the age of Constantine monachism was confined to the anchorites living in private cells in the wilderness: but when Pachomius had erected monasteries in Egypt, other countries presently followed the example, and so the monastic life came to its full maturity in the Church." By some decrees of the council of Saragossa, in Spain, 381, prohibiting clerks from leaving their ministry to take monastic vows, and also specifying the age at which virgins might take the veil, it is evident that in this part of Europe monastic institutions were established at an early period. St. Martin, bishop of Tours, built a monastery at Poitiers in the 4th century. Cassian founded two, one for monks and the other for nuns, at Marseilles, about 409. Twelve religious houses were established in Italy, within 40 miles of Rome, by St. Benedict, in 529, that of Monte Cassino, erected on the site of an ancient temple of Apollo, in Campania, being the chief. St. Benedict was the first to institute monastic vows and rules. One founded in the isle of Bardsey at the end of the 5th, and another at Bangor-Iscoed in the beginning of the 6th century, are supposed to have been the first monasteries in England. An establishment of the kind was founded at Benchor, in Ireland, about 520. St. Columba founded one in the isle of Huy, or Iona, in 565; and the abbey of Old Melrose was founded before the end of that century. By 27 Henry VIII. c. 23 (1536), all monasteries and religious houses not possessing more than £200 per annum were suppressed; and by 31 Henry VIII. c. 13

(1539), all institutions of the kind were abolished. They amounted to 186 greater and 374 lesser monasteries, besides 48 houses of the Knights Templars; making a total of 608. The income was estimated at £137,000 per annum.

ABBOT, or ABBAT.—The term is derived from the Syriac *abba* and the Hebrew *ab*, the Greek form being *abbas*, a father. When hermits, or holy men, formed themselves into religious societies, one of their number was chosen as a chief. The monks must not, however, be confounded with ascetics, for, as Bingham states, "there were always ascetics in the Church, but not always monks retiring to the deserts and mountains, or living in monasteries and cells, as in after-ages." The practice of dwelling together in communities, and under a chief, arose with St. Pachomius, in the reign of Constantine. They were first styled Archimandrites, and the use of the term "abbot" commenced in 472. The custom for an abbot to be in orders originated in the 6th century. Abbots gradually grew important, were called to councils, and aspired to an ascendancy over bishops. In order to check this tendency, the council of Chalcedon (451) enacted that "all monks, whether in city or country, shall be subject to the bishop, and concern themselves in no business, sacred or civil, out of their own monastery, except they have his license and permission upon urgent occasion so to do." In spite of this, and other stringent laws, the abbots managed to engross power. Hence arose mitred abbots, who wore a mitre, and had absolute authority. They were exempt from diocesan jurisdiction, having episcopal authority within their precincts. In England, they had a seat in parliament, and were called abbots sovereign, or general, to distinguish them from other abbots. At the Reformation, according to some authorities, there were 26 and two priors. Fuller mentions 27 parliamentary abbots and two priors. There were also crosiered abbots, from the crosier or pastoral staff, which they bore in the right hand, and not as the bishops, in the left. Abbots ruling over establishments having several branches, were styled cardinal abbots, and, on the continent, the titles of prince-abbots, field-abbots, and abbot-counts were used. In olden times, instead of the benediction since employed at what is called the consecration, the abbot was invested with the cowl, the pastoral staff was placed in his hand, and the shoes on his feet.

ABBOT OF FOOLS, or MISRULE, called in Scotland, the "Abbot of Unreason," was a master appointed during the Middle Ages, to preside over the Christmas festivities. This mock prince was frequently crowned, and attended with all the paraphernalia of royalty. A similar custom prevailed in many parts of France, and is evidently derived, as Prynne declares, from the ancient Saturnalia. The Abbot of Unreason was suppressed by the Scotch legislature in 1555.

The allowance granted to an abbot of Misrule by a nobleman early in the 16th century, according to an entry in the Earl of Northumberland's Household Book, was one pound. The "Abbot of Misrule" was changed into "Lord of Misrule," at the Reformation.

ABBOT OF HUY, or IONA, also Icolmkill, an island on the west coast of Scotland. This island, Bede (b. iii. c. 4), writing at the commencement of the 8th century, says, "was always governed by a presbyter-abbot, under whose power the whole province, and the bishops also, were subjected, after an unusual manner, pursuant to the example of the first founder, who was not a bishop, but only a presbyter and a monk." This statement gave rise to a controversy on church government, in the 17th century. Bingham (b. vii. c. 3, s. 14), referring to Bishop Lloyd on Church Government, contends that Bede speaks of "only one small part of Scotland;" and this subjection was not in spirituals. Indeed it seems to have been "an acknowledgment of some civil jurisdiction over the bishops, which may very well consist with their superiority in spirituals." (See ABBEY.)

ABBOTSFORD (Scotland) stands near the abbot's ford on the river Tweed, between two and three miles from Melrose, and 30 from Edinburgh. Scott purchased the property in 1811, and the present residence was completed in 1824.

ABDICATION.—The most remarkable instances of the abdication by rulers, of supreme power, are those which have occurred under no pressure of political exigencies, but from the promptings of purely personal motives. The act of abdication committed by James II. of England was not formal, but constructive: he had deserted the throne, and parliament declared it vacant. The abdications of Napoleon I., of Louis Philippe, and of many other rulers, were compulsory; and it is only by a perversion of the meaning of the word, that it can be applied to such transactions.

B.C.

79. Sylla, the dictator.

A.D.

- 305, May 1. The emperor Diocletian, called by Gibbon "the first example," Maximilian abdicated at the same time, but re-assumed the purple in 306.
- 747. Carloman, eldest son of Charles Martel, abdicated and became a monk.
- 1294. Peter Morone, the hermit pope, elevated to the papal chair as Celestine V., July 5, abdicated Dec. 13, and retired to his old mountain hermitage, above the pleasant valley of Sulmona, in the Abruzzi.
- 1555, Oct. 25. Charles V. resigned the imperial dignity. He abdicated the Spanish throne in 1556.
- 1654, June 16. Queen Christina of Sweden abdicates.
- 1730. Victor-Amadeus II., Sardinia.
- 1809, March 29. Gustavus IV., Sweden.
- 1814, April 6. Napoleon I., France.
- 1830, Aug. 2. Charles X., France.
- 1848, Feb. 24. Louis Philippe, France.
- 1848, March 21. Louis Charles, Bavaria.
- 1848, Dec. 2. Ferdinand I., Austria.
- 1849, March 26. Charles Albert, Sardinia.

ABECEDARIANS.—This branch of the sect of Anabaptists was founded, in the 16th century, by Stork, a disciple of Luther. He maintained that all knowledge only prevented men from attending to the divine instruction inwardly communicated, and refused to learn anything, even the alphabet: hence their peculiar designation.

ABELITES, sometimes called **Abelians**, a sect of heretics that sprung up at Hippo, in Africa, during the 4th century. They married, but abstained from matrimonial intercourse, following, as they pretended, the example of Abel, because no mention is made in Scripture of his children. When a man and a woman entered this society, they adopted a boy and a girl. The heresy was not of long duration. It is generally supposed to have commenced just before the final separation of the Eastern and Western empires, under Arcadius (395), and to have terminated during the reign of Theodosius the Younger (414–450).

ABENCERRAGES and **ZEGRIS**, two Moorish families, whose quarrels are said, by some writers, to have deluged Granada with blood (1478–1490).

ABENSBERG (Battle), April 20, 1809, between the Austrians and the French. “The Austrians,” says Alison, “were not routed at any point, and no artillery was taken; nevertheless, they had to lament the loss of 8,000 men; the archduke Charles’s communications with Landshut were thrown open to the enemy; they had been deprived of the advantages of the initiative; and, what is of incalculable importance, had been unsuccessful in the first considerable action of the campaign.” The results were, that Landshut fell on the 21st, the battle of Eckmühl was fought on the 22nd, and Ratisbon captured on the 23rd of April.

ABERDEEN (Scotland) is supposed to have formed the seat of a settlement during the 3rd century. The episcopal see was transferred hither from Mortlich, Banffshire, by David I., in 1137; and George Haliburton, promoted in 1682, was the last bishop. Old Aberdeen was made a free royal burgh in 1154. In 1296, Edward I. passed through this city, after defeating and deposing John Balliol. The castle was taken, and the fortifications were levelled, in 1308; and the city was burned by the English in 1336. New Aberdeen was then erected, and became an important seat of commerce during the Middle Ages, but suffered greatly from the wars between England and Scotland. King’s College, Aberdeen, was chartered by papal bull in 1494, and completed in 1500. It is an extensive building, containing a chapel, library, and museum. Marischal College, in the new town, was founded in 1593 by George Keith, fifth Earl Marischal. The two colleges were united by a deed of union in the reign of Charles I. It was repealed in 1661.

ABERDEEN ADMINISTRATION, known as the “Coalition Ministry,” was formed soon

after the resignation of Lord Derby’s first administration, Dec. 17, 1852, and presided over by the fourth earl of Aberdeen. The feeble prosecution of the war against Russia by this cabinet rendered it unpopular, and its resignation followed the motion for inquiry into the state of the army before Sebastopol, carried in the House of Commons on Jan. 29, 1855, by a majority of 157. The cabinet was thus constituted:—

Treasury	Earl of Aberdeen.
Lord Chancellor	Lord Cranworth.
President of the Council ..	Earl Granville.
Privy Seal	Duke of Argyll.
Chancellor of Exchequer ..	Mr. Gladstone.
Home Secretary	Lord Palmerston.
Foreign Secretary	Lord John Russell.
Colonial Secretary	Duke of Newcastle.
Admiralty	Sir James Graham, Bart.
Board of Control	Sir C. Wood, Bart.
Secretary at War	Mr. Sidney Herbert.
Public Works	Sir W. Molesworth, Bart.
Without Office	Marquis of Lansdowne.

The following changes occurred:—the earl of Clarendon became Foreign Sec. Feb. 21, 1853, in place of Lord John Russell, who retained a seat in the cabinet, without office, and became President of the Council in the place of Earl Granville, who was made Chancellor of the duchy of Lancaster, with a seat in the cabinet, June 9, 1854. The War department was separated from the Colonies, June 8, 1854. The duke of Newcastle retained the former, and Sir George Grey acceded to the Colonial secretaryship. Lord John Russell resigned office Jan. 23, 1855; but as the ministry retired on the 1st Feb., the vacancy was not filled up. (*See PALMERSTON’S First Administration.*)

ABHORRERS.—The elections of 1679 having proved unfavourable to the court party, Charles II., by repeated prorogations, prevented the assembling of the new parliament. Petitions praying for the immediate commencement of the session poured in from various parts of the kingdom. The church and court party encountered these demonstrations by addresses to the king, abounding in loyal expressions, supporting the prerogative, and declaring the deepest abhorrence of those who sought to interfere with the same by dictating to him with respect to the meeting of parliament (1680). Hence the rival parties were called “Addressers, or Petitioners,” and, “Abhorrrers.” These appellations soon gave place to the well-known terms Whig and Tory, that have come down to the present day.

ABINGDON LAW.—On the capture of this town by the earl of Essex (May 25, 1644), a garrison was placed in it by the parliamentarians. During the various attempts made by the royalists to regain this important place, a singular custom is said to have prevailed; and from this the term “Abingdon Law” arose. The cruel practice of the garrison was to hang all the Irish prisoners without trial; and many Englishmen suffered, either by design or from accident, under this barbarous custom.

ABJURATION OATH.—The last act (13 Will. III. c. 6) to which the royal assent was given by William III. on his deathbed, March 2, 1702, required all persons in office, members of the universities above 18, members of the legal profession and schoolmasters, peers and members of parliament, to take the oath abjuring the claims of the Stuarts. The oath was altered in the reign of Queen Anne and put into a new form by 6 Geo. III. c. 53 (1766). It was changed for Roman Catholics by 31 Geo. III. c. 32 (1791), and in 1829 by the Roman Catholic Relief Act. By the statute 21 & 22 Vict. c. 48 (July 23, 1858), one oath was substituted for the three oaths of Abjuration, Allegiance, and Supremacy.

ABJURATION OF THE REALM, was an engagement, on oath, to quit the realm, and never return to it without the king's license. The ancient common law of England allowed a person who had committed any felony, except treason and sacrilege, to make such an oath before the coroner within forty days after taking sanctuary, under the penalty of death by hanging if he broke it, unless he was a clerk; in which case he was allowed benefit of clergy. Abjuration underwent several modifications in the reign of Henry VIII., and was abolished as a privilege, together with that of sanctuary, in 1624 (21 James I. c. 28, s. 7). By 35 Eliz. c. 1, Roman Catholics and Protestant dissenters convicted of having refused to attend the service of the Church of England, might be required to abjure the realm. From this act, which was passed in 1593, Protestant dissenters were exempted in 1689 (*see TOLERATION ACT*), but Popish recusants not until 1791.

ABO (Finland).—This city was built by Eric IX., king of Sweden, 1157. It was taken from the Swedes by the Russians in 1713 and 1808; and was, with the whole of Finland, to the Tornea, finally ceded to Russia by the treaty of Fredericksham, Sept. 17, 1809. A fire occurred here Aug. 22, 1775, by which above 200 houses and fifteen mills were consumed, and some lives lost; and another, Sept. 4, 1827, destroyed 780 buildings, with the university, founded in 1640. Abo was made an archbishopric July 20, 1817.

ABO (Treaty of), between Russia and Sweden, August 18 (O.S. 7), 1743, terminated the war commenced in 1741. Sweden ceded to Russia, Livonia, Esthonia, and Ingria, together with the eastern portion of Finland, making the river Kymene the boundary between the two states; whilst Russia relinquished to Sweden the remainder of her conquests in Finland.

ABORIGINES, or ABERRIGINES.—Some writers consider the term to represent a colony of Greeks, who settled in Italy long before the Trojan war. Niebuhr states that the name means the inhabitants of the country from the beginning, answering to the Greek *autochthones*; and Sir G. C. Lewis declares the obvious Latin etymology of

aborigines to be the true one, adding, "The name was applied to a primitive Italian race, at a comparatively early date; but there is no ground for adopting the view of Dionysius, which makes it a national appellation, and identifies it with the people having an historical existence." Hence the later application of the term to the primitive inhabitants of any country.

ABOUKIR (Egypt).—The Turks were defeated here by the French, under Napoleon I., July 25, 1799. On the 8th of March, 1801, an English army, under Abercrombie, effected a landing near this place, and compelled the French to retreat. (*See NILE.*)

ABRAHAM (Æra of), so called from the patriarch Abram, commenced, according to the best authorities, Oct. 1, 2016 B.C.

ABRAHAM-MEN, beggars, who roamed about the country, on the dissolution of the religious houses in the 16th century. They were also called "Tom of Bedlam's Men." The term "to sham Abraham" is supposed to have been derived from the tricks of these vagrants.

ABRAHAMITES, ABRAHAMIANs, or IBRAHIMI-MIAH.—A sect of heretics, the followers of one Abraham of Antioch, called by the Arabs, Ibrahim, who attempted to revive, towards the close of the 8th century, the errors of the Paulicians. Several Syrians were seduced; but Cyriacus, patriarch of Antioch, vigorously opposed the new heresy, and it was extinguished in the commencement of the 9th century.

ABRAHAMITES.—An order of monks were thus named. They rose in the 9th century, and were exterminated, on account of their idolatry, by the emperor Theophilus (circ. 835).—A modern sect of Abrahamites was discovered in Bohemia in 1782. They professed the religion of Abraham before his circumcision, and held various peculiar opinions: some were Jews by birth, others Protestants, and a few Roman Catholics. They are said to have been called Abrahamites from their doctrine, and Adamites from their real or supposed practices. Joseph II., in 1783, banished a large number of these sectaries to Transylvania and Temeswar, on account of their obstinate refusal to incorporate themselves with one of the religions tolerated by law. These Abrahamites are sometimes called Deists, or Nihilists.

ABRANTES (Treaty).—Disgusted at the provisions of the treaty of Badajos, concluded between Portugal and Spain, June 6, and ratified June 16, 1801, Napoleon overran the former kingdom. The war was brought to a close by the treaty of Abrantes, signed Sept. 29, 1801, by which Portugal agreed to shut its ports against England, relinquished one half of Guiana to France, making the river Carapanatuba the boundary between the possessions of the two states in that part of the world. The commerce of France was to be placed on the same footing as that of the most favoured nations; and, by a secret article, Portugal agreed to pay £800,000 for the immediate evacuation of

the country by the French troops. This treaty having been ratified at Madrid, is sometimes named after that city.

ABSENTEE TAX.—Parry (Parliaments, &c. of England, p. 142) notices a petition on Irish absenteeism presented to parliament in 1380, during the reign of Richard II. Complaints were frequently made on this subject; and, in the reign of Henry VIII., the estates of several non-resident landlords were seized. In 1715, a tax of 4s. in the pound was levied on all profits, fees, pensions, &c., derived from Ireland, in all cases where the recipients did not reside in that country six months in the year. The crown reserved the right of giving leave of absence. The tax ceased in 1753, and attempts at its reimposition were tried, but without success, in 1773 and in 1783. A curious debate occurred in parliament (Saturday, Dec. 12, 1801) respecting a proposal to fine absentees from church 12 pence every Sunday. It was to be levied by a distress warrant from a justice of the peace. The proposal was rejected, the numbers being, ayes 105, noes 106. Some member called on the Speaker to give his vote for the bill; but Cecil said, "The Speaker hath no voice; and, though I am sorry for it, the bill is lost, and farewell to it."

ABSTINENCE.—Many cases of extraordinary cures effected, and a great age attained, by use of spare diet, are mentioned by different writers. Abstinence from particular meats was enjoined upon the Jews by the Divine law, and many of the early Christians adopted a similar practice. The Roman Catholic church has selected special seasons and days on which particular kinds of abstinence are strictly enforced. Among the primitive Christians in the East, several hermits, who retired to the deserts, and lived upon bread and water, and even roots, are said to have attained an extraordinary age. Amongst the most celebrated may be mentioned,

	Years.
St. Paul the Hermit born in 228, who lived 113	
St. Antony..... " 251 " 105	
St. Simeon the Stylite .. " 350 " 112	
St. Arsenius, tutor to the emperor Arcadius about 350 " 120	

ABSTINENTS, ABSTINENTES, OR ABSTAINERS, heretics who appeared in France and Spain, early in the 4th century, during the persecutions of Diocletian and Maximian. They condemned marriage, and the use of flesh and wine: some of their opinions were borrowed from the Gnostics and Manichæans. Baronius believes these heretics to have been identical with an Egyptian sect called the Hieracitæ, or followers of Hieron, that arose at the same period, and held similar opinions.

ABYDOS, an ancient town on the Asiatic shore of the Hellespont, or Dardanelles. It is said to have become the seat of a Milesian colony B.C. 715. Xerxes constructed a bridge of boats from this place to the European side of the Hellespont, over which his

immense army passed into Greece, B.C. 480. It is celebrated from the story of Leander, who, being in the habit of swimming from Abydos to the other side of the Hellespont to visit Hero, was at last drowned. Lord Byron, who frequently performed this feat, ridicules the story.

ABYDOS (Sea-fight), between the Athenian and the Peloponnesian fleets, in Aug. 411, B.C. The former were victorious.

ABYDOS (Tablet of), containing a genealogy of the early kings of Egypt, was found, in 1818, by Mr. W. Banks, on an interior wall of a building at Abydos, an ancient city of Upper Egypt. The tablet consists of three compartments, and contains twenty-six shields of the predecessors of Rameses the Great. It has been deposited in the British Museum.

ABYSSINIA (Africa), part of the ancient Ethiopia, of which the capital was Auxume, or Axum. The Abyssinians had a tradition that Cush, Noah's grandson, was their first progenitor, and that Axum was built in the time of Abraham. The fragments of statues collected by Bruce (Travels, vol. ii. p. 303) are regarded as proofs that the Abyssinians embraced Sabaism, or the worship of the heavenly bodies, a superstition into which Noah's descendants fell. The Abyssinians were powerful in the 6th century, about which period Yemen was subjugated by them. In 925 a Jewess, named Sague, subverted the native dynasty, and destroyed Axum. The kingdom was restored in 1255 by the emperor Iquon Amlaq. Little is known of its subsequent state until the 16th century, when the Portuguese assisted the Abyssinians against a powerful enemy. The introduction of Roman Catholicism, and the various struggles to which it led, will be found under **ABYSSINIAN CHURCH**.

ABYSSINIAN ERA. (*See* **MUNDANE ERA OF ALEXANDRIA**.)

ABYSSINIAN CHURCH, had its origin, according to the best authorities, about the year 330, when Frumentius was ordained bishop of Axum, by Athanasius, patriarch of Alexandria. Some writers are of opinion that the Abyssinians were first converted in the apostolic age, by the eunuch of Queen Candace, Sept., 37. (Acts viii. 27—39.) The Abyssinians formed a branch of the Jacobite or Coptic church, holding the Monophysite doctrine of one incarnate nature; into which heresy they fell in the 6th century. Little was known in Europe of the Abyssinian church until John II., king of Portugal, heard of it from some of his subjects who had penetrated to the kingdom of Congo, in 1486. Marsden (Christian Churches and Sects, vol. i.) has investigated this point with great care. Pedro Cavilham, sent out by John II., entered Abyssinia in 1490. A treaty was set on foot between the two countries in 1509, and it was followed by a series of intrigues, with a view to the subjection of Abyssinia politically to Portugal, and in spiritual matters to Rome. Oviedo, a Jesuit, who had been consecrated bishop of

Hierapolis by the pope, excommunicated the whole Abyssinian church, Feb. 5, 1559, in the church of Decome. The mission failed, and was recalled by a bull from St. Peter's, in 1560. A second Jesuit mission, dispatched in 1603, resorted to unjustifiable measures, and after a series of struggles, obtained the formal submission of the Abyssinian church to Rome, Dec. 11, 1624: a rupture soon occurred, and the Latin bishop retired from Abyssinia in 1633. In 1750 the society of the Propaganda sent a fresh mission of three Franciscan friars, who were received with great favour by the court; but the people rose in rebellion, and the emperor was forced to expel them. In 1827 a Protestant mission, consisting of Dr. Gobat, afterwards bishop of Jerusalem, and Mr. Isenberg, was sent to Abyssinia, and its labours were continued until 1842, when it was withdrawn, through the adverse influences of the Church of Rome and the opposition of the Abyssinian priesthood. Mosheim states that the Æthiopic church continues to receive her bishop from Alexandria, and is dependent upon it. The religion of the Abyssinians is represented as a compound of Christianity, Judaism, and Heathenism. They practise circumcision, believe in sorcery and evil spirits, and make use of amulets. They pray to the Virgin Mary, and for the dead, though not holding the Romish doctrine of purgatory, and do not in general believe in transubstantiation. They acknowledge their emperor as the head of the church, but the abuna, or patriarch, is the controlling power. They agree with the Greek church in maintaining the procession of the Holy Ghost from the Father alone.

ACACIANS.—The followers of Acacius, surnamed Luscus, or Monophthalmus, because he had but one eye, bishop of Cæsarea, 340–365; and the followers of Acacius, patriarch of Constantinople, 471–489, were known by this name. The former neither held, with the Arians, that Christ was a created being, nor with the Semi-Arians, that he was of like substance; but simply that he was like the Father.—Acacius, patriarch of Constantinople, sided with the emperor Zeno, whose Henoticon, or Edict of Union, intended to appease the feud between the rival churches of Constantinople and Alexandria, was issued in 482, and was drawn up, it is supposed, by Acacius himself. (See *HENOTICON*.) The edict was rejected by Felix III. in 483, and Acacius himself was excommunicated for obstinate communion with heretics (July 28, 484). Acacius in his turn ordered that Felix, bishop of Rome, should be erased from the list of bishops in communion with the East (Aug. 1, 484). Acacius persisted in his refusal to submit to Rome, and died in 489. His supporters were called Acacians. Other sects of heretics were thus designated.

ACADEMIA (Athens), described by Diogenes Laërtius as a suburban place of exercise planted like a grove, and said to be thus

called from an ancient hero, named Hecademus. In this place Plato formed his school (B.C. 374), and was succeeded by his nephew Speusippus (B.C. 347). From this term the modern word academy is derived.

ACADEMY.—The custom for learned men to form themselves into associations called, after the ancient schools, academies, originated in Italy in the 15th century, and it gradually extended over Europe. Hallam says (Lit. Hist. vol. i. pt. i. ch. ix.), "Italy in the 16th century was remarkable for the number of her literary academies; institutions which, though by no means peculiar to her, have in no other country been so general or so conspicuous." The Italian academies of that period are remarkable for the ridiculous titles, or, as Hallam terms them, "names humorously quaint," by which they were known. Florence had its academy of "Bran," or "the Sieve;" Perugia, of "the Insensate;" Genoa, of "the Sleepy;" Sienna, of "the Blockheads;" and Viterbo, of "the Obstinate." Disraeli's theory (*Curiosities of Lit.* ii. 489) is, that "the invention of these ridiculous titles for literary societies was an attempt to throw a sportive veil over meetings which had alarmed the papal and the other petty courts of Italy, and to quiet their fears and turn aside their political wrath. They implied the innocence of their pursuits by the jocularity with which the members treated themselves, and were willing that others should treat them." The date of the establishment of the most celebrated academies is given under the names of the places in which they flourished. Many Italian towns possessed several, and Tiraboschi furnishes full details on the academies of that part of Europe.

ACADIA (North America).—Discovered by John Cabot, in 1497. The French settled here in 1604, and came into frequent collision with the English settlers in Virginia. In 1621, Acadia was granted by charter to Sir William Alexander, and its name changed to *NOVA SCOTIA*, which see.

ACAPULCO (Mexico).—During the Spanish rule in America, a galleon, laden with specie, &c., was sent every spring from Acapulco to Manila. It returned in the autumn with a costly freight of a different kind. Commodore, afterwards Lord Anson, intercepted one of these vessels, worth £313,000, July 1 (O. S. June 20), 1743. Capt. Hyde Parker captured another, valued at half a million, Oct. 31, 1762, during the siege of Manila.

ACARNANIA.—This province of ancient Greece, according to tradition, received its name from Acarnan, son of Alcæon, who settled at the mouth of the Achelous. The Corinthians are said to have founded several towns on the coast in the middle of the 7th century B.C. The Acarnanians lived in villages which were united in a political league. Little, however, is known respecting its constitution. The Acarnanians first came into prominent notice about the time of the

Peloponnesian war. They espoused the cause of the Amphilocheians expelled from Argos Amphilochicum by the Ambracians, B.C. 432, and both applied to the Athenians for aid.

B.C.

- 432. The Athenians defeat the Ambracians and drive them from Argos Amphilochicum.
- 430. The Ambracians foiled in an attempt to recover Argos Amphilochicum.
- 429. The Ambracians induce the Spartans to aid them in an attack upon Acarnania, but are defeated.
- 426. The Acarnanians defeat the Ambracians and their allies at Olpe and at Idomene. Peace for a hundred years concluded between Acarnania and Ambracia.
- 391. Agesilaus, king of Sparta, invades Acarnania.
- 390. The Acarnanians submit to the terms imposed by Agesilaus.
- 343. The Athenians send an expedition against the Acarnanians, who support the cause of Philip of Macedon.
- 243. The Acarnanians invade Ætolia, and are compelled to retire.
- 239. The Ætolians invade Acarnania.
- 218. The Ætolians, who had conquered a considerable portion of Acarnania, cede it to Philip V., in order to obtain peace.
- 200. The Acarnanians support Philip V. against Rome.
- 197. The Acarnanians submit to Rome.
- 145. Acarnania subject to Rome.

ACCEPTANTS, or CONSTITUTIONISTS.—In 1713, Clement XI. issued his famous constitution or bull Unigenitus, condemning as heretical 101 propositions selected from the commentary of Quesnel. This triumph of the Jesuits over the Jansenists caused great agitation in France, and the two parties were called, the *Constitutionists* or *Acceptants*, and the *Appellants* or *Recusants*. The latter appealed to a general council. They were imprisoned, and suffered persecution. The death of Louis XIV. caused a temporary cessation of the strife, and the duke of Orleans, as regent, induced the Recusant bishops to accept the bull, with certain modifications. Most of them consented to do so for the sake of peace (1720); but the Appellants were again oppressed and persecuted (1723). The Unigenitus was made national law (1730), and the Appellants continued their resistance.

ACCORDION.—This musical instrument was first introduced into England from Germany about the year 1828.

ACCOUNTANT-GENERAL.—This officer of the court of Chancery was first appointed in 1726, by 12 Geo. I. c. 32,—an "Act for securing the moneys and effects of the suitors;" and the office was abolished Oct. 15, 1841, by 5 Vict. c. 5, s. 15.

ACCUSERS, FALSE.—The ancient Romans punished false accusers by casting them headlong from the Tarpeian rock; and by a subsequent law (Lex Remmia), they were ordered to be burnt in the face. By the law of Valentinian and Gratian, in the Theodosian code, offenders of this kind, "against men's fame and reputation, against their fortunes, and against their lives," were condemned to the same punishment as that to which the person falsely accused would have been subjected, had he been convicted.

Those who endeavoured by false accusation to deprive other men of their property, were ordered to be prosecuted to the last degree, with confiscation and death. The early ecclesiastical laws were severe on this point. The councils of Vannes (465) and Agda, in France (Sept. 11, 506), imposed a penance upon them, and the first council of Arles (314) obliged them to do penance all their lives. In the earlier periods of English, as well as of German history, the accuser was obliged to prove the crime, or suffer the same punishment the accused would have undergone, had he been convicted; and a similar law was in force in the time of Henry III. They were also branded in the time of Henry VIII., and many severe punishments will be found recorded in our statute-book.

ACEPHALI.—The term was first employed by ecclesiastical writers, and applied to those who followed neither Cyril, nor John of Antioch, in the disputes at the council of Ephesus (3rd General) (431). As a natural consequence, it was used to describe the various divisions of the Eutychians, who denied the property of two substances in Christ, and contended that there is but one nature in his person. They resisted the decision of the council of Chalcedon (451), and were, as Bingham says, "called *Acephali*, that is, *without head*, because the first authors of the sect at Alexandria, separated from their bishop and held conventicles, and gave baptisms in private houses." The heresy was revived in 463, and condemned in 526. The term has been applied to various sects, the members of which followed no particular leader, and came to be applied to a body of levellers in this country, in the time of Henry I. Cowel, with reference to these men, remarks, "Those are called *acephali*, who were the levellers of that age, and acknowledged no head or superior."

ACHÆAN LEAGUE.—This celebrated confederacy, originally formed between twelve cities of Achaia, was dissolved by the factions that prevailed soon after the death of Alexander, B.C. 323. Four of the principal cities of Achaia, — Dyme, Patræ, Tritæa, and Pharæ, united for its restoration, B.C. 280; Ægium and Bura joined B.C. 275; Cerynea B.C. 274; and Leontium, Pellene, and Ægira soon after. Aratus formed the idea of extending it to the other Grecian states, and, having liberated Sicyon, persuaded his fellow-citizens to join the league, B.C. 251.

B.C.

- 246. Aratus first appointed general of the League.
- 243. Aratus takes Corinth, and annexes it to the League.
- 242. Megara and other Grecian cities join the League.
- 239. Megalopolis joins the League.
- 236. Argos, Ægina, &c. join the League.
- 227. War between the Achæan League and Sparta.
- 226. The Achæans defeated by Cleomenes III., at Ladocea.
- 221. Cleomenes III. defeated by the Achæans at the battle of Sellasia, and the war brought to a close.

- B.C.
 220. War between the Ætolian and the Achæan leagues.
 217. Peace concluded.
 208. Philopemen general of the League.
 207. Philopemen effects important reforms in the League, and defeats the Spartans at Mantinea.
 198. The League concludes an alliance with Rome.
 191. The whole of the Peloponnesus included in the Achæan League.
 183. The Messenians separate from the League, but again submit.
 167. One thousand Achæans carried off to Rome.
 150. Rome declares war against the Achæan League.
 147. Mummius defeats the Achæans at the battle of Leucopetra.
 146. The Achæan League is dissolved, and the whole of Southern Greece made a Roman province under the name of Achaia.

ACHAIA, or ΑΧΑΪΑ, an ancient Grecian state, comprising a narrow district of the northern Peloponnesus. According to tradition, it was first peopled by a Pelasgian tribe, which was expelled by the Ionians. Soon after the Dorian migration, the Achæans, driven from Argos and Laconia, settled in this part of Greece, which, after them, was called Achaia (circ. B.C., 104). Monarchical institutions are said to have prevailed for some time, and upon their abolition, the territory of Achaia was divided amongst twelve cities. The Achæans kept aloof from the other Grecian states, and formed a league, which met first at Helice, and after this city had been swallowed up by the sea, B.C. 373, at Ægium. They fought with the Athenians and the Bœotians against Philip, at the battle of Chæronea, Aug. 7, 338 B.C., and were allied with the Spartans against Macedon, B.C. 330. Four cities, Patræ, Dyme, Tritæa, and Pharæ, renewed the ancient league B.C. 280. (See ΑΧΑΪΑΝ ΛΕΑΓΥΗ.)

ACHAIA (Principality of), founded in 1205 by William of Champlitte, who, with his band of followers, subdued one half of the Peloponnesus before 1208, when he left it in charge of Geoffrey Villehardoin, his bailly, who succeeded to the throne in 1210. He was followed by Geoffrey II. in 1218, and William in 1246. Achaia then became a fief of the crown of Naples, and after undergoing a variety of vicissitudes, terminated under Centurione, in 1430, having existed 225 years. The succession was, however, several times broken before that date. Finlay (Medieval Greece and Trebizond, p. 502) gives the following chronological list of the princes of Achaia and Morea:—

- A.D.
 1205. William of Champlitte.
 1210. Geoffrey I. Villehardoin.
 1218. Geoffrey II.
 1246. William.
 1277. Isabella, married thrice.
 1. Philip son of Charles of Anjou, king of Naples, died 1278.
 2. Florenz of Hainault, 1291—1297.
 3. Philip of Savoy, 1301—1311.
 1311. Maud of Hainault, married thrice.
 1. Guy II., duke of Athens, who died 1308.
 2. Louis of Burgundy, 1313—1315.
 3. Hugh de la Palisse, 1316.

Claimants of the Principality.

- 1317—1324. John, count of Gravina, pretended husband of Maud of Hainault.
 Eudes IV., duke of Burgundy, under his brother's will.
 1324—1332. Philip of Tarentum, as lord-paramount, in virtue of the forfeiture of Maud, and by purchase from Eudes IV.
 1332—1364. Robert, titular emperor of Romania.
 1364—1387. Mary of Bourbon, widow of Robert.
 Louis, duke of Bourbon, her nephew, died in 1410.

Suzerains or lords-paramount of Achaia.

The Latin emperors of Romania, until Baldwin II. ceded his rights to Charles of Anjou, king of Naples, in 1267.

- 1267—1285. Charles of Anjou.
 1285—1294. Charles II., king of Naples.

Charles II. ceded his rights to his son, Philip of Tarentum, who married Catherine of Valois, titular empress.

- 1294—1332. Philip of Tarentum.
 1332—1346. Catherine of Valois, by grant from her husband.
 1346—1364. Robert, titular emperor and reigning prince of Achaia.
 1364—1373. Philip III., titular emperor.
 1373—1383. James de Baux.

ACHÉEN, or ATCHEEN.—This kingdom, in Sumatra, was first visited by the Portuguese in 1509, and by the English in 1602. A factory was established here by the East-India Company in 1659, and a commercial treaty was concluded by Sir Stamford Raffles in 1819.

ACHONRY (Sligo), the seat of an Irish bishopric, one of the most ancient in that country, formerly called Achad-Chaoín and Achad-Conair. The church is said to have been founded by St. Finian, bishop of Clonard, about 530, on a site granted by the lord of Leney, or Luigny, by which name the bishops are known in the earlier accounts. St. Finian's friend and disciple, Nathy, was the first bishop. In 1607, this see was united to that of Killala. In 1834, on its voidance, according to the provisions of 3 & 4 Will. IV. c. 37, Achonry was, with Killala, united with Tuam.

ACHROMATIC TELESCOPES, invented by John Dollond, of London, in 1758. Newton himself despaired of constructing these glasses. The right of priority is by some said to belong to a man whom Humboldt terms "the mysterious Chester Moore, of Moore Hall, Essex." He is supposed to have invented them in 1729.

ACLEA (Battle), now OCKLEY, or OAK-PLAIN, in Surrey, where Ethelwulf and his son Ethelbald defeated the Danes, in 851.

ACOUSTICS, or the science of sound, was known, though imperfectly, at a very early period. Pythagoras, B.C. 540, and Aristotle, B.C. 342, understood the mode in which sound was transmitted through the air. Kircher was the first to show, says Beckmann (vol. i. p. 94), that "Alexander the Great had a prodigious large horn, with which he could assemble his army at the distance of a hundred stadia, or eight Italian miles." Roger Bacon, in the 13th century, was the first who investigated this science experimentally.

He was followed by Galileo, in the 17th century, and others. Newton completed his mathematical demonstrations in 1700. Euler and Lagrange added greatly to the knowledge of this science, which was placed on an independent basis by Chladni, towards the close of the 18th century.

ACRE (Syria), or **St. JEAN D'ACRE**, anciently **Accho**, called by the Greeks **Ptolemais**, a fortified city and seaport, famous for the sieges it has sustained. It belonged originally to the Phœnicians, and after changing masters several times, fell under the Roman yoke in the time of Claudius. It was taken by the Saracens in 638; by Baldwin, after a siege of 20 days, in 1104; and by Saladin in 1187. Its capture by Richard I. was the great achievement of the first crusade. The siege commenced in July, 1189, and terminated with the fall of the city, Friday, July 12, 1191; soon after which it received the name of **St. Jean d'Acre**, and was given to the Knights Hospitallers. The Mamelukes gained possession May 18, 1291, and the Turks in 1517. Sir Sydney Smith defended it against Napoleon I., and compelled him to retreat, after a siege of 61 days, May 20, 1799. Ibrahim Pasha captured it in 1832, but it was retaken by an English and Austrian fleet Nov. 3, 1840; and it has since remained in the possession of the Turks.

ACROPOLIS.—The principal Grecian cities contained a kind of stronghold or citadel, situated, as the term **acropolis** indicates, on the highest point. That of Athens, of which the ruins still remain, was the most celebrated. It consisted of several public buildings, and was encircled by a strong wall, said to have been built by the Pelasgians B.C. 1057. On the taking of Athens by the Venetians, 1687, the roof of the Parthenon, one portion of the **Acropolis**, was demolished by a bomb. In the Greek war of independence, the **Acropolis** was captured from the Turks June 21, 1822; and retaken by them May 17, 1827.

ACT OF SETTLEMENT.—The death of the duke of Gloucester (July 29, 1700), son and last surviving child of the Princess Anne, afterwards queen, rendered a new settlement of the crown necessary, it being unprovided for after the death of William III. and of Anne. Accordingly, a measure was introduced during the session of 1701, to supply matters of great importance, omitted in the Bill of Rights. This statute (12 & 13 Will. III. c. 2) provided that in case of default of issue of William III. and also of the Princess Anne respectively, the crown should devolve upon the next Protestant in succession, Sophia, married to the elector of Hanover, and the heirs of her body, being Protestants. It was further enacted, that the occupant of the throne "shall join in communion with the Church of England as by law established;" that if a foreigner succeeded, the nation should not be required to defend any foreign dominions without the consent of parliament; that the sovereign should not leave the country without permission of par-

liament; that all matters cognizable in the privy council should be transacted there, and all resolutions taken thereupon signed by such of the privy council as should consent to them; that only those born of English parents should be eligible to a seat at the privy council, in either house of parliament, or to hold any office or receive any grant under the crown; that no person serving under, or receiving a pension from the crown, should be capable of serving as a member of the House of Commons; that the judges should hold upon good behaviour, and not be removed except upon the address of both houses of parliament; and that no pardon under the great seal of England should be pleaded to an impeachment by the Commons (June 12, 1701). The provision against the sovereign quitting the kingdom without consent of parliament was repealed in 1715 (1 Geo. I. stat. 2, c. 51). The provision respecting matters to be transacted in the privy council was repealed by 4 Anne, c. 8, s. 24 (1705), and the general disqualification of pensioners and placemen having been found inconvenient was repealed by 4 Anne, c. 8, s. 25, which statute was re-enacted by 6 Anne, c. 7, at the union between England and Scotland. Section 25 of 6 Anne, c. 7, decreed that the holders of certain offices, therein specified, and of all new offices or places of profit under the crown, created at any time since Oct. 25, 1705, should not be allowed to sit in the House of Commons; and section 26 provided that any member accepting any office of profit from the crown should vacate his seat, being eligible to stand again. So numerous are the special disqualifications that they have to be collected from at least 116 statutes.

ACT OF SUPREMACY.—In 1534, by 26 Hen. VIII. c. 1, the king was declared "the only supreme head in earth of the Church of England," and he formally assumed that title on the 15th of January. All benefited ecclesiastics, and all laymen holding office under the crown, were obliged by this act to take the oath abjuring the spiritual as well as the temporal jurisdiction of the pope. In 1554, by 1 & 2 Phil. & Mary, c. 8, s. 12, this law was repealed, but it was restored by 1 Eliz. c. 1, in 1559. The denial of the king's supremacy was declared treasonable in 1547, by 1 Edw. VI. c. 12, s. 7.

ACT OF TOLERATION (1 Will. & Mary, st. 1, c. 18), for the relief from certain penalties, of dissenters from the Church of England, except papists and persons denying the Trinity, was passed May 24, 1689, and confirmed by 10 Anne, c. 2 (1711). The clause excepting persons denying the Trinity was repealed by 53 Geo. III. c. 160, July 21, 1813, and the Roman Catholics were relieved by 10 Geo. IV. c. 7, passed April 13, 1829.

ACT OF UNIFORMITY.—By 2 & 3 Edw. VI. c. 1 (Jan. 15, 1549), it was enacted that the order of divine worship contained in the book drawn up by the commissioners, "by the aid of the Holy Ghost," should be the only one used after the next Whitsuntide.

Those who refused to use it, or who spoke or wrote against it, were fined for the first or second offence, and rendered subject to forfeiture of goods and imprisonment for life for the third. This statute was confirmed by 5 & 6 Edw. VI. c. 1 (1552), repealed by 1 Mary, sess. 2, c. 2 (1553), and restored by 1 Eliz. c. 2 (1559). It formed the basis of the Act of Uniformity, commonly so called, passed in 1662 (13 & 14 Car. II. c. 4), which contained stringent regulations with respect to the use of the Book of Common Prayer; received the royal assent May 19th, came into operation Aug. 24, 1662, and was made perpetual as to the establishment of the church by 5 Anne, c. 5 (1706), and by the Act of Union, 5 Anne, c. 7. A similar act was passed by the Irish parliament (17 & 18 Car. II. c. 6) in 1665.

ACTIAN GAMES were instituted by Augustus, in commemoration of his victory over Antony off Actium, B.C. 31, and celebrated every fifth year. They were probably a revival of an ancient festival, as there was a temple of Apollo at Actium, mentioned by Thucydides (i. 29) and by Strabo (vii.), which was enlarged by Augustus.

ACTIATIC, or ACTIAN ÆRA, so called from the battle of Actium, which secured Augustus in possession of the Roman empire. This æra dated amongst the Romans from Jan. 1, B.C. 30; in Egypt, where it prevailed till the reign of Diocletian, it dated from Aug. 29, B.C. 30; and amongst the Greeks of Antioch, by whom it was used as late as the 9th century, from Sept. 1, B.C. 30.

ACTINOMETER.—Literally, a *measurer of solar rays*. This instrument, employed for the purpose of ascertaining the intensity of the heat in the direct rays of the sun, was invented by Sir John Herschel about the year 1820.

ACTIUM (Sea-fight).—This decisive engagement between the fleets of Augustus and Antony took place off Actium, a promontory in Acarnania, Sept. 2, B.C. 31. After the battle had lasted some time, Cleopatra took to flight; Antony followed, and Augustus obtained a complete victory, which rendered him master of the Roman world.

ACTON BURNEL, or SHREWSBURY (Statute of), sometimes called the Statute of Merchants, was passed on the 12th of October, 1283, in a parliament held by Edward I. at Acton Burnel, in Shropshire. It enacted that a debtor's chattels and devisable burghages might be sold to pay his debts. This enactment was confirmed, and its provisions were enlarged, by another Statute of Merchants, passed at Westminster in 1285.

ACTRESSES.—The appearance of females on the stage is altogether a modern custom. It originated on the continent, and was not generally adopted in this country until the reign of Charles II. Anne of Denmark, wife of James I., Henrietta, wife of Charles I., and ladies of noble family, sometimes filled parts in these masques and other dramatic entertainments of the time; but they were not professional actresses. Prynné

denounces the attempt made in 1629 to introduce, according to continental custom, Frenchwomen at the Blackfriars theatre. This was the first appearance of professional females on the English stage. They were, however, foreigners; and much difference of opinion prevails as to the first English actress. Pepys for the first time saw women on the stage, Jan. 13, 1662: Mrs. Colman, wife of Mr. Edward Colman, appeared as Ianthe in the "Siege of Rhodes," in 1656; and Mrs. Mary Saunderson, afterwards married to the celebrated Betterton, performed the same character at the opening of Betterton's theatre, in April, 1662. The last-mentioned was decidedly the first English actress of celebrity that appeared on our stage. The duke of Bolton married Lavinia Fenton, and the eccentric earl of Peterborough, after the death of his first wife, married Lavinia Robinson, "the nightingale." Amongst actresses who have, in later times, been ennobled, may be mentioned Miss Farren, who became countess of Derby in 1797; Miss Mellon, left a widow by Mr. Coutts, who became duchess of St. Albans in 1827; Miss Stephens, married to the earl of Essex in 1838. This list might be much extended.

ACTS OF THE APOSTLES.—The 5th and last of the historical books of the New Testament, was composed by St. Luke, and inscribed to Theophilus. The best critics assign it to the year 63. The apostolic fathers in the 1st century, and Irenæus and Tertullian in the 2nd, ascribed this book to St. Luke. This evidence is corroborated by that of Origen, Jerome, Augustine, Eusebius, and other ecclesiastical writers.

ACTS OF PARLIAMENT.—Sir Harris Nicolas declares "that the distinction between a statute, act, and ordinance of parliament is still involved in such obscurity that no positive conclusion can be drawn from the various statements which have been published." At the present day, bills which have passed through both houses, and received the royal assent, become acts of parliament. (*See PARLIAMENT, STATUTES, &c.*)

ACTS OF SEDERUNT.—Ordinances made by the judges of the Court of Session (Scotland), by virtue of a Scottish act of parliament passed in 1540. They frequently dealt with curious local and fiscal regulations; such as fixing the price of ale in Edinburgh in 1725; the sale of bread in 1736 and 1743; of butcher's meat in 1682, 1717, and 1736; and of fowls in 1669. They imposed a tax for cleaning the streets of Edinburgh in 1687 and in 1691; and an act relative to the cleanliness of the premises within the session-house or parliament close, in 1663.

ACTUARIES OF GREAT BRITAIN AND IRELAND.—The Institute was established in London in 1848.

ACTUARIES IN SCOTLAND.—The Faculty was established in Edinburgh in 1856.

ACZ, or ACS (Battle).—Here (July 2, 1849) the Austrians and Russians retrieved their reverse of the previous day between Raab and Waitzen, and after a hard-fought

battle, compelled Georgy and the Hungarians to retire.

ADAMITES, or ADAMIANS, termed by Bayle "a ridiculous sect." They are said to have arisen during the 2nd century, one Prodicus being their founder. In their religious assemblies they appeared naked, in imitation of our first parents in their state of innocence. They made a profession of continency, and condemned marriage, because it was not known in Paradise, of which they reckoned their church an emblem, and themselves imitators of Adam and Eve. After carefully examining the authorities, Leland declares that no such sect existed in the early church. Evagrius mentions certain male and female ascetics living in Palestine during the 5th century, who always exposed their bodies to the extremes of heat and cold, wearing nothing but a small girdle. Attempts to revive some of these reputed practices of the Adamites have frequently been made in modern times, although it is an error to suppose that Tandemus, or Tanchelin, who committed various excesses at Antwerp in 1124, and led many persons astray, was an Adamite. This man, instead of going naked, was richly apparelled, and fared most sumptuously. Some fanatics, seduced by Picard a Fleming, created much commotion in Germany in 1415. Picard declared himself to be the son of God, and that he was sent into the world as a new Adam, to restore the law of nature. Having penetrated into Bohemia, this fanatic and his followers were attacked and almost exterminated by the Bohemian general Zisca, in 1420. Other efforts have been made in various countries to revive some of the practices of the Adamites.

ADDA (Combats).—Pressed by the Russian and Austrian forces, Moreau retired behind the line of this river in the spring of 1799. His antagonists, after some sharp encounters, succeeded in passing the river, April 27, 1799.

ADDINGTON ADMINISTRATION (Geo. III.).—The arrangements for this ministry commenced on the 10th of February, 1801, and were not completed until the 30th of July. It was thus constituted:—

First Lord of the Treasury and Chancellor of the Exchequer, Mr. Addington, created Visc. Sidmouth Jan. 12, 1805.

Lord Chancellor Lord Eldon.

President of Council . . . Duke of Portland.

Privy Seal Earl of Westmoreland.

Principal Secretaries { Lords Pelham and Hobart, and
Mr. Jenkinson, created Lord
of State Hawkesbury Nov. 16, 1803.

Admiralty Earl St. Vincent.

Board of Control . . . Visc. Lewisham.

Secretary at War . . . Mr. Charles Yorke.

Ordnance Earl of Chatham.

Viscount Castlereagh went to the Board of Control July 6, 1802. Mr. Charles Yorke became (Aug. 17, 1804) one of the principal secretaries of state, in place of Lord Pelham, who took the chancellorship of the duchy of Lancaster, on the resignation of the earl of Liverpool. It was dissolved May 10, 1804. (See **PITT'S SECOND ADMINISTRATION.**)

ADDISCOMBE HOUSE, near Croydon, once the residence of the earl of Liverpool, was purchased, in 1809, by the East-India Company, and opened by them in 1825, as a collegiate institution for the reception of cadets for the whole of their military service, except the cavalry.

ADDITIONAL ACT.—The settlement of a new constitution for France during the Hundred Days, March 21—June 17, 1815, was intrusted by Napoleon I. to a commission, of which Benjamin Constant was president. The constitution embodied in the "Additional act," the work of Constant Regnaud and St. Jean d'Angely, was published on the 25th of April, and was adopted by the Assembly June 1, 1815. On the restoration of Louis XVIII., in the royal ordinance changing the modes and rules of election, dated July 12, 1815, the Additional act of Napoleon was made the basis of the election laws.

ADDED PARLIAMENT met Tuesday, April 5, 1614. The Commons refused to grant supplies until grievances were redressed, and sought to abridge the power of the crown. James I. dismissed them in anger, and imprisoned several members, June 7. Not a single act was passed during the short session, and it was therefore nicknamed "the Added Parliament."

ADDRESSERS. (See **ABHORREERS.**)

ADELAIDE (South Australia), the capital, was founded by settlers who arrived in the colony on the 27th of July, 1836; but it was not until March, 1837, that its site was fixed and the town lands surveyed. In 1845 it was made a free port to vessels of all nations. Port Adelaide, one of its harbours, is about seven miles distant from the town. Gold was discovered in the neighbourhood, and an assay office established at Adelaide in 1852. Its bishopric was founded in 1847, the Right Rev. Augustus Short, D.D., being the first bishop.

ADELAIDE ISLAND (Antarctic) was discovered by Captain Biscoe, Feb. 16, 1832.

ADELPHI THEATRE was built in 1806. A new façade was erected in less than three weeks in 1840. The old edifice was pulled down, and a new one erected on its site, in 1858.

ADEN, the Gibraltar of the East, an Arabian town and seaport, to the east of the Straits of Babelmandeb. Marco Polo (b. iii. ch. 40) mentions it as a place of importance in the 13th century. The Portuguese seized it in the 16th century, and the Turks got possession of it by treachery in 1533. They soon after erected extensive fortifications, and an aqueduct eight miles in length. It was, however, governed by a native prince in 1708. It was bombarded and taken on the 19th of January, 1839, by the troops of the East-India Company.

ADIGE (Battles).—Near this river, in Italy, the ancient Athesis, the Cimbrî defeated the Roman army under Quintus Catullus B.C. 101. Combats occurred here March 26 and 30, 1799, between the French

and the Austrians. The former gained some advantages on the first day, but were defeated on the second, leaving 2,000 prisoners in the hands of the Austrians. On the 1st of April the French army withdrew from the line of the Adige, and in an attempt to regain their position, April 5, were once more defeated.

ADMINISTRATIONS OF GREAT BRITAIN.—Hallam (Eng. iii. ch. 15) states: "According to the original constitution of our monarchy, the king had his privy council, composed of the great officers of state, and of such others as he should summon to it, bound by an oath of fidelity and secrecy, by whom all affairs of weight, whether as to domestic or exterior policy, were debated, for the most part in his presence, and determined, subordinately of course to his pleasure, by the vote of the major part. It could not happen but that some councillors, more eminent than the rest should form *juntos* or cabals, for more close and private management, or be selected as more confidential advisers of their sovereign; and the very name of a cabinet council, as distinguished from the larger body, may be found as far back as the reign of Charles I. But the resolutions of the crown, whether as to foreign alliances or the issuing of proclamations and orders at home, or any other overt act of government, were not finally taken without the deliberation and assent of that body whom the law recognized as its sworn and notorious councillors. This was first broken in upon after the Restoration Thus by degrees it became usual for the ministry or cabinet to obtain the king's final approbation of their measures, before they were laid, for a merely formal ratification, before the council . . . During the reign of William III., this distinction of the cabinet from the privy council, and the exclusion of the latter from all business of state, became more fully established." Thus it was not until after the Revolution, that the cabinet council, as distinguished from the privy council, was formed. Monarchs had, indeed, before that time, been in the habit of seeking advice from particular members of the privy council, and too frequently from favourites. In the earlier days of cabinets, ministers were only accountable for their own departments, and did not necessarily retire when their leaders or colleagues were dismissed. Nor did the minister, who was considered the chief, always preside over the Treasury. The office of prime minister is of more recent date. The practice for ministers presiding over particular departments of the government to form themselves into what is now termed an administration, under the control of a chief, cannot be said to have been established until the reign of Queen Anne. The following is a list of the administrations that have held office from the commencement of her reign, each administration being more fully described under its title, to be found in its place in the alphabetical arrangement.

Godolphin	1702	Grafton	1767
Harley	1710	North	1770
Shrewsbury	1714	Rockingham (second)	1782
Halifax	1714	Shelburne	1782
Carlisle	1715	Coalition	1783
Walpole (<i>first</i>)	1715	Pitt (<i>first</i>)	1783
Stanhope	1717	Addington	1801
Sunderland	1718	Pitt (<i>second</i>)	1804
Walpole (<i>second</i>)	1721	"All the Talents"	1806
Wilmington	1742	Portland	1807
Pelham	1743	Perceval	1809
Broad-Bottom Administration	1744	Liverpool	1812
Long-lived Administration	1746	Canning	1827
Broad-Bottom Administration restored	1746	Goderich	1827
Newcastle	1754	Wellington	1828
Devonshire	1756	Grey	1830
Newcastle and Pitt, afterwards Lord Chatham (<i>first</i>)	1757	Melbourne (<i>first</i>)	1834
Bute	1762	Peel (<i>first</i>)	1834
Grenville	1763	Melbourne (<i>second</i>)	1835
Rockingham (<i>first</i>)	1765	Peel (<i>second</i>)	1841
Chatham (<i>second</i>)	1766	Russell	1846
		Derby (<i>first</i>)	1852
		Aberdeen	1852
		Palmerston (<i>first</i>)	1855
		Derby (<i>second</i>)	1858
		Palmerston (<i>second</i>)	1859

ADMINISTRATIVE REFORM ASSOCIATION, called into existence for the object of insuring a better administration of affairs in the different government departments, attention having been directed to the subject by the mismanagement that caused so many sacrifices of life and property in the Crimea during the winter of 1854 and '55. Meetings were held in the Guildhall and at the London Tavern, May 6, 1855, when the association was formed. A large gathering of the Administrative Reformers took place at Drury-lane Theatre, June 13 in the same year. The Association did not, however, flourish, and an attempt at its reorganization in 1856 proved a failure.

ADMINISTRATOR.—In ancient times, the king was entitled to seize the goods of all persons who died intestate. This prerogative was even granted as a franchise to lords of manors and others, and afterwards the Crown conferred this right on the Church, when the Ordinary took possession of the goods. The 32nd article of Magna Charta (1215) provided against abuses of this prerogative; but this article was not included in the subsequent charter of Henry III. The great abuse of this power led to a change, and the Statute of Westminster II. (13 Edw. I. st. i. c. 19), 1285, enacted that the Ordinary was bound to pay the debts of the intestate, as far as his goods extended. Flagrant abuses continued, and in 1357 (31 Edw. III. st. i. c. 11) it was enacted that the "Ordinaries shall depute the next and most lawful friends of the dead person intestate to administer his goods." Another statute (21 Hen. VIII. c. 5) in 1529 enlarged the power of the ecclesiastical judge, who was empowered to grant administration *either to the widow or the next of kin, or to both of them, at his discretion.* By 20 & 21 Vict. c. 77 (Aug. 25, 1857), which came into operation Jan. 1, 1858, the whole of this jurisdiction was transferred to the "Court of Probate," before a single judge, with an appeal to the House of Lords.

ADMISTRAL.—This title, which was originally

written *ammiral*, or *amiral*, as it still is in French, was imported into Europe during the Crusades, being a corruption of the Arabic word *amir*, or *emir*. The Sicilians and the Genoese borrowed it from the Saracens about the year 1149. This title is said to have been first used in France in 1270, and in this country later in the same century. Nicolas (Hist. of the Royal Navy, vol. i. p. 390) says "It will have been seen that at an early period of English history the commanders of fleets were styled 'leaders and governors, or justices,' or 'leaders and constables' of fleets; and that in the reign of Henry III. and until the latter part of that of Edward I. their usual designation was 'keepers of the sea-coast,' or 'captains and keepers of the sea.'" In a covenant executed at Bruges, March 8, 1297, Sir William Leybourne was styled "Admiral of the sea of the king of England." In the wardrobe accounts of Edward I. for the year 1300, Gervase Alard is termed "Admiral of the fleet of the Cinque Ports;" and the first commission to an admiral of which there is any record, was granted by Edward I. to Gervase Alard, and is dated Feb. 4, 1303. The Liber Munerum Publicorum Hibernie contains an order for the payment of 40s. to John de Athy for expenses he had incurred, Dec. 7, 1335, as admiral of the king's fleet in Ireland; and from the same authority we learn that Wm. Spalding was created admiral in Ireland by patent dated May 26, 1382.

ADMIRAL (Lord High).—When admirals were first appointed in this country, each officer of the kind received the command of a particular fleet, such as, the king's ships north, south, or west of the Thames, or the fleet of the Cinque Ports. On the 18th of July, 1360, Sir John Beauchamp was appointed "admiral of the king's southern, northern, and western fleets," and this Sir Harris Nicolas observes is the first instance of the command of all the fleets being vested in one person. Beauchamp died in the following December; whereupon Sir Robert Herle was (Jan. 26, 1361) appointed to succeed him as admiral of the three fleets. Many similar appointments followed, and, May 9, 1398, John, marquis of Dorset, was made admiral of the northern and western fleets for life, the Irish fleet having been placed under his direction on the same terms. Sir Thomas of Lancaster (second son of Hen. IV.), afterwards duke of Clarence, was appointed "Admiral of England" Feb. 20, 1405; and from that period, as Nicolas remarks, "there was always an admiral of England, who commanded in chief all the fleets in England, Ireland, and Aquitaine, the office having been held successively by the earls of Somerset and Kent, and Sir Thomas Beaufort, who was afterwards created earl of Dorset and duke of Exeter. Sir Thomas of Lancaster was probably the first who took the title of lord high admiral, which was borne by an uninterrupted series of individual officers till the

20th of November, 1632, when the office was, for the first time, put in commission. During the Commonwealth, the affairs of the navy were managed by a committee of parliament, until Cromwell himself undertook the direction. The duke of York (afterwards James II.) was lord high admiral from the period of the Restoration until the 22nd of May, 1684, when Charles II. took the office into his own hands, James II. resuming it on his accession, in the following year. It was put in commission after his abdication, and remained so till Prince George of Denmark was appointed lord high admiral of England, May 20, 1702, and of Great Britain, on account of the Union, June 28, 1707, with a council of four persons to assist him. On his death, Nov. 8 (O.S. Oct. 28), 1708, the earl of Pembroke was appointed his successor, with a similar council. The earl resigned in 1709; since which time the office has always been in commission, except during the interval from May, 1827, to September, 1828, in which it was held by the duke of Clarence, afterwards William IV. The only instance of a lord high admiral for Ireland, is that of James, Lord Butler, high treasurer, created "Great Admiral and Keeper of the Ports in Ireland," by patent, May 11, 1535. There was a lord high admiral in Scotland from the 15th century until the Union. A lord high admiral having been appointed in France, Richelieu suppressed the office in 1627, but it was re-established by Louis XIV. in 1669.

ADMIRAL OF THE FLEET.—Until 1851, this honorary title, which gives increase of half-pay but no command, was conferred only upon one officer at a time; but in that year it was borne simultaneously by Sir Thomas Byam Martin and Sir George Cockburn.

ADMIRAL OF THE RED.—Admirals take rank and command in the order of their respective squadrons, which are distinguished by different-coloured flags; as the red, the white, and the blue squadrons. For nearly a century after the union between England and Scotland in 1707, there was no admiral of the red, the Union Jack having then superseded the red flag; but the latter was resumed at the naval promotion which took place in 1805, after the battle of Trafalgar.

ADMIRALTY (High Court of), erected, according to Stowe, in the reign of Edward III., though Lord Coke and Prynne assert that it existed long before that time. Richard II. limited its jurisdiction: it was divided into the Instance and the Prize courts, and was at first held in Southwark, but afterwards removed to Doctors' Commons. In early times, the judge of this court was merely the deputy of the lord high admiral, to whom the regulation of all naval matters was intrusted. The criminal jurisdiction of the Admiralty Court was, by 7 Vict. c. 2 (March 5, 1844), transferred to the Court of Assize and the Central Criminal Court. By 20 & 21 Vict. c. 77 (Aug. 25, 1857), it was

provided that on the next vacancy of the office of judge of the High Court of Admiralty, the queen might appoint the judge of the Court of Probate to that office, or, if the vacancy should first occur in the Court of Probate, the judge of the Admiralty Court might be appointed.

ADMIRALTY HOUSE (Whitehall).—Pennant says, "The Admiralty office stood originally in Duke-street, Westminster; but in the reign of King William, was removed to the present spot, to the house then called Wallingford, I believe, from its having been inhabited by the Knollys, viscounts Wallingford." From the roof of this building, Archbishop Usher took a farewell view of Charles I. on his way to the place of execution, and swooned at the sight. It was rebuilt by Ripley (1726), and the screen was erected by Adams (1776).

ADMIRALTY ISLANDS (Pacific) were discovered by the Dutch in 1616. Carteret landed on them in 1767, and D'Eutrecasteaux in 1793.

ADMONITION TO THE PARLIAMENT.—This treatise, setting forth the extreme views of the Puritans in somewhat intemperate language, was published in 1572. It was the joint production of the more active Puritans, and was presented to parliament by two of their number, Field and Wilcox, preachers. For this offence they were committed to Newgate, and afterwards sentenced to a year's imprisonment. Four editions appeared in a very short space of time. A second admonition was drawn up by Thomas Cartwright, and both were answered by Whitgift. Cartwright replied, and the controversy raged for some time. These bitter attacks upon the Established Church were suppressed by proclamation, July 22, 1753.

ADOPIANS.—The name of a sect, which revived the oriental heresy of Nestorianism in a new form in the West (787). Its authors were two Spanish prelates, Elipaud, archbishop of Toledo, and Felix, bishop of Urgel. They firmly maintained the co-equality of the Son as to his divine nature, but asserted that, as to his humanity, Christ was only the adopted son of the Father. These doctrines were condemned at the diet and council of Ratisbon, 792, and by the council of Frankfort-on-the-Maine in 794. The strange theory obtained many supporters.

ADORNO AND FREGOSI.—Factions, called by Hallam (Middle Ages, i. ch. 3) "equal and eternal rivals," by which Genoa was distracted during the 14th and 15th centuries. They belonged to the plebeian and commercial aristocracy, who obtained power when the old nobility were excluded from authority. The Ghibellines sided with the Adorno and the Guelphs with the Fregosi. One great struggle between these factions commenced in the elevation of Gabriel Adorno to the ducal throne, in 1363. The Fregosi put the French in possession of Genoa in 1513, and in the same year (Robertson, Charles V. b. xi.) the Adorno again

wrested Genoa from the Fregosi, and placed it under the power of the emperor.

ADRIAN'S WALL. (See HADRIAN'S WALL.)

ADRIANISTS.—The term is applied to two different sects. Theodoric (l. i. c. 4, p. 193) is the only author who refers to the first sect of Adrianists. They were followers of Simon Magus, and arose about the year 34. The disciples of Adrian Hamstead, an Anabaptist of the 16th century, also bore this designation. He taught first in Zealand, and afterwards in England.

ADRIANOPLE. (See HADRIANOPLE.)

ADRIATIC (Wedding of).—An annual ceremony performed by the doge of Venice on Ascension-day. Going with much pomp and ceremony in the *Bucentaur*, or state barge, attended by the nobility and foreign ambassadors, he dropped his ring into the water. This strange ceremony, denoting the supremacy of Venice, was instituted in 1176, under the following circumstances:—In that year, the doge, Sebastiano Ziani, defeated the combined fleets of Pisa, Genoa, and Ancona, under the command of the emperor Frederick the First's son Otho, who was made prisoner and carried to Venice. On the return of the victorious fleet, Pope Alexander III., at that time a fugitive at Venice, presented Ziani with his ring, authorizing him and his successors to proclaim their right to the sovereignty of the Adriatic, and to subject it to the rule of Venice, as a wife is subjected to that of her husband.

ADULTERATION.—Many laws inflicting penalties for the admixture of improper ingredients in articles of consumption, are found in the statute-book. By 51 Hen. III. st. vi. (1267) bakers were condemned to stand in the pillory for offences relating to the assize of bread, and brewers to stand in the tumbrel, or to undergo some other kind of correction. By 23 Eliz. c. 8, s. 4 (1581), persons adulterating honey with "any deceyftfull myxture," were to forfeit the same. A similar penalty was attached to the adulteration of wax. By 1 James I. c. 18 (1604), any person having in his possession adulterated hops was to forfeit them, and any brewer using them in brewing ale or beer, was to forfeit the value of the hops so used. In 1776 (17 Geo. III. c. 29) the penalty for the adulteration of tea was a fine of £5, or six months' imprisonment. Other statutes dealing with adulteration in various forms have been passed during the present century. The act 6 & 7 Will. IV. c. 37 (1836), repealed former acts for regulating the sale of bread sold beyond the city of London and ten miles of the Royal Exchange. It inflicted a fine of not less than £5, or more than £10, or imprisonment not exceeding six months, for mixing materials other than those specified in the act, in the preparation of bread. Hard labour was added to imprisonment by 14 & 15 Vict. c. 100, s. 29 (Aug. 7, 1851).

ADULTERY.—The Jewish law inflicted the punishment of death for this offence (Lev. xx. 10; Deut. xxii. 22). The Roman punishment was mutilation. Augustus, after im-

posing heavy fines and forfeitures on the guilty parties, condemned them to long, or even perpetual exile. Constantine made the crime capital, but Justinian mitigated this severity of the punishment. Prescott (Peru, i. Introd. c. ii.) says it was treated as a capital offence by the Peruvians. The Japanese early in the 17th century cut off the heads of both the offending parties, and hewed their bodies in pieces. The northern nations punished the crime with great severity, and the ancient Germans empowered the husband to inflict immediate punishment. Among the Saxons, a pecuniary fine was exacted, according to the rank of the female. In Alfred's reign it was punished according to the rank of the husband. Canute (1016) adjudged the man to exile, the woman to have her nose and ears cut off. Adultery was punished with death by an act of the Scottish parliament in 1563. In the time of the Commonwealth (1650), adultery was made a capital offence; but the law was repealed at the Restoration. In later times, redress was usually sought by action in the civil courts, until the passing of the new act 20 & 21 Vict. c. 85 (Aug. 28, 1857), by which the "Court for Divorce and Matrimonial Causes" was established. The new legislation has facilitated the obtaining of a divorce.

ADVENT.—The period of four weeks before Christmas. It is not known when this season was first consecrated by the Church. The earliest notice of Advent is found in a homily by Maximus Taurinensis, in 450. The council of Macon, in 582, ordered a fast to be observed from Advent to Christmas. Advent Sunday is the Sunday, whether before or after, which comes nearest to St. Andrew's day (Nov. 30).

ADVENTURE BAY (Australasia) was discovered by Capt. Furneaux, in 1773, and named after his ship, the *Adventure*, belonging to Captain Cook's expedition. It was visited by Captain Cook in 1777, and by Captain Bligh in 1788 and 1792.

ADVENTURERS. (See **MERCHANT ADVENTURERS.**)

ADVERTISEMENTS.—The Parliamentary newspaper, the *Mercurius Politicus*, for January, 1652, contains an advertisement, probably the first published in England. It announces the publication of the "Irenodia Gratulatoria, an Heroick Poem," printed by Thos. Newcourt in 1652. This effusion is a panegyric on Cromwell's Irish campaign. Advertisements were first subjected to a duty by 10 Anne, c. 19 (1712), and it was charged according to length. Some change took place, and the duty was reduced in 1833, from 3s. 6d. to 1s. 6d. in Great Britain, and from 2s. 6d. to 1s. in Ireland (3 & 4 Will. IV. c. 23), and the duty was entirely repealed by 16 & 17 Vict. c. 63, s. 5, which act received the royal assent Aug. 4, 1853.

ADVERTISING VANS.—This ingenious device for obtaining publicity led to the introduction of so many showy vehicles into the streets of the metropolis, as to constitute a nuisance, and the use of these vans was

accordingly prohibited from Oct. 1, 1853, by 16 & 17 Vict. c. 33, s. 16, passed June 28, 1853.

ADVOCATE (Queen's).—Foss states that the first instance of an advocate being regularly employed in the king's affairs occurs in the reign of Henry III. During fourteen years, from 38 to 52 Hen. III. (1253—1267), between thirty and forty cases in the court are recorded, in which Lawrence del Brok pleaded for the king,—"sequitur pro rege."

ADVOCATE (Lord), Scotland, also called King's or Queen's Advocate, is the principal law-officer of the Crown in Scotland, the same as the Attorney-general in England. The office of King's Advocate is known to have existed in 1479, but it was not until 1540 that it was raised to the dignity of a great office of state. A record of the Court of Justiciary in 1598 contains the first mention of a Lord Advocate.

ADVOCATES (Faculty of), Scotland.—The profession of advocate has existed from time immemorial in Scotland; but its members did not form a faculty or society until the establishment of the College of Justice in 1532. Their number, at first confined to ten, is now unlimited, and has for some years exceeded 400. This body is presided over by a Dean of Faculty.

ADVOCATES' LIBRARY, founded in Edinburgh, by Sir George Mackenzie, about the year 1680. It is one of those which have the privilege, under the Copyright law, of receiving a copy of every new book.

ÆDILES.—Roman magistrates, whose duty it was to superintend public buildings, highways, weights and measures, &c. They were first created B.C. 494, were two in number, and chosen from the plebeians. Two patrician ædiles (*cuvules*) were added B.C. 365; and Julius Cæsar established two more plebeian ædiles (*cereales*), B.C. 45, whose business was to look after the supply of corn.

ÆGINA, an island in the Gulf of Ægina, with chief town of the same name, celebrated for its naval supremacy. Homer says it was occupied by the Achæi, and afterwards by Dorians from Argos. It became subject to Pheidon, tyrant of Argos, B.C. 748. Ægina was a general emporium of commerce, had a factory in Egypt B.C. 563, and carried on an active trade in corn with the countries in the Black Sea. The Æginetans were considered the earliest navigators of the Ægean Sea.

B.C.

505. The Thebans apply for aid to the Æginetans, who declare war against Athens.

500. Ægina mistress of the sea.

457. War between Athens and Ægina.

451. Termination of the struggle.

480. The Æginetans send 30 ships to Salamis.

479. Greek fleet assembles at Ægina.

460. Athens makes war upon Ægina.

459. Ægina besieged by the Athenians.

455. Ægina captured by the Athenians; its fortifications destroyed, and its ships of war surrendered.

431. The Athenians expel the inhabitants, and send colonists to the island.

B.C.

404. Lysander having collected some of the former inhabitants, restores them to Ægina.
 388. Incited by Sparta, the restored Æginetans declare war against Athens.
 387. The war brought to a close by the peace of Antalcidas.

ÆGOSPOTAMI, or the "Goat's River" (Sea-fight).—In the Thracian Chersonese, off the mouth of which the Athenian fleet was signally defeated by the Spartans under Lysander, B.C. 405. This victory was followed by the capture of Athens, and the termination of the Peloponnesian war.

ÆOLIAN or **BEOTIAN MIGRATION**.—The Achæans, a people closely allied to the Æolians, were, by the great Dorian invasion, driven from the Peloponnesus, and, with some of the original inhabitants of Bœotia, induced to settle in Asia Minor. This happened B.C. 1190, B.C. 1124, or B.C. 844, according to various authorities.

ÆQUI, an ancient people of Italy, inhabiting the upper valley of the Anio. In league with the Volsci, they waged war against the Romans (B.C. 471—302), but were finally subdued, and their territory was annexed to Rome B.C. 302.

ÆRA, or **ERA**, a fixed point of time, from which any number of years is counted, the zero, as it were, of the chronological scale. The following is a list of those æras which have been most in use, with the year of the Christian æra to which each of them corresponds.

1. A.M., *anno Mundi*, "in the year of the world." This æra, the date of the world's creation, according to the reckoning of Constantinople, which was used in Russia till the beginning of the 19th century, and is still employed by the Greek Church, commences Sept. 1 B.C. 5508
2. ——— The year of the world as reckoned at Antioch (and by the church of Alexandria since A.D. 285, when it discarded ten years from its previous reckoning), commences Sept. 1 B.C. 5492
3. ——— The year of the world is commonly assumed by chronologists to commence B.C. 4004
4. ——— The year of the world according to the Jews, commences B.C. 3761
5. The Cali-yuga, the last of the four yugas or great periods of time reckoned by the Hindus. The first three are purely mythological; the last commences B.C. 3102
6. The Olympiads commence July 1 B.C. 776
7. A.U.C. *anno urbis condite*, "in the year from the foundation of the city," i.e. of Rome, which event is placed by Varro in the year B.C. 753
 By Cato the Elder in the year B.C. 752
8. The æra of Vicramaditya, in common use throughout Hindostan B.C. 57
9. The Spanish æra, that of the conquest of Spain by Augustus. It was employed in the Peninsula, the south of France, and Africa, and was in use in some provinces until the middle of the 15th century. It commences Jan. 1 B.C. 38
10. The Æra of Martyrs, or of Diocletian. Much used by the early Christians, and still employed in the churches of the East, commences Aug. 29 A.D. 284
11. A.H. *anno Hegire*. The Hegira, or flight of Mahommed to Medina: the æra used by all Mahommedans, commences July 16 A.D. 622
12. A.D. *anno Domini*, "in the year of our Lord." The Christian æra is the date of the birth of Christ.

ÆERIANS.—A branch of the Arians, followers of Aërius, a presbyter and monk, native of Pontus. This sect arose 342, and spread rapidly through Cappadocia, Armenia, and Pontus. Aërius, disappointed at not obtaining the bishopric of Sebaste, in Armenia, maintained that there was no difference between bishops and presbyters. He disapproved of prayers for the dead, stated fasts, the celebration of Easter, and attempted to restore religion to its primitive simplicity. Exposed to persecution, his followers assembled in woods and caves. The sect was still in existence in the time of St. Augustine.

ÆROLITES.—Livy states that a shower of stones fell about B.C. 654, on the Alban Mount, near Rome. Plutarch mentions one, recorded in the Parian Chronicle, that fell at Ægospotami, near the Hellespont, B.C. 467. In modern times a stone, weighing 2 cwt., fell at Ensisheim, in Alsace, in 1492. A shower of stones fell near Benares, Dec. 19, 1798. A similar occurrence took place in Normandy, some of the stones weighing 16 or 17 lb., April 26, 1803; and near Bonn several fell July 19, 1816, one of them weighing nearly 100 lb. The list might be extended almost indefinitely.

ÆS UXORIVM.—A sum in which unmarried men were mulcted at the census or review of the people of Rome. It appears to have been first imposed B.C. 403.

ÆRNA (Sicily).—About sixty eruptions of this volcano, the largest in southern Europe, are on record. Of these, ten most disastrous in their results, occurred before the Christian æra. Æschylus and Pindar allude to one that happened B.C. 425. Another B.C. 396, arrested the progress of the Carthaginian army, in its march from Messina to Syracuse. The more celebrated eruptions of modern times happened in 1537, in 1792 (this one lasted for more than a year), in 1819, in 1832, and in 1852.

ÆTOLIA (Greece).—"Renowned as are the names of their earliest heroes," says Heeren, "Ætolus, Peneus, Meleager, Diomedæ, the nation has no place in the history of the flourishing times of Greece. Nor did they acquire any celebrity until the Macedo-Roman period, when the various insignificant tribes of which they were composed, gathered themselves together and chose one common leader, for the purpose of carrying on a war with the Achæans." The Ætolians are said to have sent 40 ships, under the command of Thoas, to the Trojan war; but from this period until the formation of their league, they are seldom noticed.

ÆTOLIAN LEAGUE, though composed of tribes instead of cities, was an imitation of the Achæan league. Its origin is involved in obscurity. It is known to have existed in the time of Alexander the Great, if not in that of his father Philip. The great council of the nation, called the Panætolicæon, met every autumn at Thermum, and there was another deliberative body called the Apocleti, which is supposed to have formed a kind of permanent committee.

B.C.

323. The Ætolian League joins the Grecian confederacy against Macedon in the Lamian war.
322. The Greeks defeated at Crannon Aug. 7, and the Grecian confederacy dissolved. Craterus and Antipater invade Ætolia, and after some success are compelled to withdraw.
321. The Acarnanians who had invaded Ætolia are expelled.
289. Demetrius ravages Ætolia.
279. The Ætolian League joins the struggle against Brennus and his hordes, who are expelled from Greece.
220. The Social war between the Ætolian and Achaean leagues commences.
219. Philip supports the Achæans, and invades Ætolia.
218. Philip surprises Thermum, sets fire to the sacred building and the spoil he could not carry away.
217. The treaty of Naupactus terminates the Social war.
211. Offensive and defensive alliance between Rome and the Ætolian League.
205. Philip invades Ætolia, sacks Thermum a second time, and the Ætolians, deserted by the Romans, make peace with him.
200. The Ætolian League declares war against Philip.
197. The Romans and Ætolians defeat Philip at the battle of Cynocéphale.
196. General peace.
192. The Ætolian League joins Antiochus in a war against Rome.
191. The Ætolians sue for peace and obtain a truce.
189. The Ætolians make a humiliating peace with Rome.

AFGHAN WAR.—During the revolution in Afghanistan, England declared in favour of Shah Shooja, and on the refusal of Dost Mahommed Khan to submit, Lord Auckland declared war, Oct. 1, 1838. The Anglo-Indian army quitted Shirkapore early in March, 1839, took possession of Kandahar, April 20, and Shah Shooja was crowned there May 8. Ghuznee was captured July 23, and Cabul August 7. Part of the army remained to support Shah Shooja. Dost Mahommed Khan himself surrendered Nov. 4, 1840. A revolt against the English broke out at Cabul Nov. 2, 1841, when Sir A. Burnes and several officers and soldiers were assassinated. Sir W. H. McNaghten was ruthlessly murdered during a conference, by Akbar Khan, son of Dost Mahommed, on Christmas-day in the same year. The remainder of the force stationed in this country, concluded a treaty with the Afghan chiefs for its immediate evacuation. The order for departure was given Jan. 5, 1843; but such was the treachery practised on the occasion, and the fury with which, in spite of promises of safe-conduct, they were assailed, that only three natives and one European, out of an army of 5,000 men and a large number of camp-followers, including women and children, reached Jellalabad. Lady Sale, and some English ladies who had surrendered to Akbar Khan, were afterwards restored. Jellalabad, besieged by Akbar Khan Jan. 18, 1842, was successfully defended by General Sale. General Pollock came to his aid April 5; General Nott recovered Ghuznee Sept. 9; Cabul was partially destroyed Oct. 9; and having accomplished the objects in view, the British forces evacuated the country in October, 1842.

AFGHANISTAN (Asia).—An extensive kingdom, which, as part of the old Persian empire, passed under the yoke of Alexander the Great B.C. 330. Seleucus Nicator annexed it (B.C. 305) to his Syrian empire, with which it remained incorporated till it recovered its independence B.C. 255. It was conquered successively by the Scythians, Persians, and Saracens, falling to a Tartar dynasty in 997. Zenghis Khan and Tamerlane subdued it; Baboor, or Baber, the fifth in descent from the last-mentioned, established the great Mongol empire, of which Delhi was the capital, 1525. After his death, portions of Afghanistan fell to Persia and Hindostan, whilst many Afghan tribes remained independent. Nadir Shah once more brought the whole country into subjection to Persia in 1737, and after his death in 1747, Ahmed Shah united all the Afghan tribes, and founded the present kingdom of Afghanistan. Various revolutions have since occurred, and an account of a collision between the British and Affghans, that arose out of a disputed succession, is given under **AFGHAN WAR**.

AFFINITY.—In the book of Leviticus (chap. xviii.) certain regulations are laid down respecting unlawful marriages; and most ancient nations legislated on this subject. An act passed in 1534 (25 Hen. VIII. c. 22) decreed that none should marry within the Levitical degrees, and Archbishop Parker drew up a "Table of kindred and affinity, wherein whosoever are related, are forbidden in Scripture and our laws to marry together." This he ordered to be printed and set up in the churches. The degrees of affinity or relationship by marriage within which persons are forbidden to marry, were fixed by the Constitutions and Canons Ecclesiastical, made in 1603, during the reign of James I. Marriages within the prohibited degrees could only be annulled by the Ecclesiastical Courts, and in case a decree did not issue during the lifetime of the parents, the offspring was considered legitimate; but by the 5 & 6 Will. IV. c. 54, all such marriages celebrated after the passing of that act, in 1835, are declared to be absolutely null and void.

AFFIRMATION.—The solemn affirmation of Quakers in a court of justice was accepted instead of an oath in 1696 (7 & 8 Will. III. c. 34). This statute was extended in 1722 by 8 Geo. I. c. 6, and in 1749 by 22 Geo. II. c. 46, s. 36; but a clause was inserted, prohibiting Quakers from giving evidence in this manner in criminal cases. This exception was however removed in 1828 by 9 Geo. IV. c. 32. A similar privilege was granted to Separatists, and by 1 & 2 Viet. c. 77 (Aug. 10, 1838), to any person who shall have been a Quaker or a Moravian.

AFRICA.—The ancient Greeks applied the term Libya to the portion of this quarter of the globe known to them, and the Romans called their first colony in this continent, consisting of Carthage and the adjoining district, Africa. The name of the Roman

colony was afterwards used for the entire continent. (*See LIBYA.*) The Romans obtained possession of Carthage B.C. 146. Other portions were speedily added, until the number of provinces reached five. The Africans revolted in 296, but they were subdued by Diocletian; they rebelled again in 372, and Theodosius restored the Roman authority in the next year. Genseric, king of the Vandals, landed in Africa in May, 429, and had overrun a considerable part by the year 439. Belisarius wrested Africa from the Vandals, in 534. It revolted again in 535, and, after a series of struggles, was again reduced to subjection. The Saracens invaded it in 643, and by the year 709 had completed its conquest. The Arabs and the Normans are said to have visited the W. of Africa in early times, and the French claim for some Dieppe mariners in 1364 the priority of discovery in this direction. It has, however, been proved that the French had no commercial relations with Africa before 1664, and no commercial treaty with any African ruler previous to 1785. The Portuguese in the 15th century were the first to obtain more definite information respecting the form and dimensions of Africa. They ascertained the correctness of the assertion of Herodotus, that it was, except at the Isthmus of Suez, surrounded by water. They were followed by the English, the French, the Dutch, and other nations. During the earlier portion of the 15th century, several efforts were made to obtain further knowledge of this vast continent, but nothing important was accomplished until 1444, when a number of individuals at Lagos formed themselves into a company for the prosecution of African discovery and colonization. (*See ABYSSINIA, ÆTHIOPIA, EGYPT,* and various European settlements in Africa.)

A.D.

- 1330-4. A French ship driven by tempest amongst the Canary Islands.
1344. The count of Clermont receives from Clement VI., at Avignon, investiture of the crown of the Canary Islands. He does not, however, take possession.
1402. Béthencourt's expedition to the Canary Isles.
1405. Béthencourt quits the colony.
1415. King John of Portugal takes Ceuta, and bestows it upon his son Prince Henry.
1418. The Portuguese navigators, Zarco and Tristram Vaz, double Cape Bojador, and discover Porto Santo.
1419. Madeira discovered by Zarco and Tristram Vaz.
1432. Giliauez doubles Cape Bojador, and explores the coast beyond.
1440. Gonçalves reaches Cape Blanco.
1441. Martin V. grants to the Portuguese crown all lands that it shall discover from Cape Bojador to the Indies.
1442. Trade in gold dust commenced.
1443. Tristram doubles Cape Blanco. Ten slaves brought to Seville by Gonçalves, were the first that appeared in Europe.
1444. Association for the prosecution of African discovery formed at Lagos.
1445. Senegal discovered by Dinis Fernandez, who sails as far as Cape Verde.
1447. Lançarote explores the coast as far as the River Gambia.
1448. The Azores discovered.

A.D.

1449. Noli discovers the Cape Verde Islands. This discovery is said, according to different accounts, to have been made in 1450, 1460, and 1462.
1450. About this time Arguim, the first Portuguese establishment on the African coast, was founded.
1454. A trade in slaves carried on at Arguim.
1456. Ca da Mosto, a Genoese, lands on the Cape Verde islands and visits the river Gambia.
1462. Pedro de Cintra discovers Sierra Leone.
1469. Fernando Gomez obtains a monopoly of the gold trade to the coast of Guinea.
1471. The Gold Coast discovered by Santarem and Escobar.
1481. El Mina fort erected by the Portuguese on the coast of Ashantee.
1484. Diego Cam discovers the river Congo.
1486. Covilhã goes from Fez to Arabia, and thence to India.
1487. Bartholomew Diaz discovers the Cape of Good Hope, which he names Cape Stormy.
1490. Portuguese missionaries penetrate to Congo.
1497. Vasco de Gama doubles the Cape of Good Hope (Nov. 19), and explores the coast beyond it. He touches at Mozambique, &c.
1502. Vasco de Gama, with a fleet of twenty ships, sails for Quiloa, and compels its king to pay tribute to Portugal.
1505. Almeda takes Quiloa and Mombasa. The king of Spain, in a letter dated Sept. 15, promises to send Ovando 100 negro slaves.
1506. The Portuguese explore Madagascar.
1508. The Spaniards import negroes into Hispaniola from Guinea.
1526. Some merchants of Bristol trade to the Canaries.
1530. An English ship sails to Guinea.
1562. Three English ships sent to Guinea.
1569. A Portuguese expedition reaches Zimbao, and the gold-mines of Manica.
1577. English merchants settle in Morocco.
1588. Elizabeth grants a patent to a company. A ship and pinnace make the first voyage from London to Benin.
1591. An English expedition sent to the Gold Coast.
1618. The African Company formed in London. They send Thompson on an expedition to explore the Gambia.
1619. Thompson killed whilst ascending the river Gambia.
1621. His successor Jobson explores the Gambia as far as Tenda.
1626. The French settlement of St. Louis founded.
1631. The people of Mombasa expel the Europeans.
1637. El Mina wrested from the Portuguese by the Dutch, who had gradually stripped them of their possessions in Africa.
1638. Jannequin visits the French possessions in Africa.
1650. The Dutch establish their first colony at the Cape of Good Hope.
1665. Vermuyden ascends the Gambia in search of gold.
1697. Brue starts from Senegal on an expedition into the interior.
1724. Stibbs sent by the African Company to the Upper Gambia.
1772. Norris travels through Dahomey and reaches Abomey.
1787. An English settlement composed partly of negroes established in Sierra Leone.
1788. The African Association formed in London send Ledyard to Africa.
1791. Houghton fails in an attempt to reach Timbuctoo.
1794. Watt and Winterbottom visit Fouta Jallo.
1795. Mungo Park starts from the Gambia. He traces the Niger to Silla, explores the intervening countries, and returns in 1797.
1797. Barrow makes a tour through the districts at the Cape of Good Hope.
1798. Hornemann sets out from Cairo on a tour, in which he perished.
1801. Trutter and Sommerville reach the Orange River and penetrate to Lattakoo.

- A.D.**
 1805. Mungo Park sets out on his second expedition, from which he never returned.
 1813. Campbell founds a Christian mission at Lat-takoo.
 1816. Tuckey explores the river Congo, and Peddie penetrates to Kakundy.
 1817. Campbell reaches the Panietta. James, Bowdich, and Hutchinson proceed on a mission to Coomassie, the capital of Ashantee.
 1819. Lyon and Ritchie reach Mourzouk. The latter died Nov. 20, and Lyon penetrated to Fezzan.
 1820. Dupuis goes on a mission to Coomassie.
 1822. Clapperton, Denham, and Oudney cross the Great Desert and visit Bornou. Major Denham reaches Lake Tsad in 1824, and Clapperton and Oudney penetrate to Sokatoo. The three travellers reach Tripoli in Jan. 1825.
 1825, Dec. 7. Clapperton quits Badagry on his second mission into central Africa.
 1826. Laine sets out from Tripoli, crosses the desert, and reaches Timbuctoo Aug. 18.
 1827. Caillié travels from Kakundy to Timbuctoo, and, after crossing the desert, reached Tangier Aug. 18, 1828.
 1830. Richard and John Lander trace the Niger to its mouth.
 1832. An expedition, provided with two small steamers, leaves Liverpool with the view of ascending the Niger.
 1836. Alexander explores S. Africa.
 1845. Duncan reaches Adafoodia, in the interior of Africa.
 1849. Livingston, Oswell, and Murray set out from Kolobeng, travel through the desert of Kalahari, and trace the river Zouga to the Lake Ngami.
 1850. Richardson, Barth, and Overweg start on their expedition, and Livingston goes on a second journey to Lake Ngami.
 1851. Livingston and Oswell proceed on another expedition and make further discoveries.
 1856. Livingston reaches London Dec. 10, after having traversed 11,000 miles in S. Africa; he receives the gold medal of the Royal Geographical Society Dec. 15.
 1858. An expedition to Africa, under the direction of Dr. Livingston, sails from Liverpool March 10.

AFRICAN ASSOCIATION.—Under the auspices of this society, formed in London June 9, 1788, the travellers,—Ledyard sent out in 1789, Houghton in 1791, Mungo Park in 1795 and in 1805, Hornemann in 1798, and other enterprising men, made important additions to the geography of Africa. This association was incorporated with the Royal Geographical Society July 23, 1831.

AFRICAN CHURCH, was probably founded in the 2nd century, as Optatus was bishop of Carthage about the year 200, and a council of bishops was assembled by Agrippinus, bishop of Carthage, about 215. From the identity between the Roman and African rites, it is supposed that the first bishops of Africa were ordained at Rome, and carried thence the liturgy and ritual which were used in Africa. In the 3rd century it was rendered illustrious by Tertullian, Cyprian, and Lactantius; in the 3rd and 4th centuries it resolutely maintained its independence of Rome. In the 5th century, this church suffered much from the Vandal invasion under Genseric. It was also severely tried by the Donatist, Arian, Manichæan, and Pelagian heresies, and no church furnished so many martyrs to the

cause of Christianity. The early African Church was overthrown by the Saracens, who, in the 8th century, made themselves masters of the whole of the north of Africa. In addition to the diocese of Africa, divided in the time of Constantine into six provinces, this quarter of the globe contained the patriarchate of Alexandria, or the diocese of Egypt. Various missions have been sent from England during the 18th and 19th centuries, for the purpose of disseminating Christianity in different parts of Africa.

AFRICAN COMPANY.—In 1585 a patent was granted by Elizabeth to private adventurers to trade to Barbary; in 1588 to others to trade to Guinea; and in 1592 to the south of Sierra Leone. Companies were formed in the reigns of James I. and Charles, and the Royal African or Guinea Company of Merchants was incorporated by Charles II., Jan. 20, 1662. Under this charter, the company received the exclusive right of trading from Salee to the Cape of Good Hope. They surrendered their charter, and by patent, the Royal African Company of England, with extensive privileges, was established Sept. 27, 1672; but in 1698 an act was passed leaving the trade, comparatively speaking, free. Various methods were devised for supporting the trade and remodelling the company, until, by 1 & 2 Geo. IV. c. 28 (May 7, 1821), the company was abolished, the Crown took possession of all forts and settlements in Africa, and the trade was thrown open.

AFRICAN INSTITUTION, established in London in April, 1807, to collect accurate information respecting the African continent, and introduce the arts of civilization among its people.

AGAPE, or love feasts, were instituted in the time of the Apostles, and continued in use among the primitive Christians for three centuries; but towards the close of that period, the abuses committed in them were so notorious that they were solemnly condemned, first by the council of Laodicea (366), and afterwards by the second council of Carthage (390).

AGAPEMONE.—This establishment, a retreat for the followers of Brother Prince, was founded at Charlynech, near Bridgewater, in 1845. They are a branch of the Lampeters, and affect to believe that the day of grace and prayer is past, and the time of judgment arrived. A meeting, called at Hanover Square, Sept. 26, 1856, for the promulgation of their views, proved a failure. These sectaries are called Agapemonians. A sect, with similar aims and views, called the "Family of Love," was founded by Henry Nicholas, a Westphalian, in 1540. He came to England, and towards the latter end of the reign of Edward VI. made several converts. Five of the sect stood at Paul's Cross, and renounced their errors June 12, 1575. Queen Elizabeth issued a severe proclamation against them Oct. 3, 1580. Fuller quaintly terms the sect the "the Family of Love, or Lust rather."

AGDA (France).—A council was held here

Sept. 11, 506, on the discipline of the Church. Forty-seven canons were drawn up at this council, which was convened by Alaric, king of the Goths.

AGE.—In the later periods of Greece and Rome, 25 was considered the full age for both sexes. In Rome, 43 was the legal age for consuls, and 30 for tribunes. Augustus fixed 30 instead of 35 for judges. That of puberty was 14 for males, and 12 for females. By the feudal law, the moment a youth was knighted, he was considered of age, and at 16 this honour was frequently conferred. The kings of France were considered majors at 15. Henry III., the first minor after the Conquest, who obtained the English crown, was declared a major at 16, though he did not assume his right until he was nearly 20, in Feb. 1227. Edward III., the next minor who mounted the throne, took the government in his own hands before he was 18; Richard II. was considered a minor till he was 22; and Henry VI. till he was between 23 and 24. Henry VIII. made a law for his own children, that if his son succeeded, he was to be eligible for sovereign authority at 17, and if a daughter, at 15; but he afterwards fixed 18 as the age at which Edward VI. was to assume the government, and he was actually constituted eligible for sovereign authority at that age. By 18 & 19 Vict. c. 43 (July 2, 1855), any male infant of 20, or any female of 17, may, with the sanction of the court of Chancery, make a valid and binding settlement of either his or her real or personal estate, in contemplation of marriage. A male at 12 may take the oath of allegiance, at 14 is at years of discretion, and subject to punishment by death. A female at 12 is considered to have arrived at years of maturity, may, with permission of her guardians, enter into a binding marriage, or consent or disagree to one previously contracted. Formerly, a male of 14 could make a will disposing of his personal estate, if his discretion were satisfactorily proved; but by 1 Vict. c. 26, s. 7 (July 3, 1837), no will is valid if made by a person under the age of 21. By 7 & 8 Will. III. c. 25, s. 8 (1696), a minor was disqualified to be elected to parliament. Before that act passed, several members were under age. Minors, however, sometimes sit "by connivance." Charles James Fox was elected for Midhurst soon after he had attained his 19th year.

AGEN (France), the ancient Agennum of the Nitiobriges, came into the possession of England with the rest of Guienne, in 1151, by the marriage of Henry II., then duke of Normandy, with Eleanor of Guienne, the divorced wife of Louis VII. of France. These possessions led to frequent wars between France and England. Agen was captured by the French in 1322, regained by the English in 1330; again lost, and restored to England by the treaty of Bretigny (May 8, 1360). In the next century it was finally incorporated with France.

AGENHINE, or **HOGENHINE**.—In Eng-

land, by a law of Edward the Confessor (1071), any one who partook of hospitalities in a house, and remained till the third night, was then reckoned under the jurisdiction and protection of the host, in the same manner as if he had been regularly enrolled as one of the family or domestics. Such a one, on the first night of his sojourn, could only be termed *uncuth*, that is, a stranger; on the second, *gust*, that is, a guest; and on the third, *agenhine* or *hogenehyne*, that is, a friend or domestic servant.

AGINCOURT, or **AZINCOUR** (Battle).—At this village, in the Pas-de-Calais, France, 10,000 English, under Henry V., defeated from 50,000 to 60,000 French, with great slaughter, on Friday, the 25th of October, being St. Crispin's day, 1415.

AGISTMENT, a small tithe on cattle, or the other produce of grazing lands, payable in England by the occupier to the vicar or rector. In Ireland, while the lands were chiefly in the hands of Roman Catholics, the clergy thankfully received whatever they could get. It was, however, formally demanded by the Protestant clergy in 1720, but was vehemently resisted by the landlords. On the 18th of March, 1735, the Irish House of Commons resolved "that any lawyer assisting in a prosecution for tithes of agistment should be considered as an enemy to his country." This tithe was abolished in Ireland by the Act of Union.

AGITATORS, or **ADJUTATORS**, a term applied in English history, to the two privates or inferior officers, elected by each troop or company of the army (1647). These, with a council of the principal officers, after the model of the House of Peers, formed what Hume terms "a terrible court." Thus, at the instigation of Cromwell, Skippon, Ireton, and Fleetwood, a military parliament, in opposition to the parliament at Westminster, was called into existence. The agitators seized the person of the king (June 4), and after committing various excesses, were suppressed. In later times, demagogues who have endeavoured to excite disaffection amongst the people, or to obtain changes in the laws by inflammatory appeals, have been styled agitators.

AGLABITES, an African dynasty, the successors of Ibrahim Ben Aglab, governor of Africa, B.C. 800. Zeyadatala was the last of this dynasty, the duration of which was 112 years.

AGNADEL, or **AGNADELLO** (Battle), fought May 14, 1569, between the French, commanded by Louis XII., and the Venetians. The latter were defeated with great loss. It is sometimes called the battle of Rivolta.

AGNOTES, or **AGNOËTÆ**.—This name was applied to two sects, viz. the followers of Theophrastus of Cappadocia, about 370, and the followers of Themistius, a deacon of the church of Alexandria, in 535. They both held peculiar notions respecting the prescience of the Almighty.

AGNUS DEI, wax medals, stamped with the figure of a lamb bearing a cross, intended

to represent the Lamb of God, were, in the early church, distributed amongst candidates for baptism. The practice originated in the 7th or 8th century. The popes have, since the 14th century, been in the habit of consecrating similar medals, made sometimes of the precious metals, for distribution the first Sunday after Easter. By 13 Eliz. c. 2, s. 7 (1571), any person bringing into the realm any token or thing called by the name of *Agnus Dei*, incurred the penalty of a præmunire.

AGONISTICI, disciples of Donatus, bishop of Carthage, sent by him into different parts of Africa, to preach his peculiar doctrines at fairs, markets, and places of public resort (342). Hence they were called *Circutores*, *Circumcelliones* or *Circeliones*, and *Catropitæ*. They styled themselves *agonistici* (combatants), under the pretence that they were combating and triumphing over the devil; and they were called *circumcelliones*, or vagrants, from the *cellæ*, cottages of the peasants, where, having no fixed residence, they sought a retreat. They committed various excesses, and were punished with great severity.

AGRA (Hindustan).—By an act of parliament, passed Aug. 28, 1833 (3 & 4 Will. IV. c. 85, s. 38), it was directed that the Bengal presidency should be divided. The north-western country was to be erected into a fourth presidency, that of Agra; but the legislature afterwards ordered the measure to be suspended.

AGRA, the capital of the North-west provinces of Bengal, was founded by Akbar in 1566, and continued the seat of the Mogul emperors till 1647, when Delhi was made their capital. It was taken by Scindia in 1784, and surrendered to Lord Lake Oct. 17, 1803. Among the spoils on that occasion was a cannon, made to throw cast-iron balls of 1,500 lb. It was 14 feet 2 inches long, and weighed 96,000 lb. It is said to have been wantonly blown to pieces by some artillery officers in 1833. Nearly all the European buildings in Agra were destroyed during the mutiny of 1857; but their owners were preserved in the large and strongly-defended fort. The native troops were disarmed on the 1st of June. The Europeans attacked the Neemuch force and the Kotah contingent (July 5), but were compelled to retreat. Greathed gained a signal victory here (Oct. 10, 1857) over the rebel forces.

AGRARIAN LAW.—Niebuhr has shown that the agrarian laws of the Romans were in no case intended to interfere with or affect private property in land, but related exclusively to the public domain. Portions of the territory of conquered states were divided, and these laws provided for their proper distribution. The first proposal of an agrarian law in Rome was made by the consul Spurius Cassius B.C. 486. It failed; Cassius was condemned and executed on a false charge of treasonable designs, B.C. 485, and Livy observes that no measure of the kind was ever proposed up to his time (the reign

of Augustus) without exciting the greatest commotion. An agrarian law, which served as a model for all subsequent measures of the kind, was carried by the tribune C. Licinius Stolo, B.C. 367, and called the Licinian law. It provided that no person should occupy more than 500 jugera of public land, nor have more than 100 large and 500 small cattle grazing on the public pastures. Tiberius Gracchus attempted to amend this law (B.C. 133), but he was killed, and many struggles ensued on this subject.

AGRICOLA'S WALL.—The remains of two Roman walls exist in this country. One of these fortifications extended from the Solway Frith to the mouth of the Tyne, being the southern (see **HADRIAN'S WALL**); the other from the Clyde to the Frith of Forth, being the northern fortification. The latter, called the Wall of Agricola, of Lollius Urbicus, or of Antoninus, is an earthen intrenchment, familiarly known as Grime's or Graham's Dyke. Tacitus states that Agricola constructed a chain of forts from the Clyde to the Forth A.D. 81, and Capitolinus asserts that Lollius Urbicus, during the reign of Antoninus Pius, erected a rampart of turf A.D. 140. This is the fortification that is now known under the various names of the Wall of Agricola, of Antoninus, or of Lollius Urbicus.

AGRICULTURAL SOCIETIES.—The "Board of Agriculture" was established in 1793; received an annual grant from parliament, and was dissolved in 1816. The "Royal Agricultural Society of England" was established in 1838, and celebrated its first anniversary in May, 1839. It was incorporated March 26, 1840. Its country meetings are held in the month of July. A "Society of Improvers in the Knowledge of Agriculture in Scotland" was instituted in 1723. This became extinct, and another was established in 1755. The present society arose in 1784, under the name of the "Highland and Agricultural Society of Scotland." "The Royal Agricultural Improvement Society of Ireland" was established in 1841. The university of Oxford maintains a Sibthorpean professorship of rural economy. Professorships of agriculture and agricultural chemistry are attached to the university of Edinburgh, while the university of Aberdeen provides lectures on agriculture. There are above 600 agricultural societies in the United Kingdom.

AGRICULTURE in a rude form was known from the earliest period (Gen. iii. 17—19). Cain, B.C. 3979, is described as a tiller of the ground (Gen. iv. 2). The Egyptians excelled in agriculture. Abraham, when there was a famine in Canaan, repaired to their country in search of food (Gen. xii. 10) B.C. 1920; and Jacob sent his ten sons to purchase corn there (Gen. xlii. 1—4). An ancient Babylonian work, called "The Book on Nabathæan Agriculture," is still preserved. It is a cyclopædia of agriculture. Cecrops is said to have carried the knowledge of agriculture from Egypt to Greece, when he settled in

Attica, B.C. 1556. Pliny gives Bazyges credit for imparting a knowledge of tillage to the Greeks. Homer, who flourished about B.C. 950, describes agriculture as an honourable pursuit with kings and princes; and Hesiod, about B.C. 907, speaks in its praise. The Romans esteemed it highly, and the *Georgics* (composed B.C. 30) of the poet Virgil contain the most elaborate and eloquent instructions ever written on this subject. The Persians cultivated the art of agriculture, and Xenophon, who wrote a treatise on it, declares that Cyrus the Younger paid the most earnest attention to it. Gelon of Sicily (B.C. 479) sought to render it an honourable occupation. Amid the various wars and struggles in the earlier part of the Middle Ages, agriculture necessarily declined. It was revived by the Saracens, and has spread over Europe, until at length carried, by modern discoveries and the aid of science, to its present advanced state.

AGRIGENTUM (Sicily).—This powerful Greek city was founded by a colony from Gela, B.C. 582. It appears to have fallen under the yoke of the tyrant Phalaris about 570 B.C. He was killed in an insurrection, and Alcamenes succeeded B.C. 534. Theron ruled from B.C. 488 to B.C. 472. Aided by Gelon of Syracuse, he routed the Carthaginian invading army, B.C. 480, and subdued Himera. Soon after, a democratic form of government was adopted. It was again invaded by the Carthaginians B.C. 406, and they destroyed the town. Agrigentum scarcely recovered from this blow, and it was captured by the Romans B.C. 262. Its modern name is Girgenti.

AHMEDABAD (Hindustan), built in 1412 by Ahmed Shah, was captured by the Maharrattas early in the 18th century. The British stormed it in 1780, and it came into their possession by treaty Nov. 6, 1817.

AHMEDNUGGER (Hindustan).—This fortified city, in the presidency of Bombay, was founded by Ahmed Nizam Shah in 1493, and became the capital of a kingdom of the same name. It was annexed to the Delhi empire in 1634; but the Maharrattas seized it in 1707, and it remained in their possession until 1797, when it was captured by Scindia. Wellington took it after a siege of four days, Aug. 12, 1803, and though temporarily restored to the Maharrattas, it was annexed to the British possessions in India, by treaty, June 13, 1817. The first English factory was established here in 1612.

AHWAZ (Persia).—A favourite place of resort with Artabanus IV., the last of the Parthian kings, whose empire was subverted by Artaxerxes, king of Persia, in 165 B.C. The English took possession of this town during the Persian war, April 1, 1857.

AIBAR, or AYBAR (Battle).—At this place, in Spain, the Moors in 882 defeated the Spaniards, led by their king Garcia, who fell in the encounter.

AIDS.—Under the feudal system, aids were claims of the lord on the vassal, originally granted by way of benevolence, but after-

wards exacted as a matter of right. Our early monarchs used them as a means of extorting money from their subjects. So onerous did they become, that a clause in Magna Charta (1215) declared that no aid should be imposed without the consent of the great council of the nation, except on three occasions: 1. The ransom of the king's person; 2. The making his eldest son a knight; and 3. The marriage of his eldest daughter. The clause was omitted in Henry III.'s charter (1224), but revived in that of Edward I. in 1297. This method of levying money was abolished by 12 Char. II. c. 24, in 1660. (See *BENEVOLENCE, REVENUE, &c.*)

AIGUES-MORTES (France).—From this place Louis IX. embarked, Aug. 25, 1248, on the 7th crusade, and again, July 4, 1270, on the 8th and last crusade. It is also celebrated as the scene of the interview between Charles V. and Francis I. in 1538. The emperor, on concluding the truce of Nice, having set sail for Barcelona, was driven on the island of St. Margaret, on the coast of Provence. Francis invited him to a personal interview, and Charles accepted the invitation. Francis without ceremony visited the emperor in his galley, and the latter visited Francis at Aigues-Mortes.

AIR. (See *ATMOSPHERE.*)

AIRE (France) was taken by the allies Nov. 9, 1710. Lord Hill captured the town and its magazines, after a severe combat, March 2, 1814.

AIR-GUN.—The first account of an air-gun is found in David Rivault's "*Elémens d'Artillerie.*" He was preceptor to Louis XIII. of France; and he ascribes the invention to a certain Marin, a burgher of Lisieux, who presented one to Henry IV., towards the end of the 16th century.

AIR-PUMP.—Otto von Guericke, a German, made the first attempt at this invention in 1654. It was greatly improved by Robert Boyle, a few years later; and further improvements were effected by Robert Hook in 1658 or 1659.

ARX (France), the seat of the first Roman colony in Gaul, said to have been founded by C. Sextius Calvinus B.C. 122, and called *Aquæ Sextiæ*. Here Marius routed the Teutones and Cimbri, B.C. 102. It was destroyed by the Saracens in the 8th century, and rebuilt in 796. Charles V. captured it in 1535, and here he was crowned king of Arles. It is an archiepiscopal see, and councils were held here in 1112, 1374, 1409, 1416, 1585, and 1612. Its university, suppressed at the Revolution, was founded by Pope Alexander V. in 1409.

AIX-*LA*-CHAPELLE, or AACHEN.—This ancient Prussian city is said to have been founded by the Romans in 124. It was the birthplace, and favourite residence of Charlemagne, who made it the capital of all his dominions north of the Alps in 795. Here he died and was buried in 814. The city was ravaged, and Charlemagne's palace destroyed by the Danes in 882. During the Middle Ages, it was made a free and impe-

rial city. Councils were held here in 799, 803, 809, 813, 816, 817, 825, 831, 836, 842, 860, 862, 992, and 1165. Aix-la-Chapelle was taken by the French Dec. 8, 1792, retaken by the Austrians March 8, 1793; but the French regained possession Sept. 22, 1794. By the treaty of Luneville (Feb. 9, 1801) it was ceded to France, but it reverted to Prussia in 1814.

AIX-LA-CHAPELLE (Congress).—The king of Prussia, the emperor of Austria, and the emperor of Russia, assembled at Aix-la-Chapelle on the 29th of September, 1818, and soon after a congress, attended by these sovereigns, their ministers, and the English plenipotentiaries, met. They addressed a note (Nov. 4, 1818) to the French minister, the duke of Richelieu, stating their determination to put an end to the military occupation of the French territory, and calling upon him to take part "in their present and future deliberations." France accepted the offer, the duke of Richelieu repaired to Aix-la-Chapelle, a convention for the withdrawal of the British troops from France was signed Oct. 9, and the congress separated Nov. 21, 1818.

AIX-LA-CHAPELLE (Treaties).—The first, May 12 (O.S. 2), 1668, was the result of the triple league between England, Holland, and Sweden, for the purpose of putting a stop to the war between France and Spain. After some negotiations, the plenipotentiaries of England, Sweden, Holland, France, and Spain, met at Aix-la-Chapelle, the treaty being concluded and signed in a fortnight. France obtained all the places she had conquered in Flanders, and restored Franche-Comté to Spain. Though permitted to retain some of his conquests, a check was given to the ambition of Louis XIV.—The second treaty of Aix-la-Chapelle, confirming the treaties of Westphalia, 1648; Nimègue, 1678, 1679; Ryswick, 1697; Utrecht, 1713; Baden, 1714; Triple Alliance, 1717; Quadruple Alliance, 1718 and 1738, was concluded Oct. 18 (O.S. 7), 1748. The contracting parties were Great Britain, France, Holland, Hungary, Spain, and some Italian states. The basis of the pacification was a general restitution of conquests, prisoners being released without ransom. England gave up all she had acquired in the East and West Indies. The Assiento contract, with the article of the annual ship, was confirmed to England for four years.

AIZNADIN, or AJNADIN (Battle).—The Saracens gained a great victory in this plain, in Palestine, over the imperial forces, in the reign of Heraclius, July 13, 633. According to some authorities, the battle was fought July 30, 634. Gibbon, speaking of the imperial forces defeated on this occasion, says they might be "indifferently styled either Syrians, or Greeks, or Romans; *Syrians*, from the place of their birth or warfare; *Greeks*, from the religion and language of their sovereign; and *Romans*, from the proud appellation which was still profaned by the successors of Constantine."

AJACCIO (Corsica).—The chief town of the island, celebrated as the place where Napoleon Bonaparte was born, Feb. 5, 1768.

AKERMANN (Bessarabia) was taken by the Russians in 1770, restored in 1774; taken again in 1789, restored in 1792; and ceded to Russia by Turkey in 1812. A treaty was concluded here Sept. 4, 1826, between Russia and Turkey. The treaty of Bucharest (May 28, 1812) was confirmed in all its parts. Turkey recognized the independence of Wallachia and Moldavia; restored the privileges of the Servians; agreed to pay the Russian claims for losses inflicted by the Barbary corsairs; and granted to Russia the free navigation of the Black Sea, and a passage through the Dardanelles. Russia, on her part, restored her conquests in Asia, and made a few trifling concessions.

AKHALZIKH (Armenia).—The Russians defeated the Turks near this place Aug. 24, 1823, and took possession of the city and fortress Aug. 27. The Turks made an effort to regain possession in Feb. 1829, but were compelled to retire March 16, and Akhalzikh was ceded to Russia by the treaty of Adrianople, Sept. 14, 1829.

AKYAB (E. Indies), a town and seaport of Arracan, ceded, with other places, to the British by the treaty of Yandaboo, Feb. 24, 1826.

ALABAMA (N. America).—This state originally formed part of Georgia. In 1798 the country, including the present states of Mississippi and Alabama, was formed into a territory. Alabama was detached in 1817 from Mississippi, and admitted into the Union as a separate state March 3, 1819.

ALAND ISLES (Gulf of Bothnia).—The group, consisting of 80 inhabited and 200 uninhabited islands, formerly belonged to Sweden, but was seized by Russia, and ceded to her by Sweden in 1809. A naval engagement between the Swedes and Russians, in which the latter were victorious, was fought here in 1714. A congress assembled here on May 23 (O.S. 12), 1718, but was abruptly terminated by the Russians Sept. 24, 1719. The Russian fortifications were captured and destroyed by a joint expedition of English and French troops in the autumn of 1854. The victors took 2,235 prisoners, 72 unmounted guns, 7 field-pieces, and 3 mortars. They afterwards abandoned the islands, which were re-occupied by the Russians. By a separate convention between England, France, and Russia, annexed to the treaty of Paris (April 27, 1856), the emperor of Russia agreed "that the Aland Isles should not be fortified, and that no military or naval establishment shall be maintained or created there."

ALANI, or ALANS, one of the Tatar or nomadic races of Asia, which, at the time they first came in contact with the Romans, during Pompey's expedition to the Caucasus, B.C. 65, inhabited some portion of the mountainous regions to the north of the Euxine. Gibbon (chap. xxvi.) says, "a naked scimitar, fixed in the ground, was the only object

of their religious worship." Having been conquered by the Huns, the Alani joined them in their incursions into Europe. They invaded the Gothic kingdom of Hermanric in 375. Theodosius defeated them, as allies of the Goths, in the war in 379—382. They joined the Vandals in the invasion of Gaul in 406, and of Spain in 409; and in 428 they received Lusitania, Carthage, and other parts of Spain, as their share of the conquest. Many of them served under Genseric, in his African war of 429; whilst the Alani of the Caucasus followed Attila in his attack upon the Roman empire in 441. Their defection at the battle of Châlons, in 451, during Alaric's invasion of Gaul, led to their conquest by Torismond, king of the Visigoths, in 452, after which they ceased to be an independent people.

ALARCOS (Battle).—Fought near Alarcos, in Spain, Wednesday, July 19, 1195, led by Alfonso IX.: the former were victorious, and the town itself and 20,000 prisoners fell into their hands.

ALASCANI.—The followers of John Alasco, a Polish divine, uncle to the king of Poland. He quitted the Roman Catholic Church at the Reformation, and at the invitation of Cranmer came to England in 1551. He held peculiar opinions respecting the Eucharist, applying the words, "this is my body" to both the elements. He was a friend of Erasmus and Melancthon, and, after officiating at the Dutch church in Austin Friars, quitted England during the reign of Mary, and finally retired to his own country, where he died in 1560.

ALBA LONGA (Latium), or "White Long-town."—Of the history of this ancient city, about 15 miles S.E. of Rome, little is known previous to its conquest by the Romans B.C. 665. According to the traditional account, it was founded by Ascanius, son of Æneas, B.C. 1152. It was called "Longa" from its situation upon a steep hill, with a narrow summit; and "Alba," in allusion to the milk-white sow which Æneas, in obedience to the oracle, followed on his landing in Italy. Alba was for some time the centre of the league, consisting of thirty Latin cities. It is difficult, however, to separate the authentic from the fabulous in its history, of which the following is a summary.

B.C.

1143. Ascanius succeeded by Sylvius Posthumus.

1114. Æneas Sylvius reigns.

1043. Latinus king.

1038. Alba succeeds.

1002. Capetus, or Atys, king.

976. Capys king.

916. Calpetus king.

903. Tiberinus king.

895. Tiberinus defeated near the river Albula, into which he precipitates himself and is drowned. From this circumstance the Albula was thenceforth called the Tiber. He is succeeded on the throne by Agrippa.

864. Romulus king.

845. Aventinus king.

803. Procas king.

795. Numitor king.

794. Amulius usurps the throne of his brother Numitor, condemning his niece Ilia to a life of celibacy.

771. Ilia forced to violate her vow.

770. Ilia becomes the mother of twins. She is buried alive and her offspring cast adrift on the Tiber. Having floated to Mount Aventine, the children were rescued by Faustulus, a shepherd. His wife, Acca-Larentia, surnamed Lupa, suckled the children, named Romulus and Remus.

754. Romulus puts Amulius to death, and restores his grandfather Numitor to the throne.

753. Romulus fortifies Rome.

671. Clitulus sends ambassadors to Rome to complain to Tullus Hostilius of a trespass by the Romans on the Alban territory.

670. Invasion of the Roman territory by the Albans. Combat between the three Horatii and the three Curatii; the latter are killed, and only one of the Horatii escapes. The Albans submit to Rome.

664. The Albans endeavour to regain their independence, and incite the Volentes and the Fideneans to make war against Rome.

665. The Alban general Mettius is defeated, Alba Longa destroyed, and its inhabitants are transferred to Rome.

ALBANIA (Asia).—This country, washed by the Caspian Sea, first became known to the ancient world through Pompey's expedition into the Caucasus in pursuit of Mithridates, B.C. 65. One legend represented the inhabitants as the descendants of Jason and his companions in the Argonautic-expedition. Its rulers did homage to Trajan when he invaded Albania A.D. 116; but little is known concerning this country, which forms part of the modern Georgia. It was the seat of a bishopric in the early church.

ALBANIA (European Turkey) comprises part of the ancient Epirus, Illyria, and Chætonia. Its early history is obscure. The Albanians, a sturdy and valiant race, termed by Gibbon "a vagrant tribe of shepherds and robbers," long maintained their independence. Their country was invaded by Robert Guiscard in 1081, and a portion of it conquered by Amurath I. in 1388. From these reverses the Albanians recovered, and, under their leader George Castriot, called by the Turks Scanderbeg, resisted the conqueror of Constantinople, Mahommed II. (1443). The Albanians overran the Morea in 1460, but were vanquished in 1478. The conquest was not, however, complete. Another struggle with Turkey commenced in 1809, and was carried on with varied success until 1822, when the Albanians were subdued. The insurrection of 1843, excited by the Tanzimat, or law of enlistment, was suppressed by Omer Pasha.

ALBANS, ST. (Hertfordshire), near the site of the ancient Verulam, is supposed, on good authority, to be the place which Cæsar stormed B.C. 54. The Britons, under Boadicea, queen of the Iceni, took it A.D. 61, and slaughtered many of the inhabitants. It received its present name from Alban, the proto-martyr of Britain, who suffered in 304. The spot where the relics of the saint had been interred was said to have been miraculously discovered by King Offa, who founded the monastery, exempting it from the payment of Peter's pence, and from

episcopal jurisdiction, in 795. The town itself was built at the instigation of Ulsig, the sixth abbot of St. Albans, in 950. Adrian IV., a native of St. Albans, granted further privileges to the abbey in 1154. The abbot of St. Albans had a seat in parliament, and took precedence of all other abbots. Edward II. visited the place, and investigated the relics of the saint, in 1313. The barons assembled here, and demanded the banishment of the Despensers, in 1321. The abbey was granted in commendam to Cardinal Wolsey in 1521. The town was incorporated by Edward VI. in 1553; and it was disfranchised for bribery in 1852.

ALBANS, St. (Battles).—The first was fought Thursday, May 22, 1455, between the houses of York and Lancaster. It was the first victory in the wars of the Roses. The duke of York gained the day, and the duke of Somerset, who led the Lancastrians, was slain. King Henry VI. was wounded by an arrow in this battle and taken prisoner. The second battle was fought between Barret and St. Albans, on Shrove-Tuesday, Feb. 17, 1461. The Lancastrians were commanded by Queen Margaret, who gained a complete victory over the Yorkists, led by the earl of Warwick, and rescued Henry VI., who was a prisoner in their hands.

ALBAYDA (Spain), taken from its founders the Moors, and peopled with Christians, by James I., king of Aragon, in 1258.

ALBI (France), the ancient Albige, was ravaged by the Saracens in 730. The Albigenses are said to have derived their name from this place, where large numbers of them dwelt. They were condemned by the council of Tours, May 19, 1163. Albi was long governed by its own counts. It was a great stronghold of the Protestants during the wars of religion in France. Albi was the seat of a bishopric at an early period, and Louis XIV. erected it into a metropolitan see in 1676. Its cathedral, commenced in 1282, was completed in 1512. A council was held here in 1255.

ALBIGENSES.—Of these early reformers, who opposed the Church of Rome, the Paulicians, who sprang up in the 7th century, appear, as Faber states, to have been "the theological ancestors." The Paulicians, wearied by persecution, quitted Asia, and sought refuge in Europe, some of them settling in the south of France. In Italy they were called Paterini and Cathari, and in France Albigenses, from the town Albi, where they dwelt in great numbers. The term was, however, applied to other sects. The first congregation of the Albigenses is said to have been discovered at Orleans in 1017; and they began to attract the notice of the dominant church before the end of the 11th century. They were condemned by a council in 1163. About the year 1200, the Albigenses, and other anti-Roman sects, which were loosely included under the same denomination, had become so numerous that they were in possession of Toulouse and eighteen other principal towns in Languedoc,

Provence, and Dauphiné, which then constituted an independent sovereignty under Raymond VI. A crusade was proclaimed against him and his subjects by Pope Innocent III. (1207 and 1208), and an army of five hundred thousand men was led against them by Simon of Montfort, earl of Leicester, in 1209. A merciless war was waged for four years, until Pedro of Aragon, Raymond's kinsman and ally, was killed in battle, on the 12th of September, 1213, and the power of Montfort was supreme. He was slain in an insurrection at Toulouse in 1218. The war was renewed, but with little success, until, in 1225, Louis VIII. took the cross and marched into Languedoc. He died in a few months, but the war was continued in the name of the young king, Louis IX. In April, 1229, Raymond VIII. abdicated, and was brought to Paris and scourged by the priests in the church of Notre Dame. In the beginning of the crusade against the Albigenses, the tribunal of the Inquisition was first opened, about the year 1210. The Albigenses were condemned by several councils. Much controversy has been excited, even of late years, respecting the Albigenses, their history and doctrines. The subject has been fully discussed by Dr. Gilly, in his "Waldensian Researches;" and in the Rev. George S. Faber's "Inquiry into the History and Theology of the Ancient Vallenses and Albigenses."

ALBIOLA (Battles).—In 809 Pepin advanced against the Venetians, and, after capturing several places, penetrated as far as Albiola with his fleet. The shallowness of the water rendered it impossible to reach the central island without throwing a bridge across the narrow channel between Albiola and Rialto. This was done; but the rude structure broke down under the weight of the invaders, who were precipitated into the lagoon. The tide meanwhile had ebbed, and their vessels were stranded; so that those Franks who escaped a watery grave fell a prey to the Venetians. This victory secured the deliverance of Venice. Near the same place the Huns were defeated in 906. The Venetians, under the command of the chief magistrate, completely destroyed their vessels, and but few of the enemy managed to escape.

ALBION.—Aristotle (B.C. 384—B.C. 323) is the first who speaks of England by this name. He says (*De Mundo*, c. 3), "In the ocean beyond the Pillars of Hercules are two large islands, called Britannic; namely, Albion and Ierne." Albion is supposed to be derived from a Celtic word signifying white, in allusion to its chalky cliffs. (*See BRITANNIA.*)

ALBUERA (Battle).—Fought May 16, 1811. Marshal, afterwards Lord Beresford, having been compelled, by the approach of Soult with a large army, to raise the siege of Badajoz, resolved to make a stand at the village of Albuera, between Badajoz and Seville. His army amounted to 30,000 infantry and 2,000 cavalry; but of these, three-fourths were Spanish, Portuguese, and Ger-

man troops. They had thirty-eight guns. Soult had under his command nearly 20,000 infantry and 4,000 cavalry, veteran troops, supported by fifty pieces of artillery. The battle commenced early in the morning, and after a terrific contest, in which victory wavered from one side to the other, the French were defeated. They lost 8,000, whilst the allied army had to deplore a loss of nearly 7,000 men. The brunt of the action was borne by the English, who had only 1,500 unwounded men left, "the remnant of 6,000 unconquerable British soldiers." Alfonso V., of Portugal, was defeated here Feb. 24, 1479; upon which he made peace with Castile.

ALBUFERA (Battle).—Fought near the lake of this name, in Valencia, in Spain, January 4, 1812, between the French and Spaniards. The former were victorious, and Marshal Suchet was made duke of Albufera in honour of his triumph.

ALCANTARA (Spain), the *Norba Cæsarea* of the Romans, celebrated for its magnificent bridge over the Tagus, built by Trajan, in 104. It had six arches, one of which was destroyed by the English in 1809; and during the same year the structure was more seriously injured by the French general Victor, and was burnt in 1836. The earl of Galway captured this town after a short siege, April 25 (O.S. 14), 1708.

ALCANTARA (Order).—One of the five military orders of Spain, founded in 1156, and confirmed by Pope Alexander III. in 1177. It was subject to the order of Calatrava until 1411. The grand mastership was annexed to the crown in 1495. The knights obtained permission to marry in 1540.

ALCAZAR, or ALCAZARQUIVER (Battle).—Fought between the Moors and the Portuguese, under Sebastian, Aug. 4, 1578. The latter were completely defeated, and their monarch was slain.

ALCHEMY.—In a vain search for the philosopher's stone, possessing the property of transmuting the baser metals into gold, the elixir of life, &c., valuable facts were collected, by which the science of chemistry was greatly advanced. The origin of alchemy has formed the subject of much discussion. Gibbon, in commenting upon the destruction, by Diocletian, in his conquest of Egypt, in 296, of all ancient books that treated upon the art of making gold and silver, remarks, "These ancient books, so liberally ascribed to Pythagoras, to Solomon, or to Hermes, were the pious frauds of more recent adepts. The Greeks were inattentive either to the use or to the abuse of chemistry. In that immense register, where Pliny has deposited the discoveries, the arts, and the errors of mankind, there is not the least mention of the transmutation of metals; and the persecution of Diocletian is the first authentic event in the history of alchemy. The conquest of Egypt by the Arabs diffused that vain science over the globe. Congenial to the avarice of the human heart, it was studied in China, as in Europe, with equal eager-

ness and with equal success. The darkness of the Middle Ages insured a favourable reception to every tale of wonder, and the revival of learning gave new vigour to hope, and suggested more specious arts of deception." Alchemy passed from the Egyptians to the Arabians. Geber, who wrote a celebrated work on the subject in the 9th century, declares that he derived most of his knowledge on the transmutation of metals from the ancient sages. Sharpe (*Hist. of Egypt*, ii. 119) says: "The later Arabs called chemistry *Alchemia*, or the *Egyptian art*; and hence our words alchemy and chemistry." Alchemy became a favourite pursuit in many European countries during the Middle Ages; and various enactments on the subject are found in our statute-book. Edward I. and Edward III. were believers in alchemy, and a proclamation of the last-mentioned monarch was issued in 1329, for the apprehension of two famous men who knew how to make silver by the art of alchemy, and who "may be profitable to us and our kingdom." The craft of multiplication was declared felony by 5 Hen. IV. c. 4, in 1404, alchemists being at that period termed multipliers. Although Henry VI. published a patent permitting the search after the philosopher's stone, Henry IV.'s statute was not repealed until 1689. Amongst the most celebrated alchemists of the Middle Ages, may be mentioned Albertus Magnus, born 1193; Roger Bacon, 1214; Arnoldus de Villa Nova, born about 1240; Raymond Lully, 1235; the Isaacs of Holland, in the 13th century; Paracelsus, 1493; and Van Helmont, called the last of the alchemists, born in 1577. Some experiments were made at Guildford in May, 1782, by one Dr. Price, who was afterwards proved to be an impostor. The elder Disraeli states that Sir Humphrey Davy assured him that "making gold might be no impossible thing, though, publicly divulged, a very useless discovery."

ALCORAZA (Battle), fought in 1087, between the Moors and the Christians during the siege of Huesca, in Spain. The struggle was long and desperate; both armies encamped on the field of battle, and the Moors withdrew during the night. Huesca capitulated soon after.

ALDENHOVEN (Battles).—The French republican army sustained two defeats near this town, in the Netherlands, Feb. 28 and March 1, 1793.

ALDERMAN, in Saxon, *ealdorman*, a term applied to a person appointed to exercise authority on account of his age and experience. It was indeed a dignity of the highest rank, both hereditary and official, nearly synonymous with that of king. Camden says the word answered to the Latin *senator*; and Sharon Turner styles the alderman "the highest officer in the kingdom." In the Laws of Ina (693) an alderman ranked with the wise men of the witan. The title seems at different periods to have corresponded to those of earl, count, duke, nobleman, &c. Thus, Ælfrie, duke of Mercia, is styled in

Æthelred's laws (978—1016) ealdorman. The same thing occurs in the Saxon Chronicle. There was the alderman of all England, the king's alderman, and the aldermen of counties, cities, boroughs, hospitals, &c. From the "*Liber Albus*," we learn that the three offices of mayor, alderman, and sheriff have existed in the city of London since 1066, and that aldermen were interred with baronial honours from 1350, although the custom afterwards ceased. Grafton says that aldermen, as city officers, were first chosen in the city of London in the reign of Henry III., about the year 1241. The title of alderman of the hundred was introduced in the reign of Henry I.

ALDERNEY (English Channel).—This island was united to the English dominions by the first Norman princes. On the Caskets, a dangerous reef near the island, William, duke of Normandy, only son of Henry I., was wrecked on his return from Normandy, Nov. 25, 1120. About 140 young noblemen perished with him. Through the narrow channel separating the island from France, and called the Race of Alderney, the remainder of the French fleet escaped after their defeat at La Hogue, by the English and Dutch, May 22, 1692. Here also the *Victory*, of 110 guns, commanded by Admiral Balchen, was wrecked, Oct. 5, 1744, when all on board perished. Extensive fortifications and a breakwater have been in course of erection at Alderney since 1850.

ALDERSHOT (Camp).—Situated between Farnborough and Farnham, in Hampshire, about 36 miles from London. In 1854, £100,000 was granted for the purpose of obtaining land to form a permanent camp for the proper training of our troops. A portion of a large moor, named Aldershot, was immediately purchased. The camp thus formed, seven square miles in extent, was divided into the north and south camps, the former capable of accommodating eight, and the latter twelve thousand men. Further purchases of land were made, and, in 1856, 7,062 acres of land having been obtained, at a cost of £135,445, and 28,181 men stationed there, it was inaugurated by Queen Victoria, April 18, 1856.

ALDINE PRESS was established at Venice in 1494, by Aldo Manuzio, or Aldus Manutius, according to the Latin. Aldo left Venice in 1506, but returned and reopened his press in 1512, when he published highly-esteemed editions of the classics, &c. The printers of Lyons and Florence began to issue counterfeit Aldines about the year 1502.

ALE AND BEER were manufactured at a very early period. Herodotus states that the Egyptians prepared a beverage, which he terms wine, from fermented barley; Pliny the Elder asserts that the Western nations made intoxicating drinks from steeped grain; and Tacitus describes a fermented liquor extracted from grain, the common beverage of the ancient Germans. Mead, or metheglin, was in use amongst the early inha-

bitants of northern Europe; and amongst the pleasures which the Scandinavian heroes were promised after death, was that of drinking ale out of carved horns, in their Valhalla, or palace of the gods. Some preparation of this kind was the favourite beverage of the Anglo-Saxons. Measures of Welsh ale are mentioned in the laws of King Ina. The price of ale was regulated by the early Norman princes, and the preamble of 51 Hen. III. st. i., passed in 1267, which established a graduated scale for the price of ale, alludes to earlier ordinances on the same subject. By 23 Hen. VIII. c. 4, s. 5 (1532), brewers were allowed greater latitude with respect to the prices at which they sold their ale. From this period various laws on the subject are found in the statute-book. Hops were not used when ale or beer was first made, as they were not known in this country until the reign of Henry VII., and are first noticed in the statute-book in 1552. Ale was one of the first articles on which the excise duty was laid. By a parliamentary ordinance, dated May 16, 1643, duties were levied on ale or beer, and by 12 Charles II. cc. 23 & 24 (1660), the excise was continued. These enactments were confirmed by several subsequent statutes. The duties were repealed by 1 Will. IV. c. 51 (July 16, 1830) from the 10th of October in that year. The ale-conner, or ale-founder, was an officer appointed in every court leet, to taste ale or beer, to see that it was wholesome, and that it was sold at the regulated price. The "*Liber Albus*" contains the oath taken by the city ale-conners in the time of Henry V. Sir Henry Ellis, in his edition of "*Brand's Popular Antiquities*" (vol. i. p. 279), says, that the word ale means nothing more than a feast or merry-making. Hence the Bride-ale, Church-ale, Clerk-ale, Lamb-ale, Leet-ale, Midsummer-ale, Whitsun-ale, &c., feasts celebrated by our forefathers.

ALE-HOUSE, or SHOP, is mentioned in the laws of King Ethelred. Malpractices arose, and the then existing regulations not being sufficient, 11 Hen. VII. c. 2, s. 5 (1495), an act against vagabonds and beggars, placed alehouses under the jurisdiction of justices of the peace. In consequence of abuses and disorders in "common alehouses and tipping-houses," a more stringent enactment was made in 1552, by 4 & 5 Edw. VI. c. 25, and this statute furnished the basis of future legislation on the subject. Various changes in the licensing laws ensued, and by 1 Will. IV. c. 64 (July 23, 1830) greater facilities were afforded for the sale of ale and beer. This act has been amended. The sale of ale and beer, &c., on the Lord's Day has frequently been a subject of legislation, and a very stringent law, 17 & 18 Vict. c. 86 (Aug. 10, 1854), was repealed by 18 & 19 Vict. c. 118 (Aug. 14, 1855), by which statute it is now regulated.

ALEMANNI, or ALLMEN, a mixed body of Suevi, who, in the reign of the emperor Caracalla (211—217) hovered round the Roman

provinces in pursuit of plunder. Their territories were invaded and they were defeated by the emperor in 214. They invaded Gaul and Italy, penetrating to Ravenna in 259; but withdrew at the approach of an army levied by the Roman senate. In various conflicts and invasions of Italy, they were defeated by Aurelian, in 270; by Julian in 357; and by Jovinus in July, 368. They obtained settlements in the country on both sides of the Rhine, from its source to its junction with the Maine and the Moselle, and were checked in their pursuit of further conquests, whilst their last king was slain at the battle on the plain of Tolbiac, near Cologne, gained by Clovis I. in 496. Here, as an independent people, their history ends.

ALEPPO (Syria).—This town, situated midway between Antioch and Hierapolis, occupies the site of the ancient Chaleb, or Haleb. It received the name of Bercea from Seleucus Nicator, about B.C. 299. Julian halted here March 5, 363, on his expedition against the Persians. It was taken by Chosroes I. in 540; by Chosroes II. in 611; and by the Saracens under Abu Obeidah in 638, when it resumed its ancient name Chaleb, or Haleb. Zimiscès wrested it from the dynasty of Hamadan about 972. It was plundered by the Mongols in 1260; Timour sacked it Nov. 11, 1400, and on his return from Damascus early in 1401, delivered it to the flames. The town was restored, and the Mamelukes were defeated near it by Selim I., Aug. 24, 1516, and has since that time, with the exception of a short interval in 1840, remained under the rule of the Turks. The Levant Company opened a house here to trade with Persia and India in 1581. It was nearly reduced to ruins by an earthquake, Aug. 13—16, 1822, when 9,000 inhabitants perished. It has suffered greatly at different times from plagues and earthquakes. The Christians were massacred here, and their churches and houses burnt, Oct. 16 and 17, 1850; and further outrages of the same kind were repeated by the Druses in 1860.

ALERIA, or ALALIA (Corsica).—The Phœceans of Ionia founded a colony in this part of the island, B.C. 564. Having been defeated in a severe naval engagement with the Tyrrhenians and Carthaginians, the colonists abandoned the island about B.C. 536. It was captured by a Roman fleet during the first Punic war, B.C. 259. A Roman colony was planted in Aleria during the dictatorship of Sylla. Paschal I. sent missionaries to the island, and established five bishoprics about 820. The see of Aleria was erected at the close of the 11th century by Urban II.

ALESSANDRIA (Italy), near the confluence of the Bormida and Tanaro, a fortress of enormous size, and one of the strongest in Europe, was built in 1168, to guard the passage of the rivers. The town is the capital of a province of the same name in the kingdom of Sardinia. It was at first called Cæsarea, and received the name of Alessandria from Pope Alexander III., who made

it an episcopal see, and united it to that of Aquiri in 1175. The sees were separated by Innocent III. in 1405. Alessandria was taken and plundered by Duke Sforza in 1522; besieged ineffectually by the French under the prince of Conti in 1657; and taken, after an obstinate resistance, by Prince Eugene in 1707. Bonaparte captured it in 1796, and Suwarrow wrested it from the French July 21, 1799. By the armistice of Alessandria, concluded after the battle of Marengo, June 1800, this fortress was surrendered to Bonaparte, by whom its fortifications were extended. By the treaty of Paris, May 30, 1814, it was restored to Sardinia. Alessandria was captured by the Austrians April 19, 1821.

ALEUTIAN ISLANDS (N. Pacific), a numerous chain, extending from Kamtschatka to Cape Alaska, in North America. They were partially discovered by Behring in 1741; Captain Cook visited them in 1778; and a survey was made by the Russians between the years 1781 and 1798. The Russian American Company formed an establishment on the islands in 1785, which has continued since 1790 to receive aid and protection from their government. A volcanic island rose from the sea in the middle of the chain in 1795, and in 1807 it was found to be enlarged to about 20 miles in circuit, and lava was then flowing down its sides.

ALEXANDER (Era of).—Two epochs were named by the Greeks after Alexander the Great. The first dates from his death, Nov. 12, B.C. 324, but does not appear to have been generally used; the second commenced B.C. 311. The latter is better known as the æra of the Seleucidæ, or of the Greeks.

ALEXANDER, St. (Order of).—Instituted in Russia by Peter the Great, in 1722, and confirmed by the empress Catherine April 8, 1725.

ALEXANDRIA (Battles).—The first, in which Bonaparte defeated the Arabs and captured the town, was fought July 3, 1798; the second and third, in which the English, with an inferior force, defeated the French, took place March 13 and 21, 1801. In the latter, the British general, Sir Ralph Abercrombie, fell in the hour of victory. The French lost 3,000 and the English 1,400 men.

ALEXANDRIA (Egypt) was founded by Alexander the Great, in the autumn of B.C. 332, and became the residence of the Greek kings of Egypt. The Ptolemies made it one of the most magnificent cities of the ancient world, and under their rule it became the seat of civilization and learning. It was almost totally depopulated by a general massacre by Ptolemy Physcon, about B.C. 141; suffered greatly during its occupation by Julius Cæsar, after the defeat and death of Pompey, B.C. 48; and was, with the remainder of Egypt, made a Roman province B.C. 30. Several thousand Jews were massacred here in the year 67. The city having fallen into decay, was partially restored by Hadrian in 122. Caracalla, on a visit to the city in 215, in revenge for some foolish satires, ordered a general massacre of the

inhabitants. Diocletian having cut off the aqueducts which conveyed the waters of the Nile to the city, captured it after a siege of eight months, in 297. A terrible earthquake occurred here July 21, 365, when 50,000 persons are said to have perished. The Christians overthrew the temples of the pagan deities, and did much damage to the temple of Serapis in 389. Chosroes II. captured it in 616. Amrou, the general of Omar I., captured it after a siege of fourteen months' duration, Friday, Dec. 22, 640, or, according to other authorities, in Dec. 641. The victorious general described the city to his sovereign in these terms: "It is impossible for me to enumerate the variety of its riches and beauty; and I shall content myself with observing that it contains four thousand palaces, four thousand baths, four hundred theatres or places of amusement, twelve thousand shops for the sale of vegetable food, and forty thousand tributary Jews." On this occasion its valuable and extensive library was destroyed, and Gibbon states that "six months were barely sufficient for the consumption of this precious fuel." The Greeks recovered it in 644, but Amrou regained possession the same year, and it remained under the sway of the Arabian caliphs until the Fatimites seized Egypt (958—972) and founded New Cairo, which accelerated the decline of the ancient city. Christianity was introduced into Alexandria in the 1st century, and it was made a patriarchate, possessing at one time no less than nine dioceses. Seventeen councils were held here, between the years 231 and 633. From its ruins a modern town has been constructed near the former site, and its importance has, in some measure, revived, from its convenient situation for communication, overland, with the East Indies. The British took it Sept. 2, 1801, and again March 21, when they held it till Sept. 23, 1807.

ALEXANDRIA (U. States).—Immediately after the capture of Washington by the British forces, Alexandria capitulated, and was delivered to our troops Aug. 29, 1814.

ALEXANDRIAN CODEX, or MS.—A copy of the Scriptures in Greek, written in capital letters, without being divided into chapters, verses, or words, said to be the most ancient in existence, belonged, as early as 1098, to the library of the patriarch of Alexandria. It was sent as a present to Charles I. about the year 1628, by Cyrilus Lucaris, patriarch of Constantinople, who asserted that it was written "by the hand of Thecla, a noble Egyptian lady, about 1300 years previously, a little after the council of Nice" (325). The learned are much divided in opinion respecting its date. After remaining in the royal library for many years, the MS. was removed, with the rest of the royal collection, to the British Museum, in 1753. It was published in 1717-20 and in 1816-28.

ALEXANDRIAN LIBRARY.—There were two libraries in this city, the larger one in the Bruchium, and the smaller in the Serapeum. The former was destroyed during the occu-

pation of Alexandria by Julius Caesar, B.C. 48, and was probably restored by Antony, and again destroyed by Aurelian A.D. 273. The latter, founded by Ptolemy Soter, about B.C. 284, was not, as some writers suppose, involved in the destruction of the temple of the Sarapeum, A.D. 389, when, by the edicts of Theodosius, the pagan rites were abolished and the pagan temples overthrown. This valuable treasury was destroyed by command of Omar I., after the capture of the city, Dec. 22, 640. Though Gibbon throws doubt upon this statement, it is now established beyond dispute.

ALEXANDRIAN SCHOOL.—A writer in the "Encyclopædia Britannica" says, justly enough, "The term 'Alexandrian School' is applied in a loose sense to the whole body of eminent men who, in all the departments of knowledge, conferred lustre on the capital of the Ptolemies; but, as a characteristic designation, it is more strictly confined to that particular section of its philosophers known as the Neo-Platonists." The celebrity of Alexandria, as a seat of letters, commenced under Ptolemy Soter, B.C. 312, and continued, under his successors, till the commencement of the Christian æra; but that celebrated philosophy, known under the name of Neo-Platonism, originated towards the end of the 2nd century of our æra, and flourished, with certain modifications, until the 5th century, when it rapidly declined.

ALFORD (Battle).—The duke of Montrose gained a complete victory here over the Scottish Covenanters, July 2, 1645.

ALFRED THE GREAT was born at Wadding, or Wanading, a royal residence in Berkshire, probably in the month of January, 849. He was the youngest son and last child of Ethelwulf and Osburgha, the daughter of his cupbearer Oslac, married about 830. Alfred visited Rome in 853, and again in 855. He married Elswitha in 868. She was descended from the royal family of Mercia. On the death of his brother Ethelred, April 23, 871, Alfred became king of Wessex. In spite of his numerous battles with the Danes, he devoted much of his time to cultivating his mind, and laboured zealously to obtain proper means of education for his subjects. Alfred died Oct. 28, 901, and was buried at Winchester. His wife, Elswitha, survived him. They had several children, of whom some died young. Amongst those that survived were Ethelfleda, his eldest daughter, "the lady of the Mercians," who married King Ethelred, and died July 12, 919; Edward, afterwards Edward I., born in 870, ascended the throne Oct. 28, 901, and died in 925; Ethelgina, abbess of Shaftesbury; Elfrida, who married Count Baldwin of Flanders, and died in 929; and their youngest son, Ethelward, who was a zealous scholar, and died Oct. 16, 922.

ALGEBRA.—A Greek treatise by Diophantus of Alexandria, written soon after the commencement of the Christian æra, is the earliest work on Algebra, or, as Newton terms it, "Universal Arithmetic." This

treatise dealt with only one branch of the science,—indeterminate analysis. Europeans obtained their first knowledge of algebra from the Arabs, who probably derived their information from the Hindoos. The earliest Arabian writer on Algebra is Mohammed Ben Musa, who wrote at the command of the Caliph Al Mamun (813—833). A copy of this work in the original, transcribed in 1342, may be seen in the Bodleian library at Oxford, and Dr. Rosen published it, with an English translation, in 1831. Leonard Fibonacci, a merchant of Pisa, who had travelled much in the East, put forth a treatise on algebra in 1220, and it was re-written, with improvements, in 1228. Thus, two centuries before the invention of printing, this science was introduced into Italy. This treatise had been long forgotten, until, about the middle of the 18th century, it was discovered in the Magliabecchian library at Florence. Luca Pacioli di Borgo, a Franciscan, who taught mathematics in the university of Milan, published the first printed treatise on algebra at Venice, in 1494. Another edition appeared in 1523. Scipio Ferreo, of Bologna, discovered the solution of one case of equations in 1505; and Nicolas Tartaglia, of Brescia, that of two other forms in 1535. Jerome Cardan extended these discoveries, and published, in his “*Ars Magna*,” in 1545, his rule for the solution of cubic equations, still known as “*Cardan’s rule*.” His coadjutor, Ludovico Ferrari, discovered a general method of solving biquadratic equations. Michael Stifel, in his “*Arithmetica Integra*,” published at Nuremberg in 1544, is supposed to have first employed the signs + and —, and numeral exponents of powers. Francis Viète, or as he is generally called, Vieta, whose works were published after 1600, made such important improvements, that he altogether changed the character of the science. He was the first to apply algebra to geometry, and in this was followed by Descartes and Newton. Albert Girard, a Dutchman, in his “*Invention Nouvelle en Algèbre*,” published in 1629, “conceived,” as Hallam remarks, “a better notion of negative roots than his predecessors.” John Harriott, in his “*Artis Analyticæ Praxis*,” published in 1631, ten years after the death of the author, made, says Hallam, “the last great discovery in the pure science of algebra. He arrived at a complete theory of the genesis of equations, which Cardan and Vieta had but partially conceived.” He is said to have been the first to use small letters instead of capitals; to have employed vowels for unknown, and consonants for known quantities (according to present practice, known quantities are represented by *a, b, c, &c.*, and unknown by *x, y, z*), and joined them to express their product. Descartes applied algebra to curves, though he is suspected of having taken the theory from Harriott.

ALGERIA (N. Africa).—The French having, on account of annoyances to their trade, declared war against Algiers, dispatched

a fleet from Toulon, which sailed May 25, 1830, carrying above 30,000 troops, and on the morning of June 14, a landing was commenced in the neighbourhood of Algiers. A battle was fought on the 19th, in which the French, with difficulty, defeated a large Algerine force. Skirmishes ensued on the 24th and 25th; the trenches before Algiers were commenced on the 29th, and fire opened July 4 with such effect, that on the same evening a treaty was concluded, by which Algiers, its forts and harbour, with some of the adjoining districts, were surrendered to the French, who have since established a colony, divided into three provinces,—Algiers, Oran, and Constantia.

A.D.

- 1830. Medeah conquered in Nov., and Oran occupied Dec. 10.
- 1832. Bona occupied in May.
- 1833. The French declare their intention of colonizing the country. Abd-el-Kader raises an insurrection against the French and is defeated at Tamojanat, Sept. 3, and at Ain-Beida, Oct. 10. Bugia taken Sept. 29. Treaty concluded between Gen. Desmichels and Abd-el-Kader, Sept. 26.
- 1835. War breaks out again. The French take Harchgoun in Oct.; Mascara and Tlemsen, Dec. 5, after some severe fighting.
- 1836. The Algerines defeated at Taafna, April 25. Bugeaud defeats Abd-el-Kader, in a great battle near Tlemsen, July 6.
- 1837. Bugeaud concludes the treaty of Taafna with Abd-el-Kader, May 30. Achmet Bey defeated and Constantina taken, Oct. 13.
- 1838. Philippeville founded in October.
- 1839. Abd-el-Kader defeats the French at Metidja, Dec. 14, and advances to the walls of the city of Algiers.
- 1840. War resumed with Abd-el-Kader, who had been made sultan in 1837.
- 1841. The French gain several actions.
- 1843. Bugeaud organizes a plan of campaign by movable columns, radiating from Algiers, Oran, and Constantina. The French surprise Abd-el-Kader’s camp, and he manages to escape, but with difficulty.
- 1845. Pellissier and St. Arnaud destroy 700 Arabs, men, women, and children, who had taken refuge in the cave of Khartani, by lighting a fire at the entrance, June 12.
- 1847. Bou-Maza surrenders at Orleansville, April 13. Bugeaud’s expedition to Great Kabylia in May. Abd-el-Kader surrenders at Nemours, Dec. 23.
- 1849. The Saharians revolt. Zaatcha taken and destroyed in November.
- 1850. Pellissier defeats the Saharians at Laghonat, which is destroyed, Dec. 2.
- 1857. An insurrection suppressed by the French.
- 1858. Prince Napoleon minister of Algeria.
- 1861. Napoleon III. and the empress Eugénie visit the colony.

ALGESIRAS (Spain).—This stronghold, considered by the Moors the key of Spain, was founded by Tarik, on the first invasion of the peninsula, in 713. Alfonso XI., of Castile, wrested it from the Moors March 24, 1344, after a siege of twenty months’ duration. He destroyed the town and fortifications, which were rebuilt by Charles III. in 1760. In the Bay of Algesiras, Sir James Saumarez attacked, July 7, 1801, the united French and Spanish fleets, under Admiral Linois. The English lost the *Hannibal*, 74, which had grounded. The enemy, who fought under the shelter of the Spanish batteries,

having suffered severely, retired from the action. Having been reinforced, they put to sea on the 9th of July, and were immediately chased by Sir James Saumarez, whose squadron consisted of five ships of the line, one 32-gun frigate, a sloop, and a Portuguese frigate, while the enemy had nine line-of-battle ships, three frigates, and a lugger. Only two of the English ships were engaged in this action, which took place on the 12th, when the *St. Antoine* was captured. The *Don Carlos*, a Spanish ship of 112 guns, having suffered from the broadsides of the *Superb*, caught fire, and in this condition was attacked by mistake about midnight by another Spanish 112-gun ship, the *Hermenegildo*. They ran foul of each other, the *Hermenegildo* was soon in flames, and both ships blew up, with all on board.

ALGIERS (Africa).—This country fell under the power of the Romans B.C. 161, and remained in their possession till it was seized by the Vandals, in 439, from whom it was recovered by Belisarius in 534. In 667 it was overrun and conquered by the Saracens; after which period it was divided into several minor kingdoms. About 935, Jussuf Zeri, an Arabian chief, founded the town of Algiers. Ferdinand of Spain, having driven the Moors from Europe, followed them into Africa, and in 1509 captured Algiers. The natives called to their assistance the corsair Aroudj Barbarossa, who expelled the Spaniards, and established himself in their stead, in 1516. The place then became the head-quarters of the Barbary pirates, their chief receiving, in 1520, the title of Dey. In 1541, Charles V. made an unsuccessful attempt to destroy the power of the Algerine corsairs, who were the terror of the neighbouring states. They had 25,000 Christians in bondage in the year 1576. In 1655, Blake compelled the Dey to give up his slaves and to desist from piracy, and in 1665, 1670, and 1681, Louis XIV. exacted similar engagements. The town was bombarded and reduced to submission by the English, under Lord Exmouth, Aug. 27, 1816. In 1830 the French took the city and deposed the Dey. (See ALGERIA.)

ALHAMA (Spain).—This stronghold of the Moors, in Granada, was captured by the Spaniards Feb. 23, 1482. The Moors besieged it March 5, retired March 29, and returned in April. It was, however, relieved by Ferdinand May 14, in the same year.

ALHAMBRA (Spain).—The fortress and palace of the Moors, in Granada, was commenced 1248, and completed about 1313. It capitulated to the Spaniards Nov. 25, 1491, and Ferdinand and Isabella entered it in triumph Jan. 2, 1492. The French occupied Granada from Jan. 1810 to Sept. 1812, during which period the Alhambra sustained much injury.

ALI, Sect of. (See SHITES.)

ALIEN ACT.—A measure (33 Geo. III. c. 4) passed in 1793, on account of the great influx of foreigners caused by the French revolution, was distinguished by this name

from the various statutes having reference to aliens. It contained several exceptional regulations on the subject, and was continued for another year by 34 Geo. III. c. 82 (July 7, 1794).

ALIEN PRIORIES.—"The Priors abroad," says Ellis (Introduct. to Domesday Book, ii. 330), "for the better management of their estates and rents in England, established cells subordinate to their respective houses. These were called Alien Priories." Domesday Book contains several entries of foreign monasteries holding possessions in England, both as tenants *in capite* and sub-tenants. These lands were the gift of William I., or his principal followers. Their revenues were frequently seized during the wars between France and England. In the reign of Edward III. there were 110 establishments of this kind in England, in addition to others in Ireland, Aquitaine, and Normandy. A law was passed in the reign of Henry V. (1414), by which all alien priories, not conventual, were dissolved, and granted to the Crown. Though this law does not appear in the statute-book, it is found amongst the Patent Rolls.

ALIENS were formerly placed under disabilities, both by the common and statute law. Some authorities declare that aliens first became subject to such interference in the reign of Henry II., when the Flemings and Picards, brought into the kingdom during the wars of King Stephen, were expelled. Others contend that it commenced at a much more ancient period, maintaining that it forms a branch of the feudal law. The 48th article of Magna Charta (1215) provides that merchants shall have safe and secure conduct to go out and to come into England, and to stay there, and to pass as well by land as by water; to buy and sell, by the ancient and allowed customs, without any evil tolls, except in time of war, or when they are of any nation at war with us. Alien merchants were first allowed to rent houses and to buy and sell their own commodities about the year 1284. Before that time they hired lodgings, and their landlords acted as brokers for the sale of their goods. In 1290 the citizens of London petitioned Edward I. to expel foreign merchants; but the king refused to comply with this request. Edward III. granted many privileges to aliens; Richard II. and his immediate successors dealt more severely with them. By 15 Charles II. c. 15 (1663), aliens, occupying themselves in certain trades and manufactures specified in the act, were, on taking the oaths of supremacy and allegiance, admitted to all the privileges of native subjects. By 6 Anne, c. 37 (1707), foreign sailors who had served two years on board an English merchant vessel or ship of war, were naturalized. The laws affecting aliens have of late years undergone considerable modification, by 7 & 8 Vict. c. 66 (1844), and by 10 & 11 Vict. c. 83 (1847). An alien cannot sit in either house of Parliament, or be a member of the Privy Council, or even vote at an election.

ALIWAŁ (Battle).—Fought between the Sikhs and the Anglo-Indian army, commanded by Sir Harry Smith, Jan. 28, 1846. The former, posted at Aliwal, near Loodiana, under the command of Sirdar Runjoor Singh, consisted of 19,000 men and 68 guns, and the latter of 12,000 men and 32 pieces of cannon. The Sikhs were driven across the Sutlej, leaving 52 guns in the hands of the victors.

ALJUBAROTA (Battle).—The Castilians were defeated with great slaughter at this place, in Estremadura, in Portugal, by the Portuguese, Aug. 14, 1385.

ALKMAAR (Netherlands).—Notice occurs of this town as early as 924. It sustained a siege of eight weeks' duration, which was raised Oct. 7, 1573. A capitulation for the re-embarkation of the British expedition, sent to the Helder to act against the Dutch and French republican forces, was concluded at this place Oct. 18, 1799. The last portion of the troops re-embarked Nov. 19. The town-hall was built in 1509.

ALL SAINTS, or ALL-HALLOW.—A festival celebrated on the 1st of November. A day for the general commemoration of all the martyrs not long after Whit-sunday was set apart in the early church. Boniface IV. established a festival in the Latin church in 611, and this was converted into the festival of All Saints by Gregory IV., in 830. It was introduced into England in 870. The superfluous and superstitious ringing of bells at Allallow-tide was prohibited at the Reformation.

ALL SOULS.—This festival, held on the 2nd of November, in commemoration of all the faithful deceased, was generally celebrated in the Western churches in 998. Palgrave states that this well-known festival for the dead was not formally adopted until the 11th century, and that the earliest community by which it was commemorated was the monastery of St. Gall, in 741.

ALL SOULS COLLEGE (Oxford) was founded in 1437, by Henry Chicheley, archbishop of Canterbury. It was not completed until 1444.

"ALL THE TALENTS," or the Fox and Grenville Coalition Ministry.—The refusal of Lord Hawkesbury to form an administration, on the death of Mr. Pitt (Jan. 23, 1806), induced George III. to send for Lord Grenville (Jan. 26), who, in conjunction with Mr. Fox, undertook the task. This ministry acceded to office Feb. 5, and received the nickname of "All the Talents," from the boast of its supporters that it combined, as Mr. Canning said, "all the talents, all the abilities, and all the experience and wisdom of the country." It was thus constituted :—

Treasury	Lord Grenville.
Lord Chancellor	Lord Erskine.
President of the Council	Earl Fitzwilliam.
Privy Seal	Viscount Sidmouth.
Chan. of the Exchequer {	Lord H. Petty, afterwards
	Marquis of Lansdowne.
Home Secretary	Earl Spencer.
Foreign Secretary	Mr. Fox.
Ordinance	Earl of Moira.

Admiralty	Lord Howick.
Secretary at War	Mr. Windham.
Lord Chief Justice, with	} Lord Ellenborough
a seat in the Cabinet	

On the death of Mr. Fox (Sept. 13, 1806), Lord Howick became Foreign Secretary, Sept. 24, and Mr. Thomas Grenville First Lord of the Admiralty, Sept. 27. Earl Fitzwilliam retired on account of ill-health, and Lord Sidmouth became President of the Council in his place, Oct. 8, and Lord Holland Privy Seal, Oct. 15, 1806. This ministry was never very strong; a dissolution towards the end of 1806 did not improve its position, and George III. availed himself of some difference of opinion on the Roman Catholic question to make a change, March 25, 1807. (See PORTLAND ADMINISTRATION.)

ALLAHABAD (Hindustan).—Sultan Mahmood, of Ghuznee, invaded this province in 1020 and 1023, but made no permanent settlement. The emperors of Delhi subdued it, but it became independent during the 15th century. After various changes, it fell under the power of the rulers of Oude, who seized it in 1758, and it was ceded by them to Shah Alum, the titular sovereign of Delhi, in 1764. The capital of the province, also called Allahabad, seated at the junction of the rivers Ganges and Jumna, was founded by the emperor Akbar, in 1583. The English captured it in Feb. 1765, and in 1772 the province of Allahabad reverted to the Oude sovereigns. Part of the province was ceded to the East-India Company in 1775. Allahabad, with some of the territory, was ceded on Nov. 14, 1801, and the remainder was secured by treaty Dec. 30, 1803. On the 6th of June, 1857, the mutiny, which commenced at Meerut May 10, extended to Allahabad; but the English retired into the fort, which they held securely.

ALLEGIANCE (Oath of).—Burn (Ecc. Law, iii. 22) says, this oath "is very ancient; and by the common law, every freeman, at the age of twelve years was required, in the leet (if he were in any leet), or in the tourn (if he were not in any leet), to take the oath of allegiance." As administered, according to Blackstone, for upwards of six hundred years, it contained a promise "to be true and faithful to the king and his heirs, and truth and faith to bear of life and limb and terrene honour, and not to know or hear of any ill or damage intended him, without defending him therefrom." After the Gunpowder plot, an act was passed (3 James I. c. 4, 1605), for the better discovering and repressing of popish recusants, which, in addition to other provisions, required from those that conformed, an oath of allegiance renouncing the pope's authority in the most explicit terms. This was repealed, and a new oath of allegiance framed at the Revolution, by 1 Will. & M. c. 8, 1689. A single oath by 21 & 22 Vict. c. 48 (July 23, 1858), was substituted for the former oaths of allegiance, supremacy, and abjuration.

ALLIA (Battles).—Near the confluence of this small river with the Tiber, into which it

falls, about eleven miles N. of Rome, the Romans were defeated, with great slaughter, by the Gauls, under Brennus, July 16, B.C. 390. The barbarians captured the city, destroying large portions of the same. The disastrous day was ever afterwards marked by the Romans, in their calendar, as one of the most unfortunate in the whole year. The dictator Cincinnatus defeated the Prænestines and their allies, on the banks of the Allia, B.C. 377.

ALLIANCES.—The most important alliances between different states are given under their respective titles. (*See* TREATIES.)

ALLIED POWERS (Declaration of).—The emperors of Russia and Austria, the king of Prussia, and several German sovereigns, met at Frankfort in Nov. 1813, where they drew up the celebrated "Declaration," issued Dec. 1, in the same year. In this document the allied sovereigns stated that they did not make war against France, but against the preponderance claimed by Napoleon I.; and asserted that they desired France to be "great, powerful, and happy, because the French power, in a state of greatness and strength, is one of the foundations of the social edifice of Europe."

ALLIFE (Battle).—Fought B.C. 326, near the city of that name, during the second Samnite war. The Romans, commanded by Q. Fabius Maximus, gained a complete victory. Allifæ, soon after recovered by the Samnites, was retaken B.C. 310 by the Romans, who gained another victory under its walls, B.C. 307. Sylvester I. is said to have erected it into a bishopric A.D. 314. This, however, is doubtful, but it is known to have been the seat of a bishopric in the 5th century.

ALLYGHUR (Hindustan).—Near this fortress in the district of Allyghur, Lake defeated the Mahrattas and the French, under M. Perron, Aug. 29, 1803; and the fortress itself was stormed by Lake, Sept. 24. The native troops mutinied here, May 20, 1857. The Europeans effected their escape, and the place was retaken by Colonel Greathed, Oct. 5, 1857.

ALMA (Battle).—Fought between the allied English and French, and the Russian armies, Sept. 20, 1854. The allied army consisted of 57,000 men, viz. 26,000 English, commanded by Lord Raglan; 24,000 French, commanded by the Marshal St. Arnaud, and 7,000 Turks, with 124 guns. Early on the morning of the 20th of Sept. the force came in sight of the Russian army, amounting to between 60,000 and 70,000 men, strongly posted on some heights beyond the river Alma. The position was deemed impregnable; every precaution had been taken to obstruct the advance of an assailant. In spite, however, of the formidable obstacles to be encountered, the Russians were driven from their intrenchments, after a fearful struggle of three hours' duration. The English lost 2,000, and the French 1,400 men in killed and wounded, whilst at least 6,000 of the Russians must have fallen.

ALMADEN (Spain).—This place, celebrated for its quicksilver mines, marks the site of

the ancient Sisapora. The Iberians, and after them the Romans, worked these mines from which large quantities of quicksilver are still procured every year. The Fuggers of Antwerp rented them in the 16th century. They were worked by the Spaniards from 1645 to 1843, when the firm of Rothschild obtained the contract.

ALMANACK.—Porphyrus states that almanacks were known to the Egyptians before the Arabs; and Montfaucon has engraved an Egyptian calendar. They were constructed by the Alexandrine Greeks about the time of Ptolemy. Instruments of wood or other material, inscribed with various symbolical figures and characters, to serve the purpose of an almanack, were used in early times by the northern nations, especially the Danes, who introduced them into England. The Anglo-Saxons calculated by the increase of the moon, set down on square pieces of wood, about a foot long, and these they called Almonaught, or almoon-head. They were also designated clogs, bacculi-annales, primstocks, primstaries, primstuffs, runstocks, &c. The celebrated astronomer Purbach, or Puerbach, published a series of almanacks between 1450 and 1461, but the first printed was in 1457. Muller, or Regiomontanus, published the first that contained eclipses, about 1475. The first almanack printed in England, was by Wynkyn de Worde, in the reign of Henry VII. James I. granted the exclusive right of printing almanacks, by letters patent, to the two universities and the Stationers' Company. This was declared to be illegal, by a decision of the Court of Common Pleas, in 1775. Moore's almanack was first printed in 1693. The first almanack printed in Scotland was in 1677. A duty was first levied on almanacks by 9 Anne, c. 23 (1710). It was abolished by 3 & 4 Will. IV. c. 57 (Aug. 13, 1834). It produced £23,852 in 1827.

ALMANACK (Nautical), published by the Admiralty for the use of astronomers and sailors, was projected by Dr. Maskelyne, astronomer royal, and first appeared in 1767. It declined so much after his death, that, in 1830, the Government consulted the Astronomical Society on the subject. The alterations proposed by them were adopted, and the first improved almanack appeared in 1834.

ALMANZA (Battle).—Fought on Easter Monday, April 25 (O.S. 14), 1707, between an army of English, Portuguese, Dutch, and Spanish troops, amounting to 12,000 infantry and 5,000 cavalry, commanded by the earl of Galway, and the French and Spaniards, 25,000 strong, led by the duke of Berwick. The English, having been deserted by many of the foreign troops, were defeated, and it is somewhat remarkable, as Lord Stanhope remarks, that the English army was commanded by a French, and the French army by an English general. The duke of Berwick, who commanded the French, was the natural son of James II.

ALMARRZ (Spain).—The principal outworks of Almaraz were taken from the

French by Gen. (afterwards Lord) Hill, May 19, 1812. The celebrated bridge over the Tagus, at this place, was built by Charles V. in 1552.

ALMAZAN (Treaty), between Castile and Aragon, was signed April 12, 1375. The principal condition was a contract of marriage between the Infanta Leonora of Aragon, and the Infant, John of Castile.

ALMEIDA (Portugal).—This fortified town, about 16 miles from Ciudad Rodrigo, was captured by the Spaniards, during their invasion of Portugal, after a long and bloody siege, Aug. 25, 1762. During the struggle in the Peninsula, it was surrendered to the English in Oct. 1808; taken from the Portuguese by the French, Aug. 27, 1810; and recaptured by Wellington, after a brilliant victory at Fuentes d'Onore, May 11, 1811.

ALMENARA (Battle).—Fought July 28 (O.S. 17), 1710, when the English and Germans, under Gen. Stanhope and the archduke, afterwards the emperor Charles VI., completely routed the Spanish army, commanded by Philip V. of Spain.

ALMERIA (Spain).—This city, the capital of a province of the same name, was, says Prescott (Ferdinand and Isabella, vol. i. pt. i. ch. 14), "one of the most precious jewels in the diadem of Granada. It had amassed great wealth by its extensive commerce with Syria, Egypt, and Africa; and its corsairs had for ages been the terror of the Catalan and Pisan marine." The Almoravides captured it in 1091, but it was retaken by the Spaniards in 1147. It was frequently assailed, and at length the Moors finally surrendered it, by treaty, to Ferdinand and Isabella, who made their entrance into the town Dec. 7, 1489. Alfonso VII. of Castile removed the ancient bishopric of Abdera to this town in 1147. When the Moors seized Almeria, it was destroyed, but Ferdinand re-established the see in 1490.

ALMOHADES, or **ALMOHEDDES**, termed by Gibbon "the fanatic princes of Morocco," a Mohammedan dynasty, that grew out of a religious sect formed by Mohammed Ben Abdallah, surnamed El Mehedi, the guide, or teacher. He was the son of a lamp-lighter in a mosque, and having collected a number of followers, was foiled in an attempt to found his dynasty in Morocco, in 1121. His death occurred in 1130, and his successor, Abdelmumen, captured Morocco in 1132, and established the dynasty of the Almohades, in Africa, in 1146. The next year he invaded Spain, won several battles, and established the dynasty in that country and in Portugal. The Almohades ceased to rule in Spain and Portugal in 1257, and in Africa in 1269.

ALMONACID (Battle).—In a severe battle fought at this place in Spain, Aug. 21, 1809, between the French and the Spaniards, the latter were defeated.

ALMONER.—An officer whose duty it was to distribute alms, was attached in former times to the households of sovereigns, princes, prelates, and men of high station. The great abbeys and monasteries had their almoners.

The date when this office was first appointed has not been ascertained. Fosbroke (*Antiq.* ii. 588) says, "When our Anglo-Saxon kings dined, the poor sat in the streets, expecting the broken meat, &c., which was collected by the almoner."

ALMONER (Hereditary Grand).—This office before the time of Richard II., was vested in the Beauchamp family. The earl of Exeter claimed, and, in spite of other competitors, received it at the coronation of James I., in 1603, in right of descent from Lord Latimer, on whom the lands of the Beauchamp family had devolved.

ALMONER OF ENGLAND (Lord High).—This ecclesiastical officer, generally a bishop, in olden times had the power of giving the first dish from the king's table, or, instead of it, alms, to any poor person he pleased. His duties, enumerated in an old juridical treatise of the time of Edward I., were to collect the fragments from the royal table for daily distribution to the poor, to visit the sick and poor persons in distress, to remind the king of the duty of almsgiving, and to see that the value of the cast-off robes should be given to increase the king's charity. From the wardrobe accounts of the 14th year of King John, it appears that alms were at that time distributed by the sovereign on Maundy-Thursdays. Since 1730 the office of Lord High Almoner has been held by the archbishops of York.

ALMORAH (India).—In the Ghoorka war, the enemy were defeated near this place, April 23, 1815, and the town itself was captured by the British, April 25.

ALMORAVIDES.—An Arab dynasty, founded in the N.W. of Africa by Abdallah Ben Yessim, who died in 1058. His immediate successor, Abu Bekar Ben Omar, seized Fez, and founded the city of Morocco, in 1070. Yussef Ben Taksin, the third of the dynasty, conquered a large portion of Spain. A long struggle followed between them and the Almohades, and the latter dynasty was overthrown in Africa in 1146, and its power in Spain destroyed in 1147.

ALMS-HOUSES.—These useful institutions were not known in this country until the Reformation. Previous to that date the poor obtained relief at the monasteries, and the houses of the wealthy.

ALNEY, or **OLNEY** (Battle).—During the struggle between Edmund Ironsides and Canute, for the English crown, and after many sanguinary battles had been fought, the rival armies met in Gloucestershire, near Deerhurst, on the Severn, in 1016. There it was proposed, according to Henry of Huntingdon, to decide the matter by single combat. The proposal was accepted, and after the two kings had contended for some time, the advantage being with Edmund, Canute offered to divide the kingdom. This offer was accordingly accepted, and the kiss of peace was given. Wessex was allotted to Edmund, and Mercia to Canute. The former died, or, as some chroniclers say, was treasonably killed, a few days afterwards, and

Canute obtained possession of the whole kingdom. William of Malmesbury states that the division was agreed to without a combat; and the Anglo-Saxon Chronicle does not mention the duel.

ALNWICK.—This castle, on the river Aln, in Northumberland, was besieged, in 1093, by Malcolm III., king of Scotland. The Scottish monarch and his eldest son were killed by the earl of Northumberland. David I. captured it in 1136. William the Lion, with 80,000 men, laid siege to it in 1174, and was taken prisoner after sustaining a most disastrous defeat. It was burnt by King John in 1216.

ALOGIANS, or ALOGI.—A sect of heretics, who sprang up soon after the death of John the Evangelist, A.D. 100. They denied that Jesus Christ was the Logos, and rejected St. John's Gospel and the Apocalypse, as contrary to their views. Augustine opposed them, and they were condemned at the council of Toledo, Dec. 9, 633.

ALOST (Belgium).—Besieged in 1128. It was taken by the French under Turenne in 1667. The townhall was built in 1210.

ALPACA.—The wool of this animal has long been in use among the Indians of the Andes; but it was not until 1829 that it became an article of commerce in this country. Alpacas have been introduced into Australia, and the first shearing of the flock took place in 1859.

ALPHABET.—The origin of alphabetical characters is a subject that has excited much controversy among the learned. For a long time it was believed that hieroglyphical writing gave rise to the invention of alphabetical writing, by contraction of the hieroglyphic symbols into alphabetical letters. Hales (Chronology, i. 370) combats this theory, showing that the art of alphabetical writing preceded the establishment of hieroglyphic. "Some Jewish and Oriental traditions," says this author, "ascribe the invention of writing to Seth, the son of Adam; others to Enoch, the seventh from Adam; whether well founded, or not, it proves the prevailing opinion, that letters were of antediluvian date." Western tradition supports this view, and both Pliny and Cicero asserted that letters were always found amongst the Assyrians. From Egypt they were probably introduced into Canaan by Moses, and were carried by the Phoenicians into Greece. Herodotus states that they were brought into Greece by Cadmus. This took place B.C. 1493, according to Hales B.C. 1494, and to Clinton B.C. 1313. The Greek alphabet consisted at first of only eleven, or at most sixteen letters; but the number was eventually increased to twenty-two. Cicero and Quintilian assert that Simonides, who flourished about B.C. 540, added the two long vowels, η and ω , and the two double consonants ξ and ψ ; while Aristotle and Pliny say that Epicharmus, who flourished about B.C. 450, added the two letters χ and θ to the Greek alphabet. Sharon Turner is of

opinion that the Anglo-Saxons were not unacquainted with alphabetical characters when they came into England, though they laid aside their ancient letters, with the exception of two, on their conversion to Christianity.

ALPHONSINE, or ALFONSINE, TABLES.—These astronomical tables are said to have been constructed by certain Jews of Toledo, in 1252. Other authorities attribute them to the king's preceptors, under the direction of Alfonso X. (whence their name), king of Castile and Leon, surnamed the Wise. They were first printed at Venice in 1483.

ALRESFORD (Battle).—Fought between the parliamentary forces and the royalists, March 29, 1644. The latter, though worsted, withdrew in good order to Reading.

ALSACE (France), annexed to Gaul by Clovis, was included in Charlemagne's empire. It remained connected with Germany till 1648, when, by the treaties of Munster, Jan. 30, and of Westphalia, Oct. 24, a portion of the province was ceded to France. Louis XIV. seized Strasburg in 1681, and this city, with the remainder of the province, was secured to France by the peace of Ryswick, Oct. 30, 1697.

ALTARS.—The first altar mentioned in Scripture was erected by Noah after the flood (Gen. viii. 20), B.C. 2343, according to Calmet; B.C. 3154, according to Hales; and B.C. 2481, according to Clinton. Abraham erected altars in different places (Gen. xii. 8, and xiii. 18); and God commanded Moses to raise them. The Jews also imitated the custom of pagan nations, who built high places, and images, and groves, on every high hill, and under every green tree (1 Kings, xiv. 23). The Greeks and Romans also built altars on which they sacrificed to their heroes, and a similar custom prevailed amongst most ancient nations. The altars used in the early ages of Christianity were made of wood and in the form of a table, and it was not until the 5th century that stone was employed. Eventually they assumed the form of a tomb, as of the Sepulchre of the Martyrs, whence they derive their name. The proceedings of the council of Agda, in 506, contain the first public record in connection with their consecration. The general belief in purgatory in the 9th century led to the erection of additional altars in churches. They had been introduced into England, but they were ordered to be removed and replaced by communion-tables at the Reformation. Ridley, bishop of London, at a visitation, held in consequence of a letter in the king's name, setting forth that previous orders for the removal of stone altars had not been duly complied with, directed the clergy of his diocese to substitute wooden tables (1550). The stone altars were again erected in the reign of Queen Mary, but were removed in that of Elizabeth. In the stone-altar case, decided in the Arches Court, Jan. 31, 1845, Sir H. Jenner Fust decreed, on appeal, reversing the decision of the Chancellor of Ely, that a

stone altar could not be legally erected in any church belonging to the Establishment.

ALTENKIRCHEN (Battle).—In a combat at this town, in Germany, June 4, 1796, the French compelled the Austrians to retire, but in a battle fought Sept. 16, 1796, between the French republican army, under General Marceau, and the Austrians, led by the archduke Charles, the latter gained a complete victory, and General Marceau was mortally wounded.

ALTON (Battle).—Fought between the Danes and the Anglo-Saxons in 1001. The contest was severe, and many were slain on both sides, the Danes retaining possession of the field of battle. The authorities do not agree respecting the place where this encounter occurred.

ALTONA, or ALTENA (Holstein), on the Elbe, was a mere village until it came into the possession of the Danes in 1660, who erected the city in 1664. A treaty of peace between Holstein and Denmark was concluded here June 20, 1689. It was burnt by the Swedes Jan. 10, 1773, and occupied by the Austrians Feb. 1851.

ALT-RANSTADT (Treaties).—Two treaties of peace were concluded here during the 18th century, the first signed Oct. 5 (O.S. Sept. 24), 1706, and dictated by Charles XII. of Sweden to Augustus, elector of Saxony, who formally renounced the claim he had put forth to Poland, acknowledging Stanislaus Leszcynski as king. He also renounced the treaty with Russia, and agreed to find winter quarters in Saxony for the Swedish troops. Traitors and deserters were to be given up by secret articles. The second treaty, between Louis XIV. and the emperor Charles VI., who had refused to join in the treaty of Utrecht in 1713, was signed March 17 (O.S. 6), 1714. The latter was preliminary to the peace of Baden.

ALUM.—It is not known when the process of making alum was discovered. At an early period alum-works existed at Roccha, the ancient Edessa, in Syria, whence the name Rock alum. Several had been established in the neighbourhood of Constantinople previous to its capture by the Turks in 1453. The Genoese and other Italians introduced the manufacture into Europe, and amongst the earliest Italian works of the kind were those erected at Volterra in 1456. Alum was made at Hesse, in Germany, in 1554, in Bohemia in 1558, and at Glatz in 1563. It was introduced into England by Sir Thomas Chaloner, and works were built at Guisborough, in Yorkshire, according to some authorities, during the reign of Elizabeth, and, according to others, in that of James I., about 1608.

ALUM-BAGH, a domain containing a palace, a mosque, and a private temple, bounded by a garden, situated in a beautiful park, about four miles from Lucknow, was converted into a fortress by the rebels in 1857. It was captured by the British, under Outram and Havelock, Sept. 23, 1857, and a small garrison placed in it, which was not relieved until November 14, in the same

year. Sir James Outram then held the place with 3,500 men until Lucknow was taken, March 21, 1858, having in the mean while repulsed an attack of 30,000 men on the 12th of January, and one of 20,000 on the 21st of February.

ALUMINIUM, one of the most abundant metals in nature, being the metallic basis of alumina, or pure clay, was first discovered in 1828, by Wöhler, who freed it from its combination with oxygen by electric means, and obtained it in 1846 by decomposing chloride of alumina by means of sodium.

AMALEKITES.—This tribe of Edomite Arabs, descendants of Amalek, grandson of Esau (Gen. xxxvi. 12), were the first to oppose the Israelites after the passage of the Red Sea (Exod. xvii. 8—16), at the battle at Rephidim, B.C. 1491. Saul overcame them (1 Sam. xv. 8) B.C. 1093; David (1 Sam. xxvii. 8, 9, and xxx.), B.C. 1055; and their descendants were exterminated by the Simeonites, about B.C. 725 (1 Chron. iv. 42, 43).

AMALPHI (Italy), a small republic in the Gulf of Salerno, that attained considerable eminence in the Middle Ages. Gibbon says, "Its industrious citizens, by the invention of the mariner's compass, have unveiled the face of the globe." One of its citizens is said to have invented the mariner's compass in 1302. It flourished entirely by its commerce, from about 750 to its conquest by Robert Guiscard, in 1077. It regained its independence in 1096, submitted to the king of Sicily in 1131, and was sacked by the Pisans in 1135. It was the seat of a bishop at an early period, and in 987, John XV. erected it into an archbishopric.

AMALPHI (Pandects).—The story of the discovery at Amalphi, in 1137, of a unique copy of the Pandects of Justinian, which led to a revival of the study of jurisprudence in the West, though at one time generally believed, is now rejected as fabulous.

AMALRICIANS.—The followers of Amalricus, or Amaury, of Bene, the Paris dialectician and theologian. He denounced several Roman Catholic doctrines, and is said to have believed in a speedy reformation and purification of the Church by the sword. He has also been accused of Pantheism. Milman (Lat. Christ. vi. b. xiv. ch. 3) says, "All kinds of incongruous charges were heaped upon the memory of Amaury de Bene: he was an Albigensian, believed in the Eternal Gospel." Whilst commenting upon the doctrines of Aristotle, he advanced his peculiar views. Innocent III. launched a bull of condemnation against his chief work "The Physion," in 1204. He retracted, and died soon after. His remains were disinterred and burnt, and several of his followers were put to death by order of the council of Paris in October, 1210. David of Dinant was one of his followers, but the sect speedily disappeared.

AMAND, St. (Netherlands).—Taken by the prince of Nassau, June 27, 1709. Near this place the English first met the French

republican troops, May 8, 1793. The duke of York commanded the English and their allies, who, after a hotly-contested battle, defeated the French.

AMARANTA (Order).—Instituted in Sweden by Queen Christina, in 1645. This order of knighthood became extinct soon after her death.

AMAZON, MARANON, or ORELLANA (South America), the largest river in the world, was discovered in 1500 by Vincent Yanez Pinzon, but very little was known of it until the Spanish adventurer Orellana, having embarked on the Rio Napo, one of its remote tributaries, was carried down the stream to its embouchure, reaching the sea in August, 1541. In consequence of his report that armed women had been seen on its banks, the river obtained its popular name of Amazon. The river was first accurately described in 1745 by M. de la Condamine, who had embarked upon it in 1743, near Jaen, and followed its current to its mouth.

AMAZON, West-India mail steamer, destroyed by fire, in the Bay of Biscay, January 4, 1852. Out of 161 persons on board at the time, only 59 were saved.

AMAZONS.—A race of female warriors, of Scythian origin, dwelling on the banks of the Thermodon, in Cappadocia. They are mentioned by Homer and Herodotus. In order to use their weapons with greater force and precision, their right breasts were burned off or destroyed at an early age. The Abbé Guyon wrote a short history of the Amazons, of which Dr. Johnson published a translation in the "Gentleman's Magazine" for 1741. These accounts have been rejected as fabulous, although repeated by many authors. Mill (Crusades, vol. i. ch. ix. p. 377), speaking of Conrad's army of crusaders in 1147, says, "A considerable troop of women rode among the Germans; they were arrayed with the spear and shield; but some love of usual delights had mingled itself with the desire of great exploits, for they were remarkable for the splendour of their dress, and the bold leader was called 'the golden-footed dame.'" Alvarez, who visited Abyssinia in 1520, speaks of Amazons in that country. The figure of an Amazon is found on many ancient coins. The fact of the existence of a regiment of Amazons in the present century is proved by Commander Forbes, who met with one at Dahomey during a visit in 1840 and 1850. The author says: "It is rarely that Europeans are called upon to believe in the existence of Amazons—fighting women prepared to do battle on all around, the terror of the neighbouring tribes, dressed in the attire of male soldiers, armed with muskets and swords. These sable ladies perform prodigies of valour, and not unfrequently, by a fortunate charge, save the honour of the male soldiers, by bearing down all before them, discovering themselves to the astonished and abashed prisoners to be women, exceeding their male coadjutors in cruelty and all the stronger passions."

AMBASSADORS, as representative agents or envoys, were employed in very ancient times. Moses sent messengers to the king of Edom to request a passage through his territories (Numbers, xx. 14—21), B.C. 1452; and David made war upon the Ammonites because their king ill-used his messengers and treated them as spies (2 Sam. x.), B.C. 1038. The custom of sending ambassadors prevailed amongst most ancient nations. Malmesbury in his Chronicle speaks of three ambassadors sent from England to Constantinople in 1056. Wicquefort (The Ambassador and his Functions, translated by Digby, 1716) declares, "There is not any kingdom or state that does not make use of them." In another place he says, "The *Marshall* of Guebriant was the first lady, and the only one if I mistake not, that has had this quality annexed to her own person, and she may perhaps be the last." By the law of England, ambassadors enjoy many privileges. They are free from arrest by 7 Anne, c. 12 (April 21, 1708). This law was occasioned by the arrest of Andrew Artemonowitz Matueof, ambassador to Peter the Great, on the 21st of July, 1708. He was taken out of his coach in London for a debt of £50, at the suit of Thomas Morton, lace-man. Their goods are also free from distraint by the same statute.

AMBER is found on the coasts of the Baltic Sea, and is also obtained by mining. This substance has been known from the earliest times (Ezekiel, i. 4—27, and viii. 2), and its electric property was first observed by Thales, born B.C. 640. It was used for ornament as well as medicinal purposes before the Christian æra. Sophocles, who flourished about B.C. 480; Herodotus, born B.C. 484; Pliny, about A.D. 77, and other ancient writers, allude to it. That the ancient Britons employed it for ornament is proved from the fact of its frequent occurrence in barrows. It was also used as an amulet or charm against disease. In 1576 a mass weighing eleven pounds was found in Prussia. It occurs in Sicily and the Adriatic.

AMBERG (Battle).—The French republican army was defeated near this town, in Germany, by the Austrians, August 24, 1796.

AMBLEF (Battle).—Gained here, in 716, by Charles Martel over the Neustrians, who were returning to their own territories after having ravaged Austrasia.

AMBLETEUSE (France).—A small seaport between Calais and Boulogne, at which Cæsar embarked his cavalry for the invasion of England, B.C. 54; and James II. landed, Dec. 23, 1688, on deserting the English throne.

AMBOISE (Edict).—A pacification between the Roman Catholics and the Protestants, promulgated at Amboise, March 19, 1563; a general amnesty was granted for the past and free toleration of Protestant worship in particular places in France.

AMBOISE (League).—Formed in 1560, by the leaders of the Christadins, as the French

Calvinists were then called, to overthrow the power of the Guises, and compel the French king to grant them protection.

AMBOYNA (Indian Archipelago), the chief of the Molucca Islands, was discovered in 1511 by the Portuguese, who established a factory there in 1521, but did not obtain full possession until 1580. The Dutch expelled the Portuguese in 1605; the English made an unsuccessful attempt to form a settlement upon the island in 1615, and subsequently established a factory there, the members of which were all treacherously murdered by the Dutch governor in Feb. 1623. The Dutch agreed to pay £270,000 compensation, part of which was to go to the heirs of the sufferers, by the treaty of peace of April 5, 1654. Amboyna fell into the hands of the English Feb. 16, 1796; was restored to the Dutch in 1802; recaptured Feb. 17, 1810; and was given up again by the treaty of Paris, concluded May 30, 1814.

AMEROSIAN CHANT.—St. Ambrose, bishop of Milan (374—397), introduced the choral music of the Eastern into the Western Church, and it afterwards bore his name. It was superseded by the Gregorian chant about the year 600.

AMEROSIAN LIBRARY.—This library was founded at Milan by Cardinal Borromeo in 1602, and opened in 1609. It was named after St. Ambrose, the patron saint of that city. It contains 60,000 books.

AMEROSIAN RITUAL.—The name given to the office used in the church of Milan. It receives its name from St. Ambrose, bishop of Milan (374—397), because it was either introduced into Milan, or at any rate altered by him.

AMERCEMENT, or AMERCIAMENT.—The difference between amerciements and fines is this; fines are said to be punishments certain, and grow expressly from some statute; but amerciements are such as are arbitrarily imposed. Magna Charta (c. 14) provides that a freeman is not to be amerced for a small fault, but proportionable to the offence, and that by his peers. The statute 9 Hen. III. c. 14 (1225), provides how men of all sorts shall be amerced, and by whom; and by Statute of Westminster I. (3 Edw. I. c. 6), 1275, it was enacted that amercements should be reasonable; and the scale for various classes of the community was regulated by 25 Edw. I. c. 14, in 1297.

AMERICA, or the New World.—The existence of this continent was known to the Scandinavians, or Northmen, in the 10th century. These enterprising voyagers discovered Iceland about the year 860, and Greenland about 982, forming settlements in these countries. One of the sailors, on a voyage from Iceland to Greenland, was driven by a storm on the coast of America in 986, and the account which he gave of his adventure induced Leif, son of Eric the Red, to undertake a voyage of discovery in 1000. Having touched at places supposed to be the modern Newfoundland, Nova Scotia, and the neighbouring coast, the expedition came,

in 1001, to a part of the country which received the name of Vinland, from its wild vines. It is supposed to have comprised Rhode Island, and parts of the coast between Boston and New York; and it became the seat of a settlement; for in 1121, Eric Upsi, an Icclander, the first bishop of Greenland, undertook a mission to the new colony of Vinland. The intercourse between the Northmen and America was carried on until the middle of the 14th century. It was, however, reserved for the enterprising navigators of the 15th century to give a knowledge of the New World to the inhabitants of the Old, and to establish that connection between these two distant portions of the globe, that has produced such wonderful results. Christopher Columbus, a Genoese navigator, supplied by Ferdinand and Isabella with three small ships, sailed from Palos, in Andalusia, on Friday, August 3, 1492, and on Friday, the 12th of October, in the same year, he landed at San Salvador, one of the Bahama Islands. Columbus then sailed on to Cuba and Hispaniola, or Hayti, now St. Domingo, where he left a settlement; but the American continent was not discovered until June 24, 1497, when John Gaboto, or Cabot (a Venetian settled in England, who, with his son Sebastian, sailed in ships furnished by Henry VII. and some Bristol merchants), landed in North America, and explored a part of the coast. Columbus discovered Paria, on the continent of South America, in 1498; and thus both divisions of the New World were known before the 16th century. The early navigators, imagining that these countries formed part of India, gave them the name of the West Indies. Amerigo Vespucci, a Florentine traveller, who sailed in several expeditions, is said to have inserted the words *Tierra de Amerigo* in a map published by him early in the 16th century. Though this account is denied, from him came the name of America, by which that portion of the globe is now known. Further information respecting America is given under its various political divisions. The following chronological table contains some of the chief points in the early history of its discovery and colonization.

A.D.

1492. Columbus discovers San Salvador, Cuba, Hispaniola, now called St. Domingo, and builds the fort La Navidad on Hispaniola.
1493. Columbus discovers Dominica, Nov. 2.
1494. The fort La Navidad, at Hispaniola, having been destroyed, Columbus founds the city of Isabella. He discovers Jamaica.
1497. John Cabot discovers St. John's and the coast of North America, June 24. St. Domingo founded.
1498. Columbus discovers Trinidad July 31, proceeds to the river Orinoco, and enters the Gulf of Paria; thus discovering the continent of S. America. Sebastian Cabot visits Newfoundland.
1499. Ojeda lands at Surinam, sails to the Gulf of Paria, and then to Venezuela.
1500. Cortereal, a Portuguese, lands in Labrador. Pinzon discovers Brazil; and three months later Cabral, the Portuguese admiral, lands there. Pinzon reaches the mouth of the river Amazon.

- A.D.
1501. Bastidas explores the coast from Cape Vela to the Gulf of Darien.
 1502. Columbus explores the coast of Terra Firma as far as the Isthmus of Darien.
 1508. Pinzon and Solis discover Yutachan, and Aubert, a Frenchman, the St. Lawrence.
 1510. Ojeda builds St. Sebastian, the first settlement on the mainland at Darien.
 - 1511 and 1512. Velasquez conquers Cuba. Vasco Nunez de Balboa obtains information respecting Peru.
 1512. Ponce de Leon discovers the coast of Florida on Easter day.
 1513. Vasco Nunez de Balboa crosses the Isthmus of Darien, where he established a small settlement, and discovers the S. Pacific Ocean in September.
 1515. Solis discovers the La Plata.
 1517. Cordova discovers Campeachy, and penetrates into Mexico.
 1518. Grijalva explores the shores of the Mexican Gulf, and gives his discoveries the name of New Spain.
 1519. Cortes sails from the Havana for the conquest of Mexico, Feb. 18.
 1520. Magellan passes through the straits that bear his name.
 1521. Cortes completes the conquest of Mexico by the capture of its capital, Aug. 13.
 1524. A French expedition, under Verrazzano, surveys the coast of N. America.
 1526. Pizarro discovers Quito.
 1527. Pizarro visits Tumbez in Peru, and sails along the coast to the port of Santa.
 - 1531, Jan. Pizarro sails on his third and last expedition for the conquest of Peru.
 1532. Pizarro attacks Peru.
 1533. Pizarro enters Cuzco, the capital of Peru.
 1534. Cartier circumnavigates Newfoundland, and enters the Gulf of St. Lawrence.
 1535. Cartier ascends the St. Lawrence to Hochelaga, now Montreal. The city of Buenos Ayres founded by Mendoza.
 1536. Cortes discovers California. Mr. Hore attempts to found an English settlement at Newfoundland.
 1539. Ulloa enters the Gulf of California.
 1540. Alarcon explores the Colorado river.
 1541. Orellana sails down the Marañon, or Amazon, and reaches the sea in August. Chili conquered.
 1546. The Spanish conquest of Peru completed.
 1549. Martinez de Yrala ascends the Paraguay to the 17th deg. of S. latitude.
 1562. French settlement formed in Florida.
 1564. Carolina settled by the French, who are expelled by the Spaniards.
 1567. Hawkins sails to the Spanish main, and discovers the Falkland Isles.
 1573. Sir Francis Drake reaches Panama, and is the first Englishman who sees the Pacific Ocean.
 1575. Oxenham sails for S. America.
 1576. Martin Frobisher goes on a voyage of discovery to the north-west.
 1577. Drake sails Dec. 13, and reaches La Plata April 14, 1578. He doubles Cape Horn, and sailing as far as Vancouver Island, discovers New Albion, and reaches England Sept. 26, 1580.
 1583. Sir Humphrey Gilbert's expedition to Newfoundland proves a failure.
 1584. Raleigh's expedition discovers Virginia.
 1585. Davis sails to Greenland, and discovers the straits that bear his name. First English settlement in Virginia formed at Roanoke.
 1586. The settlement at Roanoke is destroyed.
 1587. Cavendish sails to the N. Pacific.
 1604. French settlement of Acadia formed.
 1607. First permanent English settlement in America is made in Virginia and called James-town. Hudson's first voyage.
 1638. Quebec founded by the French.
 1610. A patent granted to Lord Bacon and others, for a plantation in Newfoundland. Hudson discovers the bay that bears his name.

- A.D.
1614. First Dutch settlement on the Hudson.
 1616. The cultivation of tobacco commenced in Virginia.
 1620. Plymouth, in New England, settled by the Puritans. First negroes imported to Virginia in a Dutch ship.
 1621. Sir William Alexander obtains a charter for Nova Scotia.
 1625. The French form a settlement at St. Christopher's. The English land upon that island in the same year.
 1627. A Swedish settlement formed on the Delaware.
 1628. An English settlement at Naumkeag, in Massachusetts Bay, formed.
 1633. Lord Baltimore's settlement in Maryland.
 1635. Fenwick establishes a colony on the Connecticut, and the French found a settlement in Guiana.
 1663. A settlement made by the English in Carolina. St. John's (afterwards Prince Edward's island) granted to Doublet.
 1669. An English settlement made in S. Carolina.
 1671. Settlement formed at Rupert's river.
 1674. Settlement formed at Moose river.
 1680. Albany settlement formed.
 1682. Penn founds the settlement which is named after him.
 1685. Nelson and Severn settlements formed.
 1698. The Scotch form a settlement at Darien, Nov. 2, and erect Fort Andrew. It was abandoned in 1699. A second and third expedition followed.
 1700. The Scottish settlers surrender to the Spaniards, March 30, and the enterprise is abandoned.

AMERICA (Episcopal Church).—The first recorded baptism of a native American took place at Virginia, August 13, 1587. In the letters patent granted by James I. for the plantation of Virginia, April 10, 1606, the duty of a Christian nation to communicate through her colonies the knowledge of the truth which she possesses is duly recognized. Robert Hunt, the first clergyman appointed to the colony of Virginia, sailed with the expedition, Dec. 19, 1606. The first marriage celebrated in the colony is said to have been solemnized by Robert Hunt in 1608. Such was the humble origin of the Episcopal Church in America. During the Great Rebellion, the colonists of Virginia, in 1643, ordered that no clergyman should preach or teach, publicly or privately, except in conformity to the Church of England. The Episcopalians suffered severely during the war of independence, but at its close, in 1784, the clergy of Connecticut elected the Rev. Samuel Seabury bishop, and he was consecrated by the bishops of the Episcopal Church of Scotland, having met with a refusal at Lambeth. He was the first colonial bishop. An address was sent from the General Convention, held at Philadelphia, Oct. 5, 1785, to the English archbishops and bishops, begging them to confer the episcopal character on such as should be recommended to them. A reply was returned Feb. 24, 1786, and three colonial bishops were consecrated at Lambeth, Feb. 4, 1787, under the authority of an act of parliament passed for that purpose. Dr. Madison was consecrated first bishop of Virginia in 1790. Since 1842 the American clergy have been allowed to officiate for a period not exceed-

ing two Sundays in succession, in our English churches. There are twenty-four bishops belonging to this branch of the Episcopal Church.

AMERICAN CONGRESS.—The delegates from twelve colonies, amounting to 55 in number, assembled at Philadelphia Sept. 5, 1774. They passed a declaration of rights and other measures, and separated Oct. 26. The second Congress met May 10, 1775, and issued the Declaration of Independence July 4, 1776. The Congress removed to Baltimore toward the end of 1776. The first Congress of the United States met at New York in 1789. Its sittings were transferred to Philadelphia in 1790, and were removed to Washington, where they have since been held, in 1800.

AMERICAN STAMP ACT.—This measure (5 Geo. III. c. 12), imposing on the American colonists the same stamp duties as those paid in England, was introduced early in the session, and received the royal assent March 22, 1765. The taxation thus levied was less than £100,000 per annum. The act came into operation Nov. 1; but meeting with resistance, was repealed by 6 Geo. III. c. 11, passed March 18, 1766. Its operations ceased from May 1 in that year, and a bill of indemnity for those who had incurred penalties was passed June 6. The revolt of the colonists commenced in 1773.

AMETHYST.—This stone was the ninth in order on the breastplate of the Jewish high-priests, and was consequently known as early as B.C. 1491.

AMID, or AMIDA (Asia).—This city was wrested from the Romans by the Persians, under Sapor, after a memorable siege that lasted from July 27 to Oct. 7, 359 A.D. The Persians captured it again, after a long siege, A.D. 502; but the Romans soon regained possession.

AMIEHS (Treaties).—The first, sometimes called the Peace of Picquigny, between Louis XI. of France and Edward IV. of England, was concluded here, in four acts, August 29, 1475. King Edward agreed to retire with his army, on the payment, by the king of France, of 75,000 crowns. A truce of seven years was agreed to by the two kings. They were to assist each other in case of need. King Edward agreed to give his daughter Elizabeth in marriage to Prince Charles, son of Louis XI., who also engaged to pay 50,000 crowns annually during Edward's lifetime. The kings met at the castle of Picquigny, about twelve miles from Amiens. Philip of Commines remarks: "And certainly, as I have said before, the English do not manage their treaties and capitulations with so much cunning and policy as the French do, let people say what they will, but proceed more ingenuously, and with greater straightforwardness in their affairs; yet a man must be cautious, and have a care not to affront them, for it is dangerous meddling with them." The preliminaries of the more celebrated treaty of Amiens were signed in London, Oct. 1, 1801; the ratification was brought from

Paris to London in eleven days; and the definitive treaty, containing twenty-two articles, was concluded at Amiens on the 25th of March, 1802, a supplementary article being added on the 27th. It was ratified in the following month, and peace was proclaimed in the cities of London and Westminster, on the 29th of April. The contracting parties were France, Holland, and Spain, on the one hand, and Great Britain on the other. England gave up to their former owners all the conquests made during the war, except Trinidad, wrested from Spain, and a portion of Ceylon, taken from the Dutch. It was stipulated that within three months after the exchange of the ratifications, the English troops should evacuate Malta, Gozo, and Comino, which were to be restored to the Knights of St. John; and the independence of these islands was guaranteed by France, Great Britain, Austria, Spain, Russia, and Prussia. The French agreed to evacuate Naples, and all the ports and islands which they occupied in the Mediterranean or the Adriatic. Egypt was restored to Turkey. This treaty terminated a war of ten years' duration; but peace scarcely lasted thirteen months. Napoleon's interference in Holland, Italy, and Switzerland, and his extraordinary annexations, induced the English government to maintain their garrison at Malta, and the war was renewed May 17, 1803.

AMMONITES.—Descendants of Ammon, the son of Lot (Gen. xix. 38), about B.C. 1897. They occupied territory at one time in the possession of the Zamzummins, "a people great, and many, and tall as the Anakims." (Deut. ii. 19—21.) Although the Israelites were commanded not to molest them, several wars ensued between the two nations, with varying success. They oppressed the Israelites B.C. 1206 (Hales, B.C. 1263; and Clinton, B.C. 1256); but were defeated by Jephthah with great slaughter (Judges, xi. 32, 33), B.C. 1188 (Hales, 1245; and Clinton, 1238), and by Saul (1 Sam. xi.), B.C. 1094 (Hales, B.C. 1110). David subdued them B.C. 1038. Judas Maccabeus fought many battles with them, and they leagued against Judæa B.C. 164. They gradually merged in the tribes of Arabia.

AMNESTY, or public act of pardon or oblivion for political and other offences, was common amongst the Greeks and Romans. Amnesties were granted in England after the Great Rebellion and the Jacobite insurrections: the latest act of parliament of the kind, passed in 1747, being 20 Geo. II. s. 52, entitled "An Act for the king's most gracious general and free pardon." In France frequent revolutions have rendered such acts of grace necessary during the present century. On the 3rd of May, 1856, the Queen granted a free pardon to several political offenders who were concerned in the Chartist outbreaks and the insurrection in Ireland.

AMORITES.—These descendants of Canaan (Gen. x. 16) became a powerful people, and by this designation all the Canaanite tribes

were at one time described. They took part in the struggle narrated in the fourteenth chapter of Genesis, about B.C. 1912. They were engaged in several contests with the Israelites, who were instructed to utterly destroy their cities (Deut. xx. 16, 17).

AMOUR, or AMUR.—This river of Chinese Tartary first became known to the Russians in 1639. After a struggle of fifty years, with the view of annexing the territory through which it flows, they concluded a treaty with the Chinese, in 1689, by virtue of which the Russians remained wholly excluded from the river. In 1847 its navigation was again opened to them by treaty; and they have recently succeeded in their primary design of making the Amour a Russian river.

AMOY (China).—Europeans were allowed to trade from 1675 to 1681. The fort of Amoy was destroyed by the British July 3, 1840, and the town itself was taken Aug. 26, 1841. It was one of the five Chinese ports opened to the British by the treaty of Aug. 26, 1842. This town was taken by the Chinese insurgents May 29, 1853, and recaptured by the imperial forces Nov. 11, 1853.

AMPHICTYONIC COUNCIL was one of the earliest institutions in Greece. Grote says: "The belief of *Æschines* (perhaps also the general belief in his time) was, that it commenced simultaneously with the first foundation of the Delphian temple, an event of which we have no historical knowledge." Twelve tribes sent sacred deputies, called *Amphictyons*, to this association, which held two meetings every year, one at the temple of *Apollo*, at *Delphi*, in the spring, and the other at the temple of *Ceres*, at *Thermopylæ*, in the autumn. The interference of the *Amphictyons* led to the first sacred war, B.C. 595—B.C. 586. At the instigation of *Philip* of *Macedon*, the *Phocians* were expelled from the council B.C. 346; but they were re-admitted, for their valour in expelling the *Gauls* under *Brennus*, B.C. 279. This council underwent various changes and vicissitudes, although it survived the independence of the country; and so late as the battle of *Actium*, B.C. 31, it retained enough of its ancient dignity to induce *Augustus* to claim a place in it for his new city of *Nicopolis*. *Pausanias* states that it existed in the second century of our æra.

AMPHION FRIGATE.—Destroyed at Portsmouth by an accidental explosion, Sept. 22, 1796. Captain *Pellev*, and fifteen others on shore at the time, were the only persons that escaped out of a crew of 220 men.

AMPHITHEATRE.—The Romans delighted in exhibitions of the hunting of wild animals, of combats between gladiators and wild beasts, and other cruel spectacles; and these, which at first took place in the forum and the circus, were afterwards performed in buildings devoted to such displays, and called *Amphitheatres*. The first was constructed by *C. Scribonius Curio*, consul B.C. 76. The next, and probably the first called an *amphi-*

theatre, was constructed by *Julius Cæsar*, B.C. 46. This was of wood; and a more durable one, in stone, was erected in the *Campus Martius*, by *Statilius Taurus*, during the reign of *Augustus*. It was destroyed by fire in the time of *Nero*. Several *amphitheatres* were afterwards built. The most remarkable, known as the *Colosseum*, of which the ruins exist, was commenced by *Vespasian* in the year 70 A.D., and completed in the year 80 by *Titus*, who opened it with magnificent spectacles. The ruins of several buildings of the kind are still found in Italy and France. (See *COLOSSEUM*.)

AMPHITRITE.—This ship, having on board 103 female convicts, 12 children, and a crew of 16 men, was wrecked off *Boulogne*, Aug. 31, 1833, when all perished excepting three of the crew.

AMSTERDAM, or AMSTELDAM (Holland).—This great commercial emporium, on the river *Amstel*, founded in 1203, remained a small fishing-village until the middle of the 13th century, when it was made a town. *William III.*, count of *Holland*, took it in 1296; and *William IV.* gave it municipal institutions in 1340. It was walled in 1432; joined the confederation of the *Netherlands* Feb. 8, 1578, and received additional privileges from the prince of *Holland* in 1581. From that time its prosperity increased rapidly, and it received an additional impulse from the closing of the *Scheldt* in 1648. It was captured by the French, Jan. 20, 1795, and remained under their rule until 1813. Its townhall, erected on piles, commenced in 1648, was completed in 1655: it narrowly escaped destruction by fire in 1762 and 1806, and was made a royal palace in 1808. The celebrated Bank of *Amsterdam* was founded 1609, and ceased in 1796. The Bank of the *Netherlands*, on the model of the Bank of *England*, was established here in 1841.

AMSTERDAM ISLAND (Indian Ocean).—Discovered by *Van Vlaming*, a Dutchman, in 1696.

AMULET.—Amulets of various kinds were in use among the Jews (*Gen.* xxxv. 4, and *Hosea*, ii. 13). The Persians and the Egyptians used them; the Greeks and Romans made them of gems of various kinds. *Homer* mentions them as charms. *Pericles*, who died B.C. 429, wore an amulet. The emperor *Caracalla*, about A.D. 216, prohibited the use of them. Amulets made of the wood of the *Cross*, or of riband with texts of scripture upon them, as preservatives against diseases and other calamities, were adopted by Christians in the 4th century. The council of *Laodicea*, in 366, condemned the practice. *Epiphanius*, bishop of *Salamis* (367), *Chrysostom* (400), and *St. Basil*, patriarch of *Constantinople* (970), and many others, censured this superstition. The ancient *Druids* used them, and both necklaces and beads, intended as charms, are frequently found in their barrows.

ANABAPTISTS.—The term was first applied to the followers of *Münzer* and *Storck*, who began to preach in Saxony in 1521. Owing

to their inflammatory harangues, a rebellion broke out in Suabia, Thuringia, Franconia, Saxony, and other parts of Germany, in 1525. These sectaries were routed and their leaders put to death the same year. Their doctrines, however, had not been extirpated, and another rising of the Anabaptists occurred in Westphalia in 1533. John Bockhold, a tailor of Leyden, afterwards called John of Leyden, was made king. They captured Munster, which was to be their New Jerusalem, in 1533, and the city was not retaken until June 24, 1536, when John of Leyden and many of his associates were put to death. About this time severe laws were enacted against the Anabaptists by different European governments. Their doctrines found supporters in England. Fourteen were burnt in London and in other towns, May 25, 1535, and four Dutch Anabaptists suffered the same punishment in 1538. Three were burnt at Southwark, April 29, 1640; and Elizabeth by proclamation ordered them to quit the kingdom within one-and-twenty days, in 1560. Some enthusiasts of this kind attempted to effect a rising in London, April 9, 1657, but were suppressed. Thomas Venner, an Anabaptist preacher, with about eighty of his followers, appeared in arms in London, Jan. 6, 1661. They fought desperately with the troops, but were at last overcome, and Venner and sixteen of his associates perished on the scaffold, Jan. 19 and 21.

ANACHORETS, or ANCHORETS, arose in Egypt and Syria in the 3rd century. Paul the Hermit, who retired into the deserts of Egypt to avoid the Decian persecution, A.D. 250, and St. Antony, born 251, are considered the first anachorets. Bingham (*Antiq. b. vii. c. ii. s. 2*) says, the first sort of monks "were commonly known by the name of Anachorets, from their retiring from society, and living in private cells in the wilderness. Such were Paul and Antony, and Hilarion, the first founders of the monastic life in Egypt and Palestine; from whom other monks took their model." Fosbroke points out the distinction between anachorets and hermits, the former never quitting their cells, whilst the latter roamed at large. The Church assumed jurisdiction over these voluntary exiles from the world in the 7th century, and enacted rules and regulations for their direction. Towards the end of the 9th century the custom arose of erecting their cells at the porches of churches and even the gates of towns. The ceremony of consecration was performed by the bishop. St. Dunstan's cell at Glastonbury (950) was so small that he could neither stand erect in it nor stretch his limbs to their full length. In 1325 an anchoress resided upon a piece of ground in St. Peter's, Cornhill; and in the "Privy Purse Expenses of Elizabeth of York," entries are made of gifts to an anchoress at Gloucester, Nov. 25, 1502, and to another near St. Alban's, March, 1503.

ANAGRAM.—Camden says, "Good anagrams yield a delightful comfort and plea-

sant motion in honest minds," and refers their origin to the time of Moses. They were classed by the Hebrews among the cabalistic sciences. The Greeks took the practice, and Lycophron, about B.C. 380, has left some on record. They were very common on the continent in the 16th and 17th centuries; and in the latter Louis XIII. appointed Thomas Billen, royal anagramist, with a salary of 12,000 livres. Calvin, in his "Institutions," published at Strasburg in 1539, styles himself Alcuinus, which, in addition to being the name of an old writer, is the anagram of Calvinus. They prevailed in England at a somewhat later period.

ANAM, or ANNAM (Asia).—This extensive tract of country, comprising Cochinchina, and Tonquin, Cambodia, or Cambodia, and some small islands, is said to have been colonized by the Chinese B.C. 234. The inhabitants appear to have regained their independence, though they continued nominally subject to China, A.D. 263. In 1406, the Chinese once more captured the country, which they retained until 1428. (*See COCHIN CHINA, TONQUIN, &c.*)

ANAPA (Circassia).—Founded by the Turks in 1784 and captured by the Russians in 1791. It was restored to Turkey, but again captured by Russia in 1807 and 1809, and again restored in 1812. The Russians finally took possession, June 23, 1828; but abandoned it to the French and English forces, June 5, 1855. It reverted to the Russians on the conclusion of peace in 1856.

ANASTATIC PRINTING.—This process for producing copies of manuscripts, or printed documents, or engravings, that can with difficulty be detected from the originals, was invented by M. Baldermus. The fact of the discovery was communicated to a select few in London in 1841. It was soon after made public, and Faraday explained the process at the Royal Institution, April 25, 1845. It has since transpired that a similar process had been employed in England some time before M. Baldermus's invention was made known.

ANATHEMA "is a word," says Bingham (*Antiq. b. xvi. ch. ii. s. 16*), "that occurs frequently in the ancient canons, and the condemnation of all heretics." It is found in 1 Cor. xvi. 22, and in Gal. i. 8; and upon its use in the latter text the authorities of the early Church grounded their justification of its employment in ecclesiastical censures. The council of Gangra, A.D. 365 or 375, closes every one of its canons thus,—*"Let him be anathema, or accursed!"* In ecclesiastical language it is generally understood as the sentence of major excommunication from the Church, pronounced with execration and malediction by a pope, bishop, or council. During the disorders occasioned by the violence of banditti in France in the 9th and 10th centuries, when the ecclesiastical jurisdiction was appealed to in aid of the civil, anathemas were decreed against robbers by councils, in presence of holy relics brought in for the

occasion. One of these, issued in 988, affords a very curious specimen of style and diction. (*See EXCOMMUNICATION.*)

ANATOLIA.—The Lydians dispute with the Phrygians the honour of being the first settlers. It was the seat of empire of the wealthy Croesus, who was defeated and his capital taken by Cyrus, B.C. 548; and it remained under the Persian yoke until conquered by Alexander the Great, B.C. 333. At his death it was divided into several small states. They gradually fell before the Roman legions, and the whole country was reduced to the form of a Roman province, B.C. 50. Christianity flourished, and several councils were held in different parts. Here were the seven churches of Asia, to which St. John wrote his Revelation (ch. i. 4 and 11), A.D. 96 or 97. The Persians under Chosroes II. overran the country in 616, and were defeated by Heraclius in 627. The Turks obtained possession 1074—1084. The Mongols committed great devastations 1242—1272. In 1300 Anatolia was divided amongst the Turkish emirs. Another Mongol invasion spread ruin and destruction in 1402, but the Turks regained possession, and Anatolia has since remained under their sway. The Byzantines applied the term Anatolia to the country to the east of Constantinople, and it received the name of Asia Minor in the 4th century. Anatolia or Anadol, in a more restricted sense, is now applied to only a portion of Asia Minor.

ANATOMY.—Some authorities pretend that this science was practised at a very early period, and that the Jews and other ancient nations from their sacrifices, and the Egyptians from their process of embalming, obtained a certain amount of knowledge on the subject. A writer in the *Encyclopædia Britannica* remarks,—“Amidst the general obscurity in which the early history of anatomy is involved, only two leading facts may be admitted with certainty. The first is, that previous to the time of Aristotle there was no accurate knowledge of anatomy; and the second, that all that was known was derived from the dissection of the lower animals only.” Aristotle (B.C. 334—327) laid the basis of the science, but it was not until the 3rd century that the human body was dissected at Alexandria by Erasistratus, who obtained the bodies of criminals. Pliny states that the study was encouraged by the Ptolemies. Celsus, at the commencement of the Christian æra, gave some account of the progress of anatomy; and Galen in the 2nd century collected all that was known, and made great advances in the science. It flourished in Sicily in the 13th century, when Frederick II. enacted that no person who had not acquired a knowledge of anatomy should be allowed to practise surgery. Pope Boniface VIII. prohibited it in Bologna in 1297. Mundinus, between 1315-18, publicly dissected three human bodies at Bologna, and wrote a work on the subject that became a text-book in the Italian universi-

ties. The greatest anatomist of the Middle Ages was Vesalius, who operated extensively on human subjects. He became professor at Pavia in 1540; and published his great work on anatomy, the first containing anatomical plates, at Basel, in 1543. Michael Angelo, Raphael, and Lionardo da Vinci, had, previous to that time, been permitted by Julius II. and Leo X. to study the muscles in the human body for purposes of painting and sculpture. Thomas Vicary, in 1548, was the first Englishman who wrote upon the subject: he has been followed by Harvey, the two Hunters, and a number of eminent men, who, both by their researches and their writings, have brought this science to a state of great perfection.

ANATOMY LAWS.—By 32 Hen. VIII. c. 43, s. ii. (1540), the barbers and surgeons of London were authorized to take, yearly, the bodies of four malefactors, executed for felony, for purposes of dissection. Several enactments have appeared in the statute-book since that time. Great difficulty having been experienced in obtaining subjects for dissection, and bad practices having arisen, the “Act for Regulating Schools of Anatomy” (2 & 3 Will. IV. c. 75) was passed Aug. 1, 1832. It authorized the granting of licenses to practise anatomy, and gave facilities for procuring the necessary subjects; whilst the sixteenth section repealed 9 Geo. IV. c. 31, s. 4 (June 27, 1828), by which the body of a person executed for murder was ordered to be dissected.

ANCENIS (Treaty).—Concluded between Louis XI. and the dukes of Brittany and Normandy. It was ratified by the king and the duke of Brittany Sept. 18, and by the duke of Normandy June 21, 1470. Philip of Commines says (book ii. ch. 5),—“The dukes renounced all their alliances, and particularly his (duke of Burgundy); and that, in satisfaction of all his demands, the duke of Normandy was to receive a pension of 60,000 livres per annum, for which he was to relinquish the interest which had been lately conferred upon him in Normandy.”

ANCIENTS (Council of).—The Convention in 1795 divided the legislative power in France between two councils, that of the Ancients and that of the Five Hundred. To the former was intrusted the power of passing or rejecting the laws that originated in the latter branch of the legislature. Their sittings were transferred to St. Cloud, Nov. 9, 1799, and a new constitution soon after suppressed the council altogether.

ANCONA (Italy).—The capital of a delegation of the same name, is said by Strabo to have been founded by a colony of Syracusans in the time of Dionysius, about B.C. 380. Juvenal calls it a Doric colony. The Romans occupied it B.C. 178, and eventually made it one of their chief naval stations on the Adriatic. Trajan improved the town and constructed the mole A.D. 107; and a triumphal arch in white marble was erected in honour of him A.D. 112. The Lombards occupied it in 592, and the Saracens took it in

839. The town adhered to the Greek emperors, and was besieged by Frederick I. in 1167; and again by the Germans and Venetians in 1174. Innocent III. expelled the Germans in 1198. Pius II. collected an army here for a crusade against the Turks in 1464, but died before he could embark in the expedition. The March of Ancona remained for a long period under the protection of the popes, though at intervals the connection was severed, until the papal general Gonzaga seized it, and placed it under the absolute dominion of Clement VII. in 1532. Ancona was declared a free port in 1732. The French captured it Feb. 9, 1797; surrendered it Nov. 13, 1799; regained it by the armistice of Treviso, Jan. 16, 1801; and restored it to the pope in 1802. A French expedition landed at Ancona and took possession of the citadel Feb. 23, 1832. They held it until Dec. 4, 1838, when, upon the withdrawal of the Austrians from the papal dominions, they marched out. The Austrians captured it June 14, 1849; and the Sardinians in Sept. 1860, when General Lamoricière, who had re-organized the papal army, was made prisoner. An episcopal see was established at Ancona at an early period.

ANCYRA (Asia Minor).—An important town in Galatia, on the route from Byzantium to Armenia and Syria. It originally belonged to Phrygia. According to Strabo, it became the chief town of the Tectosages, a Gallic tribe, about B.C. 277. It was taken by the Romans B.C. 189; was formally annexed to Rome B.C. 25; and soon after took the name of Sebaste, and was sometimes called Metropolis. A Christian church was established here in the time of the apostles; and it was made an episcopal see. Councils were held at Ancyra A.D. 314, 358, and 375; Chosroes II. captured the city in 616; the Saracens took it in 1085; and it was carried by assault, by the Crusaders, in 1102. (*See* ANGOARA.)

ANDALUCIA (Spain), anciently **VANDALUCIA**, a large province, that at one time formed part of the Roman colony of Bætica. The Vandals conquered it early in the 5th century, and on their passing over to Africa, A.D. 429, the Visigoths obtained possession. They were expelled, in 711, by the Moors, who, in spite of various reverses, did not finally relax their hold until 1492, when their last possessions in Andalusia reverted to the Spaniards. An independent race of caliphs governed Andalusia from 756 to 1036. Andalusia was divided into two departments, containing eight provinces, by a royal decree, Nov. 30, 1833.

ANDAMAN ISLANDS (Bay of Bengal).—The English attempted to form a settlement on one of the four in 1791. It was removed to Port Cornwallis in 1793, and abandoned, on account of the bad climate, in 1796. The British expedition against the Burmese touched here in 1824, and another visit was made in 1825, on both of which occasions the inhabitants evinced great hostility.

ANDERNACH (Prussia).—The ancient

Antunacum, near which Cæsar constructed a bridge across the Rhine, B.C. 55, for the passage of his army into Germany. Charles the Bald was defeated here Oct. 8, 876, by his nephew, Louis II. of Saxony. It was made an imperial city during the Middle Ages, but was reduced to the rank of a municipal town by the elector of Cologne in 1496.

ANDORRA.—This republic, in the Pyrenees, consists of neutral territory between France and Spain. It was formed by Charlemagne, during his wars against the Moors, and has preserved the same frontiers and mode of government which it then received. By two diplomas, issued under the authority of Charlemagne, in 778 and 801, Andorra was constituted an independent state. The counts of Foix were nominated protectors; but a dispute having arisen in 860, on this point, a contest ensued, which lasted until 1278, when a co-protectorate was vested in the bishops of Urgel and the counts of Foix. The rights of the latter merged in the house of Bourbon, and, in consequence, the joint protectorate is now exercised by the emperor of the French and the Spanish bishop of Urgel. Andorra is the oldest free republic in existence.

ANDREW, ST. (Order of), generally called Knights of the Thistle, was instituted, according to some authorities, in memory of a battle won by the Scotch over the English, by the aid of St. Andrew. Others ascribe it to Achaius, king of Scotland, A.D. 787 or 812; others to the æra of Charles VII. of France. It was, however, established by James V. in 1540, revived by James II., of England, in 1687, and restored by Queen Anne, Dec. 31, 1703. The Russian order of St. Andrew was instituted by Peter the Great in 1698.

ANDREWS, ST. (Scotland).—This town was made a royal burgh by David I., in 1140. Its university was founded in 1411, by Bishop Wardlaw, and confirmed by a papal bull in the following year. It consisted of three colleges, namely, those of St. Salvator, founded in 1458; St. Leonard, in 1512; and New, or St. Mary's College, in 1552. The two former were united in 1747, and the buildings of St. Leonard pulled down. St. Mary's was remodelled in 1579. The cathedral of St. Andrews, founded in 1159, and completed in 1318, was nearly destroyed by a mob, excited by the preaching of John Knox, in June, 1559. St. Andrews was made an episcopal see in the 9th century, and an archbishopric in 1474. It was suppressed in 1689. The name of the see of Fife was changed to that of St. Andrews, Sept. 5, 1844.

ANDROS (Archipelago), one of the Cyclades, colonized by Ionians. Xerxes compelled the Andrians to join his fleet in the invasion of Greece, B.C. 480. The island became subject to the Athenians, afterwards to the Macedonians, and was taken by the Romans B.C. 200. It was captured by the Venetians A.D. 1124.

ANEMOMETER.—The earliest instrument

of this kind was discovered by Croune, in 1667. It was improved by Wolfius, in the beginning of the 18th century.

ANGEL.—This gold coin was introduced from France into England, by Edward IV., in 1465. Stow speaks of angelets at 6s. 8d.; half-angels at 5s., and at 3s. 4d. On the 6th of September, 1526, the value of the angel was raised, by proclamation, to 7s. 4d.; on the 5th of November, in the same year, to 7s. 6d.; and in 1544 it was raised to 8s. Mary fixed it at 10s. Charles I. was the last king in whose reign angels were coined.

ANGERS (France), the ancient JULIOMAGUS, afterwards called Andegavia. — This town has been frequently assailed. Odoacer wrested it from the Romans A.D. 464; Charles Martel captured it in 724; and the Danes, after having pillaged it several times, fortified it in 860. It was formerly the capital of Anjou. King John burnt it in Sept. 1206; and the Vendéans were driven from it in 1793. In 1585, Huguenots seized the celebrated castle built by St. Louis. It was made the seat of a bishopric in the 4th century, and a university was founded here in 1246. Councils were held at Angers in 453, 529, 1055 or 1062, 1157, 1161, 1269, 1279, 1365, 1448, and 1553.

ANGERSTEIN GALLERY.—This collection, which formed the commencement of the National Gallery, consisted of thirty-eight pictures. It was purchased by the English government for £57,000, March 26, 1824.

ANGLESEY, or ANGLESEA, anciently MONA.—This island was in early times the chief seat of the Druids in Wales. Suetonius Paulinus captured the island, after a desperate resistance, A.D. 61. He cut down the sacred groves, and butchered the priests and their people, though its subjugation was not completed until the year 78. Anglesey was captured by the Normans in 1090. The inhabitants having regained possession 1094, were again conquered in 1096. Magnus III., king of Norway, assailed it, committing great ravages, in 1098. After several contests, it was subjugated, with the rest of Wales, by Edward I., and it was annexed to England by 12 Edw. I., March 19, 1294. The Mona and Parys mines were discovered in 1768; the Menai Suspension Bridge, connecting the island with the mainland, was constructed between 1818 and 1825, and the Britannia Tubular Railway Bridge was opened Mar. 6, 1850.

ANGLING.—This art is of very ancient origin, and is even said to have been invented by Seth, about B.C. 3800. It is frequently mentioned in the Old Testament, and allusions to it occur in Job, one of the most ancient books of the Bible. The Greeks and Romans practised it. Izaak Walton's delightful work, entitled "The Compleat Angler, or the Contemplative Man's Recreation; being a Discourse of Fish and Fishing, not unworthy the perusal of most Anglers," appeared in 1653. There is a text of Scripture on the title-page (John, xxi. 3). It was not, however, the first Eng-

lish book on the subject. This honour belongs to "The Treatise of Fysshinge with an Angle," by Dame Juliana Barnes, Bernes, or Berners, published by Wynkyn de Worde in 1496.

ANGLO-SAXONS.—A name given to several tribes, most of which were of Scandinavian origin. The Northmen having settled in Germany, from time to time invaded and possessed themselves of portions of ancient Britain. The date of their first invasion is uncertain, some authorities placing it A.D. 368, and others A.D. 449. They established themselves in the southern part of the island, and gradually extended their settlements in other directions.

ANGOLA (Africa).—This territory, on the west coast of Africa, called Dongo by the natives, was discovered by Diego Cam, a Portuguese, in 1484. Settlements were soon formed, though it was not until 1578 that Loando, its capital, was commenced. The Dutch captured Loando in 1640, but the Portuguese regained possession in 1648.

ANGORA, anciently ANCYRA (Asia Minor).—In a battle fought here, July 28, 1402, Timour, or Tamerlane, utterly routed the Turks, and took Sultan Bajazet prisoner. The story of Bajazet's confinement in an iron cage is denounced by many writers as a fable. Gibbon, who weighed the evidence of the story carefully, believes it to be too well attested to be without foundation. His conclusion is, that Timour intended to lead "his royal captive in triumph to Samarcand. An attempt to facilitate his escape, by digging a mine under the tent, provoked the Mogul emperor to impose a harsher restraint; and in his perpetual marches an iron cage on a waggon might be invented, not as a wanton insult, but as a rigorous precaution." The Turks recovered Angora in 1415, and it has since remained in their possession.

ANGOUËME (France), the ancient ICU-LISMA, was the chief town of Angoumois. It was made the seat of a bishopric A.D. 260, conquered by the Visigoths in 451; regained by Clovis in 507; taken by the Saracens in 731, and plundered by the Danes in 856. Afterwards it remained independent under a succession of counts until annexed to France in 1303. It was made a duchy in 1515 and reunited to France in 1710. Its cathedral, built in 1120, was destroyed by the Huguenots, and rebuilt in 1628.

ANGUILLA, or SNAKE ISLAND (West Indies), came into the possession of the English about 1632, and was colonized by them in 1666. The French having ravaged the island in 1796, re-embarked on the approach of a British frigate.

ANHALT.—The house of Anhalt is one of the most ancient in Germany. It ranks amongst its members a long succession of princes and dukes, one of the former, Bernhard, having rejected the imperial sceptre offered to him in 1198. The family enjoyed the greatest prosperity in the Middle Ages, when they ruled over a large portion of

Northern Germany. In 1252, Anhalt was divided into three parts; again reunited in 1570, and once more divided amongst the four sons of Ernest Joachim I., in 1586,—Dessau, Bernburg, Coethen, and Zerbst. The latter branch died out in 1793, and their possessions were divided amongst the other three. The Coethen line became extinct in 1847, and that duchy, according to the family compact of June 22, 1665, is now ruled by the duke of Anhalt-Dessau. The princes of Anhalt took the title of dukes in the Confederation of the Rhine, in 1809. Many of them greatly distinguished themselves by their defence of the Protestant cause.

ANHOLT (Baltic Sea).—This small Danish island, in the Cattegat, was taken by the British, May 18, 1809. The Danes were defeated in an attempt to recapture it, March 27, 1811.

ANJAE (Hindostan).—This fortified town, not far from Cutch, was captured by the English in 1815. The town and district, ceded to England in 1816, were restored to the native government in 1822. It suffered from an earthquake in 1819.

ANJOU.—Charles the Bald, about the year 870, is said to have bestowed this part of France upon one of his followers, from whom the first line of the counts of Anjou was descended. In 1127, Geoffrey, afterwards Geoffrey V., son of Fulke, count of Anjou, married Maud or Matilda, widow of the emperor Henry V., and daughter as well as heiress of Henry I., of England. Their son, Henry II., the first of the Plantagenets, succeeded to the English throne in 1154, and in 1156 he deprived his brother, Geoffrey VI. of Anjou. It was soon after annexed to England, and the first line of its counts ceased. Philip Augustus obtained possession of Anjou in 1204, and his successor, Louis VIII., bestowed it upon his fourth son, Charles, who founded the second line. By his marriage with the daughter of Berenger, the last count of Provence, that important fief was annexed to Anjou. Charles mounted the throne of Sicily in 1266, and his posterity ceased to be connected with Anjou. The possession of Anjou became a frequent cause of strife between France and England; and Edward III., who had conquered it, by the 9th article of the treaty of Bretigny (May 8, 1360), relinquished his claim. In that year, the French king, John, raised it into a duchy, and bestowed it upon his son Louis, who became the founder of the third line, and the first duke. This prince and his successors made several unsuccessful efforts to obtain the crown of Naples. His grandson Regnier, called the "good king René," gave his daughter Matilda in marriage to Henry VI. of England, April 22, 1445; and in 1448 he received Anjou, which had been seized by the English. René was dispossessed by Louis XI. in 1474, and Anjou was united to France. The title has been revived since that time, and the duchy, for a short interval, passed under the sway of its own dukes. Francis, duke of Alençon, afterwards duke

of Anjou, entered into a convention with the people of the Netherlands, Aug. 20, 1578, by which he was to aid them against the Spaniards, the States conferring upon him the title of "Defender of the Liberty of the Netherlands against the Spaniards and their adherents." He visited England in 1581, and made proposals to Queen Elizabeth. His suit, in spite of an exchange of rings between the lovers, was rejected. He returned to the Netherlands early in 1582, and was formally installed sovereign of the States, Feb. 17 in the same year. He was expelled in 1583, and died in 1584, being the last duke of Anjou that played a prominent part in history.

ANJOU (Battle), fought at Baugé, near Anjou, between the French and the English, on Easter eve, Saturday, March 22, 1421. The former were victorious, and the duke of Clarence was slain. It is sometimes called the battle of Baugé.

ANNAN (Scotland).—Edward Baliol was surprised at night, when encamped at this place, by the earl of Moray, Dec. 25, 1332. The attack was so sudden, that little resistance was made, and his brother Henry and others having been slain, Baliol fled, and escaped with difficulty to England. Annan was created a royal burgh in 1538.

ANNATES, or **FIRST-FRUIITS**, were the first year's whole profits, first of a bishopric and afterwards of any benefice, claimed by the pope. The tax was introduced in the see of Norwich by Pandulph, the pope's legate, in the reigns of king John and Hen. III. Clement V. and John XXII. endeavoured to make these payments universal in their application, at the commencement of the 14th century. The claims met with much resistance; and in 1404 an act (6 Hen. IV. c. 1) was passed for their regulation. The council of Basel condemned them, June 9, 1435. By 26 Hen. VIII. c. 3 (1534), annates were granted to the king. This was repealed by 2 & 3 Phil. & Mary, c. 4 (1555), but revived by 1 Eliz. c. 4 (1559). By letters patent Nov. 3, 1703, Queen Anne restored first-fruits and tenths to the Church. (*See* **QUEEN ANNE'S BOUNTY**.)

ANNE, Queen of England, the second daughter of James II. by his first wife, Anne Hyde, daughter of Lord Clarendon, was born at Twickenham, Feb. 6, 1665. She was married to Prince George of Denmark July 28, 1683, and ascended the English throne March 8, 1702. Her husband, Prince George, died Oct. 28, 1708, and Anne herself, Aug. 1, 1714. They had four daughters and one son, who died in infancy, and another son, William, born July 24, 1689, and created duke of Gloucester by William III. He died July 30, 1700; and on his death a new settlement of the crown was made.

ANNEAU (Battle).—Henry of Navarre's German allies were defeated here by the duke of Guise, Nov. 24, 1587.

ANNO DOMINI, or the year of our Lord, commenced January 1, in the middle of the

fourth year of the 194th Olympiad, the 753rd from the building of Rome, and in the 4714th of the Julian period. Dionysius, surnamed "Exiguus," also known as "Dennys le Petit," a monk of Scythia and a Roman abbot, first used it, about 527. It was introduced into Italy in the 6th century; into France in the 7th, though it was not generally established there until the 8th century; into Spain in the 11th, and it was uniformly used there in the 14th; into Portugal in 1415, and into the Eastern empire and Greece in the 15th century. The first recorded instance of its employment in England is in the year 680, and it was generally adopted in the 8th century. The council of Chelsea, July 27, 816, decreed that all bishops should date their acts from the year of the incarnation of the Saviour. The actual date of the birth of Christ is Friday, April 5, B.C. 4, or the fourth year of the 193rd Olympiad, the 4709th of the Julian period, or the 749th from the building of Rome.

ANNOBON, or ANNABONA (Gulf of Guinea), an island discovered by the Portuguese in 1471, ceded to Spain by a treaty concluded March 24, 1778.

ANNUAL REGISTER.—The first volume of this work appeared in June, 1759. It was projected by Robert Dodsley and Edmund Burke, and the latter was for many years editor and principal contributor.

ANNUNCIADA (Order of), known originally as the "Order of the Necklace or Collar," was instituted in 1355, by Amadeus VI., duke of Savoy. It was intended to commemorate the exploits of his valiant predecessor, Amadeus V., who had distinguished himself by his victory over the Turks at the siege of Rhodes, in 1310. Victor Amadeus, in 1720, raised it to the first order of the kingdom of Sardinia, the king being grand master.

ANNUNCIATION.—This festival, in commemoration of the tidings brought by the Angel Gabriel to the Virgin Mary (Luke, i. 26—37), is of very ancient date. Proclus, patriarch of Constantinople, who died A.D. 447, and Basil of Seleucia, who died in 445, left discourses on the festival. It is celebrated March 25th, which day, before the alteration of the calendar in 1752, was the commencement of the Legal year.

ANointing.—This ceremony, employed at the coronation of kings and the institution of bishops and other dignitaries, is of very ancient date. Moses anointed Aaron and his sons (Lev. viii.), B.C. 1496; Samuel anointed Saul (1 Sam. x. 1), B.C. 1095, and David (1 Sam. xvi. 1—13), B.C. 1063. Anointing was also practised amongst our early kings. Leo IV. anointed Alfred in 871; and this, Rapin says, was probably the first time the ceremony of crowning and anointing was used by an English king. The custom was kept up, and Richard III. and his queen Anne were anointed at their coronation, July 6, 1483. Taylor (Glory of Regality, p. 347) states that one of the principal changes which our ceremonial has under-

gone is the omission of the practice of anointing with chrism, after the unction of the consecrated oil. Till the time of Elizabeth, or perhaps of James I., it was usual for the king to be anointed on the palms of his hands, on his breast, between his shoulders, on his elbows, and on his head, with the holy oil, *in formâ crucis*, and afterwards with the chrism, in the same form, upon his forehead. Anointing, in early theological writings, has reference to baptism and confirmation. It was practised in exorcism and baptism by the Gnostics in the 2nd and 3rd centuries, in the Alexandrian church. The Marcosians, a branch of the Gnostics and the Ophites, anointed their dead. The anointing in Extreme Unction, practised by the Church of Rome, is a late invention.

ANONYMOUS LETTERS.—By 9 Geo. I. c. 22 (1722), called the Black Act, the sending a letter without a name, or with a fictitious name, demanding "money, venison, or other valuable thing," was made felony, the delinquent to suffer death without benefit of clergy. Later enactments refer to threatening letters without being anonymous.

ANTALCIDAS (Peace of) was forced upon the states of Greece by Artaxerxes, king of Persia, B.C. 387. The terms were, that the Greek cities in Asia, and the islands of Clazomenæ and Cyprus, should be subject to Artaxerxes, and that all the other Greek cities should be left independent, except Lemnos, Imbros, and Seyros, which were to remain subject to Athens.

ANTARCTIC REGIONS.—The adventurous Captain Cook, in 1773, endeavoured to complete the circle round the South Pole, in a high latitude; but his progress was arrested by the ice. He was the pioneer of modern discovery in these regions. On the evening of Dec. 6, Captain Cook and his comrades calculated that they were at the antipodes of London, being the first Europeans who had gone so far. On the 30th of January, 1774, they reached the highest southern latitude that had then been attained by any discoverer. It was not until Feb. 20, 1822, that Captain Weddell penetrated further. Captain Biscoe discovered land in this direction, Feb. 27, 1831; and went on shore on Graham's Land, Feb. 21, 1832. Messrs. Balleny and Freeman discovered the Balleny Isles, Feb. 9, 1839; D'Urville, Adelie Land, in 1840; and Sir James Ross, in 1841, discovered a continent which he named Victoria Land.

ANTI-CORN-LAW LEAGUE was formed at Manchester, at a public dinner, Sept. 18, 1838. Deputies assembled in London, Feb. 8, 1842, and from that time its operations were carried on with activity until Sir Robert Peel passed a bill for repeal of the Corn Laws (June 26, 1846). The League was dissolved July 2, 1846.

ANTIGUA (West Indies), the largest of the Leeward Islands, was discovered by Columbus in 1493. It was, with other islands, granted to James, earl of Carlisle,

July 2, 1627, to be colonized under the name of Carlisle Province. The first settlement appears to have been made in 1632. The French invaded the island in 1666, and committed much havoc. An earthquake destroyed a large number of the churches, sugar-mills, and principal buildings on the island, Feb. 8, 1843; and great destruction of property was caused by hurricanes Aug. 12 and 13, 1835, and in 1848. It was made the seat of a colonial bishopric in 1842; and a cathedral was erected at its chief town, St. John's, in 1847.

ANTILLES, OR CARIBBEE ISLANDS.—The term Antilles is erroneously applied to all the West-India islands, which some authorities divide into the Greater and Lesser Antilles. The French gave the name to the Caribbee or Windward Islands. (See CARIBBEE ISLANDS.)

ANTIMONY.—This term was formerly applied to an ore in which antimony was combined with sulphur. Tersulphuret of antimony is found in great quantities at Sarawak, in Borneo. This preparation was used by the Jewish women for dyeing the eyelashes black. Jezebel used it (2 Kings ix. 30), about B.C. 884. The Greek and the Turkish ladies employ it in this manner. Preparations of antimony were only introduced into medical practice in the 15th century. Its virtues in this respect were first discovered by Basil Valentine, a Benedictine monk of Erfurt, born in 1394.

ANTINOMIANS.—This is not the designation of a separate sect, but of members of various sects who hold that Christians are free from the restraints both of the ceremonial and the moral law of Moses. They often, however, differed greatly in their views on this question. The theory existed in the time of St. Paul, for he alludes to it in Romans, iii. 28; but the name was first applied to the followers of John Agricola, of Eisleben, who had a controversy with Luther between the years 1538 and 1540. These modern Antinomians held, moreover, that the law should be wholly excluded from the Church. The Antinomians became a strong political party in England, equally troublesome to Charles I., the parliament, and Cromwell. In 1643 the Assembly of Divines condemned several writings which appeared to them Antinomian; and in 1648 the parliament enacted that any one convicted of maintaining that doctrine should be imprisoned until he found sureties that he would not offend again. Hallam (Hist. of Lit. vol. i. pt. 1, ch. 4) says that Antinomianism prevails in the early writings of Luther.

ANTIOCH (Syria), now ANTAKIEH, was founded by Seleucus Nicator B.C. 300, who named it after his father; and it remained the capital of the dynasty till Syria was conquered by Pompey, and was made a Roman province B.C. 64. Christianity was planted in Antioch by Paul and Barnabas, and here the disciples were first called Christians, A.D. 42 (Acts, xi. 26). This city, long known as "the Queen of the East," was captured by the

Persian king Nushirvan, or Chosroes, A.D. 540; and Chosroes II. wrested it from the empire in 611. Heraclius expelled the Persians, but it fell into the power of the Saracens in 638 (according to Clinton, Tuesday, July 21); and they degraded it to the rank of a provincial town. Nicephorus Phocas recovered it in 966, but it was betrayed to the Turks in 1084. The crusaders laid siege to it in 1097, and captured it Thursday, June 3, 1098.* The citadel held out, but the Saracens, who made an effort to regain the prize, were defeated in a great battle under the walls of Antioch, Monday, June 28th, 1098; and Antioch became the capital of a Christian principality. Bibars, sultan of Egypt, captured it, destroyed its churches, and completely ruined it, June 12th, 1268. It was annexed to the Ottoman empire in 1516. Ibrahim Pasha seized it Aug. 1, 1832, but it was afterwards restored to the Porte. Antioch has frequently suffered from earthquakes; the most disastrous occurred A.D. 115, 340, 394, 396, 458, 526, and 588. St. Jerome says that St. Peter was its first bishop, and that he was translated thence to Rome. Antioch was a patriarchate, and according to the council of Nice, the third after Rome and Alexandria. The council of Constantinople, A.D. 382, gives Constantinople the next place after Rome, and makes Antioch the fourth. This was confirmed by the council of Chalcedon in 451. Thirty-one councils were held at Antioch, the first in 252, and the last in 1141.

ANTIOCH (Æras of).—The Cæsarean era of Antioch was instituted at that city in consequence of Cæsar's victory at Pharsalia, Aug. 9, B.C. 48. The Syrians computed it from Oct. 1, B.C. 43; and the Greeks from Sept. B.C. 49. By the mundane æra of Antioch, the creation of the world was assigned to B.C. 5492, or ten years later than by the mundane æra of Alexandria. Ten years were, however, subtracted from the latter A.D. 285, and from that time the two æras coincided.

ANTI-POPEs, or rival popes, were, at different periods in the history of the Church of Rome, elected by contending parties. Even before Rome claimed supremacy over other churches, Novatian appeared, as a rival bishop of Rome, to Cornelius, in 251. The principal anti-popes are as follows:—

Felix II. in 355.	Philip in 768.
Ursinus in 367.	Zizimus in 824.
Eulalius in 418.	Anastasius in 855.
Laurentius, or St. Lawrence, in 498.	Sergius in 891.
Dioscorus in 530.	Boniface in 896.
Peter and Theodorus in 686.	Leo VIII. in 955 & 963.
Theodorus and Paschal in 687.	Boniface VII. in 974.
Theophilactus in 757.	John XVI. in 997.
Constantine in 767.	Gregory in 1012.
	Sylvester III. in 1044.
	Benedict IX.
	Sylvester III. in 1046.

* Odericus Vitalis mentions Wednesday, and the editor of Bohn's edition (iii. 125) corrects what he calls a mistake, by inserting Tuesday. There is, however, some error; for the 3rd of June, 1098, fell upon a Thursday.

Benedict X., afterwards	Anacletus II. in 1130.
Nicolas II., in 1058.	Victor III. in 1133.
Honorius II. in 1061.	Victor IV. in 1153.
Clement II. in 1080.	Paschal III. in 1164.
Gregory VIII. in 1118.	Calixtus III. in 1168.
Cælestine II. in 1124.	Innocent III. in 1178.

The great schism of the West, when rival popes struggled to attain the supremacy, commenced in 1378, and lasted thirty-eight years. A demand was made for the election of a Roman pontiff, and, although the French interest was in the ascendant in the conclave, Urban VI., an Italian, was elected, April 9, 1378. On the 9th of August the cardinals at Anagni declared the election void; and Clement VII., who soon after repaired to Avignon, was elected in his place, Sept. 20. Then commenced the schism, and the following were the anti-popes:—

Clement VII. elected in 1378.	Gregory XII. in 1405.
Benedict XIII. in 1394.	Clement VIII. in 1424.
	Felix V. in 1439.

The last-mentioned abdicated in April, 1449, and thus terminated the great schism of the West. He was the last of what are termed the Anti-popes.

ANTIQUARIES.—A Society of Antiquaries was formed in London in 1572, under the auspices of Archbishop Parker and Sir Robert Cotton, and was dissolved by James I. about 1604. It was revived in 1707, was reconstituted in 1717, and its minutes date from January 1st, 1718. It was incorporated by royal charter, Nov. 2, 1751, and received the name of "Society of Antiquaries of London;" and in 1780 George III. granted to the members the use of apartments in Somerset House, where it continues to hold its meetings.——The Society of Antiquaries of Scotland was instituted at Edinburgh in 1780.

ANTI-SABBATARIAN CONTROVERSY arose in the 16th century. Dr. Bound, a Puritan, put forth the peculiar views of his party, in a publication entitled, "Treatise of the Sabbath," in 1595. This gave rise to the controversy, which was carried on with considerable animosity between the High Churchmen and the Puritans.

ANTI-SACERDOTALISTS.—A sect which originated in Flanders about 1115, according to Mosheim, and in 1122 according to Milman. Tanchelin, or Tanquelin, a layman of Antwerp, was their founder. Milman says (Lat. Chris. iv. book ix. ch. 8), "He rejected pope, archbishops, bishops, the whole priesthood. His sect was the one true Church. The Sacraments (he denied transubstantiation) depended for their validity on the holiness of him that administered them. He declared war against tithes and the possessions of the Church. He was encircled by a body-guard of three thousand armed men, he was worshipped by the people as an angel, or something higher: they drank the water in which he had bathed. He is accused of the grossest license." He went from Utrecht to Rome, Bruges, and

Antwerp, where he ruled with "the power and state of a king." He was killed by a priest in 1124 or 1125; but his followers adhered to his opinions till the schism was extinguished by St. Norbert, founder of the Præmonstratensians. Other Sacerdotalists appeared in France at a later date.

ANTI-TRIBONIAN.—The name given to the opponents of the celebrated Tribonian, the minister of Justinian, and the chief compiler of the Justinian Code, the Pandects, and Institutes. He flourished from A.D. 527 to 546. Gibbon says, "His genius, like that of Bacon, embraced, as his own, all the business and knowledge of the age." He was regarded as an opponent of Christianity, and to this must his unpopularity be attributed.

ANTI-TRINITARIANS.—Opposition to the doctrines of the Trinity commenced in the Apostolic period, with the rise of the Judaizing Christians (Gal. i.). The Ebionites A.D. 66, the Nazarenes about the same time, Cerinthus and his followers A.D. 96, held peculiar notions respecting the nature of Christ. Sect after sect followed in quick succession, until Arianism arose A.D. 318. The doctrines of Arius spread over Europe and parts of Africa, creating a great war of opinions, which began to decline in the 7th century. By an ordinance passed May 2, 1648, denial of the Trinity was made felony in England. Erasmus was accused of Arianism in 1536. Many of the German neologists of the present day are anti-Trinitarians.

ANTIUM (Italy).—This ancient Latian city was rendered subject to Rome by the treaty with Carthage, B.C. 509. The Volscians afterwards obtained possession, but were expelled, B.C. 468, by the Romans, who planted a colony. It revolted B.C. 459, and remained independent for more than a century. The people of Antium were at war with Rome B.C. 406; and another contest followed, that lasted from B.C. 386 to B.C. 374, when peace was concluded. It joined in the Latin war, which commenced B.C. 340, and was compelled to admit a Roman colony, B.C. 338. Coriolanus retired to Antium B.C. 488. Its site is now occupied by Porto d'Anzo.

ANTOINE, St. (Battle).—This struggle, in which Condé, during the war of the Fronde, defeated Turenne, July 2, 1652, took place in the faubourg of St. Antoine, at Paris.

ANTONINUS, WALL OF. (See AGRICOLA.)

ANTONY, St. (Order of).—Albert, duke of Bavaria, instituted this military order in 1332.

ANTRIM (Battle).—A victory was gained at this place by the royal forces over the United Irishmen, June 7, 1798.

ANTWERP (Belgium).—The capital of a province of the same name; in the 11th century a small republic, became in the 16th the richest commercial city in Europe. The citadel was commenced by the duke of Alva in 1567, completed in 1568, and extended in 1701. Antwerp has been frequently besieged. It was pillaged and burnt by the Spaniards

Nov. 4, 1576. This massacre, one of the most monstrous ever known, was called the Spanish Fury. The duke of Anjou attempted to carry the city by a surprise, Jan. 17 (O.S. 7), 1583. The whole of his force was either killed or taken captive in less than an hour. This affair was called the French Fury. The duke of Parma besieged it in 1584, and it capitulated after a siege of fourteen months, Aug. 17, 1595. Its commerce suffered greatly from the closing of the Scheldt by the treaty of Westphalia in 1648. Marlborough obtained possession of Antwerp June 6, 1706; and Marshal Saxe May 9, 1746. The French republicans captured it Nov. 29, 1792. They retired in 1793, but regained possession July 23, 1794. It was relinquished by the French in 1814, and formed part of the kingdom of the Netherlands until 1830. The king of Holland having refused to give up the citadel, the French began to bombard it on the 4th of December, 1832; and it surrendered Dec. 23. Antwerp was made the seat of a bishopric in 1559. The town-hall was rebuilt in 1581; and the exchange, founded in 1531, was destroyed by fire Aug. 2, 1858.

ANTWERP (Truce of), for twelve years, concluded between Spain and the United Provinces, March 29, 1609.

AOSTA (Piedmont).—Augustus, after the subjugation of the Salassi, its ancient inhabitants, by Varro, B.C. 25, established a Roman colony at this place, then called Augusta Prætoria. Aosta is now the chief town of the province of the same name. The gospel is said to have been preached at Aosta by the disciples of St. Barnabas, and its bishopric was established at an early period.

APOCALYPSE, or THE REVELATION OF ST. JOHN THE DIVINE, was written in the island of Patmos A.D. 96 or 97. The Alogi in the 2nd century rejected it, attributing the authorship to Cerinthus. Dionysius, bishop of Alexandria (A.D. 248—265), states that it was rejected by many persons of good character. Jerome, writing early in the 4th century, says that the Oriental church did not admit it into the canon, and it is not included in the list of books declared canonical by the council of Laodicea, A.D. 366. The council of Toledo, Dec. 9, 633, excommunicated those who refused to acknowledge its inspiration. Justin Martyr (130—160) and Irenæus, about 200, give important evidence in its favour. Erasmus and Luther doubted its authenticity. It is included in the canon, and accepted as the work of St. John. Several counterfeit books of the kind appeared in the early ages of the Church, as the Apocalypse of St. Peter, mentioned by Eusebius, and the Apocalypse of St. Paul, said to have been found in a stone chest at Tarsus.

APOLLINARIAN GAMES, in honour of Apollo, were instituted by the Romans after their defeat at Cannæ, B.C. 212, to propitiate the god and secure his assistance against the Carthaginians. The period of celebration was at first movable, but it was afterwards fixed for the 6th of July.

APOLLINARIANS, or APOLLINARISTS.—The

followers of Apollinarius, bishop of Laodicea, A.D. 366, who denied the perfect humanity of Christ. They held other peculiar doctrines, which were condemned by the council of Constantinople, being the second general council, in 381, and by that of Rome in 374.

APOLLO BELVEDERE.—This statue of Apollo was so called from the Belvedere of the Vatican, at Rome, on which it was placed by Pope Julius II. (1503-13). It was found in the ruins of the ancient Antium in 1503. The French carried it off in 1797, but it was restored to the Vatican at the peace of 1815.

APOSTATES.—Many of the African bishops refused to administer the communion to apostates in the beginning of the 3rd century. The Novatians about the same time advocated the most rigorous treatment towards them, and questioned the right of the Church to grant them reconciliation. They were denied the privilege of Roman subjects by the Theodosian code (381). The council of Arles, in 452, established penance for them. The Nestorians in the 11th century passed canons declaring that the guilt of apostates could only be washed out by their blood.

APOSTLES' CREED.—Bingham (Antiq. b. x. ch. 3, s. 5) says, "Some have thought that the twelve apostles, in a full meeting, composed the Creed in the very same form of words as now it is used in the Church; and others have gone so far as to pretend to tell what article was composed by every particular apostle." This view the learned author shows to be erroneous. Rufinus first mentioned it A.D. 390, when it was known as the Roman Creed. It may be considered as an exposition of the apostolical faith; and different parts were probably composed at different times. Irenæus, A.D. 177, made use of a form in some respects similar.

APOSTOLIANS, APOSTOLICI, or APOCTACTICI.—They arose in the 3rd century, and called themselves *Apostolici*, says Bingham, "from a vain pretence of being the only men who lead their lives according to the example of the Apostles; and *Apotactici*, from a show of renouncing the world more than other men." Another sect arose in the 12th century, and a third was founded by Gerhard Sagarelli, who was burnt alive at Parma in 1300. It was continued by Dulcinus, who suffered in 1307. Their followers in France and Germany were not finally extirpated until the time of Boniface IX. (1389—1404). They wandered about in white garments, renounced all kinds of property, and denounced the corruptions of Rome.

APOTHECARY.—The keeper of any warehouse or magazine was formerly termed an apothecary; and during the 13th and 14th centuries a person who, at courts, or in the houses of the nobility, prepared preserves and confectionery, was also known by this name. Apothecaries, as preparers of medicines, were first legally established in Italy, by the well-known medical edict issued for the kingdom of Naples by Frederick II. in the 13th century. Edward III., in 1345,

conferred a pension of sixpence a day upon Coursus de Gangeland, an apothecary of London, in recognition of his care in attending upon him during his illness in Scotland; and this is the first notice of an apothecary with which we meet in our annals. A patent was granted for the establishment of an apothecary's shop in Stuttgard in 1457. Apothecaries are first mentioned in France as receiving their statutes from Charles VIII. in August, 1484. It was not until 1511 (3 Hen. VIII. c. 2) that any attempt was made in this country to distinguish between the different branches of the profession of physic, and to define their position by law. By 32 Hen. VIII. c. 40 (1540), four physicians were ordered to be chosen yearly to search and examine all "wares, drugs, and stuffs" sold by the apothecaries, and to destroy any they found corrupted or defective. The apothecaries of London were incorporated by James I., April 9, 1606, being united with the grocers, from whom they were separated by a new charter from James I., Dec. 6, 1617. The character of the society has been considerably changed by many subsequent statutes. Their authority was confined to London and its immediate neighbourhood until 1815, when, by the third section of 55 Geo. III. c. 194, it was extended to England and Wales.

APPEALS.—During the occupation of Great Britain by the Romans, the final appeal was made to the emperor. In Anglo-Saxon times, the county court, and, lastly, the witenagemot, or the king in council, were courts of appeal. After the Norman conquest in 1066, there were two supreme courts,—the Exchequer court, a Norman institution, and the supreme court of justice for greater causes. The court of Exchequer was first constituted a court of appeal by 31 Edw. III. c. 12, in 1357. A second court of Exchequer, in which appeals from the King's Bench were tried, was instituted by 27 Eliz. c. 8 (1585). These are superseded by 1 Will. IV. c. 70 (July 23, 1830). Criminal appeals are ruled by 11 & 12 Vict. c. 78 (Aug. 31, 1848). Appeals from the colonial courts are regulated by the judicial committee of the privy council, constituted by 3 & 4 Will. IV. c. 41 (Aug. 14, 1833); and reorganized by 14 & 15 Vict. c. 83 (Aug. 7, 1851).

APPEALS TO ROME.—Ecclesiastical matters were at first regulated by the bishop, in his court, from which an appeal was made to the metropolitan, who might refer to the provincial synod. The appeal was then carried to the patriarch, and thence to a general council. There were no appeals to Rome during the first three centuries. The African church resisted this pretension, and the council of Milevis, in Mauritania (416), decreed that if any presumed to "appeal beyond seas (meaning Rome), he should be excluded from all communion in the African churches." The earliest case of such an appeal on record is that of Apiarius, a rebellious priest of Sicca, whom Pope Zozimus

restored to communion after he had been deposed by an African council. The French synods did not allow any appeals from their decrees to Rome for 800 years. In England the first attempt to introduce the system was made by Wilfrid, about 694; but the claim was zealously resisted. The practice was, however, introduced into this country, together with the civil and canon law, by the papal legate, Henry of Blois, bishop of Winchester, in 1151. The inconvenience of the practice soon became apparent, and the eighth article of the Constitutions of Clarendon, passed during the reign of Henry II., Jan. 25, 1164, declared that all appeals in ecclesiastical causes should be from the archdeacon to the diocesan; from the diocesan to the archbishop, and from the archbishop to the king; and that they were to go no further without the king's consent. Appeals to Rome were, however, made, and were finally abolished by 24 Hen. VIII. c. 12 (1533), and 25 Hen. VIII. c. 19 (1534). The penalty incurred for infraction of the law was a *præmunire*. These acts, repealed by 1 & 2 Phil. & Mary, c. 8 (1554), were revived by 1 Eliz. c. 1 (1559).

APPELLANTS. (*See ACCEPTANTS.*)

APPENZEL became a Swiss canton in 1513, and was the last of the original confederation consisting of thirteen. The abbey of St. Gall acquired jurisdiction over the adjoining districts in the 8th century, and this was confirmed by the emperor Adolphus of Nassau in 1292. The people rebelled against their spiritual rulers in 1411, and after a long struggle achieved their independence. It separated into two divisions, the one occupied by Protestants and the other by Roman Catholics, in 1597.

APPRAISERS.—By the Statute of Merchants, or of Acton Burnel (11 Edw. I. s. 13), Sept. 30, 1283, appraisers valuing goods at too high a rate were compelled to take them at their own valuation. The cost of the annual license for appraisers fixed by 55 Geo. III. c. 184 (July 11, 1815), at ten shillings, was by 8 & 9 Vict. c. 76, s. 1 (Aug. 4, 1845), raised to £2.

APPRENTICES (*Tumults of*).—Stow remarks, "The apprentices of London are so considerable a body, that they have sometimes made themselves formidable by insurrections and mutinies in the city, getting some thousands of them together, and pulling down houses, breaking open the gates of Newgate and other prisons, and setting the prisoners free." Their resentment was generally directed against foreign merchants and artisans for supposed interference with their trade. A general insurrection occurred on the 1st of May, 1517, and the day received the name of "Evil May-day." Much damage was done, and many lives lost, when Henry VIII. sent some troops, who quelled the riot and took 300 prisoners. Several were executed on gibbets set up in different parts of the city. A similar outbreak against the French and Dutch, in September, 1586, was crushed by the

vigilance of the authorities. Another occurred June 29, 1595; for participation in which, five apprentices were executed as traitors on Tower Hill, July 24. The apprentices also took part in the disputes between King Charles I. and the Long Parliament. One of the last tumultuous assemblages occurred April 4, 1668, when they pulled down several disorderly houses. Four of the ringleaders were afterwards executed.

APPRENTICESHIP.—Adam Smith says that “apprenticeships were altogether unknown to the ancients. The reciprocal duties of master and apprentice make a considerable article in every modern code.” The system originated with the guilds and companies of tradesmen formed in the 12th century. In an account given in the “*Liber Albus*,” of the ancient usages, proclaimed throughout London every year, in the reign of Edward I., the following article occurs: “That no apprentices shall be received for a less term than seven years, according to the ancient and established usage.” Apprenticeship is first incidentally noticed in our statute book in 12 Rich. II. c. 5 (1388). It was enacted by 7 Hen. IV. c. 17 (1406), that no person should bind his son or daughter apprentice, unless he had either in land or rent twenty shillings per annum. This was repealed by 8 Hen. VI. c. 11 (1426), in which act the custom of putting and taking apprentices is said to have existed in London “time out of mind.” By 5 Eliz. c. 4, s. 27 (1563), the parent of an apprentice was required to possess a forty-shilling freehold. Our statute book contains many laws upon the subject. Apprentices wore blue cloaks in the summer, and blue gowns in the winter, in the time of Mary and Elizabeth; but during the latter reign they indulged in such extravagance of dress that a proclamation was issued, May 21, 1552, laying down stringent regulations with respect to their apparel, and prohibiting the use of jewellery and weapons. The term of apprenticeship required by 5 Eliz. c. 4, s. 26 (1563), was seven years at the least, and this clause was repealed by 54 Geo. III. c. 96 (July 18, 1814). For apprentices in the hemp and flax manufactures in Ireland the term required was five years by 8 Anne, c. 12 (1709). It was reduced to four by 10 Geo. I. c. 2, ss. 7 & 8 (1723); and for Scotland the ordinary term is three years. A duty was first laid upon the indentures of apprentices by 8 Anne, c. 9 (1709), and it was made perpetual by 9 Anne, c. 21, s. 7 (1710). An act (14 Vict. c. 11) was passed May 20, 1851, for the better protection of apprentices, &c.

APPROPRIATION CLAUSE.—This clause in the Irish Tithe Bill occasioned several remarkable political contests. The House of Commons having, April 3, 1835, resolved itself into a committee on the church establishment of Ireland, Lord John Russell proposed that any surplus revenue, not required for the spiritual care of its members, should be applied to the education of all classes of the people. The resolution was carried

April 6. On the bringing up of the report, April 7, Lord John Russell moved another resolution affirming the principle. This was also carried, and the Peel and Wellington cabinet resigned office on the 8th. Hereupon Lord John Russell and his party acceded to power, and having failed in their efforts to induce parliament to sanction the principle for which they contended, abandoned it altogether, in their measure for the settlement of the question, in 1838.

APPROPRIATIONS.—The exact period of the introduction of this system into the Church cannot be fixed with precision, though it was doubtless about the time of the Norman conquest. The early Norman kings, for the purpose of enriching the monasteries, conferred upon them not only manors, but advowsons, glebes, and titles of parishes; so that in the space of 300 years above a third of the benefices in England were appropriated. At the dissolution of the alien priories in 1414, and of the monasteries and religious houses in 1536 and 1539, appropriations and revenues were vested in the crown. Many of the former passed by degrees to subjects, who thus became *appropriators*, or, as they were more frequently termed, *lay-appropriators*. Previous to the reign of Henry VIII. no right or precedent existed for a layman to be an appropriator.

APRICOT.—A Persian or Armenian fruit, introduced into Italy by the Romans. Authorities differ respecting the date of its introduction into England, some attributing it to the time of the Roman occupation, others to the year 1524; others to 1562; and others to 1578.

AQUARIANS, or ENCRATITES, Christians in the early Church, who used water instead of wine in the Eucharist. They appeared in various places, and under different designations. Bingham speaks of some Aquarians who would not take wine in their morning assemblies, lest the smell should discover them to the heathen. They are first mentioned in the 2nd century.

AQUAVIVARIUM, or AQUARIUM.—The invention of the aquavivarium for collections of plants and animals in water is of recent date. In June, 1849, Mr. Ward stated at the meeting of the British Association at Oxford, that he had succeeded in growing sea-weeds in sea-water both natural and artificially made. Mr. R. Warington read a paper before the Chemical Society, in March, 1850, giving an account of the manner in which he had grown plants and kept living animals in jars. Several persons pursued experiments of the kind about the same period. A small collection of zoophytes and annelides, brought to London in the autumn of 1852 by Mr. Gosse, was soon afterwards transferred to one of the tanks in the fish-house at the Zoological Gardens, Regent's Park. It was opened in the spring of 1853, and was the first public aquavivarium in London. It is also called aquarium. Water-aviary, and water-show,

have been suggested as names more adapted to the analogy of our language.

AQUATINTA ENGRAVING was invented by a German artist, named *Le Prince*, born at Metz, in 1723.

AQUEDUCTS.—These structures for the purpose of conveying water to large cities, were erected at a very early date. Pocock mentions an aqueduct from the pools of Bethlehem to Jerusalem, built by King Solomon, about B.C. 1000; and Herodotus speaks of another erected at Samos. The Romans constructed them on an extended scale. The first at Rome is said to have been erected by Appius Claudius, B.C. 312. Others were built by Dentatus, B.C. 273; by Agrippa, B.C. 34; by Caligula, and completed by Claudius, A.D. 51; besides several of less note, and many in the provinces. Sixtus V. immortalized his name by the colossal aqueducts which he caused to be erected. Prescott and Humboldt notice the Peruvian aqueducts. The popes erected aqueducts in the Middle Ages. The Maintenon aqueduct, near Versailles, constructed by Louis XIV. in 1684, is one of the most magnificent in Europe. The aqueducts erected in India by the British; the Croton aqueduct at New York, completed in 1842; and the works at Edinburgh, are the most remarkable constructed of late years.

AQUILEIA (Italy).—This town was founded by the Romans B.C. 181. At a very early period it was made a bishopric. It became a metropolitan see in the 4th century, and a patriarchate in the 6th. Maximin besieged Aquileia A.D. 238, during his contest with the senate, and under its walls he was, with his son, assassinated by his own soldiers. In 452 it was stormed and destroyed by the Huns under Attila. Its ruins could scarcely be discovered, yet it remained the residence of a bishop until the invasion of the Lombards under Alboin (568—570), when the patriarch removed to Grado, denominated from this circumstance New Aquileia. Richard I. was shipwrecked near Aquileia, in 1192. The authority of the patriarchs lasted until 1758, when the patriarchate was abolished by the pope, and the diocese divided into two sees,—those of Udine and Gorizia. Several councils were held here.

AQUITAINE (France), the ancient Aquitania, one of the four provinces into which Augustus divided Gaul, B.C. 27. It was not completely subjected to the Romans until B.C. 28. The Visigoths, under Wallia, conquered it in the year 419. It submitted to Clovis and was united to his kingdom in 508.

A.D.

- 637. Aquitaine made an hereditary duchy.
- 718. Invaded by the Saracens.
- 725. They subdue a large portion.
- 732. Charles Martel repels the Saracens.
- 735. Eudes, duke of Aquitaine, dies, and is succeeded by Hunald.
- 745. Hunald abdicates in favour of his son Waifar.
- 768. Waifar defeated and slain by Pepin, who reunites Aquitaine to France.

A.D.

- 769. Hunald, who endeavoured to regain the duchy on the death of his son Waifar, is defeated, and made prisoner, by Charlemagne.
- 781. Louis, son of Charlemagne, crowned king of Aquitaine, by Pope Adrian I.
- 817. Louis I. bestows Aquitaine upon his son Pepin.
- 838. Pepin dies, and the empress Judith claims Aquitaine for her son Charles.
- 843. Treaty of Verdun, by which the rights of Pepin's sons are sacrificed.
- 846—849. Danish invasions.
- 867. Aquitaine reunited to France by Louis the Stammerer.
- 880. Rainulfe II. attempts to re-erect Aquitaine into a kingdom, but is prevented by Eudes, king of France.
- 955. Given by Lothaire to Hugh, count of Paris.
- 1137. Death of William X., duke of Aquitaine, when his duchy passes to his daughter Eleanor, afterwards queen of Louis VII. of France.
- 1151. Henry of Anjou, afterwards Henry II. of England, obtains Aquitaine by his marriage with Eleanor, the divorced wife of Louis VII.
- 1169. Aquitaine devolves upon Richard, eldest son of Henry II. of England.
- 1204. Philip Augustus reunites Aquitaine to France, which causes a long war with England.
- 1259. Aquitaine restored to the English under Henry III., since which period it has been called "Guienne." (See *GUIENNE*.)

ARABIA (Asia).—The south-western peninsula of Asia, has, both in ancient and modern times, been known under this designation, though the term is sometimes applied to all the countries frequented by the tribes of wandering Arabs. The name Arabia does not, however, appear to have been used by the Hebrews until after the time of Solomon. Ptolemy is said to have been the first to institute the three divisions of Arabia Petraea, Felix, and Deserta, *i. e.*, the Rocky, the Happy or Fruitful, and the Desert or Sandy. The Arabs believed themselves to be descended from Joktan, the son of Eber (Gen. x. 26—30), and from Ishmael, the son of Abraham by his bondwoman Hagar, born B.C. 1910 (Gen. xvi. 15, 16); the posterity of the former, by way of distinction, calling themselves pure Arabs. The direct, as well as the indirect, testimony of Scripture proves the Arabs to be descended from Ishmael. In the time of Moses, about B.C. 1530, the Arabians had grown up into "twelve princes according to their nations," and "they dwelt from Havilah unto Shur, that is before Egypt, as thou goest toward Assyria" (Gen. xxv. 16, 18, &c.). Though assailed by the Egyptians, the Assyrians, the Medes and Persians, and other ancient nations, the Arabians were never subdued. Herodotus, the first, after the inspired writers, who notices Arabia, states (iii. 88) that it was never subjected to the Persian empire. Little is known of the general history of Arabia previous to the time of Mohammed, the accounts given by the Arabian writers being altogether unworthy of credit.

B.C.

- 24. Augustus sends an expedition into Arabia Felix. It is unsuccessful.

A.D.

105. A portion of Arabia formed into a Roman province.
 195. Septimius Severus obtains additional territory in Arabia.
 570. Mohammed born at Mecca.
 622. The Hegira.
 632. Abu Beker succeeds Mohammed, taking the title of "Caliph."
 636. Battle of Yermouk, by which the Saracens totally destroy the Roman power in Syria.
 695. Abdalmelik commences the Arabian coinage.
 754. Al Mansur introduces learning into Arabia.
 786. Haroun al Rashid's caliphate commences.
 1504. The king of Portugal assumes the title, but does not gain the power, of "Lord of the Navigation, Conquest, and Commerce of Arabia."
 1518. Conquered by the Ottoman, Selim I.
 1538. Soliman II. completes the conquest.

ARABIANS, or ARABICI.—This sect arose in Arabia A.D. 207. They held that the soul dies with the body, with which it will rise again at the resurrection. Eusebius states that at a council, called the "council of Arabia," held in 247 or 248, to discuss the question, Origen argued so eloquently that he induced these heretics to renounce their errors.

ARABIC NUMERALS.—According to some authorities, Gerbert, afterwards Pope Sylvester II., learned the decimal system of notation from the Moors in Spain, and introduced it into France about the end of the 10th century. Another account is, that Leonard Fibonnacci of Pisa introduced it in 1220, in a work entitled "Liber Abbaci," &c.; and some have supposed that the Alfonsine Tables, constructed chiefly by Moors at the court of Alfonso, must have been the first document in which the system appeared. It is certain that before the 12th century, and most probably as early as the 9th, this system had been in the hands of the Persians and Arabs, who ascribe it to the Hindoos, and call it by a name which signifies 'Hindoo science.' The Hindoos themselves have long used it, and it is easy to trace the manner in which our numerical symbols have been derived from those of the Sanscrit. The steps by which the new notation made its way through Europe cannot be very clearly defined. Montfaucon found it in an Italian manuscript which was finished in 1317; and it has been traced in many manuscripts of the works of authors a century older; it was, however, usual to substitute the new figures for the old in recopying. In the library of Corpus Christi College, Cambridge, is a catalogue of eclipses from 1300 to 1348, to which Arabic numerals are subjoined. Inscriptions with graven dates in these numerals have been given by Wallis and others as old as 1330; but, upon examination, reason has been found to suspect that 5 has been mistaken for 3. There does not seem to be evidence of any general use of the Arabic numerals before the invention of printing; and even the works of Caxton do not contain them, except in a woodcut. Merchants continued down to

the 16th century to keep their accounts in Roman figures.

ARAGON (Spain) passed in the 16th century before Christ, under the rule of the Carthaginians, who rebuilt Gades, now Cadiz, about B.C. 350. The Romans expelled the Carthaginians between the years B.C. 210—200, and in the redistribution of the peninsula into three provinces, made by Augustus, B.C. 27, Aragon formed part of Tarraconensis. It was overrun by the Visigoths at the commencement of the 5th century. They established their power, and were in turn overwhelmed by the Saracens, who landed in the peninsula A.D. 711, and had subdued the greater portion by 713. Fierce struggles followed between the infidel invaders and the Christian inhabitants. The latter succeeded in maintaining small but independent states, and at the death of Sancho III., the sovereign of Christian Spain, in 1035, his dominions were divided amongst his four sons, and Aragon was formed into a kingdom, Ramiro I., Sancho's youngest son, being its first king.

A.D.

1096. Battle of Alcoraz, which destroys the Mohammedan power between the Ebro, the Cinca, and the Pyrenees.
 1134. Alfonso I. seeks to reduce the Moorish town of Fraga, but is defeated, and, according to many authorities, slain.
 1137. Ramiro II. abdicates the throne in favour of his daughter Petronilla, and retires to a monastery.
 1203. Pedro II. engages that Aragon shall for ever remain a fief of the Holy See.
 1213. Accession of James I.
 1246. The *Fueros*, or old laws of Aragon, are digested into a code by Vital, bishop of Huesca, and confirmed by James I.
 1283. Pope Martin IV. excommunicates the Aragonese, and endeavours to transfer the kingdom from Pedro III. to Charles of Valois.
 1291. Withdrawal of the papal ban, and renunciation by Charles of Valois of all claim to Aragon.
 1347. Confederation against Pedro IV. to insure the adoption of the Salic law and confirmation of privileges.
 1359. Pope Innocent VI. seeks to restore peace between Castile and Aragon.
 1412. Ferdinand I. is elected king of Aragon.
 1458. Death of Alfonso V., surnamed the Wise.
 1463. The Aragonese nobles invite Pedro, infante of Portugal, to take the throne from John II.
 1479. United to Castile under Ferdinand and Isabella.

SOVEREIGNS OF ARAGON.

| 1285. Alfonso III. | United to Castile. |

ARAGUA (Battle).—During the revolutionary war in South America, a sanguinary battle was fought in the valley of Aragua,

June 18, 1814, when the royalists obtained a complete victory, and entered the city of Caracas, on the 7th of July. This is erroneously styled the Battle of *Arazua*.

ARANE, or **ARNEE** (Battle), between the French and Indians, and the English led by Clive, was fought Dec. 3, 1751. The latter were victorious.

ARANJUEZ (Spain).—the ancient *Ara Jovis*, is celebrated for its palace commenced by Philip II. A treaty of alliance was concluded at Aranjuez, May 1, 1745, between Genoa, France, Spain, and Naples, for the prosecution of the war against Sardinia and the Germans. Another treaty between Maria Theresa and the kings of Spain and Sardinia, for the maintenance of the peace of Italy, was concluded at Aranjuez June 14, 1752, the preliminaries having been signed at Madrid on the 14th of April. By a treaty signed here April 12, 1772, France and Spain agreed to unite in opposing the English in America. A convention between Great Britain and Spain was signed at Aranjuez May 25, 1793, by which the former agreed not to make peace with France till the Spaniards had obtained full restitution for all places and territories captured by the French from the commencement of the revolutionary war. An insurrection occurred here March 18, 1808, which led to the abdication of Charles IV. in favour of his son Ferdinand, on the 19th.

ARBALIST, or **CROSS-BOW**, said by some writers to be of Sicilian, and by others of Cretan invention. The Crusaders are supposed to have introduced the cross-bow into France, where it was used in the commencement of the reign of Louis VI. (1108—1142). Some historians allege that the arbalist was used in William the Conqueror's army at the battle of Hastings, Oct. 14, 1066. Gibbon speaks of it as employed at the battle of *Dorylæum*, July 4, 1097. The French had arbalists at Cressy, Aug. 25, 1346. Their use was prohibited by the second council of Lateran, or the tenth General Council, in 1139. Richard I. introduced them into the English army, and he was slain by an arrow from a weapon of this kind, March 26, 1199. Cross-bows mounted on wheels, and called spin-gardas, which shot not only darts or quarrels, but also stones and lighted combustibles, were used at the battle of Mons-en-Puella in 1304; and similar engines formed part of the armory of Dover Castle in 1344. The use of the cross-bow in the English army ceased in 1515, but it continued to be employed as a weapon of the chase for many years.

ARBELA (Battle).—Near this town, now called *Arbil*, Alexander the Great gained a decisive victory over Darius, October 1, B.C. 331. The latter was slain and the Persian empire subverted. The actual contest occurred near the village of Gangamela, about 30 miles from Arbela, where the pursuit terminated.

ARBITRATION.—Courts of arbitration or conciliation, established in Denmark in 1795,

rapidly increased in numbers, and were soon after introduced into Norway. Napoleon I. in 1806, issued a decree, by which numerous *Conseils de Prud'hommes* were established in the various departments of France, though they were not adopted in Paris until 1844. Arbitration was recognized by the law of England, by 9 & 10 Will. III. c. 15 (1698), which introduced some important regulations on this subject, making corrupt awards null and void. The power of arbitrators was greatly extended by 3 & 4 Will. IV. c. 42, ss. 39, 40, 41 (Aug. 14, 1833), the award being made a rule of court. By the Common Law Procedure Act, 17 & 18 Vict. c. 125, s. 3 (Aug. 12, 1854), the judges of the superior courts have power, in certain cases, to order compulsory arbitration. The House of Commons appointed a select committee (Feb. 19, 1856) to inquire into the expediency of establishing Arbitration Courts on a more extended basis, and a report in favour of the principle was issued.

ARCADIA (Peloponnesus), designated from its mountainous character, "the Switzerland of Greece." The Arcadians claimed to be the earliest inhabitants of Greece, calling themselves *Proseleni*, i. e. "before the moon." Pan was their tutelary deity, and they delighted in music. "They were scarcely," says a writer in the "*Encyclopædia Metropolitana*," "an Hellenic race; hence, we are not surprised that they retained their pastoral habits and rugged manners." Herodotus (viii. 73) admits that they were indigenous, and Pausanias gives a long list of their early kings, descendants of Arcas, from whom, according to some accounts, the country received its name. Homer mentions Agapenor, who repaired to the siege of Troy with his Arcadians. They are said to have sent colonies to Italy before that time. Clinton says the Arcadians were an aboriginal tribe of the Pelagic race. The first well-established fact with respect to the Arcadians, is that they maintained their independence when the Dorians invaded the Peloponnesus, B.C. 1104. The following is a summary of the events, legendary and authentic, given by historians:—

B.C.

1710. A colony of Arcadians led into Italy by *Enotrus*.
1521. Pelagus king of Arcadia.
1514. Arcas king, from whom the country takes its name.
1193. Agapenor leads the Arcadians to the Trojan war.
1174. Ephitus king.
1102. The Arcadian women defeat the Lacedæmonians who had invaded their country.
848. War between Sparta and Arcadia.
715. Aristocrates I., of Arcadia, is put to death for having offered violence to the priestess of Diana.
681. Aristocrates II. stoned to death for treason, and Arcadia becomes a republic.
370. Agesilaus invades Arcadia.
367. The Arcadians and their allies defeated by Sparta.
365. War between Arcadia and Elis.
364. Arcadia invaded by Archidamus. The Arcadians seize the Olympian treasury.

After the death of Alexander the Great, several of the Arcadian cities join the Achæan League, and the country ultimately falls under the Roman yoke.

ARCH.—Layard discovered at Nimroud a vaulted chamber, a proof that the ancient Assyrians were acquainted with the principle of the arch. Many authorities have asserted, with great confidence, that neither the ancient Assyrians nor the ancient Egyptians employed the arch. Wilkinson shows that the arch in brick and stone was known to the ancient Egyptians, remains of the former, bearing date B.C. 1540, and of the latter B.C. 600, having been discovered at Memphis and Thebes. The Chinese are said to have constructed arches on a very extensive scale, at an early period. They were employed by the Assyrians, but the Greeks did not use them. The Cloaca Maxima, the most ancient Roman arch, was built in the reign of Tarquinius Priscus, about B.C. 600. The semicircular arch was one of the characteristics of the architecture of the early Britons. The pointed arch formed part of a mosque at Jerusalem, rebuilt A.D. 780; of the Nilometer at Cairo, erected in 848; and existed in other Saracenic buildings of the 10th century. In Christian edifices it appears in the 12th century.

ARCHANGEL (Russia).—Founded in 1584, and named after the convent of St. Michael the Archangel. The passage by sea was discovered by Richard Chancellor, in 1553. Archangel was for many years the only port in Russia. An extensive fire occurred here on Oct. 17, 1762, and another June 26, 1793, which destroyed the cathedral and about three thousand buildings. Archangel was blockaded by the English fleet in 1854.

ARCHBISHOP.—Burn (Ecclesiastical Law, vol. i. 194) says, "The title of archbishop was one of honour, but brought with it no authority, and was at first very rarely bestowed, and only on the most distinguished bishops. The name is not to be met with during the first three centuries. It occurs for the first time in the 4th century, and St. Athanasius appears to have been among the earliest who were distinguished by this title (326–373). In the 5th century it was conferred on the bishops of Rome, Antioch, Alexandria, Constantinople, Jerusalem, Ephesus, and Thessalonica." It gradually grew more common, and was bestowed upon all metropolitans. The ancient Britons had at least one archiepiscopal see, that of Caerleon, before Augustine arrived. He was made archbishop of Canterbury by Ethelbert in 598, and he fixed his seat there in 602. Paulinus, appointed by Gregory about 622, was the first archbishop of York. The archbishop of Canterbury was primate of Ireland, as well as of England, until 1152, and York had metropolitan jurisdiction over all bishops of Scotland until 1466.

ARCHDEACON.—Towards the end of the 3rd century, one of the deacons, whose duty it was to attend on the bishop in church

affairs, was selected from the rest and made an archdeacon. Frankish dioceses are said to have been divided into archdeacons in the 8th century. Wilfred is the first English archdeacon whose name is found in any document, and he became archbishop of Canterbury in 806. In the early times archdeacons had no jurisdiction in this country. It was not until after the Norman conquest that the English dioceses were divided into archdeacons. From the "Valor Ecclesiasticus" of Henry VIII. it appears the number of English archdeacons amounted to fifty-four, but by 6 & 7 Will. IV. c. 77, passed Aug. 13, 1836, and subsequent acts, the number has been increased.

ARCHERY.—Bows and arrows were used by the Israelites (Gen. xxi. 20, 1 Sam. xxxi. 3, and 2 Sam. i. 18), and from the representations of battles on the walls of Medinet-Abon, at Thebes, it is evident that the ancient Egyptians employed these weapons. Procopius states that they were in high repute amongst the ancient Persians; and Homer not only speaks of skilful archers, but describes the attempts made by the suitors of Penelope to bend the bow of the absent Ulysses. Archers composed a portion of the light-armed troops amongst the Greeks and Romans. Pyrrhus employed 2,000 archers at the battle of Pandosia, near Heracleia, B.C. 280. The Romans frequently retained the Cretan bowmen as mercenaries. Bows and arrows were used by the early inhabitants of Britain, and Asser relates that Alfred was preparing such instruments when he offended the cowherd's wife, by allowing her cakes to burn, A.D. 878. The cross-bow is said to have been used by the Normans at the battle of Hastings, was common in the armies of Henry III., and the long-bow was in general use in England in the time of Edward II. The skill of the English archers is a favourite theme with the old chroniclers, and English bows and arrows were in great request. In 1363, Edward III. enjoined the practice of archery on Sundays and festivals, and the same was done by Richard II. In 1405, a statute was passed against persons using bad materials in the manufacture of bows and arrows. At Cressy (1346) the English archers proved more expert than the Genoese crossbow-men. Poitiers (1356) and Agincourt (1415) were won by this weapon. Edward IV., by statutes passed in 1478 and 1483, encouraged archery in Ireland. The archers of the king's guard, raised by Edward III. in 1356, consisted of 120 men selected from the mounted corps of archers. Henry VII., in 1485, instituted the yeomen of the guard, who were then all archers. James I., in 1610, appointed a commission to stop the inclosure of the ground used for archery practice. Charles II. reviewed the Finsbury archers in 1682; and so late as 1753, targets for archery practice were set up in Finsbury Fields.

ARCHES (Court of).—The court of appeal for all the inferior ecclesiastical courts within the province of Canterbury. It received

this name from having been held formerly in the church of St. Mary-le-Bow (Sancta Maria de Arcubus). It was removed thence (1567) to the Common Hall of Doctors' Commons, where it is still held. The appeal from this court to the Court of Delegates, or the king in Chancery, as constituted by 25 Hen. VIII. c. 19 (1534), was transferred by 3 & 4 Will. IV. c. 9 (1832), to the king in council.

ARCHITECTURE.—This science, as distinguished from the art of building to satisfy man's personal wants, was known to the Egyptians and to the Jews at a very early age. Sesostris, about B.C. 1489, caused temples to be erected: some of the stones employed were of immense size. The pyramids were built B.C. 1500. Solomon's temple was commenced B.C. 1014. The science, which was cultivated by the Assyrians, Phœnicians, and Persians, is supposed to have passed from the Egyptians to the Greeks, amongst whom it flourished B.C. 552—442, and from them to modern nations.

ARCHONS.—On the abolition of kingly government in Athens, at the death of Codrus, B.C. 1069 or B.C. 1045, the chief authority was vested in officers styled archons, appointed for life. Twelve, called the Medontidæ, of the family of Codrus, succeeded, when (B.C. 752) the tenure of office was limited to ten years. Seven archons were appointed for this term, and (B.C. 684) the office was made elective and to be held for one year only.

ARCIS-SUR-AUBE (Battle).—Fought March 21, 1814, between the allies and the French army commanded by Napoleon I. The latter, after a severe struggle, retreated to Vitry.

ARCOLA (Battle).—At this village, fifteen miles from Verona, on the Alpone, an affluent of the Adige, Bonaparte, in his fourth Italian campaign, defeated the Austrians under Alvinzi in a battle extending over three days, the 15th, 16th, and 17th of November, 1796.

ARCOT (Hindustan), the capital of the northern district of Arcot, in the presidency of Madras, was founded in 1716. Clive captured it Aug. 31, 1751. He was assailed by a strong native and French force Sept. 23, 1751; from which day till the 14th of November, when the final assault was delivered and repulsed, he defended the place with extraordinary heroism. Having fallen into the hands of the French, Oct. 4, 1758, it was retaken by Coote, Feb. 10, 1760. Hyder Ali stormed it Oct. 31, 1780, but did not hold it long. Arcot came into the possession of the East-India Company in 1801.

ARCTIC CIRCLE.—Numerous attempts, with widely different objects, have been made by the mariners of various countries to penetrate the regions of frost and snow around the North Pole. The Scandinavians in the 9th, 10th, and 11th centuries, and the Venetian, Spanish, and Portuguese navigators at a later period, prosecuted their researches in this direction.

- A.D.
 860. Iceland discovered by the Scandinavians.
 874. The Scandinavians colonize Iceland.
 982. Eric the Red discovers Greenland.
 986. Eric forms a settlement at Greenland, and Bjarni is cast away on the American coast.
 1001. The Scandinavians extend their discoveries in America, where they afterwards form settlements.
 1498. Sebastian Cabot reaches the Arctic regions.
 1517. His second voyage in the same direction.
 1527. Robert Thorne, a merchant of Bristol, writes to Henry VIII. to induce him to sanction a polar expedition; and two ships, the *Sampson* and the *Mary of Guildford*, are sent out.
 1553. Sir Hugh Willoughby discovers Nova Zembla. He returns, and sails to Lapland, where he and his crew perished from hunger, in January, 1554.
 1576. Frobisher starts on his first voyage, June 7th.
 1580. Pet and Jackman sail in search of a north-eastern passage, but are compelled by the ice to return.
 1585. John Davis leaves Dartmouth on his first voyage, June 7th, and after making several discoveries on the north-eastern coast of America, returns to England Sept. 30, 1586.
 1586. Davis's second voyage.
 1587. Davis's third voyage.
 1594. The Dutch send an expedition to seek a northern passage, under William Barentsz.
 1595. Barentsz's second voyage.
 1595. Barentsz's third voyage.
 1602. George Waymouth sails in a fruitless search of the north-west passage.
 1607. Hudson starts on his first voyage, May 1st.
 1608. Hudson's second voyage.
 1609. Hudson's third voyage.
 1610. Hudson starts on his fourth voyage, which ends in the mutiny of his crew, who leave him to perish of cold and hunger.
 1615. Bylot's voyage, in which Baffin acted as mate.
 1616. Bylot and Baffin discover Baffin's Bay.
 1631. James's disastrous voyage.
 1676. Captain Wood sails in search of a north-east passage.
 1728. Behring leaves Kamtschatka on his first voyage, during which he explores Behring's Straits.
 1729. Behring's second voyage.
 1741. Behring's third voyage, and death.
 1743. The English government offer a reward of £20,000 to any person discovering a north-west passage by Hudson's Strait.
 1773. Phipps and Lutwidge sail. Young Horatio Nelson accompanies the expedition.
 1776. Cook and Clerke's voyage.

The following list of the Arctic expeditions sent out during the present century is extracted from Simmonds's "Arctic Regions:—"

- A.D.
 1818. John Ross, *Isabella* and *Alexander*.
 1818. Buchan and Franklin, *Dorothea* and *Trent*.
 1819-21. Franklin, first land expedition.
 1819-20. Parry, *Hecla* and *Griper*.
 1821-23. Parry, *Fury* and *Hecla*.
 1824. Lyon, *Griper*.
 1824-25. Parry, *Hecla* and *Fury*.
 1825-27. Franklin, second land expedition.
 1826-28. Buchan, *Dioscorus*.
 1829-33. John Ross, *Victory*.
 1833-35. Back, land expedition.
 1836-37. Back, *Terror*.
 1836-39. Dean and Simpson, boat expedition.
 1846-47. Rae, boat expedition.
 1845-46. Franklin, *Erebus* and *Terror*.
 1848-49. James Ross, *Enterprise* and *Investigator*.
 1848-49. Richardson, boat expedition.
 1848-52. Moore, *Plover*.
 1849-51. Pullen, boat expedition.
 1849-50. Hooper, boat expedition.

A.D.

- 1849-50. Saunders, *North Star*.
 1850. Forsyth, *Prince Albert*.
 1850-55. Collinson, *Enterprise*.
 1850-54. McClure, *Investigator*.
 1850-51. Austin, *Resolute, Assistance, Intrepid, and Pioneer*.
 1850-51. John Ross, *Felix*.
 1850-51. Penny, *Lady Franklin and Sophia*.
 1850-51. De Haven and Kane, *Advance and Rescue*.
 1851-52. Kennedy (Bellet), *Prince Albert*.
 1851-54. Rae, land expedition.
 1852-54. Maguire, *Plover*.
 1852-54. Belcher, *Assistance and Pioneer*.
 1852-54. Kellett, *Resolute and Intrepid*.
 1852-54. Pullen, *North Star*.
 1853-55. Kane, *Advance*.
 1857-59. McClintock, *Fox*.

ARDAGH.—This see, one of the earliest established in Ireland, is said to have been founded by St. Patrick, who appointed his nephew, St. Mell or Mael, first bishop in 454. St. Mell is described as abbot and bishop. He died in 488. Ardagh was united to Kilmore Feb. 24, 1660, but was separated from it for a short time Sept. 8, 1692. In 1742 it was severed from Kilmore and united to Tuam. By the Church Temporalities Act, 3 & 4 Will. IV. c. 37 (Aug. 14, 1833), other arrangements were made by which the bishopric of Ardagh was, in 1839, separated from Tuam and joined to Kilmore. In 1841 Kilmore, Elphin, and Ardagh formed one bishopric.

ARDEE (Ireland).—This town was sacked by Edward Bruce in 1315. It surrendered to the rebels during the insurrection of October, 1641, when it was delivered up to pillage.

ARDFERT.—This Irish bishopric, called in ancient records the bishopric of Kerry, was founded in the 5th century. Edward Synge, bishop of Limerick in 1660, held the sees of Ardfert and Aghadoe *in commendam*; and they were both united to Limerick in 1663.

ARDOCH (Battle).—Fought between the Romans, led by Agricola, and the Caledonians under Galgacus, on a moor, at the foot of the Grampians, A.D. 84 or 85. The latter were routed with great slaughter.

ARDRES (France).—The interview between Henry VIII., of England, and Francis I., of France, in the "Field of the Cloth of Gold," took place near this town, June 7, 1520. The treaty for the meeting had been concluded Oct. 14, 1518. Ardres was captured by the Spaniards in 1596.

AROPAGUS (Court of).—This institution is attributed to Cecrops, the founder of Athens, B.C. 1556. It is known to have existed before the time of Solon, B.C. 594. He extended its jurisdiction. The guardianship of the laws and the power of enforcing them was intrusted by Solon to this court. Religion and the education of youth were placed under its control. Its constitution was preserved inviolate until Pericles, B.C. 461, caused himself to be elected without having previously received the appointment of archon. St. Paul was brought before this court A.D. 51 (Acts, xvii. 19, &c.).

ARGAUM (Battle).—Wellington defeated the Mahratta chiefs at this village, in Hyderabad, Nov. 29, 1803.

ARGENTARIA (Battle).—Argentaria, now Colmar, in Alsace, was the scene of Gratian's signal victory over the Alemanni, in May, A.D. 378. Gibbon says, "It secured the peace of Gaul and asserted the honour of the Roman arms."

ARGENTUS CODEX, or SILVER BOOK.—This ancient illuminated copy of the gospels, written on vellum, and called Argenteus from its silver letters, is supposed to be a fragment of the Mæso-Gothic translation of the Bible, made about A.D. 360, by Ulphilas, whom Gibbon terms the bishop and apostle of the Goths. Afraid of exciting the fierce and warlike passions of his people, he suppressed the four books of Kings. The first fragment was discovered in 1587, in the library of the Benedictine abbey of Werden, in Westphalia, whence it was removed to Prague; and on the capture of that city in 1648, was sent as a present to Queen Christina, of Sweden. Other portions of the Mæso-Gothic Bible were found in the library at Wolfenbüttel, in that of Mai, at Rome, and in other places; and a complete edition was published at Leipsic in 1836-47. The manuscript was ultimately presented to the university of Upsal.

ARGENTINE CONFEDERATION or REPUBLIC (S. America).—These provinces threw off the yoke of Spain in 1810, remaining in a very unsettled state until 1816, when a republic was first established. The basis of the Argentine Confederation was, however, laid in 1834, Buenos Ayres and three other states forming a confederacy, which was afterwards joined by other states to the number of thirteen:—

Buenos Ayres.	Salta.
Catamarca.	San Juan.
Cordova.	San Luis.
Corrientes.	Santa Fé.
Entre Rios.	Santiago.
La Rioja.	Tucuman.
Mendoza.	

Buenos Ayres separated from the confederacy in 1853, and other secessions have since occurred. (*See LA PLATA.*)

ARGINUSÆ (Sea Fight).—The Athenian fleet defeated the Spartan armament under Callicratidas, among the islands of Arginusæ, near Lesbos, B.C. 406.

ARGONAUTIC EXPEDITION.—This voyage, the first naval expedition on record, was, according to the traditional account, conducted by Jason, son of Æson, king of Thessaly, "to bring back the golden fleece of the ram, which had carried away Phryxus and Hella." The celebrated *Argo* was built, which after various adventures reached Æa, the capital of Colchis, B.C. 1263, or according to Newton, B.C. 937. Æetes, king of Colchis, promised Jason the fleece on certain conditions difficult of accomplishment. These, by the magical aid of Medea, were performed, and the enterprise ultimately achieved.

Grote (vol. i. 333) remarks on this fable:—"Not only are we unable to assign the date, or identify the crew, or decipher the log-book of the *Argo*, but we have no means of settling even the preliminary question, whether the voyage be matter of fact badly reported, or legend from the beginning."

ARGONAUTS OF ST. NICHOLAS, a military order of knights established by Charles III. of Naples, in 1382. From their collar of shells, inclosed in a silver crescent, with the motto "*Non credo tempori*," they were called knights of the shell.

ARGOS (Peloponnesus).—The origin of this, the earliest Grecian state, is involved in obscurity. Various writers represent it as having been founded by Inachus, by his son Phoroneus, and by his grandson Argus. The Achæans, having expelled the original inhabitants, gave place in turn to the Dorians. It was a powerful state, and became the head of a league of Doric cities, until Sparta obtained the ascendancy, B.C. 495. The following are the chief points, legendary and authentic, in its history:—

- B.C.
- 1856. Founded by Inachus.
- 1753. Phoroneus founds it, according to other authorities.
- 1711. Called Argos; after a king of that name, the fourth of the Inachideæ.
- 1500. Danaus, an Egyptian, enters Argos.
- 1475. Danaus deposes and succeeds Gelanor, king of Argos.
- 1457. Perseus of Argos founds Mycenæ.
- 1192. Agamemnon king of Argos during the Trojan war.
- 1104. The Heraclidæ overrun Argos.
- 783. Pheidon of Argos endeavours to take Corinth.
- 748. Pheidon establishes the supremacy of Argos, and celebrates the 8th Olympic games.
- 747. Conflict with Sparta.
- 669. The Argives defeat the Spartans near Hysiaæ.
- 547. The Argives endeavour to regain Thyrea from the Spartans, but are defeated.
- 514. Argos fines Sicyon and Ægina 500 talents each for having furnished Sparta with ships to operate against her territory.
- 496. War with Sparta.
- 495. Spartans victorious.
- 471. Themistocles, banished from Athens, retires to Argos.
- 468. The Argives destroy Mycenæ.
- 421. Argos forms a league against Sparta.
- 420. Makes a treaty with Athens.
- 418. Defeat of the confederates at Mantinea.
- 417. Argos concludes peace with Sparta.
- 395. Argos joins Athens, Corinth, and Thebes against Sparta.
- 229. Argos joins the Achæan League.

ARGYLE (Scotland).—This bishopric was founded by Innocent III., who separated it from the see of Dunkeld about the year 1200, when Ewaldus became first bishop. Lismore was made the residence of the bishops; hence they were sometimes called bishops of Lismore. Alexander II. made several grants to the new see, the last of them bearing date July 8, 1249. It was suppressed in 1688, but in 1847 it was restored under the title of Argyle and the Isles.

ARIANISM.—The denial of the divinity of Christ, the distinctive feature of Arianism, first appeared in the heresies of the Ebionites, of Artemon, and of Theodotus. Robert-

son considers that although Alexandria was the birthplace of Arianism, its origin may be traced to the other great churches of the East. Arius, a presbyter of Alexandria, from whom the heresy is named, appears to have first boldly maintained the opinion about 319. His views were condemned by Alexander, and he was, with his followers, excommunicated in 321. Constantine took up the matter, and summoned a general council at Nicæa, to settle the controversy. The emperor presided, and the council sat from June 19 to August 25, 325, when Arius was excommunicated and banished into Illyria, and his heresy was condemned. Arius, however, managed to obtain the favour of Constantine, who gave him a rescript commanding his readmission into the Church. On the eve of the day on which it was to take place, Arius, who was parading the streets with his adherents, was compelled to withdraw for a few moments, and he was afterwards found dead (336). Arianism did not long remain a single sect. There were the Anomæans or pure Arians, the Semi-Arians, and the Acacians, during the lifetime of Constantine; and these soon separated into other parties. Theodosius issued edicts against the Arians (381—395). When extirpated at Constantinople and the civilized portions of the empire, the heresy spread amongst the Goths and other barbarian nations.

ARIKERA, OR ARKARY (Battle).—Lord Cornwallis completely routed Tippoo's army at this place, about nine miles from Seringapatam, May 14, 1791.

ARIMINIUM (Italy).—Conquered by the Romans, and made a Roman colony, B.C. 268. It became important as a military post. The Via Flaminia, from this city to Rome, was opened B.C. 221; and the Via Æmilia, to Placentia, B.C. 187. Caesar took Ariminum B.C. 48. (See RIMINI.)

ARITHMETIC.—Computation by means of counters, the earliest form of this science, was practised by the Egyptians. The Chinese made use of the schwan-pan, or abacus, at a very early period. Certain letters of the alphabet, divided and arranged according to a particular method, preceded the use of numerals. (See ARABIC NUMERALS.) Decimal notation arose from the facility of counting on the fingers, and was introduced into Europe in the 13th century. Pococke's treatise on arithmetic in the "Encyclopædia Metropolitana" affords the fullest information on the subject.

ARKANSAS (U. States), was colonized by the French in 1685. It was ceded to Spain by France by the treaty of Paris, Feb. 10, 1763, and restored to France by Spain in 1800. The United States government purchased it from France in 1803. It was erected into a separate territory in 1819, having previously formed part of Louisiana, and was admitted into the Union in 1836.

ARKLOW (Battle).—A small body of the royal troops defeated the Irish rebels, 27,000 in number, led by a priest named Michael

Murphy, near Arklow Bridge, on the 10th of June, 1798.

ARLES (France), **ARELATE**, or **ARELAS**, fell under the Roman yoke B.C. 123, and became a Roman colony in the time of Augustus. It was pillaged A.D. 270, and restored and enlarged by Constantine; hence it was sometimes called *Constantia*. His son, afterwards Constantine II., was born here. Constantine presided at the celebrated council held at Arles against the Donatists in 314. Three English bishops took part in the proceedings; which fact proves the important position occupied by the English church in the beginning of the 4th century. In 418, Arles was appointed as the place for the annual meeting of the assembly of the seven provinces of Gaul. It was besieged by the Visigoths in 425, 429, 452, and 457; and captured by Euric in 466. The Saracens defeated Eudes, duke of Aquitaine, near Arles, in 731; but he joined his forces with those of Charles Martel and expelled the Saracens in 732. Arles was plundered by the Saracens in 850, and was frequently invaded. The republican form of government was adopted in Arles in 1240. After various changes, it was annexed to France in 1486. Arles was an archiepiscopal see. It was suppressed by the concordat of 1801; re-established and united to Aix in 1817. In addition to the celebrated council in 314, others occurred in 353, 442, 452, 455, 463, 475, 524, 554, 813, 1059, 1205, 1211, 1234, 1260 or 1261, and 1275.

ARLES (Kingdom of).—Count Boso, expelled from Lombardy, was elected king of Provence, by the synod of Mantaille, in Oct. 879 A.D. He died about 887; and his son Louis was acknowledged king by the council of Valence in 890. Louis, who claimed the crown of Italy, was blinded, and died about 928. In 888 Rodolph or Raoul, the Guelph, erected the kingdom of Transjurane Burgundy, consisting of territory that nearly corresponds to Switzerland, with some neighbouring districts. Rodolph I. died in 911, and was succeeded by his son, Rodolph II.; who, on the death of Louis, in 928, united Provence to Transjurane Burgundy, making Arles his capital; and, by a treaty with Hugh, king of Italy, he was, in 933, confirmed in the possession. This constituted what is known in history as the kingdom of Arles. Rodolph III., who died in 1032, bequeathed it to the emperor Conrad II.; and subsequent attempts made to revive the kingdom of Arles did not prove successful. Raymond, count of Barcelona, seized Provence in 1146, and Alfonso II., of Aragon, in 1167. Arles became a republic in 1240; afterwards fell under the rule of the Angevin family; and was permanently annexed to France by letters patent of Charles VIII. in 1486.

KINGS OF ARLES.

- A.D.
- 933. Rodolph II., of Transjurane Burgundy.
- 937. Conrad the Pacific.
- 993. Rodolph III.
- 1032. Conrad II., the emperor, receives it on the death of Rodolph III.

ARMADA.—This formidable naval expedition, collected from all parts of Europe by Philip II., for the purpose of invading England, and called the *Invincible Armada*, sailed from the Tagus May 28, 29, and 30, 1588, N.S. It consisted of 130 ships of war, ranging from 300 to 1,200 tons each, and a large fleet of transports, carrying about 11,000 sailors, including galley slaves; 20,000 soldiers, besides volunteers and priests; and 3,165 pieces of cannon. The armada having been damaged in a storm off Cape Finisterre, took refuge in various ports, and assembled again at the Groyne (Corunna), whence they sailed July 22 (O.S. 12); sighted the English coast Friday, July 29 (O.S. 19); and engaged for the first time with the English fleet, July 31 (O.S. 21), when the latter were victorious. Several of the Spanish ships were taken, and others destroyed. Another contest, with a similar result, occurred Tuesday, Aug. 2 (O.S. July 23). The armada anchored in Calais roads on Saturday afternoon, Aug. 6 (O.S. July 27). Fire-ships were launched amongst them during the next (Sunday) night, at which the Spaniards were so much alarmed that they cut their cables and put to sea again, losing several ships. Those that escaped were closely followed by the English squadrons, and a general engagement ensued off Gravelines, on Monday (Aug. 8), when Drake and his colleagues, without the loss of a single vessel, and not a hundred men, dispersed the mighty armament. Sixteen Spanish ships were destroyed, about 5,000 of their men killed, and most of the vessels that escaped destruction were riddled with shot. Their commanders, bent upon returning to Spain, felt so much dread of their antagonists, that they resolved upon sailing through the North Sea, and round Scotland, sooner than risk another encounter. Drake, Frobisher, Howard, and the gallant seamen of that age, pressed boldly in pursuit. "There was never anything," wrote Drake to Walsingham, Aug. 10, "that pleased me better than seeing the enemy flying with a southerly wind to the northward." The armada suffered from a succession of storms; and in one that occurred Sept. 2, forty ships were driven on the Irish coast, and nearly every soul on board these vessels perished. Of this expedition, fifty-three vessels, in a shattered and worthless condition, and little more than a third of the army sent for the conquest of England, returned to Spain. Elizabeth raised three armies to repel the invaders, but the skill and heroism of her sailors, aided by the fury of the elements, rendered even an attempt at landing impossible.

ARMAGH (Ireland), formerly the metropolis, enjoyed considerable reputation as a seat of learning from the 5th to the 9th centuries. The bishopric is said to have been founded by St. Patrick A.D. 445. Gelasius, bishop in 1136, became its first archbishop, and took the title of "primate of all Ireland" in 1152. Armagh was frequently ravaged by the Danes, who were ultimately

expelled in 1004. Its cathedral, founded by St. Patrick in 450, was destroyed in 1564, rebuilt in 1616, again destroyed in 1642, and rebuilt in 1675. The town itself was burnt by Shane O'Neal in 1564.

ARMAGNACS.—Soon after the murder of the duke of Orleans, in 1407, France became a prey to two rival factions, the Burgundians and the Armagnacs. The latter received this name from their leader, Bernard, count of Armagnac, father-in-law to the duke of Orleans. The Armagnacs, in May, 1412, entered into negotiations with Henry IV. of England. Their leader was massacred by the Burgundians and the citizens of Paris, with four thousand of his adherents, June 12th, 1418. Louis XI., before he came to the French throne, put himself at the head of a body of ruffians, called Armagnacs, the disbanded mercenaries of the English war, and invaded Switzerland, where he was defeated in 1444. The Armagnacs were almost exterminated by Louis XI., in 1473.

ARMED NEUTRALITY.—Russia, Sweden, and Denmark, instigated by France, and believing England to be hard pressed by the fleets of France and Spain, at the close of the American war, leagued together to establish a new code of maritime laws. This confederacy, known as the Armed Neutrality, was formed in 1780, and on the 26th of February in that year, Catherine II. put forth a declaration, announcing that free ships make free goods, that the flag covers the merchandise, and that a port is understood to be blockaded only when such a force is stationed at its entrance as to render it dangerous to approach. These principles she professed her intention of maintaining by force of arms. Denmark signed the convention, July 30th; Sweden, Aug. 1, in the same year; and Holland, Jan. 16, 1781. Prussia followed, May 8, and the emperor of Germany, Oct. 9, 1781. England declared war against the Dutch; but the cessation of hostilities soon after, caused the dissolution of the confederacy. It was, however, revived in 1800, and on the 16th of December, Russia, Denmark, and Sweden signed another treaty, to which Prussia, on the 19th, acceded. England, after remonstrating, replied by a proclamation laying an embargo on all Russian, Swedish, and Danish vessels (Jan. 14, 1801). Nelson was speedily sent to Copenhagen, which he captured together with the Danish fleet, April 2, 1801. He then set sail for Cronstadt. Peace was concluded with Russia, June 17, 1801. Sweden and Denmark abandoned their pretensions, Prussia followed their example, and the Armed Neutrality was dissolved.

ARMENIA (Asia), according to Armenian tradition, was settled by Haik, son of Togarmah, and grandson of Japhet (Gen. x. 3); and it is noticed in Scripture under the names Togarmah and Ararat. The country, afterwards divided into Lesser and Greater Armenia, was frequently invaded by the Assyrians, the Babylonians, the Medes and Persians, and for many years remained

in subjection to one or other of these empires. The accounts given by the Greek and Roman writers are in many points at variance with those of the Armenian historians. M. St. Martin has investigated the subject with great diligence, and upon his valuable work the following chronological table is based:—

B.C.

2107. Haik, fleeing from the tyranny of Belus, king of Assyria, settles in Armenia, and becomes its first ruler.

1827. Accession of Aram to the chief power. He carries his arms into Asia Minor, and founds Mazaca, afterwards known as Caesarea of Cappadocia.

1725. Armenia becomes subject to Assyria.

743. Baroir renders Armenia independent of Assyria.

565. Accession of Tigranes, who restores Armenia to its ancient position.

323. On the death of Alexander, Armenia falls under the sway of Greek governors.

317. The Armenians, under Artoces, throw off the Grecian yoke.

149. Valarsaces, or Wagharshag I., founds the dynasty of the Arsacidae.

34. Antony leads the Armenian sovereign captive to Alexandria.

30. On the death of Antony, Artaxes expels the Romans, and is crowned king.

A.D.

16. Vonones, king of the Parthians, seeks shelter with the Armenians, and is made king.

18. Germanicus makes Zeno king of Armenia, under the name of Artaxias.

62. Tiridates king, by order of Nero.

115. Invaded and conquered by the emperor Trajan.

232. Armenia is subjected by Ardashir, king of Persia.

276. Tiridates is converted to Christianity by St. Gregory.

387. The kingdom of Armenia is divided between the Romans and the Persians.

428. End of the kingdom of the Arsacidae.

442. Armenia invaded by the Persians, who seek to abolish Christianity, and substitute the rites of Zoroaster.

515. Pourzan rules Armenia, which is ravaged by the Huns during his administration.

637. Invaded by the Arab Abd-errahim, who seeks to establish Mohammedanism.

830. Invaded by Theophilus, emperor of the East.

856. Sempad the Confessor, king of Armenia, suffers martyrdom at Bagdad for his adherence to Christianity.

859. Aschod I., son of Sempad, receives the title of Prince of Princes from the Caliph.

914. Death of Sempad I., after which Armenia is ravaged by the Arabs.

1045. Constantine XII., emperor of the East, gains important possessions in Armenia.

1079. Extinction of the dynasty of the Bagratides, and entire submission of Armenia to the Seljukian sultans.

1124. David II. recovers great part of Armenia from the Turks.

1234. The Mongols encamp on the confines of Armenia, which they overrun for several years.

1375. Leon VI., king of Armenia, is made prisoner by the infidels, and carried to Egypt.

1393. Leon VI. dies at Paris, and with him the kingdom of Armenia becomes extinct.

1583. Armenia is overrun by the Turks.

1604. The Persians, under Shah Abbas, invade Armenia, and reduce it to complete subjection.

1828. The Russians, in their operations against Turkey, overrun Armenia.

1829. Erzeroum surrendered to the Russians.

SOVEREIGNS OF ARMENIA,

According to St. Martin.

Elder Branch of the Arsacidæ in Greater Armenia.

- B.C.
 149. Valarsaces, or Wagharshag I., brother of Mithridates I., king of Parthia.
 127. Arsaces, or Arshag I.
 114. Artaxes, or Artashes I.
 89. Tigranes, or Dikran I.
 35. His son, Artavasdes, reigns with him.
 36. Artavasdes, or Artawatz I.
 34. Antony seizes the king, and carries him off prisoner to Alexandria, and the Romans hold the country.
 30. Artaxes II.
 20. Tigranes II.
 — Tigranes III. dethroned by the Romans.
 6. Artavasdes II.
 5. Tigranes III. re-established.
 2. Queen Erato, widow of Tigranes III. She is forced to abdicate.
- A.D.
 2. Ariobarzanes, a Parthian, placed on the throne by the Romans.
 4. Artavasdes III.
 5. Queen Erato re-established.—Interregnum.
 16. Vonones.
 17. Interregnum.
 18. Zeno of Pontus, called Artaxias.
 — Tigranes IV.
 35. Arsaces II.
 — Mithridates of Iberia.
 51. Rhadamistus.
 52. Tiridates I.
 60. Tigranes V.
 62. Tiridates I. re-established on the throne.

Younger Branch of the Arsacidæ rules at first at Edessa.

- B.C.
 38. Arshan, or Ardsham.
 10. Manu.
 5. Abgarus, said to have written a letter to our Saviour.
- A.D.
 32. Anane, or Ananus.
 36. Sanadrag, or Sanatruces.
 58. Erwant, an Arsacid by the female line, usurps the throne, and conquers the whole of Armenia.
 78. Artashes, or Artaxes III. reigns over the whole of Armenia.
 120. Artawatz, or Artavasdes IV.
 121. Diran, or Tiranus I.
 142. Dikran, or Tigranes VI.
 178. Wagharsh, or Vologeses.
 198. Chosroes, or Khosrew I., surnamed Medz, or the Great.
 232. Ardashir, or Artaxerxes, the first Sassanid of Persia.
 259. Dertad, or Tiridates II., established by the Romans.
 314. Interregnum. Sanadrag takes northern, and Fagar southern, Armenia.
 316. Chosroes, or Khosrew II.
 325. Diran, or Tiranus II.
 341. Arsaces, or Arshag III.
 370. Bab, or Para.
 377. Waraztad.
 382. Arsaces IV. and Valarsaces, or Wagharshag II.
 383. Arsaces IV. alone.
 387. Armenia divided between the Romans and Persians.
 389. Arsaces IV. dies. Cazavon rules, followed by Chosroes, or Khosrew III.
 392. Bahram Shapur (Sapor).
 414. Chosroes III. re-established.
 415. Shapur, or Sapor.
 419. Interregnum.
 422. Ardashes, or Artaxes IV.
 428. End of the kingdom of the Arsacides

ARMENIAN ÆRA commenced Tuesday, July 9, 552, when the council of Tiben, or of the Armenians, confirmed the condemnation passed on the council of Chalcedon in 536. The Armenians were reconciled to the Latin church about 1330, and they then adopted the form of the Julian year.

ARMENIAN CHURCH is said to have been founded by Bartholomew or Thaddeus, one of the seventy. The Gospel does not, however, appear to have flourished, and it was not until the beginning of the 4th century that it was embraced by king, nobles, and people. Armenia thus became the first country in which Christianity was adopted as the national religion. The Persians, who had subdued Armenia by 369, having failed in their endeavours to force the Magian religion upon the people, permitted them to follow the faith of their fathers. They adopted the Monophysite doctrine in the 6th century. At a council held at Tiben, in Armenia, in 552, the Armenian bishops condemned the general council of Chalcedon (451) which had proscribed the Eutychian heresy, and they separated from the Orthodox church.

ARMENIAN VERSION.—This translation of the Scriptures, of which the Old Testament is based upon the Septuagint, was commenced, A.D. 410, by Miesrob, who invented for the purpose the Armenian alphabet, consisting of thirty-six letters. This alphabet, with two additional letters, is the one still in use. Some authorities are of opinion that this version, completed about 431, was interpolated in the 6th century from the Syriac Peschito, and in the 13th from the Vulgate. It was first printed at Amsterdam, in 1666.

ARMINIANS, the followers of James Arminius, or Harmensen, a Dutch divine, born at Oudewater, in 1560. He was made pastor at Amsterdam in 1588, and soon after opposed what is termed the Supralapsarian doctrine of Calvin. In 1604 he obtained the divinity chair at Leyden, and died Oct. 19, 1609. His followers were also called Remonstrants, from the petition or remonstrance, containing their doctrines, set forth in five articles presented to the States of Holland, in 1610. Their opposition to the Calvinists, or Gomarists, as they were then called, referred principally to their views respecting original sin, free will, and predestination. The synod of Dort, assembled Nov. 13, 1618, and closed May 9, 1619, condemned the "five articles," and 200 of the Armenian preachers were afterwards deprived. Many pastors and their followers went into exile, until the proclamation of religious liberty in Holland, in 1625. Hallam (Lit. Hist. vol. ii. pt. 3, ch. ii.) remarks, "The Arminian doctrine spread, as is well known, in despite of obloquy and persecution, over much of the Protestant region of Europe." The Arminians still exist in Holland, and their tenets in a modified form are held by several Christian sects.

ARMORIAL BEARINGS.—"There is no doubt that emblems somewhat similar have,"

says Hallam (Middle Ages, vol. i. ch. ii. pt. 2), "been immemorially used both in war and peace. The shields of ancient warriors, and devices upon coins or seals, bear no distant resemblance to modern blazonry. But the general introduction of such bearings, as hereditary distinctions, has been sometimes attributed to tournaments, wherein the champions were distinguished by fanciful devices; sometimes to the Crusades, where a multitude of all nations and languages stood in need of some visible token to denote the banners of their respective chiefs. In fact, the peculiar symbols of heraldry point to both these sources, and have been borrowed in part from each. Hereditary arms were perhaps scarcely used by private families before the beginning of the 13th century. From that time, however, they became very general, and have contributed to elucidate that branch of history which regards the descent of illustrious families." At the end of the 12th century, warriors bore escutcheons, suspended from the belt, decorated with their arms. William I. introduced into England the arms of Normandy, having two lions on his shield, to which another lion was added, as is generally supposed, for Aquitaine, by Henry II. The earliest display of arms on a seal is of the date 1187.

ARMORICA (Gaul).—This seat of the Veneti, a Celtic tribe, was conquered by Cæsar B.C. 56. It threw off the Roman yoke A.D. 409, and its independence was recognized by Honorius. Clovis annexed it to his empire A.D. 497. Many of the early Britons, assailed on every side, took refuge in the western part of Armorica, called after them Cornwall and the Lesser Britain. The first immigration is believed to have occurred in the 4th century. The term Armorica was at one time applied to nearly all the maritime districts between the Seine and the Loire, occupied by Celtic tribes. It was afterwards limited to Brittany, which designation, even in its restricted application, had quite superseded that of Armorica by the time of Charlemagne. (See BRITANNY.)

ARMOUR.—The use of helmets, shields, breastplates, and greaves for the legs, is mentioned in the wars recorded in the Bible. The giant Goliath (1 Sam. xvii. 5 and 6), about B.C. 1063, was armed at all points. Armour was used by most ancient nations. The helmet was not common amongst the Teutonic tribes, though it was occasionally worn by the Franks in the 7th, and had become general amongst them in the 8th century. Shields were borne by the Northmen about this time. Those used by the Anglo-Saxons were made of leather with iron rims. Breastplates were much worn in the 12th century. In the 13th century armour of chain mail was worn by knights. Metal greaves appeared at the end of the same century. Chain mail was replaced by armour of plate early in the 15th century, and black armour was often used for mourning.

ARMS.—The club, the sling, bow and arrows, were the most ancient weapons. Esau, at the command of Isaac, took his quiver and bow, and went to procure venison, about B.C. 1760 (Gen. xxvii. 3). Spears of various kinds, javelins, swords, daggers, the battle-axe and mace, followed. The cross-bow and the long-bow were the chief offensive weapons previous to the invention of gunpowder in the 13th century.

ARMY.—The numerical force of armies in ancient times, as may be seen from Josh. xi. 4, B.C. 1445; 1 Sam. xiii. 5, about B.C. 1093; and 2 Sam. xxiv. 9, B.C. 1017, was very great. Diodorus Siculus describes the army of Ninus as amounting to 1,700,000 foot and 200,000 horse. Xerxes, B.C. 480, assembled 1,700,000 foot and 80,000 horse for the invasion of Greece. Gibbon calculates that the peace establishment of Hadrian and his successors amounted to 375,000 men, and this number was doubled under the successors of Constantine. With reference to more modern times, Hallam (Middle Ages, i. ch. ii. pt. 2) says, "In public national history, I am aware of no instance of what may be called a regular army more ancient than the body-guards, or huscarles, of Canute the Great. These select troops amounted to 6,000 men, on whom he probably relied to ensure the subjection of England." Charles VII. of France, advised by the estates at Orleans in 1439, established the first standing army in Europe, levying a poll-tax, in 1444, to defray the expenditure. During the Great Rebellion, large armies were raised; and an army was maintained whilst the Commonwealth lasted. In 1662, a force of 5,000 men excited alarm; and the levy by Charles II., in 1678, of 25,000 or 30,000 troops, created dissatisfaction. By the fourth clause of the Declaration of Rights (1689), James II. was accused of having raised and maintained a standing army in time of peace without the consent of parliament. William III. showed great reluctance in obeying the orders of parliament with reference to disbanding the troops, and from his reign a standing army has been regularly maintained in this country. According to the budget of 1859–60, the English army consisted of 229,557 men.

	Men and officers.

Depôts of Indian regiments stationed in } Great Britain	15,005
Total.....	229,557

ARNHEM (Holland), the capital of Guelderland, is noticed in a charter of Otho, in 996. The counts and dukes of Guelderland resided here. The Spaniards took it in 1585; the French in 1672. It was fortified in 1702, and having again fallen into the power of the French, was retaken in 1813.

ARPAD DYNASTY was founded in Hungary A.D. 899, by Arpad the Magyar. He died in 907, and the line ended with Andrew III. in 1301.

ARQUEBUS, or HARQUEBUSS.—The handgun, with the addition of a trigger, received this appellation. The invention is assigned to about the year 1470, a corps of harquebusiers having existed as early as 1476. Philip of Commines speaks of it as a weapon used at the battle of Morat, in 1476; and half of the English yeomen of the guard were armed with it in 1485. Mounted harquebusiers are mentioned in 1495. The arquebus, considerably improved in construction, became the ordinary weapon in the 16th century. In 1580, John the Almain recommended to the favourable notice of Walsingham one of his countrymen, who had invented "an harquebuse, that shall contain ten balls or pelletes of lead, all the which shall goe off one after another, having once given fire, so that with one harquebuse one may kill ten theeves, or other enemies, without recharging." Thus was the modern revolver anticipated.

ARQUES (Battle).—Henry IV. of France defeated the army of the League, under the duke of Mayenne, at this place, near Dieppe, Sept. 21, 1589.

ARRACAN (India).—According to native traditions, this country was ruled by independent princes from about A.D. 700. It was frequently overrun by the inhabitants of neighbouring states. The Portuguese formed an establishment in Arracan in the 17th century. The province was conquered in 1783 by the Burmese, who ceded it to the English by the third article of the treaty of Yandaboo, Feb. 24, 1826.

ARRAIGNMENT.—This is the form of criminal law of calling a prisoner to the bar of the court, to plead to an indictment. By ancient law and usage he was entitled to appear without irons or other bonds. Formerly, if the prisoner remained mute, instead of pleading, in cases of treason, his silence was held equivalent to conviction. In other cases of felony he was subjected to the barbarous punishment of *peine forte et dure*. By 12 Geo. III. c. 20 (1772), standing mute in cases of felony was held equivalent to conviction; but the third section of 7 & 8 Geo. IV. c. 28, passed June 21, 1827, allowed the court, if it thought fit, to order the proper officer to enter a plea of "not guilty" on behalf of the accused.

ARRAS (France).—Supposed to be the ancient Nemetacum or Nemetocenna, where Cæsar wintered, B.C. 50. It afterwards took the name of Atrebatæ, from the people of the province of which it was the chief town. The Vandals captured it A.D. 407, and the Northmen in 880. Louis XI. took Arras May 4, 1477. It came into the possession of Maximilian in 1493. Louis XIII. captured it in 1640. Arras was finally secured to France by the treaty of the Pyrenees, Nov. 7, 1659. Lebon committed great atrocities

herein 1794. Arras was made a bishopric about 500.

ARRAS (Treaties).—A congress was opened at this town, Aug. 20, 1435, at which envoys from England, France, and Burgundy attended. A treaty was concluded between the two latter powers, Sept. 21, 1435; the English commissioners, disgusted with the terms proposed, having retired, Sept. 6. This treaty was, with others, confirmed at Crotay, Oct. 3, 1472. Another treaty between Maximilian, then duke of Austria, and Louis XI., was concluded at Arras Dec. 23, 1482. Margaret, infant daughter of Maximilian, was affianced to the dauphin, and was to receive as her dowry, Burgundy, Artois, and other territories, whilst Louis XI. engaged to restore some places he had captured in Luxemburg, &c.

ARRAY (Commissions of).—Hallam (Eng. ii. ch. ix.) says, "In seasons of public danger, threatening invasion from the side of Scotland or France, it became customary to issue commissions of array, empowering those to whom they were addressed to muster and train all men capable of bearing arms in the counties to which their commission extended, and hold them in readiness to defend the kingdom. The earliest of these commissions that I find in Rymer is of 1324, and the latest of 1557." Charles I. attempted to revive this practice in 1642; but the exercise of this ancient prerogative, from long disuse, was received as an innovation. A very early precedent is that of the 16th Edward II. (1323), in which year a commission issued out of the exchequer to Geoffrey de St. Quynryn and John de Has-thorp, to the effect that they were to raise, in the Wapentake of Dykryng, all the defensible men between the ages of sixteen and sixty, and to lead them properly armed to the king at York, to act against the Scots.

ARRETUM (Italy), also called ARETINUS.—This very ancient city is said, with four other Etruscan cities, to have joined the Latins and Sabines against Rome, B.C. 616. It concluded a peace of thirty years with Rome, B.C. 308. Arretium ultimately became subject to Rome, and a Roman army under Metellus, that advanced to defend it against the Senones, was defeated here B.C. 285. Julius Cæsar occupied the city B.C. 49. It has been stated that the modern Arezzo occupies the site of the ancient city: this, however, is a mistake, as Arretium was about three miles to the S.E. It was one of the earliest Italian cities to receive the Christian faith, and for many years its bishops were feudal counts. In the 11th century Arezzo became a republic. It was taken in 1384 by De Coucy, who sold it to Florence. Having revolted, it was retaken in 1502, and made part of Tuscany in 1531. The French took it Oct. 19, 1800.

ARSENIAN SCHISM.—Arsenius was made patriarch of Constantinople by Theodore Lascaris II. in 1255. The emperor Lascaris died in 1259, having first committed

his son to the care of the patriarch. His successor, Michael Palæologus, deposed Arsenius, but recalled him in 1260, and was himself crowned joint emperor with the young John Lascaris. Michael put out the young prince's eyes in 1261; whereupon Arsenius excommunicated the emperor, and resolutely refused to grant him penance or absolution. A synod was summoned at Constantinople in May, 1264, and Arsenius, having been thrice cited and refusing to appear, was deposed. A powerful party supported the cause of Arsenius; they received the name of Arsenites, and Gibbon declares that they persevered above 48 years in what was termed the Arsenian Schism.

ARSON.—The punishment of death was awarded for this offence by the ancient Saxon laws, and the same penalty was attached to it in the reign of Edward I. By 8 Hen. VI. c. 6 (1430), the burning of houses under particular circumstances was made high treason. The perpetrators of the crime were denied benefit of clergy by 23 Hen. VIII. c. 1 (1532), which was repealed by 1 Edw. VI. c. 12 (1547). The crime was made felony by the general acts of Edward VI. and Mary. The punishment, after having undergone various modifications, is penal servitude for not more than seven years; or, in some cases, imprisonment not exceeding two years in duration. The principal acts bearing on the subject are 7 & 8 Geo. IV. c. 28, passed June 21, 1827; 16 & 17 Vict. c. 99, passed Aug. 20, 1853; and 20 & 21 Vict. c. 3, passed June 26, 1857.

ARTEMISIUM (Sea Fight).—Fought between the Persians and the Greeks off this promontory of Eubœa, B.C. 480, without any decisive result. It was renewed two days later, on which occasion the Greeks suffered so much, that they were compelled to retreat.

ARTESIAN WELLS.—The Chinese are said to have been acquainted with the principle on which they are made, years ago. They have long existed in parts of Africa and Asia, in Italy, Germany, and France. The monastery of St. André, near Aire, possessed one in 1749. Another, in the ancient convent of Chartreux, at Lillier, is said to be 700 years old. The name is derived from Artois, in France, the ancient Artesium. An artesian well was sunk at Sheerness in 1781; another in London in 1794, two at Portsmouth in 1828 and 1829. In 1852 an artesian well was opened at Kissengen, in Bavaria, the borings of which are 2,000 feet below the surface. A bill for establishing a company to supply London with water by means of artesian wells was rejected by the House of Commons, June 2, 1835.

ARTICHOKE.—This vegetable was brought from the Levant into Italy, in the 15th century. It was brought from Naples to Florence in 1466, and was first seen at Venice in 1473. Artichokes were introduced into France in the 16th century, and into England from Holland in 1602.

ARTICLES OF PERTH.—Adopted by the

General Assembly of Scotland held at Perth, Aug. 25, 1618. They were five in number. Firstly, it was ordered that the Lord's supper should be received kneeling; secondly, the communion of the sick was allowed; thirdly, private baptism in cases of apparent necessity; fourthly, confirmation; and fifthly, the observance of Christmas and other holy seasons. They were ratified by the Parliament in Edinburgh, July 25, 1621.

ARTICLES OF RELIGION. (*See THIRTY-NINE ARTICLES.*)

ARTIFICERS.—Any artificer taking more than the usual rate of wage was subject to imprisonment by the Statute of Labourers, 23 Edw. III. c. 5 (1349), and the wages of several sorts of artificers were fixed by another statute of labourers, 25 Edw. III. st. 1, c. 3 (1351). By 13 Rich. II. st. 1, c. 8 (1389), the rates were to be assessed and proclaimed by the justices of peace. By 34 Edw. III. c. 10 (1360), artificers were liable to punishment for departing into other lands. Conspiring to raise wages was, by 2 & 3 Edw. VI. c. 15 (1549), punished by a fine of £10, or twenty days' imprisonment for the first offence. The above acts were repealed by 5 Eliz. c. 4 (1562), when the assessment of their wages was placed under the direction of justices of the peace, sheriffs, mayors, &c. By one clause of this statute they were compelled, on pain of imprisonment in case of refusal, to assist in agricultural operations during haytime and harvest. Several changes in the law ensued. Persons convicted of enticing artificers in certain branches of industry to go abroad, were, by 5 Geo. I. c. 27 (1718), subject to a fine of £100 and imprisonment for three months, with additional penalties for a second offence; and artificers thus offending were treated as aliens, and forfeited all property if they did not return within six months. The fine was increased to £500, and the imprisonment to twelve months, both being doubled for a second offence, by 23 Geo. II. c. 13 (1750). So much of Elizabeth's act as related to the fixing of wages by justices of the peace was repealed by 53 Geo. III. c. 40 (April 15, 1813), and portions of the latter were repealed by 5 Geo. IV. c. 97 (June 21, 1824).

ARTILLERY.—The earliest military engines were, in all probability, those for casting large stones, which are mentioned in 2 Chron. xxvi. 15, as in use about B.C. 810. Similar engines, and others for throwing darts and arrows, both called by Greek names, were much used in Roman times and subsequently, but do not seem to have been introduced into England until the Norman invasion. Edward I. employed engines at the siege of Stirling Castle, in 1304, which threw stones of 300 lb. weight. Gunpowder was in use among the Hindoos and the Chinese in periods of remote but unknown antiquity. Colonel Chesney is of opinion that cannon-balls were propelled, by means of gunpowder, in India, as early as A.D. 1200, though the use of artillery is not mentioned

by any European writer before the 14th century. A writer in the new edition of the "Encyclopædia Britannica," deriving his information from Colonel Chesney, says: "The Moors, according to Condé, used artillery [in the modern sense of the word] against Saragossa in 1118; and in 1132 a culverin of four-pound calibre, named Salamonica, was made. In 1157, when the Spaniards took Niebla, the Moors defended themselves by machines which threw darts and stones by means of fire; and in 1156 Abd'almumen, the Moorish king, captured Mohadia, a fortified city near Bona, from the Sicillians by the same means. In 1230 artillery was used against Cordova; and in 1306 or 1308 Ferdinand IV. took Gibraltar from the Moors by means of artillery. Ibn Nason ben Bia, of Granada, mentions that guns were adopted from the Moors, and used in Spain in the 12th century, and that balls of iron were thrown by means of fire in 1331. These, and other examples, render it almost certain that the use of gunpowder first became known in Europe through the Moorish conquests and warfare in Spain, although the true components of gunpowder were known to Friar Bacon, and were made public by Schwartz in 1320. Edward III. of England used 'crakeys of war' during his campaign against the Scots, in 1327. In 1339, ten pieces of cannon were prepared for the siege of Cambray, by the Chevalier Cardailiac. Quesnoy was defended successfully in 1340 by cannon which flung large iron bolts. In 1343, the Moorish garrison of Algesiras, besieged by Alphonsus XI. of Castile, used long mortars, or troughs of iron, which threw among their enemies thunderbolts. In 1346, an iron gun, with a square bore capable of projecting a cubical iron, shot of 11 lb. weight, was constructed at Bruges. In 1346, Edward III. is said to have used artillery at the battle of Cressy; but this is very doubtful, as the application of guns to field operations appears to be of later date, and no notice of them at the subsequent battle of Poitiers can be traced. In 1347 Edward did, however, use artillery in the siege of Calais; as did the prince of Wales in 1356 in reducing the castle of Romozantin. In 1378, Richard II. employed 400 cannon, which fired day and night, in his unsuccessful attack on St. Malo. . . . Though portable guns had been occasionally made, from the earlier half of the 14th century, and had been abundantly applied in the wars of the 15th, they do not appear to have been reduced to a perfect system of field artillery until the reigns of Charles VIII. and Louis XII., and in 1500 the latter monarch was able to move his artillery from Pisa to Rome, a distance of about 240 miles, in five days, and possessed light pieces which were sufficiently manageable to be taken rapidly from one point to another during a battle. When he recovered Genoa, in 1507, he had sixty guns of large calibre for an army of about 20,000 men, and overcame the Venetians on the Adda

in 1509, by means of his artillery. Francois I. adopted a lighter construction for field-guns, and had them drawn by the best description of horses." At the battle of Marignan, in 1515, according to the same author, "the French artillery played a new and distinguished part, not only by protecting the centre of the army from the charges of the Swiss phalanxes, and causing them excessive loss, but also by rapidly taking such positions from time to time during the battle as enabled the guns to play upon the flanks of the attacking columns."

ARTILLERY COMPANY OF LONDON is said to have sprung from a voluntary association formed for the encouragement of archery, during the reign of Henry VIII., who granted a charter to the fraternity of artillery in great and small ordnance in 1537. The Artillery company was established in 1535, during the dread of an invasion by the Spaniards, by citizens who voluntarily exercised themselves and trained up others to the use of war. They assembled every Thursday. The exercises were discontinued after the excitement respecting the Spanish Armada had subsided. A new company was, however, formed in 1610. In 1636 Charles II., then prince of Wales, and his brother the duke of York, belonged to the company. The exercising-ground was removed from Bishopsgate to the Artillery-ground, Finsbury, in 1622.

ARTS (Degrees in).—The term *master* is believed to be the oldest amongst those of graduation. Eugenius II., by the 34th canon of a council held at Rome Nov. 15, 826, speaks of the appointment of masters and doctors. This was confirmed by a decree of Leo IV. in another council at Rome, Dec. 8, 853. Gregory IX. (1227—1241) is said to have instituted the inferior rank of bachelors. The degrees both of bachelor and master of arts were conferred at Oxford in the time of Henry III. (1216—1272). The degrees for laws are said to have come into the university in 1149. The number of arts in the course, during the middle ages, was seven; of which three—grammar, logic, rhetoric—constituted the Trivium; and the remaining four—arithmetic, astronomy, geometry, and music—the Quadrivium.

ART-UNIONS.—Associations for the extension of the fine arts originated in France early in this century, and were then introduced into Germany. The first society of the kind known in England was the London Art-Union, established in 1837, and incorporated by royal charter, Dec. 1, 1846. Doubts having been expressed respecting the legality of art-unions, temporary acts were passed in 1844 and 1845 to relieve their promoters from the penalties to which they were supposed to be liable, and they were legalized under certain conditions by 9 & 10 Vict. c. 43, passed in 1846. The Art-Union of Ireland was established in 1853.

ARUNDEL (Sussex).—Camden says he has not met with the name before the time of

Alfred, and adds, "All its renown is derived from the castle, which flourished in the Saxon times, and was rebuilt immediately after the arrival of the Normans, by Roger de Montgomery, thence called earl of Arundel." In his introduction to "Domesday Book," Ellis speaks of it as existing in the days of Edward the Confessor. In 1433, it was decided that the tenure of Arundel Castle, without any creation, patent, or investiture, constituted its possessor earl of Arundel. It was garrisoned by the parliament during the civil war; was captured by Lord Hopton in 1643, and retaken in 1644.

ARUNDEL CONSTITUTION.—Archbishop Arundel, at his visitation in London, in 1397, revived an old constitution, originated by Simon Niger, bishop of London (1229—1241), by which the inhabitants of the respective parishes were compelled to pay their rector one halfpenny in the pound out of the rent of their houses. Hence its name.

ARUNDELIAN, or OXFORD MARBLES.—A collection of relics of antiquity found in the island of Paros, early in the 17th century, purchased by Thomas, earl of Arundel, in 1624, and brought to England in 1627. It consisted, when entire, of 37 statues, 128 busts, and 250 inscriptions, besides sarcophagi, altars and fragments, and gems; and having been dispersed, the remains were presented to the university of Oxford, in 1667, by Henry Howard, afterwards duke of Norfolk. Another portion, now called the Pomfret Marbles, was transferred to Oxford, 1755. Amongst the remains presented by Henry Howard, is the Parian chronicle, which contains a chronological compendium of the history of Greece from B.C. 1582 to B.C. 355, the ninety years to B.C. 264 having been lost. The accuracy of these tables has been questioned, and even their authenticity denied. Clarendon (ch. i. 119) says of the earl of Arundel, their collector, "He was willing to be thought a scholar, and to understand the most mysterious parts of antiquity, because he made a wonderful and costly purchase of excellent statues, whilst he was in Italy and in Rome (some whereof he could never obtain permission to remove from Rome, though he had paid for them), and had a rare collection of the most curious medals; whereas in truth he was only able to buy them, and never to understand them."

ARZILLA (Africa), taken from the Moors by Alfonso V., king of Portugal, in 1471. The king of Fez wrested it from the Christians in 1506.

ASCALON (Syria) is mentioned as a city of the Philistines, Josh. xiii. 3, and 1 Sam. vi. 17. The tribe of Judah captured it B.C. 1425 (Judges, i. 18), but it was retaken by the Philistines, and is frequently denounced by the prophets. It fell successively into the hands of the Egyptians, the Greeks, and the Romans. It became a bishop's see in the 4th century. Owing to the attacks and occupation, in the 7th century, of the Saracens, who held it for many years, the suc-

cession of its bishops was interrupted. It was besieged by the Crusaders in 1100, and again in 1148, without success. Baldwin III. captured it in 1157. Saladin re-took it in 1187, and burnt it in 1191. Richard I. of England obtained possession the same year, and restored the fortifications in 1192. Sultan Bibars destroyed its fortifications and filled up its harbour in 1270.

ASCALON (Battle).—Fought during the second crusade, between the Fatimite army led by the caliph of Egypt, and the Crusaders under the command of Godfrey of Bouillon, Friday, August 12, 1099. The former were defeated, leaving 30,000 killed upon the field of battle, with immense booty.

ASCENSION ÆRA, supposed, says Nicolas, to have been used only by the author of the "Chronicle of Alexandria," who dates the year of the martyrdom of St. Menas of Cotys. It corresponds with the 12th of November, 295.

ASCENSION DAY, formerly called Holy Thursday, a movable feast, to commemorate the Ascension of our Saviour, appointed, according to some authorities, in the apostolical times. It was not, however, generally celebrated until the 4th century. King John dated a charter on the Monday next before the Ascension, May 20, 1191.

ASCENSION ISLAND (Atlantic), discovered by the Portuguese mariner Galeo, on Ascension-day, Thursday, May 20, 1501. It remained uninhabited till the English took possession of it Oct. 15, 1815, and formed a military station.

ASCOLI (Battle).—Fought at this place, the ancient Asculum Picenum, during the struggle for the crown of Sicily, between the emperor Henry VI. and Tancred, in 1190. The emperor's army was defeated. Ascoli was annexed to the papal states in 1426. It was made a bishopric in the 4th century.

ASCLUM (Battle).—Fought between Pyrrhus and the Romans, B.C. 278. It was hotly contested, and terminated in favour of Pyrrhus. Asculum, in Apulia, is often mistaken for a place of the same name in Picenum. The modern name of both places is Ascoli.

ASCLUM PICENUM (Italy).—Captured by Sempronius Sophus, B.C. 268, when the whole nation of the Piceni submitted to Rome. The conspiracy and revolt of its inhabitants, and the massacre of the Romans dwelling in the city, B.C. 91, led to the Marsian war, and the siege and capture of Asculum by the Romans, B.C. 90.

ASHANTEE (Africa), or ASIENIE.—Information of this country was first obtained at the commencement of the 18th century. It is inhabited by a warlike people, who, by making continual aggressions on their neighbours, have largely increased their territory. The Ashantees gained a victory over the English in 1807, the latter having assisted the Fantees; and in another struggle, in 1816, the Ashantees had the advantage. War was renewed in 1823, and on the 21st of January, 1824, Sir C. M'Carthy, governor of Cape Coast, was killed, and his army defeated by

the Ashantees. The English drove them from Cape-Coast Castle, July 22 in the same year. On the 7th of August, 1826, the Ashantees suffered a terrible defeat, when their king was glad to purchase peace, and sent his son as a hostage to Cape-Coast Castle.

ASHBURTON (Treaty).—Concluded at Washington, Aug. 9, 1842, between England and the United States; Lord Ashburton and Mr. Webster being the respective plenipotentiaries. It settled the boundary-line between the British possessions in North America and the United States.

ASHDOD (Palestine), now ESDŪN, a city assigned to Judah in the division of the Promised Land (Joshua, xv. 46, 47), about B.C. 1444. It was the chief seat of the worship of the idol Dagon, which fell on its face before the ark of the Lord, captured by the Philistines about B.C. 1116 (1 Sam. v.). Uziah took Ashdod, B.C. 810 (2 Chron. xxvi. 6); and the Assyrians, B.C. 713 (Isaiah, xx. 1). Herodotus (ii. 157) speaks of it as having been captured by the Egyptians, after sustaining a siege of twenty-nine years, the longest on record (B.C. 630). Nehemiah, about B.C. 428, denounced the marriages contracted by the Jews with the women of Ashdod (Neh. xiii. 23). It was called by the Greeks and the Romans *Azotus*, and under that name was known during the crusades.

ASHDUNE (Battle), was fought A.D. 871, between the Danes and the English. The latter, commanded by Ethelred and his brother Alfred, were victorious. In the ancient chronicles the place is called *Æscedune*, or *Eschendun*. Some writers believe Aston, in Berkshire, and others Ashendon, in Bucks, to have been the scene of this victory.

ASHMOLEAN MUSEUM (Oxford).—This repository of manuscripts, books, coins, various curiosities, and antiquities, was founded by Elias Ashmole, March 20, 1682. This eminent antiquary died May 18, 1692. The Ashmolean Society was established at Oxford in 1828.

ASH WEDNESDAY.—Among the early Christians, Lent commenced on the Sunday now called the first in Lent. Ash Wednesday and the three following days, making the fast to continue forty days, were afterwards added. "Some say it was the work," Bingham (Antiq. b. xxi. ch. i. s. 5) remarks, "of Gregory the Great (590—604); but others ascribe it to Gregory II., who lived above an hundred years after, in the beginning of the 8th century." Other authorities attribute it to Felix III. in 487. It received its name from the Roman Catholic practice of sprinkling ashes on the heads of penitents, in remembrance of Gen. iii. 19.

ASIA, the cradle of the human race, and the earliest seat of empire, civilization, and commerce, is said by some Greek writers to have been named from the nymph Asia, one of the Oceanides. The term was, however, applied by the Greeks to a portion only

of this extensive continent. The overthrow of the Lydian empire by Cyrus, B.C. 546, first brought it under their notice; and the victories of Alexander, B.C. 334—B.C. 323, led to a further acquaintance. Ptolemy, A.D. 160, asserts that not more than one-fourth part of Asia was known to the ancients. The progress of discovery in this quarter of the globe was accelerated by the invasion of Europe by the Saracens, and the crusades. Marco Polo, the account of whose travels was circulated in 1293, is the pioneer of modern discovery in this direction. He obtained information respecting China, Japan, and parts of India. Little was, however, effected until the invention of the mariner's compass, and the discovery of the passage round the Cape of Good Hope, enabled the navigators of Europe in the 15th and 16th centuries to prosecute their researches by sea:—

A.D.

1497. Vasco de Gama doubles the Cape of Good Hope, and arrives at Calicut in the summer of the following year.
1498. The Portuguese explore Malabar.
1503. The Portuguese obtain a footing in Cochín.
1506. Almeida discovers Ceylon, and Soarez the Maldives.
1507. Martin Baumgarten travels in Palestine.
1509. Several Portuguese settlements planted in Asia.
1511. The Portuguese establish themselves at Malacca, and reach the Spice Islands.
1516. Duarte Coelho visits Siam.
1517. The Portuguese reach China, and are permitted to form a settlement in the island of Macao. They erect the fortress of Colombo in Ceylon.
1518. The Portuguese enter the Bay of Bengal, and visit Chittagong.
1523. Borneo visited.
1542. De Mota, a Portuguese navigator, cast, by a tempest, on one of the islands of Japan.
1558. Jenkinson explores the Caspian, and reaches Bokhara.
1568. Achar invites the Portuguese to send missionaries to Delhi.
1579. Siberia entered, and seized by the Russians.
1607. The Jesuit, Father Goez, travels from India to the Great Wall of China.
1639. The river Amour discovered by the Russians.
1656. Grueber starts on his travels, in which he traverses China.
1696. Peter the Great takes possession of Kamtschatka.
1714. Desideri crosses the Himalaya mountains, and visits Cashmere and Thibet.
1728. Behring discovers the straits known by his name.
1760. The Jesuits' map of China published at Pekin, under the authority of the Chinese emperor.
1762. Niebuhr explores Arabia.
1790. The north-eastern coasts of Siberia examined by the Russians.
1796. Thibet explored by Captain Hardwicke.
1804. Krusenstern explores the Gulf of Tartary, the Kurile Archipelago, and the coasts of Japan and Yesso.
1808. The Himalaya ascended by Lieutenant Webb, in order to determine the source of the Ganges.

ASIA MINOR.—This name was first applied in the 4th century to the north-western peninsula of the Asiatic continent. It is also called *Anatolia*, although the latter term is more correctly used for a particular portion. A writer in the "Encyclopædia

Britannica" (iii. 758) remarks:—"Asia Minor was the theatre of the earliest remarkable events recorded in profane history; as the Argonautic expedition, the Trojan war, in which the gods are said to have descended from Olympus and joined battle with mortals; the conquests of the Persians, the overthrow of their empire by Alexander, and the settlement in this part of Asia of his successors. It subsequently fell under the Roman sway, and suffered severely in after-ages in the wars of the Saracens, Turks, Tartars, &c. It is also intimately connected with the early history of Christianity, and the first Christian churches were planted here." Its chief political divisions in ancient times were Bithynia, Cappadocia, Caria, Cilicia, Galatia, Lydia, Lycaonia and Isauria, Lycia, Mysia, Pamphylia, Paphlagonia, Phrygia, Pisidia, and Pontus.

ASIATIC SOCIETIES.—The first society of the kind was established by the Dutch at Batavia, in 1780; the next was the Royal Asiatic Society of Bengal, founded at Calcutta by Sir W. Jones, in 1784; and this was followed by the Société Asiatique at Paris in 1822. The Royal Asiatic Society of Great Britain and Ireland was founded in London in March, 1823, and received its charter in 1824, for the investigation and encouragement of arts, sciences, and literature in relation to Asia. The Oriental Translation Committee, established in 1828, is in connection with this society. The Literary Society of Bombay, founded in 1804, joined it as a branch in 1829. The Literary Society of Madras, the Asiatic Society of Ceylon, instituted in 1845; that of China, founded at Hong Kong in 1847; and that of Shanghai, established in 1858—are also branches.

ASPERN and ESSLING (Battle).—Napoleon I., after a series of encounters, extending over two days, May 21 and 22, 1809, was compelled to take refuge in the island of Lobau, on the Danube. He lost 30,000 men in these actions. The Austrians, who were commanded by the Archduke Charles, were greatly inferior in point of numbers to the French. Marshal Lannes fell in this battle.

ASSAM (Asia).—The early history of this country is involved in obscurity. Its inhabitants waged many contests with the Mohammedan conquerors of India, and long maintained their independence. In 1638 they invaded Bengal, but were repulsed with great slaughter. The country fell under the sway of the Burmese, who were expelled by the English in 1825, and by the second article of the treaty of Yandaboo, concluded Feb. 24, 1826, renounced all claim to Assam and its dependencies. A part of the country remained independent until 1838, when the whole was annexed to British India. Mr. Bruce discovered the tea-plant in Assam in 1823. Further researches were made, cultivation was encouraged, and the first twelve chests of tea reached England in 1838. In the following year an association was formed for the cultivation of the tea-plant.

ASSASSINATION PLOT.—Several persons leagued together for the purpose of assassinating William III., Feb. 15 (N.S. 25), 1696, between Brentford and Turnham Green, through which places he passed on Saturdays to hunt in Richmond Park. The plot was revealed by one of the conspirators, and William III. remained at home. The execution of the plan was consequently deferred till the following Saturday, Feb. 22 (N.S. March 3), and was again frustrated. Some of the conspirators were captured and executed. Their chief object was to restore James II. to the throne.

ASSASSINS, or ISMAELIANS, a military and religious order sprung from the Carmatians, a Mohammedan sect that settled in Persia in the 11th century. Hassan-ben-Sahib, having obtained possession of the hill-fort of Alamoot, or "Vulture's Nest," in Casvin, Persia, established the order there, about 1090. The leader, called Sheikh-el-Jebelz, was known in Europe as the Old Man of the Mountain. The Assassins gained other strongholds and spread into Syria. Hassan died in 1124. The Persian branch of the Assassins was exterminated by Holagou Khan in 1258; and the Syrian by the Mameluke sultans of Egypt in 1270, or, according to Gibbon, 1280. Gibbon says of them:—"With the fanaticism of the Koran the Ismaelians had blended the Indian transmigration and the visions of their own prophets; and it was their first duty to devote their souls and bodies in blind obedience to the vicar of God. The daggers of his missionaries were felt both in the East and West: the Christians and the Moslems enumerate, and perhaps multiply, the illustrious victims that were sacrificed to the zeal, avarice, or resentment of *the Old Man* (as he was corruptly styled) *of the Mountain*. But these daggers, his only arms, were broken by the sword of Holagou, and not a vestige is left of the enemies of mankind, except the word *assassin*, which, in the most odious sense, has been adopted in the languages of Europe."

ASSAYE (India).—This battle was fought Sept. 23, 1803, when Wellington with 4,500 troops, of whom only 2,000 were British, defeated the combined forces of the Mahratta chief, Scindiah, and the rajah of Berar, amounting to 50,000 men.

ASSEMBLY OF DIVINES.—This body, consisting of 130 divines, with 30 lay assessors, was constituted by an ordinance dated June 12, 1643, and appointed to meet, July 1, 1643, in Henry the Seventh's Chapel at Westminster, for the purpose of consulting and advising both houses of parliament relative to the liturgy, discipline, and government of the Church of England. They were divided into three parties, the Independents, the Erastians, and the Presbyterians, the latter being in a majority. Charles I. issued a proclamation, June 22, declaring the assembly illegal, and prohibiting the meeting. In spite of this they assembled on the appointed day. They presented a petition to

both houses of parliament for a fast, sent letters to the Protestant communities on the continent, drew up a confession of faith, and a larger and shorter catechism. This assembly sat at intervals until Feb. 22, 1649; and, somewhat modified in character, it held meetings every Thursday until the dissolution of the Long Parliament in 1653. It was also called the Westminster Assembly.

ASSENS (Battle).—Christian III., king of Denmark and Norway, defeated the rebellious Danes at this place in 1535. This victory, with other naval successes, restored the island to its allegiance.

ASSIENTO.—Charles V. entered into a contract with the Flemings, who agreed to supply a certain number of negroes yearly to the Spanish colonies in South America. In 1532 the Spaniards withdrew the contract, and, in 1580, Philip II. granted it to the Genoese, Philip V. on his accession transferred it to France; and by a treaty concluded between France and Spain, at Madrid, Aug. 27, 1701, the former agreed to furnish annually for ten years 4,800 negroes, or 3,000 in time of war. By a treaty between England and Spain, signed at Madrid March 26, 1713, England agreed to take it for thirty years, from May 1, 1713, on the same terms as France had done; and this agreement was confirmed by the 12th article of the treaty of Utrecht, July 13, 1713. The war of 1740 caused its suspension; but, by the 16th article of the treaty of Aix-la-Chapelle, Oct. 7, 1748, England was to resume it for four years. A treaty was, however, signed at Madrid, between England and Spain, Oct. 5, 1750, by which Great Britain gave up the Assiento contract and the annual vessel during the remainder of four years, Spain agreeing to pay £100,000 in liquidation of all claims.

ASSIGNATS.—State notes or paper money issued on the security of the church lands, seized during the French revolution. The first issue, made in 1790, was to the amount of 400,000,000 of francs, bearing interest, and in September 800,000,000 in addition were issued, but without the liability to pay interest. Further sums were raised in this manner on the lands of the emigrants and other confiscated property. To these assignats a forced currency was given; but they soon became almost valueless. Various experiments to prop up this paper currency were tried without success, and the system was virtually abandoned in 1796.

ASSINGDON (Battle), or ASSANDUN.—A desperate conflict between Canute and Edmund Ironside took place here in 1016. Edmund lost several of his most valiant leaders, and withdrew during the night.

ASSIZE OF BATTLE, or TRIAL BY COMBAT.—This mode of appeal, so prevalent in Europe under the feudal system, was of gradual growth, and extended ultimately to persons of every class and to nearly all cases, but more especially to those of murder and treason. It was introduced into England from Normandy. Michael Palæologus pro-

hibited judicial combat in 1259. St. Louis of France abolished it throughout the royal domains. A trial by combat was appointed in England under the sanction of the judges of the court of Common Pleas, in 1571, when Elizabeth interfered to prevent it. A remarkable case led to its abolition in this country. Abraham Thornton having been acquitted at the Warwick assizes, Aug. 8, 1817, of the murder of Mary Ashford, her brother William, deeming the verdict unsatisfactory, appealed against it. On being placed at the bar of the court of King's Bench, Nov. 17, 1817, the accused threw down his glove and challenged the accuser to mortal combat. The court eventually decided, April 16, 1818, in favour of the legality of this privilege, however obsolete. The appellant declined the combat on account of his extreme youth, and the prisoner was discharged. The law was repealed by 59 Geo. III. c. 46, June 22, 1819.

ASSIZE OF BREAD.—Littleton designates the word assize *nomen equivocum*, on account of its application, especially in English law, to a great variety of subjects. In some cases, as in the present, it is equivalent to an assessment. The first notice of an assize of bread is to be found in a proclamation made in 1203, during the reign of King John, enforcing the legal assize. By 51 Hen. III. st. 1 (1266), called the "Assisa et Panis et Cervisie," or the assize of bread and ale, the prices of these articles were regulated by those of corn, and by 51 Hen. III. st. 6 (1266), a baker was fined for transgressing the law, and in case of a grievous offence was to suffer punishment of body in the pillory, or some other correction. The latter statute was repealed by 9 Anne, c. 18 (1710), which fixed a new assize. Other alterations were made in the law, and the statute Assisa, &c. was repealed by 5 Geo. IV. c. 74, s. 23 (June 17, 1824). Bread has since been sold by weight in the metropolis, and the system was extended to the country by 6 & 7 Will. IV. c. 37 (1836), which came into operation Oct. 1, 1836. The law requires bakers, when delivering bread, to be provided with weights and scales. By 1 Vict. c. 38 (July 4, 1838), all former acts relating to the sale of bread in Ireland are repealed, and a new assize established for that country.

ASSIZE COURTS.—Itinerant justices were appointed for every part of the kingdom, by the parliament held at Northampton in 1176. The judges were invested with a delegated authority from the *aula regia*, or the king's court, and they made their circuit round the kingdom for trying causes once in seven years. The twelfth article of Magna Charta (1215) provided that they should be sent into each county once a year, and this was repeated in the charter of Henry III. (9 Hen. III. c. 12, 1225). It was not until the year 1235 that these courts were presided over by judges of the superior courts. By 13 Edw. I. st. 1, c. 30, they were appointed to go into every shire at the most three

times a year. Assizes were first allowed to be held during Advent and Lent, by the consent of the bishops, at the king's special request, as set forth in the statute of Westminster 1 (3 Edw. I. c. 51), in 1275.

ASSIZE OF JERUSALEM.—This code was compiled in 1100, under the auspices of Godfrey of Bouillon, the first sovereign of the Latin kingdom of Jerusalem, founded July 23, 1099. Godfrey sought the advice of the Latin pilgrims best skilled in the statutes and customs of Europe. With their aid the code, which Gibbon terms "a precious monument of feudal jurisprudence, was drawn up. The new code, attested by the seals of the king, the patriarch, and the viscount of Jerusalem, was deposited in the holy sepulchre, enriched with the improvements of succeeding times, and respectfully consulted as often as any doubtful question arose in the tribunals of Palestine." It was restored for the use of the Latin kingdom of Cyprus in 1369. An Italian version appeared in 1535, at Venice, and one in French at Paris, in 1690.

ASSIZE OF WOOD AND COAL.—On account of the frauds practised, a law was passed in 1543 (34 & 35 Hen. VIII. c. 3), regulating the measure for coal and wood. In consequence of the scarcity of wood and the impossibility of enforcing the regulations of this statute, it was amended by 7 Edw. VI. c. 7 (1553). The latter act was altered by 43 Eliz. c. 14 (1601). The law was enforced by 9 Anne, c. 15 (1710), and an exemption granted in favour of billets made of beech wood only, by 10 Anne, c. 6 (1711). These acts were repealed by 5 Geo. IV. c. 74, s. 23 (June 17, 1824). The sale of coal in the metropolis is regulated by 1 & 2 Will. IV. c. 76, passed Oct. 5, 1831.

ASSUMPTION.—This Roman Catholic festival, celebrated on the 15th of August, in honour of the alleged assumption of the Virgin Mary into heaven, was instituted, according to some authorities, in the 4th, and according to others in the 7th century. The early Church commemorated her death, but the assumption is a Romish innovation. The feast was originally observed on the 18th of January, which was afterwards changed to the 15th of August. The Greek and Russian churches on the latter day observe the festival of "the Day of Rest of the Most Holy Mother of God," but do not hold the doctrine of the Assumption.

ASSYRIA (Asia).—The narrow tract of country inclosed between Mesopotamia, Babylonia, Armenia, Susiana, and Media, called by the ancients Assyria, or Asturia, was the original seat of that extended dominion known as the Assyrian empire. From the 10th chapter of Genesis we learn that Nimrod, leaving Babylon, which he had founded, went forth into Assyria, where he built Nineveh, Rhehoboth, Calah, and Resen, about B.C. 2218. Such is the interpretation given in the margin of the Bible, though some authors prefer the reading, that Assur went forth and built these cities. The next

notice of this empire that occurs in the Old Testament, is the invasion of Palestine in the reign of Uzziah, by Phul (2 Kings, xv. 19), king of Assyria, B.C. 769. The sacred historian relates that Menahem, king of Israel, induced him to retire by a bribe of 1,000 talents. Tiglath Pileser, the successor of Phul, at the solicitation of Ahaz, king of Judah, invaded Syria, and took many of its people away captive (2 Kings, xvi. 5–9), B.C. 738. Salmanassar, having besieged Samaria three years, captured it, and put an end to the kingdom of Israel B.C. 722 (2 Kings, xvii. 5, 6), and carried away its people into captivity. Another king, Sennacherib, came up against all the fenced cities of Judah, and took them (2 Kings, xviii. 13, and 2 Chron. xxxii.), B.C. 714, but failed in an attack upon Jerusalem, the angel of the Lord having slain 185,000 men in one night, B.C. 712 (2 Kings, xviii. 13, xix. 35, 36, and 2 Chron. xxxii. 21). On his return to Nineveh, Sennacherib was slain by two of his own sons, and another king, named Esarhaddon, assumed the Assyrian sceptre, B.C. 711 (2 Kings, xix. 37). The last king of Assyria mentioned in Scripture is Nebuchadnezzar, who is supposed to have ascended the throne B.C. 650. From these notices and the scanty details given by some ancient writers, attempts have been made to construct a history of this powerful empire, and to ascertain the various dynasties of its kings. Though much has been accomplished, particularly by the investigations and labours of Botta, Layard, Fergusson, Rawlinson, and others, to whose works the student and inquirer are referred for additional information, nothing approaching to a connected history of Assyria has been obtained. The discoveries of these enterprising men confirm, in a most remarkable manner, the Scripture accounts. It is evident that the Assyrian empire existed at a very early period in the history of the world; that its rulers obtained extensive dominion; and that, after a partial dismemberment, it continued to exist for many years. The theory of an Assyrian empire that terminated at the revolt of the Medes, about B.C. 711, followed by an Assyrian monarchy that continued till the destruction of Nineveh, B.C. 606, though supported by high authorities, is now generally rejected. Clinton (*Fasti Hellenici*, i. 268) remarks, with reference to the duration of the Assyrian monarchy: "The period delivered by Ctesias seems to have been 1306 years. He placed its commencement 1000 years before the Trojan war, and its termination at B.C. 876. But in assigning the termination of the Assyrian monarchy, Ctesias, and those that followed him, confounded two events,—the revolt of the Medes and the destruction of Nineveh; which they made to happen together. These two events, however, were divided by a considerable interval of time, and the conclusion of the term of 1306 years assigned to that monarchy did not occur at the Median revolt, but at the final capture of Nineveh.

The date of this event we are enabled to fix with precision, on the concurrent authority of Scripture and Herodotus." (B.C. 606.)

Clinton gives the following summary:—

	Yrs.	B.C.
<i>Ninus</i> , B.C. 2182.		
Assyrian monarchy, 1306 years } before the empire }	675	1912
During the empire, 24 kings ..	526	1237
<i>Sardanapalus</i> , B.C. 876.		
After the empire, 6 kings ..	105	711
	1306	
Capture of Nineveh		606

Vaux (Nineveh and Persepolis, p. 508) gives, on the authority of Colonel Rawlinson, the following list of Assyrian monarchs:—

FIRST ASSYRIAN EMPIRE.

B.C.	B.C.
Belukh 1273	Asshur-danin-il 925
Pudil 1255	Phulukk II. 900
Phulukk I. 1240	Tigulti-Sanda 880
Silima-Rish I. 1220	Sardanapalus 850
Sanda-pal-imat .. 1200	Silima-Rish II. 815
Asshur-napal-il .. 1185	(Asshur-danin-pal).
Mutaggil-Nebo .. 1165	Shamasphul 780
Asshur-Rish-ipan 1140	Phulukk III. (Pul) } 760
Tiglath-Pileser I. 1129	and
Asshur-bani-pal I. 1100	Semiramis }
Asshur-adan-akhi 950	

SECOND ASSYRIAN EMPIRE.

B.C.	B.C.
Tiglath-Pileser II. 747	Asshur-bani-pal II. ... 660
Shalmaneser 730	Asshur-Emit-Ilut.... 640
Sargon 721	Final overthrow of
Sennacherib 702	Nineveh 625
Esarhaddon 680	

ASTA, now ASTI, in Piedmont, was captured by the Gauls about B.C. 400. Alaric besieged it A.D. 403. It was taken and retaken several times during the struggles with the barbarians. The emperor Frederick I. captured it A.D. 1154. The French obtained possession in 1387, and after holding it nearly a century and a half, relinquished it to the emperor Charles V., by the treaty of Cambray, 1529. Charles bestowed it upon Beatrice of Portugal, and by her marriage with Charles III. of Savoy, it passed into the possession of that house. It was made a bishop's see at an early period. Evasius, supposed to be the first bishop, suffered martyrdom Dec. 1, 265.

ASTLEY'S AMPHITHEATRE, a temporary building in 1774, was, in 1780, converted into a roofed amphitheatre. It was destroyed by fire Aug. 17, 1794; Sept. 2, 1803; and June 8, 1841.

ASTORGA (Spain), "the city of priests," built on the site of the Asturica Augusta of the Romans, was taken by Almanzor in 990, and recovered in 1010. The king of Navarre took it in 1033; and the French, after a desperate encounter, obtained possession April 12, 1810, when they dismantled the fortifications and committed great havoc. It was made the seat of a bishopric in the 3rd century. A council on discipline was held here Sept. 1, 946.

ASTRACAN (Russia), formerly the capital

of a Tartar state, was taken by Ivan in 1554. The Turks besieged it in 1569; and a rebellion broke out here in 1670. It is the seat of an archbishopric.

ASTROLOGY.—The Chaldeans, the Egyptians, the Hindoos, and the Persians cultivated this "illusory science;" and with the former it is supposed to have originated. By an edict issued at Rome, B.C. 139, the Chaldeans, or mathematicians, as the astrologers were then called, were banished from the city. The senate, in the reign of Augustus, expelled them from Italy in the year 16. Sharpe (Hist. of Egypt, ii. 179), writing on the reign of Antoninus Pius (138—161), when Egypt was a Roman province, remarks:—"The poor Jews took to it as a trade. In Alexandria, the Jewess, half beggar half fortune-teller, would stop people in the streets and interpret dreams by the help of the Bible, or sit under a sacred tree like a sibyl, and promise wealth to those who consulted her, duly proportioned to the size of the coin by which she was paid." Constantius (July 13, 358) made a law declaring astrologers to be the enemies of mankind. The Arabians were great astrologers. Prescott says, with reference to the Aztecs, "In no country, not even in ancient Egypt, were the dreams of the astrologer more implicitly deferred to. On the birth of a child he was instantly summoned. The time of the event was accurately ascertained; and the family hung in trembling suspense, as the minister of heaven cast the horoscope of the infant, and unrolled the dark volume of destiny." During the Middle Ages the practice became general. In the 13th and 14th centuries, astrology was taught in the Italian universities, whilst at Padua and Bologna professors of astrology were appointed. Many of our own early philosophers and men of science were captivated by this study.

ASTRONOMICAL SOCIETY OF LONDON, was founded in 1820, and its charter was granted March 7, 1831, since which time it has taken the title of the Royal Astronomical Society of London.

ASTRONOMY.—This science was cultivated, before the Christian era, by the Chaldeans, the Egyptians, the Hindoos, the Chinese, the Phenicians, and the Greeks; and to each of the four first-mentioned has its invention been attributed, whilst Josephus claims it for the Jews. There can be no doubt that it was practised amongst the Chaldeans and the Egyptians; and the great antiquity of the Hindoo observations is acknowledged by all astronomers. The claims of the Chinese on this point are not supported by satisfactory evidence. In Greece, Thales, born B.C. 640, who predicted an eclipse, was the earliest astronomer. He was followed by Anaximander, born B.C. 610; Anaximenes, born B.C. 530; and Anaxagoras, born B.C. 500. Pythagoras, born B.C. 580, greatly advanced the science. Meton and Euctemon introduced the Metonic cycle, B.C. 433. Aristotle, born B.C. 384, wrote a treatise on the subject; and Autolycus two books, the most

ancient astronomical works that have come down to us. Hipparchus, born B.C. 135, reduced it to a systematic form, and is the father of true astronomy. Ptolemy, called the "prince of astronomers," born in the year 130, was the last astronomer of the Greek school. The science was revived by the Arabians, "who," says Hallam (Lit. Hist. vol. i. pt. i. ch. 2), "understood astronomy well, and their science was transfused more or less into Europe." The caliph Al Mansur is said to have encouraged the study of this science; and Albategnius is the most celebrated of the Arabian astronomers. Alfonso X., of Castile, produced the Alfonsine tables in 1252. Little was accomplished until the appearance of Copernicus, who is justly termed the founder of modern astronomy. He was born at Thorn, in 1473, and published his celebrated treatise on the Revolutions of the Heavenly Bodies, just before his death, in 1543. It was issued at Nuremberg, and the treatise, consisting of six books, is said to have been completed by the astronomer about 1530. Tycho Brahe (1546–1601), Hallam admits, "did far more in this essential department of the astronomer than any of his predecessors." He was the first to make a catalogue of the stars, and his new mundane system paved the way for the important discoveries of the 17th century. In 1582 Gregory XIII., by the aid of Lilius and Clavius, reformed the calendar. It is impossible in a small compass to explain even the chief results of the wonderful progress made in astronomical science since the commencement of the 17th century; but some of the more important are given in the following summary:—

A.D.

- 1581. Galileo remarks the isochronism of the pendulum.
- 1603. Bayer's maps, in which the stars are distinguished by letters.
- 1609. Galileo makes his telescope. Kepler publishes his work on Mars, containing what are called his *First and Second Laws*.
- 1610. Galileo announces discoveries of Jupiter's satellites; of spots on the moon; of nebulae; of new phenomena in Saturn, which prove to proceed from the ring; and phases of Venus.
- 1611. Galileo observes spots on the sun.
- 1616. The Copernican theory prohibited by the court of Rome.
- 1618. Kepler's *Third Law*.
- 1631. Gassendi observes the transit and measures the diameter of Mercury.
- 1639. Transit of Venus first observed by Horrox and Crabtree, and her diameter measured.
- 1654. Discovery of Saturn's ring by Huyghens.
- 1665. Cassini determines the time of rotation of Jupiter.
- 1666. Newton first turned his attention to gravitation.
- 1671. Richer observes the shortening of the seconds' pendulum in nearing the equator.
- 1675. Roemer announces his discovery of the velocity of light by means of Jupiter's satellites.
- 1687. Newton publishes the "*Principia*."
- 1705. Halley first predicted the return of a comet; viz., that of 1758.
- 1727. Bradley discovers aberration. Death of Newton.

A.D.

- 1731. Hadley's quadrant invented.
- 1732. Maupertuis introduces the Newtonian theory into France.
- 1765. Harrison gains the parliamentary reward for his chronometer.
- 1767. First nautical almanack published.
- 1781. Herschel discovers Uranus.
- 1784. Laplace's researches on the stability of the Solar System, &c.
- 1795. Separation of the Milky Way into stars by Herschel.
- 1806. Herschel suspects the motion of the whole Solar System towards the constellation Hercules.
- 1814. Piazzi's catalogue of 7,646 stars.
- 1820. Astronomical Society of London founded.
- 1830–32. Sir J. Herschel's investigations of double stars.
- 1845. Lord Rosse completes his telescope.
- 1846. The planet Neptune discovered by Adams and Le Verrier, who conducted their researches quite independently of each other.
- 1847. Herschel publishes the "Results of Astronomical Observations made at the Cape of Good Hope."
- 1850. Nebulae observed by Lord Rosse.
- 1853. Airy makes investigations respecting ancient eclipses.
- 1857. Photography successfully applied to astronomical purposes.
- 1858. Annular eclipse of the sun visible in England. Donati's comet appears with great splendor for several weeks.

ASTURIAS (Spain).—An ancient province, to which, in 1833, the name of Oviedo, its chief town, was given. In its mountains the Gothic fugitives sought refuge on the invasion of Spain by the Saracens in the 8th century. The independence of the country was maintained by a race of native rulers, commencing with Pelayo, A.D. 716. Henry, eldest son of John I., assumed the title of Prince of Asturias in 1388; and from that period the heir apparent to the Spanish throne has been thus styled. The insurrection against the French (1808) commenced in the fastnesses of the Asturian mountains, which became the scene of many severe struggles. Its junta was the first organized in Spain, and thus, as Alison remarks, its inhabitants had "a second time the honour of having taken the lead in the deliverance of the peninsula."

ASYLUM.—The earliest notice of a place of refuge for criminals is found in the command to Moses for the Jews to build six cities of refuge, for the manslayer, B.C. 1451 (Numbers, xxxv. 6). A similar order was given to Joshua, B.C. 1444 (ch. xx.), on the entrance of the Jews into Canaan. Cadmus is said to have erected one at Thebes, B.C. 1493, and Rome on its foundation was a general place of refuge. Some place of sanctuary existed amongst all ancient nations of which we have any record. On the introduction of Christianity, the custom was retained. Milman (Latin Christianity, vol. i. b. iii. ch. 5.) states:—"The privilege of asylum within the Church is recognized in most of the barbaric codes. It is asserted in the strongest terms, and in terms impregnated with true Christian humanity, that there is no crime which may not be pardoned from the fear of God and reverence for the saints." It became a privilege of

churches from the time of Constantine. The altar was at first the sanctuary, until the privilege was extended to the other parts of the church. Theodosius regulated asylum by law, A.D. 392. When Alaric captured Rome, A.D. 410, he ordered that all who took refuge in the churches should be spared. During the Middle Ages even convents, the dwellings of the bishops, the precincts of these places, the graves of the dead, hospitals, &c., were privileged in this respect. The canon law of Gratian and the Pope's Decretals granted protection to all except night and highway robbers, and offenders against the Church. The practice gave rise to various abuses, and many attempts were made to find a remedy. At the Reformation the system, as far as criminals were concerned, was abolished though it continued to exist in a modified form for the benefit of debtors, until abolished by 8 & 9 Will. III. c. 27, in 1697.

ATELIERES NATIONAUX, or **NATIONAL WORKSHOPS**, were established at Paris by decrees of the 27th and 28th of February, 1848, for the purpose of providing occupation for the numerous unemployed workmen in that capital. About 5,000 were at first admitted, but their numbers soon increased to above 100,000. They rose against the government on the 22nd of June, were overcome after a painful struggle by General Cavaignac, and the national workshops were dissolved on the 4th of July, having been in existence about four months.

ATELLA (Italy).—The French army under Montpensier, capitulated to the Spaniards and Italians at this town, July 21, 1496. Philip of Commynes denounces this surrender as ignominious, and compares it to the capitulation of the Romans at the Caudine Forks. Atella was the seat of a bishopric, which was transferred to Aversa about 1050.

ATHANASIAN CREED.—A confession of faith, so called because it was supposed to have been composed by Athanasius, bishop of Alexandria, A.D. 326. The latest critics have, however, shown that it was not the work of Athanasius. By some it is ascribed to Vigilius Tapsensis, "an African bishop, who lived in the latter part of the 5th century, in the time of the Vandalic Arian persecution;" and by Dr. Waterland it is attributed to Hilary, bishop of Arles, in the 5th century. It was written chiefly against the Arians; and to the fact that Athanasius was their vigorous opponent, may its peculiar designation be attributed.

ATHENÆUM CLUB was founded in 1823. The club-house was built in 1829 and opened in November, 1830.

ATHENS, the capital of Attica and the most celebrated city of ancient Greece, is said to have been first called Cecropia, from Cecrops, an Egyptian who built the original city on the Acropolis, according to Hales, B.C. 1568; Usher, B.C. 1556; and Clinton, B.C. 1433. It received the name of Athens from the worship of Athenæ or Minerva,

said to have been established by Erechtheus, B.C. 1383. The legendary accounts give a succession of kings from Cecrops to Theseus, and with the latter the history of Athens as a state is declared by some writers to commence. Theseus ascended the throne, according to Hales, B.C. 1236; Usher, B.C. 1235; and Clinton, B.C. 1234. He united into one political body the twelve states into which Cecrops had divided Attica, and made Athens the capital. Codrus, the last king of the dynasty, sacrificed himself for the safety of Athens, B.C. 1070 according to Hales, or B.C. 1044 according to Clinton. Seventeen kings reigned during the monarchical period, and they were followed first by perpetual, then by decennial, and finally by annual archons. Homer speaks of Athens as a place of importance during the Trojan war (B.C. 1183).

B.C.

1069. Medon made perpetual archon.
754. Alcmaeon last of the perpetual archons.
752. Charops first decennial archon.
684. Erixias, the seventh and last of the decennial archons, dies.
683. Nine annual archons appointed, the title of archon being given only to the first. Creon first annual archon.
621. Legislation of Draco, whose laws, on account of their severity, were said to have been written in blood.
612. Cylon attempts to make himself master of Athens.
594. Solon remodels the constitution, and gives a new code to Athens.
560. Pisistratus usurps the government. Death of Solon.
554. Pisistratus expelled.
535. Thespis first exhibits tragedy at Athens.
527. Death of Pisistratus.
514. Assassination of Hipparchus by Harmodius and Aristogiton.
510. Ostracism established.
505. War between Athens and Sparta.
490. Battle of Marathon. War between Athens and Egina.
483. Banishment of Aristides.
481. Fleet of 200 ships built at Athens. Ascendancy of Themistocles.
480. Athens taken by Xerxes.
479. Mardonius burns Athens.
478. Themistocles rebuilds the city.
477. Commencement of the Athenian supremacy.
471. Banishment of Themistocles.
461. Ostracism of Cymon.
459. Athens asserts her supremacy over the other states of Greece.
457. The 'Long walls' of Athens commenced.
456. The Athenians defeat the Thebans at Æno-phyta.
452. Truce between the Athenians and Peloponnesians for five years.
449. The Athenians defeat the Persians.
448. The Athenians assist the Phocians in the Sacred War.
447. The Boeotians defeat the Athenians at Chæronea.
445. Thirty years' truce between Sparta and Athens.
444. Pericles at the head of affairs.
440. Comedies prohibited at Athens. Samos subdued by Pericles.
439. Athens at the height of its glory.
437. The law against comedies repealed.
433. Alliance between the Athenians and the Corecyreans.
431. Peloponnesian war begins, and Attica is invaded.
430. Plague at Athens. Second invasion of Attica.

- B.C.
429. Pericles dies of the plague.
428. Third invasion of Attica.
415. First Athenian campaign in Sicily.
414. The Athenians defeated in the second campaign in Sicily.
413. The Athenian fleet and army destroyed.
411. Government of the "Four Hundred."
407. Second and last banishment of Alcibiades. Lysander defeats the Athenians.
406. The Athenians defeat the Spartans in a sea-fight.
405. Battle of *Ægospotamos*, in which Lysander again defeats the Athenians.
404. Athens taken by Lysander. End of the Peloponnesian war. The rule of the Thirty Tyrants, who are replaced by "the Ten."
403. Thrasybulus overthrows the government of "the Ten."
399. Death of Socrates.
394. Xenophon banished from Athens.
393. Conon rebuilds the walls of Athens.
388. Plato founds the Academy.
378. The Thebans and Athenians allied against Sparta.
376. Athenian victory off *Naxos*.
374. Peace between Athens and Sparta.
371. General peace.
360. War between the Athenians and Olynthians respecting *Amphipolis*.
359. Philip of Macedon makes peace with Athens.
357. Commencement of the Social War.
355. The Social War terminates.
352. Philip takes *Methone*, and enters *Thessaly*. He is stopped at *Thermopylæ* by the Athenians.
346. Peace between Athens and Macedon.
339. War breaks out between Philip and the Athenians.
338. Philip defeats the Athenians and Thebans at *Cheronea*.
323. Samian war commences.
322. End of Samian war. Submission of Athens to Macedon. Death of Demosthenes.
317. Cassander conquers Athens.
307. Demetrius restores the ancient constitution of Athens.
297. Demetrius falls in an attack on Athens.
296. Demetrius besieges Athens.
295. Demetrius takes Athens.
287. Athens revolts from Demetrius.
277. Athens, Sparta, and Egypt allied.
268. After a series of sieges, Athens surrenders to Antigonus Gonatus, king of Sparta.
229. Athens joins the Achaean league.
215. The Athenians and *Ætolians* unite against Macedon.
211. A Roman fleet arrives at Athens.
200. Athens and other Greek states join Rome against Philip.
196. The Romans proclaim Athens free from the Macedonian power.
146. The Romans subdue Greece.
86. Athens stormed by *Sylla*.

ATHENS (Modern).—This city sank into comparative insignificance early in the Christian æra. St. Paul visited it (Acts, xvii. 15–34) in the year 51. At first a bishop's see, it became an archbishopric, and ultimately received the metropolitan dignity.

- A.D.
267. Besieged by the Goths.
395. Taken by Alaric.
532. The walls restored by Justinian.
1146. Plundered by Roger, king of Sicily.
1205. Taken by Otho de la Roche, whom the marquis of Montferrat makes lord of Athens and Thebes, by the title of Grand Sire.
1311. Conquered by the Catalans.
1394. Bequeathed by Nerio Acciaiuoli to the church of St. Mary.
1456. Taken by Mohammed II., who thus puts an end to the domination of the Latins.

- A.D.
1466. Taken by the Venetians.
1479. Restored to the Turks.
1687. Retaken by the Venetians.
1827. Insurrection of Greeks; siege and capture by the Turks, May 17.
1834. Declared the capital of the modern kingdom of Greece.
1850. Blockaded by a British fleet.
1854. Occupied by French and English forces. They retire in 1856.

ATHEERTON MOOR (Battle).—The parliamentary army, led by the earl of Essex, was completely defeated here, June 30, 1643, by the royalist forces under the marquis of Newcastle.

ATHLONE (Ireland), called "the key of Connaught," a place of considerable strength, situated partly in Westmeath and partly in Roscommon, was besieged by William the Third's army in 1690. The siege was raised on the 25th of July. The attempt was renewed by General Ginkell, afterwards earl of Athlone, and the town was taken July 1, 1691.

ATLANTIC TELEGRAPH. (See **SUBMARINE TELEGRAPH.**)

ATMOSPHERE.—Atmospheric air was supposed by the ancients to be a simple elementary body, and the experiments of their philosophers did not lead to the discovery of its real properties. The investigations of Anaxamines (B.C. 548), of Aristotle (B.C. 384–323), and of others, produced no great results. The weight of air and its pressure on all bodies were first perceived by Galileo in 1564. Descartes probably went further in the same direction, but it was not demonstrated until Torricelli's successful experiment by the agency of quicksilver in 1643. Pascal fully confirmed the theory of atmospheric pressure in 1648. In spite, however, of these and other important discoveries, the ancient doctrine, that air was one of the four elements, continued prevalent till Dr. Priestley, in 1774, discovered oxygen gas, showing it to be a constituent of air. Azotic gas, the other constituent, was discovered soon after. Scheele and Lavoisier endeavoured to determine the volumes of each contained in the atmosphere, and Mr. Caven-

dish published in the "Philosophical Transactions" for 1783, the results of experiments made the year before, by which the matter was settled with greater precision.

ATMOSPHERIC RAILWAY.—The application of atmospheric pressure as a motive power on railways was first suggested about 1812. A line was constructed to test the principle, between Kingston and Dalkey, near Dublin, and opened in 1843; and another, between Croydon and London, was opened in 1845.

ATOMIC THEORY in chemistry, sometimes called the doctrine of definite proportions, was first explained by Dr. Dalton, in 1803, in his "Manchester Memoirs." In 1808 he published his "New System of Chemical Philosophy," on the same subject. The basis of the theory is found in a work "On the Affinities of Bodies," published by Wenzel, a German chemist, in 1777.

ATTAINDER.—The Norman laws provided that by attainder of treason or felony a person not only forfeited his land, but that his blood became attainted; by which his descendants, as well as himself, were forever (*i. e.* unless the attainder had been reversed) disqualified from inheriting property. The theory of constructive treason proved a source of great injustice in the days of arbitrary rule. Its severity was mitigated by 7 Will. III. c. 3 (1695), an act which modified 25 Edw. III. stat. 5, c. 2 (1350); and 54 Geo. III. c. 145, passed July 27, 1814, restricted disinheritance, except in cases of high-treason, to the actual culprit. By 3 & 4 Will. IV. c. 106 (Aug. 29, 1833), it was enacted that after the death of a person attainted, those tracing descent through him may inherit, unless the land should have escheated before Jan. 1, 1834.

ATTICA (Greece).—The early history of this political division of ancient Greece is involved in obscurity. Its capital, Athens, was, according to the traditional account, founded by Cecrops, a native of Lais, in Egypt, about B.C. 1558. (*See* ATHENS.)

ATTORNEY, one who is appointed to act in place, or in turn of, another in the conduct of a suit. In early times, every suitor was obliged to appear in person, in obedience to the king's writ. After appearance, the courts of record had the power of allowing them to appear by attorney. Suitors could also have attorneys appointed by letters patent, under the great seal; but if these could not be obtained, the suitors were obliged to appear each day in court in their proper person. The Statute of Westminster II. c. 10 (13 Edw. I. 1285), gives to all persons the power of appointing an attorney without letters patent. In the poll-tax of 2 Rich. II. (1379), the legal profession were divided into four classes; from which it appears that the attorneys had by this time become a separate body. Attorneys are also mentioned as a distinct body of men in 4 Hen. IV. c. 18 (1402); whereby it is ordained that all attorneys should be examined by the justices, and by their discretions should be put in the roll. They were to be good, virtuous, and

of good fame. Their discipline, mode of admission, and qualifications, have been regulated by a long series of statutes, down to the 6 & 7 Vict. c. 73 (Aug. 22, 1843), by which previous enactments were repealed, and the present regulations established. Acting without proper qualification is punished as a misdemeanor.

ATTORNEY-GENERAL.—The records of the year 1278 furnish two instances of the appearance of an officer designated "attornatus regis." Another mode of describing this official adopted at the time was, "qui sequitur pro rege." It is, therefore, certain that such an officer, appointed, probably, at first for special occasions only, was created some time before 1278. Foss (Judges of England, iii. 45) says,—"In most years two were regularly employed, who may be supposed to answer to our modern officers—the attorney and solicitor general. The latter title, however, had certainly not been then adopted; and, as far as I can find, was not used till the reign of Edward IV." The queen also had an attorney to attend to her separate interests. Holinshed mentions one killed in a fray in Fleet Street, April 13, 1458. Foss states that Lord Bacon was the first attorney-general elected a member of the House of Commons. This was in 1614.

ATTORNEYS-GENERAL OF ENGLAND.

Edward I.

 1850. July 19. Sir John Romilly.
 1851. March 28. Sir Alexander James Edmund Cockburn.
 1852. March 2. Sir F. Thesiger again.
 — Dec. 28. Sir A. J. E. Cockburn again.
 1856. Nov. Sir Richard Bethell.
 1858. Feb. Sir Fitzroy Kelly.
 1859. June. Sir R. Bethell again.

AUBAINE.—This right, by which the sovereigns of France claimed the property of a stranger who had died in their dominions without having been naturalized, was abolished by laws dated Aug. 6, 1790, and April 13, 1791; confirmed by a constitutional act, Sept. 3, 1791. It was re-established in 1804; and finally abolished July 14, 1819.

AUBEROCHE (France).—A battle was fought between the English and French before this place Aug. 19, 1344, in which the former, although greatly inferior in point of numbers, were victorious; the loss of the French amounting to 7,000 slain and 1,200 prisoners.

AUBIN DU CORMIER, ST. (Battle).—Fought at this place, between the Bretons and the French, July 28, 1488. The former gained the victory, and St. Aubin fell into their hands.

AUCKLAND (Australasia), the capital of New Zealand, was founded Sept. 19, 1840. Captain Hobson, the first governor of the colony, arrived in January, 1841.

AUCTION.—This mode of sale was common amongst the Romans. Petronius gives the following caricature of the handbill of a Roman auction:—"Julius Proculus will make an auction of his superfluous goods to pay his debts." In the 13th century the crier, called cursor, stood under a spear, as amongst the Romans. By 19 Geo. III. c. 56, s. 3 (1779), an auction is defined,—"a sale of any estate, goods, or effects, whatsoever, by outcry, knocking down of hammer, by candle, by lot, by parcel, or by any other mode of sale at auction, or whereby the highest bidder is deemed to be the purchaser." Duties were first levied on auctions by 17 Geo. III. c. 50 (1777). The auction duty was increased and extended to Ireland in 1797; and was again increased by 45 Geo. III. c. 30 (April 5, 1805).

AUDIANS, or AUDÆANS, a Christian sect, so called from Audæus or Audius, a native of Mesopotamia, who was persecuted by the Syrian clergy because he censured their irregular lives. In revenge, he was ejected from the Syrian church, and banished to Scythia, where he died A.D. 370. His followers celebrated Easter on the same day as the Jewish passover, contrary to the decree of the council of Nice, in 325; and they maintained that God had a human form, and that man was created after his image. From the former doctrine they have been called *Quartodecimarians*; and from the latter,

Anthropomorphites. Theodosius, in 385, decreed death against those who dared to perpetrate the atrocious crime of celebrating Easter on an improper day. Only a small number of Audæans remained after the year 377, and they dwelt in cabins and monasteries near Antioch. By the 5th century they had become extinct.

AUERSTADT (Battle). (See JENA.)

AUGHRIM, or AGHRIM (Battle).—Fought near this place, in Ireland, on Sunday, July 12, 1691. The troops of William III., commanded by General Ginkell, gained a complete victory over the army of James II. The chief result was the submission of Ireland to William III.

AUGMENTATIONS (the Court of), called "The Court of the Augmentations of the King's Revenues," was established by 27 Henry VIII. c. 27 (1535), to take cognizance of suits and controversies arising out of the suppression of monasteries. It consisted of a chancellor, treasurer, attorney, solicitor, ten auditors, seventeen receivers, a clerk, an usher, and a messenger. It was suppressed by letters patent, re-established, and was annexed to the court of Exchequer by 1 Mary, sess. 2, c. 10 (1553), and revived by 1 Eliz. c. 4 (1558).

AUGSBURG (Bavaria).—Founded by Augustus about B.C. 12, and called Augusta Vindelicorum. It was pillaged by the Huns about the middle of the 5th century; and Charlemagne destroyed it A.D. 788. It was restored, and enjoyed the rights of a free and imperial city from 1276—1806. Marshal Villars captured it Sept. 18, 1703; the elector of Bavaria in December of the same year; and Marlborough retook it in 1704. It was taken by the French Oct. 10, 1805, and delivered by them to the Bavarian authorities in March, 1806. The bishopric is very ancient. Councils were held at Augsburg 7th Aug. 952, and Feb. 1051. A treaty called the Peace of Religion was signed at Augsburg Sept. 25, 1555, for the purpose of confirming the free exercise of the Protestant religion and the treaty of Passau.

AUGSBURG CONFESSION.—This celebrated confession of faith, compiled by Martin Luther, Melancthon, and other reformers, was read before the diet of Augsburg, June 25, 1530. It consisted of twenty-eight articles, seven of which contained refutations of Roman Catholic errors, and the remaining twenty-one set forth the leading tenets of the Lutheran creed. Soon after its promulgation, the last hope of inducing the pontiff to reform the Roman Catholic church was abandoned, and the complete severance of the connection followed. It was answered by the Roman Catholics in August, 1530; and the Augsburg diet declared that it had been refuted. Melancthon drew up another confession somewhat different. The first is called the unaltered, and the second the altered confession.

AUGSBURG INTERIM.—The Confession having been condemned by the Diet, the emperor Charles V. advised, and Joachim,

the elector of Brandenburg, directed, that an interim should be prepared. It was the joint production of John Agricola, Julius Phlug, and Michael Hellingus, commonly called Sidonius, from his bishopric. The document, neither Roman Catholic nor Protestant, was presented as an ultimatum to the Protestants, in 1548, and having failed to produce the desired effect, was at length withdrawn.

AUGSBURG LEAGUE.—Concluded at Augsburg July 9, 1686. It was negotiated by the prince of Orange, June 21, 1686, for the purpose of resisting the encroachments of France. The German princes at first joined it, and Spain and England acceded to it in 1689.

AUGURY, supposed to be of Asiatic origin, was transferred to Etruria, and thence to Rome. The story of the rival pretensions of Romulus and Remus to be decided by the flight of birds, B.C. 753, is well known. Romulus instituted four augurs, and Numa Pompilius established them as an order, B.C. 716. The Romans never embarked in any important enterprise without consulting the augurs, and one of them always attended upon the consul when commanding an army. In B.C. 307 the number of augurs was increased to nine, five plebeians being associated with four patricians. Sylla increased the number to fifteen, B.C. 81. Augustus, B.C. 29, obtained the right of electing augurs at his pleasure. Theodosius the Great abolished the office of augur in 390. Gibbon (iii. ch. 28), referring to the final destruction of paganism, remarks:—"Fifteen grave and learned augurs observed the face of the heavens, and prescribed the actions of heroes according to the flight of birds."

AUGUST.—By a decree of the senate in B.C. 30, the name of this month was changed from Sextilis to August, in honour of the emperor Augustus, who extended the number of its days from thirty to thirty-one.

AUGUSTINE FRIARS, also called **AUSTINS**, or **EREMITES**.—Their origin is uncertain. Pope Alexander IV. is said to have collected several bodies of hermits and placed them under the common rule of St. Augustine in 1256. Lanfranc of Milan was their general. Much controversy has been excited respecting the date of their introduction into England. A small body is said to have settled at Woodhouse, in Wales, in 1252. Humphrey Bohun, afterwards earl of Hereford and Essex, gave them a house and a church in London in 1254. They had about thirty-two houses in England and Wales at the suppression of monasteries.

AUGUSTINES, or the **Canons of the order of St. Augustine**, sometimes called **Austin Canons**, because they pretended to follow the rule of St. Augustine, or Austin, bishop of Hippo, in Africa, A.D. 395. They were little known until the 11th century, and did not assume the name until a later period. It is generally believed that they came into England in the reign of Henry I. about 1105. Stevens states that they did not take any vows until the 12th century, and that they

assumed the name of Regular Canons of St. Augustine, when Innocent II., at the tenth general council, that of Lateran, in 1139, placed all regular canons under his rule. There were canonesses of this order, which had about 175 houses in England and Wales at the time of the suppression of the monasteries.

AULDEARN (Battle).—The Covenanters were defeated at Auldearn, or Alderne, near Inverness, by the earl of Montrose, May 9, 1645.

AULIC COUNCIL.—Soon after the establishment of the Imperial Chamber by the diet of Worms, Maximilian I. instituted an Aulic Council at Vienna. The judges were appointed by the emperor. "The Aulic Council," says Hallam, "had, in all cases, a concurrent jurisdiction with the Imperial Chamber; an exclusive one in feudal and some other causes. But it was equally confined to cases of appeal; and these, by multiplied privileges *de non appellando*, granted to the electoral and superior princely houses, were gradually reduced into moderate compass." This court underwent various modifications. An edict for its regulation was issued by Ferdinand III. in 1654. During the wars between Austria and Napoleon, the Aulic Council directed the military affairs of the empire. Its interference with the plans of the generals frequently proved disastrous. The Aulic Council was abolished on the formation of the Confederation of the Rhine in 1806, but was revived on the renewal of the struggle against Napoleon.

AURAY (Battle).—Was fought at this town, in France, Sept. 29, 1364, between Bertrand du Guesclin and some English and Breton forces led by John Chandos. Bertrand was defeated and taken prisoner, and the results of the victory were the capture of Auray, Vannes, and other towns, and the conclusion of a peace at Guerande, April 12, 1365.

AURICULAR CONFESSION.—The practice of private confession of sins to the priest arose at an early period of Christianity, and was frequently condemned by the primitive church. It was established in the Roman Catholic church by the decision of the twelfth general council (fourth Lateran), in 1215, and confirmed by that of Trent, 1545—1563. The former decreed it to be heresy for any one to assert that it was sufficient to confess sins to God, without making confession to a priest. The penitent in Anglo-Saxon times was required to say to the priest (Thorpe, *Ancient Laws and Institutes of England*, p. 404), "I confess to thee all the sins of my body, of skin, of flesh, and of bones, and of sinews, and of veins, and of gristles, and of tongue, and of lips, and of gums, and of teeth, and of hair, and of marrow, and of everything, soft or hard, wet or dry." It was abolished in England at the Reformation. Attempts have been made by members of the Tractarian party to revive the practice in the Anglican church; and in 1858 a clergyman was suspended from his office on this account.

AURIFLAMMA. (See ORIFLAMME.)

AURORA BOREALIS.—Pliny declares this phenomenon of nature was greatly dreaded. He speaks of one appearance as exhibiting daylight in the night. Extraordinary displays were seen in Spain, Portugal, Holland, France, and Great Britain, Aug. 31, 1769, and Feb. 29, 1780. The aurora borealis seen Oct. 24, 1847, one of the most brilliant ever witnessed in this country, was preceded by great magnetic disturbance.

AUSTERLITZ (Battle).—Fought near a small town of this name, in Moravia, Dec. 2, 1805. It has been called "the battle of the three emperors," because the French were commanded by Napoleon I., and the Austrians and Russians by the emperors Francis II. and Alexander I. The French army numbered 90,000, and that of their opponents 80,000 men. The former proved victorious, and the result was the breaking up of the third coalition, and the conclusion of the treaty of Presburg.

AUSTRALASIA, the fifth great division of the world, comprises several the islands lying in the Indian and Pacific oceans. The most important are Australia, or New Holland; Van Diemen's Land, or Tasmania; Papua, or New Guinea; New Zealand, New Britain, New Caledonia, the New Hebrides, and Solomon's Archipelago. The first discovery made by Europeans in this quarter of the globe was that of Papua, now called New Guinea. Menezes, a Portuguese navigator, landed here in 1526.

A.D.

- 1528. Saavedra, a Spaniard, lands in Papua.
- 1529. Saavedra visits Papua a second time.
- 1537. An expedition sent by the viceroy of Peru, lands in Papua.
- 1542. Gaetano discovers one of the Sandwich Isles.
- 1567. Mendana, a Spaniard, discovers New Georgia, or Solomon's Islands.
- 1543. Ruy Lopez de Villaboa changes the name of Papua to New Guinea.
- 1606. The New Hebrides discovered by the Spaniards.
- 1606. March. The Dutch sight Australia.
- 1606. Torres, a Spaniard, passes through the strait named after him in 1762, separating Australia from New Guinea. He also discovers islands in the Louisiade Archipelago.
- 1616. Hartog makes discoveries in West Australia.
- 1618. Zeachen makes discoveries in North Australia.
- 1619. Von Edels makes discoveries in West Australia.
- 1627. Nuyt's Land, in South Australia, discovered by the Dutch.
- 1628. De Witt and Carpenter discover portions of Northern Australia, which were named after them.
- 1642. Tasman discovers Van Diemen's Land to be an island. It was named Tasmania after him. He also discovers New Zealand.
- 1644. Tasman's second voyage to Australia.
- 1686. Dampier lands on the north-west coast of Australia.
- 1696. Amsterdam Island discovered.
- 1699. Dampier's second visit to the north-west of Australia.
- 1700. Dampier discovers the island of New Britain.
- 1705. The Dutch explore Northern Australia.
- 1767. Carteret discovers New Ireland.
- 1770. New Guinea explored.
- 1770. Cook explores the east coast of Australia, and lands in Botany Bay.

A.D.

- 1772. Kerguelen, or Desolation Island, discovered.
- 1773. Furneaux discovers Adventure Bay.
- 1774. Cook visits the New Hebrides, and discovers New Caledonia.
- 1777. Cook visits Adventure Bay.
- 1789. Banks's Island, to the north of the New Hebrides, discovered by Bligh.
- 1792. D'Entrecasteaux explores South Australia.
- 1798. Bass, in the *Norfolk*, explores the strait bearing his name.
- 1799. Flinders circumnavigates Van Diemen's Land.
- 1800. Grant explores part of South Australia.
- 1805. Flinders surveys Nuyt's Land.
- 1813. The Blue Mountains in Australia crossed.
- 1818. Oxley completes the discovery of the Blue Mountain chain.
- 1824. Several rivers discovered by Howell and Hume.
- 1829. Sturt's first exploring expedition.
- 1830. Sturt's second exploring expedition.
- 1831. Mitchell explores South Australia and Eastern Australia.
- 1835. Mitchell makes further explorations.
- 1836. Mitchell's third exploring expedition.
- 1841. Further discoveries by Earle, Ross, and Strelecki.
- 1843. Lander and Lefray explore Western Australia.
- 1844. Leichardt leaves Sydney on an exploring expedition.
- 1851. Hargreaves discovers gold in the Bathurst Mountains.

AUSTRALIA, or NEW HOLLAND.—The discovery of this, the largest island in the world, has been claimed by the French for Captain Paulovier de Gonneville, in 1504. Recent researches have proved that it was the coast of Madagascar, and not that of Australia, upon which this French navigator was driven. There is, however, little doubt that Australia was discovered previous to the year 1542, and the Portuguese are supposed to be entitled to the honour of this discovery, of which no record remains. The Dutch, in November, 1605, despatched the yacht *Duyfhen*, from Bantam, to explore the islands of New Guinea, and during the voyage, about March, 1606, they sighted the coast of Australia. In June of the same year, it was seen by Torres, a Spanish navigator, when passing through the straits that bear his name; yet neither of these enterprising men was aware of the importance of the discovery. Between the years 1616 and 1705 several expeditions were sent by the Dutch in this direction, and various portions of the Australian coast were explored. William Dampier, the first Englishman who visited Australia, landed in January, 1686. In 1770, Captain Cook explored the eastern coast of Australia, and was the first to give the world valuable information respecting Australia and the islands in its vicinity. On the termination of the American war, the English government determined upon establishing a dépôt for convicts in this island, and the settlement of New South Wales was formed. A fleet of eleven ships, carrying 558 male and 218 female convicts, and about 200 soldiers, with their wives and children, sailed from Plymouth May 13, 1787. The coast of Australia was sighted on the 3rd of January, 1788, and all the convicts were

landed at Port Jackson, near Botany Bay, before the end of that month.

- A.D.
1788. Jan. 26. Captain A. Phillip, the first governor, founds Sydney.
1790. The colonists in danger of perishing from starvation, caused by the loss of the store-ship *Guardian*.
1793. First church erected.
1795. First printing-press established.
1798. Bass and Flinders discover Bass's Strait.
1802. Flinders explores the south coast of Australia.
1803. Sydney Gazette published by authority.
1804. The Irish rebellion suppressed.
1808. Governor Bligh deposed by the colonists for his tyranny, and sent home.
1813. The colonists penetrate beyond the Blue Mountains.
1821. Departure of Governor Macquaire, under whose rule the convicts were well treated, and assisted to retrieve their character and obtain a position.
1829. Legislative Council first appointed.

In 1829, Western Australia, or Swan River, was founded. Other provinces were erected into separate colonies, and the subsequent history of the island is given under the following divisions:—1. New South Wales; 2. Western Australia, or Swan River; 3. South Australia; 4. Victoria, or Port Phillip; 5. Queen's Land, or Moreton Bay.

AUSTRASIA, or EAST FRANCE, was allotted to Thierry on the death of his father Clovis, A.D. 511. It was united to Neustria by Clotaire II. in 613, and separated from it by Dagobert I. in 622. Charles Martel annexed it to his dominions in 737. Carloman received Austrasia on the death of Charles Martel in 741, and Charlemagne annexed it to his empire in 772. Sigebert transferred the capital from Rheims to Metz in 561. Many of the sovereigns of Austrasia were mere puppets in the hands of the mayors of the palace.

KINGS OF AUSTRASIA.

- A.D.
511. Thierry.
534. Theodebert I.
548. Theodebald.
555. Clotaire I., king of the Franks, seizes Austrasia.
561. Sigebert I.
575. Childbert II.
596. Theodebert II.
613. Clotaire II. annexes it to Neustria.
622. Dagobert I., sole king of the Franks 628.
638. Sigebert II. receives Austrasia.
660. Childeric II.
670. Thierry III.
674. Dagobert II.

After the death of Dagobert II., in 680, Pepin of Heristal seized the reins of government, and was acknowledged duke.

DUKES OF AUSTRASIA.

- A.D.
680. Pepin of Heristal.
714. Charles Martel, who becomes sole ruler of France in 737.
741. Carloman receives Austrasia.
747. Pepin the Short takes Austrasia, and Carloman retires to the monastery on Monte Cassino.
752. Pepin, king of France.
768. Charlemagne, who in 772 annexes Austrasia to his empire.

AUSTRIA.—Noricum, bordering on Pannonia, made a Roman province B.C. 15, was the original seat of the Austrian empire. The two provinces of Noricum and Pannonia consisted of the extensive territories between the Inn, the Save, and the Danube. During the decline of the Roman empire, Noricum was overrun by various barbarian tribes, and one of these, the Avari, having penetrated into Bavaria, was defeated and driven across the Raab by Charlemagne, in 791 and 796. A colony was placed in the territory from which they had been driven, and it was called the Eastern Mark, or Ostreich, whence its present name. On the division of the empire, it was annexed to Bavaria. The Hungarians took it in 900, but it was wrested from them by Otho I. in 955. Leopold I., grandson of Adalbert of Babenberg, was made margrave of Austria in 984; and one of his successors, Leopold III., obtaining Bavaria in 1139, the two provinces were again united. Frederick I. (Barbarossa) adding to it the province west of the Enns, erected it into a separate duchy in 1156, and bestowed it upon Henry IX. of Bavaria, which he resigned.

A.D.

1246. Extinction of the male branch of the ducal line, and commencement of an interregnum.
1262. Ottocar II., king of Bohemia, elected in 1260, obtains the government of Austria and Styria.
1263. Ottocar obtains Carinthia by succession.
1276. Ottocar resigns the dukedom to Rodolph of Habsburg.
1277. Ottocar rebels.
1278. Aug. 26. Battle of Marchfield, which secures Austria to Rodolph.
1308. The Swiss revolt from Albert I.
1331. Carinthia is annexed to Austria.
1363. Acquisition of the Tyrol.
1364. Treaty of Union between Austria and Bohemia concluded.
1438. Albert V., duke of Austria, king of Hungary and Bohemia, is made emperor of Germany under the title of Albert II.
1446. Invaded by the Hungarians.
1452. Created an archduchy by the emperor Frederick III.
1477. Acquisition of the Netherlands, by the marriage of Maximilian to Mary, heiress of Burgundy.
1496. Marriage of Philip of Austria to Joanna of Castile, which begins the connection with Spain.
1522. Charles V. cedes Austria to his brother Ferdinand.
1526. Hungary and Bohemia united to Austria.
1529. Invaded by Soliman the Magnificent.
1556. Abolition of Charles V. Ferdinand, king of Hungary and Bohemia, made emperor of Germany.
1618. Thirty Years war begins.
1628. Ferdinand II. abolishes Protestant worship, and imposes most severe restrictions on all Lutherans.
1648. Thirty Years war ends. Alsace ceded to France.
1687. Hungary reduced to subjection.
1701. War of the Spanish Succession begins.
1708. Mantua is added to the Austrian dominions.
1713. April 11. Peace of Utrecht, by which Austria obtains part of Milan.
1715. Nov. 15. Barrier Treaty, which confirms Austria in possession of Milan, the Netherlands, Naples, and Sardinia.

A.D.

1718. July 21. Peace of Passarowitz, and cession to Austria of the Banat of Temeswar, Belgrade, part of Servia, Bosnia, and Wallachia.
1723. Charles VI. secures the succession for his daughter Maria Theresa.
1737. Naples and Sicily relinquished.
1740. Oct. 20. Death of Charles VI., with whom the male branch of the Habsburg dynasty becomes extinct. Maria Theresa succeeds.
1742. Silesia ceded to Prussia.
1745. Sept. 13. Francis, grand-duke of Tuscany and husband of Maria Theresa, is elected emperor of Germany.
1748. Parma, Milan, and other Italian possessions, are lost.
1763. Feb. 5. Treaty of Hubertsburg, by which Austria cedes Silesia and Glatz to Prussia.
1773. Apr. 19. On the dismemberment of Poland, Austria acquires Galicia and other parts of Poland.
1797. Oct. 17. Treaty of Campo Formio. Austria resigns Lombardy and the Netherlands, and obtains Venice.
1801. Venice ceded to France.
1806. Aug. 6. Francis II. of Germany abolishes the title of emperor of Germany, and takes that of Francis I., emperor of Austria.
1805. Joins England and Russia in order to oppose France. Nov. 14. Napoleon enters Vienna. Dec. 2. Battle of Austerlitz. Dec. 26. Treaty of Presburg, and cession of Venice and the Tyrol to France.
1809. May 13. Vienna again taken by the French. Oct. 14. Vienna restored to the emperor.
1810. Mar. 11. Marriage by proxy of Napoleon and Maria Louisa, daughter of the emperor.
1814. Oct. 2. Congress at Vienna.
1815. Mar. 25. Treaty of Vienna. Austria regains her Italian possessions.
1835. Mar. 3. Death of Francis I., and accession of Ferdinand.
1838. July 3. Treaty of commerce between Austria and Great Britain.
1848. Mar. 13. Insurrection at Vienna, and flight of Metternich. May 17. Flight of the emperor. July 22. A constituent assembly meets at Vienna. Dec. 2. Abdication of the emperor, in favour of his nephew, Francis Joseph.
1850. Nov. 29. Convention of Olmütz.
1853. Feb. 18. Libeny attempts to assassinate the emperor.
1854. April 24. Marriage of the emperor with the princess Elizabeth of Bavaria. Aug. 23. the Austrians enter the Danubian principalities. Dec. 2. Alliance with Great Britain and France.
1855. Aug. 18. Signing of a concordat with Rome, whereby the Pope receives almost absolute power in Austria.
1857. March. The Austrians commence the evacuation of the Danubian principalities. Diplomatic relations between Austria and Sardinia broken off.
1859. Jan. 1. Napoleon III. throws Europe into excitement by a few words addressed to the Austrian ambassador. Feb. 13. Lord Cowley receives instructions to proceed to Vienna on a "mission of peace." April 26. The Austrians cross the Ticino. May 3. The French emperor declares war against Austria. Battles of Montebello (May 20), Palestro (May 30, 31), Magenta (June 4), and Malegnano (June 7), in which the Austrians are defeated. June 11. Death of Prince Metternich. June 24. Battle of Solferino lost by the Austrians. July 11. Treaty of Villafranca provisionally signed, by which the emperors of France and Austria agree to favour an Italian confederation. Austria relinquishes Lombardy to Sardinia. Nov. 10. Treaty of Zurich, which confirms all the articles of that of Villafranca.
1860. Great reforms in the system of government.

DUKES OF AUSTRIA.

A.D.

1282. Albert I.
1308. Frederick I.
1330. Albert II.
1358. Rodolph III.
1365. Albert III.
1395. Albert IV.
1404. Albert V., king of Hungary and Bohemia in 1437, and emperor of Germany, by the title of Albert II., in 1438.
1439. Ladislaus.
1458. Frederick III., emperor of Germany.

ARCHDUKES OF AUSTRIA.

1493. Maximilian I., emperor of Germany. From this period the imperial dignity remained hereditary in the house of Austria (see EMPERORS OF GERMANY) until 1806.

EMPERORS OF AUSTRIA.

1806. Francis II., of Germany, resigned the title of emperor of Germany, and assumed that of Francis I., emperor of Austria.
1835. Ferdinand II.
1848. Francis Joseph I.

AUSTRIA (Screw Steam-ship), was built on the Clyde in 1857, and destroyed by fire on the 13th of September, 1858. She left Hamburg on the 4th of the month, with 425 passengers and a crew of 103, including officers and men. They were principally Germans; and of the 528 persons, only 67 were saved. Some of these were picked up by the *Maurice*, a French barque, and the remainder by a Norwegian barque.

AUTO-DA-FÉ, or "Act of Faith," a term applied by the Spanish and Portuguese to the ceremony with which the punishment of death was inflicted upon heretics, under the terrible Inquisition. "The last scene in this dismal tragedy," says Prescott, "was the act of faith (auto-da-fé), the most imposing spectacle, probably, which has been witnessed since the ancient Roman triumph, and which, as intimated by a Spanish writer, was intended, somewhat profanely, to represent the terrors of the Day of Judgment. The proudest grandees of the land, on this occasion, putting on the sable livery of familiars of the Holy Office, and bearing aloft its banners, condescended to act as the escort of its ministers; while the ceremony was not unfrequently countenanced by the royal presence. . . . The effect was further heightened by the concourse of ecclesiastics in their sacerdotal robes, and the pompous ceremonial which the Church of Rome knows so well how to display on fitting occasions, and which was intended to consecrate, as it were, this bloody sacrifice by the authority of a religion which has expressly declared that it desires mercy and not sacrifice." Thousands of victims perished in this manner in Spain, Portugal, and their colonies. It was instituted in Spain in 1556, and celebrated annually after 1559. An auto-da-fé was held at Lisbon so late as Sept. 20, 1761, at which Gabriel Malagrida, an old man of seventy, was burnt for having indulged certain heretical notions. Fifty-four persons

suffered at the same time. An auto-da-fé is said to have taken place at Mexico during the present century.

AUTOMATON FIGURES, or AUTOMATA.—The Chinese long since contrived to give motion to puppets by means of quicksilver; and several specimens of automata constructed by the Greeks are mentioned by different authors. The wooden pigeon made by Archytas of Tarentum, about B.C. 400, though it could fly, was not able to resume its flight when it had once settled. In the 13th century, Albertus Magnus is said, after thirty years' labour, to have constructed a speaking head, which so frightened Thomas Aquinas that he shattered it to pieces; and Roger Bacon produced a similar invention. These accounts, however, like that of John Müller's, or Molitor's (Regiomontanus), artificial eagle, which flew to meet the emperor Maximilian on his arrival at Nuremberg, June 7, 1740, are not supported by satisfactory evidence. Beckmann has no doubt that in the 14th and following centuries several automata were made. The emperor Charles V. during his cloister life amused himself with contrivances of this kind. Vaucanson exhibited at Paris, in 1738, a flute-player sitting, who performed twelve tunes; another that played upon a shepherd's pipe and a drum at the same time; and a duck that imitated all the motions of the living animal. Du Moulin, in 1752, produced similar automata. Baron de Kempelen's automaton chess-player, exhibited in London in 1816, is believed to have been a deception. Faber's euphonia was exhibited at the Egyptian Hall in 1846.

AUTUN (Council).—At this council sentence of excommunication was pronounced against Philip I., of France, Oct. 16, 1094. In the previous year he had put away his wife Bertha, mother of Louis VI., and married Bertrade, wife of the count of Anjou, and for this he was first privately admonished by the Roman Catholic authorities, and then excommunicated. Autun is said to be the most ancient church in France after Lyons and Vienne.

AUXIMU (Italv), now OSIMO, first mentioned B.C. 174, when the order for erecting walls around it was given by the Roman censors. It was made a Roman colony B.C. 157; and having been taken by the Goths, was wrested from them by Belisarius A.D. 538.

AVA (Asia), for some time subject to Pegu, became an independent state in the 17th century. Its chief city, Ava, was taken by the Peguans in 1752, and rescued from their hands in 1753. It was made the capital of Burmah in 1364, in 1761, and for the third time in 1822. It suffered severely from an earthquake in March, 1839. (*See* BURMAH.)

AVAINNE, or AVEIN (Battle).—The marshals Chatillon and Brézé, commanding the French and Dutch troops, defeated the Spanish forces, under the command of Prince Thomas of Savoy, in this plain, near Luxem-

burg, May 20, 1635. The Spaniards lost 4,000 men and fifty standards.

AVARS, sometimes called the Huns of Pannonia, a barbarian tribe first mentioned in history towards the close of the 5th century. Retiring before the Turks, they reached the shores of the Euxine, and sent an embassy to Constantinople, A.D. 558. In their audience with Justinian, at that time declining in years, the chief ambassador addressed him thus:—"You see before you, O mighty prince, the representatives of the strongest and most populous of nations, the invincible, the irresistible Avars. We are willing to devote ourselves to your service; we are able to vanquish and destroy all the enemies who now disturb your repose. But we expect, as the price of our alliance, as the reward of our valour, precious gifts, annual subsidies, and fruitful possessions." They afterwards advanced into Poland and Germany; and in 626 joined the Persians in an attack on Constantinople, but were repulsed. Having committed various aggressions, and provoked numerous wars, they were, after a conflict of eight years' duration, subdued by Charlemagne in the year 799.

AVE MARIA.—This form of prayer, used in the Roman Catholic church, is a repetition of the salutation of the angel Gabriel to the Virgin Mary (Luke, i. 28). Bingham shows that the use of this invocation to the Virgin cannot be traced higher than the beginning of the 15th century. "Ferrarius," he adds, "ingeniously confesses that Vincentius Ferrerius was the first ecclesiastical writer that ever used it before his sermons. Baronius has not a syllable of its antiquity in all his twelve centuries; there being a perfect silence both among the ancients and all the Ritualists about it, till that Dominican preacher, in his abundant zeal for the worship of the Holy Virgin, began to use it before his sermons." John XXII. ordered Christians to annex it to their prayers, 1420. This invocation is now generally used in the services of the Roman Catholic church. The early summons to worship was called the Ave-bell; and indulgences granted by various pontiffs for frequent repetition of the invocation were termed Ave Marias.

AVEBURY, or AVBURY.—This village in Wilts occupies the site of a Celtic structure, composed of blocks of stone, and generally believed to be a Druidical work. Aubrey visited it in 1648; Dr. Stukeley commenced his examination of these antiquities in 1720; and Sir Richard Hoare in 1812. It is supposed to be the remains of a national temple, or place of assembly for the performance of sacred rites, erected by the Druids before the Christian æra.

AVERSA (Italy).—Built A.D. 1020, by Rainulph, a Norman chief, near the ruins of the ancient Atella, from which place the bishopric was transferred to Aversa, about 1050. Alfonso V., of Aragon, took it in 1440; and it was frequently besieged. It suffered greatly from an earthquake in 1805.

AVIGNON (France).—This ancient city is

seated in a beautiful valley on the left bank of the Rhone. The adjacent territory, the Venaissin county, "a populous and fertile spot," was ceded to the papacy by Philip III. in 1273; and the sovereignty of Avignon was sold to Clement VI. for 80,000 gold florins of Florence by Jane, queen of Naples and countess of Provence, in 1348. Clement V., elected through the influence of Philip IV. of France, removed the papal chair to Avignon, 1309. The following popes remained here under French influence.

A.D.

- 1309. Clement V.
- 1314. See vacant two years.
- 1316. John XXI or XXII.
- 1334. Benedict XI or XII.
- 1342. Clement VI.
- 1352. Innocent VI.
- 1362. Urban V.
- 1370. Gregory XI.
- 1378. Commencement of schism of the West. Two popes elected. Clement VII at Avignon.
- 1394. Benedict XIII.

Urban V. went to Rome for a short time, but returned to Avignon; and Gregory XI. is said to have meditated flight, when surprised by death. In the schism called "the great schism of the West," occasioned on the election of his successor, in 1378, the antipope Clement VII. took up his residence here, and was succeeded by Benedict XIII. The popes at Rome, however, triumphed, and Avignon was deprived of its rival pontiffs (1409). The French kings seized this city on various occasions. The annexation of the Venaissin and Avignon to France by the revolutionary government, Sept. 14, 1791, was their first act of aggression. By the treaty of Tolentino, Feb. 19, 1797, Pius VI. formally ceded these possessions to France. Avignon was made a bishopric in the 1st century, and was erected into an archbishopric in 1475. By the concordat of 1801 it ceased to be a metropolis, but the privilege was restored in 1821. Councils were held at Avignon in 1080, 1209, 1270, 1279, 1282, 1326, 1327, 1337, and 1457.

AVIS (Order of).—Instituted in 1147 by Alfonso I., the founder of the Portuguese monarchy, and raised by him in 1162 to the rank of an ecclesiastical order of chivalry. The knights were then called "Knights of Evora," but took their present title in 1187, from their gallant defence of the fortress of Avis against the Moors. The order was changed from an ecclesiastical to a civil institution in 1789.

AVRANCHES (Normandy), anciently Ingena, also called Abrincæ, came into the possession of England at the Norman conquest. In its cathedral Henry II. received absolution of the pope's legate in 1172, for the murder of Becket; a flat stone marks the spot where he did penance. The Bretons captured it in 1203, and committed great havoc. The town was restored by Louis IX., and it again fell under the power of the English in 1415, but was recovered by France in 1450. The bishopric, established in the

5th century, was suppressed and united to Coutances in 1801.

AXARQUIA (Battle).—In the winding defiles of the Axarquia, the Moors inflicted a severe loss on the Spaniards, in actions extending over two days, March 20 and 21, 1483.

AXE.—The Franks in their expedition into Italy in the 6th century made use of an axe with a large blade. Hence it was termed *francisca*. The principal weapons of this kind were the taper axe, the broad axe, and the double axe. The pole axe and the adze axe were varieties of these. The Lochabar axe was used in the 16th century.

AXUM, anciently Auxume, in Abyssinia.—This ancient city, founded about B.C. 650, became in later times the seat of a powerful kingdom, nearly co-extensive with modern Abyssinia, and embracing portions of Arabia. Though its origin has not been ascertained, it is mentioned as existing in the second century of our era. Justinian formed an alliance with the Auximites A.D. 533. Gibbon is of opinion that the Auximites, or Abyssinians as he calls them, were a colony of Arabs, and there can be no doubt that the Arab element is blended with the Ethiopian in their composition. They were converted to Christianity in the 4th century; and in its defence came into collision with the followers of Mohammed, who deprived them of their possessions in Arabia, and destroyed their commerce. The Chronicles of Axum, a kind of history of Abyssinia, a copy of which the traveller Bruce brought to England in 1774, are deposited in a Christian church in Axum, built about 1657. Axum was made a bishopric about 356, and Frumentius was the first bishop.

AYACUCHO (Battle).—On this plain, in Peru, the Spaniards were defeated by the republican forces July 9, 1824, and a capitulation was soon afterwards made, by which Spain surrendered the whole of Peru and Chili.

AYLESBURY (Buckinghamshire).—This ancient town formed one of the principal strongholds of the Britons in their resistance to the Romans. In 571, Cuthulf, a West-Saxon chief, took Aylesbury, which was ravaged by the Danes in 921. The town was incorporated and made a borough by Queen Mary in 1554. During the disputes between Charles I. and the Parliament, it espoused the cause of the latter, and in 1643 it formed the headquarters of Lord Essex. John Wilkes represented it in parliament in 1761.

AYLESFORD (Battle).—A victory was gained by the Britons over the Saxons A.D. 455, near a village of this name, in Kent.

AZOF.—This sea, called by the ancients the Palus Mæotis, communicates with the Euxine by the Strait of Yenikale, or the Cimmerian Bosphorus. It was the scene of some important operations during the Crimean war. An allied expedition 15,000 strong, composed of English, French, and Turkish troops of all arms, with five batteries of artillery, left the anchorage at Sebastopol

on the 22nd of May, 1855, and arrived off Kertch on the 24th. The Russians blew up their fortifications on both sides of the straits, destroyed three steamers and several heavy-armed vessels, and large quantities of provisions, ammunition, and stores. Operations were carried on against the chief Russian positions. A small garrison was left at Kertch and Yenikale, and the expedition returned June 12.

AZORES (Atlantic), or **WESTERN ISLANDS**, nine in number, were discovered by Joshua Van der Berg, of Bruges, about the year 1430. The Portuguese no sooner heard of the discovery than they sent out Cabral, who sighted one of the group in 1432; and in 1449 Prince Henry of Portugal took formal possession of the islands. Alfonso V. gave them in 1466 to his sister, the duchess of Burgundy, and they were colonized by the Dutch. When Philip I. seized the vacant throne of Portugal in 1580, they fell under the dominion of Spain. The earl of Essex and Sir Walter Raleigh failed in an attempt to capture them in 1597. They reverted to Portugal in 1640, and still remain in her possession. Angra, the capital of Terceira, one of the group, was made a bishop's see by Paul III. in 1534. Owing to volcanic disturbance, rocks and islands have frequently been thrown up from the sea. The most remarkable phenomena of this kind occurred in 1538, 1720, and 1811.

AZTECS.—The earliest known seat of this tribe was Aztlan, a country to the north of the Gulf of California, where they were dwelling in 1160. They soon after commenced their migrations, arriving at Tula in 1196. They removed to Zumpanco about 1216, and eventually settled on a group of islands to the south of Lake Tezeuco. They were reduced to slavery by the Colhuans in 1314; and moving to the westward of the lake, founded Tenochtitlan, their capital, on the site of which Mexico now stands, in 1325. They were assailed by the Spaniards under Cortes in 1519.

B

BAAL and **ASHTAROTH**, the former supposed to represent the sun, and the latter the moon, were idols worshipped by the Phœnicians, Chaldeans, and other ancient nations. The Israelites frequently fell into this idolatry. Josiah punished it with great severity, B.C. 624 (2 Kings, xxiii.)

BAALBEK (Syria), or **HELIOPOLIS**, the name given to the place by the Seleucidæ, both words signifying "the city of the sun," is by some supposed to correspond with the Baal Gad of scripture. Little is known of its early history. Julius Cæsar made it a Roman colony. Trajan consulted its famous oracle previous to his departure on his second Parthian expedition, A.D. 114. Antoninus either enlarged its temple to Jupiter or built a new one, that became one of the wonders of the world. Baalbec capitulated

to the Saracens, paying an enormous ransom, A.D. 635; it was sacked and dismantled by the caliph of Damascus in 748; seized by Tamerlane in 1401; and has since gradually declined. Thevet in 1550; Pococke in 1740; Maundrell in 1745; Wood and Dawkins in 1751; and Volney in 1785, are amongst the most celebrated travellers who have visited and described its ruins. This Syrian city must not be confounded with another Baalbec, or Heliopolis, in Lower Egypt, one of the earliest cities of which any record remains. Smith (Dict. of Greek and Roman Geog.) remarks concerning the last-mentioned city: "Its obelisks were probably seen by Abraham when he first migrated from Syria to the Delta, 1600 years B.C.; and here the father-in-law of Joseph filled the office of high-priest."

BABEL (Tower of).—Described Gen. xi. 1—9, and built 120 years after the Deluge, by the descendants of Noah, about B.C. 2247. Much controversy has been excited respecting its exact position. It is now generally believed that Babylon was built upon the site, if not upon the actual ruins of this temple.

BABŒUF'S CONSPIRACY.—Babœuf, a Jacobin, surnamed Gracchus, formed a conspiracy against the French Directory in 1796. His chief aim was to obtain a division of property. The deliberations of this society were carried on in a large vault under the Pantheon, where, as Alison (iv. ch. 24) remarks, "by the light of flambeaux, and seated on the humid ground, they ruminated on the most likely method of regenerating France." They had agents in the provinces, and they also elected a secret directory of public safety in Paris. Their design was at length acknowledged to be to establish what they termed "the Public Good," by means of a division of property, and the formation of a government consisting of "true, pure, and absolute democrats." They had framed a solemn instrument, called an "Insurrection Act," the publication of which was to be the signal for revolt. This was fixed to take place on the 21st of May, 1796; but one of the party having given information, the chief conspirators were arrested the day before. Babœuf and one of his associates suffered on the scaffold.

BABYLON (Asia).—The capital of the province of Babylonia, and afterwards of the Babylonio-Chaldean kingdom, called by Isaiah (xiii. 19) "the glory of kingdoms, the beauty of the Chaldees' excellency," was at one period the metropolis of the ancient world. Its history is naturally mixed up with that of the state to which it gave its name. "The Babylonian and Assyrian empires," says Sir John Stoddart, "in all historical records, are much blended together. These empires, whether distinct or united, possessed in very early times two vast cities; Babylon on the Euphrates, and Nineveh on the Tigris. The country on the Tigris was called Assyria; that on the Euphrates Babylonia; and the large inter-

vening space was commonly termed Mesopotamia, or 'between the rivers:' and this, together with Babylonia, seems to be meant in Scripture by the land of Shinar. According to the scriptural account, it would seem that Babylon was the first great city built after the Deluge, and that it was founded by Nimrod, a great-grandson of Noah, or at all events by a tribe of his descendants, bearing his name." The city of Babylon is supposed to have been built on the site of Babel (Gen. x. 10), the scene of the confusion of tongues, about B.C. 2247 (Gen. xi. 9). The next notice of Babylon in the Old Testament has reference to the invasion of Samaria, B.C. 730 (2 Kings, xvii. 24), and the generally received opinion is, that during the long interval of above 1,500 years, it formed a dependency of the great Assyrian empire.

B.C.

- 747. Babylon independent of Assyria. Nabonassar king.
- 721. Mardocempadus, king of Babylon, revolts against the king of Assyria.
- 699. Esarhaddon, or Sennacherib, king of Assyria, takes Babylon.
- 677 or 675. Asaridinus, king of Babylon, invades Judah, and makes prisoner its king, Manasseh, who is restored to his kingdom the following year.
- 625. Nabopolassar, king of Babylon, asserts his independence of the king of Assyria.
- 604. Nebuchadnezzar succeeds his father, Nabopolassar. During his reign the Babylonian empire attains its highest splendour.
- 569. Nebuchadnezzar sets up the "golden image," and becomes insane the same year.
- 558. Neriglissar, the Belshazzar of Scripture, king.
- 538. Babylon taken, and the kingdom annexed to the Persian empire by Cyrus.
- 518. Babylon revolts from Darius Hystaspes, king of Persia: it is besieged and taken the following year.
- 331. Babylon surrenders to Alexander the Great.
- 324. Alexander enters Babylon, and commences the restoration of its architectural greatness.
- 323. May. Alexander dies in Babylon.
- 321. Seleucus Nicator is made governor of Babylon.
- 315. Antigonus expels Seleucus, and establishes Ptolemy, son of Agenor, in his dignities.
- 312. Seleucus returns to Babylon, which he recovers, and founds the kingdom and dynasty of the Seleucidæ.
- 240. Invaded by the Gauls under Hierax: they are repulsed by Seleucus II.
- 64. On the conquest of Syria by Pompey, Babylon falls into the hands of the Romans.
- 62. Babylon forms part of the Roman province of Syria.

BABYLONIAN SOVEREIGNS.

B.C.

- Feb. 26, 747. Nabonassar.
- 733. Nadius.
- 731. Chinzirus.
- 725. Jugæus.

B.C.

- 721. Mardocempadus
- 709. Archianus.
- 704. (Interregnum).
- 702. Belibus.
- 699. Apronadius.
- 693. Regibalus.
- 692. Mesesimordachus.
- 688. (Interregnum).
- 680. Asaridinus.
- 677. Saosduchinus.
- 647. Chinaladanus.
- Jan. 27, 625. Nabopolassar.
- Jan. 21, 604. Nebuchadnezzar
- 561. Evil Merodach.
- 558. Belshazzar.
- 553. Nabonadius.
- 538. Cyrus takes Babylon.

BABYLONISH CAPTIVITY of the Jews.—This calamity, foretold by Isaiah (xxxix. 6) and Jeremiah (xxv. 9—11), lasted seventy years, from B.C. 606 to 536. It commenced under Jehoiakim (2 Chron. xxxvi. 5—7) and terminated with the decree issued for their restoration by Cyrus (2 Chron. xxxvi. 22 and 23).

BABYNGTON'S CONSPIRACY.—In 1586, Anthony Babyngton, an English gentleman, instigated by John Ballard, a Roman Catholic priest, entered into a conspiracy to assassinate Queen Elizabeth, with the view of placing Mary, queen of Scots, on the throne, and of restoring the Roman Catholic religion. John Savage (a soldier serving under the king of Spain, who had first made the proposal to assassinate the queen), and thirteen others, including Babyngton, embarked in this desperate project, and Mary herself did everything in her power to further its success. Intimation of the plot having been given to Walsingham by a spy, the conspirators were seized, brought to trial Sept. 13—15, and executed Sept. 20 and 21, 1586. Mary's share in this conspiracy alarmed Elizabeth, and was the principal cause of her subsequent trial and execution.

BACCHANALIA, or festivals of various kinds in honour of Bacchus, are said by Herodotus to have been of Egyptian origin (*see* DIONYSIA), and led to such abuses, as practised at Rome and in other parts of Italy, that they were suppressed by a decree of the senate B.C. 186. This decree, engraved upon a brazen table, was discovered at Bari in 1640, and is preserved in the imperial collection at Vienna.

BACHELORS were branded with infamy by the laws of Lycurgus, and at festivals were exposed to public derision. Dionysius of Halicarnassus notices a law requiring all persons of a certain age to marry. The Romans imposed a fine on bachelors by the Lex Julia, B.C. 18. It was, however, abolished by Constantine. Bachelors of twenty-five years of age, and widowers without children, were, by 6 & 7 Will. III. c. 6 (1694), required to pay yearly, so long as they remained single, a tax of one shilling. It was levied for five years, commencing May 1, 1695. By 8 & 9 Will. III. c. 20, s. 14, the tax was continued till Aug. 1, 1706, when it was suffered to expire. In addition to the

tax of one shilling per annum, every person of the undermentioned rank paid yearly as follows:—

	£.	s.	d.
Duke	12	10	0
Duke's eldest son	7	10	0
Younger sons, each	6	5	0
Marquis	10	0	0
Marquis's eldest son	6	5	0
Younger sons, each	5	0	0
Earl	7	10	0
Earl's eldest son	5	0	0
Younger sons, each	3	15	0
Viscount	6	5	0
Viscount's eldest son	4	7	6
Younger sons, each	3	6	8
Baron	5	0	0
Baron's eldest son	3	15	0
Younger sons, each	3	0	0
Baronet	3	15	0
Knight of the Bath	3	15	0
Knight bachelor	2	10	0
King's sergeant	5	0	0
Other sergeants at law, each	3	15	0
Esquire	1	5	0
Gentleman	0	5	0
Archbishop	12	10	0
Bishop	5	0	0
Dean	2	10	0
Archdeacon	0	12	6
Canon or prebendary	0	12	6
Doctor of divinity, law, or physic	1	5	0
Sons of archbishops, bishops, deans, archdeacons, canons or prebendaries, or of doctors of divinity, law, or physic	0	5	0
Persons with £50 per annum real estate, or personal property of £600, not charged in the above	0	5	0
Their sons, each	0	2	6

A registry was ordered to be kept by persons in holy orders, for the better collecting of the duty, by s. 20 of 6 & 7 Will. III. c. 6 (1694). By 43 Geo. III. s. 43 (1785), bachelors above the age of twenty-one years were required to pay annually, in addition to the usual tax, £1. 5s. for every male servant in their employ; and those that had three or more female servants, paid 10s. per annum for each, in addition to the ordinary tax.

BACKGAMMON.—This, or some similar game played with dice, was known to the Greeks. It was a favourite amusement amongst the Saxons, by whom it is said to have been invented about the 10th century. Dr. Henry attributes the invention to the Welsh. It is recorded of Canute, that he frequently played at backgammon, which was called the English game in the early part of the 14th century.

BACK-STAFF, or DAVIS'S QUADRANT, for taking the sun's altitude at sea, was invented by Captain J. Davis, about 1590. It has been superseded by later inventions.

BACTRA, called by Strabo and Pliny Zariaspa, though Heeren contends that they were different places, the capital of Bactriana, was one of the oldest centres of commerce and civilization in the world. Heeren says it was the first place of exchange for the productions of India; and that the great highways of commerce from east to west followed this direction. (*See BALKH.*)

BACTRIANA (Asia), or **BACTRIA.**—This ancient state, situated between Persia and

India, being watered by the Oxus, by which it was bounded on the north, varied at different periods in extent. Ninus, king of Assyria, is said to have invaded it with an immense army. All his efforts against its capital proved unavailing, until Semiramis suggested a plan for its capture, thereby gaining the favour of the king and a share of his throne. For a considerable period Bactriana formed part of the Persian empire, and in eastern traditions is represented as having been the seat of powerful and independent princes long before it became a Persian satrapy. Alexander conquered it in his sixth campaign, B.C. 329. Its Grecian governor Theodotus, called by Strabo Diodotus, threw off the yoke of the Seleucidæ about B.C. 250, and made it an independent state. It was afterwards conquered by the Scythians and Parthians, and remained under their yoke until Ardshir, or Artaxerxes, the founder of the dynasty of the Sassanides, restored the Persian empire, A.D. 226. It is now a dependency of the khanat of Bokhara, under the name of Balkh.

B.C.

250. Diodotus revolts from Antiochus II. of Syria, and founds the kingdom of Bactriana.

221. Euthydemus deposes and succeeds Diodotus II.

207. Antiochus of Syria defeats Euthydemus.

181. Commencement of the reign of Eucratides I., the period of Bactriana's prosperity.

168. Part of India is added to Bactriana.

143. Eucratides II. assassinate his father, and succeeds to his throne.

130. Bactria overrun by tribes of wandering Scythians, by whom the kingdom is destroyed.

SOVEREIGNS OF BACTRIANA.

B.C.

250. Diodotus I.

245. Diodotus II.

221. Euthydemus.

200. Demetrius.

B.C.

196. Menander.

181. Eucratides I.

143. Eucratides II.

BADAJOS (Spain).—This barrier fortress, the capital of a province of the same name, only five miles from the Portuguese frontier, has sustained numerous sieges, and was several times taken and retaken during the occupation of the peninsula by the Moors. It was besieged by the Portuguese in 1660, and was assailed, but without success, by a combined English, Portuguese, and Dutch force, Oct. 1705. Galway was beaten in a battle here by the Spanish army, May 7, 1709. Soult captured it March 11, 1811; and Wellington having been compelled to raise the siege June 10, in the same year, obtained possession April 7, 1812. Badajos was made an episcopal see at an early period. The cathedral was commenced in 1249; and its granite bridge was built in 1460, restored in 1597, and rebuilt in 1833.

BADAJOS (Treaty).—Between Spain and Portugal, was signed at Badajos June 6, ratifications were exchanged at Badajos June 16, and it was published at Madrid Aug. 8, 1801. It brought to a close the short contest between Portugal and Spain, which Napoleon I. had stirred up for the purpose of carrying out his ambitious designs. Spain restored all her

conquests, excepting Olivenza and its territory, which were ceded to her; and she guaranteed the prince regent of Portugal the entire possession of all his states and possessions. Portugal agreed to close her ports against England, and to pay the expenses of the war.

BADDESDOWN HILL (Battle), or BADON MOUNT.—This spot, near Bath, was the scene of a celebrated victory gained by the Britons over the Saxons in 493, according to Bede. This appears to be an error, as it is generally believed to have taken place in 520.

BADEN (Germany) was made a margraviate about the year 1130, by Herman II., grandson of Berthold, landgrave of Brisgau; his father, Herman I., having previously acquired Baden by marriage. The rank held by Baden is that of seventh in the Germanic Confederation, and in time of war it is required to furnish 10,000 men to the federal army.

A.D.

- 1130. Herman II. takes the title of Margrave of Baden.
- 1190. Herman IV. accompanies Frederick Barbarossa to the Holy Land, and dies with him in Cilicia.
- 1226. Herman V., the Pious, cedes the county of Dagsburg to the bishop of Strasburg.
- 1250. Death of Herman VI., who is succeeded by his infant son Frederick, under the regency of his mother, Gertrude of Austria.
- 1267. Oct. 29. Frederick is beheaded at Naples.
- 1283. Rodolph I. acquires part of Eberstein by purchase.
- 1288. Baden is divided among the four sons of Rodolph I.
- 1353. Rodolph VII. reunites Baden into a single state.
- 1405. Confederation of Marbach formed between Bernard, marquis of Baden, the archbishop of Mayence, the count of Wurtemberg, and some minor powers, against the emperor.
- 1462. June 19. Frederick II., king of the Romans, gains a great victory over Charles I. of Baden, and takes him prisoner.
- 1488. Christopher of Baden sends 4,000 men to deliver Maximilian, son of the emperor Frederick, from the inhabitants of Bruges.
- 1503. Christopher claims the marquissate of Hochberg: the claim is referred to the imperial tribunal.
- 1515. Aug. 1. Christopher abandons the government to his sons, Bernard, Philip, and Ernest, who rule as his vicars.
- 1527. Baden is divided into Baden-Baden and Baden-Durlach.
- 1533. Bernard establishes Protestantism in Baden-Baden.
- 1569. Oct. 3. Philibert of Baden-Baden assists the Catholics, and is slain at Moncontour.
- 1581. The lawsuit, in reference to the possession of Hochberg, terminates in favour of Baden.
- 1594. The creditors of Edward of Baden obtain permission from the emperor to indemnify themselves by seizing his territories.
- 1627. Arrangements as to territory made between the rulers of Baden-Baden and Baden-Durlach.
- 1683. Louis William, marquis of Baden-Baden, delivers Vienna from the Turks.
- 1707. Death of Louis William, the most warlike marquis of Baden-Baden.
- 1733. The French ravage Baden, and compel Louis George to seek refuge in Bohemia.
- 1771. Baden-Durlach united to Baden-Baden.
- 1796. Treaty of peace with the French republic.
- 1801. Baden receives an accession of territory by the treaty of Luneville.

A.D.

- 1803. Charles Frederick of Baden is raised to the rank of Elector.
- 1805. Brigat added to Baden by the treaty of Presburg.
- 1806. July 12. The elector, Charles Frederick, is raised to the rank of Grand-duke.
- 1815. March 25. Baden joins the allies against Napoleon.
- 1818. Aug. 22. Representative constitution granted.
- 1849. May 14. Insurrections in Baden. The grand-duke quits Carlsruhe.
- 1850. Sept. 6. Treaty of peace with Denmark and other powers.
- 1857. July 9. General amnesty for the political offenders of 1848 and 1849.
- 1859. Dec. 1. The concordat signed with the Pope June 28, is published.
- 1860. June 16. Interview, at Baden-Baden, between Napoleon III., the Prince Regent of Prussia, and other German princes.

GRAND-DUKES OF BADEN.

A.D.

- 1806. Charles Frederick.
- 1811. Charles Louis Frederick.
- 1818. Louis William Augustus.
- 1830. Charles Leopold Frederick.
- 1852. Frederick William Louis.

BADEN (Treaty).—Signed at Baden, in Switzerland, Sept. 18 (O.S. 7), 1714, between the emperor Charles VI. and Louis XIV. It confirmed the treaty of Radstadt. By one of its provisions Landau was ceded to France.

BAEZA (Spain).—Near this town, which is of great antiquity, and contains many Roman relics and inscriptions, the younger Scipio vanquished Asdrubal B.C. 208. Having fallen under the Saracen yoke, it was taken by the Spaniards A.D. 1239.

BAFFIN'S BAY.—This inland sea, between Greenland and the N.E. coast of America, was first explored in 1616, by the English navigator William Baffin, from whom it takes its name.

BAGAUDÆ.—An appellation given to the peasants of Gaul who rebelled against the Romans A.D. 287. Their work was executed with fire and sword. "They asserted," says Gibbon, "the natural rights of men, but they asserted those rights with the most savage cruelty." For some time they obtained the ascendancy, but were subdued by Maximian. The term was subsequently applied to other turbulent rebels.

BAGDAD (Asia), on the Tigris, was founded by Al Mansur, the second caliph of the Abbassides, in 762, and remained the seat of the caliphate until Feb. 20, 1258, when it was captured after a siege of two months by the Mongols, and Mostasem, the last of the Abbassides, was put to death. Tamerlane sacked the city July 23, 1401, erecting on its ruins a pyramid of 90,000 heads. Its Tartar rulers returned, but were expelled in 1417, by Kara Yusef. His descendants were in 1477 replaced by Usun Cassim, who was followed by the Suffide dynasty, of Persian origin, in 1516. The possession of the city was long contested by the Persians and the Turks, and amongst the numerous sieges it sustained, may be mentioned those of 1534, when it was captured by Soliman the Magnificent;

of 1590, when taken by Abbas the Great; of 1637, when it was captured by Amurath IV.,—30,000 Persians having been ruthlessly massacred; and of 1740, when Nadir Shah was repulsed by Achmet, who rendered the pashalic independent of the Porte. Its celebrated college was founded in 1233. A Nestorian patriarch resided at Bagdad, and the Greek metropolitan was expelled in 913.

BAGNALO (Treaty).—Concluded Aug. 7, 1484, between the Venetians on the one hand, and the king of Naples, the duke of Milan, and the Florentines, on the other. The news is said to have so affected Pope Sixtus IV. that it brought on a fit of the gout, which caused his death, Aug. 13, 1484.

BAHAMA ISLANDS (Atlantic), called also the **LUCAYOS**, consist of about twenty inhabited islands, with innumerable rocks and islets. St. Salvador, the chief of the group, was discovered by Columbus Oct. 11, 1492, being the first portion of America discovered by him. The Spaniards conveyed the natives to Mexico, and the islands remained unpeopled till colonized by the English, under a patent granted Dec. 4, 1630. In 1641 the Spaniards destroyed the colony, but it was re-established by the English in 1666, and remained in their hands till 1703, when it was ravaged by a combined French and Spanish fleet. It afterwards became notorious as a rendezvous for pirates, who were extirpated in 1718, when a regular colonial administration was established. In 1776 New Providence was stripped by the Americans of its artillery and stores, and the governor and some other officers were made prisoners. On the 8th of May, 1782, the islands surrendered to the Spaniards, but were restored to England by the 7th article of the treaty of Versailles, Sept. 3, 1783.

BAHAR, or BEHAR (Hindustan).—This territory, after changing rulers several times, was formally ceded to England by the treaty of Allahabad, Aug. 12, 1765.

BAHARITES, the first Mameluke dynasty that reigned in Egypt, were descended from Turks sold to slavery by the Tartars. They began to reign in 1244, and the last sultan of the race was expelled by the Borgites, or Circassians, the second Mameluke dynasty of Egypt, in 1381, after having reigned 137 years. (See **BORGITES**.)

BAHAWULPOOR (Hindustan).—This state, formerly ruled by deputy governors from Cabul, solicited an alliance with the English in 1808; and it came under the direct protection of the East-India Company in 1838. The khan having proved faithful, received as a reward, in Feb. 1843, a part of Scinde.

BAHREIN ISLANDS (Persian Gulf).—This small group of islands, celebrated for its pearl-fishery, is called by the natives **Awal**, or **Aval**. The Portuguese, who had seized them, were expelled by the Persians in 1622; and the islands have since fallen under the sway of different Arab chiefs. During the expedition of 1809 against the pirates in the neighbourhood, they were occupied by British troops.

BAIL.—"The system of giving sureties, or bail," says Sharon Turner (*Anglo-Saxons*, iii. Ap. i. ch. 6), "to answer an accusation, seems to have been coeval with the Saxon nation." The Statute of Westminster 1 (3 Edw. I. c. 15), in 1275, defined what persons were bailable, and what were not; and this act was enforced by 27 Edw. I. stat. 1, c. 3 (1299). By 1 Rich. III. c. 3 (1484), justices of the peace were allowed to bail offenders, and the facility thus accorded having led to some abuses, not less than two justices were, by 3 Hen. VII. c. 3 (1487), required. Bail was regulated by subsequent statutes, more particularly by the Habeas Corpus act (31 Chas. II. c. 2, 1679), which, as Hallam remarks (*Const. Hist. of Eng.* iii. ch. 12), "introduced no new principle, nor conferred any right upon the subject." Provisions against excessive bail are embodied in various statutes. Bail in cases of felony is regulated by 7 Geo. IV. c. 64 (May 26, 1826). This act, entitled "An Act for Improving the Administration of Criminal Justice in England," repealed several previous statutes.

BAILIFF.—Two bailiffs were appointed for the city of London in the first year of the reign of Richard I. (1189); though such officers under another name existed in Anglo-Saxon times. We learn from the "*Liber Albus*" that the sheriffs of the city of London were formerly styled bailiffs; and we know, from the same authority, that such officers were in existence at the time of the Norman conquest. In 1207 the office of sheriff superseded that of bailiff.

BAIOLENSIANS, or BAGNOLENSIANS.—Manichæans, so called from Bagnols, in Languedoc, where they sprung up in the 8th century. Another sect, with the same name, a branch of the Cathari, arose in Provence during the 12th century.

BAIZE.—The art of making baize was introduced into England by a body of Dutch artisans, who settled at Colchester in 1568; and their privileges were confirmed by letters patent under the great seal in 1612. An act of parliament was passed in 1660 (12 Chas. II. c. 22) for the regulation and protection of their trade. It took effect from Sept. 20, 1660.

BAKER.—In early ages every household prepared its own bread. Public bakers are first mentioned as existing at Rome B.C. 173. Athenæus speaks of the Cappadocians, the Lydians, and the Phœnicians as the best bakers. It is probable, the trade arose in the East. The punishments for bakers who transgressed the law were, at an early period of our history, extremely severe. Fabyan notices that in 1258 the tumbrel was temporarily substituted for the pillory; and that "sharpe correction upon bakers for making of light bread," was administered upon several of the fraternity in 1485. The bakers formed a brotherhood in the reign of Henry II., about 1155. The white-bakers existed as a company in 1308, and obtained in 1435 a new charter, which was confirmed by Henry the Seventh's successors. The

brown bakers, who are said to have existed as a company in 1380, were incorporated June 9, 1621.

BAKU (Asia).—This port, in the Caspian, and the neighbouring territory, were surrendered by Persia to Russia in 1723, and restored to Persia in 1735. The Russians seized Baku in 1801, and it was ceded to them by the treaty between Russia and Persia, Oct. 19 (O.S. 7), 1813.

BALACLAVA (Crimea).—A small port about ten miles to the east of Sebastopol. The harbour is commodious, though the entrance is very narrow; and it was with great difficulty that accommodation was obtained for the British ships during its occupation in the Crimean war. Our troops took possession Sept. 26, 1854, a portion of the fleet having already arrived. They improved the harbour, constructed quays, built a new town, with storehouses, hospitals, &c., and laid down a line of rail to the camp, about seven miles distant. Soon after the conclusion of the treaty of Paris, our army of occupation was gradually withdrawn, and the last soldier quitted the place during the summer of 1856.

BALACLAVA (Battle of).—Fought Oct. 25, 1854, between the Russians and the British and Turkish troops. Early in the morning a powerful Russian force, led by Liprandi, drove the Turks from some earthen redoubts facing the Tchernaya, a weak point in the English position. The further advance of the Russians was checked by the 93rd Highlanders, under Sir C. Campbell (Lord Clyde), and the enemy was quickly repulsed by a charge of the heavy cavalry. From this day the British lines were, on account of the insufficiency of our force, contracted, and the communication by the Woronzoff road was effectually closed.

BALACLAVA (Charge), called "The Ride of the Six Hundred."—Owing to some misconception of orders, the light cavalry brigade, only 670 strong, followed up the battle of Balaclava (Oct. 25, 1854), by charging the Russian infantry and cavalry in position, protected by a powerful artillery. The exploit is without a parallel in the annals of war. In spite of the fearful and almost hopeless nature of their task, that handful of British horsemen rode fearlessly onward. When at a distance, their ranks were shattered by a murderous discharge, and many a gallant fellow was struck down before he could reach the foe. The Russians quailed before this band of heroes. Their artillery fired upon the struggling mass of friend and foe. The heavy cavalry and the French Chasseurs d'Afrique covered their retreat. The glorious but fatal charge lasted twenty-five minutes. More than two-thirds of the men were killed or wounded, and 400 horses destroyed. The moral effect it produced was, however, extraordinary.

BALAGHAUT DISTRICTS (Hindustan).—These provinces once formed part of the Hindoo kingdom of Bijyanagur, and on its fall were divided into several independent

states, until conquered in rapid succession by Hyder Ali, between 1766 and 1780. On the dismemberment of Tipoo's empire in 1799, a considerable portion came into the possession of the East-India Company, and the remainder was taken in 1841.

BALAMBANGAN (Indian Archipelago).—This island was ceded by the king of Soooloo, in 1762, to the East-India Company, and a settlement was formed by them in the following year. In Aug. 1774, intelligence was received that the Spanish governor of the Manillas had threatened to destroy the works and fortifications in case the English settlers did not retire; and this threat was put into execution Feb. 24, 1775. Another settlement, founded in 1803, was abandoned, and the island is now uninhabited.

BALANCE OF POWER.—The first combined attempt to preserve the balance of power in European affairs was made during the invasion of Italy by Charles VIII. of France, 1494—1496. Incited by the emperor Maximilian I., the Italian states, and some other European powers, held secret conferences by night at Venice, and the celebrated league was signed at that city, March 31, 1495, between Austria, Milan, Rome, Spain, and the Venetian republic. Its object was to defeat the ambitious projects of the French king. Robertson remarks that princes and statesmen "had extended on this occasion, to the affairs of Europe, the maxims of that political science which had hitherto been applied only to regulate the operations of the petty states in their own country. They had discovered the method of preventing any monarch from rising to such a degree of power as was inconsistent with the general liberty; and had manifested the importance of attending to that great secret in modern policy, the preservation of a proper distribution of power among all the members of the system into which the states of Europe are formed." After showing that the attention of Italian statesmen was from that period directed to the maintenance of the principle, he adds: "Nor was the idea confined to them. Self-preservation taught other powers to adopt it. It grew to be fashionable and universal. From this era we can trace the progress of that intercourse between nations, which has linked the powers of Europe so closely together; and can discern the operations of that provident policy which, during peace, guards against remote and contingent dangers; and, in war, has prevented rapid and destructive conquests." The principle was first publicly acknowledged at the peace of Westphalia, Oct. 24, 1648.

BALASORE (Hindustan).—Different European nations established factories here at the commencement of the intercourse with India. The English factory was destroyed by fire in Nov. 1688. The town itself was ceded to England by the Danes in 1844.

BALÆARIC ISLANDS (Mediterranean).—This group, off the coast of Spain, is supposed to have been colonized by the Phœnicians. The Carthaginians reduced the inhabitants

to subjection. After the fall of Carthage they regained their independence. The Romans, under the pretence that the people were pirates, took possession of the Balearic Islands B.C. 123. The Vandals seized them A.D. 423, and the Moors A.D. 790; but they were wrested from the latter by the troops of Charlemagne in 799, and placed under his protection. The Moors, however, regained their footing and were not expelled until 1286. (*See* MAJORCA and MINORCA.)

BALISTA.—Described by Gibbon as “a powerful cross-bow, which darted short but massy arrows.” Belisarius made use of the balista in his defence of Rome against the Goths, A.D. 537. The more modern weapon is supposed to have been a species of “gyn,” rather than a hand instrument. Its introduction into England is usually assigned to the 12th century. Richard I. appears to have been the first to adopt the manubalista after its use had been prohibited by Innocent II. in 1139.

BALKH (Asia), the ancient Bactriana, is now a dependency of the khanat of Bokhara. Its chief city, also called Balkh, the ancient Bactra, is styled by Orientals the “Mother of Cities,” on account of its great antiquity. It was taken from the Uzbeg Tartars by the khan of Bokhara in 1820.

BALL.—Games with the ball have been common amongst ancient and modern nations. The Anglo-Saxons played at ball. An amusement of this kind was in vogue in this country amongst ladies and gentlemen in the 14th century, and it became fashionable at courts in the 16th. Fitzstephen, who wrote in the reign of Henry II., in alluding to sports at Shrove-tide, says, — “After dinner, all the youth of the city goeth to play at the ball in the fields; the scholars of every study have their balls. The practisers also of all the trades have every one their ball in their hands.” Some writers suppose football is here meant. A complaint of the citizens of London was brought before the Privy Council in July, 1446, respecting the erection of several places where the people played “at the ball, cleche, and dice.” It has been highly recommended as a gymnastic exercise.

BALLET.—Dancing applied to theatrical representation is an ancient amusement, supposed to have been revived in Italy during the 16th century. Baltagerini, director of music to Catherine of Medicis, was the first to introduce the ballet into France, where it became very popular in the time of Louis XIII. Since that period it has undergone various improvements. The first dramatic piece performed in England, in which the story was entirely carried on by dancing and action, was a production by Mr. John Weaver, called “The Tavern Bilkers,” performed at Drury Lane in 1702. A work of higher pretensions was produced by the same author at Drury Lane in 1716. It was entitled “The Loves of Mars and Venus,” and its success led to the establishment, in

this country, of the ballet as a branch of theatrical amusements.

BALLINAMUCK (Battle).—A French force landed at Killala Aug. 22, 1798, and having been joined by some Irish rebels, were defeated and taken prisoners at Ballinamuck, Sept. 8, 1798.

BALLIOL COLLEGE (Oxford).—Founded by John Balliol, of Barnardcastle, Durham (father of Balliol, king of Scotland), between the years 1263 and 1268. He died in 1269, during the progress of the work, which was completed by his widow. Her statutes, dated the 10th year of the reign of Edward I. (1282), are still preserved in the college.

BALLOON.—Albert of Saxony, a Dominican monk, who flourished at the commencement of the 14th century, was the first to form a correct notion of the principle on which balloons might be constructed. The idea was taken up by several learned men; and Bishop Wilkins, in 1680, speaks of a carriage with sails, like a windmill, to be propelled through the air. The brothers Montgolfier, paper-makers, at Annonay, near Lyons, were the first to secure a practical result; and June 5, 1783, launched the first balloon, which, after them, was then called a Montgolfier. The experiment was repeated at Paris, Aug. 27, 1783; and on the 21st of November, in the same year, M. Pilatre de Rozier, and the Marquis d'Arlandes, made the first ascent from Paris, which was accomplished with success, and the adventurers alighted in safety about six miles from the point at which they had started. “The Montgolfiers,” says a writer in the “Encyclopædia Britannica,” “had the annual prize of 600 livres adjudged to them by the Academy of Sciences; the elder brother was invited to court, decorated with the badge of St. Michael, and received a patent of nobility; and on Joseph a pension was bestowed, with the further sum of 40,000 livres, to enable him to prosecute his experiments with balloons.” The first ascent in a hydrogen balloon was made Dec. 1, 1783, at Paris, by Messieurs Charles and Roberts, who, after a pleasant voyage, alighted in safety about twenty-five miles from the spot where they started. Since that time great improvements have been made in the construction of balloons. The first ascent made in England was by Lunardi, Sept. 21, 1784. Blanchard and Jefferies crossed the Channel, from Dover to Calais, Jan. 7, 1785. Count Zamflecari, Admiral Vernon, and a Miss Grice, of Holborn, took their seats in the ear of one of these machines March 23, 1785. The balloon was, however, over-weighted, and the lady was compelled to retire, which she did with great reluctance, and burst into tears at her disappointment. A successful ascent was made at Ranelagh Gardens, Dublin, Jan. 20, 1785. Balloon ascents have since been of frequent occurrence; and we read of one at Constantinople, by a Persian physician, in 1786. Rozier and

Romain were killed through the ignition of their balloon, in an attempt to cross the Channel, June 15, 1785; and William Sadler, son of the celebrated aéronaut of that name, was killed by a fall from a balloon in 1825. The French are said to have employed balloons on various occasions for the purpose of reconnoitring the position of an enemy. The most remarkable instances occurred at Liege, in September, 1794, and during the Italian campaign of 1859.

BALLOT was used in several states of ancient Greece, as well as amongst the Romans. It was first introduced at Rome for the election of magistrates, by the *Gabiana lex*, B.C. 139; for state trials, treason excepted, by the *Cassia lex*, B.C. 137; and for the legislative assembly, by the *Papinia lex*, B.C. 131. The ballot was used in the republic of Venice. It was employed at a political debating society, called the *Rota*, held nightly, in 1659, at Miles's coffee-house, New Palace Yard, Westminster. Its adoption in the election of members for the House of Commons has been frequently urged.

BALLYHOE (Battle).—O'Neill was checked in his career of plunder and devastation within the British pale, at a battle fought at Ballyhoe, in August, 1539.

BALLYNAHINCH (Battle).—Fought during the Irish rebellion, June 13, 1798. The rebels, led by Munroe, a draper of Lisburn, were defeated, and this terminated the rising in the north of Ireland.

BALMORAL CASTLE.—Queen Victoria selected this mansion and domain, situated on the right bank of the river Dee, about forty-five miles from Aberdeen, as a royal residence, in September, 1848. The property, which had been previously rented, was purchased in 1852, and a new castle has been erected on the estate.

BALTA-LIMAN (Treaty).—Concluded between Russia and Turkey, at Balta-Liman, in 1849. It arose out of the transactions relating to the insurrection in the Danubian provinces and the Russian occupation. Russia was secured in the same rights as she then exercised in the principalities for seven years.

BALTIC EXPEDITIONS.—During the war with Russia, two expeditions were sent into the Baltic Sea by the English government. The first, under the command of Sir Charles Napier, sailed from Spithead, March 11, 1854, and was afterwards joined by a French squadron, and reinforcements from England. The fleet entered the Baltic Sea March 20th. Several merchantmen were captured, and the Russian ports blockaded, until more decisive operations were undertaken on the arrival of a French expeditionary force (*See ALAND ISLES*). The fleet returned home during the autumn. The second, accompanied by gun and mortar boats, under the command of Admiral Sir R. S. Dundas, sailed April 4, 1855, an advance squadron having left March 20. It was joined by a French squadron June 1. Several

infernal machines were taken up, and the ships penetrated within sight of Cronstadt. The chief operations at Hango and Sweaborg are described under these titles. The fleets returned during the autumn.

BALTIMORE (Battle).—The Americans were defeated by the English near this town, in the United States, Sept. 12, 1814.

BAMBERG (Bavaria) is said to have been founded by a colony of Saxons in 804. Other authorities state that it was founded by the emperor Henry II. in 1004, finished in 1012, and rebuilt, after a conflagration, in 1110. It surrendered to the Prussians May 16, 1759, and during two days was given up for pillage. It was again captured in 1763. Bamberg was made a bishopric in 1007; and in 1020, on the visit of Pope Benedict VIII. to Germany, the emperor presented the city and bishopric to the Roman see, on condition of receiving every year a white horse and a hundred silver marks. The bishopric afterwards became independent, was secularized in 1801, and assigned to Bavaria in 1803. Councils were held here in 1020, 1052, and 1148.

BAMBOROUGH, or BAMBURG (Northumberland).—This ancient town was built by Ida, who reigned twelve years, from 547. Bede says it was called *Bebba*, after its queen. It was frequently pillaged by the Danes. The castle, built in 1070, was wrested by stratagem from his rebellious barons by William II., in 1096, and was besieged and taken by Edward IV., Dec. 24, 1463.

BAMBEAN (Battle).—Fought between Dost Mohammed Khan's army and his Oosberg allies, under the Walee of Khooloom, and a small English and Sepoy force, commanded by Brigadier Dennie, Sept. 18, 1840. The former were completely routed, and their leader fled into Kohistan.

BAMFLEET (Essex).—This fortress was stormed and captured by king Alfred, and several Danish ships in the neighbourhood were destroyed in 894.

BAMPTON LECTURES.—Founded by Rev. J. Bampton, canon of Salisbury, who bequeathed to the university of Oxford, estates, the proceeds of which were to be devoted to the endowment of eight divinity lecture-sermons, to be preached every year at Great St. Mary's. The cost of the publication of the lectures, within two months of delivery, was to be defrayed out of the endowment. The first course was delivered in 1780, by the Rev. J. Bandinel. Only those who have taken the master's degree at Oxford or Cambridge are eligible; and a second course by the same person is not allowed.

BANBURY (Oxfordshire).—In 1125, Blois, bishop of Lincoln, erected a castle here, which was frequently assailed. The royalists captured it in 1642, defended it with great gallantry during a siege of thirteen weeks in 1644, and again in 1646. The parliamentary party demolished it when it came into their possession. A battle was fought at Danesmore, near this town, Wednesday, July 26, 1469,

in which the Lancastrians were defeated by King Edward's troops.

BANCA, or **BANJA** (Indian Ocean).—This island, possessing tin mines, discovered in 1710, was ceded to the East-India Company by sultan Najemudin, of Palembang, in 1812. By the second article of the convention of August 13, 1814, the English ceded the island to the king of the Netherlands, in exchange for Cochin and its dependencies, on the coast of Malabar.

BANCROFT'S HOSPITAL.—Almshouses, near Mile End, erected in 1735, pursuant to the will of Francis, grandson of Archbishop Bancroft. Accommodation is afforded for twenty-four poor men of the Drapers' Company, and a school for one hundred boys.

BANDA ISLANDS (Pacific), ten in number, were discovered, in 1511, by the Portuguese, who were expelled by the Dutch in 1603. The English established a factory in 1608. After various struggles between them and the Dutch, the latter obtained possession in 1664. They retained their hold until March 8, 1796, when the islands surrendered to an English squadron. Having been restored to the Dutch, by the treaty of Amiens, in 1802, they were again captured by the English, Aug. 9, 1810, and once more restored to the Dutch at the peace of 1814.

BANGALORE (Hindustan), was captured by Lord Cornwallis, March 22, 1791. The fortress was, however, restored to Tippoo Saib, by the treaty of peace of March 19, 1792. He destroyed it, but it was repaired in 1802.

BANGOR (Caernarvonshire) was made a bishopric early in the 6th century, Daniel, abbot of Bangor, in Flintshire, its first bishop, having been appointed in 516. The cathedral was destroyed in 1071; and having been rebuilt, suffered severely in subsequent wars. An order for union of the see with St. Asaph, issued in 1833, was rescinded, by 10 & 11 Vict. c. 108, July 23, 1847.

BANGOR (United States) was captured by a party of English sailors and marines, Sept. 3, 1814.

BANGOR-ISCOED (Flintshire), or **BANCHOR**, which must not be confounded with Bangor, in Caernarvonshire; or **Benchor**, in Ireland; was the seat of the largest ancient monastic establishment in Great Britain. It contained above 2,000 monks, and was founded by Dunod in the beginning of the 6th century. Ethelfrith, king of Northumberland, instigated it is supposed by Augustine, who was resolved to reduce the primitive Christian Church in these islands to subjection to Rome, destroyed the monastery and massacred all the monks and students. This event probably took place in 603, but as some confusion has arisen in the chronology of the time, the date cannot be ascertained with certainty. Augustine is said to have died in 604, though there is some doubt on the subject. Bede says, Augustine foretold of these monks that if they would not join in unity with their brethren, they should be

assailed by their enemies, and that if they would not preach the way of life to the English people, they should perish at their hands.

BANGORIAN CONTROVERSY.—During the reign of William III., the Lower House of Convocation had requested "that some synodical notice might be taken of the dishonour done to the Church by a sermon preached by Mr. Benjamin Hoadley, at St. Lawrence Jewry, Sept. 29, 1705, containing positions contrary to the doctrine of the Church, expressed in the first and second parts of the homily against disobedience and wilful rebellion." The enmity of this writer's opponents was further excited by a sermon which he preached before George I., March 31, 1717, and afterwards printed under the title, "The Nature of the Kingdom or Church of Christ." He had been made bishop of Bangor in 1715; was translated to Hereford in 1721; to Salisbury in 1723; and to Winchester in 1734. What they termed the dangerous tenets of this discourse, and a work entitled, a "Preservative against the Principles and Practices of the Non-Jurors," were denounced in the report of a committee of the Lower House of Convocation in 1717. This gave rise to a general paper war between the supporters and opponents of Bishop Hoadley's views on various points, and it is known as the Bangorian Controversy.

BANK OF ENGLAND.—Incorporated by royal charter, July 27, 1694, was projected by William Paterson, who, with other merchants in London, subscribed £1,200,000 as a loan to the Government, to bear interest at 8 per cent. per annum. The first charter provided that at any time after the 1st of August, 1705, on a year's notice and the repayment of the £1,200,000, the said charter should cease and determine. It received the sanction of Parliament, and thus were the governor and company of the Bank of England established. Further loans have since been advanced to the government, the rate of interest has been reduced, and the charter has been repeatedly renewed and extended. The last, known as Sir R. Peel's act (7 & 8 Vict. c. 32), received the royal assent July 19, 1844. The bank suspended cash payments in 1696, but having recovered from a temporary pressure flourished greatly, until again compelled by the drain upon its resources, caused by the French war at the close of the last century, to suspend cash payments, for which an order in council appeared Feb. 27, 1797, and they were not resumed until May 1, 1821. By the sixth section of the Bank Charter Act, of 1844, the directors are required to render a weekly account in a prescribed form to the Commissioners of Stamps and Taxes, to be published in the next succeeding *Gazette*. Since 1823 branch establishments of the Bank of England have been formed in several provincial towns. Its business was transacted in the Grocers' Hall until June 5, 1734, when it was removed to a building that forms part of the

present Bank of England. Sir John Soane commenced alterations in 1788.

BANK OF IRELAND, was established by act of Parliament, with privileges similar to those enjoyed by the Bank of England, and opened in June, 1783. In 1802, the governors purchased the buildings in College Green used as the houses of Parliament previous to the Union in 1801. These were adapted for the purposes of the bank, which was transferred here in 1808. The Bank of Ireland is now regulated by 8 & 9 Vict. c. 37 (July 21, 1845).

BANK OF SCOTLAND, the first establishment of the kind in that part of the kingdom, was founded at Edinburgh in 1695, receiving a charter from William III. and the Scottish Parliament. The second, the Royal Bank of Scotland, was incorporated in 1727.

BANKRUPTCY.—The word bankruptcy is derived through the French from *bancus* the counter, *ruptus* broken. Ancient legislation on this subject was extremely severe. According to the generally received interpretation, the Roman Law of the Twelve Tables gave to creditors the power of cutting a debtor's body in pieces, each of them receiving a proportionate share. Debtors were imprisoned in chains, subjected to stripes and hard labour at the mercy of the creditor, and liable with their wives and children to be sold to foreign servitude. The severity of these laws was relaxed by the "Lex Poetelia Papiria," B.C. 326, and the Christian emperors subsequently introduced the law of cession, by which a creditor making *cessio bonorum* (i.e., giving up all his goods), was exempted from personal penalties. The first English statute on this subject, 34 & 35 Hen. VIII. c. 4 (1543), was principally directed against the frauds of traders, who were in the habit of acquiring goods from other persons and then escaping to foreign countries. This was made felony, and punished capitally. By 13 Eliz. c. 7 (1571), bankruptcy was confined to those who used the trade of merchandise, or sought their living by buying and selling. By 21 James I. c. 19 (1624), a bankrupt might, unless his inability to pay his debts arose from some casual cause, be set upon the pillory for two hours, and have one of his ears nailed to the same and cut off. It was repealed in 1816. By many subsequent statutes scriveners, aliens, denizens, bankers, brokers, factors, farmers, graziers, &c., were made liable to bankruptcy. All these statutes were consolidated by 6 Geo. IV. c. 16 (May 2, 1825). These laws were again amended and consolidated by 12 & 13 Vict. c. 106 (Aug. 1, 1849); and this act was further amended by 15 & 16 Vict. c. 77 (June 30, 1852), and by the Bankruptcy Act of 1854. The Court of Bankruptcy was established by 1 & 2 Will. IV. c. 56 (Oct. 20, 1831). This act was amended by 5 & 6 Will. IV. c. 29 (Aug. 21, 1835); and by 5 & 6 Vict. c. 122 (Aug. 12, 1842), which came into operation Nov. 11, 1842. A further alteration was made in the law by 17 & 18 Vict. c. 119 (Aug. 11, 1854). The Irish bank-

ruptcy laws were consolidated by 6 Will. IV. c. 14 (May 20, 1836); and they were further amended and assimilated to the English law by several subsequent statutes, the last being 20 & 21 Vict. c. 60 (Aug. 25, 1857). The Scotch bankruptcy laws were consolidated by 19 & 20 Vict. c. 79 (July 29, 1856), which came into operation Nov. 1, 1856, and was further amended by 20 & 21 Vict. c. 19 (Aug. 10, 1857).

BANKS.—These establishments existed amongst the Greeks and Romans. In modern times the Jews were the first bankers. Banks were established in Italy in the 12th century. The first public bank was founded at Venice in 1157, and the first bank of exchange and deposit was established at Barcelona in 1401. Money matters were for some time regulated by the Royal Exchangers, but their calling fell into disuse until revived by Charles I. in 1627. The Royal Mint, in the Tower of London, was used as a bank of deposit until Charles I. by a forced loan, in 1638, destroyed its credit. The Goldsmiths' Company undertook private banking in 1645, but on the closing of the Exchequer in 1672 their transactions terminated. Child, of Fleet Street, was the first regular banker, and he commenced business soon after the Restoration. (See **BANK OF ENGLAND**.)

BANNATYNE CLUB, was established by Sir Walter Scott in 1823, for printing works illustrating the history, antiquities, and literature of Scotland.

BANNER.—Is of very early origin, being referred to in Numbers, ii. 2. Banners of some kind or other were used amongst all ancient nations, and the practice has been followed in modern times. Bede represents Augustine and his companions going in procession to meet Ethelred in 597, bearing banners, with a silver cross, and the image of our Saviour. Alfred captured the celebrated Danish banner, called the Raven, in 878. In the monasteries various banners were kept for festivals and great commemorations.

BANNERET, or **KNIGHT BANNERET**, a person who received the order of knighthood, under the royal standard, for some distinguished service in the field. Shakespeare (King John, i. 1) speaks of,—

"A soldier, by the honour-giving hand
Of Cœur-de-lion, knighted in the field."

The time and place at which the dignity was first conferred have excited much controversy. "No man," says Hallam (Middle Ages, iii. ch. 9, pt. 2), "could properly be a banneret unless he possessed a certain estate, and could bring a certain number of lances into the field. His distinguishing mark was the square banner, carried by a squire at the point of his lance; while the knight-bachelor had only the coronet or pointed pendant. When a banneret was created, the general cut off this pendant to render the banner square." Selden states that the first account of this dignity occurs

in the reign of Edward I. Edmondson traces it as far back as 736. The Black Prince made Sir John Chandos a knight-banneret in 1367. The order was discontinued from 1642; the last, Sir John Smith, having been created after the battle of Edgehill by Charles I., in that year. It was, however, revived by George II. after the battle of Dettingen, in 1743; and Sir Wm. Erskine was made a knight-banneret by George III. in 1764, for distinguished services at the battle of Emsdorff. In 5 Rich. II. s. ii. c. 4 (1382), bannerets are mentioned amongst those summoned to Parliament.

BANNOCKBURN (Battles).—Two bearing this name were fought; the first at Bannockburn, Scotland, between the English and the Scotch, in which the latter gained the victory, and secured their independence, Monday, June 24, 1314; and the second, at Sauchieburn, near Bannockburn, June 11, 1483, on which occasion James III., of Scotland, was slain by an army raised by the partisans of the duke of Albany.

BANNS.—Tertullian, who died A.D. 245, states that the primitive Church was forewarned of marriages. The practice was probably introduced into France in the 9th century. The bishop of Paris enjoined it in 1176; and it was regularly established in the Latin Church by the fourth Lateran council, in 1215. The earliest enactment on the subject in the English Church is the 11th canon of the synod of Westminster, in 1200, which decrees that no marriage shall be contracted without banns thrice published in the church. The 62nd canon of the synod of London (1603-4), forbids the celebration of marriage unless the banns have first been published three several Sundays, or holy days, during divine Service, in the parish churches or chapels where the parties dwell. The publication was required to be made on Sundays, and not on holy days, by 26 Geo. II. c. 33 (1752). This act has been superseded by 4 Geo. IV. c. 76 (1823), and various laws have since then been passed, but this regulation remains in force. By the latter act it is provided that if the marriage does not take place within three months after the publication of the banns, they must be republished.

BANQUETING HOUSE (Whitehall).—Intended for the reception of ambassadors and state ceremonials, was built by Inigo Jones in 1606. It occupies the site of an old building that had been devoted to similar uses. The ceiling was painted by Rubens.

BANTAM (Java).—The Dutch commenced trading at this place in 1602, and the English in 1612, and, after various disputes, the latter established a factory in 1619; but were expelled in 1683 by the Dutch, who abandoned the place in 1817.

BANTRY BAY (Sea Fight).—Admiral Herbert, afterwards Lord Torrington, with 19 sail of the line, attacked, in this bay, May 1, 1689, a French fleet of 28 ships of war, carrying from 60 to 70 guns each, and

5 fire-ships. A short action ensued, when Admiral Herbert tacked in order to obtain the weather-gauge, and the engagement was not renewed. A French fleet carrying 16,000 troops, intending to co-operate with the Irish rebels, anchored in this bay on the 22nd of December, 1796. They were compelled by a severe gale to cut their cables and stand out to sea on the 25th, and it was not until the 29th that they were able, in a sadly damaged state, to again cast anchor in the bay. A landing was not even attempted, and the remnant of the expedition returned to France. The men in Admiral Michell's squadron mutinied here Dec. 1 to 11, 1801. The trial of fourteen of the mutineers commenced on board the *Gladiator*, at Portsmouth, Jan. 8, 1802, and terminated on the 12th, when thirteen out of the fourteen culprits were sentenced to death, and suffered on the 15th; the day on which the trial of some of their associates commenced.

BAPHÆON (Battle).—Othman, founder of the Ottoman empire, passed the heights of Mount Olympus, descended into the level country of Bithynia, and defeated the emperor Andronicus III., at Baphæon, in the commencement of the 14th century.

BAPTISM.—The first use of baptism is ascribed by Lightfoot to Jacob, on the admission of the proselytes of Shechem into his family and the Church of God, about B.C. 1732 (Gen. xxxv.). The Jews administered baptism to all Gentiles before admitting them into their church; but baptism was not made a permanent institution until the time of John the Baptist, who performed the rite in the waters of Jordau on those that flocked to hear his preaching in the autumn of the year 26 (Matt. iii. 6); and Christ himself was baptized by him in January of the year 27 (Matt. iii. 13-15). It was practised in various forms by the primitive Church, and was received as the initiatory rite by Christians, though certain heretics rejected it altogether. The ceremony was at first, according to the testimony of Justin Martyr, who wrote in the 2nd century, and of Tertullian, who wrote in the 3rd, performed by trine immersion in rivers. This is said to have been discontinued on account of persecution. Baptistries containing pools for the performance of the rite were erected outside the churches about the 3rd century. Sacred fountains were constructed in the porches about the 4th century, and in the 6th century within the churches. The early English Church retained the practice of immersion till a late period, as the council of Chelsea, July 27, 816, condemned the innovation of sprinkling. The Quakers reject baptism altogether.

BAPTISTS.—The name applied to several sects who deny the validity of infant baptism, and require immersion, after the example of John the Baptist. They are in many respects followers of the Anabaptists, who arose in Germany in 1521. They are divided into several sects: the chief in England are the General, or Arminian Baptists, who believe

that God has excluded no man from salvation by any sovereign decree; and the Particular, or Calvinistic Baptists, who published a confession of faith in 1643, which was reprinted in 1644 and 1646, and revised in 1689. The first congregation of English Baptists, the followers of John Smith, who died at Leyden in 1610, was organized in London in that year. These were General Baptists, and the Particular Baptists trace their origin to a congregation established in London in 1616. Their first institution in America was at Providence, in 1639. (*See ANABAPTISTS.*)

BAR (Confederation of).—The Roman Catholics of Poland, during their fierce religious struggles with the Dissidents, the latter being supported by the Russians, seized the fortress of Bar, in Podolia, and formed the Confederation of Bar, in 1768. Anarchy ensued, and the confederates were defeated by the combined forces of Austria, Prussia, and Russia, those powers having coalesced for the purpose of interfering in Poland.

BARBADOES (Atlantic), one of the Caribbee islands discovered by the Portuguese at the close of the 15th century. The English first landed here in 1605; and their first settlement was formed in 1614. Various disputes having occurred between different claimants, the earl of Carlisle obtained the right of possession by patent, dated July 2, 1627. Sir William Courteen, an English merchant, had fitted out ships to effect a settlement, one of which landed colonists Feb. 17, 1625, who founded Jamestown. He was displeased at this arrangement, and obtained a grant of the island in 1628; but by another patent, dated April 7, 1629, Carlisle was confirmed in the possession. It afforded a refuge to the royalists, and was captured by the republicans in 1652. After the Restoration, litigation ensued between rival proprietors, and these led to the imposition of a tax on the inhabitants, which was not repealed until 1838. Barbadoes was devastated by tremendous hurricanes in August, 1675, 1780, and 1831; and was created a bishop's see in 1824.

BARBARY (Africa).—This term has been applied to describe the northern portion of Africa, divided, both in ancient and modern times, into several states. The name is supposed to be derived from the Berbers, who occupied the country on its invasion by the Saracens in the 7th century.

BARCASTRO (Spain), or **BALCASTRO**.—This city was taken from the Moors in 1097 by Pedro I., king of Aragon. A sanguinary struggle occurred in its suburbs between the Carlists and the Queen's troops June 2, 1837. Both parties claimed the victory. The Carlists, however, crossed the Cinca and entered Catalonia without opposition on the 5th of the same month. It is the seat of a bishop.

BARBER.—The art of the barber was practised in Greece about B.C. 420. Their shops were then, as in more modern times, celebrated as places of gossip. Barbers are said

to have been introduced into Rome from Sicily, B.C. 299. Formerly barbers practised surgery in England. Chicheley published a decree in 1415 forbidding them to keep their shops open on Sundays. The barbers, long an ancient company, were incorporated by letters patent Feb. 24, 1462. It was confirmed by Henry VII. and Henry VIII. By city law, in the time of Edward I. (*Liber Albus*), barbers who were so bold and daring as to expose blood in their windows, instead of having it privily conveyed into the Thames, were subject to a fine of two shillings.

BARBER-SURGEONS.—Though the barbers at first practised surgery, yet a company of surgeons had been formed, but not incorporated, consisting, as Stow states, of not more than twelve persons at the commencement of the reign of Henry VIII. In 1540 (32 Hen. VIII. c. 42), an act was passed uniting the barbers and the surgeons in one body corporate, called "Masters or Governors of the Mystery and Commonalty of Barbers and Surgeons of London." It provided that none of the company that used barbering and shaving should occupy any surgery, letting of blood, or any other thing belonging to surgery, except only drawing of teeth; nor he that used the mystery of surgery, should exercise the feat or craft of barbering or shaving. They were made distinct corporations in 1745, by 18 Geo. II. c. 15.

BAR-SUR-AUBE (Battle).—The allies obtained a signal victory over the French near this town, in France, Feb. 27, 1814.

BARCA (N. Africa).—This maritime district, the ancient Cyrenaica, was colonized from Cyrene, B.C. 560, and formed a part of the "Libya about Cyrene," mentioned in the Acts (ii. 10). The Persians besieged and captured its chief town, Barca; and it was conquered by the Saracens in 641. It was a bishopric of the early Church.

BARCELONA (Spain).—The foundation of this ancient city is assigned by tradition to as early a period as 400 years before the building of Rome. Hamilcar Barcas, the Carthaginian, is said to have restored it B.C. 235; and from him it received the name of Barcius. The Carthaginians were expelled B.C. 206; and it belonged to Rome from B.C. 146 until A.D. 411, when it was taken by the Goths. The Moors captured it A.D. 718, and Charlemagne in 801. It became the capital of a Spanish march, held by the counts of Barcelona, until their title was merged in that of Aragon in 1137. Its inhabitants having revolted, the city was besieged by John II., of Aragon, and captured Oct. 17, 1471. It became a great centre of commerce in the 15th century; and the first bank of exchange and deposit in Europe was established here in 1401. Barcelona has since that period sustained several sieges. The French took it Aug. 7, 1697; it was restored by the treaty of Ryswick, and taken again Oct. 9, 1705; by the eccentric Lord Peterborough, Sept. 13, 1706; and by the duke of Berwick, after a long siege, Sept. 12, 1714.

The French captured it on their invasion of Spain, Feb. 28, 1808. It was made the seat of a bishop at an early period. Councils were held here in 540; Nov. 1, 599; in 906; Nov. 20, 1054; and in 1068. Its university, established in 1430, was suppressed in 1714, and restored in 1841.

BARCELONA (Treaties).—A treaty between Charles VIII. of France, and Ferdinand and Isabella of Spain, was signed by the former at Tours, and by the latter at Barcelona, Jan. 19, 1493. It was an alliance offensive and defensive between France and Spain. Charles VIII. ceded the counties of Roussillon and Cerdagne to Spain. Another was concluded at this place between the emperor Charles V. and Pope Clement VII., June 29, 1529. Robertson says that Charles, among other articles, agreed to restore all the territories belonging to the Ecclesiastical state; to re-establish the Medici at Florence, and give his daughter to Alexander, the head of that family; and to put it in the Pope's power to decide respecting the fate of Sforza and the possession of the Milanese. Clement VII. gave the emperor the investiture of Naples without the reserve of any tribute, but the present of a white steed in acknowledgment of his sovereignty; absolved all who had been concerned in assaulting and plundering Rome, and permitted Charles and his brother Ferdinand to levy the fourth of the ecclesiastical revenues throughout his dominions. Other treaties of no great importance were also concluded at Barcelona.

BARCELONA, NEW (S. America).—This town was founded by the Spaniards in 1634. The province of the same name, of which it was the capital, with six other provinces, formed themselves into the American confederation of Venezuela, April 19, 1810.

BARDENEY (Lincolnshire), or BARDNEY.—This ancient monastery, in the province of Lindsey, is said by Bishop Tanner to have been founded before A.D. 697, because Osthryda, queen of Mercia, who caused King Oswald's remains to be removed to this place, was murdered in that year. It was destroyed by the Danes in 869, and all the inmates were put to the sword.

BARDESANISTS.—A Christian sect which flourished in Mesopotamia from A.D. 161 to 180. They were the followers of Bardesanes of Edessa, who at one time advocated the tenets of Valentinus the Egyptian, though he afterwards abjured them. Mosheim contends against this view, declaring that Bardesanes admitted two principles, like the Manichæans. His followers denied the incarnation and the resurrection.

BARDS, or PROFESSIONAL POETS, were in high repute amongst ancient nations. They were the recorders of important events, celebrating in poetry and music the virtues and heroic deeds of their gods and great men. Amongst the ancient Gauls and Britons they were regarded with peculiar veneration, and wielded considerable authority. The Druids had their order of

bards. They continued to flourish in Wales, where Eisteddfods, or sessions of the bards, were held; and the supreme dignity, and the privileges of the bards, are dwelt upon at great length in their early laws. Edward I. has been accused, though unjustly, of having massacred the Welsh bards in 1283. The last commission for holding an eisteddfod is dated Oct. 23, 1568. The ancient Irish bards were also celebrated. The court bard is mentioned as a domestic officer in Welsh records of the year 940.

BAREBONE'S PARLIAMENT.—This "motley convention of one hundred and twenty persons," as Hallam terms it, was assembled at Cromwell's command July 4, and dissolved Dec. 12, 1653. It was sometimes called the Little Parliament. Amongst the seven representatives for London, was one Barebone, a leather-seller, of Fleet Street, a fanatic notorious for his long prayers and sermons, with the Christian name of "Praise God." Hence arose the term "Praise-God Barebone's Parliament," by which this assembly was afterwards known. It consisted of 122 members for England, 6 for Wales, 6 for Ireland, and 5 for Scotland, chosen by Cromwell and his officers.

BAREILLY (Hindustan).—This district, in the province of Delhi, was ceded by the rulers of Oude to the East-India Company in 1801. A formidable mutiny broke out at its chief town, also named Bareilly, April 16, 1816. It was caused by a form of taxation obnoxious to the people. Conflicts ensued, April 18 and 21, and order was soon restored. The sepoys rose against the English, murdered some, and expelled others, Sunday, May 31, 1857. The mutineers marched into Delhi July 2. Bareilly was recaptured by the British forces May 7, 1858.

BARFLEUR (Normandy).—A portion of William the First's fleet was equipped at this port for the invasion of England A.D. 1066. Near Barfleur, Prince William, only son of Henry I., perished by shipwreck during the nights of Nov. 25 and 26, 1120. Two of the king's illegitimate children and several nobles perished on this occasion, the total number of persons being about three hundred. Only one escaped,—a butcher, of Rouen. William had married Matilda, daughter of the count of Anjou, in June, 1119. The vessel was called the *Blanche-Nef*. The shipping at Barfleur was destroyed and the harbour filled up by Edward III. in his invasion of Normandy, in 1346.

BARI (Italy).—This town, occupying the site of the ancient Barium, having been captured by the Saracens A.D. 840, was wrested from them in 871, by Louis II., Charlemagne's great-grandson, after a siege of four years' duration. The Greek emperors made it the capital of the province of Apulia in 982. Afterwards it came into the possession of the Normans, and Robert Guiscard became duke of Apulia in 1060. It was the seat of a bishop as early as 347, and became an archbishopric in 931. A celebrated council assembled here Oct. 1, 1098, at the com-

mand of Urban II., no less than 183 bishops, and among them Anselm of Canterbury, attended; the principal subjects discussed being the reunion of the Greek and Latin churches, and what is termed the *filioque*, or the procession of the Holy Ghost from the Father as well as the Son.

BARINAS (S. America), or **VARINAS**.—One of the Spanish colonies which joined the confederation of Venezuela, April 19, 1810, formed for the expulsion of the Spaniards.

BARIUM.—Protoxide of barium was discovered in 1774, by Scheele; and barium, the metallic base of baryta, by Davy, in 1808.

BARK, called Peruvian, or Jesuits' Bark.—Its medicinal qualities were discovered by the Jesuits in South America; a diseased person having, by accident, taken water impregnated with it. As a medicine it was first used in Spain in 1640; and in England, about 1654. The *Mercurius Politicus*, Feb. 3—10, 1659, announces where "the Feaver Bark, commonly called the Jesuits' powder, brought over by James Thompson, merchant of Antwerp," may be obtained.

BARLAAMITES.—Followers of Barlaam, a native of Calabria, and a monk of the order of St. Basil, who, in the controversy between the Greek and Latin churches, after supporting the cause of the latter, became an advocate of the former. He brought a complaint before the patriarch of Constantinople, against the tenets of the Hesychists, or Quietists, the name given to the monks of Mount Athos. The cause was tried, and the monks acquitted, in 1337. In 1339 Barlaam was the emperor's ambassador to the pope at Avignon for a union of the two churches. The old controversy was afterwards renewed, and to such a pitch did it proceed, that a council was held at Constantinople, June 11, 1341, in which the monks, with Palamas at their head, were victorious. The Barlaamites were condemned by subsequent councils, and Barlaam himself is said to have once more joined the Latins. He died about 1348.

BARLETTA (S. Italy), was besieged by the French in 1502. During the siege, the celebrated military rencontre between eleven Spanish and as many French knights took place. The lists were formed on neutral territory, under the walls of Trani, and the combat came off Sept. 20, 1502. Though five of the French knights were slain, Bayard and a companion are said to have defended themselves with such skill against the seven Spaniards, that it terminated in a drawn battle. There are various accounts of this trial of arms. Bayard fought in single combat with the Spanish cavalier Sotomayor (Feb. 2, 1503), when the latter was slain. The French having been defeated in two battles, Friday, April 21, and Friday, the 28th, 1503, in the last of which the duke of Nemours was slain, abandoned the siege of Barletta.

BARNABITES.—This religious order was formed at Milan, in 1530, by three persons, named Antony Maria Zacharias, Bartholomew

Ferrarius, and Jacopo Antony Morigia. It was approved by Clement VII. in 1533, and confirmed by Paul III. in 1535. They were called regular clerks of St. Paul, from their assiduous study of his epistles, recommended to them by their first master; and are said to have received the name of Barnabites from the church of St. Barnabas at Milan, given them in 1535. They spread through Italy and Germany, and were invited into France by Henry IV., in 1608, to be employed in the mission of Bearne. On their first establishment they lived on the gratuities of the pious, but afterwards held property.

BARNARD'S INN was named after Lyonel Barnard, who resided here in the year 1434 (13 Hen. VI.), at which time it was the property of Dr. John Mackworth, dean of Lincoln, by whose name it had been before known. In 1601, one Mr. Warren was fined £1. 6s. 8d. for wearing his hat in hall, and for his long hair, and otherwise misde-meaning himself. The first attempt to introduce attorneys into the inn was made in 1608.

BARNET (Battle).—Fought during the wars of the Roses, on Gladsmore Heath, near Chipping-Barnet, on Easter Sunday, April 14, 1471. The Yorkists, commanded by Edward IV., gained a complete victory over the Lancastrians, led by the earl of Warwick, the king-maker, who fell in the battle. A monument was erected on the spot where the encounter took place, in 1740.

BAROACH (Hindustan).—This district was conquered by the British in 1781, and was afterwards restored to the Mahrattas. The city of Baroach and its fortress were captured Aug. 29, 1803, and the whole territory ceded to the East-India Company, by treaty, Dec. 30, 1803. It was a place of great trade in the 16th century, and was taken by Acbar in 1572.

BARODA (India), the capital of the Guicowar's territory, was a large and wealthy city in the reign of Aurungzebe, who died in 1707. A treaty of amity was concluded between its ruler and the East-India Company in 1780. In 1802 the king applied to the East-India Company for assistance to put down a rebellion. This was accomplished, and the relations between the two governments were regulated by arrangements made in 1802, 1805, 1817, and 1820.

BAROMETRE was invented by Torricelli, a Florentine, pupil of Galileo, in 1643. Pascal improved it in 1648, and from that period great improvements have been effected in its construction by various scientific men.

BARON.—This term, now applied to the lowest title in the peerage, was formerly extended to all the nobility of England. Its origin and real signification in the early period of our history have excited much controversy. The ancient baron is generally supposed to have been the same as our present lord of the manor. He was at first called *vavassour*, this being changed by the Saxons into *thane*, and by the Normans into

baron. Originally, all barons had seats in the king's council. In the reign of King John, the barons had become so numerous that they were divided, the greater barons, who held *in capite* of the crown, being summoned by writ to attend the king's council; whilst the lesser barons, who held under the greater barons by military tenure, were summoned by the sheriff to sit by representation; hence arose the lower house of parliament. The first precept to be found is of the 49th of Henry III., Dec. 24, 1265, from which period no other seems to have been issued until 22 Edw. I. (1294), or, as Sir H. N. Nicolas is of opinion, until 23 Edw. I., June 24, 1295. Richard II. converted it into a mere title of honour, by conferring it on persons by letters patent; the first barony of this kind being that of Beauchamp and Kidderminster, dated Oct. 10, 1387, and conferred upon John Beauchamp, of Holt. This baron never sat in parliament, as he was attainted in the following year. At the Restoration, Charles II. granted a coronet to barons. The first instance of their being styled peers is in the award of exile against Hugh le Despencer and his son, in 1321. The citizens of London, York, Chester, and other towns, were at an early period honoured with the title of baron.

BARONET.—This order was instituted, or, as some assert, adopted, because the title existed previously in Ireland, by James I., in 1611; and the first patent, to Nicholas Bacon, is dated May 22, in that year. Each knight or esquire was, under the pretence of providing a fund for the defence of the English settlement of Ulster, to pay a sum of £1,000, to support thirty foot-soldiers for three years at 8*s.* per day, together with the official fees. The number fixed was 200, but only ninety-three patents were sold in six years. Baronets of Ireland were established in 1619, the first patent being dated Sept. 30; and of Scotland, called baronets of Nova Scotia, by Charles I. in 1625; the first patent being dated May 22. Females have assumed the dignity. The *Gentleman's Magazine* for 1754 gives the following instance of one created by James II.:—"Sept. 9, 1686.—Cornelius Speelman, of the United Provinces, a general of the states of Holland; with a special clause to the general's mother, of the rank and title of a baronetess of England."

BARONS OF GERMANY.—During the Middle Ages many of the German barons were little better than reckless freebooters. Hallam (Middle Ages, iii. ch. 9, pt. 1) says:—"Germany appears to have been, upon the whole, the country where downright robbery was most unscrupulously practised by the great. Their castles, erected on almost inaccessible heights among the woods, became the secure receptacles of predatory bands, who spread terror over the country. From these barbarian lords of the dark ages, as from a living model, the romances are said to have drawn their giants and other disloyal enemies of true chivalry."

Their depredations compelled the inhabitants of towns to form leagues for purposes of protection and self-defence. Sixty cities were associated in the League of the Rhine in 1255. The Hanseatic union owes its origin to the same cause; and in 1370 the cities of Suabia and the Rhine entered into a similar confederacy.

BARONS' WAR, originated in the refusal of Henry III. to ratify the statutes enacted at Oxford, in the "Mad Parliament," June 11, 1258. The matter was referred to the arbitration of Louis IX. of France, who decided, at a council held at Amiens, that the statutes should be annulled, Jan. 23, 1264. The barons, with Simon de Montfort at their head, took up arms, and, on the 14th of May, totally defeated the king at Lewes. A parliament assembled at London Jan. 20, 1265. Disputes arose amongst the barons, and on the 4th of August (1265), a second great battle was fought at Evesham, in which the king was victorious, and De Montfort was slain. The barons, who continued to oppose the king, took refuge in the castle of Kenilworth, and they were compelled by famine to surrender, in November, 1266. The war was still carried on, and Prince Edward, afterwards Edward I., reduced the island of Ely, their last stronghold, July 25, 1267.

BAROSSA (Battle).—An allied British, Spanish, and Portuguese force, of 12,000 men, with 24 pieces of artillery, were attacked at this place, in Spain, by 16,000 French under Victor, on the 5th of March, 1811. The former were victorious, though the British contingent under General Graham, which amounted to only 4,000 men, received no support whatever from the Spaniards. An eagle, six pieces of artillery, and 500 prisoners fell into the hands of the British.

BARRACKPORE (Hindustan).—A revolt occurred here in 1824, and the mutiny of the sepoy commenced at Dum-Dum and at this town, near Calcutta, in 1857. On the first occasion the 47th regiment of native infantry, then about to depart to assist in the Burmese war, displayed a mutinous spirit Sept. 15, and they refused to parade Oct. 30, 1824. They declared that they would not go to Rangoon, or anywhere else, by sea, or even march by land, unless they received double batta. A further manifestation took place Nov. 1, when a battery opened on their rear, killing a few, and putting the remainder to flight. Many arrests were made, the offenders were found guilty by a court-martial, and the ringleaders were executed. The 47th native regiment was erased from the army list. It was here that the sepoy, in Feb. 1857, objected to bite off the ends of the new cartridges, on the pretence that they contained fat, which, if permitted to come in contact with their lips or tongues, entailed a loss of caste. An inquiry took place Feb. 6, but it did not produce any satisfactory result; and the 34th native regiment rebelled March 29th. The 19th regiment of native infantry was disbanded and dismissed here, March 31; and the 34th,

May 5th. Three native regiments were disarmed at Barrackpore, June 14th.

BARRICADES, constructed of the first materials that came to hand, were used in popular insurrections during the Middle Ages. Paris has obtained notoriety as the city in which they have been most frequently employed. In 1358, its streets were barricaded against the Dauphin. The first Battle of the Barricades took place on the entry of the duke of Guise into Paris, in 1588. Henry III., at his instigation, consented to take severe measures against the Huguenots, on the promise that the duke would assist him in purging Paris of strangers and obnoxious persons. No sooner, however, was an attempt made to execute this plan, than the people rose, erected barricades, and attacked the king's troops with irresistible fury. Henry III., having requested the duke of Guise to put a stop to the conflict, fled from Paris, and the moment the duke showed himself to the people, they pulled down the barricades. It was followed during the war of the Fronde, by another contest of a somewhat similar character, Aug. 26, 1648, when Anne of Austria ordered the arrest of Charton, Blancmeuil, and Broussel, three popular members of the Parliament. The first-mentioned managed to escape, but the other two were captured; whereupon the people rebelled, formed barricades, and attacked the troops with cries of "Broussel and liberty!" The queen was intimidated, and, by the advice of Mazarin, ordered the release of the prisoners. In July, 1830, the elder branch of the Bourbons, and in Feb., 1848, the Orleans branch of the same family, were driven from the French throne after a struggle at the barricades. Cavaignac in defence of the Provisional Government waged a fearful contest with the insurgents who had erected barricades, June 23, 24, 25, and 26, 1848, in which he was at length victorious. The killed and wounded amounted to 15,000, and about 8,000 of the rebels were taken prisoners. Napoleon III. has widened the streets, and taken other precautions to prevent the recurrence of such scenes. Barricades have been erected during popular outbreaks at Berlin, Vienna, and other continental cities. An attempt at something of the kind was made in London, on the occasion of the funeral procession of Queen Caroline in August, 1821, but it was speedily suppressed.

BARRIERS (Battle), was fought under the walls of Paris March 30, 1814, when the allied army after an obstinate contest gained a victory, which led to the capitulation of Paris and the abdication of Napoleon I.

BARRIER TREATIES.—The first between England and the Netherlands, was negotiated by Lord Townshend, and signed at the Hague Oct. 29, 1709. England engaged to assist the Dutch in preserving their barrier towns, whilst the Dutch pledged themselves to maintain the queen of England's title to her dominions, and the Protestant succession. It was very unpopular in this country,

and was called Lord Townshend's treaty. It was annulled in 1712, and a new barrier treaty concluded at Utrecht Jan. 30, 1813. Another treaty known by this name was signed at Antwerp, between England, the Netherlands, and the emperor Charles VI., Nov. 15, 1715. It determined the boundaries of the Netherlands, and the emperor recognized the Hanoverian succession, as the states general had done in the former treaties.

BARRISTERS, or **BARRASTERS**, at first styled *apprenticii ad legem* (apprentices) were first appointed, according to Dugdale, by an ordinance of the 20th year of the reign of Edward I. (1292). The clergy, who for some time supplied the only persons learned in the law, were at the commencement of Henry the Third's reign prohibited from practising in the secular courts. Reeves (*Hist. of Eng. Law*, v. 247), remarks,—“We have seen that heretofore there were only two descriptions of advocates; these were *serjeants* and *apprentices*. But we find in this reign (Elizabeth), and no doubt it had been so for some time, that the orders of the profession were these,—the lowest was a *student*, called also an *inner barrister*, and so distinguished from the next rank, which was that of an *outer* or *utter barrister*; then came an *apprentice*, and next a *serjeant*.” The first order relative to the qualifications of barristers was made June 21, 1571, being the 13th year of Elizabeth's reign. The following entry occurs in the churchwardens' accounts of St. Margaret, Westminster, for 1476:—“Also paid to Roger Fylpott, learned in the law, for his counsel-giving, 3s. 8d., with 4d. for his dinner.” In the reign of Charles II. the client consulted the barrister in person, and handed him the *honorarium* without the intervention of an attorney or clerk. The qualifications required varied until 1852; when the four societies agreed upon one set of rules.

BARROW ISLAND (Arctic Sea).—Discovered by Captain Beechy, Jan. 26, 1826. Like Barrow's Straits, it is named after Sir John Barrow, Bart., secretary to the Admiralty, and author of “*Chronological History of Arctic voyages*,” and other works.

BARROWS.—These tumuli, or mounds of earth, are the most ancient monuments in the world. Gough says they were both tombs and altars. They were used by the Assyrians, the Egyptians, and other ancient people. Homer makes mention of one raised by Achilles in memory of Patroclus, and of another to Hector. In some cases they were erected in honour of a deceased hero, whose remains were not deposited beneath them, and frequently to signalize some important event. After the battle of Plataea, and the utter failure of the Persian invasion, b.c. 479, Pausanias ordered the dead to be interred in tumuli or barrows. “A single burying-place,” says a writer in the “*Encyclopædia Metropolitana*,” “was appointed to the use of the Athenians, Tegæans, Megareans, and Philiatians; but the slain of

the Lacedæmonians formed three separate mounds; one consisting of those who had borne the priestly office, another of the Lacedæmonians in general, and the third of their Helots." Barrows were very common in Britain at an early period. Those at Abury and Stonehenge are the most ancient. They are of numerous shapes, and devoted to various purposes. Many have been opened, and in addition to bones (calcined), ashes, stone coffins, &c., amber ornaments, and other relics have been discovered.

BARROW'S STRAITS.—This channel, leading from Baffin's Bay into the Polar Sea, was discovered by Baffin in 1616; and explored in 1819 by Lieutenant Parry, who named it after Sir John Barrow.

BARTENSTEIN (Treaty).—Between Prussia and Russia, was concluded at Bartenstein, April 25, 1807. It provided for a vigorous prosecution of the war against France, and the contracting parties engaged not to make a separate peace.

BARTHOLOMEW FAIR.—To the priory of Bartholomew, founded by Rahere, King Henry I. in 1133, granted the privilege of holding a fair in Smithfield on St. Bartholomew's Day, O.S. Aug. 24, N.S. Sept. 3. The original grant was for three days, but this was gradually extended to fifteen. In 1593, 1603, 1625, 1630, 1665, and 1666, the fair was suspended on account of the plague. An order of the Common Council in 1708, limited its duration to three days. At one time it was a great place of resort for traders, but it declined in importance until it was only attended by itinerant showmen and the owners of a few stalls. Proclamation of the fair was made for the last time in 1855. Morley's work entitled "Memoirs of Bartholomew's Fair" contains full and interesting details on this subject.

BARTHOLOMEW'S DAY (Massacre of the Protestants).—On the evening of St. Bartholomew's Day, Aug. 24, 1572, the massacre of the Huguenots at Paris commenced. The Roman Catholic leaders, the dukes of Guise, Aumale, and Anjou, with the connivance of Charles IX., and at the instigation of Catherine de Medici, resolved by a general assassination to exterminate the French Protestants. Their leader, Admiral Coligny, the first victim, was shot Aug. 22, and the inhuman slaughter of man, woman, and child, which commenced on the 24th was carried on till it was believed that all the Protestants in Paris had been destroyed. The plot had been secretly organized, and similar scenes were enacted in many towns in the provinces. According to the lowest estimate, 30,000 persons perished. The reigning pope, Gregory XIII., celebrated this deed of blood by a procession and a *Te Deum* at Rome, and proclaimed a year of jubilee. He also ordered a medal to be struck in its commemoration.

BARTHOLOMEW'S HOSPITAL was founded in 1102, by Rahere, who had been king's minstrel. It was originally in connection with the priory, which Rahere established about

the same time. Edward II., by letters patent, conferred upon it the privilege of sanctuary; consequently no person could be arrested within its precincts. Both priory and hospital were dissolved by Henry VIII., who founded the hospital anew, giving 500 marks per annum towards its maintenance, on the condition that the city should give a like sum. It escaped the great fire in 1666, and has been several times enlarged.

BARTHOLOMITES.—This religious order of St. Basil, driven from Armenia in 1296, owing to the cruelties committed upon them by the sultan of Egypt, formed an establishment at Genoa in 1307. They obtained a second house at Parma in 1318, and afterwards spread to other towns in Italy. They assumed the habit of St. Dominic, and eventually followed the rule of St. Augustine, which was confirmed to them by Innocent VI., in 1356. The Bartholomites gradually decreased in numbers, and were suppressed by Innocent X. in 1650.

BARWALDE (Treaty).—Between France and Sweden, concluded by Gustavus, in his camp at Barwalde or Barenwald, Jan. 13, 1631. It provided for a defensive alliance, and its duration was fixed at six years. It was aimed against the emperor and Spain.

BARTHOLOMEW, St. (W. Indies).—This island was colonized by the French in 1648; taken by the English in 1689; and restored to France in 1697. The English took it again in 1746, restored it in 1748, and captured it again March 17, 1781. It was ceded in perpetuity by France to Sweden in 1784, in return for certain concessions. The English again captured it March 22, 1801, but restored it to Sweden the same year.

BASEL (Switzerland).—This ancient city was ruled during the Middle Ages by a bishop, who was a prince of the German empire. It was taken by Rodolph of Habsburg in 1267; in 1392 became a free imperial city, which was, with the adjoining territory, admitted into the Confederation in 1501, when the bishops were expelled. A council was held here in Oct. 1061. The eighteenth General Council, transferred from Pavia to Sienna and from Sienna to Basel, assembled July 23, 1431, and was brought to a conclusion May 16, 1543. Its chief objects were the reunion of the Greek and Latin churches, and a general reformation of the Church. The university of Basel was founded by a papal bull from Pius II. in 1459. Treaties of peace were concluded at Basel between France and Prussia, April 5 and May 17; between France and Spain, July 22; and between France and Hesse-Cassel, Aug. 28, 1795. The French seized the city in 1798.

BASHEE, or BASHI ISLANDS (Pacific), five in number, were discovered by Dampier, in 1687, and colonized by the Spaniards in 1783. They form a dependency of the Philippines.

BASHI BAZOUKS.—Irregular troops in the Turkish service, principally Asiatics. They formed a contingent of the Turkish army during the Crimean war 1853-56. As light

cavalry they are considered excellent, surpassing the Cossacks in courage and powers of endurance.

BASIENTELLO (Battle).—Otho III., emperor of Germany, was defeated near this place, in Italy, by the Greeks and Saracens, July 13, 982.

BASILIAN.—Monks of the order of Basil, surnamed the Great, bishop of Cæsarea A.D. 370. He had retired in 358 into a desert in Pontus and founded a monastery. He afterwards founded several similar establishments, placing them under rules of his own institution. The order was introduced into the Western Church in 1057, and was reformed by pope Gregory XIII. in 1569.

BASILICA.—This code of Byzantine law was published A.D. 529 by Basil I., from whom its name is derived. It was revised and extended by Leo VI. and Constantine VII. (Porphyrogenitus), and appeared in its amended form between 905 and 911. This remained the law of the Byzantine empire till its conquest by the Turks, and has been adopted in the modern kingdom of Greece.

BASILIDIANS.—The followers of Basilides of Alexandria, who is supposed to have quitted the Church during the reign of Trajan or that of Hadrian, were thus named. Cave says that he flourished in 112, Basnage in 121, and Mill in 123. Basilides, who died in 130, perverted the doctrine of the Logos. Clement of Alexandria asserts that Basilides boasted that he had been taught by a disciple of St. Peter.

BASILIKON DORON, or ROYAL GIFT, a treatise composed by James I., and published at Edinburgh in 1599. It is divided into three books, and contains precepts on the art of government, addressed by the king to his son, Henry, prince of Wales, who died suddenly, Nov. 6, 1612, aged 17.

BASING (Hants).—The scene of the Danish victory over Ethelred and Alfred in 871. Near this place is Basing House, celebrated for its heroic defence by the marquis of Winchester, against the parliamentary forces in 1644. It was relieved by Col. Gage, after having sustained a siege of three months; but on his retirement, the enemy again returned. When Col. Gage once more approached to relieve it in November of the same year, they took to flight. The besiegers returned: Cromwell stormed the place in 1646, and put the garrison to the sword.

BASKET-MAKING, or WICKER-WORK.—The ancient Britons, from whom the Romans are said to have learned it, excelled in this kind of manufacture. Their boats, shields, and various implements were fashioned of wicker-work. Herodotus (i. 194) mentions boats of this kind on the Euphrates. A company of basket-makers once existed in London.

BASLARD.—Sir W. Walworth wounded Wat Tyler in the neck with a baslard or basiliarde, a species of dagger, worn at that time suspended from the girdle. By 12 Rich. II. c. 6 (1388), no servant or labourer was allowed to carry one of these weapons. This statute was repealed by 21 James I. c. 28 (1623).

Wright states that in 1403, it was decreed that no person not in receipt of an income of £20 per annum should use a baslard ornamented with silver.

BASQUE PROVINCES.—Three provinces of Spain—Biscay, Guipuzcoa, and Alava, of which the origin is unknown. The inhabitants preserved their independence against successive invasions of Romans and Goths, but were at length subdued by the latter about A.D. 585. Guipuzcoa and Alava were united to Castile in the 13th century, and Biscay was annexed to Castile by Peter the Cruel in the 14th.

BASQUE ROADS (Sea-fight).—On the 11th of April, Captain Lord Cochrane, afterwards earl of Dundonald, in the *Impérieuse*, with explosion-vessels, fire-ships, gunboats, &c., sailed from Basque Roads to attack the French fleet at anchor under the shelter of the batteries in Aix Roads. A boom, half a mile in length and composed of the thickest cables, floated by buoys, had been moored a few yards in front of the line of French frigates. An explosion vessel, fired by Lord Cochrane, broke through the boom, and such was the terror caused amongst the French fleet that the cables were cut and the ships drifted on shore. Lord Cochrane in the morning of the 12th signalled to Admiral Lord Gambier to send half the fleet to destroy the French ships, several of which were aground. This, however, Lord Gambier refused to do, and a large portion of the French fleet, by dint of great exertions, managed to escape. At St. Helena Napoleon I. admitted, that if Lord Cochrane had been properly supported, all the French ships must have been captured or destroyed.

BASSANO (Battles).—During the French revolutionary war, the Austrian general Wurmser was defeated at this town in Lombardy, Sep. 8, 1796, by the French republican army under Massena and Angereau. Bassano was restored to Austria, by the treaty of Campo-Formio, in 1797; but in the Italian campaign of 1813 Eugene Beauharnais wrested it from the Austrians.

BASSEIN (Treaty), between the Peishwa and the East-India Company, was concluded at this place, in Hindostan, Dec. 31, 1802, and ratifications were exchanged, March 18, 1803. It was an alliance offensive and defensive between the contracting parties, and in return for certain concessions the English engaged to support the rights of the Mahratta chieftain.

BASSET.—This game at cards, said to have been invented by a noble Venetian in the 15th century, was introduced into France in 1674. The courtiers of James II. are, in an account dated Feb. 6, 1685, represented as playing at basset on the day of his proclamation. It was played at the court of Louis XIV., until that monarch lost a large sum by means of false cards; whereupon he ordered that persons found playing basset should be fined 1,000 livres.

BASSETREE (Sea Fight).—Count de Grasse made three attacks upon the British fleet,

anchored in Basseterre Roads, St. Christopher's, on the 26th of January, 1782, and was, on each occasion, repulsed with great loss.

BASSORAH, or BUSRA (Asiatic Turkey).—This city was founded by Omar A.D. 636, and captured during the revolt against Ali, by Telha and Zobeir, accompanied by Ayesha, the widow of the prophet, in 658. The rebels were, however, defeated under its walls in the same year. The Saracen rule terminated by its conquest by the Turks in 701. Though it became a flourishing place it was abandoned, some writers allege, because the canal on which it was built had fallen into neglect; and the modern Bassorah, eight miles to the north-east of the ancient site, was established. The Turks made themselves masters of Bassorah in 1668; but it was wrested from them by the Persians April 16, 1776, after a siege of twelve months. It was recovered by the Turks in 1778, and is known under the name of Bus-sorah and Basra.

BASS ROCK (Frith of Forth).—This small island is first mentioned in history as affording a retreat for St. Baldred, a Scottish enthusiast, who died here March 6, 606 A.D. It was granted to the Lauder family by charter, dated June 4, 1316. A castle existed on this island in the 15th century, if not before. James VI. of Scotland visited the Bass Rock in 1581, and the English government purchased it for a state prison in October, 1671. Having surrendered to the new government in 1690, some adherents of James I. regained possession the same year, and they held it, plundering all vessels that came near, until April, 1694. It was the last place in Scotland that held out for James II. The fortifications were finally destroyed in 1701, by order of William III. To the Dalrymple family, in whose possession it has since remained, it was ceded by charter, July 31, 1706, ratified by parliament in March, 1707. Several of the Covenanters were imprisoned in this island.

BASS'S STRAIT (Pacific).—This channel, separating Van Diemen's Land from Australia, is named after Mr. Bass, surgeon of the ship *Reliance*, who, accompanied by Flinders, in 1798, circumnavigated Van Diemen's Land, long believed to form part of Australia.

BASTIA, was the capital of Corsica until that island was annexed to France in 1768. The town and its citadel were captured by the English in 1745, and again May 22, 1794.

BASTILLE.—There were three bastilles or state-prisons, namely those of the Temple, St. Denis, and the Rue St. Antoine, at Paris. On the ground occupied by the last-mentioned, a kind of fortress, which was strengthened in 1356, had long before existed. The place generally known as the Bastille was commenced by order of Charles V., and the first stone was laid April 22, 1369. It was not completed until 1383, and was afterwards improved and strengthened in such a manner that it became one of the strongest fortresses

of the kind in Europe. It was taken in 1418, in 1594, and Jan. 13, 1649, by the Fronde army. The mob attacked it July 14, 1789, released the prisoners, put the governor to death, committed great havoc, and soon after the order was given for its demolition. This was the commencement of the French Revolution.

BATALHA (Portugal).—John I. built a convent at this place in commemoration of his victory over John I. of Castile, at Aljubarota in August, 1385.

BATAVIA, an island in the Rhine, occupied in the time of Cæsar, B.C. 55, by a German tribe, called the Batavi. Claudius Civilis, a Batavian chieftain, rose in arms against the Romans A.D. 69, and after a fierce struggle, in which he gained many victories, was at last defeated. Zosimus, who was the first to call the island Batavia, states that in the time of Constantius, about 360, it belonged to the Franks. (See HOLLAND.)

BATAVIA (Java).—A factory was established by the Dutch at the village of Jacatra in 1612, and upon its site the town of Batavia was founded in 1619. The new settlement became the seat of the government of their East-Indian colonies. The French obtained possession in 1811, and were expelled by the English Aug. 8 in the same year. It was restored to the Dutch by a convention signed in August, 1814.

BATAVIAN REPUBLIC.—In 1795 the French republicans invaded the Netherlands, and subverted the then existing government. The seven united provinces formed with France an offensive and defensive alliance against England, May 15, 1795. The constitution for the Batavian republic was promulgated Sept. 14, 1801. This new republic was guaranteed by the treaty of Luneville in the same year. Other changes were made, and at last the Batavian republic was annexed to France, and named the kingdom of Holland, June 5, 1806.

BATH (Order of).—Knights of the Bath were thus named from the ceremony of bathing, performed the night before their creation, and Sir Harris Nicolas mentions two cases of knights created in this manner during the reign of King John, the first in 1204 and the second in 1205. The order is supposed to have existed at a much earlier period. It is first noticed under the name of the Bath, March 17, 1400, when Henry IV., at his coronation, created forty-six knights. The practice was continued at the coronation of four sovereigns, but after that of Charles II., in 1661, fell into neglect, until it was revived by George I., May 18, 1725. The order was re-organized and extended Jan. 2, 1815, and April 14, 1847, the number of knights in the existing classes was increased, whilst civil knights, commanders, and companions were added.

BATH (Somersetshire).—The first colony of the Romans in England is supposed to have been fixed at Camalodunum, near this city. B.C. 46. Thence they transferred their quarters to Bath, about B.C. 44. The Romans

improved the place with many noble buildings. Its hot springs are mentioned by their writers. Bath suffered during the struggles between the Saxons and the Britons, and was seized and plundered by the Danes. Richard I. granted the town a charter, which was confirmed by Henry III. Edgar was crowned at Bath by Dunstan, A.D. 973. The hospital of St. John was founded in 1180; the abbey church was completed in 1609, and the town-hall in 1780. Sydney Gardens were opened in 1795, and Victoria Park in 1830.

BATH AND WELLS.—The bishopric of Wells was founded A.D. 909, and that of Bath in 1078. William II. removed the see of Wells to Bath, by charter, Jan. 25, 1092. This gave rise to a dispute between the canons of Wells and the monks of Bath, and it was not terminated until about 1139, when, with the pope's consent, it was determined that the bishops should be called bishops of Bath and Wells; that the election should be made by the canons of Wells and the monks of Bath conjointly; that the event of the election should be pronounced by the dean of Wells, and that the bishop should be enthroned in both cathedrals. The episcopal residence is now at Wells.

BATHS are mentioned in the Old Testament, and Homer speaks of the baths in the houses of the Greeks. Hot baths were also used in ancient times, and Homer commends the warm fountains of the Scamander, though he attributes to them the effeminacy of the Phæacians. They were not common at Rome until the 1st century of the Christian era. Augustus constructed public baths in every part of the capital. The baths of Antoninus Caracalla, in the 2nd century, contained above 1,600 marble seats, and those of Diocletian, in the 4th century, about 3,000. Gibbon says (ch. xxxi), "The meanest Roman could purchase, with a small copper coin, the daily enjoyment of a scene of pomp and luxury which might excite the envy of the kings of Asia."

BATHS AND WASH-HOUSES.—These useful establishments are of humble origin. During the prevalence of the cholera at Liverpool, in 1832, a poor woman, living in a back street in that town, knowing from experience the misery and sickness consequent upon dirt, offered her neighbours the opportunity of washing at a copper which she was fortunate enough to possess. Her dwelling was soon crowded; benevolent ladies rendered assistance, and eighty-five families used this humble wash-house at a charge of one penny per week. The idea was soon taken up, and a small establishment was opened in Frederick Street, Liverpool, in 1842. In September, 1844, a meeting was held at the Mansion House, and a subscription raised, with the view of introducing them in London; and while the first was in course of erection, an act of parliament was passed to encourage the establishment of public baths and wash-houses (9 & 10 Vict. c. 74), Aug. 26, 1846. Another act, relating to the establishment of similar places in Ireland (9 & 10 Vict. c. 87), received the royal assent the same day. Temporary

establishments had been provided as early as 1844, and these were speedily followed by buildings erected for the purpose, affording every accommodation both for purposes of washing and bathing.

BATHURST (N. S. Wales).—Gold was discovered at Ophir, near Bathurst, Feb. 12, 1851. The governor issued a proclamation on the 22nd of May, claiming the gold, but allowing persons to search or dig, on taking a license at 30s. per month. By the month of June 20,000 persons had arrived at the new diggings.

BATNEAR (Hindustan).—The former capital of the Batnears or Batties of Hindostan was taken by Tamerlane in 1398, and by the rajah of Beykaner in 1805.

BATTERING-RAM.—This machine, employed for making a breach in the walls of besieged cities, is mentioned in the Old Testament, and was used by the Greeks and Romans. Battering-rams were often of great length, the beam of wood having at the end the head of a ram, made of brass or iron. They were used extensively in the Middle Ages, and Sir Christopher Wren found them of great service in throwing down old walls and disjoining stones.

BATTERSEA PARK.—By 9 & 10 Vict. c. 38 (1846), the Commissioners of Woods, &c., were empowered to form a royal park in Battersea Fields. Additional powers were granted to them by 11 & 12 Vict. c. 102 (1848); by 14 & 15 Vict. c. 77 (Aug. 7, 1851); and by 16 & 17 Vict. c. 47 (1853). The park was opened in 1853, and the suspension-bridge across the Thames, leading to it, March 28, 1858.

BATTIN (Battle).—The Russians defeated the Turks in a sanguinary attack upon their camp, near this place, Oct. 14, 1811.

BATTLE ABBEY (Sussex) was founded by William I., in 1067, on the spot near which the battle of Hastings was fought. It was dedicated to St. Martin, "in order that glory might be offered up to God for his victory, and that offices for the souls of the dead might be there perpetually performed." It was endowed with peculiar privileges and exempted from episcopal rule and jurisdiction. The abbot was mitred and sat in parliament.

BATTLE-AXE.—Herodotus speaks of the battle-axes of the Scythians in Xerxes' army. The Teutonic tribes introduced the modern battle-axe into Europe, and it was afterwards so common amongst the Franks, that it was called *francisca*. They gained great celebrity for dexterity in using it, on their invasion of Italy in the 6th century. The battle-axe was known in England at a very early period, and the assertion that it was introduced by the Danes is erroneous. Fragments of this weapon have been found in Druidical remains of a period antecedent to their arrival. Hoveden celebrates the might displayed by King Stephen at the battle of Lincoln, in 1141:—"Equal to a thunderbolt, slaying some with his immense battle-axe, and striking down others." It was borne,

as a royal weapon, at the funeral of Henry VII., and offered up at the altar with the helmet, gauntlet, and crest.

BATTLE-DOOR.—This game was known in England in the 14th century, and was a fashionable pastime, even among adults, in the reign of James I. In a comedy called "The Two Maids of Moreclacke," printed in 1609, the expression occurs,—“To play at shuttle-cock methinks is the game now.”

BATTLEFIELD (Battle).—Fought on a plain, that has since been called Battlefield, about two miles from Shrewsbury, Saturday, July 21, 1403. It occurred during the Percy insurrection against Henry IV.; there the fiery Hotspur fell, and Henry V. (then prince of Wales) distinguished himself. In this action Falstaff is represented by Shakespeare as having led his ragamuffins where they were well peppered, only three out of his 150 having been left alive. Falstaff himself was found by the prince of Wales lying on the ground, and he declared that with a formidable adversary, he had “fought a long hour by Shrewsbury clock.” It was also called the battle of Shrewsbury, and sometimes of Hartlefeld.

BATTLE ROLL.—On the day following the battle of Hastings, William I. called over, from the roll drawn up at St. Valery, the names of those chieftains who had accompanied him. The number amounted to 629, and amongst them a large portion of the English territory was divided.

BATTLES.—The most important battles recorded in history, whether by sea or land, are described under their appropriate titles, and an alphabetically arranged list appears in the Index.

BATTS (Parliament of), assembled at Leicester, Monday, Feb. 18, 1426, and was called the Parliament of Batts, because, arms having been forbidden, servants and adherents followed the members with bats or clubs on their shoulders.

BAUGÉ (Battle). (See ANJOU.)

BAUTZEN (Battle).—Napoleon I. at the head of 100,000 men, supported by a numerous artillery, attacked an allied Prussian and Russian army, much inferior to his own in point of numbers, near Bautzen, Saxony, May 21 and 22, 1813. The French loss was very great; but they compelled their opponents to retire, which they did in good order, presenting a bold front to their assailants.

BAVARIA.—This country, occupied by the Boii, a Celtic tribe, was annexed to the Roman empire as part of Noricum and Vindelicia, B.C. 15. It subsequently fell into the power of the Ostrogoths and the Franks; and was conquered by Charlemagne, who annexed it to his empire in 788. After his death it was governed by one of his grandsons, under the title of margrave, or lord of the marches.

A.D.

895. Formed into a dukedom.

1070. Passes, by imperial grant, into the possession of the Guelphs.

106

A.D.

1180. The emperor Frederick I. bestows Bavaria on Otho of Wittelsbach.

1231. Otho II. becomes duke of Bavaria, uniting to Bavaria the Palatinate of the Rhine.

1294. Separation of the Palatinate from Bavaria.

1648. The treaty of Westphalia restores the Palatinate, and constitutes Bavaria the eighth electorate.

1702. Forms an alliance with France to oppose Austria.

1704. Aug. 13. Battle of Blenheim, in which Marlborough and Prince Eugene defeat the united forces of France and Bavaria.

1714. Sept. 7. The treaty of Baden reinstates the elector in his dominions.

1740. The elector, Charles Albert, aspires to the imperial crown, and invades Austria in furtherance of his views.

1744. Maria Theresa defeats the Bavarians, and seizes the electorate, which was soon after restored.

1778. Death of the elector Maximilian Joseph, with whom the younger line of the house of Wittelsbach becomes extinct.

1779. Treaty of Teschen, which recognizes Charles Theodore as elector of Bavaria, and cedes the district of the Inn to Austria.

1796. A French army, under Moreau, occupies Munich, and forces Bavaria to conclude a treaty with France.

1801. Feb. 9. Treaty of Lunéville, by which Bavaria cedes all her possessions on the left bank of the Rhine, and receives, as an indemnification, territory of greater extent.

1805. Dec. 26. By the treaty of Presburg, Napoleon confers the title of “King” on the elector of Bavaria, together with extensive additions of territory.

1813. Bavaria joins the allies against Napoleon, and in the two following years has the additions to her territories confirmed to her by definitive treaties.

1818. May 26. The king grants a constitutional charter.

1848. March 21. Louis, king of Bavaria, abdicates in favour of Maximilian II., the reigning monarch.

1850. Feb. 27. Convention signed at Munich, relative to Bavaria, Saxony, and Wurtemberg, relative to the revision of the German constitution.

1848. Maximilian Joseph II.

BAYAZID (Battle).—The Russians, 8,000 strong, defeated a Turkish army of 5,000 men at this place, in Armenia, July 29, 1854.

BAYEUX (Normandy) was burnt to the ground by Henry I. in August, 1105; on which occasion its magnificent cathedral was much injured. Bayeux suffered greatly in the wars between England and France. It capitulated to Charles VII. in 1449. The bishopric was founded in the 4th century.

BAYEUX TAPESTRY.—This celebrated roll of linen cloth or canvass, 214 feet in length, and 20 inches wide, contains, in seventy-two distinct compartments, a representation, in embroidery, of the events of the Norman invasion, from Harold's leave-taking of Edward the Confessor, on his departure for Normandy, to the battle of Hastings. The Bayeux tapestry is supposed to have been worked by Matilda, wife of William I., and was by her presented to the cathedral of Bayeux. Montfaucon caused researches to be made that ended in the discovery of the tapestry in Bayeux Cathedral in 1728; and Napoleon I. had it conveyed to Paris in 1803, where it was kept some time, and exhibited. It has been engraved, and several works upon the subject have been published. Bruce (Bayeux Tapestry elucidated) says it contains figures of "623 men, 202 horses, 55 dogs, 505 animals of various kinds not hitherto enumerated, 37 buildings, 41 ships and boats, and 49 trees,—in all 1,512 figures."

BAY ISLANDS.—This cluster, in the Bay of Honduras, was made an English colony in 1852. By a treaty in 1860, Great Britain ceded the Bay Islands to the republic of Honduras.

BAY OF ISLANDS (Pacific), at the northern extremity of New Ulster, one of the New Zealand Isles, became the seat of a whaling-station in the 18th century.

BAYLEN (Battle).—In 1808, Dumont's army was shut up in Baylen, where a battle was fought with the Spaniards, July 20. It terminated in the complete discomfiture of the French, 20,000 strong, who surrendered at discretion.

BAYONET.—Military instructions issued to the French army in 1646 and 1647 contain the earliest notice of this weapon. In 1671 they were introduced generally into the French army. From official documents it appears that in 1682 the bayonet was inserted into the barrel of the musket. The plug-

bayonet was used in England until 1690, after which date the socket-bayonet was introduced. It superseded the pike; and was doubtless taken from the swaines-feather, or swine's feather, called also swan's feather, invented during the reign of James I. This was a long thin rapier-blade, which the musketeer, after discharging his piece, fixed into the muzzle. The bayonet is said to have received its name from Bayonne, where it was invented.

BAYONNE (France).—This ancient town was made a bishopric towards the end of the 4th century. Its cathedral was erected in the 13th century. It was taken by the English, Jan. 1, 1295, during the invasion of France by Edward I. The bayonet is said to have been invented at this place, from which its name is derived. Charles IV. resigned his crown to Napoleon, at the castle of Marac, near Bayonne, in 1808. Several encounters between the French and English took place near Bayonne, Dec. 9, 10, 11, and 13, 1813, in which the English were victorious, and the place was invested by them Feb. 24, 1814. The French were repulsed in a desperate sally, April 14th. This action was fought after peace had been concluded. The castle of Marac was destroyed by fire in 1825.

BAYONNE CONFERENCE was held in June, 1565, between Charles IX., the queen mother, Catherine of Medici, Elizabeth, queen of Spain, and the duke of Alva, envoy of Philip II., to arrange plans for the repression of the Huguenots. It is generally believed that the massacre of St. Bartholomew's Day was determined upon at this meeting.

BAYONNE (Treaty).—Agreed to May 4, 1808, and signed May 5, between Napoleon I. and Ferdinand, king of Spain. The latter resigned his kingdom, and Napoleon engaged to maintain its integrity, and to preserve the Roman Catholic religion.

BAYREUTH (Germany).—This principality was ceded to Prussia in 1791; and its annexation was agreed to by a treaty between France and Prussia, Dec. 15, 1805. France acquired it by the treaty of Tilsit, July 9, 1807; but it was transferred to Bohemia in 1810. Its capital, of the same name, is a place of some importance. The church of St. Mary Magdalen was built in 1446, and the gymnasium in 1664.

BAZA (Spain).—This stronghold of Granada was wrested from the Moors, after a siege of six months' duration, by Ferdinand and Isabella, in November, 1489. The Spanish sovereigns made their triumphal entrance into the city, Dec. 4, 1489.

BAZAAR.—This term is applied in Eastern countries to a large square or street appropriated to purposes of trade. The bazaar of Tauris is the most extensive in the world, and that of Khan Khaliel, at Cairo, which occupies the site of the tombs of the caliphs, contains some valuable records. It was built in 1292. The bazaar at Ispahan is, perhaps, the most magnificent of any.

Adrianople and Constantinople have large bazaars. The last-mentioned was built in 1462.

BEACHEY HEAD (Sea Fight).—A French fleet, consisting of 78 ships of war and 22 fire-ships, defeated the combined Dutch and English squadrons, amounting to 56 sail, off Beachey Head, June 30, 1690. The French obtained the command of the Channel, and great consternation was created throughout England, particularly in the metropolis. William III. was incensed against the earl of Torrington, commander of the combined squadrons, who, being tried by court-martial, was honourably acquitted.

BEACONS, or SIGNAL-FIRES, are referred to by Jeremiah (vi. 1), and were used by the Greeks and Romans. The intelligence of the capture of Troy is represented by Æschylus as having been conveyed to the Peloponnesus by signals of this kind. Coke says:—"Before the reign of Edward III. they were but stacks of wood set up on high places, which were fired when the coming of enemies was descried; but in his reign pitch-boxes, as now they be, were, instead of these stacks, set up; and this properly is a beacon." By 8 Eliz. c. 13 (1566), the corporation of the Trinity House were empowered to set up beacons, or sea-marks, in all places where they deemed them necessary, and the penalty for destroying them was the fine of £100, and, in case of inability to pay, outlawry. They were sometimes erected on the towers of churches. The eastern beacon nearest London was on Shooters' Hill; and that in Middlesex, on Hampstead Hill, as was represented in Hollar's View of London in 1666. The erection of beacons is a branch of the royal prerogative.

BEADEN-HEAD (Battle).—The kings of Wessex and Mercia fought an indecisive battle at this place, supposed to be Great Bedwyn, in Wiltshire, A.D. 675.

BEADS, made of various materials, were used as ornaments amongst ancient nations, and have been frequently found in barrows, more particularly in those of the Druids, in different parts of England. They were used for devotional purposes by the Chinese, Hindoos, and Egyptians; and Augustine, in the 4th century, is said to have introduced the practice among the Christians. According to the 10th of the canons of Cealcythe, passed in 816, seven belts of paternosters were to be said for the repose of a bishop. About the year 1200, St. Dominic introduced the rosary, which contains for every ten lesser beads, representing aves, one larger bead, or paternoster, amounting altogether to 150 smaller and 15 larger beads. It was afterwards neglected, but again brought into use about 1460.

BEADUNE (Battle).—Cynegils, king of Wessex, defeated the Britons at this place, supposed to be Bampton, in Oxfordshire, though some authorities are in favour of Bampton, in Devonshire, in 614. More than 2,000 of the Britons fell in the action,

BEAR.—This military order was instituted at St. Gall, in Switzerland, by the emperor Frederick II., in 1213, St. Ursus being the patron. It was abolished when Switzerland threw off the Austrian yoke.

BEAR-BAITING.—This cruel pastime was very popular in England during the Middle Ages, and frequently took place on a Sunday, after service. In Fitzstephen's description of London,—and he wrote in the time of Henry II., bear-baiting is enumerated amongst the sports of the citizens; and Stow speaks of the bear-gardens as being much frequented in his day. The act against cruelty to animals (5 & 6 Will. IV. c. 59), Sept. 9, 1835, inflicts upon persons keeping bear-pits a fine not exceeding £5 nor less than 10s. per day; and the 47th clause of the act for improving the police in and near the metropolis (Aug. 17, 1839) gives them the power of entering such places.

BEARD is first noticed in Lev. xix. 27: "Thou shalt not mar the corners of thy beard." It was held in veneration amongst ancient nations, who regarded it as an emblem of wisdom, and a symbol of authority. Some classes of the Israelites wore long beards (2 Sam. x.). The flowing beards and majestic mien of the Roman senators awed the Goths on their invasion of Italy, B.C. 390. The fashion of the beard has varied greatly at different periods. The Saxons wore forked beards. Owen, bishop of Evreux, allowed his beard to grow, as a sign of mourning. Taylor, the water poet, dwells on the great variety of beards in his day. The beard diminished in size and gradually went out of fashion in England after the reign of Charles I. The fashion has, however, of late years revived.

BEAULIEU ABBEY (Hants), was founded by King John for Cistercian monks, in 1204. Margaret of Anjou, queen of Henry VI., took sanctuary here after the battle of Barnet in 1471, and Richard, duke of York,* after his failure upon Exeter, also sought sanctuary in this monastery, Sept. 21, 1497.

BEAUVAIS (France).—The Cæsaromagus, or Bratuspantium of the Romans, was taken by Cæsar B.C. 57. It received the name of Bellovacum in the time of Constantine. Chilperic obtained possession A.D. 471, and after undergoing various vicissitudes, it resisted an attack by the English, June 7, 1433. Charles, duke of Burgundy, laid siege to it, Saturday, June 27, 1472, and after making the most extraordinary efforts, was compelled to retire, Wednesday, July 22, in the same year. The women, called the heroines of Beauvais, distinguished themselves during the siege. Jeanne Laine, battle-axe in hand, carried off a Burgundian standard, for which she was called Jeanne Hachette; and in honour of this deed of daring, a procession, headed by girls carrying her banner, takes place

* The statement that he was an impostor named Perkin Warbeck, son of a Jew of Tournay, though generally received, does not rest upon good authority.

in her native town every October. The bishopric of Beauvais was erected in the 3rd century.

BEAVER DAM (N. America).—At this place, near Queenstown, Captain Kerr, with a force not amounting to 200 men, captured a detachment of 500 men belonging to the army of the United States, June 24, 1813.

BECANCELDE, or BACCANCELDE.—A council summoned by Withred, king of Kent, was held at this place in 694, to consult respecting the bettering of God's church in that part of England. Abbesses took part in its deliberations, and five subscribed the constitutions in the form of a charter, drawn up on the occasion. Beckenham, in Kent, is generally supposed to be the place at which this early synod was held.

BECKASCÖG (Treaty), renewing the convention of Helsingborg, dated Aug. 31, 1805, was concluded between Great Britain and Sweden, at Beckascog, October 3, 1805. Sweden agreed to send 12,000 troops into Pomerania to co-operate with the Russians against France, for which England was to furnish an annual subsidy, at the rate of £12. 10s. each man; and to pay for preliminary expenses the subsidy calculated at that rate for five months, on the ratification of the treaty. It consisted of ten articles, and by the ninth, England agreed to furnish an additional £50,000 sterling, for the purpose of improving the defences of Stralsund.

BEDER (Battle).—This battle, won by Mohammed over the Koreish of Mecca, was fought between that town and Medina, A.D. 623. It was the first struggle after the flight from Mecca, and was represented, from the great disparity in numbers, as having been gained by miraculous agency.

BEDFORD.—The Saxon "Bedcanford," "the lodging at the ford," so called from its situation at an ancient ford of the Ouse. The West Saxons and the Britons fought a battle here in 572. The town, nearly destroyed by the Danes in 1010, was restored by Edward the Elder. Stephen took the castle in 1137, during his war against Matilda. King John captured it in 1216. It was frequently besieged. John Bunyan preached in a chapel here from 1671 to 1688; and in its gaol, on the site of which a new one has been erected, wrote "The Pilgrim's Progress." The bridge was rebuilt in 1811.

BEDNORE (Hindustan).—This place, made in 1645 the seat of the rajahs of Ikeri, was captured, with a large amount of plunder, by Hyder Ali in 1763. Though he ordered the name to be changed to Hydernagar, it still retains its former appellation. It was taken by General Matthews in January, 1783, and was retaken by Tippoo Saib, April 18, in the same year. In 1833 it came into the possession of the East-India Company.

BED OF JUSTICE, the seat or throne on which the sovereign sat in the parliament of France. As the authority of the parliament ceased when the king was present, a bed of justice came to signify a session of the king in parliament. The last bed of justice was

assembled at Versailles, Nov. 19, 1787, by order of Louis XVI.

BEDRIACUM, or BEBRIACUM (Battles).—The first, between the generals of Marcus Otho and Aulus Vitellius, rivals for the imperial sceptre, was fought in April, A.D. 69, when the former suffered a defeat, and Marcus Otho committed suicide on the 15th or 16th of April. The second was fought the same year between the generals of Vitellius and Vespasian, the latter being victorious. Bedriacum lay between Verona and Cremona, but its exact position has not been ascertained.

BEDS.—The earliest practice amongst ancient nations was to sleep upon the skins of beasts. Among the Israelites an ordinary couch, with light coverings, served the purpose of a bed. At a later period ivory bedsteads were used by the wealthy (Amos vi. 4). They were sometimes decked with rich hangings, and sprinkled with perfumes (Prov. vii. 16 & 17). The Greeks did not make use of pillows until about B.C. 850. Towards the end of the Roman republic, and under the empire, when simplicity of living had given place to Asiatic luxury, the beds of the opulent classes were most costly and magnificent. Straw is said to have been used in the royal chambers in England in the 13th century. The great bed of Ware, to which Shakspeare alludes in "Twelfth Night"—"Although the sheet were big enough for the bed of Ware in England" (act iii. sc. 2)—is still in existence, and will hold twelve persons.

BEE (Order of), was instituted at Sceaux, by Louise of Bourbon, wife of Louis Augustus of Bourbon, duke of Maine, June 4, 1703. It was intended for women as well as men.

BEEF-STEAK CLUB was established in the reign of Queen Anne, and is described in Ward's "Secret History of Clubs" (1709). Estcourt, the actor, who died in 1712, was its first president. The club was frequently noticed in contemporary literature, and appears to have been famous for the jovial character of its meetings. A club under the same name was established at the Theatre Royal, Dublin, in 1749.

BEGS, ST. (Cumberland).—This ancient town derives its name from Bega, an Irish saint, who is said to have formed a small monastery here A.D. 650. It was destroyed by the Danes, and restored in the reign of Hen. I., about 1120, being intended for Benedictine monks. Archbishop Grindall, who died A.D. 1583, founded the grammar-school. The founder's statutes were afterwards confirmed, and the governors incorporated in 1585. The college was established in 1817.

BEGGARS have in all ages and amongst most nations of which any record remains, practised various arts in order to enlist the sympathies of the benevolent. Severe enactments have, from time to time, been passed against them. By 12 Rich. II. c. 7 (1388), beggars able to work were ordered to be punished, and a provision was made for the

impotent. Various enactments followed. By 22 Hen. VIII. c. 12 (1530), justices of the peace might issue licences to poor and impotent persons to beg within a certain precinct; they were punished if they went beyond the limits, while vagabonds found begging were to be whipped and compelled to labour; and by 27 Hen. VIII. c. 25 (1535), persons giving alms to beggars were to forfeit ten times the value. All former acts were repealed by 1 Edw. VI. c. 3 (1547), and new regulations made. These, however, were abandoned, and the act 22 Hen. VIII. c. 12 revived by 3 & 4 Edw. VI. c. 16 (1549-50). By 14 Eliz. c. 5 (1572) vagabonds above the age of 14 were to be grievously whipped and burnt through the gristle of the right ear with a hot iron. A second offence was punished more severely, and for the third they were to suffer death. This statute was repealed by 35 Eliz. c. 7, s. 24 (1593), and fresh regulations were made by 39 Eliz. c. 4 (1597). All the statutes relating to rogues, vagabonds, sturdy beggars, &c., were reduced into one law by 12 Anne, st. 2, c. 23 (1713), which was explained and amended by 10 Geo. II. c. 28 (1737); and enforced by 13 Geo. II. c. 24 (1740). It was repealed by 17 Geo. II. c. 5 (1744), which made fresh provisions. The act 5 Geo. IV. c. 83 (June 21, 1824), repeals all former acts, and lays down other regulations.

BEGGAR'S OPERA was written by John Gay, and produced at the theatre in Lincoln's-Inn Fields, having been refused by Colley Cibber for Drury Lane, Jan. 29, 1728. It ran for sixty-two nights, thirty-two being in succession; and Gay received £693. 13s. 6d., and afterwards sold the copyright of the opera, with some fables in verse, for £94. 10s. Miss Fenton, the original "Polly Peachum," retired from the stage, and became duchess of Bolton during the run of the piece. Mahon (Hist. of Eng. ii. ch. 18) attributes it to the resentment of Gay against the Queen, who had offered him the appointment of gentleman usher to one of the princesses, a child of about two years of age. The post was an easy one, and the salary £200 per annum. Gay was induced not only to refuse this offer of "an honourable sinecure," but to resent it as an insult. "Soon afterwards," says Lord Mahon, "he joined the opposition, and declared his quarrel by the production of the 'Beggars' Opera,' teeming with satirical strokes against the court and government. The name of 'Bob Booty,' for example, always raised a laugh, being understood as levelled at Sir Robert Walpole. The first idea of the play seems to have sprung from a suggestion of Swift (Spence's Anecdotes, p. 159), but the praise of its execution belongs entirely to Gay."

BEGHARDS, BEGUARDS, or BEGUINES, is a term applied to several religious orders, as well as heretics, during the Middle Ages. It was probably first used to describe those half monks of the third order of St. Francis,

who arose in the 11th century. They must not be confounded with later sectaries, a branch of the Fraticelli, condemned by the Fifteenth General Council, that of Vienne, in 1311 and 1312. This mistake was so often made at the time that Pope John XXII., by a decretal of 1322, declared the last-mentioned to be execrable impostors, and in no way connected with the Beghards of the third order of St. Francis. Mosheim shows that the name is derived from the old German word *beggen* or *beggeren*, to beg, with the word *hard* subjoined; and that it signified to beg earnestly and heartily; and he accounts by this derivation for the indiscriminate manner in which it was applied to so many orders and sects. The subject is involved in almost inextricable confusion, as the student or inquirer will discover if he attempts to reconcile the conflicting accounts of different authorities.

BEGUINES, or BEGUTÆ, praying ladies, as Mosheim calls them, arose in the Netherlands, and spread through France and Germany during the 12th and 13th centuries. They were pious women, virgins or widows, who formed themselves into societies, under the direction of a superior of their own sex. The first establishment of which any record remains, was at Nivelles, in Brabant, founded according to some authorities in 1207, and according to others in 1226. They soon became so numerous that Matthew Paris speaks of 2,000 Beguines in Cologne and its neighbourhood about the year 1243. The example set by the ladies was soon followed by the men, and a society of Beghards, consisting of both bachelors and widowers, was formed at Antwerp in 1228. They were known under various appellations in different parts of the Continent, where, although they spread rapidly, they never became so numerous as the Beguines. As a natural consequence, the Beghards and Beguines became infected with heretical opinions and declined from the simple rule of life observed in the earlier days of their organization. The popes tolerated and sometimes interfered to protect them from their numerous enemies; but they suffered persecution and gradually diminished in numbers, although a few remain to this day in parts of Belgium, Holland, and Germany.

BEHMUS HEIGHTS (Battle).—During the American revolutionary war, Gen. Burgoyne defeated the Americans at Behmus Heights, on the Hudson, Sept. 19, 1777.

BEHRING'S STRAIT, connecting the Pacific Ocean and the Arctic Sea, was discovered by Vitus Behring, a Danish navigator in the Russian service, in 1728. Captain Cook surveyed it in 1788. On an island in the N. Pacific, named after him, Behring was wrecked Nov. 3, 1741, where he died of exhaustion Dec. 8, in the same year.

BEJA (Portugal), the ancient Pax Julia, was captured by the Moors in 1145, and retaken by Sancho, king of Portugal, in 1189. The see is known to have been in existence in the 6th century, as Aprigius was bishop

in 540. The see was suppressed in 1647, and restored in 1770.

BEJAPORE (E. Indies).—This town was formerly the capital of an independent Mussulman state of the same name. Its founder, Yusuf, built the citadel in 1489. In 1566 the walls were completed by Ali Adil Shah, who died in 1579. Aurungzebe took Bejapore in 1686, and annexed it to Delhi, from which it was separated by the Nizam, in 1724, and ceded to the Mahrattas in 1760. In 1818 Bejapore passed into the hands of the British, who assigned it to the rajah of Sattara.

BELCHITE (Battle).—The Spaniards under General Bake were assailed here by the French, commanded by Suchet, June 16, 17, and 18, 1809, and on the last-mentioned day the Spanish army took to flight without firing a shot.

BELFAST (Ireland).—The earliest mention of Belfast occurs in 1315, when Edward Bruce, on the invitation of the native Irish, landed at Carrickfergus, and wasted Belfast and other towns. In 1476 the castle was destroyed by O'Neill; and again in 1503 by Gerald, earl of Kildare, who returned in 1512 and committed still further ravages. In 1552 the castle was repaired and garrisoned, and given by Edward VI. to Hugh McNeill. In 1613 Belfast was incorporated by James I., and sent two members to the parliament of that year. The "Great Bridge of Belfast," which consisted of twenty-one arches, was founded in 1682, and seven of the arches fell in ten years afterwards, 1692. The first edition of the Bible printed in Ireland is that of Belfast, 1704. On the 4th of April, 1708, the castle was burnt. The first Belfast newspaper was published in 1737. The old Exchange was built by the earl of Donegal in 1769. Cotton manufacture was introduced in 1777. The savings bank, established in 1811, was one of the first in Ireland. The museum was built in 1830. Queen's College was opened for the reception of students in November, 1849. In July, August, and September, 1857, the town was the scene of a series of disgraceful riots, in consequence of the opposition of the Roman Catholics to the attempts of some Protestant ministers to introduce open-air preaching. On the 2nd of July, 1859, a fire destroyed the Victoria Chambers, Belfast, causing a loss of £100,000. In the same year the town was one of the centres of the so-called religious revivals.

BELFROI, or BELFREY.—This movable tower with different stories, used in besieging towns, is mentioned by Cæsar. Some of them were of extraordinary height, the upper story rising above the walls of towns. Gibbon speaks of one employed at the siege of Nicæa in 1097, and Froissart describes one used against the castle of Breteuil in 1356. They were commonly employed during the crusades.

BELGIUM.—An insurrection broke out at Brussels, Aug. 25, 1830, which led to a revolution and the separation of the Belgian provinces from Holland. A national con-

gress, installed at Brussels Nov. 10, proclaimed the independence of the Belgian people. A conference of the five great powers, assembled at London, interfered to prevent war between Holland and Belgium, and recognized the independence of the latter power, Dec. 20. The Belgian congress chose the duke of Nemours for king, Feb. 3, 1831, but Louis Philippe refused to sanction the election, and Leopold of Saxe-Coburg was selected, June 4. The five great powers, Austria, England, France, Prussia, and Russia, concluded a treaty, at London, with Belgium, Nov. 15, 1831, defining the limits of the new kingdom under the guarantee of the contracting powers.

A.D.

- 1830. Sept. 22. The separation from Holland resolved upon. Oct. 16. Arrangements made for a national congress. Oct. 27. The insurgents take Antwerp.
- 1831. Feb. 25. M. Surlet de Chokier is installed Regent of Belgium. July 21. Prince Leopold of Coburg is installed at Brussels. Aug. 4. Renewal of hostilities with the king of Holland. Aug. 23. A French army of 50,000 men assists the Belgians, and a truce is resolved upon.
- 1832. Nov. 30. The French besiege the Dutch in the citadel at Antwerp, which surrenders Dec. 23, after a gallant resistance.
- 1833. Great distress among the Belgian manufacturers, in consequence of the cessation of trade with Holland.
- 1834. April 6. Riots in Brussels.
- 1838. Commercial panic, owing to the failure of the bank of Belgium.
- 1839. Feb. 4. Holland concludes a treaty with Belgium.
- 1846. Dec. Terrible famine in Belgium.
- 1850. Aug. Calamitous floods in Belgium.
- 1852. Aug. 10. Queen Victoria visits Belgium. Oct. 27. Treaty of commerce between England and Belgium.
- 1853. Aug. 22. Marriage of the duke of Brabant, heir apparent of Belgium, with the Archduchess Maria of Austria.
- 1857. The Roman Catholic clergy introduce a bill placing the administration of public charities in their power. It passes May 19, but is abandoned June 12, in consequence of its unpopularity.
- 1860. June 17. Deputies from all the Belgian provinces, assembled at Brussels, decide upon forming a league for the preservation of national independence.

BELGRADE (Servia), or THE WHITE CITY, built on the site of the ancient Singidunum, destroyed by the Avars in the 6th century, was founded in 1372. John Huniades defended it against Mohammed II. from July 23 to Sept. 4, 1456. The latter was repulsed, and Gibbon remarks, "the joyful nations celebrated Huniades and Belgrade as the bulwarks of Christendom." The Turks captured it Aug. 20, 1521; the Austrians obtained possession in 1688, but the Turks recovered it in 1690. Prince Eugene invested Belgrade, June 19, 1717, defeated the Turkish army sent for its relief, Aug. 16, and entered the town the following day. By a humiliating treaty it was restored to the Turks in September, 1739. The Austrians retook it Oct. 8, 1789, and restored it in 1791. The Servians seized it in 1806; but in 1813 it reverted once more to the Turks.

BELGRADE (Treaty).—This humiliating peace, dictated at the point of the sword, was concluded between Austria, Russia, and Turkey, Sept. 18, 1739. Austria ceded Servia, Wallachia, with Belgrade and other fortresses, and Russia restored her conquests to the Porte, and renounced her pretensions with respect to the navigation of the Black Sea. It was the most glorious treaty the Turks had ever made with any European power.

BELLAIR (Battle).—Captain Sir Peter Parker, at the head of 120 men, landed from the *Menelaus*, at anchor in the Chesapeake, and attacked the Americans posted at Bellair, near Baltimore, Aug. 30, 1814. The enemy, who appeared in greater force than had been anticipated, were put to flight. Captain Parker was killed and the expedition returned carrying away their wounded.

BELLE GARDE (France).—This barrier fortress, near the Pyrenees, was taken by Pedro III. of Aragon, in 1295. The Spaniards regained possession in 1674; but were expelled by Marshal Schomberg in 1675. Louis XIV. constructed the present fortress in 1679. The Spaniards captured it June 25, 1793, and Dugommier, at the head of the French republicans, regained it Sept. 17, 1794.

BELLEISLE.—This island, off the coast of France, was captured by the English in 1761. Having failed in effecting a landing on the 8th of April it was accomplished on the 22nd, and on the 7th of June the whole island surrendered. It was restored to France by the treaty of Paris, Feb. 10, 1763.

BELLMEN.—Stow says that Alderman Draper set up the first bellman in Cordwainer Street Ward, in January, 1556. The number was speedily increased, and the bellman was often attended by a dog. He was added to the London watch, and went through the streets and lanes ringing his bell, and crying, "Take care of fire and candle; be kind to the poor, and pray for the dead." It was also a part of the bellman's office to bless the sleepers as he passed their doors. Milton refers to this in "*Il Penseroso*:"—

"The bellman's drowsy charm,
To bless the doors from nightly harm."

BELLS were in use amongst ancient nations both for religious and other purposes. They are first mentioned in the book of Exodus. The Egyptian monuments do not, however, contain any appearance of them. Bingham rejects as a vulgar error the story that they were first introduced into the Christian church by Paulinus, bishop of Nola, about A.D. 400, and believes that they were not known long before the 7th century. Benedict, abbot of Wearmouth, brought one from Italy to England in 680. Ingulphus relates of Turketul, abbot of Croyland, who died in 975, that he had a very large bell made, called Guthlac, and that this, with six others soon afterwards added, produced such an exquisite harmony, that

England had no such peal of bells in those days. William of Malmesbury speaks of the bells given to the churches by Dunstan. The custom of consecrating, anointing, and baptizing bells, giving them the name of some saint, Bingham shows to be a modern invention. Baronius himself does not assign the date earlier than the year 968, when John XIII. consecrated the great bell of the Lateran church, naming it John. The Turks have a saying that "bells drive away good spirits from the abodes of men," and do not allow them to be used. The Greek church under their dominion employ various modes of summoning people to service. In the 15th century bells of enormous size were cast. In olden times many superstitions were connected with the ringing of bells. It was believed to be efficacious in dispelling tempests. By 7 & 8 Geo. IV. c. 75, passed June 14, 1827, the court of the Company of Watermen were required to erect and maintain a bell at Billingsgate, and another at Gravesend; the former to be rung at high water, and the latter at first flood.

BELLS (Ringing of).—This custom, almost peculiar to England, was introduced in the Anglo-Saxon period of our history.

BELOOCHISTAN (Asia).—The early history of this state is involved in obscurity. Hajee Mohammed Khan, a kind of lieutenant of Nadir Shah, was assassinated in 1739, by his brother, Nusseer Khan, who obtained the chief authority. In 1758 he declared Beloochistan independent, and after a struggle succeeded in concluding a treaty with the Affghan monarch. Under his successors Beloochistan lost several of its provinces. Owing to the hostile and treacherous attitude assumed by the government and people towards the English in their advance through the Bolan Pass, Kelat, the chief town of Beloochistan, was captured Nov. 13, 1839, and temporarily occupied by them. The Beloochees regained possession July 27, 1840; but it was recovered by the English, Nov. 3, 1840, and held by them until the conclusion of the Affghan war.

BENARES (Hindostan).—The holy city of the Hindoos is the capital of a district of the same name, and the ancient seat of Brahminical learning. It is studded with mosques and temples, whilst thousands of pilgrims flock to it annually to wash away their sins in the waters of the Ganges. It came into the possession of the East-India Company, May 21, 1775. There is a Sanscrit college here, founded in 1792, to which an English department was added in 1832. The 37th

regiment of native infantry, and the 13th irregular cavalry, and Loodianah Sikhs, mutinied here June 4, 1857. Owing to the energy displayed by General Neill, the supremacy of the English was maintained.

BENCOLEN (Sumatra).—The East-India Company, on being expelled from Bantam, formed a settlement, afterwards called Fort Marlborough, at this place in 1683. It was much enlarged in 1695. The natives massacred a large portion of the settlers in 1719. Bencoolen and other English settlements in the island were destroyed by the French in 1760. They were, however, again restored. By the ninth article of the treaty between England and the Netherlands, concluded at London, March 17, 1824, they were ceded to the Dutch in exchange for their settlements on the continent of India. The respective settlements were to be given up March 1, 1825.

BENDER (Bessarabia).—Varnitza, the retreat of Charles XII. of Sweden after his defeat at Pultowa (July 8, 1709), is situated near this place. He remained here in captivity until the end of 1714. Bender was taken by the Russians, Sept. 28, 1770. A sanguinary battle was fought at Tobak, near Bender, between the Turks and Russians in 1789, in which the former were defeated. Bender itself surrendered in the middle of November. It was again taken in 1809, and was finally ceded to Russia by the treaty of Bucharest in 1812.

BENEDICTINES.—This order of monks was founded by St. Benedict or Bennet, who introduced monachism into western Europe, and erected his first monastery on the site of a temple of Apollo on Monte Cassino, about 50 miles from Subiaco, in Italy, A.D. 529. The order spread rapidly in Europe; St. Benedict himself founded several monasteries, and his example was followed by others. The monks took the vows of chastity, obedience, and poverty. By some authorities the Benedictines are said to have been introduced into England by Augustine in 596, and by others the event is assigned to a later period, Duncan being considered the first English abbot of that order. Edgar (958-975) is said to have founded above forty Benedictine convents. Milman, referring to the beautiful spots chosen for their monasteries, says, "In general, if a district in England be surveyed, the most convenient, most fertile, most peaceful spot, will be found to have been the site of a Benedictine abbey." Towards the end of the 8th century they had become so numerous that Charlemagne caused inquiry to be made whether any other kind of monks existed than those of the order of St. Benedict. The austerity of their rule soon became relaxed, and Matthew Paris mentions a reformation that was attempted in 1238. Their merits in collecting, preserving, and multiplying copies of classical manuscripts must not be forgotten; and the order is every way distinguished for the numerous services rendered to literature. There were several branches of the Benedictines living under the same rule but observing a different discipline;

the chief being the Cluniacs, established in 912 and brought into England in 1077, the Carthusians, founded in 1084 and introduced into England in 1180, and the Cistercians or Bernardines, founded in 1098 and brought into England in 1128. The habit of the Benedictines was black, and from this circumstance they have been called Black Monks or the Black Monks of St. Benedict. According to an inquiry instituted by Pope John XXII. (1316-1334), this order had at that time produced 20 emperors, 10 empresses, 47 kings, 50 queens, 4 popes, 68 princes, 100 princesses, 200 cardinals, 7,000 archbishops, 15,000 bishops, 15,000 abbots, and 4,000 saints, besides a host of other dignitaries, both in church and state. There were nuns as well as monks of this order.

BENEFICE.—An estate held by feudal tenure was originally termed a benefice, which at length came to signify the ecclesiastical estate granted to a clergyman for term of life, to be enjoyed by him on account of his ministry in the Church. Lord Coke says benefice is a large word, and is taken for any ecclesiastical promotion whatever. The custom of endowing churches arose in the time of Justinian, about A.D. 500. Towards the end of the 12th century the bishops of Rome issued mandates, requesting that particular benefices might be conferred upon their nominees. This was speedily assumed as a right, and Clement V. (1305-1314) claimed the disposal of all benefices. This claim was resisted, more particularly in England, and the statute of provisors of benefices (25 Edw. III. st. 6), passed in 1351, was aimed against this system. It was followed by other enactments of a similar character. The temporary submission of former sovereigns to the claim had inundated the country with Italians and other foreign clergy. The statute of provisors was confirmed by 3 Rich. II. c. 3 (1380); and by 7 Rich. II. c. 12 (1383) it was enacted that no alien should be eligible to purchase or to be presented to any ecclesiastical preferment within the realm. The most terrible abuses arose on account of the pretensions of the pope respecting the presentation to benefices. Milman (Lat. Christ. vol. vi. b. xiii. c. 3), treating on Boniface IX. (1389-1404), says, "The smaller benefices were sold from the day of his appointment with shameless and scandalous notoriety. Men wandered about Lombardy and other parts of Italy, searching out the age of hoary incumbents, and watching their diseases and infirmities. For this service they were well paid by the greedy aspirants at Rome. On their report the tariff rose or fell. Benefices were sold over and over again." A distinction between benefices and cathedral preferments is drawn in 1 & 2 Vict. c. 106, s. 124 (Aug. 14, 1838), and in a later act, 13 & 14 Vict. c. 98, s. 3 (Aug. 14, 1850), the word "a benefice" is explained to signify a benefice with cure of souls and no other.

BENEFIT OF CLERGY.—The exemption of the clergy from secular jurisdiction was one of the privileges claimed by the Roman

Catholic church. Milman remarks (*Lat. Christ.* vol. iii. b. viii. c. 8), "Crimes of great atrocity, it is said, of great frequency, crimes such as robbery and homicide, crimes for which secular persons were hanged by scores and without mercy, were committed almost with impunity, or with punishment altogether inadequate to the offence by the clergy; and the sacred name of clerk, exempted not only bishops, abbots, and priests, but those of the lowest ecclesiastical rank from the civil power." The system, gradually introduced into this country after the Norman conquest, gave rise to many abuses. Not only the clergy, but clerks and all members of the laity who could read, in cases in which capital punishment was awarded, were at length entitled to claim benefit of clergy, so that when the penalty of death was to be rigidly enforced, the statute expressly intimated that it was without benefit of clergy. On the introduction of the custom the claim was not allowed unless the prisoner appeared in his clerical habit and tonsure. When ability to read became the test, this ceremony ceased, and he was merely required to read from a psalter or some other book before the judge. By 4 Hen. VII. c. 13 (1489), it could only be pleaded once by persons not in orders, and by 4 Hen. VIII. c. 2 (1512) it was denied to murderers and felons. Abjurors in cases of treason were not allowed benefit of clergy, by 28 Hen. VIII. c. 1 (1536), and the same statute placed persons in holy orders, in respect to many offences, exactly on the same footing as the laity. Women were allowed to plead benefit of clergy by 3 & 4 Will. & Mary, c. 9, s. 6 (1691), and by 4 & 5 Will. & Mary, c. 24, s. 12 (1692), women were only allowed to plead benefit of clergy once. Both these statutes were made perpetual by 6 & 7 Will. III. c. 14, s. 1 (1695). The practice of requiring the prisoner to read from a book was abolished by 5 Anne, c. 6, s. 4 (1706). Benefit of clergy was abolished by 7 & 8 Geo. IV. c. 27, s. 6 (June 21, 1827), and 4 Vict. c. 22 (June 21, 1841) removed all doubts as to the liability of peers to punishment for felony. It was abolished in Ireland by 9 Geo. IV. c. 54, s. 12 (July 15, 1828).

BENEVENTO (Italy).—The ancient Benevento was made the capital of a duchy by Alboin, king of Lombardy, A.D. 571. In the time of Charlemagne, the duchy embraced the modern kingdom of Naples, and Arrechis, its reigning duke, saved it from the French yoke; and though defeated at Amalphi in 786, preserved his dominions by doing homage. It was besieged by the Saracens in 874, and being severely pressed, a fearless citizen dropped from its walls, passed through the enemy, besought aid of the Greek emperor, and was returning with a favourable answer, when he was made prisoner. His captors offered him a rich reward to betray his countrymen, but as soon as he was led within hearing, he cried in a loud voice,—"Friends and brethren, be bold and patient; maintain the city; your sovereign is informed of your

distress, and your deliverers are at hand. I know my doom, and commit my wife and children to your gratitude." He had scarcely uttered the words, when he fell transfixed by the spears of the Saracens. It was a simple bishopric until 969, when it was made the seat of an archbishopric. It was taken by the Normans, and declared in favour of Pope Leo IX. in 1050. Robert Guiscard besieged it in 1078, and Pascal II. expelled from Rome in 1117, sought refuge at Benevento. It was ceded to Rome in 1139, and taken by Frederick II. in 1240. Charles of Anjou, supported by France, defeated Manfred, king of Sicily, who was slain in a great battle near it, Feb. 26, 1266. The city itself was sacked, and a general massacre of both sexes took place. The French seized it in 1798, but it was restored to the pope in 1815. In 1806 the principality was conferred by Napoleon I. on Talleyrand, with the title of prince of Benevento. Councils were held here Aug. 1, 1059; in Aug. 1087; March 28, 1091; Aug. 12, 1108; in April, 1117; and March 10, 1119.

BENEVENTUM (Italy).—This important city fell into the hands of the Romans during the third Samnite war. Pyrrhus was defeated near it B.C. 275, and it was made a Roman colony B.C. 268. The Carthaginians were defeated in the neighbourhood B.C. 214 and B.C. 212. It suffered frequently from the ravages of war; and was sacked A.D. 545, during the Gothic invasion. (*See BENEVENTO.*)

BENEVOLENCE, though nominally a free gift, was, in fact, a forced loan. The old Chronicle of Croyland records, amongst other events of the year 1473, the introduction of a new and unheard of impost, by which every one was to give "just what he pleased, or rather, just what he *did not please*, by way of *benevolence*." Hallam (*Middle Ages*, iii. ch. 8, pt. 3) gives Edward IV. the credit of having introduced this new method of obtaining the subjects' money, under the plausible name of benevolences, and says "that they came in place of the still more plausible loans of former monarchs, and were principally levied on the wealthy traders." This form of exaction soon became intolerable, and was annulled for ever by 1 Rich. III. c. 2 (1484), though this monarch had recourse to them in order to raise money to carry on the war against the earl of Richmond in 1485. Henry VII. was the first English king who obtained the sanction of parliament to a benevolence, and this he effected in 1492. By 11 Hen. VII. c. 10 (1495), proclamation was to be made against defaulters, requiring them to pay the sum due within three months, and in default they were to be imprisoned, without bail, until payment was made or sufficient sureties obtained. In case of death the goods and chattels of a defaulter became chargeable. Wolsey exacted several benevolences between 1522 and 1525. In the latter year an extraordinary demand caused much discontent, and the

citizens of London who appealed to the statute against benevolences, passed in Richard the Third's reign, were told that he was a usurper, and consequently that his laws were not binding on the king. In 1545, Henry VIII. exacted another benevolence which was very unwillingly paid. Elizabeth wisely abstained from the practice, but James I. raised one in 1614. This method of obtaining supplies was declared illegal by the Petition of Right in 1689; and 1 Will. & Mary, st. 2, c. 2, passed in 1689, declared levying of money without the authority of Parliament illegal.

BENGAL (Hindustan).—Was conquered by the Mohammedans in 1203, and became independent in 1340. The emperor Acbar made it a dependency of Delhi in 1580.

A.D.

- 1517. Some Portuguese are cast upon the coast of Bengal; their ships enter the Ganges.
- 1536. Nine Portuguese ships sent to assist Mahmoud Shah.
- 1580. Bengal made a dependency of Delhi.
- 1620. An attempt is made to establish a factory at Patna, but fails.
- 1634. The English obtain permission to trade to Piplee, in Orissa, where a factory is built.
- 1640. An English factory on the Hooghley established.
- 1652. The English obtain great influence in Bengal.
- 1658. Bengal placed under Madras.
- 1664. The French and Danes form establishments in Bengal.
- 1681. Bengal made an agency distinct from Fort St. George, Madras.
- 1686. Dec. 20. The Council remove from the Hooghley to Chuttannuttee, or Calcutta.
- 1687. Sept. The Hooghley factory resumed.
- 1688. Dec. The factories in Bengal abandoned.
- 1690. The Company's agents return to Chuttannuttee and are allowed to erect a factory.
- 1700. The towns of Chuttannuttee, Govindpore, and Calcutta, granted to the Company. Fort William is erected, and the station made a presidency.
- 1707. Calcutta made the seat of a presidency distinct from Madras. The garrison increased to 300 men.
- 1726. A mayor's court established in Bengal.
- 1765. Aug. 12. By the treaty of Allahabad, the Company are empowered to receive the revenues of Bengal, Bahar, and Orissa.
- 1772. The Company assume direct authority.
- 1773. July 1. Bengal made the chief presidency in India, and the residence of the governor-general fixed at Calcutta. Supreme court of judicature established.
- 1774. Aug. 1. The new arrangements commence in Bengal.
- 1793. Permanent settlement introduced by Lord Cornwallis.
- 1813. Calcutta made a bishopric.

GOVERNORS OF BENGAL.

A.D.

- 1740. Alexander Dawson.
- 1762. William Fytche. He died Aug. 8, and was succeeded by Roger Drake.
- 1767. Watts, Manningham, Becker, and Holwell, govern alternately, each for four months.
- 1768. Robert Clive, afterwards Lord Clive.
- 1760. John Zephaniah Holwell, retired July 27, when Mr. Henry Vansittart succeeded.
- 1764. John Spencer.
- 1765. Lord Clive again.
- 1767. Harry Verelst.
- 1763. John Cartier. In 1772, Warren Hastings was appointed to succeed him. (See INDIA.)

BENNINGTON (Battle).—A party of Hessians were defeated at this place in Vermont, by the Americans, July 16, 1777.

BENSINGTON (Battle).—Offa, Ethelbald's successor in the kingdom of Mercia, having subdued Kent, reduced the more powerful kingdom of Wessex by the defeat of Cynewulf, at Bensington, A.D. 777. This victory rendered him master of all the territory north of the Thames.

BERAN-BIRIG (Battle).—Fought between the Britons and Saxons at this place, supposed to be Barbary Hill, near Marlborough, Wilts, though some authorities are in favour of Banbury, Oxfordshire, A.D. 556. Henry of Huntingdon says that the Britons formed their battle array in nine battalions: three being posted in the van, three in the centre, and three in the rear, the archers, slingers, and cavalry being arranged in the Roman order. The Saxons came on in a compact body, and charged with such fury, that the standards were dashed together, and a hand-to-hand fight ensued. The battle lasted till nightfall without any decisive result.

BERBICE (S. America), was discovered by the Spanish navigator Pinzon in 1499. The Dutch formed a settlement in this district in 1580. The English settled in the neighbourhood in 1634, but withdrew in 1667. The French attacked the colony in 1690, and in 1712; on each occasion levying a contribution. An insurrection of the negroes occurred in Feb. 1762, when they destroyed a large amount of property. Berbice surrendered to an English expedition May 2, 1786; but it was restored to the Dutch by the 3rd article of the treaty of Amiens, in 1802. It was again taken Sept. 23, 1803; and retained by an agreement signed between England and the Netherlands in August, 1814. With Demerara and Essequibo it was formed into one colony in 1831, under the name of British Guiana.

BERENGARIANS.—The followers of Berengarius, archdeacon of Angers, who, about 1047, denied the real presence in the Eucharist. He was excommunicated by a council at Rome May 2, 1050. The cause was tried again in a council held at Tours, in 1055, when Berengarius is said to have recanted, and to have been reconciled to the Church. At a later period he persisted in maintaining the views he had previously advocated, and is said to have been again summoned before a council at Rome in 1059, and to have once more recanted. He again wrote in defence of his former opinions, and was condemned at councils held at Angers, April 4, 1062; at Rome in 1063; at Poitiers in 1073; at Rome in Nov. 1078, and Feb. 1079, when he is said to have made a confession of faith; and at Bordeaux in 1080, when he made another exposition of his faith. It is probable that some of the above-mentioned councils did not deal with Berengarius, who died in communion with the Church, Jan. 5, 1088.

BERESINA (Battle).—The French, during their retreat from Russia, were defeated at this river with great slaughter, Nov. 26, 27,

and 23, 1812. Such scenes of carnage and destruction as those of the night of the 28th and the following days have seldom been witnessed. The camp-followers—men, women, and children,—terrified by the Russian artillery, pressed forward to the bridges, one of which broke down, and thousands were precipitated into the stream. On the return of spring above 12,000 bodies were taken out of the bed of the river, near the place where the struggle occurred.

BERG (Germany), was ruled by counts for many years, and on the failure of the first line in 1348, devolved on the princes of Juliers. It was raised to a duchy in 1380, and in 1423 Juliers was incorporated with it. Berg and Juliers came into the possession of the dukes of Cleves on the failure of the Juliers line in 1511. The Cleves line became extinct in 1609, and after a long contention, the elector palatine and the elector of Brandenburg, in 1666, agreed to divide the possessions, the former taking Berg. It was merged in Bavaria, the elector of which ceded it to France in 1806; and Napoleon I. raised it into a grand-duchy, and conferred it with other territory upon Murat, Mar. 15 in that year. Murat went to Naples in 1808. This grand-duchy was extinguished in 1815, and the territories transferred to Prussia.

BERGAMO (Italy), the ancient Bergomum, was ravaged by Attila A.D. 452. Under the Lombard monarchs it was made the capital of a duchy. It was annexed to Venice in 1428; and was taken by the French in 1509. The Venetians having succeeded in re-occupying it, the French again obtained possession in 1512; but it once more fell into the power of the Venetians in 1515. Bergamo revolted March 12, 1797; was incorporated with the Cis-alpine republic by the treaty of Campo Formio, Oct. 18, 1797; was given to Austria in 1814-15, and ceded by that power to Sardinia in 1859. It was a bishop's see in the early Church. It had two cathedrals, the oldest destroyed by the Venetians in 1561, and the other was founded in 896.

BERGEN (Battles).—The first was fought between Bergen and Alkmaar, in the north of Holland, Sept. 19, 1799. The duke of York, commanding the Russian and British troops, attacked the French and Dutch under Gen. Brune. The Russians fled in disorder, but the English obtained some advantages. Both armies, however, at night resumed the positions they had occupied before the battle. In the second battle, fought at the same place Oct. 2, 1799, the duke of York, with 30,000 English and Russians, engaged and defeated General Brune, at the head of 25,000 French and Dutch troops.

BERGEN (Germany).—A battle was fought near this place, in Germany, between the French and the allied English and German troops, April 13, 1759. The latter retired from the contest, but were not pursued by the French army.

BERGEN (Norway), was founded in 1070, and during the 12th and 13th centuries was

the residence of the kings of Norway. The merchants of the Hanse towns obtained great privileges in the way of trade in 1278, and these were confirmed and extended in 1343. From this time they obtained an ascendancy, which was destroyed by a law passed by Frederick II. of Denmark, July 25, 1560. It has several times suffered from the ravages of pestilence and fire. The former committed great ravages in 1348, 1353, 1618, 1629, and 1637; and a fire that broke out May 19, 1702, destroyed the larger portion of the town.

BERGEN-OP-ZOOM (Holland).—This strong fortress was unsuccessfully assailed by the duke of Parma in 1581 and in 1588, and by Spinola in 1622. The French captured it Sept. 17, 1747; and it was restored to the Dutch by the treaty of Aix-la-Chapelle in 1748. It again fell into the hands of the French in 1795. Graham carried it by storm March 8, 1814, but some of the troops having broken into the wine-shops, were overcome by wine, and the garrison, taking fresh courage, expelled the assailants. It was surrendered by the treaty of Paris in 1814.

BERGERAC (France).—The earl of Derby defeated the French at this place in Guienne in 1344. So great was the booty on the occasion that the earl of Derby is said to have obtained a pipe of gold. The French recovered Bergerac in 1371; but the English recaptured it, and were not finally expelled until 1450. It became one of the strongholds of the Huguenots. Louis XIII. captured it in 1621, and demolished its fortifications.

BERGERAC (Treaty).—Concluded at Bergerac between the Huguenots and the Roman Catholics Sept. 17, 1577. Protestants were allowed to practise their religion in those places in which it was tolerated, on the day the treaty was signed, though its exercise was entirely prohibited in Paris, or within 10 leagues of the city. The nobility were free to follow the Protestant worship in their own houses. These and other points were settled by the treaty, which in the end satisfied neither party. It is also called the treaty of Poitiers.

BERKHAMSTEAD (Herts).—A council was held here A.D. 697, convened by Withred, king of Kent. Several constitutions were passed, and amongst them one ordering the suspension of any priest who deferred the baptizing of children beyond the proper time.

BERLIN (Prussia).—This city is said to have been founded by Albert the Bear, margrave of Brandenburg. The elector Frederick William improved and embellished the city, 1640—1683; and Frederick III., who erected Prussia into a kingdom in 1701, and bore the kingly title of Frederick I., greatly extended its area. The French and Austrians surprised Berlin Oct. 17, 1757. The Austrians and Russians captured it Oct. 9, 1760, and having committed various depredations quitted it on the 13th. Napoleon I. entered Berlin Oct. 21, 1806. An insurrection broke out during the revolutionary troubles on the

Continent, June 15, 1848. Its Academy of Sciences was founded in 1702; its bank in 1765; and its university in 1810.

BERLIN (Treaties).—Several treaties have been concluded at this city, the principal being the peace between Prussia, Poland, and Hungary, by which the former obtained Silesia, July 28, 1742; the treaty of union and confederation for maintaining the indivisibility of the German empire, caused by the attempt of Austria to exchange her possessions in the Netherlands for the duchy of Bavaria, which was signed at Berlin July 23, 1785, by the king of Prussia, the king of England as elector of Brunswick-Lunenbourg, the elector of Saxony, and other German princes; and the treaty between Prussia and France guaranteeing the neutrality of the north of Germany, Aug. 5, 1796.

BERLIN DECREE.—Prussia and a great part of the Continent being under his domination, Napoleon issued this celebrated interdiction against English commerce at Berlin, Nov. 20, 1806. It prohibited all commerce, and even correspondence between countries under his sway and Great Britain. England was declared to be blockaded; English property was liable to seizure; all subjects of England found in countries occupied by French troops were declared prisoners of war; and letters addressed to Englishmen or written in the English language were to be stopped; and ships touching at any port in England or her colonies, were excluded from the ports under French control.

BERMUDAS (Atlantic), or SOMERS' ISLANDS, were discovered by Juan Bermudez, a Spaniard wrecked upon them in 1522, during a voyage from Spain to Cuba with a cargo of hogs. Henry May was wrecked upon them in 1593; and Sir George Summers in 1609, who claimed them for the Virginia company. They sold them to another company, to which a charter was granted by James I. June 29, 1615. A settlement was immediately formed, and George-town founded. Their first general assembly was held Aug. 1, 1620. The group consists of between three and four hundred, but of these only six or seven are inhabited. The charter expired in 1684.

BERNARDINES.—The Cistercians, a branch of the Benedictines, instituted at Cîteaux in 1098, were reformed by Bernard, abbot of Clairvaux, in Champagne, at the commencement of the 12th century; from which circumstance they received the name of Bernardines. The second crusade, in 1146, was preached by Bernard, who was one of the most influential men of his time. He resolutely refused all ecclesiastical dignities, and is said to have founded 160 religious houses. The Bernardines came into England in 1128. Their first house, at Waverley, in Surrey, was founded in that year, and completed in 1129. At one time the number of their establishments was about ninety. From the colour of their habit, they were called White Monks. There were nuns of this order. (See CISTERCIANS.)

BERNE (Switzerland) joined the Swiss confederation, being the eighth canton, in 1352. Its chief town, of the same name, was founded by Berthold V., duke of Z r ngen, in 1191; and was made a free and imperial city by a charter from Frederick II., dated May, 1218. It was besieged, though unsuccessfully, by Rodolph of Habsburg in 1288. It long exercised considerable authority, and obtained several accessions of territory. It was destroyed by fire in 1405. Berne was made the capital of Switzerland by the National Assembly of 1848. Its university was founded in 1834.

BERWICK-ON-TWEED.—This ancient town, between England and Scotland, suffered greatly in the wars between those countries. When first mentioned in history, it belonged to Scotland, and its castle was ceded to England in 1174, and restored to Scotland in 1189. Balliol did homage for himself and his heirs for the whole kingdom of Scotland at Berwick, Nov. 30, 1292. Edward I. captured Berwick, Mar. 30, 1296, united it to England, and granted it a charter, afterwards extended and confirmed by Edward III. Bruce took it in 1315, and again April 2, 1319; and Edward III. recovered it July 20, 1333. The Scots surprised it Nov. 6, 1355, but Edward III. retook it in 1356. Henry VI. surrendered Berwick to the Scotch, April 25, 1461; it was, however, retaken by Edward IV. in 1482, who conferred many privileges upon it by 22 Edw. IV. c. 8 (1482). It was made independent of both countries in 1536. Cromwell captured it in 1649, and Monk in 1659; and it has since remained in the possession of England. The statute 20 Geo. II. c. 42, s. 3 (1746), provided that where England only is mentioned in any act of Parliament, the same, notwithstanding, shall be deemed to comprehend the dominion of Wales and the town of Berwick-upon-Tweed. A treaty was concluded here in 1560; and another between Elizabeth and James VI., of Scotland, July 1, 1586, providing for mutual assistance in case of invasion by Roman Catholic powers.

BESAN ON (France).—This ancient city, called Vesontio by the Romans, was occupied by Julius C sar B.C. 56. The Burgundians sacked it A.D. 456, and the Hungarians in 937. The emperor Frederick I. held a diet of more than usual magnificence at Besan on, Oct. 24, 1157. It was an imperial city from 1184 till about 1664. It was captured by Louis XIV. in 1668, and soon after annexed to France. The allied army failed in an attack upon it in 1814. It was made a bishopric in the 3rd century.

BESIKA BAY (Archipelago).—The Czar Nicholas having, May 31, 1853, issued an order for the passage of the Pruth by his troops, the French and English fleets sailed for this bay, at the entrance of the Dardanelles, June 2, 1853, and anchored here June 13.

BESSARABIA.—This province, taken by the Turks under Mohammed II. in 1474, was seized by the Russians in the autumn of

1770, and finally ceded to Russia by the treaty of Bucharest in 1812.

BETHLEHEM (Our Lady of).—This military order was instituted by Pius II. Jan. 18, 1459, in honour of the recovery of Lemnos from the Turks. It again fell into their power, and the order was not established.

BETHLEHEM (Syria).—This town, about six miles south of Jerusalem, is celebrated as the birthplace of the Saviour of mankind (Matt. ii. 8, and Luke ii. 4). It was called Ephrath, and is mentioned as the place at which Rachel died and was buried (Gen. xxxv. 17—19, and xlviii. 7), B.C. 1729. Rehoboam fortified or rebuilt it (2 Chron. xi. 5, 6), B.C. 973. David was born here (circ. B.C. 1085), and hence it was called the city of David. Helena, the mother of Constantine, A.D. 325, erected a church, which remains to this day, on the place of the Nativity. It was ceded, with other towns, to Frederick II. by the sultan of Egypt in 1229. It was called Bethlehem-Judah to distinguish it from Bethlehem in Zebulon (Joshua, xix. 15, 16). Bethlehem was made a bishopric in 1170.

BETHLEHEM (United States) was settled by the Moravians under Count Zinzendorf in 1741.

BETHLEHEM HOSPITAL, commonly called Bedlam, a priory for canons, both brothers and sisters, founded by a deed of gift dated Wednesday, Oct. 23, 1247, from Simon FitzMary, sheriff of London, was with all its revenues granted by Henry VIII., in 1547, to the city of London, for an hospital for lunatics. It was transferred from Bishops-gate Without to Moorfields in 1675. The foundation of the new building was laid in April, 1675, and it was finished in July, 1676. The hospital was transferred to its present site in St. George's Fields in 1814. The foundation-stone was laid April 18, 1812; and the erection of a new wing was commenced July 26, 1838. Patients partially cured, and suffered to go at large, were called Bedlam beggars.

BETHLEHEMITES.—These monks were also styled Star-bearers, because they wore a red star of five rays, with a blue circle in the middle, on their breast, in memory of the star which appeared to the wise men. Matthew Paris states that they obtained an establishment at Cambridge in 1257, and adds,—“So many orders of brethren now made their appearance in England that there was a most extraordinary confusion among them.” A religious order bearing this name was founded at Guatemala, in New Spain, by Pierre de Bethencourt, about 1660. They attended the sick in hospitals. Innocent XI. confirmed the order in 1687, and ordered the brethren to follow the rule of St. Augustine.

BETTING-SHOPS.—A considerable number of these places, the owners of which professed themselves ready to bet upon the principal races with all comers, sprung up in the metropolis between the years 1850 and 1853. Servants, apprentices, and work-

men frequently robbed their employers to invest money in this new form of gambling, and a bill for their suppression (16 & 17 Vict. c. 119) received the royal assent Aug. 20, 1853.

BEVERWYK (Battle).—In this position, near Alkmaar, in the Netherlands, General Brune's outposts were attacked by the English and Russian forces, Oct. 6, 1799. The French and Dutch were at length compelled to give way, though their antagonists did not succeed in capturing the position.

BEYLAU (Battle).—Ibrahim Pasha, at the head of the Egyptian army, defeated the Turks at this place, in Asia Minor, July 29, 1832. The battle was fought near the spot where Alexander the Great defeated Darius in the battle on the Issus.

BEYROUT (Syria), the ancient Berytus, was the seat of a famous school of jurisprudence from the 3rd to the middle of the 6th century. The city having been destroyed by an earthquake July 9, 551 A.D., the school was removed to Sidon. Beyrout suffered severely during the crusades, and having been taken by the Saracens, was wrested from them by Baldwin in 1110. The Saracens, however, regained possession in 1187. Ibrahim Pasha seized it in 1832; and it was bombarded by the combined fleets of England and Turkey, Sept. 11—16, 1840, and being captured, was restored to the Porte. Beyrout was made a bishopric by Theodosius the Younger, and after its capture by Baldwin I. it became the seat of a Latin bishop about 1136.

BEZABDE (Mesopotamia) was captured by Sapor II. A.D. 360, when all the inhabitants, even women and children, were massacred. Constantius II. made a vain effort to wrest it from the Persians during the same year. It was the seat of a bishopric before the Persians seized it.

BEZIERS (France).—This ancient city, made a Roman colony A.D. 636, was besieged during the crusade against the Albigenes, and captured July 23, 1209. “A general massacre,” says Milman (Lat. Christ. vol. iv. b. ix. ch. 8), “followed; neither age nor sex were spared; even priests fell in the remorseless carnage. Then was uttered the frightful command, become almost a proverb, ‘Slay them all, God will know his own.’ In the church of St. Mary Magdalene were killed 7,000 by the defenders of the sanctity of the Church. The amount of the slain is variously estimated from 20,000 even up to 50,000. The city was set on fire; even the cathedral perished in the flames.” It was rebuilt in 1289, and suffered severely in the religious wars in France. Tradition assigns the introduction of Christianity to St. Paul. Its bishopric, founded at an early period, was suppressed in 1801.

BEHRTPORE (Hindustan).—The capital of a native state of the same name. General Lake concluded a treaty of perpetual friendship with the rajah in December, 1803. The rajah, however, espoused the cause of Holkar in 1804, and his chief town, Bhurtpore, was besieged Jan. 3, 1805, by General Lake. The

English general failed in several attempts to carry the place by storm; but the rajah surrendered April 10, and a second treaty was concluded, by which, on the payment of a heavy fine, the rajah was allowed to retain his authority. A rebellion broke out Feb. 25, 1825. Lord Combermere captured Bhurtpore, Jan. 18, 1826, and the rightful heir was restored Feb. 4.

BIAGROSSA (Treaty).—Concluded between Louis XII. and the cardinal of Pavia, on behalf of Pope Julius II. in July, 1509.

BIALYSTOCK (Poland).—This province was incorporated with Russia by the third treaty of partition in 1795. A portion of it was transferred to the duchy of Warsaw by the treaty of Tilsit, in July, 1807, whilst the remainder was erected into a separate province.

BIANCHI.—Men and women, called White Penitents, from a white linen vestment that they wore, appeared all over Italy in August, 1399. In their progress from province to province, and city to city, they kept their faces covered and bent downward, carrying before them a large crucifix, and shouting "*Misericordia.*" They sang continually "*Stabat mater dolorosa.*" They were not confined to Italy, where, according to some authors, they effected a remarkable reformation of manners. In 1400 Boniface IX. had their leader seized at Viterbo. He was sent to Rome, and burned there by his orders, and he prohibited these processions.

BIANCHI AND NERI, OR WHITES AND BLACKS, appeared amongst the numerous factions into which the inhabitants of various Italian towns were divided early in the 14th century. They are said to have originated in the following manner. Two branches of a rich and powerful family in Pistoja, called the Cancellieri, were descended from the two wives of their common ancestor. The descendants of one of them, named Bianca, called themselves *Bianchi*, whilst the descendants of the other wife were termed *Neri*. A quarrel having ensued at a convivial meeting, one of the Bianchi wounded a member of the Neri branch. The latter in revenge waylaid and maltreated another of the Bianchi. The father of the last-mentioned aggressor compelled him to wait upon, and ask pardon of, Guglielmo Cancellieri, the father of the wounded man. Guglielmo could not, however, be appeased; he chopped off the hand of the penitent, bidding him return to his parent and tell him that wounds were to be healed by wounds, not words. The feud between the families gathered strength from this savage act; the citizens joined in the struggle, and factions, bearing these names, spread to other towns in Tuscany. At Florence two noble families, the Cerchi and the Donati, took up the quarrel in 1300, the former siding with the whites and the latter with the blacks. In 1302 Dante Aligheri, with several of the Bianchi, were expelled from Florence, and in his exile the poet wrote the great work that has immortalized his name. Hallam (Middle Ages, vol. i. ch. 3,

pt. 1), remarks, "An outrage committed at Pistoja in 1300 split the inhabitants into the parties of Bianchi and Neri; and these, spreading to Florence, created one of the most virulent divisions which annoyed that republic."

BIBERACH (Battle).—During the French revolutionary war, the republicans, led by Moreau, defeated the imperialists at Biberach, in Würtemberg, with considerable loss, Oct. 2, 1796. This is often mistaken for another combat at Biberach, in which Moreau defeated Marshal Kray, the Austrian general, May 9, 1800.

BIBLER, or THE BOOK.—A term derived from the Greek, applied to the sacred writings by St. Chrysostom in the 5th century. The name Old Testament first occurs in St. Paul's second epistle to the Corinthians (iii. 14), written in the year 55. The canon is generally believed to have been closed by Simon the Just, about B.C. 292. The Apocrypha was added B.C. 150. The Old Testament canon consists of 39 books, divided into 929 chapters, containing 592,439 words. Of this portion of the Bible, the oldest edition is the Septuagint, translated into the Greek, according to the tradition of Aristeas, B.C. 277, by seventy-two Jews. The work was undertaken at the desire of Ptolemy Philadelphus. The books of the New Testament, written in Hellenistic Greek, were first collected about the middle of the 3rd century. Peter (2nd epistle, iii. 16), A.D. 65, speaks of St. Paul's epistles as though they had been collected in his time. Doubtless the separation of the genuine from the spurious had already commenced when St. Peter wrote. The New Testament is divided into 27 books, containing 260 chapters. The sacred writings were translated by the early Christians into various languages. Eusebius says, "They were translated into all languages, both of Greeks and barbarians, throughout the world, and studied by all nations as the oracles of God." Many of the fathers bear similar testimony. Origen published a Bible, called Hexapla, in six columns, with different versions, and on adding two, called it the Octapla. The division of the Bible into chapters has been erroneously attributed to Stephen Langton, archbishop of Canterbury, in 1206. The Psalms were always divided as at present, and Hugo de Sancto Caro, a Dominican friar, and afterwards a cardinal, who compiled the first concordance to the Bible, divided the matter into sections, and the sections into under-divisions, and these sections are the chapters. He flourished about 1240, and died in 1262. Rabbi Isaac Nathan in 1445 introduced regular verses. These alterations have since been much improved. In the Latin translation of the Bible, by Paginus of Lucca, published at Lyons in 1528, Arabic numerals are placed in the margin, opposite the verses.

EARLY TRANSLATIONS.

B.C.
277 (about). The Septuagint. The Old Testament translated into Greek.

A. D.

130. Old Syriac version.
 128. Aquila, a Jewish proselyte, translates the Old Testament into Greek.
 176. Theodotion translates the Old Testament.
 205. Symma hus, by order of Septimus Severus, translates the Old Testament into Greek.
 200-300. Coptic Translation.
 300-400. Ethiopic version.
 360. Gothic version, by Uphilas.
 405. Jerome completes the Latin Vulgate, commenced about 385.
 410. Armenian version.
 709. Saxon translation of the Psalms.
 721. Saxon translation of the Gospels.
 725. Bede's Saxon translation of the whole Bible completed.
 864. Slavonian translation.
 1160. French translation of the whole Bible, by Peter de Vaux.
 1290. English translation.
 1380. Wycliffe's English version.

BIBLE SOCIETIES.—Many societies have been formed for the dissemination of the Scriptures. The following are the principal associations of the kind, with the date of the institution.

A. D.

1649. New England re-incorporated in 1661.
 1662. Society for the Propagation of the Gospel in Wales.
 1698. Promoting Christian Knowledge.
 1701. Propagation of Gospel in Foreign Parts.
 1709. Promoting Christian Knowledge in Scotland.
 1712. Society at Halle.
 1750. Promoting Christian Knowledge among the Poor.
 1780. Naval and Military Bible Society.
 1785. Support and Encouragement of Sunday Schools.
 1792. French Bible Society.
 1803. Society for promoting a more Extensive Circulation of the Scriptures, both at home and abroad.
 1804. British and Foreign Bible Society; being the Society of 1803 remodelled. German Bible Society. New York Society.
 1805. Berlin Society, changed to Prussian Bible Society in 1814.
 1808. Philadelphia Bible Society.
 1813. Russian Bible Society. Suspended in 1826.
 1817. American Bible Society.

Some of these societies have a large number of branch establishments. Pius VII. issued a bull, dated at Rome, June 29, 1816, against bible societies, denouncing the movement as a crafty device, by which the very foundations of religion are undermined.

BICOCCA (Battle).—Prospero Colonna, at the head of the Imperialists, repulsed the French and Swiss at this place, April 22, 1522. The latter were compelled to retire from Italy, where Francis I. had nothing left but the castles of Milan and Cremona, both of which were closely besieged.

BIDASOA, or VIDASOA (Spain).—Wellington effected a passage of this river in Spain, defeating the French army under Soult, Oct. 7, 1813.

BIDDENDEN MAIDS.—On the afternoon of Easter Sunday, 600 rolls are distributed to strangers, and 270 loaves, weighing 3½ lb. each, with cheese in proportion, to the poor of the parish of Biddenden, in Kent, the expense being defrayed from the rental of twenty acres of land, called Bread-and-Cheese Land, said to have been left for this purpose by the Biddenden Maids. The donors are represented as two sisters, named Elizabeth

and Mary Chulhurst, who were born joined together by the hips and shoulders, at Biddenden, in 1100. They lived together in this state for thirty-four years, when one of them died, and the other, refusing to be separated from the body of her sister, succumbed a few hours after. An impression of the Biddenden Maids is stamped upon the rolls. Halstead, in his "History of Kent," rejects this story, saying that the lands were left by two maiden ladies of the name of Preston, and that the impression on the cakes is intended to represent two widows, as general objects of charity. W. Horner, rector of the parish, brought an action to obtain the lands as part of his glebe, but he was nonsuited.

BILBAO (Spain).—This city, founded in 1300, quickly rose into importance. It was taken by the French in July, 1795, but restored by the treaty of Basel, July 22 in that year. The Spaniards expelled the French, who had again seized it, in September, 1808, but Napoleon recovered it in the same year. It surrendered to Wellington after his victory at Vittoria, June 21, 1813. The Carlists besieged it during the civil war. It was relieved by Espartero and the British Legion, Dec. 24, 1836.

BILLIARDS.—This game is said to have been invented by the French, though by some authorities the invention is ascribed to the Italians. It was introduced into England, and became a favourite diversion in the 16th century. Evelyn speaks of a new sort of billiards, with more hazards than ours usually have.

BILLINGSGATE.—Geoffrey of Monmouth (b. iii. c. 10) relates that amongst other works erected by Belin, was a wonderful gate in Trinovantum, upon the bank of the Thames, which is to this day called after him, Billingsgate; and that above it he erected an immense tower, and beneath a haven for ships. This somewhat strange and legendary story is the only account given of its origin. Toll was paid here in 1016, as appears from Ethelred's laws; and in the time of Edward III. the charge on every large vessel was twopence, for a smaller one a penny, and for a boat one halfpenny for standage. Billingsgate was made a free market to all persons from May 10, 1699, by 10 & 11 Will. III. c. 14. Abuses having arisen, an order was issued in 1707, enforcing certain payments. The hours of the market were fixed, and a bell ordered to be rung by a proper officer by 9 Anne, c. 26, s. 5 (1710). Billingsgate was destroyed by fire Jan. 13, 1715, when fifty lives were lost; it was, however, rebuilt. An entirely new market was constructed, with superior accommodation, in 1852.

BILL OF RIGHTS.—The petition of right, drawn up by parliament in 1628, and agreed to reluctantly by Charles I., June 7, 1628, was converted into a statute (3 Chas. I. c. 1), and called the Bill of Rights. The term is, however, generally used to describe the statute passed after much discussion (1 Will. & Mary,

sess. 2, c. 2), in November, 1689. It embodied the declaration of rights presented to William and Mary when the tender of the throne was made to them, Feb. 13, 1689, which defined and vindicated the rights and liberties of the subject, at the same time that it settled the succession to the throne.

BILLS OF EXCHANGE.—The origin of bills of exchange has not been clearly traced, though it is certain that they were known in Europe in the 13th century. Henry III. of England and Pope Alexander IV., for the purpose of carrying out their plans in Italy, in 1254, borrowed large sums of the Italian bankers, authorizing them to draw bills for the amount on the English bishops, the latter being compelled, under threats of excommunication, to furnish the necessary funds. Beckmann quotes an ordinance issued at Barcelona, in 1394, requiring bills of exchange to be accepted within twenty-four hours of presentation, and the acceptance to be on the back of the bill. In 1404 the magistrates of Bruges applied to the magistrates of Barcelona for information as to how they were to act when bills of exchange were in certain cases dishonoured. Baldus, the jurist, quotes one dated March 9, 1328. They are mentioned in 3 Rich. II. c. 3, s. 2, 1379, and various enactments have been made for their regulation.

BILLS OF MORTALITY.—Stow, on the authority of a learned author, says they commenced in 1592, a year of great mortality; and having fallen into disuse, were revived in 1603, the first of the weekly bills being dated Oct. 29 in that year. Diseases were first noticed in them in 1629. They were published every Thursday, and delivered at the houses of the citizens for 4s. a year. They were superseded by the new machinery introduced by the Registration Act (6 & 7 Will. IV. c. 86), that became law Aug. 17, 1836. Its operations commenced March 1, 1837.

BINARY ARITHMETIC.—This kind of notation, said to have been used amongst the Chinese 4,000 years ago, was invented by Leibnitz at the end of the 17th century.

BIRKENHEAD (Cheshire).—A Benedictine priory was founded here A.D. 1150, of which the ruins still exist. Birkenhead remained an obscure village until very recently. Its population of 200 in 1821, had, in 1851, increased to nearly 25,000, and it possesses extensive docks, commenced Oct. 23, 1844.

BIRKENHEAD, steam transport, conveying troops to the seat of the Caffre war, was wrecked near the Cape of Good Hope, Feb. 26, 1852, when only 194 persons out of 630 on board at the time were saved.

BIRMINGHAM (Warwickshire).—This manufacturing town, of which the name is said to be spelt in 150 ways, one being *Bromwicham*, was founded in the Anglo-Saxon period, and was a market-town before the Norman conquest. It sided with Cromwell during the civil war, and a battle was fought near it in 1643, when Prince Rupert obtained possession of the town.

- A.D.
 1552. King Edward VI. founds the Grammar School.
 1643. Besieged, taken, and partially burnt, by Prince Rupert.
 1665. Visited by the plague.
 1764. Matthew Bolton founds the Soho manufactory.
 1767. Birmingham Canal commenced.
 1774. Watt and Boulton commence their partnership.
 1779. The General Hospital opened.
 1791. July 14. Riots, in consequence of attempts to celebrate the anniversary of the French revolution.
 1792. Aug. 24. The theatre burnt.
 1813. Government proof-house erected.
 1817. May 15. Walter-street Mills entirely consumed by fire. Damage estimated, at £200,000.
 1820. Jan. 7. The theatre again destroyed by fire.
 1831. Birmingham Political Union formed, to insure the success of the Reform Bill.
 1832. Made a borough by the Reform Bill, and returns two members to parliament.
 1833. Town-hall built.
 1834. May 10. Dissolution of the Political Union. Erection of the present Grammar School.
 1837. July. Grand Junction Railway opened between Birmingham and Liverpool.
 1838. Sept. 17. London and Birmingham Railway opened. Oct. 31. Municipal Charter granted.
 1839. July 15. Great riot by the Chartists.
 1843. Queen's College incorporated.
 1846. Queen's College authorized by royal warrant to issue certificates to candidates for degrees in London University.
 1847. Oct. Corn Exchange opened. People's Park opened, the gift of Mr. Adley. New Music Hall opened. Lord Calthorpe's Park opened.
 1858. June 15. The Queen opens Aston Hall and Park, which become the property of the people of Birmingham.
 1859. Sept. 27. Twenty persons killed by an explosion of gunpowder in a percussion-cap manufactory.

BIRTHS were first taxed in this country by 6 & 7 Will. III. c. 6, 1694. The tax was granted for five years, from May 1, 1695, and was by 8 & 9 Will. III. c. 20, s. 14, continued till Aug. 1, 1706, and every person not receiving alms was required to pay 2s. for each child. The nobility, &c., paid, in addition to the 2s., as follows:—

	Eldest son.			For each son and daughter.		
	£.	s.	d.	£.	s.	d.
Duke	30	0	0	25	0	0
Marquis	25	0	0	20	0	0
Earl	20	0	0	15	0	0
Viscount	17	10	0	13	6	0
Baron	15	0	0	12	0	0
Baronet, knight of the bath, or knight-bachelor	5	0	0	1	0	0
Serjeant-at-law, esquire or gentleman	1	0	0	1	0	0
Archbishop, bishop, dean, archdeacon, canon, prebendary, doctor of divinity, law, or physic	1	0	0	1	0	0
Every person not included in the above list, having a real estate of £50 per annum, or personal estate of £600 or upwards	0	10	0	0	10	0

BIRTHS, DEATHS, AND MARRIAGES.—A

stamp duty on the registry of births, christenings, marriages, and burials, was granted from Oct. 1, 1783, by 23 Geo. III. c. 67 (1783). The amount was threepence on each entry. The tax was extended to Dissenters from Oct. 1, 1785, by 25 Geo. III. c. 75 (1785), and both acts were repealed by 34 Geo. III. c. 11 (March 1, 1794), the duties ceasing Oct. 1, 1794.

BISHOP, or **OVERSEER**, the title given by the Greeks and Romans to certain civil officers, was adopted in the Christian Church for one of its chief authorities during the apostolical period. Bishops were at first styled apostles. By canons passed at the councils of Chalcedon (the fourth General Council), A.D. 451; of Agda, Sept. 11, 506; of Lerida, Aug. 6, 546, and at many others, ascetics, hermits, and monks were made subject to them. Bishops were appointed in England soon after the introduction of Christianity during the 1st century, the monkish account of the foundation of the see of London by Lucius, between A.D. 170 and 185, being rejected as an invention intended to convey the idea of the subjection of the ancient British church to Rome. The hierarchy became very powerful in Anglo-Saxon times. William I. changed the frank-almoign, or free alms, the spiritual tenure under which the bishops before held their lands, into the feudal or Norman tenure by barony in 1070; and in right of succession to these baronies the bishops and abbots were afterwards allowed seats in the House of Lords as lords spiritual. They were at first elected to their office. Charlemagne claimed the right of confirming each appointment, and of granting investiture of the temporalities, and this was recognized by Hadrian in 773, and the Council of Lateran. This custom prevailed in England until the year 1106, when Anselm induced Henry I. to be satisfied with homage from the bishop for his temporalities. King John conceded by charter to the cathedrals and monasteries the right of electing their bishops and abbots. This right was recognized and confirmed in Magna Charta, and by 25 Edw. III. st. 6, s. 3, in 1351. The ancient right of nomination was restored to the crown by 25 Hen. VIII. c. 20 (1534). Twelve bishops were impeached and committed to the Tower, Dec. 30, 1641, for protesting (Dec. 28) against the legality of all laws, orders, votes, resolutions, and determinations passed during their enforced absence, from the violence of the mob, by whom they were daily assaulted on their way to parliament. Bishops were excluded from parliament by 16 Chas. I. c. 27 (Feb. 1641), but the act was repealed by 13 Chas. II. st. 1, c. 2 (1662), and they have since sat in the upper house. (*See NONJURORS, and SEVEN BISHOPS, (Trial of.)*)

BISHOPRICS (England and Wales).—Many bishoprics were founded in this country during the early period of the Church. All particulars, and even, in most cases, the names of the sees, are lost. British bishops were present at the councils of Arles in 314, of Nicæa in 325, and Arminium in 360; and their

signatures are affixed to the canons passed at these synods. It is impossible to ascertain the exact date of the foundation of all the English bishoprics, and in cases in which this is not known, the earliest notice of them that occurs is given in the following list. By 10 & 11 Vict. c. 108 (July 23, 1847), which provided for the erection of the see of Manchester, it was enacted that the number of bishops having seats in the House of Lords should not be increased, and that in case of a vacancy, London, Durham, and Winchester being excepted, the junior bishop should remain without a seat. The bishop of Sodor and Man never sat in parliament, and consequently this arrangement did not affect that see.

ARCHBISHOPRICS.

Kilfenora.—Founded before 1254. United to Tuam 1661; and to Killaloe.....	1752
Killala.—Founded about 434; became Killala and Achonry 1607; and both united to Tuam.....	1834
Killaloe.—Earliest certain date 1019. Became Killaloe and Kilfenora 1752; and Killaloe, Kilfenora, Clonfert, and Kilmacduach ..	1839
Kilmacduach.—Founded about 620. United to Clonfert ..	1602
Kilmore.—Founded 1136; received Ardagh 1660; separated 1742; again received Ardagh 1839; and became Kilmore, Elphin, and Ardagh.....	1841
Leighlin.—Founded 632. United to Ferns 1600. Both annexed to Ossory ..	1835
Limerick.—Founded before 1106. Became Limerick, Ardfert, and Aghadoe ..	1667
Lismore.—Founded 631, or 636. United to Waterford.....	1363
Louth.—Founded 534. Suppressed.....	1044
Mayo.—Founded about 665. United to Tuam	1539
Meath.—Founded.....	520
Ossory.—Founded 402. Became Ossory, Ferns, and Leighlin.....	1835
Raphoe.—Earliest authentic date, 885. United to Derry ..	1834
Ross.—Founded about 570. United to Cork and Cloyne.....	1583
Waterford.—Founded 1096; united to Lismore 1363; and both annexed to Cashel ..	1834

BISHOPRICS (Scotland).—Episcopacy was abolished in Scotland in 1561, restored in 1606, again abolished in 1639, again restored in 1661, and abolished at the revolution in 1689, when the bishops were expelled. Before the Revolution there were two archbishoprics and twelve bishoprics in Scotland, the last, that of Edinburgh, having been founded by Charles I. in 1633. Though the Presbyterian church was acknowledged as the national church at the Revolution, some of the old episcopalian bishoprics have been revived. There are now seven, the last being that of Argyll and the Isles, re-established October, 1847.

ARCHBISHOPRICS.

	A.D.
Glasgow.—Founded about 560 or 583. Erected into an archbishopric.....	1488
St. Andrews.—Bishopric 800. Made an archbishopric	1470

BISHOPS (Roman Catholic).—The Church of Rome has no less than 731 archbishops and bishops on its establishment. After the Reformation, England and Wales were placed under the care of bishops *in partibus*, the first appointment having been made March 23, 1623, and afterwards of Vicars-Apostolic. By a brief dated Sept. 30, 1850, the hierarchy was restored in England, and one archbishop and twelve bishops appointed. In Ireland there are four Roman Catholic archbishops and twenty-four bishops. The Roman Catholic Church in Scotland is under the jurisdiction of three bishops *in partibus*.

BITHYNIA (Asia Minor).—The original inhabitants of this ancient province were, according to the traditional account, expelled by some Thracian tribes, of which the Bithyni were the most numerous. The Megarians formed a colony at Astacus B.C. 712, which became a flourishing city. Bithynia was incorporated with the Lydian empire by Croesus about B.C. 560. Bithynia is included in the modern Anatolia.

B.C.

541. Succumes with Lydia to the Persian yoke.
- 431 or 436. Dydalus, or Dædalus, chief of the Bithyni, seizes Astacus, and founds the kingdom of Bithynia.
409. The Bithynians deliver to Alcibiades the property of the Chalcedonians intrusted to their safe keeping.
401. The Bithynians vigorously oppose the retreat of the Ten Thousand.
333. The Bithynians de feat Calas, one of the generals of Alexander the Great.
315. Zipetes wars with Astacus and Chalcedon.
281. Lysimachus, the Thracian, sends an army to subdue Bithynia; but his troops are defeated, and his generals slain.
278. Nicomedes, king of Bithynia, invites the Gauls into Asia, and assigns Galatia as their territory.
264. Nicomedes I. founds Nicomedia.

- A.D.
228 (about). Zelas having treacherously planned the massacre of the chiefs of Galatia, is detected and slain by them.
216. Prusias I. defeats the Gauls in a great battle.
183. Hannibal, who had sought refuge with Prusias I. and assisted him in his wars with the king of Pergamus, poisons himself, to avoid betrayal into the hands of the Romans.
167. Prusias II. visits Rome, and is magnificently received.
156. War between the kings of Bithynia and Pergamus, in which the former is victorious.
88. War between Nicomedes III., of Bithynia, and Mithridates, king of Pontus, in which the latter is victorious.
74. Death of Nicomedes III., who bequeaths Bithynia to the Roman people.
- A.D.
63. The provinces of Bithynia and Pontus are united at this time.
103. Pliny becomes governor of Bithynia.
104. Pliny complains of the Christians in his province.
- 260 (about). Ravaged by the Goths.
1074. Seized by the Seljukian Turks.
1231. First settlement of the Tartars in Bithynia.
1298. The Ottomans found a new empire in Bithynia, and constitute Prusa their capital.
1339. The Emir Orchan conquers Nicomedia, and subdues the whole of Bithynia.

KINGS OF BITHYNIA.

B.C.	B.C.
— Dydalsus.	238. Prusias I.
— Botciras.	180. Prusias II.
376. Bas.	149. Nicomedes II.
326. Zipetes.	(Epiphanes).
278. Nicomedes I.	91. Nicomedes III.
250. Zielas.	(Philopator).

BITONTO (Battle).—The Imperialists were defeated at this place, in Apulia, by the Spanish troops, led by the duke of Montemar, general to Don Carlos, May 27, 1734. Don Carlos was crowned king of Naples, the German viceroy expelled, and Montemar created duke of Bitonto. The whole of Sicily was soon after subjugated.

BLACK ACT, passed in 1722 (9 Geo. I. c. 22), and so called because it was intended to put an end to the wanton destruction of deer, game, plantations, the obtaining of the same by threats, and other outrages committed by persons called blacks, having their faces blackened, and being otherwise disguised. These offences were punished as felony, the delinquents to suffer death without benefit of clergy. Offenders under this act were excepted from the general pardon granted by 20 Geo. II. c. 52 (1746). The act was to last for three years from June 1, 1723, and it was continued for five years by 12 Geo. I. c. 30 (1725), and after other renewals was made perpetual by 31 Geo. II. c. 42 (1757). It was repealed by 7 & 8 Geo. IV. c. 27, s. 1, June 21, 1827. The acts of the Scottish parliament from the reign of James I. of Scotland to the year 1556 are also denominated black acts, because they are printed in Saxon characters.

BLACK ASSIZE.—A fatal pestilence that broke out at Oxford, at the close of the assizes, July 6, 1577. It lasted until the 12th of August, and 510 persons in Oxford and its neighbourhood are said to have fallen victims

to this malady. Antony Wood attributes it to the noisome smell of the prisoners or the damp ground. Something of the same kind occurred at the Lent assizes in Cambridge, in 1521, when all "there present were sore sick, and narrowly escaped with their lives."

BLACK CAP, called the "Judgment Cap," is worn on extraordinary occasions, as forming a portion of the full dress of the judge. It is for this reason it is used when sentence of death is passed upon a prisoner. When the Lord Mayor is presented in the court of Exchequer, Nov. 9, the judges wear "the black cap" during the ceremony. Covering the head was a sign of mourning amongst the Israelites, as may be seen from 2 Sam. xv. 30, and other passages in the Old Testament; also amongst the Greeks, Romans, and other ancient nations, and even amongst the Anglo-Saxons. It is not known when the custom for a judge to put on the black cap in passing sentence of death upon a prisoner was introduced in this country.

BLACK DEATH.—This pestilence, so called from the black spots which at one of its stages appeared upon the bodies of the sufferers, desolated the world in the 14th century. It is said to have broken out in China. After having traversed Asia, it appeared in Europe in 1348, where it prevailed with more or less severity until 1351. The loss of human life was great, no less than 25,000,000 persons having perished in Europe alone. The terrors it excited gave rise to several sects, who wandered about, lashing themselves, singing penitential psalms, and declaring that the day of judgment was at hand. In some places the calamity was attributed to the Jews, who were, in consequence, persecuted with great severity. Our historians dwell upon the great ravages it committed in London. It returned at a later period, but its visitations were less fatal in their character.

BLACK FRIARS.—This name was given, on account of their black habit, to the Dominicans, who came into England in 1221. (*See DOMINICANS.*)

BLACKFRIARS BRIDGE.—The first pile was driven January 7, and the foundation stone of this edifice was laid Oct. 31, 1760. The temporary bridge was opened for foot-passengers Nov. 19, 1766; for horses, in 1768; and for carriages, Nov. 19, 1769; the edifice having been completed in 1770. Toll, to the amount of one halfpenny per foot-passenger, was at first levied; but this was abolished June 22, 1785. The bridge has nine arches, the width of the central one being 100 feet, and the length of the whole structure 995, and the width 42 feet. It was repaired in 1840, when the carriage-way was closed until October in the following year. It was at first called Pitt's Bridge, in honour of the great earl of Chatham.

BLACKFRIARS THEATRE was built in 1576, and rebuilt in 1596. The edifice was pulled down, and tenements erected on its site, Aug. 6, 1655. In the reign of Charles I. the Blackfriars theatre was the first in London.

BLACKHEATH (Kent).—This common, about five miles S.E. from London, has been the scene of many important events. The Danes were defeated here in 1011. Wat Tyler and his followers assembled here June 12, 1381, marching upon London the following day. Here, Nov. 23, 1416, the citizens of London welcomed Henry V., after the victory at Agincourt. Jack Cade encamped on the heath June 1, 1450, and after having defeated the king's army at Sevenoaks, entered London, July 1. The people of Cornwall resisted the payment of a subsidy granted to Henry VII., for the prosecution of a war against Scotland, by a parliament held at Westminster, Monday, Jan. 16, 1497, and under the leadership of Lord Audley, Michael Joseph, a blacksmith, and Thomas Flammock, a lawyer, advanced towards London, and were defeated at Blackheath, June 22, 1497. Their leaders were taken and executed. Charles II., at the Restoration, was met here by the army, May 29, 1660, and made his triumphal entry into the metropolis. It was a resort of highwaymen during the 18th century.

BLACK-HOLE.—Dowlah, viceroy of Bengal, captured Calcutta June 20, 1756, when he ordered Mr. Holwell, its valiant defender, and 145 of his fellow-countrymen, to be imprisoned in the common dungeon of Fort William, usually called the Black-hole. The dungeon was only 18 feet square; but little air was admitted; and the consequence was, that when the door was opened, only 23 of the 146 incarcerated the night before were found alive. Clive exacted signal vengeance for this act of barbarity. He took Calcutta Jan. 2, 1757; won the battle of Plassey June 23 in the same year; and the perfidious Dowlah was slain by one of his own officers on the 25th of the same month.

BLACK-MAIL.—This tax, in kind or money, was levied by the borderers of England and Scotland, under the pretence of affording protection from robbers, with whom those demanding the tribute were generally allied. By 43 Eliz. c. 13 (1601), all persons in the counties of Northumberland, Westmoreland, Cumberland, and the bishopric of Durham, receiving or carrying black-mail, or giving it for protection, were to suffer death as felons, without benefit of clergy, and to forfeit all their goods. These illegal exactions were carried to such an extent, that they became the subject of legislation just before the Union. The practice was, in spite of every effort for its suppression, continued in Scotland until the rebellion of 1745.

BLACK MONDAY.—Easter Monday, April 6, 1360, was thus named from the severity of the weather on that day. Stow, under the year 1360, says, "And here is to be noted that the 14th day of April, and the morrow after Easter-day, King Edward, with his host, lay before the city of Paris, which day was full dark of mist and hail, and so bitter cold, that many men died on their horse-backs with the cold; wherefore unto this day it hath been called the Black Monday."

Easter Monday in that year fell on the 6th of April. Launcelot, in the "Merchant of Venice," remarks, "Then it was not for nothing that my nose fell a bleeding on Black Monday last." By school-boys, the first Monday after the holidays—the day on which work usually commences—is also called Black Monday.

BLACK MONEY.—Base coin, brought into England from foreign countries, was thus denominated. The importation of black money was prohibited by 9 Edw. III. c. 2 (1335); and 9 Edw. III. c. 4 (1335), declared that it should not be current in this realm. The term was also applied to jettons and counters.

BLACK MONKS.—The Benedictines, from the colour of their outward garments, were usually called black monks. (See BENE-DICTINES.)

BLACKROCK (Battle).—At this place, near Buffalo, the American army, amounting to nearly 2,500 men, were defeated by a British force consisting of 1,400 regulars and militia, Dec. 30, 1813. The Americans attempted to make a stand at Buffalo, but speedily gave way; whereupon the village of Blackrock and the town of Buffalo, with all stores, &c., were destroyed. This was done in retaliation for the acts of plunder and devastation committed by the Americans during their invasion of Upper Canada.

BLACK ROD.—The gentleman-usher of the black rod was appointed by letters patent from the crown, at the institution of the order of the Garter, of which he is an officer, in 1350. He, or his deputy, the yeoman-usher, is sent to desire the attendance of the Commons in the House of Lords when the royal assent is given to bills, and on other occasions.

BLACK SEA (Expedition).—The allied English and French squadrons entered the Black Sea, Jan. 4, 1854. Odessa was bombarded April 22, and the British war steamer *Tiger* was lost off that port May 12. The landing of the allied armament was effected at Old Fort, Sept. 14—18, Balaklava entered Sept. 26, and Sebastopol bombarded Oct. 17. A terrible gale occurred Nov. 11, and the hurricane in which so many British and French ships were lost, Nov. 14. The expedition to Kertch sailed May 23, 1855, and after having captured several places and destroyed warlike stores, returned to Balaklava June 14. The expedition to the Bug and the Dnieper anchored off Odessa Oct. 8, was detained by fogs and contrary winds till the 14th, captured Kinburn on the 16th, and returned to Balaklava in November. On the signature of the treaty of peace in 1856, the English and French squadrons were gradually withdrawn, and the Black Sea was thrown open to the commerce of all nations.

BLACKWATER (Battle), took place during Tyrone's rebellion, between the English forces led by Sir Henry Bagnal, and the rebels, Aug. 14, 1598. The former were defeated, and the result of the disaster was a general rising of the Irish in Ulster.

BLADENSBURG (Battle).—An English army defeated the Americans on the heights of Bladensburg, Aug. 24, 1814. The American force consisted of between 7,000 and 8,000 infantry, with 3,000 cavalry, in a strong position, supported by a powerful artillery; whilst the British could scarcely muster 5,000 men, and only 1,500 were actually engaged. The defeated army retreated through Washington, of which the victors took possession.

BLANKETEERS.—Rioters, who assembled from all parts of Lancashire at St. Peter's church, Manchester, on Monday, March 10, 1817, for the purpose of carrying a petition for reform to London, in order to present it to the prince regent. They brought with them a blanket, amongst other necessities for the journey, and on this account received the name of blanketeers. The authorities, by adopting proper precautions, and suspending the Habeas Corpus act, were enabled to suppress the movement before mischief had been done.

BLANK VERSE was, according to Hallam, first used in English poetry by Henry Howard, earl of Surrey, who was executed Jan. 21, 1547. His chief production in this measure is a translation of the second book of the *Æneid*, published in 1557. Blank verse was much improved by Marlowe. Some authors give Chaucer the merit of having first employed it.

BLASPHEMY was severely punished, both in ancient and modern times. The penalty by the law of Moses was death, and the same was awarded by the civil code of Justinian. The ecclesiastical codes were very severe upon persons guilty of any form of the offence. The Long Parliament passed a law (May 2, 1648) visiting it in some cases with capital punishment without benefit of clergy. By 3 James I. c. 21 (1605), any person or persons in any stage play, interlude, show, May-game, or pageant, jestingly or profanely speaking or using the name of either person of the Trinity, were fined £10 for every offence. The act for more effectually suppressing blasphemy or profaneness (9 & 10 Will. III. c. 32), 1698, punished these offences with general disqualification and imprisonment for three years. By 53 Geo. III. c. 160, s. 2 (July 21, 1813), Unitarians are relieved from its operation. The law respecting blasphemy is regulated by 60 Geo. III. c. 8, passed Dec. 30, 1819.

BLENHEIM, or BLINDHEIM (Battle).—The allied army, under Marlborough and Eugene, defeated the French and Bavarians at this place, Aug. 13 (O. S. 2), 1704. The forces of the former consisted of 52,000 men and 52 pieces of cannon; those of the latter of 57,000 men, advantageously posted and defended by a powerful artillery. The battle commenced at eight in the morning, and by nine in the evening the triumph of the allies was complete. Their loss was 4,500 killed and 7,500 wounded; that of the French and Bavarians, 12,000 killed and 13,000 prisoners; whilst several thousands perished in the Danube. The victors took 100 pieces of

cannon, 24 mortars, 129 colours, and 171 standards. This was Marlborough's greatest achievement, and on the evening of the battle he wrote in pencil, on a slip of paper torn from his memorandum-book, the following letter, still preserved in the family archives, to the duchess:—

"I have not time to say more, but to beg you will give my duty to the Queen, and let her know her army has had a glorious victory. Monsieur Tallard and two other generals are in my coach, and I am following the rest. The bearer, my aide-de-camp, Colonel Parke, will give her an account of what has passed: I shall do it in a day or two, by another more at large. "MARLBOROUGH."

This distinguished general received as a national gift, the manor and honour of Woodstock, and the hundred of Wootton, where the palace of Blenheim was erected for him. The trophies of the victory were removed from the Tower to Westminster Hall, Jan. 3, 1705, amid the thunders of artillery and popular demonstrations.

BLIND.—Louis IX. founded the hospital of the Quinze Vingts at Paris, in 1260, for the reception of soldiers who had lost their sight in the Crusades. Simpson's hospital for the blind at Dublin was founded in 1781. The first school for the blind was opened by Valentine Haüy at Paris, in 1784. Institutions for the blind were established at Liverpool in 1791, at Edinburgh in 1792, at Bristol in 1793; the school for the indigent blind in London in 1799, at Norwich in 1805; the Richmond Institution in Dublin in 1809, the Molineux in Dublin in 1815, at Glasgow in 1828, at Limerick in 1835, at York in 1837, at Manchester in 1838, at Newcastle in 1838, and at Exeter in 1839. The number of these excellent institutions increases rapidly. Printing for the blind was introduced in 1827, and the methods of conveying instruction have been greatly improved.

BLINDING.—Ducange, under the term *Abacinaire*, enumerates the various methods by which this barbarous punishment of depriving persons of sight was inflicted. Burning with hot irons was the most common. Shakespeare, in the case of Gloucester (King Lear, act iii. sc. 7), and in the scene between Arthur and Hubert in King John (act iv. sc. 1), gives a vivid description of its horrors. Michael Palæologus blinded the young emperor John Lascaris, in order to render his own usurpation secure (Dec. 25, 1261). Gibbon (ch. lxii.) remarks: "The loss of sight incapacitated the young prince for the active business of the world: instead of the brutal violence of tearing out his eyes, the visual nerve was destroyed by the intense glare of a red-hot basin, and John Lascaris was removed to a distant castle, where he spent many years in privacy and oblivion." This mode of torture was a fearful weapon in the hands of oppressors and tyrants in ancient times, as well as during the Middle Ages.

BLOIS (Treaties).—A secret treaty was concluded here between Louis XII. and the

archduke Philip, in September, 1504, by which the former ceded to Prince Charles (afterwards the emperor Charles V.) Brittany, part of Burgundy, and certain places in Italy, as the dowry of his daughter, the princess Claude: the marriage never took place. Another alliance, between Louis XII. and the Venetians, was concluded here March 14, 1513, and a league between England and France, negotiated at Paris, was signed at Blois, April 11, 1572. The latter was an offensive and defensive alliance, intended to lull the suspicions of the French Protestants.

BLOOD.—During the early and Middle Ages, human blood was regarded as a medicine of great efficacy, and blood-baths, in which the patients sat, were used in cases of leprosy. Louis XI. of France, after having tried a number of remedies, is said by the historian Gaguin to have hoped to recover by the blood of certain children, which he swallowed. The Harveian theory of the circulation of the blood was confirmed by the experiment of transfusing blood, tried upon dogs in 1657. Various attempts were made in France in the 18th century to renovate old and broken constitutions by means of some system of transfusion of blood.

BLOOD (Circulation of).—The discovery of the general circulation of the blood has been attributed to several individuals. Hallam, who substantiates the claim of William Harvey, after reviewing the controversy, remarks: "It is thus manifest that several anatomists of the 16th century were on the verge of completely detecting the law by which the motion of the blood is governed; and the language of one (Cæsalpin) is so strong, that we must have recourse, in order to exclude his claim, to the irresistible fact that he did not confirm by proof his own theory, nor proclaim it in such a manner as to attract the attention of the world." Servetus (1543-1553) was acquainted with the pulmonary circulation, Columbus (1559) possessed the same knowledge, and Cæsalpin, about 1583, had a more just notion than any of his predecessors of the general circulation of the blood, discovered in 1619, by William Harvey, who fully demonstrated its truth in 1623. Asellius, in 1622, discovered the lacteal vessels. The common origin of the lacteal and lymphatic vessels was discovered by Pecquet in 1647, and made public in 1651.

BLOOD OF OUR SAVIOUR.—This order of knighthood was instituted at Mantua by the duke Vincentio di Gonzaga, on the marriage of his son with Margaret of Savoy, in 1608.

BLOODY ASSIZES.—After the suppression of Monmouth's rebellion, a special commission, dated Aug. 24, 1685, for the trial of offenders, was directed to Jefferies and four other judges. They set out for the west of England under a military escort, commanded by Jefferies, with the rank of lieutenant-general, and at Dorchester, Exeter, Taunton, and Wells, condemned above 300 persons to death, almost without trial. Nearly 1,000 were sold as slaves to the West-Indian

plantations, and others were whipped, fined, and imprisoned. James II. termed the expedition Jefferies' Campaign, rewarding him with the lord-chancellorship Sept. 28. This is generally known as the Bloody Assizes.

BLOOMER COSTUME.—Holinshed, in his description of England in the 16th century, says, "I have met with some of these trulles in London, so disguised that it hath passed my skills to discern whether they were men or women." These were doubtless the first wearers of what is called the Bloomer costume, being a dress for females, attempted in America in 1848, and introduced into England in 1851, where, though recommended by lecturers, it fell into contempt, and speedily disappeared.

BLOOMSBURY GANG, a clique of politicians, who, towards the close of the 18th century, exercised an undue influence over the councils of George III. They were so called from the fact that their meetings often took place at Bloomsbury House, the residence of their leader, John, fourth duke of Bedford. To such an extent was their tyranny carried, that the sovereign was frequently compelled, though reluctantly, to submit to their demands. The marquis of Bath, and Lords Sandwich and Weymouth, were members of this political knot. The marquis of Stafford, who died Oct. 26, 1803, was the last survivor of the Bloomsbury Gang.

BLORE-HEATH (Battle).—Fought during the wars of the Roses, Sunday, Sept. 23, 1459, when the Yorkists, commanded by the earl of Salisbury, defeated a superior force of the Lancastrians, led by Lord Audley. Henry VI. and Queen Margaret were in the neighbourhood at the time of the encounter.

BLOTTING-PAPER.—Though no account of its first use is known to exist, it was probably introduced soon after the invention of paper. Fuller (circ. 1655) says, "Paper participates in some sort of the characters of the country which makes it; the Venetian being neat, subtle, and courtlike; the French light, slight, and slender; the Dutch thick, corpulent, and gross, sucking up the ink with the sponginess thereof." Blotting-paper is included amongst the items, in an account of stationery supplied to the Exchequer and the Treasury 1666-1668.

BLOWPIPE.—The date of its invention has not been ascertained. It was first employed in the analysis of metals by Swab, in 1738, and its use in the science of mineralogy was demonstrated by Cronstedt in 1758. It has been improved by various men of science since his time.

BLUE COAT.—Blue was the colour in which the Gauls and ancient nations clothed their slaves; and a blue coat with a badge was, in the time of Shakespeare, the livery worn by servants of the nobility. A serving-man in one of Ben Jonson's dramas remarks, "Ever since I was of the blue order." Blue was also the colour worn by beadles; hence blue-bottle became a term of reproach for both. Doll Tear-sheet (Henry IV., pt. ii. act v. sc. 4) says to the beadle who is dragging her

to prison, "I will have you as soundly swung for this, you blue-bottle rogue!" Blue was also worn by apprentices, and even younger brothers; and a blue gown was the dress of ignominy for a harlot in the house of correction.

BLUE-STOCKING CLUBS.—Boswell, in his "Life of Johnson," thus describes their origin:—"About this time (1781) it was much the fashion for several ladies to have evening assemblies, where the fair sex might participate in conversation with literary and ingenious men, animated by a desire to please. These societies were denominated *Blue-Stocking Clubs*; the origin of which title being little known, it may be worth while to relate it. One of the most eminent members of those societies, when they first commenced, was Mr. Stillingfleet, whose dress was remarkably grave, and in particular it was observed that he wore blue stockings. Such was the excellence of his conversation, that his absence was felt as so great a loss, that it used to be said 'We can do nothing without the *blue stockings*;' and thus by degrees the title was established."

BOARD OF CONTROL was established by Pitt's East-India Bill, 24 Geo. III., sess. 2, c. 25 (May 18, 1784). Six privy councillors were appointed as commissioners to have control and superintendence of all the affairs of the British possessions in the East Indies. The act was amended by 33 Geo. III. c. 52 (June 11, 1793), and subsequent acts. The first president was Lord Sydney, appointed Sept. 3, 1784. The Board of Control was abolished by 21 & 22 Vict. c. 106 (Aug. 2, 1858), when a council of India, consisting of fifteen members and a secretary of state for India, was appointed.

BOARD OF GREEN CLOTH, or COURT OF MARSHALSEA, was a court of justice, noticed as early as the time of Henry III., having exclusive jurisdiction in the king's palace and within the verge, described by 13 Rich. II. st. 1, c. 3 (1390), not to exceed twelve miles of the king's lodging. Its power, confirmed by several statutes, was derived from the common law. The statute 28 Edw. I. st. 3, c. 3 (1300), determined what pleas should be held in the court of Verge; that of 2 Hen. IV. c. 23 (1400), laid down regulations respecting fees. Its powers were extended to treasons, misprisions of treasons, murders, manslaughterers, bloodsheds, &c., by 33 Hen. VIII. c. 12 (1542). This court was abolished by 9 Geo. IV. c. 31 (June 27, 1828).

BOARD OF HEALTH.—The general Board of Health was established by 11 & 12 Vict. c. 63 (Aug. 31, 1848), for sanitary purposes, with the power of creating local boards in provincial towns. It was reconstructed by 17 & 18 Vict. c. 95 (Aug. 10, 1854), entitled "An Act to make better provision for the administration of the laws relating to public health." Sir B. Hall was made president, with a salary of £2,000 per annum. By 21 & 22 Vict. c. 97 (Aug. 2, 1858), all the powers of the General Board of Health were given to the privy council. Further provision for

the local government of towns and populous districts in this matter was made by 21 & 22 Vict. c. 98 (Aug. 2, 1858).

BOARD OF TRADE AND PLANTATIONS.—Cromwell in 1655 appointed his son Richard, with several lords of the council, merchants, &c., to consider by what means trade and navigation might be best promoted and regulated. Charles II. established a council to superintend and control the whole commerce of the nation, Nov. 7, 1660, and a council of Foreign Plantations, Dec. 1 in the same year. The boards were united in 1672, undergoing many changes until 1782, when, by 22 Geo. III. c. 82, the board was abolished. A committee of members of the privy council was ordered to be appointed for the consideration of all matters relating to trade and foreign plantations. The order of council, issued March 5, 1784, was revoked, and a new committee, appointing the board as at present constituted, was nominated Sept. 5, 1786, Lord Hawkesbury being the first president.

BOBER (Battle).—Blucher was driven from his position on this river, in Silesia, by the French army, commanded by Napoleon I., Aug. 21, 1813.

BOCCA TIGRIS, or THE BOGUE FORTS, at the entrance of the Canton river, having been attacked, two were taken by the English, Jan. 7, 1841. The Chinese having failed to carry out the provisions of a treaty by which a cessation of hostilities had been secured, the rest of the forts were captured Feb. 26 in the same year.

BODLEIAN LIBRARY (Oxford).—Humphrey, the good duke of Gloucester, founded a library at Oxford; but it was destroyed, and in 1555 the desks and benches were ordered to be sold. The room remained empty until repaired and again devoted to the purposes of a library by Thomas Bodley, an eminent diplomatist, who had been sent on several embassies by Queen Elizabeth. On retiring from his employments in 1597, he undertook to restore this library. He endowed it richly, and presented it with a collection of books worth £10,000. It was opened Nov. 8, 1602, and alterations in the building were completed in 1606. The foundation-stone of a new library was, however, laid by Sir Thomas Bodley himself, July 17, 1610. It was not completed until 1613, the year after his death. It has since received many valuable additions, and contains upwards of 256,000 volumes of printed books and 22,000 volumes of manuscripts. Several catalogues have been published, the first by Dr. James, in 1605. Casaubon calls the Bodleian library a work rather for a king than a private man.

BÆOTIA.—The early history of this political division of ancient Greece, included in the modern kingdom, is involved in obscurity. Thucydides represents it as having been inhabited by various barbarous tribes until about sixty years after the Trojan war, when the Bæotians, an Æolian people, expelled from their native seat by the Thessalians, settled in the country, at that time called Cadmeis,

to which they gave the name of Bœotia, B.C. 1124. According to traditional accounts, Ogyges was king of Bœotia B.C. 1796, and Cadmus is said to have founded Thebes in B.C. 1550, or, according to other authorities, B.C. 1493. There is, however, little, if any, authentic information respecting the early period. The cities of Bœotia, with Thebes at their head, entered into a league, though the date of its formation is not known. The number is generally supposed to have been ten, or at the outside fourteen.

B.C.

- 603. War in Bœotia between the Mityleneans and the Athenians.
- 519. Platæa withdraws from the Bœotian League.
- 507. The League joins the Peloponnesians and the Chalcidians against Athens.
- 480. The Bœotians join the Persians.
- 456. The Athenians reduce all Bœotia to subjection by the victory of (E)nochyta.
- 447. The Bœotians defeat the Athenians at Coronea, and regain their independence.
- 395. The Bœotians take part against Sparta in the Corinthian war. Their country is invaded.
- 394. The Spartans defeat the Bœotians, &c. at Coronea.
- 387. Peace of Antalcidas.
- 386. Bœotia regains Platæa.
- 379. Pelopidas seizes the Cadmea at Thebes, and this causes war.
- 378. Agesilaus and Cleombrotus invade Bœotia.
- 377. Agesilaus invades Bœotia a second time.
- 371. The Spartans invade Bœotia, and are defeated at Leuctra.

From this time the history of Bœotia is merged in that of Thebes. The Bœotian confederacy, that had long had only a nominal existence, was entirely dissolved by the Romans B.C. 172.

BOGESUND (Battle), between Sten Sture the younger, protector of Sweden, and Christian II., king of Denmark, in which the latter was victorious, was fought in 1520.

BOGOMILES, or BOGARMITÆ.—A sect of heretics that sprung up in Bulgaria early in the 12th century. The name is compounded of two Slavonic words,—*bog*, 'God,' and *milouti*, 'have mercy on us,' given to them from their custom of muttering prayers to themselves. They are said to have been Manichæans. They rejected images, discarded all mysteries in the sacraments and the historical books of the Old Testament. Their leader, one Basil, a monk, having been condemned by a council held at Constantinople in 1110, was afterwards burned alive by order of the Greek emperor Alexius Comnenus.

BOHEMIA (Germany) derives its name from the Boii, its ancient inhabitants, who were expelled by the Slavonians. Charlemagne conquered the country A.D. 805, and annexed it to his empire. After various vicissitudes, its independence was restored by Borzivoi, who became its first duke in 891. The dukes were frequently nominated by the emperor of Germany, and two of them, Wratisslaus II. in 1086, and Ladisslaus III. in 1158, received the title of king as a mark of personal honour, before Bohemia was definitively erected into a kingdom.

A.D.

- 480 (about). The Czechs establish themselves in Bohemia.
- 630. Samo raises Bohemia into an independent state.
- 680. About this time the first advance in civilized arts is made by the Bohemians.
- 722. Libussa, granddaughter of Samo, weds Premislaus, who founds the dynasty which bears his name.
- 805. Conquered by Charlemagne.
- 864. Borzivoi, a Bohemian chief, receives the sacrament of baptism.
- 967. Boleslaus II. founds the bishopric of Prague.
- 1004. Mescho, king of Poland, lays siege to Prague, which is delivered by Jaromir.
- 1039. War between Bretislaus I. and the emperor Conrad, in which the former is defeated.
- 1061. On the death of Spitzigneus I., Wratisslaus II. unites Bohemia, Poland, Silesia, Lusatia, and Moravia into one kingdom.
- 1174. Ladisslaus II., king of Bohemia, is banished by his subjects, and takes refuge in Lusatia, where he dies.
- 1176. A large number of the Vaudois immigrate into Bohemia.
- 1191. Conrad II. dies of the plague at the siege of Naples, and leaves the succession to his dukedom much disputed.
- 1198. Premislaus Ottocar I., who succeeded to the dukedom the year before, is made the first king of Bohemia whose title is hereditary.
- 1241-2. The Tartars overrun Moravia.
- 1253. Premislaus Ottocar II. is king of Bohemia and its dependencies, and of Austria, and soon obtains possession of Styria, Carinthia, and Istria, when his dominions extend from the Baltic to the Adriatic.
- 1272. Premislaus refuses the imperial crown.
- 1278. Battle of Marchfield, and death of Premislaus Ottocar II. Rodolph of Habsburg gains Austria, Styria, Carinthia, and Carniola.
- 1289. Marriage of Wenceslaus IV. to Judith, daughter of Rodolph of Habsburg. Part of Misnia and Eger added to Bohemia.
- 1300. Wenceslaus IV. is elected king of Poland.
- 1306. Death of Wenceslaus V., the last sovereign of the house of Premislaus.
- 1310. John of Luxemburg succeeds to the throne of Bohemia.
- 1319. Lusatia reunited to Bohemia.
- 1327. Silesia reunited to Bohemia.
- 1348. The University of Prague founded by Charles I.
- 1408. John Huss, rector of the University of Prague, declares himself a disciple of Wycliffe.
- 1416. The Hussites, indignant at the martyrdom of their leader, take up arms to defend liberty of conscience. They form two sects, known as the Calixtins and the Taborites.
- 1419. Ziska, leader of the Hussites, takes Prague.
- 1438. Death of Sigismund, and extinction of the house of Luxemburg. The Hussites invite Cassimir, prince of Poland, to succeed him, but the crown falls to the lot of Albert of Austria.
- 1466. Pope Paul II. excommunicates George Podiebrad, the Hussite king of Bohemia, and sends an army against him, which is defeated at Tina.
- 1483. Seditious and massacres at Prague.
- 1526. On the death of Louis I., the Bohemians confer the crown on Ferdinand I. of Austria, in whose family it has ever since remained.
- 1567. Maximilian II. abolishes the religious compacts which had restrained the spread of Protestantism.
- 1609. Rodolph II. establishes freedom of conscience in Bohemia.
- 1618. The Bohemian Protestants take up arms under Count Von Thurn, and commence the Thirty Years' war.
- 1620. The Austrians totally defeat the Bohemians at the battle of Prague.
- 1648. The treaty of Munster puts an end to the Thirty Years' war, and to the political ex-

A.D.

istence of Bohemia, which is incorporated with the Austrian empire.

1744. Frederick the Great, of Prussia, invades Bohemia, and takes Prague.

1757. May 6. Frederick the Great gains the great battle of Prague over the Austrians.

1762. The Prussians ravage Bohemia.

1772. A terrible famine devastates Bohemia.

1775. Insurrection of the peasantry.

1781. Joseph II. abolishes slavery.

1813. The Austrian army, under Schwartzberg, assembles in Bohemia, preparatory to the campaign against Napoleon.

1848. June 12. Insurrection at Prague.

BOILING TO DEATH.—By 22 Hen. VIII. c. 9, passed in 1531, this punishment was awarded to poisoners. The act related that one Richard Roose, otherwise called Coke, a cook in the bishop of Rochester's diocese, had, by mixing poison in their food, caused the death of two and the illness of several persons. He was declared guilty of treason, and ordered to be boiled to death, without receiving benefit of clergy; and the like punishment was decreed for all, from that time, found guilty of any manner of poisoning. He suffered at Smithfield, April 5, 1532; and Margaret Dany, a maid-servant, was boiled to death at the same place, Mar. 17, 1542, for "poisoning of three households, that she had dwelt in." This act was repealed by 1 Edw. VI. c. 12, s. 11 (1547). The punishment itself was common both in England and on the continent, previous to

the enactment of the statute of Henry VIII. The Chronicle of the Grey Friars of London (Camden Society) records a case at Smithfield of a man who was fastened in a chain and pulled up and down divers times, till he was dead. It appears to have been a common punishment for coining.

BOIS-LE-DUC (Holland).—Besieged and taken by the French republican army Oct. 10, 1794. It was taken by Bulow, Jan. 25, 1814.

BOJACA (Battle).—During the war of independence in South America, the Spaniards were defeated at this place, in New Granada, by Bolivar's army, Aug. 7, 1819.

BOKHARA (Asia), the ancient Sogdiana, also called Transoxiana, though not, as has been asserted, by ancient writers, was conquered by the Saracens about 710 A.D. It was overrun by Zenghis Khan in 1222; by Timour in 1361; and by the Uzbek Tartars in 1505. Bokhara has remained under the sway of various khans of this race ever since. Colonel Stoddart and Captain Conolly, sent by the British government on a mission to the Khan in 1843, were murdered by him at Bokhara, the chief town of the khanat; and Aug. 1, 1844, intelligence was received from the enterprising traveller Dr. Wolff, who, in 1843, went to ascertain their fate, that they had been put to death in June or July of 1843. After undergoing a short imprisonment, Dr. Wolff was allowed to leave Bokhara, and he reached England in April, 1845.

BOLIVIA (South America).—The provinces of Upper Peru, which had separated from the viceroyalty of Buenos Ayres, having by the victory of Ayacucho, Dec. 9, 1824, secured their independence, were formed into a republic in 1825. The deputies met in August of that year, and decided in favour of separation, and upon calling the new state Bolivia, in honour of its liberator, Bolivar. This assembly separated Oct. 6, 1825, and a new congress met May 25, 1826. In 1836 slavery was abolished in Bolivia. Changes in the constitution took place in 1839, 1843, and the new system was not settled until 1848. A commercial treaty was concluded with England in 1840. An attempt was made to assassinate the President Aug. 10, 1858.

BOLOGNA (Italy), the ancient Bononia, is said to have been founded by the Tuscans, and was called by them Felsina, a name used by Livy. It became a Roman colony B.C. 189. A bishop's see was founded here at a very early period, and it was raised to an archbishopric by Gregory XIII. Dec. 10, 1582. Its university, the oldest in Italy, was established in 1116; the story of its foundation about 430, and its restoration by Charlemagne, being rejected by the best authorities. The emperor Henry V. granted Bologna a charter in 1112, and it was long governed by a podestà and consuls, being at the same time a zealous partisan of the pope. John XXII. sent Bertrand de Poiet, his legate, here in 1327, and though the city received him as its lord, he was, in 1333, violently expelled. Giovanni Visconte, tem-

poral and spiritual lord of Milan, purchased Bologna in 1351, but it threw off the yoke of Milan in 1356; and, having surrendered to the pope, Milan formally resigned its claim by treaty in 1359. Anarchy prevailed for some time, during which period Bologna frequently changed masters. It was taken by the papal army, and Julius II. made his triumphal entry Nov. 11, 1506, but it fell into the hands of the French in 1511; was besieged by the papal forces early in 1512, and Gaston de Foix compelled them to retire Feb. 7, in the same year. Julius II. had seized Bologna and its territory in 1506, and it was annexed to the papal dominions by the treaty of peace between Louis XII. and Pope Leo X. in 1514. The French king dying that year, his successor, Francis I., met the pope at Bologna in 1515, and confirmed the acts of Louis XII. Napoleon I. entered the city June 19, 1776; and it was made the capital of the Cispadane republic in 1797. It was occupied by the Austrians in 1814, and was formally restored to the papal government in 1815. An insurrection occurred here Feb. 4, 1831, when a provisional government was proclaimed. The sovereignty of the pope was, however, restored by Austrian interference. It rebelled again in 1848, and surrendered to an Austrian army, after a sanguinary struggle of eight days' duration, May 16, 1849. The Austrians quitted Bologna June 12, 1859; and a national assembly, soon after convened, threw off the papal yoke Sept. 7. A deputation sent to offer the legations to Sardinia were received by the king, and their request acceded to, Sept. 24 in the same year. A council held at Bologna in 1264 excommunicated the English barons who had rebelled against Henry III.

BOMARSUND (Gulf of Bothnia).—This, the capital and principal of the Aland Isles, was captured by the French and English Aug. 14 and 15, 1854. Russia, by a convention annexed to the treaty of Paris of 1856, engaged not to restore the fortifications. (*See ALAND ISLES.*)

BOMB.—This invention is, by Strada, attributed to an inhabitant of Venlo, in 1558, in which year they were employed at the siege of Wachtendonk, in the Netherlands; whilst others, on the authority of Valturinus, contend that bombs were invented in the middle of the 15th century. The Moors are said to have used them at the siege of Baza in 1325. Conde (Arabs in Spain, iii. p. 231) speaks of "machines that cast globes of fire, with resounding thunders and lightnings, resembling those of the resistless tempest." At any rate, they did not come into general use till much later. The Turks employed them at the siege of Rhodes in 1522, the French at that of La Mothe in 1634.

BOMBAY (City), signifying 'good harbour,' was founded by the Portuguese soon after they obtained possession of the island of Bombay, in 1530. The seat of the East-India Company's government was removed here from Surat in 1686.

A.D.

- 1676. Mint established at Bombay.
- 1688. Bombay besieged by Aurungzebe, who is prevailed upon to withdraw.
- 1691. Bombay visited by the plague.
- 1702. The plague commits great ravages.
- 1718. Dec. 25. First English church opened.
- 1803. Great fire.
- 1810. The *Minden*, 70-gun ship, launched at Bombay.
- 1818. The cholera breaks out.
- 1827. Supreme Court of justice established.
- 1833. Aug. 28. Power given to the crown to establish a bishopric at Bombay.
- 1837. Elphinstone College founded. Bombay made a bishopric. Steam communication with Suez established.
- 1845. Oct. Nearly 200 houses destroyed by fire.
- 1853. Feb. First Indian railway, from Bombay to Tannah, opened.

BOMBAY (Island).—The Portuguese first arrived off the coast of this part of India in 1508, and visited the island of Bombay in 1509, at which period it formed a dependency of the Mohammedan rulers of Guzerat.

A.D.

- 1530. The island of Bombay, &c., ceded by the Mongols to the Portuguese.
- 1534. Bombay fortified by the Portuguese.
- 1612. Dec. Firman obtained for the establishment of the first English factory at Surat. Its solemn confirmation received Jan. 11, 1613.
- 1662. May 20. Bombay becomes an English possession by the marriage of Charles II. with Catherine of Braganza. The fleet arrives Sept. 18, to take possession, but the Portuguese governor refuses to give it up.
- 1664. Bombay is delivered to the English by the Portuguese.
- 1668. The island of Bombay is granted to the East-India Company, on payment of the rent of £10 in gold, on Sept. 30 in each year.
- 1674. Mutiny amongst the English troops.
- 1683. Mutiny again breaks out. Captain Keigwin issues a proclamation declaring that the island belongs to the king, Dec. 27.
- 1686. Seat of government is transferred from Surat to Bombay.
- 1687. Bombay is made a regency, with unlimited power over the Company's settlements.
- 1688. Aurungzebe invades the island. (*See INDIA.*)

BOMBAY (Presidency).—The seat of the East-India Company's government was removed from Surat to Bombay in 1686; and in 1687 Bombay was made a regency, with unlimited power over the rest of the Company's settlements. In 1773 a measure was passed by which Bombay became subordinate to Bengal from Aug. 1, 1774. By 24 Geo. III. c. 25 (Aug. 13, 1784), a governor and a council were appointed for this presidency. (*See INDIA.*)

GOVERNORS OF BOMBAY.

 1841. Sir G. W. Anderson.
 1842. Sir G. Arthur, Bart.
 1846. L. R. Reid.
 1847. G. R. Clerk.
 1848. Viscount Falkland.
 1853. Lord Elphinstone.
 1860. Sir G. Clerk, Bart.

BON-HOMMES, or GOOD MEN, an order of friars, brought into England, and established at Ashering, in Bucks, by Edmund, earl of Cornwall, in 1283. Another house of the order was founded at Edington, in Wiltshire, in 1350. The Bon-hommes followed the rule of St. Augustine, and wore a blue habit. The Paulicians called themselves Good Men, or *Los Bos Homos*.

BONN (Prussia), occupies the site of the ancient Bonna, a Roman station, the scene of the victory of the Batavi and Camminéfates over the Romans, A.D. 70. It was frequently assailed, and even captured by the German tribes; and was ravaged by them in 355. Julianus recovered it and repaired its walls about 359. In 1320 it became the residence of the archbishops of Cologne. The emperor Charles IV. was crowned here in 1346. The French, who had captured Bonn, were besieged and expelled Nov. 12, 1673; and regained possession in 1688. Frederick III., elector of Brandenburg, took Bonn in 1689; and Marlborough laid siege to it May 3, 1703, and gained possession on the 16th. The French republican army entered Bonn in 1794, its fortifications having been destroyed in 1717. Its academy, founded in 1777, was made a university in 1784. Napoleon I. suppressed it, but it was re-established on an extended scale Oct. 18, 1818. Drusus threw a bridge over the Rhine at this place B.C. 11. Bonn is an ancient bishopric.

BONONTA (Battle).—At this place, on the Danube, near Widdin, Constantine defeated the Goths and Sarmatians A.D. 322.

BOOK.—This word, derived from the Danish *bog*, the beech-tree, the inner bark of which was used in former times for writing-material, has been applied to literary productions in general, whether in manuscript or in print. The ancients wrote upon wooden blocks, waxen and other tablets, until more flexible materials were made available for the purpose; and these they formed into rolls, or volumes, as they termed them when completed; and the parchment, or whatever material it happened to be, was rolled up, and placed upon the library shelf. This form was, however, gradually abandoned during the Middle Ages, when books consisted of several leaves, joined together, and enclosed in boards or covers. The binding was often very magnificent. The boards, covered with leather or even velvet, were occasionally decorated with precious stones. Gold and silver clasps were also used. We read in Shakespeare,—

“That book in many’s eyes doth share the glory,
 That in gold clasps locks in the golden story.”

In early times almost fabulous prices were paid for books. At the Reformation the Bible and other works were chained to desks in churches, that the people might have access to them. The custom is said to have originated from an act of Convocation in 1562, ordering that Nowell’s Catechism, the Articles, and Bishop Jewell’s Apology, should be joined in one book and taught at the universities, and educational establishments, and in the cathedral churches, and private houses of the kingdom. The custom has, however, been traced as far back as to Sir Thomas Lyttleton, who, by his will, dated 1481, ordered some of his works to be chained in different churches. St. Bernard, who died in 1153, alludes, in one of his sermons, to some such custom. Dictionaries were also chained to desks in educational establishments. Walton’s Polyglott, fol., 1657, was the first book published in England by subscription; Tonson’s folio edition of “Paradise Lost,” in 1688, was the next; and Dryden’s Virgil, fol., 1697, the third. By 8 Anne, c. 19, s. 4 (1709); any bookseller or printer setting what was conceived to be too high a price upon a book, might, after March 25, 1710, on complaint being made to the archbishop of Canterbury, the lord chancellor, and some other high functionaries mentioned in the act, be compelled to charge a price fixed by any of them, upon pain of forfeiting £5 for every book sold at a higher rate. This act was repealed by 12 Geo. II. c. 36, s. 3 (1739).

BOOK CENSORS.—Many centuries before the introduction of printing, authors submitted their works to their superiors, before venturing to put them into circulation, and a regular system of censorship was established by the Inquisition. Two books printed at Cologne in 1478, were issued with the approbation of the university censor; and the “Nosce Teipsum,” printed at Heidelberg in 1480, bore the approving testimonies of four persons. A mandate of Berthold, archbishop of Mayence, dated 1486, appointing a book censor, is still in existence. Alexander VI. in 1501 issued a bull prohibiting the publication of books that had not been submitted to the censor, and the council of the Lateran in 1515 ordered that no books should be printed excepting those which had been inspected by ecclesiastical censors. By the 51st of Queen Elizabeth’s injunctions, in 1559, no person was allowed to print any book or paper without a license from the council or ordinary. The Star Chamber, June 23, 1586, published ordinances for the regulation of the press. The Long Parliament, which abolished the Star Chamber, made an ordinance, June 14, 1643, prohibiting the printing of any order or declaration of either house, without order of one or both houses; or the printing or sale of any book, pamphlet, or paper, unless the same were approved and licensed by such persons as the House should appoint. A more severe enactment followed, Sept. 28, 1647; and from that time various regulations were made on the subject till

1694, when the censorship in this country ceased, much to the displeasure of William III. and his ministers.

BOOK-KEEPING.—The system of double entry, called Italian book-keeping, had its rise amongst the mercantile cities of Italy in the 15th century. Lucas de Burgo's algebraic work, published at Venice in 1494, and Luke's work on the subject, published in 1495, are the first known to exist. The earliest English book on this subject is Hugh Oldcastle's treatise, published in 1543. James Peele is said to have published a work on book-keeping in 1569; and a new and augmented edition of Oldcastle's treatise, by John Mellis, appeared in 1588. Gotlieb published a work on book-keeping at Nuremberg in 1531.

BOOK OF SPORTS.—This title was given to a proclamation issued at Greenwich by James I., May 24, 1618, sanctioning different recreations after divine service on the Sunday. It was intended only for Lancashire. As it proved very offensive to the Puritans, no clergyman was compelled to read it. Amongst the recreations mentioned are dancing, archery, leaping, vaulting, May games, Whitsun-ales, morrice-dancers, and setting up of May-poles. The Sabbatarian controversy having been revived, Charles I. (Oct. 18, 1633) ratified and published his father's declaration. Some of the clergy refused to read it, for which one of them was deprived and excommunicated by the High Commission Court in 1637. In 1643 it was ordered by Lords and Commons that the Book of Sports should be burned by the common hangman in Cheapside, and other public places.

BOOKS (Privilege for Printing).—The oldest privilege known is that of Henry Bishop, of Bamberg, for a missal, set forth April 23, 1490. The first Venetian privilege is dated 1491, and another of 1492 is in existence. The first Milanese is dated 1495; Papal, 1505; French, 1507; and English, 1510, for "The History of King Boccus." By 1 Rich. III. c. 9 (1484), aliens were allowed to import books and manuscripts. This act was, however, repealed by 25 Hen. VIII. c. 15 (1534). In 1538, an order was issued respecting the printing of Bibles, and in 1542 the privilege was granted to one person for four years. The last patent of the kind, commencing Jan. 21, 1830, for printing the English Bible and Prayer-Book, was conferred by Geo. IV. upon Strahan, Eyre, & Spottiswoode for a term of thirty years.

BOOKS BURNED.—This mode of dealing with objectionable doctrines was practised both in ancient and modern times. Jehoiaikim burnt the roll of Jeremiah (Jer. xxxvi. 23) B.C. 605, and persons at Ephesus, who used curious arts, brought their books together and burned them before all men (Acts, xix. 19), in the year 57. The writings of Arius were condemned to be burnt during the reign of Constantine the Great. The Church of Rome has, both by the decrees of councils and of popes, caused innumerable works, and in some cases their authors, to be

committed to the flames. Wycliffe's bones as well as his writings were condemned to be burned by the council of Constance (being the seventeenth General Council), in 1415; and a convocation at Oxford in 1410 condemned and burned his works. Cardinal Wolsey went in procession to St. Paul's, May 12, 1521, for the purpose of having the works of Luther consumed. Several works were burned by order of the Parliament in the time of the Commonwealth.

BOOTAN (Hindustan).—The inhabitants of this hill country invaded Cooch Behar, a dependency of Bengal, in 1772, and having been, by the aid of the British, expelled, concluded a treaty of peace with the East-India Company in 1774.

BOOTHIA FELIX (North America), was discovered by Sir J. Ross in 1830, and named after Sir Felix Booth, who furnished a large sum of money for the purposes of the expedition.

BOOTS.—The Normans wore short boots, and in the time of William II. peak pointed boots were in fashion. In the wardrobe accounts of Edward II., the following passage occurs:—"For six pairs of boots, with tassels of silk and drops of silver gilt, price each pair 5s., bought for the king's use." Planché says that boots reaching to the middle of the thigh, and turned over with straps, like modern top-boots, were worn in the time of Richard III. Short boots were worn by ladies in the 12th century. The Hessian and Wellington boots for gentlemen, and the Balmoral for persons of both sexes, are the principal novelties of the kind introduced during the present century.

BORDEAUX (France), the ancient Burdigala, the metropolis of Aquitania Secunda, rebuilt by the Romans after a fire, A.D. 261, was taken by Adolphus, king of the Goths, in 412; recovered by Clovis in 508; devastated by the Saracens in 529; and suffered repeatedly from the ravages of the Danes. The modern town was rebuilt by the dukes of Guienne at the commencement of the 10th century. Henry II. obtained Aquitaine by marriage in 1151 with Eleanor, daughter of William V. of Aquitaine, the divorced wife of Louis VII. of France, and on his accession to the English crown, in 1154, Bordeaux and the remainder of the duchy became English possessions. In 1451 Bordeaux submitted to Charles VII., and though Earl Talbot restored the authority of the English, Oct. 23, 1452, it was besieged and taken by the French Oct. 17, 1453, and has since formed part of France. Richard II., son of the Black Prince, was born here in Feb. 1366. It was made an episcopal see A.D. 314, and became an archbishopric. Its university, founded by Eugenius IV. in 1441, received great privileges from Louis XI. in 1473. Councils were held at Bordeaux in 384, in 670, in 1080, in 1214 or 1215, and April 18, 1255. Bordeaux suffered greatly during the civil and religious wars in France.

BORGITES, or CIRCASSIANS.—The second dynasty of the Mamelukes in Egypt de-

scended from a Circassian captive named Barcook, who, in 1381, on the deposition of the last sultan of the Baharites, obtained the sovereignty. Twenty-three sultans of this dynasty, which lasted 135 years, reigned. The last was hanged at the gate of his capital, April 23, 1517, by order of Selim, and the Mamelukes were expelled and the authority of the Ottoman Turks established.

BORNEO (Indian Archipelago), called by natives *Bruné*, is, excepting Australia, the largest island in the world. It was first visited by Lorenzo de Gomez in 1518; and by Pigafetta, with Magalhaen's expedition, in 1521. In addition to the Portuguese, the Spaniards, English, French, and Dutch endeavoured to form establishments in different parts of this island.

A.D.
1598. Oliver Van Noort, the first Dutchman who visited Borneo, arrives.

1604. The Dutch begin to trade at Succadana.

1608. The Dutch at Batavia endeavour to enter into a commercial treaty with the ruler of Sambas.

1609. A treaty is concluded by the Dutch with the ruler of Sambas, and they establish a factory.

1623. The Dutch abandon their settlement at Succadana.

1769. The English take possession of Balambangan.

1772. The English endeavour to establish a factory at Passir. The attempt fails.

1775. The garrison at Balambangan are killed by pirates.

1776. The Dutch establish a factory at Pontianak.

1780. Part of the W. coast ceded to the Dutch.

1786. The Dutch, in alliance with the sultan of Pontianak, destroy Succadana.

1787. Sovereignty of the S. coast granted to the Dutch.

1812. An English expedition against Sambas fails.

1813. July 3. Sambas captured by the English.

1813. The Dutch, who had been expelled by the English during the war, return.

1839. August. Sir James Brooke arrives at Borneo.

1841. Sir James Brooke is made Rajah of Sarawak, by treaty with the native ruler. (See SARAWAK.)

1846. The Dutch colonies in Borneo formed into a special government, by decree of the Dutch governor.

1848. Labuan formed into an English colony. (See LABUAN.)

BORNOU (Central Africa), called by Heeren "a great empire," was first explored by Denham and Clapperton, sent out by the English government in 1821. It has been more recently explored by Richardson, Barth, and Overweg.

BORODINO (Battle).—During the invasion of Russia, Napoleon I. attacked the whole Russian army intrenched at this village, Sept. 7, 1812. After a sanguinary engagement, both armies encamped on the field of battle, but the Russians withdrew during the night.

BOROUGH, or **BURGH**, is supposed to have been first applied to a tithing or collection of twelve families, bound together as sureties for one another. It was afterwards applied to a castle, then to the group of houses built beneath the shelter of its defences, next to a walled town, and is now generally applied in this country to towns that possess the privi-

lege of sending representatives to the House of Commons. Guizot asserts that it was not until the 11th century that boroughs took up any important position in history.

BOROUGH-BRIDGE (Battle).—Edward II. defeated the earl of Lancaster and the confederated barons, with their Scottish allies, at this place, in Yorkshire, Tuesday, March 16, 1322. The earl of Lancaster, who fled, was afterwards taken prisoner. He was tried by a military council, and executed at Pontefract, Tuesday, March 23.

BOROUGH-ENGLISH.—A custom, so called, as some assert, because it first began in England, existing in certain boroughs, by which the youngest son inherited, to the exclusion of his elder brothers, the father's tenements in the borough, in case the latter died intestate. It is a species of burgage tenure, which at one time prevailed to a great extent in this country, and still exists in some places. The best authorities regard it as a remnant of the pastoral state of the tribes from which we claim descent. Amongst them the elder sons invariably took their portion, quitted their father's roof, and sought new habitations, whilst the younger son, who remained at home, naturally became the heir.

BORRISOW (Battle).—During the retreat of the French from Moscow, Portonneaux's division, consisting of 8,000 men, surrendered to the Russians at this place, Nov. 27, 1812, and on the following day a drawn battle was fought between the French and the Russians.

BOSNIA (European Turkey).—Part of the ancient Pannonia, long tributary to Hungary and Servia, was erected into a kingdom in 1376. Its monarch was defeated by the Turks in 1389. Bosnia became tributary to Turkey in 1463, and was annexed in 1522. Austria obtained a portion of Bosnia by the treaty of Passarowitz, July 21, 1718. This was, however, recovered by the Turks in 1738. Bosnia has been the scene of numerous insurrections; and frequent quarrels have occurred between the Christian and the Moslem population.

BOSPORUS (Asia).—This ancient kingdom on the Cimmerian Bosphorus was a great corn-growing country, and for many years served as a granary to Greece. Gibbon calls it "the little kingdom of Bosphorus, composed of degenerate Greeks and half-civilized barbarians." It is supposed to have been a Milesian colony. The history of the kingdom cannot, however, be traced with accuracy, and much uncertainty prevails respecting the dynasties compiled from the works of the ancient writers.

B.C.

480. Kingdom founded.

310. On the death of Parysades, the succession is contested by his sons Satyrus and Eumelus; Satyrus defeats his brother, but dies in the battle; so the younger brother, Prytanis, reigns in his stead.

309. Eumelus murders Prytanis and all his adherents, and succeeds to the crown.

108. Bosphorus is ceded to Mithridates the Great of Pontus.

86. Bosphorus revolts from Mithridates.

- B.C.
63. Pompey reduces Bosphorus to a Roman province, and makes Pharnaces, son of Mithridates, its king.
47. Julius Cæsar defeats Pharnaces, and gives Bosphorus to Mithridates of Pergamus, who soon afterwards dies, and his territory is seized by Asander.
14. Agrippa gives Bosphorus to Polemon, king of Pontus.
- A.D.
49. Mithridates Achemenides, king of Bosphorus, revolts against the Romans, who depose him.
258. Bosphorus captured by the Goths.
545. The Turks take the city of Bosphorus.

BOSTON (Lincolnshire), is supposed to have been built upon the site of the monastery of Icanhoe, founded by St. Bodolph A.D. 654, and destroyed by the Danes in 870. Boston became important as a commercial town in the 13th century, was made a staple for wool, &c. by 27 Edw. III. in 1357, and was incorporated on the dissolution of the monasteries, of which there were several in the town and neighbourhood, by Henry VIII. The church of St. Bodolph was founded in 1309, and its tower, 290 feet in height, forms a well-known landmark. The grammar-school was founded in 1554, the Bluecoat school in 1713, the national school in 1815, and the market-house was erected in 1819. The bridge was commenced in 1802, and completed in 1807.

BOSTON (United States).—Founded in 1630 by colonists from Charlestown. The American revolution commenced at this place, where the cargoes of tea were thrown into the sea, in December, 1773. The English forces held possession of Boston in 1775. They evacuated it by the terms of a capitulation, signed March 17, 1776. Slave riots occurred June 24, 1854; and a religious revival in 1858.

BOSWORTH FIELD (Battle).—The last battle between the houses of York and Lancaster was fought Monday, Aug. 22, 1485. Richard III., who displayed great gallantry, having been betrayed by Sir W. Stanley and

the earl of Northumberland, was defeated and slain, and the earl of Richmond proclaimed king, under the title of Henry VII. The crown worn by Richard in the battle was placed upon his head. The line of the Plantagenets terminated with Richard III., and that of the Tudors commenced with Henry VII., who sought to strengthen his title by a marriage with Elizabeth of York, daughter of Edward IV., which took place Jan. 18, 1486.

BOTANICAL GARDENS.—Sylvaticus formed a botanical garden for medicinal purposes at Salerno in 1309, and Lorenzo de' Medici established one at Marburg in 1530. The first public botanical gardens were established, one at Pisa, by the university, and another at Padua, in 1545. A professorship of botany was founded at Padua in 1533. The first botanical garden in France was established at Montpellier in 1558; and the Jardin des Plantes, at Paris, was founded in 1610. The first botanical garden in England was formed at Oxford in 1632. Botanical gardens were established at Leyden in 1577, at Jena in 1629, at Upsal in 1657, at Edinburgh in 1680, at Carlsruhe in 1715, at Kew in 1730, at Schönbrunn in 1753, at Madrid in 1755, at Cambridge in 1761, at Calcutta in 1768, at Coimbra in 1773, at St. Petersburg in 1785, at Dublin in 1790, at Ghent in 1797, at Moscow in 1802, at Liverpool in 1803, at Ceylon in 1811, at Pesth in 1812, at Chiswick in 1822, at Birmingham in 1831, and at Montreal in 1832. The garden at Chelsea was commenced in 1673, and inclosed in 1686; and the gardens in the Regent's Park were opened in 1839.

BOTANY.—Theophrastus, one of Aristotle's pupils, left the earliest existing treatise on botany, B.C. 322. The elder Pliny and Dioscorides in the 1st century of our æra wrote more fully on the subject. The Arabians began to cultivate the study of botany at the commencement of the 9th century, and Avicenna, who died in 1037, was long considered a great authority. The science was revived in the 16th century, and Otto Brunfels, of Strasburg, published his "Herbarum Vivæ Eicones," in three volumes folio, with 238 woodcuts of plants in 1530. Ruel of Soissons published his treatise "De Natura Stirpium," at Paris, in 1536, and Leonard, amongst other works, his "Commentaries on the History of Plants," at Basel, in 1542. Dr. Turner published "The New Herbal" in three parts, in 1551, 1562, and 1568 successively. Columna, in his "Ephrasis," a history of rare plants, published at Rome, in two parts, in 1606 and 1616, laid down the true basis of the science, by establishing the distinction of genera, which Gesner, Cæsalpin, and Joachim Camerarius had already conceived. Robert Morison, of Aberdeen, published works on botany, in 1669, 1672, and 1678; and although allowed to have benefited greatly from the labours of his predecessors, he is generally considered the "founder of classification." Grew, in 1671, and Malpighi first directed attention to the anatomy of plants. Rivinus, in 1690, is

said to have anticipated some portions of the system of Linnæus, who produced quite a revolution in botany by the publication, in 1735, of his "Systema Naturæ." Since that period the science of botany has rapidly advanced.

BOTANY BAY (Pacific), on the E. coast of Australia, was discovered by Captain Cook in 1770, and thus named by a naturalist in the expedition, from the number of plants growing on its shores.

BOTHWELL BRIDGE (Battle).—The Scottish Covenanters were defeated here June 22, 1679, by the duke of Monmouth.

BOTTLE CONJUROR.—An immense crowd was attracted to the Haymarket Theatre, on Monday, Jan. 16, 1749 (O.S.), an announcement having been made that a person would play on a common walking-cane the music of every instrument then in use, get into a quart bottle, and whilst there sing several songs, at the same time permitting any spectator to handle the bottle, and perform other remarkable feats. The performer did not appear, and some person behind the curtain cried out that if the audience would remain there till the next evening, instead of going into a quart he would get into a pint bottle. Only a small portion of those who had assembled could obtain admission; a riot ensued, and the interior of the theatre was destroyed. The real history of the imposture was never discovered, but is supposed to have been the result of a wager.

BOTTLES.—Vessels for containing liquids were made of leather, pottery, or metal, and, according to some authorities, of glass, by ancient nations. Glass bottles, with handles, were found in the ruins of Pompeii, which was overwhelmed August 23, A. D. 79. Beckmann says the use of bottles amongst modern nations commenced in the 15th century. Stone and earthen bottles were first subjected to duty by 6 & 7 Will. III. c. 18 (1695), and half the duties on glass wares, and the whole duty on stone and earthen bottles were repealed by 9 & 10 Will. III. c. 45 (1698).

BOUCHAIN (France).—This fortress was taken from Marshal Villars by the duke of Marlborough, after a siege of thirty-five days, Sept. 14, 1711. The French recovered possession Oct. 10, 1712.

BOULOGNE (France).—The ancient Gesoriacum, also called Bononia, is supposed to have been the port at which Claudius embarked for Britain, A. D. 42. The Roman fleet was stationed here A. D. 287. It was sacked by the Danes in 882, and was frequently assailed during the Middle Ages. Henry VIII. took it, after a siege of six weeks, Sept. 14, 1544. The French made several attempts to regain possession, and having failed, purchased it from Edward VI. for 400,000 crowns, March 24, 1549. Napoleon I. assembled his forces here for the invasion of England in 1801. Nelson attacked the flotilla Aug. 15, 1801, but without obtaining any decisive results. On the renewal of a threat of invasion in 1804, and in subsequent years, much

damage was done by our cruisers. Louis Napoleon, with forty or fifty followers, landed here early in the morning of Aug. 6, 1840, in his second attempt to raise an insurrection against the Orleans dynasty, and having failed, was taken prisoner whilst retreating to the steam-vessel which had brought him and his colleagues from England. Napoleon III. visited this town, accompanied by the king of the Belgians and his son, Sept. 3, 1854. The king of Portugal arrived Sept. 4, and Prince Albert Sept. 5. A grand mimic battle was fought on a plain between Boulogne and Calais, Sept. 8, after which Prince Albert returned to England. The seat of this ancient bishopric was removed from Térouane to Boulogne in 1553. The see was suppressed in 1801.

BOUNTÏ (Mutiny).—This ship sailed from England in 1787, on a voyage to the Society Islands, and, having taken on board a large number of bread-fruit trees for transplantation in the West Indies, quitted Otaheite, April 7, 1789. At daybreak on the 28th, Captain Bligh, the commander of the *Bounty*, was pinioned, and, with eighteen of the crew who had refused to join the mutineers, placed in the ship's boat with 140 lb. of bread, 30 lb. of meat, and a few gallons of water. They landed at Otaheite on the 30th of April, but having been driven off by the natives, made for Timor, touched at New Holland on the 5th of June, and reached Timor, where they were relieved by the Dutch, June 12, having been forty-six days in an open boat, with a scanty allowance of food. Captain Bligh reached England on the 14th of March, 1790. Fourteen of the mutineers were captured, but four perished in the wreck of the *Pandora*. Ten were brought to this country in irons, and tried by court-martial at Portsmouth, Sept. 12, 1792. The proceedings closed on the 18th, when six of them were sentenced to death, and four acquitted. (See PITCAIRN'S ISLAND.)

BOURBON (France).—Formerly the capital of the Bourbonnois, frequently called Bourbon l'Archambault, received the name of Bourges-les-Bains in 1789. Pepin took it A. D. 759, and bestowed the town and the surrounding territory upon one of his followers, from whom, through the heiress Beatrice of Burgundy, married to Robert, count of Clermont, son of Louis IX., in 1272, the Bourbon family is descended.

BOURBON (Indian Ocean).—This island was discovered in 1542, by a Portuguese mariner, after whom it was called Mascarenhas. It was then uninhabited; but the French formed a settlement in 1642, and in 1649 changed its name to Bourbon. It has since borne the following names,—Réunion, Buonaparte, and Napoleon. It was taken by the English July 8, 1810, and restored to France at the general peace in 1815.

BOURBONS.—Henry IV. of Navarre, who succeeded to the throne on the extinction of the house of Valois, July 31, 1589, was the first Bourbon sovereign of France. His

father, Antony of Bourbon, duke of Vendôme, by his marriage with Jeanne d'Albret in 1548, became king of Navarre in 1555. He was descended through the younger branch, the elder having become extinct on the death of the constable of Bourbon, May 6, 1527, from Robert of Clermont, youngest son of Louis IX. By his marriage in 1272 with Beatrice of Burgundy, Robert of Clermont obtained the Bourbonnois, the Charlerois, and the lordship of St. Just. His son, Louis I., was created duke of Bourbon by Charles IV. of France in 1327. The Bourbons reigned in France from the accession of Henry IV. July 31, 1589, till the death of Louis XVI., Jan. 21, 1793. They were restored in the person of Louis XVIII. April 10, 1814; expelled March 19, 1815, during the Hundred Days, and again restored, after the fall of Napoleon, July 8, 1815. The rule of the elder branch ceased on the abdication of Charles X., Aug. 2, 1830. Louis Philippe, of the Orleans, or younger branch of the Bourbons, then succeeded to the throne, and their line ceased to reign in France on his abdication, Feb. 24, 1848.

BOURBONS (Collateral Branches).—The Condé branch took its title from Condé, in Hainault, which came into the possession of the Bourbon family by the marriage, in 1487, of Francis of Bourbon, count of Vendôme, with Mary of Luxemburg, heiress of St. Paul, Enguien, Soissons, and Condé. Their son Charles had several children, and one of these, named Louis, assumed the title of prince of Condé. This line became extinct in 1830. The later Orleans branch sprang from Philip, second son of Louis XIII., made duke of Orleans in 1660. The Spanish Bourbons are descended from Philip, duke of Anjou, grandson of Louis XIV., who was made king of Spain under the title of Philip V. in 1700. The Neapolitan branch is descended from Charles, third son of Philip V. of Spain, made duke of Parma in 1731, and king of Naples in 1735. The Conti, a branch of the Condé, is descended from Louis, the first prince of Condé, who married *Eléonore de Roye*, dame de Conty or Conti, by whom he had two sons, Henry of Bourbon, prince of Condé, and François, who took the title of prince of Conti.

BOURGES (France), the ancient *Avaricum*, afterwards called *Bituriges* and *Biorgas*, whence the present name is derived. Cæsar captured it B.C. 52, when it is said that only 800 out of 40,000 inhabitants escaped. It was captured by the Goths A.D. 475, and by Clovis in 507. It suffered greatly from the ravages of war. The bishopric was founded in the 3rd century. It was made an archbishopric. The occupant of the see was termed patriarch and primate of Aquitaine. Councils were held at this town in 473; Nov. 1, 1031; Dec. 25, 1145; in 1225; Sept. 13, 1276; in April, 1280; Sept. 19, 1286; in 1336; Aug. 26—Sept. 11, 1440, and March 21, 1528. Louis XI., who was born here, founded its university, which was

suppressed at the Revolution. The Huguenots seized the place in 1562, but were driven out Sept. 1, by the royal troops.

BOURIGNONISTS.—The followers of Antoinette Bourignon de la Porte, a fanatic born at Lille, in Flanders, Jan. 13, 1616. Bayle says she was so ugly that it was debated for some days after her birth, by her family, whether she should be stifled as a monster. She took the habit and order of Augustine in 1658; and travelling in Holland, France, and Scotland, taught that religion consists in internal emotions, and published a great many works. Driven from place to place, she died at Franeker, in Friesland, Oct. 30, 1680; and her tenets are said to have obtained a temporary popularity amongst the Scotch.

BOVIANUM (Italy).—This Samnite city, besieged by the Romans without success B.C. 314, was taken by them B.C. 311, again B.C. 305, and again B.C. 298. It was an important military position, and suffered in many succeeding wars. Bovianum was destroyed by an earthquake in the 9th century, and the modern Bojano occupies its site.

BOVINES (Battle), or BOUVINES.—Fought Sunday, July 27, 1214, at the bridge of Bouvines, where Philip Augustus, with inferior numbers, defeated the army of Otho, emperor of Germany, and his allies. The counts of Flanders and Boulogne, and William, earl of Salisbury, were made prisoners.

BOWIDES.—A dynasty established in Persia A.D. 932. There were seventeen kings of this line, which lasted for 127 years, and became extinct in 1059.

BOW ISLAND (Pacific).—One of the coral islands discovered by Bougainville in 1768. He called it *La Harpe*, but it received its present name from Captain Cook, who landed upon it in 1769.

BOWYER FORT (United States), near Mobile, was captured by the English troops, Feb. 11, 1815. This was the last encounter during the American war, as the news of the conclusion of peace reached the belligerents the next day.

BOXTEL (Battle).—The republican army under Pichegru having wrested Boxtel from the Dutch, Sept. 14, 1794, the duke of York ordered General Abercrombie to advance during the night with the army of reserve. In the morning of the 15th he was engaged with the French, and was compelled to retire. On this occasion the duke of Wellington, then commanding the 33rd regiment, first came under fire. By a well-directed movement he checked the advance of the republican troops, and inflicted such chastisement upon them, that the further retreat was effected without molestation.

BOYADJI-KEUY (Treaty).—Between Austria and the Porte, was signed at Boyadji-Keuy, June 14, 1854. It consisted of seven articles, providing for the occupation of the Danubian principalities by the Austrians, who entered the principalities Aug. 20, 1854, and retired in 1856, at the close of the war.

BOY-BISHOP, was elected in cathedrals and parish churches on St. Nicholas' day (Dec. 6), during the Middle Ages. This child, usually chosen from one of the choir, was invested with all the insignia of the episcopal office, and his authority lasted until Innocents' day (Dec. 28). He performed all the ceremonies and offices of the church except mass. At Salisbury the boy-bishop is said to have had the disposal of all stalls that came vacant during his rule. This custom was suppressed by proclamation July 22, 1542, and according to some authorities a previous proclamation had been issued July 22, 1540. This, with other Roman Catholic pageants, was revived by Queen Mary; and it was again suppressed by Elizabeth, though it continued to exist in rural districts for some time after the prohibition. A similar custom prevailed in many parts of the Continent.

BOYLE LECTURES.—Instituted according to instructions in the will of the Hon. Robert Boyle (seventh son of the earl of Cork), who died Dec. 30, 1691. He was one of the founders of the Royal Society, and a man of extraordinary attainments. The lectures, eight in number, intended as a defence of natural and revealed religion, are preached at St. Mary-le-Bow church, on the first Monday in January, February, March, April, May, September, October, and November. The first course was preached by the celebrated Dr. Bentley in 1692, and he preached a second in 1694.

BOYNE (Battle).—At this battle, in Ireland, William III. defeated his father-in-law, James II., July 1, 1690. The latter fled to Dublin, thence to Waterford, from which port he set sail for France.

BRABANÇONS, or **BRABANCIONES**, mercenary soldiers, called also *Routiers*, because they were always *en route*, and *Cotereaux*. They were frequently employed during the Middle Ages, and in this country in particular, by William II., Stephen, and Henry II.; and were little better than freebooters. The greater number came from Brabant: hence their name.

BRABANT (Holland and Belgium).—This ancient province formed part of Charlemagne's empire, and in the division of his territories, made A.D. 806, was assigned by him to his son Charles. Lothaire I. obtained it A.D. 843, and his son, Lothaire II., A.D. 855, by whom it was joined to Lorraine. Bruno, archbishop of Cologne, made it a separate duchy, called Lower Lorraine, and afterwards Brabant; and bestowed it upon Geoffrey, its first duke. It passed under the rule of the dukes of Burgundy in 1429, and was with their dominions transferred to Austria in 1477. When Charles V., emperor of Germany, became king of Spain, in 1516, the Netherlands were united to Spain. Philip the Second's religious persecutions having caused a revolt, North Brabant joined the United Provinces in 1581; and South Brabant remained under the dominion of Spain until 1706, when it became part of the

Austrian Netherlands. Brabant, with the whole of the Austrian Netherlands, was united to France by decrees of the National Convention, dated March, 1793 and 1795, and armies were sent for the purpose of subjugating the country. It formed part of the kingdom of Holland in 1815, and at the revolution of 1830, South Brabant became a province of Belgium. The heir to the throne bears the title of duke of Brabant.

BRACELETS, or **ARMLETS**, were worn at a very early period. Abraham's servant gave Rebecca two bracelets of gold B.C. 1857 (Gen. xxiv. 22); and the Amalekite who killed Saul brought the bracelet that was upon his arm to David, B.C. 1055 (2 Sam. i. 10). They were worn both by men and women amongst most ancient nations. William of Malmesbury relates that Alfred ordered golden bracelets to be hung up in the highways (circ. A.D. 890), and such was the good order that prevailed, that nobody took them away. The same author mentions, as part of the peace-offering sent by Earl Godwin to Hardicanute, A.D. 1041, eighty soldiers, who had two bracelets on their arms, weighing sixteen ounces of gold. In the Saxon Chronicle, under the year 975, Edgar is called the "bracelet-giver to heroes." Amongst the Danes, the most sacred form of oath was that sworn on the holy bracelet, originally kept at an altar, but afterwards worn on the arm of a priest. This ceremony is alluded to by the Saxon Chronicle under the year 876. Various ancient ornaments of this kind have been found in different parts of the island.

BRADDOCK DOWN (Battle).—Sir R. Hopton with inferior numbers defeated the Parliamentary army at this place, near Liskeard, in Cornwall, about the middle of January, 1643. With trifling loss on his part, he took 1,250 prisoners, all their cannon, colours, arms, &c.

BRAGANÇA (House of).—Portugal threw off the Spanish yoke in 1640, and John, duke of Bragança, was raised to the throne Dec. 1, under the title of John IV. The family dates from the beginning of the 15th century, when Alfonso, a natural son of John I., was created duke of Bragança and lord of Guimaraens. He married Beatrice, daughter of the count of Barcellos and Ourem, and from them the Bragança line sprung. In 1801 Napoleon declared that the reign of the Bragança sovereigns had ceased. John, regent of the kingdom, withdrew to Brazil in 1807, but he returned in 1821. At his death, in 1826, his son Don Pedro resigned the throne in favour of his daughter Maria II., preferring to remain emperor of Brazil, which he had been elected Nov. 18, 1825.

BRAGANÇA (Portugal).—According to tradition, this city was founded by King Brigo, B.C. 1906. Its real founder was Sancho I., who built the present city and castle in 1187. Bragança was erected into a duchy by Alfonso V., in 1442. On the revolt of the Portuguese from Spain in 1640, John II., eighth duke of Bragança, ascended the throne of Portugal

as John IV., and founded the reigning dynasty. In 1782 the see of Miranda was transferred to Bragança, the bishop retaining both titles.

BRAMHINS.—The order of Hindoo priests, constituting the highest of the four castes into which the Hindoo nation is divided, is of great antiquity. It is said that their Vedas, or sacred books, date from fourteen centuries before our æra, and that some of their codes of criminal and civil law go back nearly 3,000 years from the present time. The Hindoo tradition respecting the origin of this caste is, that in the first creation, the Brahmins proceeded with the Veda from the mouth of Brama, their chief god. The system of castes prevailed both in Egypt and in India, and much controversy has been excited as to whether India borrowed it from Egypt or Egypt from India.

BRAILOW (Battle).—Fought near Brailow, or Ibrail, in Wallachia, between the Russians and the Turks, June 19, 1773, the latter having been defeated. The town, taken by the Russians June 18, 1828, the siege having commenced May 11, was restored to the Turks by the treaty of Hadrianople, in 1829.

BRAMHAM MOOR (Battle).—Sir Thomas Rokeby, high sheriff of Yorkshire, defeated the earl of Northumberland, who had rebelled a second time against Henry IV. at this place, Feb. 19, 1408. The earl of Northumberland was killed in this battle.

BRANDENBURG (Prussia).—This province, subjugated by Charlemagne A.D. 789, some time after regained its independence, which it enjoyed until 928, when it was conquered and annexed to Saxony. It became a margraviate under Albert, surnamed the Bear, in 1142. On the extinction of that race in 1320, it was given by the emperor Louis V. to his son Louis, and was sold by one of his descendants to Charles IV. It continued in this family until the emperor Sigismund obtained possession in 1411, and by him it was, in 1415, sold to Frederick of Hohenzollern, one of whose successors founded the kingdom of Prussia in 1701. The town of Brandenburg, founded about the 7th century, was made a bishop's see A.D. 946. It was suppressed in 1565.

BRANDY, formerly called Brandwine, was first mentioned about 1671. The Aqua Vitæ invented by Raymond Lully, who died in 1515, is often mistaken for brandy.

BRANDY-WINE (Battle).—At Brandy-wine Creek, near Newcastle, in Pennsylvania, Lord Cornwallis, Sept. 11, 1777, with inferior numbers, defeated an American army of 15,000 men, advantageously posted.

BRASENOSE COLLEGE (Oxford).—William Smyth, bishop of Lichfield, afterwards of Lincoln, and chancellor of the university of Oxford, and Sir R. Sutton founded this institution about 1508. A charter was granted by Henry VIII., Jan. 25, 1512, for one principal and sixty scholars of the King's Hall and College of Brasenose. The new library was finished in 1663, and the foundation-stone of the new chapel was laid in 1656. It has

received numerous benefactions. Brasenose Hall existed in the time of Henry III., in the middle of the 13th century, and was known by that name in 1278, a nose of brass being fixed to the gate. The name is said to be derived from a corruption of *brasinium* or *brasinhouse*, because originally situated in part of Alfred's palace, used as a brew-house.

BRASS.—The art of making this alloy of copper and zinc was known in ancient times, and the early Britons are said to have possessed brass-foundries. The celebrated colossus of Rhodes, erected about B.C. 288, was formed of brass. This fact has, however, been disputed, and it is certain that the present process of making brass is altogether of modern invention. The first works in England are said to have been established at Esher in 1649; and in 1781 Emerson obtained a patent for making brass in a more direct way, by melting together its constituent metals.

BRAY (Berks).—Fuller's story of the vicar of Bray, who held his living under Henry VIII., Edward VI., Mary, and Elizabeth, being first a Roman Catholic, then a Protestant, again a Roman Catholic, and once more a Protestant, on the principle that he intended to live and die vicar of Bray, is not borne out by the church records. The living was not held by the same person for so long a period as that required to prove the truth of the anecdote.

BRAZIL (South America).—Vincent Pinzon landed in Brazil in February, 1500, and took possession of the country in the name of the Spanish government, and Cabral was driven by adverse winds on its coasts April 23 in the same year. It was afterwards surveyed by Amerigo Vespucci, who published an account of the country, with a map. The Spaniards and French occupied several portions of the country.

A.D.

1500. Vincent Pinzon, having sailed from Palos, in December the preceding year, arrives, in February, at Cape Augustine, and discovers and names the river Amazon. On the 23rd of April, Pedro Alvarez Cabral is driven on to the coast, and takes possession of the country in behalf of the king of Portugal.
1530. Captain Hawkins, of Plymouth, commences intercourse with the natives, and prevails on one of their chiefs to accompany him to England.
1549. The Portuguese found St. Salvador, and the Jesuits first enter Brazil.
1553. Settlements formed by Europeans extend as far as the river La Plata, and the country is made a Jesuit province.
1555. Coligny establishes a settlement of French Protestants in Brazil.
1558. The Portuguese massacre most of the French settlers.
1560. The colony of French Huguenots is entirely broken up, and the colonists are expelled by the Portuguese.
1572. The English make an unsuccessful attempt to obtain a footing in Brazil.
1580. Passes into the power of Philip II., king of Spain, who becomes sovereign of Portugal.
1594. Captain James Lancaster takes Pernambuco, and returns with a large booty of sugars, timber, and cotton.

A.D.

1624. First invasion of Brazil by the Dutch, who take Bahia, but are unable to make a permanent settlement.
1630. Second invasion by the Dutch, who take Olinda and the province of Pernambuco.
1654. Vleyza restores Brazil to the Portuguese rule. Free trade opened between Brazil and England.
1661. The Dutch resign all claim to Brazil.
1711. The French seize Rio-Janeiro.
1723. The French found Monte Video, which is seized by the Spaniards.
1760. The Jesuits are expelled from Brazil.
1763. The seat of government is transferred from Bahia to Rio.
1772. Revolt of the oppressed natives and negro slaves.
1789. Insurrection of the province of Minas.
1807. Nov. 29. The royal family of Portugal leave Lisbon for Rio-Janeiro, to which city the seat of the Portuguese government is transferred.
1808. Jan. 21. The royal family of Portugal reach Brazil.
1815. Aug. 1. The culture of the tea-plant is introduced into Brazil. Dec. 16. John, prince regent of Portugal, erects the state of Brazil into a kingdom.
1817. March. Insurrection of Pernambuco.
1821. Revolutions in Para, Bahia, Pernambuco, and Rio-Janeiro. The king returns to Lisbon, leaving Don Pedro regent of Brazil.
1822. Sept. 21. Don Pedro refuses to recognize the authority of the king of Portugal, and is proclaimed "constitutional emperor of Brazil."
1825. May 13. The king of Portugal recognizes the independence of the Brazilian empire.
1828. Brazil recognizes Monte Video as an independent state.
1829. Insurrection in Pernambuco.
1831. April 6. The emperor abdicates in favour of his infant son, Don Pedro, and next day embarks for Europe.
1840. July 23. The emperor is declared of age by a *coup d'état*, and assumes the head of affairs.
1850. Sept. 4. The emperor issues a decree, making the importation of slaves piratical.
1858. Nov. 8. Inauguration of the first Brazilian railroad from Rio to Belem (38 miles).

EMPERORS.

A.D.

1822. Dec. 1. Pedro I.
1831. July 18. Pedro II.

BREAD.—Various materials were converted into bread in ancient times, when wheaten flour was not in such general use as at present. From the description of England prefixed to Holinshed's Chronicle, we learn that even in this country bread was made "of such grain as the soil yieldeth, nevertheless the gentility commonly provide themselves sufficiently of wheat for their own tables, while their household and poor neighbours in some shires are enforced to content themselves with rye or barley, yea, and in time of dearth, many with bread made either of beans, peas, or oats, or of altogether, or some acorns among." Amongst other substitutes for wheat, potatoes and various kinds of earth have been used. Stow says Bread Street was so called on account of its being the place where bread was formerly sold, and adds; "for it appeareth by records that in the year 1302, which was the thirtieth of

Edward I., the bakers of London were bounden to sell no bread in their shops or houses, but in the market." Butter was substituted for dripping to be eaten with bread at breakfast between the reigns of Edward IV. and Elizabeth. By a royal mandate issued by Henry III. in the thirty-sixth year of his reign (1252), bakers were ordered not to impress bread intended for sale with the sign of the cross, Agnus Dei, or the name of Jesus Christ. (*See ASSIZE OF BREAD, BAKERS, &c.*)

BREAD-FRUIT TREE.—This esculent, found in the South-Sea Islands, was introduced into the West Indies by order of the British government. The first attempt in 1789 under Bligh failed, on account of the mutiny of part of his crew on board the *Bounty*. Bligh was sent out again in 1791, reached Otaheite in 1792, and landed the plants in 1793. Captain Bligh received the gold medal offered in 1777 by the Society for the Encouragement of Arts and Manufactures to any one who should bring the bread-fruit plant in a state of vegetation from the South-Sea Islands to the West Indies. The experiment succeeded, but the negroes prefer their own preparation of food from the plantain.

BREAKWATER.—The mole at Tangier, commenced in 1663, and abandoned, though not completed in 1676; the works commenced at Plymouth Aug. 12, 1812, and completed in 1841; those at Cherbourg, commenced June 6, 1784, continued at intervals, and completed in 1853; and the Admiralty pier at Dover, commenced about 1844, are amongst the most celebrated breakwaters in the world.

BREASTPLATE.—A portion of the vestment worn by the high-priest amongst the Jews, was called the breastplate of judgment, and to it the Urim and Thummim were attached. The defensive armour called the breastplate, worn both in ancient and modern times, is made of various materials.

BRECHIN (Scotland).—This ancient town, supposed to have been the capital of the kings of the Picts, was burnt by the Danes A.D. 1012. It was made a bishopric in 1150, and the see, suppressed in 1689, was revived in 1731. Near Brechin, at Huntly Hill, a battle was fought in 1452. Brechin was taken by Edward I., Aug. 9, 1303, and was burnt by Montrose in 1645.

BREDA (Holland) was founded about 1190, and was annexed to Spain in 1567. It was recovered in March, 1590, by Prince Maurice of Nassau, to whose family it belonged during the 14th and 15th centuries. During the struggle with Spain conferences were opened here March 3, 1575, and closed July 8, 1575. The Spaniards besieged Breda in 1624, and captured it in 1625. It came into the possession of the United Provinces Oct. 6, 1637, and was confirmed to them by the peace of Westphalia in 1648. Charles II. resided here during part of his exile, and his celebrated declaration was written at Breda, and dated April 14 (O.S. 4), 1660. Peace between England, France, and Holland was concluded here July 20 (O.S. 10), 1667. During the

revolution the assembly of the United Belgic States met here Sept. 14, 1789. Breda capitulated to the French Feb. 25, 1793. The French were expelled in 1813, and Breda was restored to Holland at the peace in 1815.

BREHON LAW, prevailed in Ireland previous to its conquest by Henry II. in 1169, and was so called because the Irish name for a judge is Brehon. The Irish nation received and swore to observe the English laws at the Great Council assembled at Lismore. Spencer, in 1596, describes Brehon Law as "a rule of right unwritten, but delivered by tradition from one to another, in which oftentimes there appeared great show of equity in determining the right between party and party, but in many things repugnant quite both to God's laws and man's." This account is not altogether correct, as the code existed in manuscript as early as the 14th century. King John, who visited Ireland in 1210, ordained and established by letters patent that it should be governed by the laws of England. The Irish, however, clung to the Brehon Law. Henry III. and his successors made several efforts to induce them to abandon it, and Edward III. by the statute of Kilkenny, in 1366, formally abolished the Brehon Law, the practice of which was, by the last-mentioned statute, made treason. The Brehon Law was not, however, in spite of this and other enactments, entirely abolished until the reign of James I.

BREMEN (Germany).—The capital of the republic of Bremen, and one of the free Hanse towns, is first mentioned as a bishop's see A.D. 787. The archbishop of Hamburg removed his seat here in 845, and Bremen itself became an archbishopric in 1203. It was destroyed by the Hungarians in 900. In 1283 it joined the Hanseatic League; and in 1648 its archbishopric was suppressed. Bremen was made an imperial city in 1640. A majority of the inhabitants having declared in favour of Protestantism, the city was separated from the remainder of the diocese. The latter, called the duchy of Bremen, was ceded to Sweden by the peace of Westphalia in 1648. Denmark conquered it in 1712, and sold it to Hanover in 1715, with which it was incorporated in 1732. The French captured it Aug. 29, 1757, again in 1758, but were speedily expelled, and took it again in 1759. It was taken by the French in 1806, and annexed to the French empire in 1810, but regained its independence in 1813, and was made a member of the German Confederation in 1815.

BRENNEVILLE (Battle).—Louis VI. of France, who supported the claim of William Clito to the estates in Normandy seized by Henry I., was defeated by the latter in the plain of Brenneville, in Normandy, Aug. 20, 1119. This is sometimes called the battle of Bremulle, and also of Noyon.

BRENTFORD (Battles).—Edmund Ironside defeated the Danes at Brentford, with great slaughter, in May, 1016. Charles I. defeated the Parliamentary army near this place, Nov. 12, 1642.

BRESCIA (Italy).—The ancient Brixia was conquered by the Romans. The Goths burned it A.D. 412, and Attila plundered it in 452. It became an important city under Lombard rule, and the capital of a province of the same name. It was taken by Charlemagne. It joined the league against the emperor Frederick I. in 1175, and successfully resisted the arms of Frederick II. in 1238. It was long a prey to the various factions by which Italy was convulsed; was taken by the emperor Henry VII. in 1311, by the Venetians in 1426, and by the French in 1509. The Venetians having regained possession in 1512, it was taken and sacked by the French, under Gaston de Foix, in the same year, but was again captured, after a long siege, by the Venetians, May 26, 1516. It was annexed to Venice in 1576, and continued under the sway of that republic until 1797. The French having captured it in 1796, they were expelled in 1799; but Brescia again passed under their yoke until 1815, when, with the remainder of Lombardy, it was ceded to Austria. During the revolution of 1848, the Austrians were expelled, but it was retaken March 30, 1849, and passed to Sardinia, by the treaty of Zurich, in 1859. Its cathedral was commenced in 1604, and completed in 1825.

BRESLAU (Silesia).—Frederick II. of Prussia took possession of Breslau Jan. 1, 1741. After the battle of Czaslau, which took place May 17, 1742, a treaty of peace between Frederick II. and Maria Theresa was drawn up at Breslau under the mediation of the British ambassador, June 11, 1742, and definitively concluded July 28. Silesia and Glatz, in Bohemia, were ceded to Prussia. A great battle was fought here between the Austrians and the Prussians, Nov. 22, 1757, and the latter having been defeated, the Austrians took possession of Breslau on the 25th, but it was retaken by Frederick II. on the 19th of December in the same year. Loudon, who had appeared before it July 30, 1760, was compelled to raise the siege August 5, and the Russians bombarded it in 1761. The French took it in 1806, and its fortifications were demolished in 1814. Its university was founded in 1702, and that of Frankfort-on-the-Oder was incorporated with it in 1811. The bishopric of Smogre, founded in 960, was transferred to Breslau in 1062. Councils were held at Breslau in 1248, and Feb. 2, 1268.

BREST (France), supposed to be the ancient Privates Portus, came into the possession of the duke of Brittany in 1240. It was frequently captured and held by the English in the continental wars during the 14th and 15th centuries; and it passed to the French crown, with the remainder of Brittany, by the marriage of Louis XII. with Anne of Brittany, widow of Charles VIII., in 1493. Sir Thomas Howard burnt Brest May 23, 1512; and an indecisive action between the French and English fleets occurred off the port Aug. 10, in the same year. Sir Edward Howard, lord high admiral, sailed into Brest, landed some men, and ravaged the country

in 1513, and was killed outside the port in an attempt to destroy some French galleys. Sir Martin Frobiisher assisted the French to recover Brest from the Spaniards in 1594. The English failed in an attack upon Brest in June, 1694. Lord Howe defeated the French fleet off Brest, June 1, 1794; and the port was blockaded by an English squadron during the French revolutionary war. The harbour was improved in 1631 by order of Richelieu, who made Brest a naval station. Captain Gordon was beheaded at Brest in 1769, on a charge of being concerned in a conspiracy for setting fire to the shipping in that port. The hospital was destroyed by fire, and fifty slaves lost their lives Nov. 1776.

BRETAGNY (Treaty).—At the village of Bretigny, near Chartres, a treaty of peace was concluded between England and France, May 8, 1360. It consisted of forty articles. France ceded several provinces that England had conquered, and Edward III. renounced his claim to Normandy, Maine, Anjou, &c., and agreed to release the French king John, who had been prisoner in England since 1356, his ransom being fixed at 3,000,000 of gold crowns. King John was conducted to Calais July 3; the two kings signed the treaty there Oct. 24; and John was released on the 26th. He returned to England Jan. 4, 1364, and the kings of Scotland and Cyprus being then in London, he was received with great pomp; but falling suddenly ill, he died at the palace of the Savoy, April 8, 1364. Some historians assert that he came to England because he was unable to fulfil the terms of his release; but a desire to see Edward III., for whom he entertained great affection, appears to have been his principal if not his sole object.

BREVIARY, originally called the *Cursus*, is composed of psalms, lessons taken from Scripture, homilies, histories of saints, hymns, anthems, prayers, &c., suited to the particular season, festival, or canonical hour, collected for the use of Roman Catholics. After undergoing several alterations, it was settled by Pius V. in 1568. Reformation of the breviaries was enjoined upon bishops by the synod held at Cologne in 1536, and both popes and councils have introduced various alterations.

BREWERS.—The art of brewing is of great antiquity. By a statute of the Pillory and Tumbrel, 51 Hen. III. st. 6 (1267), brewers were fined for the first, second, and third offences not over grievous against the law of assize; but if the offence was often, or over grievous, the brewer was condemned to the tumbrel, or some other correction. The trade of brewing, within the city of London, was at one time confined almost wholly to females. The company of brewers was incorporated by Henry VI., Feb. 22, 1428; confirmed by Edward IV. in 1480; and again by Elizabeth, July 13, 1560. There were twenty-six brewers in London and Westminster in 1585, and they brewed 648,960 barrels yearly. Barrels were first ordered to be gauged by 23 Hen. VIII. c. 4 (1532). The trade itself

has been regulated by several subsequent statutes.

BRIAR CREEK (Battle).—General Prevost, with about 1,200 English troops, defeated the American army, 2,000 strong, at this place, in America, March 3, 1779. Several colours, 7 pieces of cannon, all the baggage, and 200 prisoners, fell into the hands of the victors.

BRIBERY.—This form of corruption is mentioned several times in the Bible, and is forbidden Deut. xvi. 19. It prevailed extensively amongst most ancient nations. When Ergocles was convicted of having embezzled thirty talents, and payment was demanded of his friend Philocrates, his party openly boasted of having bribed 2,100 jurymen at Athens. A modern author remarks that "in all periods of their history, the Greeks seldom had sufficient principle to resist a bribe." Bribery prevailed to a fearful extent in Rome, and existed in various forms during the Middle Ages. The first case of punishment for bribery at an English election is recorded by Parry (Parl. and Councils of Eng. p. 221). On the 10th of May, 1571, Thomas Long, a very simple man, and unfit to serve, confessed that he gave the mayor of Westbury and another £4 for his place in Parliament. They were ordered to refund the money, to appear to answer such things as should be objected against them, and the corporation and inhabitants of Westbury were fined £20 for their scandalous attempt. Bribery at elections did not prevail to any great extent in this country until the 18th century.

BRICIAN, or ST. BRIDGET.—This Swedish order of knighthood was founded by Queen, afterwards St. Bridget, in 1366.

BRICK-MAKING was known immediately after the flood (Gen. xi. 3), B.C. 2234, burnt bricks having been employed in the construction of the tower of Babel. The lives of the Israelites in Egypt were embittered by their cruel task of brick-making about B.C. 1571 (Exod. i. 14, and ch. v.). It is probable that these were sun-dried bricks. The Jews inscribed magical and other characters upon bricks. The art was much improved by the Greeks, and carried to a still higher state of perfection by the Romans. The Anglo-Saxons and the Normans employed brickwork in their architecture. Bricks were first taxed by 24 Geo. III. c. 24 (1784), at the rate of 2s. 6d. per 1,000. This duty was several times increased until, by 2 & 3 Vict. c. 24 (July 19, 1839), it was fixed at 5s. 10d. per 1,000 for ordinary-sized bricks, and 10s. for the larger size. It was repealed by 13 & 14 Vict. c. 9 (1850). Hampton Court, built by Cardinal Wolsey, is a good specimen of English brickwork.

BRIDE-ALE, or BRIDE-STAKE, an old custom, so called because the bride sold ale on her wedding-day, and her friends contributed what they pleased in payment. It was also called *bride-bush*, from a bush at the end of a pole, the ancient badge of a country ale-house; *bride-wain*, because poor persons

sent a cart round to their relations and friends, to obtain contributions; and *bidding*, because guests were invited. The custom is supposed to have been confined to these islands. Puttenham, in the "Arte of Poesie," published in 1589, mentions a bryde-ale, and one was celebrated before Queen Elizabeth, at Kenilworth Castle, in that year. In the court-rolls of Hales-Owen, Salop, amongst other regulations is one made in 1573, to the effect that the wedding couple should not have above "eight messe of persons at his dinner within the burrowe."

BRIDEWELL.—A tower or castle built in St. Bride's parish, was for many years a residence of the English kings. Here, in 1210, King John summoned a council, at which he exacted above £1,000 sterling from the clergy; and after depriving the White Monks of their privileges, compelled them to contribute £40,000 in silver. Henry VIII. built a stately and beautiful house upon the ruins of this old tower, giving it the name of Bridewell, from a well in the neighbourhood dedicated to St. Bride, or St. Bridget. It is said to have been built specially for the entertainment of the emperor Charles V., who visited London in May, 1522. Ridley, in May, 1552, wrote a letter to Cecil requesting him to obtain it for charitable uses; and in June, 1553, Edward VI. granted it to the city of London for the maintenance of poor and impotent people. A mill to grind corn was placed in it in 1570. It was made a House of Correction in the 17th century, and was destroyed by fire in 1666. Several houses of correction bearing the same name have been erected in London and other parts of the kingdom.

BRIDGENORTH (Shropshire).—This ancient town was incorporated by John in 1214. Henry I. captured the castle in 1102; and Henry II. in 1157.

BRIDGES, of rude materials and form, were constructed by ancient nations at the earliest periods. The first stone bridge of large dimensions was built at Rome by Caius Flavius Scipio B.C. 127. Old London Bridge was commenced A.D. 1176, and was not completed until eighty-three years later. Bow Bridge, built in 1118, is said to have been the first stone bridge in England. By 9 Hen. III. c. 15 (1225), no town or freeman could be distrained to make bridges; and by 22 Hen. VIII. c. 5 (1530), it was provided that if a bridge was within a city or town corporate, the inhabitants of such city or town corporate were bound to repair it; if without a city or town corporate, the inhabitants of the county had to effect the repairs; and if part of a bridge was in one county and part within another, the inhabitants of the respective counties were charged with the repairs of the portion within their own limits. Pritchard, in 1775, introduced cast-iron in the construction of bridges; and the first of this material was built over the Severn, at Coalbrook Dale, in 1779. The punishment for pulling down or destroying a public bridge was made trans-

portation for not less than seven years, or imprisonment for not more than four years with flogging, by 7 & 8 Geo. IV. c. 30, s. 13 (June 21, 1827). By 13 & 14 Vict. c. 64 (Aug. 14, 1850), the repairing, maintaining, and building of bridges, was placed under the sole management and control of the town councils. The following is a list of some of the principal bridges:—

B.C.			
100.	Ponte Molle	at Rome	Stone.

BRIDGEWATER (Somersetshire).—This ancient town, called in Domesday Book *Brugie*, received its first charter, dated June 26, 1200, from John. It was taken by the Parliamentary forces July 23, 1645. In 1685 the corporation of Bridgewater proclaimed the duke of Monmouth king.

BRIDGEWATER TREATISES.—The sum of £8,000 was, by the will of Francis Henry Egerton, last earl of Bridgewater, who died in Feb. 1829, placed at the disposal of the President of the Royal Society, to be paid by him to the writer, or writers, of a treatise "on the power, wisdom, and goodness of God, as manifested in the creation," of which 1,000 copies were to be published. The subject, divided into eight parts, was allotted to eight individuals, each of whom received an equal share of the money. The works, published between 1833 and 1840, and known by the name of the Bridgewater Treatises, are as follows:—

- The Hand; its Mechanism and Vital Endowments, as evincing Design. By Sir Charles Bell. 1833.
On the Power, Wisdom, and Goodness of God, as manifested in the adaptation of External Nature to the Moral and Intellectual Constitution of Man. By Rev. Thomas Chalmers. 1833.

On the Adaptation of External Nature to the Physical Condition of Man. By John Kidd. 1833.

Astronomy and General Physics, considered with reference to Natural Theology. By the Rev. William Whewell. 1833.

Chemistry, Meteorology, and the Function of Digestion, considered with reference to Natural Theology. By William Prout. 1834.

Animal and Vegetable Physiology, considered with reference to Natural Theology. By Peter Mark Rogot. 1834.

Geology and Mineralogy, considered with reference to Natural Theology. By the Rev. William Buckland. 1835.

On the Power, Wisdom, and Goodness of God, as manifested in the Creation of Animals, and in their History, Habits, and Instincts. By the Rev. William Kirky. 1835.

The dates given are those of first publication. Later editions have been issued.

BRIEF, or QUEEN'S LETTER.—This kind of document bearing the royal signature, addressed to the archbishops, bishops, clergymen, magistrates, churchwardens, and overseers of the poor in England, authorizing the collection of money for some charitable purpose therein mentioned, was first issued in this country soon after the Reformation. Certain abuses crept in, and a measure was passed (4 Anne, c. 14) in 1706, entitled, "An Act for the better collecting charitable money on briefs by letters patent, and preventing abuses in relation to such charities." This act was repealed by 9 Geo. IV. c. 42 (July 15, 1828); and though the power of issuing briefs is still retained by the Crown, it has not been exercised during the last few years.

BRIEF. (See **BULL.**)

BRIEL, or BRILL (Holland).—This fortified seaport surrendered to the confederates in 1572, and was thus the first place in Holland to obtain its independence. It was placed in the hands of the English in 1585, Queen Elizabeth having agreed to protect the Netherlands, and was, with other cautionary towns, given back to the Dutch, May 27, 1616.

BRIENNE (Battle).—Napoleon I. defeated the allied German and Russian army at this town, in France, in a sanguinary engagement fought Feb. 1 and 2, 1814.

BRIGETTINES, or NUNS OF OUR HOLY SAVIOUR, instituted by St. Bridget, duchess or princess of Nericia, in Sweden, about the middle of the 14th century. She died in 1373, and was canonized in 1391. They adopted, with certain modifications, the rule of St. Augustine. It was not lawful for them to have anything they could call their own, not even so much as a halfpenny. The new order arose in Spain, spread through parts of the continent, and had only one house in England, at Syon, in Middlesex, founded by Henry V. in 1413. Men were admitted into their convents.

BRIGHTON (Sussex), formerly Brighthelmstone, was a place of some importance in early times; and, having been plundered and burnt by the French in 1514, was afterwards fortified by Henry VIII. It declined, and was merely a fishing-village at the commence-

ment of the last century. George IV., then prince of Wales, visited it in 1782, and the foundation of the Pavilion was laid in 1784. It was completed in 1797, and additions were made in 1802 and 1817. The chain pier was commenced Oct. 1822, and opened in Nov. 1823. A battery was built in 1793, and rebuilt in 1830. The town-hall was commenced in 1830. The railroad to London was opened Sept. 21, 1841. The Pavilion was purchased by the corporation in 1850.

BRIHUGA (Spain).—General Stanhope and 6,000 British troops were surrounded and taken prisoners, after a gallant resistance, at this small town, by the duke of Vendôme, Dec. 9 (O.S. Nov. 28), 1710. The French were immensely superior in numbers.

BRINDISI (Calabria), occupies the site of the ancient Brundisium. It was seized by the Romans B.C. 267, and made a Roman colony B.C. 244. The peace of Brundisium, between Antony and Augustus, was concluded here B.C. 40, and in accordance with one of its conditions, the marriage between Antony and Octavia, the sister of Augustus, was soon after celebrated. Virgil died here B.C. 19. It was frequently besieged, and suffered severely during the various invasions of Italy. Brindisi was nearly destroyed by an earthquake A.D. 1456. It became the seat of a bishopric A.D. 172, and was united with Oria, and made an archbishopric, about 1060; but the sees were disunited in 1591.

BRISTOL.—Part of this town is in Somersetshire and part in Gloucestershire. It was a walled town and royal burgh at the time of the Norman conquest. Henry of Huntingdon describes it as the most opulent city in that part of the country, and much frequented by shipping. The empress Maud repaired to this city A.D. 1140, and Stephen was imprisoned in its castle in 1141. Bristol has returned two members to parliament since 1283; and it was made a staple for wool, leather, &c., by 27 Edw. III. st. 2, c. 1 (1353). A charter for making Bristol a town and county of itself was confirmed under the great seal (47 Edw. III.) Aug. 8, 1373. Henry VII. granted it another charter in 1550. Prince Rupert captured Bristol July 27, 1643, and it was retaken by the Parliamentary forces Sept. 10, 1645. The castle was demolished by order of Cromwell in 1656. Riots occurred here in 1749, 1793, and in 1831. The see was founded in 1534, and united to that of Gloucester in 1836. The docks were commenced in 1804, and completed in 1809. The council-house was built in 1827.

BRITANNIA, or BRITAIN.—Aristotle (B.C. 384—323), the first ancient writer who makes direct mention of Britain, speaks of two very large islands, Albion and Ierne (*i.e.* England and Ireland), called *Bretannia*, lying in the ocean beyond the Pillars of Hercules. The term Albion, applied to England on account of its chalky cliffs, is probably derived from a Celtic word signifying white. The origin of the word Britain has excited much controversy. In early native poems it is called the isle of the Prydain, of which

Carte conjectures Britannia to be the Latinized form. Some portions of the coast of Britain were known to the Phœnicians, who resorted to them for tin, before the time of Aristotle. They gave the name of Cassiterides, or the Tin Islands, to the Scilly group, off the coast of Cornwall. Herodotus uses the term, though he declares that he can give no information on the subject, admitting that he never met a man who had seen the sea on that side of Europe. The original inhabitants of Britain were a Celtic race, divided into two principal branches, the Gaelic and the Cimbric; but of their history previous to the Roman invasion, little authentic is known. The islands are supposed to have been peopled from the neighbouring continent of Gaul. Their priests, called Druids (*q. v.*), wielded the chief authority. When Cæsar, Aug. 26, B.C. 55, landed on the coast of Kent, Divitiacus was the most powerful of the native leaders.

B.C.

57. Divitiacus, king of the Soissons, in Gaul, rules Britain.
55. Aug. 26. Julius Cæsar arrives in Britain, but making no important conquests, retires to Gaul Sept. 20.
54. May. Cæsar returns to Britain, and is opposed by Cassivellaunus. He crosses the Thames, and takes Verulam (St. Alban's). He imposes a tribute on the Britons, and returns to Gaul in the autumn.
51. Commius takes refuge in Britain from the pursuit of Cæsar.
26. Augustus sets out for the purpose of invading Britain, but an embassy of the inhabitants meet him in Gaul, and offer submission to him.

A.D.

40. Caligula is persuaded to invade Britain by Adminius, son of Cinobellinus, king of the Britons. He returns without making any attempt at conquest.
43. Claudius sends Aulus Plautius into Britain, and soon afterwards comes in person, and reduces the greater part of the island to subjection.
44. Claudius has a triumph in celebration of the conquest of Britain, and assumes the surname Britannicus.
47. Flavius Vespasian annexes Britain to the Roman empire. Christianity is said to have been first preached in the island about this time, by Simon Zelotes.
50. Ostorius Scapula, Roman governor of Britain, reduces the Caugii, the Brigantes, and the Silures, takes Caractacus, king of the Silures, prisoner, and sends him to Rome.
51. Aulus Didius, governor, is opposed by Venussius, the British chieftain.
57. Veranius, governor, dies soon after his appointment.
58. Suetonius Paulinus governor. Agricola commences his military career under his tutelage.
61. The Britons revolt, and capture several Roman posts. Suetonius defeats their army, led by Boadicea, queen of the Iceni, who dies shortly after.
62. Petronius Turpilianus governor.
65. St. Peter is said to have visited Britain.
69. The Roman legions in Britain revolt from the emperor Vitellius in favour of Vespasian.
70. Petilius Cerialis governor. The Brigantes are restored to order.
75. Julius Frontinus governor.
78. Agricola governor. He reduces the isle of Anglesey, and reforms the abuses of his predecessors.

A.D.

79. Agricola's second campaign in Britain. The Roman language begins to be studied.
80. Agricola's third campaign. He penetrates as far as the frith of Tay.
81. Agricola's fourth campaign. He erects forts between the friths of Clyde and Forth.
82. Agricola's fifth campaign.
83. Agricola's sixth campaign. He defeats the Caledonians.
84. Agricola, in his seventh campaign, defeats the Caledonians under Galgacus. He sails round Britain, and discovers its insular form, resigns his governorship, and returns to Rome.
85. Sallustius Lucullus governor. He is put to death by order of Domitian.
86. The Britons rebel under Arviragus.
103. Neratius Marcellus governor.
117. The Britons strive to obtain their freedom.
120. The emperor Hadrian visits Britain.
121. Hadrian builds his wall.
124. Platorius Nepos governor.
138. The emperor Titus Antoninus deprives the Brigantes of part of their territories.
139. The Britons subdued by Lollius Urbicus, who erects a wall of turf to exclude the barbarians. It is called the Wall of Antoninus.
140. C. Valerius Pansa is proconsul in Britain.
162. Marcus Aurelius sends Calphurnius Agricola against the turbulent Britons.
181. Lucius, king of the Britons, sends an embassy to the Pope. Various dates, ranging between the years 187 and 199, are assigned for this event by different chroniclers. Some barbarous British tribes revolt, and are reduced to order by Marcellus.
183. Marcellus puts an end to the war in Britain.
187. The Britons again revolt, and are subdued by P. Helirius Pertinax.
196. Virius Lupus governor.
204. South Britain is divided into two provinces by Severus.
207. Britain again revolts.
208. The emperor Severus heads an expedition into Britain.
210. Severus completes his wall.
211. Feb. 4. Death of Severus, at York. Papianus appointed governor.
221. Marius Valerianus governor.
239. Macilius Fuscus governor.
240. Gn. Lucilianus governor.
242. Nonnius Philippus governor.
255. Desticus Juba governor.
276. Proculus and Bonosus claim Britain for themselves, and are defeated by Probus.
282. Britain is assigned to Carinus, son of the emperor.
286. Carausius assumes imperial dignity in Britain.
294. Carausius is slain by Allectus, who succeeds him in the empire.
296. Constantius reunites Britain to the Roman empire, and slays Allectus.
304. Alban and other British Christians suffer martyrdom.
306. The emperor Constantius Chlorus dies at York, and is succeeded by his son Constantine.
313. Constantine subdues the Britons.
314. British bishops present at the Council of Arles.
341. The emperor Constans restores Britain to tranquillity.
357. Julian sends 800 vessels to Britain to obtain corn.
360. Britain invaded by the Picts and Scots.
364. The Saxons assail the British coasts, and the Picts and Scots penetrate inland.
367. Revolt in Britain. Continued incursions of the Picts and Scots.
374. The Saxons effect a landing in Britain.
383. The Roman army in Britain revolts, and proclaims Maximus emperor.
394. Ninias, a Briton, is ordained bishop of the Southern Picts.

- A.D.
396. Britain seeks and obtains aid from Rome against the Picts and Scots.
407. The army in Britain revolts, and chooses Gratian, a native of the country, emperor. He is killed four months afterwards, and Constantine usurps his empire.
409. The Britons revolt from the Romans, who are too much weakened by the Goths to attempt to reduce them to subjection.
428. Vortigern reigns in Britain.
429. Vortigern seeks aid from the Saxons against the northern barbarians.
429. The Saxons form an alliance with the Picts, and turn their arms against Vortigern.
435. The Britons obtain assistance from Rome, and repel their invaders.
436. The Romans finally quit Britain.
445. The Britons are driven to the mountains by the Picts and Scots.
450. First Saxon invasion. Hengist and Horsa return for the purpose of conquest.
455. Battle of Aylesford, which establishes Hengist as king of Kent.
477. Second Saxon invasion. Ella arrives in Britain, and defeats the natives at Andredsea.
491. Ella founds the kingdom of Sussex, or of the South Saxons.
492. Ella made first Bretwalda.
495. Third Saxon invasion. Arrival of Cerdic.
519. Cerdic founds the kingdom of Wessex.
520. The renowned King Arthur defeats Cerdic at Badon.
527. Fourth Saxon invasion. Essex founded.
530. Cerdic invades and takes the Isle of Wight. Fifth Saxon invasion.
547. Sixth Saxon invasion. Landing of Ida at Flamborough Head, and commencement of the kingdom of Northumbria.
559. Northumbria divided into Bernicia and Deira. Ella takes Deira.
568. Ethelbert, king of Kent, attacks Ceaulin, king of Wessex, and is driven back into his own territories.
571. Cuthulf, brother of Ceaulin, fights the Britons at Bedford, and takes from them four towns.
577. Cuthwine and Ceaulin defeat the Britons at Deorham (Derham?), and take Gloucester, Cirencester, and Bath.
586. Crida founds the kingdom of Mercia.
591. Ceaulin is defeated by his nephew Ceolric, and expelled; soon after which he dies.
596. Arrival of St. Augustine.
603. Eθαν, king of the Scots, invades Bernicia, but is repulsed, with much slaughter, by Ethelfrith.
610. Tewdrick, king of the Welsh, defeats Ceolwulph, king of Wessex.
617. Ethelfrith, king of Bernicia, is defeated and slain by Redwald, king of the East Angles, and Edwin becomes king of Deira and Bernicia.
626. Quicelm, king of Essex, makes an unsuccessful attempt to assassinate Edwin, who is preserved by his thane Lilla.
642. Penda, king of Mercia, defeats and slays Oswald, king of Bernicia.
655. Oswy, king of Bernicia, slays Penda.
661. Edilwalch, king of Sussex, obtains possession of the Isle of Wight and part of Hampshire.
664. A great plague in Britain.
687. Sussex is united to Wessex.
688. Retirement and death of Cadwallader, last king of the Britons.
694. Kent is devastated by the West Saxons.
704. Ethelred, king of Mercia, voluntarily resigns his crown, and becomes abbot of Bardney.
727. Ina, king of Wessex, quits the throne, and retires to Rome.
757. Insurrection in Mercia, and death of King Ethelbald.
777. Offa, king of Mercia, commences an intercourse with Charlemagne.
787. The Danes first land in England.

- A.D.
800. Egbert is recalled from exile to ascend the throne of Wessex.
813. Egbert lays waste West Wales.
823. Essex is united to Wessex.
824. Kent is united to Wessex.
825. Northumbria is united to Wessex.

The date usually assigned for the dissolution of the Heptarchy is 827; but the title "king of the English" was first assumed, according to Hume, by Edward the Elder, son of Alfred the Great, in 901. Sharon Turner makes Athelstan first king of all England, and settles 934 as the year when he assumed the title.

THE HEPTARCHY.

KINGS OF KENT.

THE BRETWALDAS.

The following is the list of the Bretwaldas, or supreme rulers mentioned by Bede. Mr. Hallam and others doubt whether any sovereign in those early times possessed such authority :—

	A.D.
492. Ella, king of Sussex.	
571. Ceaulin, king of Wessex.	
594. Ethelbert, king of Kent.	
615. Redwald, king of East Angles.	
623. Edwin, king of Deira.	
634. Oswald, king of Bernicia.	
343. Oswy, king of Bernicia.	

BRITANNIA TUBULAR BRIDGE, over the Menai Strait, was commenced in 1846, and opened March 5, 1850. It was designed and executed by Robert Stephenson, and is the first structure of the kind.

BRITANNY (France), or BRETAGNE.—This name was given to a portion of Armorica, in which some Britons from Cornwall formed a colony, in the latter part of the 6th century. The country was subjugated by Charlemagne, but the Bretons regained their independence and were ruled by their own sovereigns, tributary at times to the Frankish kings. Charles the Bald, after several severe struggles, induced its sovereigns to do homage to him, and this was afterwards rendered to the dukes of Normandy.

- | | A.D. |
|--|------|
| 818. Louis the Pious intrusts Nominos with delegated authority. | |
| 841. Nominos revolts, and becomes the first duke. Nominos captures the march-land of Rennes. | |
| 843. First expedition of Charles the Bald into Brittany. He is compelled to retreat on account of the severity of the weather. | |
| 845. Charles the Bald undertakes a second expedition, and is defeated at Baldon, the battle lasting two days. | |
| 849. Nominos assumes the title of king, and obtains the golden crown from the Pope. | |
| 850. Charles the Bald enters Brittany for the third time. Nominos, again victorious, dies suddenly. | |
| 851. His son, Herispos, succeeds, and does homage to Charles the Bald. Dissensions arise between France and Brittany, and Charles the Bald invades it for the fourth time. | |
| 852. Charles the Bald's fifth expedition leads to a peace. | |
| 858. The Bretons, incensed at the alliance with the Franks, are induced by Solomon, Herispos's nephew, to revolt, and Herispos is killed in a church. Solomon succeeds. | |
| 861. A portion of Brittany is assigned to Robert-le-Fort, by the great council held at Compiègne. | |
| 874. Solomon is deposed by a cousin and a nephew, who had conspired against him. Solomon is cast into prison, and these relatives, Pasquatin and Gurdard, divide Brittany between them. | |
| 877. Alain, surnamed the Great, obtains the supremacy. | |
| 907. The Danes ravage Brittany, which, divided into four great counties, Rennes, Nantes, Vannes, and Cornouailles, remains for some time in a very distracted state. | |
| 921. Brittany ceded to the Danes by Count Robert. | |
| 922. Rollo's supremacy acknowledged in Brittany. | |
| 931. Sept. 29. The Bretons revolt against the Northmen. | |
| 932. Guillaume Long-épée, having vainly sought to induce the Bretons to return to their allegiance, invades and subdues them. The Channel Islands and other parts of Brittany annexed to Normandy. | |
| 937. Athelstane, king of England, interferes in behalf of Alain, who recovers part of Brittany. Cornouailles is permanently annexed to Normandy. | |
| 938-43. Alain defeats the Northmen at Dôl, St. Brieux, and Nantes, and obtains part of Anjou. | |
| 944. The Danes invade Brittany. Confusion prevails for several years. | |
| 992. Geoffrey I. rules all Brittany, and takes the title of Duke. | |
| 1076. William I. of England invades Brittany, but retires with loss, as the duke is aided by Philip I. of France. | |
| 1148. Three dukes rule in Brittany. | |
| 1182. Marriage of Geoffrey of Anjou, duke of Brittany, with Constance, daughter of Duke Conan. | |
| 1186. Geoffrey is killed at a tournament at Paris. | |

1196. Arthur, posthumous son of Geoffrey and Constance, is acknowledged duke of Brittany.
1203. April 3. Mysterious death of Arthur, at Rouen.
1224. Alliance of France and Brittany against the English.
1237. Abdication of Peter Mauclerc, who is succeeded by John I.
1309. Project to render Brittany subject to England is prevented by the natives.
1341. The duchy of Brittany is disputed by Charles of Blois and John of Montfort, the former being supported by Philip VI. of France, and the latter by Edward III. of England.
1378. Unsuccessful incursions by John of Gaunt, duke of Lancaster.
1395. Oct. 20. Peace in Brittany, after long wars.
1399. Death of John VI., "the Valiant," who is succeeded by his infant son John, under the tutelage of his mother.
1423. Treaty between Brittany and Henry VI. of England, against France.
1426. War declared between England and Brittany.
1449. Alliance between the duke of Brittany and the king of France, who fight in concert against the English.
1450. Francis I. poisons his brother Giles, and dies, soon afterwards, from fear and remorse.
1489. Marriage, by proxy, of Anne of Brittany and Maximilian, king of the Romans.
1491. Charles VIII. of France annuls the marriage between Anne of Brittany and Maximilian, and weds her himself.
1501. Treaty of Trente, whereby Claude, the infant princess of Brittany, is betrothed to Prince Charles of Austria, on the condition that her duchy shall constitute her dowry.
1514. Death of Anne, and marriage of Claude with the duke of Angoulême.
1515. The duke of Angoulême becomes Francis I. of France, and receives the duchy of Brittany from his wife Claude.
1524. Death of Claude, who bequeaths Brittany to the Dauphin.
1532. Brittany is finally added to France.

DUKES OF BRITANNY.

regent	1203	Francis I., king of	
Peter Mauclerc	1213	France and duke	
John I.	1237	of Brittany	1515

Britanny is incorporated with France in 1532.

BRITISH AMERICA.—Sir Walter Raleigh formed a settlement in North America, in 1584, which, in honour of Queen Elizabeth, was called Virginia. It did not, however, succeed, and Sir Francis Drake, who touched therein 1586, brought the colonists to England. Another attempt was made in 1607, when the first permanent settlement of the English in America was formed at James Town in Virginia. Other colonies were speedily established. The inhabitants of Virginia and of other parts of the American continent under English rule, in 1776 declared their indepen-

dence, which was recognized by England in 1782. The British colonies in North and South America are noticed under their various titles.

BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE, instituted by Sir David Brewster, to promote scientific investigation and discovery, held its inaugural meeting at York in September, 1831. The annual meetings have been held at the following places:—

	A.D.		A.D.
Oxford	1832	Oxford	1847
Cambridge	1833	Swansea	1848
Edinburgh	1834	Birmingham	1849
Dublin	1835	Edinburgh	1850
Bristol	1836	Ipswich	1851
Liverpool	1837	Belfast	1852
Newcastle	1838	Hull	1853
Birmingham	1839	Liverpool	1854
Glasgow	1840	Glasgow	1855
Plymouth	1841	Cheltenham	1856
Manchester	1842	Dublin	1857
Cork	1843	Leeds	1858
York	1844	Aberdeen	1859
Cambridge	1845	Oxford	1860
Southampton	1846	Manchester	1861

BRITISH AUXILIARY LEGION.—In June, 1835, the Foreign Enlistment Act was suspended, and a legion formed in this country under the command of General Evans to assist the Queen of Spain in suppressing the Carlist Revolution. The war was waged with great fury, and in June, 1836, General Evans issued a proclamation declaring that every Englishman found fighting on the side of Don Carlos would be put to death as a traitor.

BRITISH BANK (London), was established in 1849, under the act to regulate joint-stock banks (7 & 8 Vict. c. 113), passed in 1844. It stopped payment Sept. 3, 1856, and in consequence of the terrible mismanagement and the malversation of the capital by its directors, the government ordered a criminal prosecution. The trial of eight directors commenced in the Court of Queen's Bench Feb. 13, and terminated with a sentence of guilty Feb. 27, 1858, when Humphrey Brown, Edward Esdaile, and Hugh Innes Cameron were sentenced to one year's, Alderman R. H. Kennedy to nine months', W. D. Owen to six months', and H. D. Macleod to three months' imprisonment. James Stapleton was discharged on the payment of a fine of one shilling, and the eighth defendant, Loran de Wolfe Cochrane, did not surrender. An act (20 & 21 Vict. c. 54) to make better provision for the punishment of frauds committed by trustees, bankers, and other persons intrusted with property, received the royal assent Aug. 17, 1857.

BRITISH CHURCH.—The Gospel was introduced into Britain at a very early period, but whether preached, as some authorities assert, by St. Paul between the years 63 and 66, it is impossible to decide. To St. Peter and Joseph of Arimathea, and to others, the honour of its introduction has been, on different grounds, attributed. Milman says there can be no doubt that during the 2nd and 3rd centuries Britain gradually received the faith of Christ.

The British church is often mentioned by writers of the 2nd and 3rd centuries; and British martyrs suffered under the edicts against the Christians issued by Diocletian in 303. Bede describes the death of Alban, the protomartyr of England, in 304. Julius, Aaron (the names adopted by these early converts at their baptism), and several members of the British church, suffered martyrdom about the same time. Sees were founded in the island, and colleges established. At the councils of Arles, in 314, and of Nicæa, the first general council, in 325, British bishops were present. It was not until the 7th century that Rome attempted to interfere. Gregory I., about the year 597, sent Augustine and a band of monks to bring the British church into subjection to Rome. Ethelbert, king of Kent, was converted, and a struggle between the early British church and Gregory's emissaries at once commenced. Differences existed respecting the time for the celebration of Easter and other points. Augustine peremptorily required the British Christians to conform in every respect to the Latin Church, uttering the remarkable threat that if they refused to comply they should perish at the hands of their enemies. By some authorities Augustine is said to have died in 605, but it seems probable that this event did not take place till later. It is supposed that the massacre of the British monks in Wales, by Ethelfrid, king of Northumbria, in 607, if not perpetrated under his immediate direction, was undertaken at his instigation. Though the emissaries from Rome at length triumphed, yet the more intolerant claims of the papal rulers were rejected by the British people. At the Reformation the entire system was overthrown, and the British church restored to that state of independence and purity in which it had originally existed in these islands.

BRITISH COLUMBIA (North America), formerly New Caledonia, comprises "all such territories within the dominions of her Majesty as are bounded to the south by the frontier of the United States of America, to the east by the main chain of the Rocky Mountains, to the north by Simpson's River and the Finlay branch of the Peace River, and to the west by the Pacific Ocean." Queen Charlotte's Islands and all other islands adjacent, with the exception of Vancouver's Island, are included in this colony, erected by 21 & 22 Vict. c. 99 (Aug. 2, 1858). This portion of America was first discovered by the Spaniards in the 16th century, and was visited by Sir Francis Drake in 1579, and called by him New Albion. The first settlement was formed in 1806. Small quantities of gold were discovered in Queen Charlotte's Island in 1850, and on the mainland in 1853. The intelligence was not, however, made public until June, 1856, when numerous diggers flocked to the country. Gold fields were discovered on the Frazer and Thompson rivers in 1858, and large numbers of the gold-diggers from San Francisco went in that direction during the summer of that year. British Columbia was made a bishop's see in 1858.

BRITISH GUIANA (South America).—Consisting of Berbice, Demerara, and Essequibo, which were formed into one colony in 1831. Stabrock, now called George-Town, on the Demerara, is the capital. Slavery was abolished in 1834, and in 1838 the system of apprenticeship was abandoned. In 1827 this territory was included in the bishopric of Barbadoes and the Leeward Isles. It became an archdeaconry in 1838, and was erected into a bishopric in 1842.

BRITISH INSTITUTION, for the encouragement of British artists, received its charter June 4, 1805, and was opened Jan. 18, 1806. The building was erected by Alderman Boydell, for his gallery of Shakespearian pictures.

BRITISH MUSEUM, was formed of three collections,—the Cottonian, brought together by Sir Robert Cotton in the time of Charles I.; the Harleian, formed by Robert Harley, afterwards Lord Oxford; and the Sloane, collected by Sir Hans Sloane. The Cottonian Library was for some time kept at Cotton House, Westminster, and the statute 12 & 13 Will. III. c. 7 (1700), laid down regulations for its better preservation. The authority for purchasing Cotton House and gardens for £4,500 was given by 5 Anne, c. 30 (1706); and a convenient room for a library was, at the same time, ordered to be built. The death of Sir Hans Sloane, Jan. 11, 1753, and the fact that he had, by a codicil to his will dated July 20, 1749, bequeathed his valuable collection to the nation, on the condition of the payment to his heirs of £20,000, compelled the government to take some decisive step. An act was therefore passed (26 Geo. II. c. 22, 1753), for the purchase of the Sloane Museum on the terms proposed by the will of Sir Hans Sloane; and the Harleian Collection, then offered by the duchess of Portland, a grand-daughter of Lord Oxford's, for £10,000. For these, with the Cottonian collection, and a bequest made by Arthur Edwards, Esq., in his will, dated June 11, 1738, one general repository, within the precincts of London and Westminster, was ordered to be provided. Trustees were appointed, and the powers to raise £300,000 by lottery were granted by the same act. Montague House, Bloomsbury, was purchased for £10,250 of Lord Halifax in 1754, the duke of Montague having died in 1749 without heirs. Arrangements were immediately made for adapting it to the purposes of the new institution.

A.D.

- 1756. Books transferred to Montague House.
- 1757. George II. presents the library collected by his predecessors.
- 1759. Monday, Jan. 15. Reading-room, entrance in Montague Place, opened to the public.
- 1762. A collection of 30,000 tracts and manuscripts, bound up in volumes for the use of Charles I., purchased by George III., and by him presented to the Museum.
- 1772. Mar. 20. Sir W. Hamilton's collection is purchased for £8,410.
- 1801. New rooms are added to receive Egyptian antiquities.
- 1805. The Towney marbles are purchased for £20,000;

- A.D.
 1808. The Lansdowne MSS. are purchased for £4,925.
 1810. A larger room is allotted to readers. The Greville collection of minerals purchased for £13,727.
 1815. The Phigialian marbles are purchased for £19,000.
 1816. The Elgin marbles are purchased for £35,000.
 1818. Dr. Burney's MSS., &c. purchased for £13,500.
 1823. George the Third's library, consisting of 63,000 volumes, said to have cost £130,000, is presented by George IV. to the British Museum. The new building is commenced.
 1845. The old house is removed.
 1846. Right Hon. Thomas Grenville bequeaths his library, consisting of 20,240 volumes, said to have cost above £54,000.
 1847. April 19. Portico finished.
 1854. First grant for new reading-room obtained.
 1855. Jan. The first standard for the new room fixed.
 1857. May 8. New reading-room opened.

BROAD BOTTOM ADMINISTRATION.—Lord Granville having been compelled to retire from the Pelham ministry, Nov. 24, 1744, fresh arrangements were made which resulted in the formation, during the following month, of a coalition between the chiefs of different parties. From this circumstance it was called the Broad Bottom Administration.

First Lord of the Treasury and Chancellor of the Exchequer	The Hon. Henry Pelham.
Lord Chancellor	Lord Hardwicke.
President of the Council ..	Duke of Dorset.
Privy Seal	Earl Gower.
Secretaries of State	Duke of Newcastle and Lord Harrington.
Admiralty	Duke of Bedford.
Master of the Ordnance ..	Duke of Montague.
Master of the Horse	Duke of Richmond.
Lord Chamberlain	Duke of Grafton.
Lord Keeper, Scotland	Duke of Argyll.
Sec. of State ..	Marquis of Tweeddale, resigned in 1746.

This administration, with the exception of an interval of two days, Feb. 11 and 12, 1746 (*See LONG-LIVED ADMINISTRATION*), remained in power until the death of the Hon. H. Pelham, March 6, 1754. The following are the principal changes that ensued during the period:—the earl of Chesterfield replaced Lord Harrington, who resigned the secretaryship of state, Oct. 29, 1746. Chesterfield, who resigned Feb. 6, 1748, was replaced by the duke of Bedford Feb. 13, the earl of Sandwich having taken the Admiralty Feb. 10. The earl of Holderness superseded the duke of Bedford June 21, 1751. Earl Granville became president of the council June 17, 1751. The duke of Richmond was replaced as master of the horse by the marquis of Hartington in 1751. Lord Anson took the Admiralty, vacated by the earl of Sandwich, June 22, 1751. (*See NEWCASTLE & PITT [CHATHAM] ADMINISTRATION.*)

BROKER.—Regulations for the city of London, passed in 1286, ordered that brokers should be admitted and sworn before the warden or mayor, and aldermen. Persons acting in defiance of this law were to be arrested and imprisoned, and were for ever inadmissible to the franchise. A parliament

held by Edward III., in 1376, ordained that "no stranger, merchant, nor other stranger, should use or exercise the occupation of 'brocage,' between merchant and merchant, or other persons, nor be a 'brocours' within the city of London or its suburbs;" and a petition was, in 1442, presented to Parliament demanding the enforcement of that law. They were called "broggers" in a statute of 10 Rich. II. (1386); and in 1574 Stow says there were but thirty of them in London.

BROMINE.—This elementary fluid body was discovered by Balard, a French chemist, in 1826.

BROMSEBRO, or BROEMSEBROE (Treaty).—This peace between Sweden and Denmark was concluded in 1644.

BRONZE.—Works in bronze were known in very ancient times; and the Israelites, at the time of their escape from Egypt, B.C. 1491, had made some progress in the art, as we learn from Exod. xxx. 18; xxxi. 4; and xxxii. 2—4. It was improved by the Greeks and Romans, and revived in Italy about the 14th century. Bronze casting had almost reached perfection amongst the Greeks about B.C. 330.

BROOKS'S CLUB.—This Whig Club, named after Brooks, a wine merchant and money lender, was established in Pall Mall in 1764, and was transferred to the new building in St. James's Street in Oct. 1778. The British Institution occupies the site of the original club-house in Pall Mall.

BROOM FLOWER IN THE HUSK.—This order of knighthood was instituted at Sens by Louis IX., on his marriage with Margaret, eldest daughter of Raymond Berengarius, count of Provence, in 1234. It became extinct during the 15th century.

BROWNISTS, or BARROWISTS.—The followers of Robert Browne, an ultra Puritan, born about 1550, who denounced the discipline and ceremonies of the Church of England, and having been imprisoned for a short time on account of his extreme views, quitted England, and formed a church at Middleburg in Zealand. In 1589 he returned to England, sought re-admission to the Church, and in 1590 received the rectory of Achurch, in Northamptonshire. He is said to have died in 1630,* in the prison of Northampton, in which he had been confined for striking a constable. On his deathbed he boasted of having been an inmate of thirty-two prisons. Landon says the Brownists "held all church officers and ministers to be unchristian and unlawful; that the evil of the minister does away with the efficacy of the sacrament; that marriage is but a civil contract; that all forms of prayer are unlawful, and that even the Lord's Prayer is to be used only as a model for extempore prayer; that by communicating with the wicked at the Eucharist the good become partakers in their wickedness; and that salvation was to be obtained only in their

* This date is not correct, as the parish registers of Achurch contain an entry in his handwriting dated May 21, 1631.—N. & Q.

sect." They were severely dealt with by the law. Elias Thacker was hanged June 4, 1583, and John Coping June 6, for distributing Browne's libels against the book of Common Prayer. Henry Barrow, John Greenwood, and Henry Penny were executed, the two former April 6, and the latter May 29, 1593. From Henry Barrow these sectarians received the name of Barrowists. They were condemned by the synod of London in 1640, and afterwards took the name of Independents. Sir Walter Raleigh, in 1592, stated that there were 20,000 Brownists.

BRUGES (Belgium), ranked as a city in the 7th century, and was celebrated in the time of Charlemagne for its industrial productions. Bruges was fortified A.D. 837, walls were erected in 1052, and extended in 1270. The counts of Flanders, who resided at Bruges, obtained the rule in the 9th century. It became a member of the Hanseatic league in 1300, and passed under the sway of the dukes of Burgundy in the 14th century. It suffered from the ravages of fire in 1184, 1215, and 1230. During the 15th and 16th centuries it attained the highest prosperity as an emporium of trade, and in 1430 Philip the Good, duke of Burgundy, instituted the order of the Golden Fleece, in commemoration of its celebrated woollen manufactures. Bruges passed to the Habsburg family in 1477, and the citizens rebelled against the archduke Maximilian, and imprisoned him in 1489. During the religious struggles it surrendered to Spain, May 20, 1584. The Dutch bombarded Bruges without success in 1704; and it surrendered to the allied army in 1706, after the victory at Ramilles. The French took it by surprise July 5, 1708, and retired in 1709. The English took it in 1712, and the French again in 1745, and again in 1792. They were, however, expelled, but regained possession in 1794, and the inhabitants formally acknowledged the sovereignty of the French republic June 24. It was restored to the Netherlands in 1814, and has formed part of Belgium since 1830. Bruges was made a bishopric in 1561, and was united to Ghent in 1801. Wycliffe, as second in a commission, was sent, in 1375, by Edward III., to treat with the papal legate at Bruges, respecting the questions at issue between the king and Gregory XI. Wycliffe remained at this place from July 27 to Sept. 14. Wolsey concluded a treaty here, called the treaty of Bruges or Windsor, because concluded at the former place, Nov. 24, 1521, and ratified at the last-mentioned by Henry VIII. and Charles V. in June, 1522. The town-hall at Bruges dates from 1377.

BRUNANBURG (Battle).—According to the best received account, Anlaf, the pagan king of the Irish, incited by Constantine, king of Scotland, sailed up the river Humber, with an immense fleet, 615 in number; and having landed, was, with his army, encountered by Athelstan, who defeated him with terrible loss. The contest is said to have lasted from daybreak to dusk, and in no previous battle in England had so much blood been shed.

It has been called the Waterloo of the Anglo-Saxons. The chronicles differ respecting the locality and the date of this battle. It probably took place somewhere in the immediate neighbourhood of the Humber, and about the year 937.

BRÜNN (Moravia).—This town, made the capital of Moravia in 1641, and besieged by Torstenson in 1645, was entered by Napoleon I. Nov. 20, 1805, and became his head-quarters. It is the seat of a bishop.

BRUNSWICK (Battle).—Otho of Brunswick, and Philip, duke of Swabia, were competitors for the imperial crown of Germany, and the former, besieged in Brunswick by Philip, made a sortie in July, 1200. This brought on an engagement, in which Philip's army was defeated.

BRUNSWICK (Germany), formed part of Saxony during the reign of Charlemagne, and was made a separate lordship A.D. 955. It was inherited by Henry the Proud, duke of Bavaria, in 1126. One of his successors, Henry the Lion, was, in 1180, for his refusal to aid the emperor in the war against the pope, deprived of all his possessions, except Brunswick. In 1235, Otho, surnamed the Child, was made first duke of Brunswick-Lüneburg, by the emperor Frederick II. Various changes ensued, and in 1542, the duchy was divided into the modern duchies of Brunswick-Lüneburg and Brunswick-Wolfenbüttel.

BRUNSWICK (City), formerly called Bruno Vicus, was founded by Bruno, duke of Ostfalia, A.D. 868. It was beautified and extended by Henry the Lion in the 12th century, and became one of the chief cities of the Hanseatic League in the 13th. Its annual fair, that afterwards became celebrated, was established in 1498. It suffered in various German wars, and was taken by the French July 28, 1757. They evacuated it early in 1758, and its fortifications were destroyed in 1794.

BRUNSWICK (House of).—The various branches of this family are derived from Albert Azzo I., margrave of Este, in the 10th century. His great grandson, Albert Azzo II., married Cunegonda, and their son, Guelph IV., inherited the dukedom of Bavaria in 1071, and founded the junior branch of the Guelph family, from which the Brunswick House trace their descent. Otho was recognised as first duke of Brunswick in 1235.

BRUNSWICK CLUBS were Orange societies, formed in Ireland, in support of the principles of the revolution of 1689, and against Roman Catholic emancipation. The proposal for the establishment of these associations was made Aug. 28, 1828, at a meeting of the Dublin members of the grand Orange club that had then been recently suppressed; and the first general meeting was held in the Dublin Rotunda Nov. 4 in the same year. Similar clubs were formed in other parts of Ireland. A meeting of Yeomanry was held on Pennenden Heath, Kent, Oct. 24, 1828, for the purpose of petitioning the House of

Commons to preserve the Protestant constitution inviolate. Brunswick clubs were also formed in Leeds, Leicester, and other parts of England.

BRUNSWICK-LÜNEBURG.—The modern duchy of Brunswick-Lüneburg was founded by William, the second son of Ernest I., who on the death of his father, in 1546, took this portion of his dominions, with the title of duke of Hanover. Ernest Augustus, one of his descendants, was made ninth elector of the empire in 1692. His son, George Lewis, descended from James I. of England, on the female side, became king of England under the title of George I., Aug. 1, 1714. (*See HANOVER.*)

BRUNSWICK THEATRE was built in 1827, on the site of the old Royalty Theatre, burnt down in 1826. The Brunswick theatre fell during a rehearsal of "Guy Mannering," Feb. 29, 1828, when twelve persons were killed, and several houses on the opposite side of the street destroyed. It had only been opened on the 25th.

BRUNSWICK-WOLFENBÜTTEL.—The modern duchy of Brunswick-Wolfenbüttel was founded by Henry II., eldest son of Ernest I., in 1546. Several of its dukes distinguished themselves in the continental wars of the last century, and Charles William Ferdinand, who succeeded in 1780, led the Prussian army against the French at Jena, Oct. 13, 1806, and having been wounded in that battle, died on the 10th of November, 1807. All the Brunswick possessions were seized by the French after the victory at Jena, and by the 8th article of the treaty of peace between France and Prussia, signed at Tilsit July 9, 1807, incorporated with the new kingdom of Westphalia, conferred upon Jerome Bonaparte. They were, however, recovered by Frederick William, son of Charles William Ferdinand, in December, 1813. Representative institutions were introduced in 1820. The then reigning duke was expelled and took refuge in England Sept. 6, 1830, and his brother, Augustus Lewis William, assumed the sovereignty April 23, 1831.

BRUSA (Asia Minor), or BOURSÆ.—The ancient Prusa was made the capital of the Turkish dominions in the 14th century; and although the sultans transferred their residence to Hadrianople about 1430, Prusa continued to be the Turkish capital until the capture of Constantinople, in 1453. Abdel-Kadir took up his residence here in 1852; but on its destruction by an earthquake, Feb. 28, 1855, he obtained permission from the French government to remove to Constantinople.

BRUSSELS (Belgium).—St. Géry, bishop of Cambray, built a chapel on one of the islands in the river Senne, in the 7th century. A large congregation was attracted by his eloquence, houses were built near his place of worship, and the town of Brussels was gradually formed. The Emperor Otho dates a decree, "*apud Brusolam*," A.D. 976. Walls with seven gates were formed round the town in 1044.

A.D.

1010. Cathedral of St. Gudule founded. (Some authorities give a different date.)
1213. Brussels is taken by the English.
1273. St. Gudule is completed.
1300. The Old Palace is founded.
1314. Brussels is visited by the plague.
1346. The Museum is commenced.
1369. The walls are removed, and the city is enlarged.
1370. The Jews are banished.
1380. Second wall is built.
1401. Town-hall commenced.
1405. A large portion of the town is destroyed by fire.
1442. The Town-hall is completed.
1488. Taken by Philip of Cleves.
1489. The plague commits great ravages.
1507. Brussels becomes the seat of government for the Low Countries.
1518. The towers are added to the cathedral.
1567. Alva attempts to establish the Inquisition. 10,000 artisans quit Brussels.
1568. Egmont and Horn are beheaded in the marketplace, by order of Alva.
1578. The plague rages with great fury.
1695. Villeroi bombards the city, destroying a considerable portion.
1701. Brussels is captured by the French.
1706. Oct. 12. Marlborough enters Brussels, after his victory at Blenheim.
1708. Nov. 22. Assailed by the elector of Bavaria. Marlborough comes to its relief, and enters Nov. 29.
1746. The Old Palace is rebuilt. Marshal Saxe takes Brussels Feb. 16.
1748. Restored to Austria by the peace of Aix-la-Chapelle.
1749. The Museum is extended.
1790. Nov. The Austrians regain possession of Brussels, which had revolted.
1792. Nov. 14. Dumouriez takes the city.
1794. Dumouriez, having been driven out, regains possession.
1803. July 21. Napoleon I. makes a triumphal entry.
1814. Feb. 1. The Prussians enter Brussels. It becomes one of the capitals of the Netherlands.
1830. Sept. 23. Revolution. Brussels made the capital of the new kingdom of Belgium.
1831. June 4. The National Congress at Brussels elects Leopold king.
1834. University founded.
1848. Peace Congress assembles here.
1853. A Statistical Congress assembles at Brussels.
1859. Aug. 31. The Assembly of Deputies, by a majority of twenty, pronounces in favour of the fortification of Antwerp. The proposal is adopted by the Senate Sept. 6, and receives the royal assent Sept. 8.

BUBBLE ACT, passed in 1719 (6 Geo. I. c. 18), in order to punish unprincipled adventurers who proposed schemes merely as baits to extract money from the thoughtless. "The whole nation," says Tindal, "was become stock-jobbers. The South Sea scheme was like an infectious distemper, which spread itself in an astonishing manner. Every evening produced new projects, which were justly called Bubbles, and new companies appeared every day." The king issued a proclamation against them June 11, 1720. The act was repealed by 6 Geo. IV. c. 91, July 5, 1825.

BUCANERS.—The term *boucan* was applied by the Caribbees to the flesh of cattle or fish dried in the sun. They taught this mode of curing to the early French settlers in Hayti or St. Domingo, and they were called boucaniers, or bucaniers, because

they hunted wild boars and buffaloes, and preserved their flesh after this peculiar method. The term was afterwards applied to those bold and hardy adventurers, whether English, French, or Dutch, who assailed the Spanish settlements in America. On the failure of Dudley's conspiracy against Queen Mary, several of the confederates sought refuge at the court of Henry II. of France, who furnished them, in August, 1556, with three or four ships, in which they sailed with the avowed object of waging war against all Spaniards. Other expeditions were fitted out. The island of St. Christopher was taken in 1625, and the little island of Tortuga, to the north of Hispaniola, in 1629. Here they carried on their piratical warfare, under various celebrated commanders. The Spaniards captured Tortuga in 1638, and the bucaniers regained possession in the following year. In 1603 the Dutch pirate, Van Horn, sailed at the head of 1,200 bucaniers, and took Vera Cruz. Morgan captured Panama in 1664; Grammont took Campeachy in 1685; and in 1697, Pointis seized Carthagena, and gained booty to the amount of £1,750,000. A treaty called the treaty of America, for the entire suppression of this warfare, was concluded between Great Britain and Spain in 1670; but it was not until a few years after the peace of Ryswick, in 1697, that the bucanier confederacy was broken up.

BUCEPHALA (India).—This town, on the western bank of the Hydaspes, was founded by Alexander, at the spot where he had crossed the river to attack Porus, an Indian king, whom he defeated B.C. 327. It was built in memory of his famous charger, "Bucephalus," which expired in the hour of victory. Jelum, in the Punjaub, is supposed to occupy its site.

BUCHANITES.—This Scotch sect sprang up in Irvine, in 1783. They were the followers of one Mrs. Elspeth Buchan, whose maiden name was Simpson, a woman of indifferent character. In conjunction with Hugh White, minister of the Relief congregation of Irvine, she attempted to gain converts; but an outbreak occurred, and they were both driven from the town in May, 1784. She was addressed "Friend Mother in the Lord," personified the woman mentioned in Rev. xii. 1, and pretended that Hugh White was her son (Rev. xii. 5). She promised her followers bodily translation to heaven; and on one occasion, after a long fast, led them to the top of a hill for that purpose. They retired to a place near Dumfries, where Mrs. Buchan died in May, 1791. On her deathbed she declared she had a secret to communicate, which was to the effect that she was the Virgin Mary. The last member of this fanatical sect is said to have died in 1846.

BUCHAREST (Wallachia) was captured by the Russians in 1769, and by the Austrians in 1789. The Russians occupied Bucharest in July, 1853, but quitted it on the 25th of the same month. The Turks regained pos-

session Aug. 8, and were followed by the Austrians Sept. 6, in the same year. The Austrian occupation terminated in 1856. By the treaty of Bucharest, concluded between Turkey and Russia at this place May 28, 1812, the former ceded Bessarabia to Russia, and thus the frontier of the last-mentioned power was extended to the Pruth. The Czar agreed to restore Anapa and other places in Asia to the sultan; but this part of the treaty was not fulfilled; and soon after Russia had recovered from the disastrous effects of the French invasion, she again made war upon Turkey.

BUCKINGHAM PALACE.—Is erected on the site of Buckingham House, so called from John Sheffield, marquis of Normanby, made duke of Normanby March 9, and duke of the county of Buckingham, March 23, 1703. Old Buckingham House was erected by him in 1703. The government purchased it in 1761 for Queen Charlotte, upon whom it was settled by George III., in case she should survive him. Hence it was called the Queen's House, and here nearly all her children were born. The new palace was commenced in 1825, and after undergoing various alterations, Queen Victoria took possession of it July 13, 1837. It cost nearly £1,000,000 sterling. Old Buckingham House occupied a portion of the mulberry garden, at which Evelyn relates that Lady Gerrard treated him and some others, May 10, 1654.

BUDA (Hungary), or **OFEN**, the ancient **Acincum**, held by the Romans till about the 4th century. Arpad made it the residence of the Magyar chieftains about A.D. 900. The modern city was founded in 1240, and became the capital of Hungary in the 14th century. Soliman II. captured it in 1526, and in 1529. The Turks sacked it in 1541, and it was considered the key of the Ottoman empire until 1686, when it was wrested from them by the Austrians, under the duke of Lorraine, after having been in their possession 145 years. Its university was founded by Martin Corvinus between the years 1470—1490, and its library was destroyed by the Turks in 1527. Buda, seated on the Danube, is connected with Pesth by a bridge of boats. A council held here Sept. 14, 1279, ordered sixty-nine canons for the regulation of the Church of Hungary to be promulgated. Another council was held at Buda May 7, 1309. The Austrian army took Buda from the Hungarians Jan. 5, 1849.

BUDDHISM, long the prevailing religion in India, was, according to Sir William Jones, introduced into that country about 1,000 years before Christ; though later authorities are inclined to accept the traditional account of its introduction by Gautama, or Godama, about B.C. 500. A feud arose between the Buddhists and the Brahmins, and the former were expelled from the greater part of Hindostan, though Buddhism is still the prevailing religion in China, Japan, Ceylon, and other parts of Asia.

BUENOS AYRES (South America).—This province threw off the Spanish yoke in 1810,

and with other South American states issued a declaration of independence, July, 1816, and formed themselves into the Argentine Confederation. A treaty of commerce between England and Buenos Ayres was signed Feb. 2, 1825. It separated from the Argentine Confederation, and became an independent state in 1853.

BUENOS AYRES.—This city, the capital of the state of the same name, was founded by Don Pedro de Mendoza in 1534, but was abandoned, owing to the attacks of the Indians, in 1539; and was not permanently colonized by the Spaniards until 1580.

A.D.

1620. Buenos Ayres the capital of Río de la Plata, is made the seat of a bishopric by Paul V.

1763. Jan. 1. An English and Portuguese expedition fail in an attack upon the city.

1775. Is made the seat of a viceroyalty.

1778. The river thrown open by Spain.

1806. June 27. Taken by the English, and a large amount of treasure secured. The Spaniards regain possession Aug. 12, and the English Oct. 22.

1807. July 5. The English fail in an attempt to capture Buenos Ayres.

1827-8. Is blockaded by the Brazilian fleet.

1859. Oct. 23. Indecisive battle between the forces of the Argentine Republic and of Buenos Ayres. Nov. 10. A treaty signed, by which Buenos Ayres again joins the Argentine Confederation.

1860. June 6. The act of union between the Argentine Confederation and Buenos Ayres signed and ratified.

BUFFALO TOWN (United States).—This town, and part of the enemy's squadron, with stores, were destroyed by the English army, after the defeat of the Americans at Black Rock (q.v.) Dec. 30, 1813.

BULGARIA (East Turkey), the ancient *Moesia Inferior*, was invaded by the Bulgarians in the 7th century, and named after them Bulgaria. The first kingdom lasted from A.D. 640 to 1018, when it was subjected to the Greek empire by Basil II. The second, established about 1186, was annexed to the Ottoman empire in 1396.

A.D.

559. The Bulgarians, under Zabergan, invade Macedonia and Thrace, but are repulsed by Belisarius.

678. The Bulgarians, led by Asparuch, conquer the country between the Hæmus and the Danube.

788. The Bulgarians defeat the general of Thrace.

792. Cardam, king of the Bulgarians, defeats Constantine VI.

811. July 25. Crumm, king of the Bulgarians, defeats and slays the Emperor Nicephorus.

813. Battle of Bersinikia, in which the emperor Michael I. is defeated by Crumm.

814. The Emperor Leo defeats and annihilates an army of 30,000 Bulgarians.

861. Michael and Bardas defeat the Bulgarians, whose king becomes a Christian.

885. Bogoris, or Michael, first Christian king of Bulgaria, abdicates and retires to a monastery.

893. The Bulgarians defeat the Byzantine general, Leo Hatakalon.

917. Aug. 20. Battle of Achelons, in which the Bulgarians defeat the Byzantine army.

921. Simeon, king of Bulgaria, defeats the Byzantine forces, and plunders Constantinople.

A.D.

923. The Emperor Romanus purchases peace from Simeon on the most humiliating terms.

981. The emperor Basil II. invades Bulgaria. He is driven back, with great loss, by King Samuel.

996. Samuel invades Greece. His army is totally routed, and he himself escapes with difficulty.

1014. July 29. Basil II. defeats the Bulgarians, and takes 15,000 prisoners, whose eyes he puts out. Samuel dies of grief.

1018. Death of Ladislaus, last king of Bulgaria, whose territory becomes a province of the Byzantine empire.

1040. The Bulgarians revolt, and invade, and render themselves masters of, Western Greece.

1186. The Bulgarians revolt from the Byzantine yoke, and establish a second monarchy.

1285. Bulgaria is overrun by the Tartars.

1330. Is made subject to Servia.

1363. Invaded by Amurath I.

1396. The Sultan Bajaset conquers Bulgaria, and unites it to the Ottoman empire.

BULJANAK (Crimea).—A skirmish took place near this river, between 15,000 Cossacks and 500 British horse, Sept 19, 1854. The former, having lost a few men, withdrew.

BULL.—This term, derived from the word *bulia*, a seal, was first applied to deeds, ecclesiastical as well as regal. Subsequently it was used to denote a papal edict, or rescript, written upon parchment, bearing a leaden seal, and issued by order of the pope from the Roman chancery. The seals varied in form until 1088, when one side was impressed with the heads of Peter and Paul, the reverse bearing the name of the pope and the year of his pontificate. Vigilius, in the 6th century, introduced the date of the regnal years of the emperors into bulls, and this custom was continued till the middle of the 11th century. In bulls of grace or favour the lead is attached by silken (red or yellow), and in those of punishment by hempen cords. Pius V. published a bull against Elizabeth, April 25, 1570. Fenton, who posted a copy of it on the gate of the bishop of London's

palace May 24, was taken and executed Aug. 8. By 13 Eliz. c. 2 (1570), bringing bulls in, or putting them into execution, was made high treason, for which the penalty was death and forfeiture of property. The bull in *Cand Domini*, excommunicating heretics and opponents of the papacy, was read in the pope's presence every Maundy Thursday, until the time of Clement XIV. According to the ancient mode of pronouncing the sentence of excommunication, the pope, after the reading of the bull, threw a lighted torch into the public place. It was declared void by the council of Tours Sept. 1510. Brief is the term applied to papal acts sealed with wax.

BULL-BAITING was a favourite amusement amongst the Egyptians, the Greeks, the Romans, and other ancient nations, and was frequently practised in this country during the Middle Ages, and even to a comparatively recent period. Fitzstephen, the monk of Canterbury, in his description of London in the 12th century, speaks of bull-baiting as then common; and Henzel, who visited England in 1598, gives a description of the sport. Evelyn mentions a visit he paid to the bear-garden June 16, 1670, when one of the bulls tossed a dog into the lap of a lady sitting in the boxes: he calls it "a rude and dirty pastime." The following occurs in an advertisement dated 1719:—"This is to give notice to all gentlemen, gamesters, and others, that on this present Monday is a match to be fought by two dogs at a bull, for a guinea, to be spent; which goes fairest and farthest in wins all. Likewise a green bull to be baited which was never baited before; and a bull to be turned loose with fireworks all over him." A bill for its suppression was introduced into the House of Commons April 3, 1800. Mr. Windham opposed the measure, declaring that it had existed more than one thousand years, and that it was a manly amusement. Mr. Canning contended that the amusement was a most excellent one; it inspired courage and produced a nobleness of sentiment and an elevation of mind. The bill was rejected by a small majority, and though a similar attempt in 1802 failed, bull-baiting has since been declared illegal, and by the act against cruelty to animals (5 & 6 Will. IV. c. 59, Sept. 9, 1835), persons keeping places for bull-baiting incur a penalty. The Stamford Bull-running, which took place annually on the 13th of November, was in 1825 postponed till the next day, because the 13th fell on a Sunday. Bull fights are said to have been introduced into Spain by the Moors, and they still form a favourite sport with the vulgar in that country. Isabella, in the 15th century, vainly endeavoured to abolish them.

BULWER-CLAYTON TREATY, between England and the United States, relative to the establishment of a communication by ship canal between the Atlantic and Pacific Oceans, was signed at Washington April 19, and ratifications were exchanged there July 4, 1850. It consisted of nine articles. The contracting

parties declared that they would not erect fortifications on the banks or in the vicinity of the proposed canal, and that they would not assume dominion over Nicaragua, Costa Rica, the Mosquito Coast, or any part of Central America. Opposite and contradictory constructions having been placed upon this treaty by England and the United States, another, called the Clarendon Dallas Treaty, was, after various negotiations, signed at London, Oct. 17, 1856, but objections having been raised to it on both sides of the Atlantic, it was ultimately rejected, and the President, in his message for the year 1857, recommended the abrogation of the Bulwer-Clayton Treaty as the best method of solving the difficulty.

BUNDELCUND (Hindustan).—This extensive province, consisting of thirty-three states, five of which are tributary, attained great power, under a native dynasty, in the 11th century. Their rule was, however, subverted by the Delhi princes in 1183, and for a long period the country remained in a very unsettled state. By the treaty of Bassein, Dec. 31, 1802, a portion of the province was ceded to the East-India Company. Owing to the refractory conduct of certain chiefs, military expeditions were sent into portions of Bundelcund, and in the treaty of Poonah, July 5, 1817, the articles of the treaty of Bassein were explained and amended; certain provisions being added calculated to prevent the recurrence of such disastrous outbreaks.

BUNKER'S HILL (Battle).—The revolted Americans having thrown up batteries and erected a formidable redoubt on Bunker's or Breed's Hill, an eminence that commanded the harbour of Charlestown, were attacked in this position by the English, June 17, 1775. The latter amounted to 2,000, whilst the batteries and redoubt were defended by 5,000 men. In their advance the assailants suffered severely from sharpshooters, posted in the houses of Charlestown. In spite of every obstacle the English had almost reached the works, when a terrific fire was opened upon them. General Howe was for a few seconds left almost alone, several of the officers near having been either killed or wounded. The troops, however, rallied from the confusion into which they had been thrown, and carried the works at the point of the bayonet. In this brilliant action 226 officers and men were killed, and 828 wounded. The American loss, according to their own representation, amounted to 450 killed, wounded, and missing, but it is believed to have been much greater.

BURFORD (Battles).—Near this town, in Oxfordshire, Cathred, king of Wessex, defeated Ethelbald, king of the Mercians, A.D. 752. Fairfax defeated the Royalist army here in 1649.

BURFORD CLUB.—In 1722 Christopher Lyster, a barrister, was convicted of high treason, for having compassed the death of the king, and was executed at Tyburn May 17, 1723, after having been respited several times.

He was an agent of the Pretender, and in the papers connected with the plot frequent mention appeared of Burford's Club. Being called upon to explain the meaning, Laver declared it to be an appellation made use of by the Pretender and his agents to denote a club of Tory lords and others, of which association Lord Orrery was declared to be chairman. Earl Cowper, one of the lords mentioned as being a member, made a declaration, March 20, 1722, to the effect that he had never heard of such a club, and that three out of the six commoners named as being members, he did not know even by sight. A committee of the House of Commons, appointed to examine Laver, declared in their report that "the matters asserted of Burford's Club in Plunket's Letters, seem utterly inconsistent with the known characters of some of those persons."

BURGHERS, ANTI-BURGHERS, and BURGHES SECEDEERS.—These terms are applied in ecclesiastical history to the parties that grew out of the schism in the Scottish church, caused by the induction of a pastor to the parish of Kinross, in direct opposition to the wishes of the congregation. After much discussion, eight ministers protested against this procedure, for which they were deprived, and their parishes declared vacant in 1740. Their congregations adhered to them, and so powerful did they become, that, in 1745, they formed themselves into a synod, consisting of three presbyteries. An inquiry which they instituted into the lawfulness of certain oaths, led to a further division amongst them, the subject being the particular oath administered in royal burghs when persons were admitted to the privileges of a burghess. The Burghers maintained that it was lawful to take the oath in question, whilst their opponents, the Anti-burghers, took a different view, and in 1746 carried a vote condemning the oath. In 1747 the Burghers mustered in great strength, whereupon the Anti-burghers withdrew, and formed a synod of their own. The rival persuasions were, after a long period of hostility and opposition, reunited in 1820, under the name of the United Associate Synod of the Secession Church.

BURGOS (Spain).—The capital of the ancient province of Burgos was founded by Diego Porcelos, A.D. 884. The Cid was buried in this city in 1099. The bishopric of Oca or Auca was transferred to Burgos in 1077. It was made an archbishopric by Gregory XIII., Oct. 22, 1574. The cathedral was founded in 1221, and completed in 1567. Councils were held at Burgos in 1080, and in October, 1136. In the 15th century Burgos was made a royal residence. Charles V. transferred the court to Madrid in the 16th century, and from that time Burgos gradually declined. Wellington besieged it, and carried some of the works Sept. 19, 1812, but failed in an attempt to carry it by storm Oct. 18 in the same year. The French blew up the castle and retired, June 12, 1813.

BURGUNDIAN CROSS.—This order of knighthood was instituted at Tunis, by the

emperor Charles V., on the feast of St. Mary Magdalen, July 22, 1535.

BURGUNDY (Kingdoms of).—The Burgundiones, a Vandal tribe, established themselves in the southern portion of Gaul about A.D. 406; and from them the country received its name. They succeeded in forming a kingdom, which, says Gibbon (ch. xxxviii.), "was defined by the course of two Gallic rivers, the Soane and the Rhine, extended from the forest of Vosges to the Alps and the sea of Marseilles." It was finally conquered by the Franks in 532. A second kingdom of Burgundy was established by Rodolph I. in 887. It consisted of nearly the same territories as the first, under Rodolph II., in 933, and was ceded to the empire by the will of Rodolph III., who died in 1032.

FIRST KINGDOM OF BURGUNDY.

A.D.

- 413. Gundicar, king of the Burgundians, receives a grant of land from Jovinus, and permanently settles in Gaul.
- 435. The Burgundians are defeated by Aetius, and the country is invaded by the Huns.
- 491. Gondebaud murders his brother Chilperic, and seizes his kingdom.
- 500. Gondebaud is defeated by Clovis I., king of the Franks.
- 523. Sigismund, king of Burgundy, is made prisoner, and put to death by the Franks.
- 532. Clotaire and Childebert make war on Burgundy.
- 534. Clotaire and Childebert conquer Burgundy, and render it subject to the Franks.

For second kingdom of Burgundy, *see* ARLES.

BURGUNDY (Duchy), or BURGUNDY PROPER, was created into a duchy during the reign of Charles the Bald, and assigned to his son-in-law, Richard le Justicier, at the council of Quiercy, or Kiersy, June 14-16, 877 A.D. It underwent several changes, and was ultimately incorporated with France.

A.D.

- 877. Burgundy is erected into a duchy by Louis the Stammerer.
- 923. Rodolph, duke of Burgundy, is elected king of France, and resigns his duchy to Giselbert.
- 938. Hugh the Great, count of Paris, and Hugh the Black, rule Burgundy between them.
- 943. Hugh the Great sole duke of Burgundy.
- 956. Death of Hugh the Great, who is succeeded by his son Otho.
- 987. Henry the Great is confirmed in his title of duke of Burgundy, with sovereign rights, by Hugh Capet.
- 1002. Death of Henry, whose duchy is claimed by Robert of France and two other competitors.
- 1015. Henry II., son of King Robert, becomes duke of Burgundy.
- 1032. Henry, having become king of France the preceding year, makes his brother Robert duke of Normandy. With him begins a long succession of dukes.

- A.D.
 1361. Death of Philip I., duke of Burgundy, with whom terminates the first succession of dukes. John, king of France, unites Burgundy to his own dominions.
 1363. John gives Burgundy to his son, Philip the Bold, with whom commences the second duchy.
 1364. John, king of France, erects Burgundy into a duchy, and bestows it upon his son Philip.
 1369. Marriage between Philip of Burgundy and Margaret of Flanders.
 1384. Philip inherits Flanders, Artois, Rhétel, Nevers, and other territories.
 1407. John the Fearless causes the assassination of the duke of Orleans, and is compelled to seek safety in flight.
 1416. Secret treaty between John the Fearless and Henry V. of England.
 1419. John the Fearless is assassinated at Montreuil, by the Orleanists.
 1420. Philip the Good enters into an alliance with Henry V., and sanctions the treaty of Troyes.
 1430. Acquisition of Brabant.
 1435. Philip of Burgundy withdraws from his alliance with the English, and enters into a league with France.
 1443. Acquisition of Luxembourg.
 1468. July 2. Marriage of Charles the Bold and Margaret, sister to Edward IV. of England.
 1472. Charles invades France, ravages Normandy, and adds Guelders to his dominions.
 1476. Charles invades Switzerland, where he is defeated.
 1477. Jan. 4. Death of Charles, at the battle of Nancy, fought against the Swiss. Louis XI. seizes part of the duchy. Mary, daughter of Charles, succeeds him, and marries Maximilian of Austria the same year, Aug. 19.
 1479. Louis XI. of France seizes Burgundy, and annexes it to France.
 1482. Mar. 27. Death of Mary of Burgundy, in consequence of a fall from her horse.
 1482. Dec. 23. Treaty of Arras, between Louis XI. and Maximilian of Austria, for the settlement of the dispute respecting Burgundy. Margaret of Austria affianced to the Dauphin.

BURIAL is the most ancient mode of disposing of the dead. Abraham buried his wife Sarah in the cave of Machpelah, B.C. 1859 (Gen. xxiii.). It was practised amongst ancient nations; although burning of the dead was at one period common amongst the Greeks and Romans. Burial in woollen material only was ordered by 18 Chas. II. c. 4 (1666). This statute was repealed by 30 Chas. II. st. 1, c. 3 (1677), which enforced new regulations, and inflicted a penalty of five pounds in every case where a person was not buried in stuff

made from sheep's wool only. Registers of burials were ordered to be kept in every parish. Further regulations were made by 32 Chas. II. c. 1 (1680). These acts were repealed by 54 Geo. III. c. 108 (July 23, 1814). A tax of four shillings on each person on burials, to last five years from May 1, 1695, was imposed by 7 & 8 Will. III. c. 6 (1694). It was continued till Aug. 1, 1706, by 8 & 9 Will. III. c. 20, s. 14 (1697). In addition to the four shillings, a regular scale was imposed on the different ranks between a duke and person possessing real property of £50 per annum, or personal property of £600. The burial of a duke was taxed at £50, that of the lowest in the scale 10s.

BURIAL CLUBS, on the principle of friendly societies, were introduced into this country during the first half of the 19th century. It would appear that this is merely the revival of an ancient institution. Miller states (Anglo-Saxons, p. 363):—"The Saxons had also guilds or clubs, in which the artisans, or such as seem to have consisted of the middle classes, subscribed for the burial of a member, and a fine was inflicted upon every brother who did not attend the funeral. Thus, above 1,000 years ago, were burial societies established in England." As some irregularities arose from the insurance of children, the legislature interfered for their regulation.

BURKING.—The high price paid by medical practitioners for subjects for dissection, induced a man named Burke to endeavour to supply bodies, by decoying persons into his house, and then murdering them by suffocation. He carried on this inhuman trade at Edinburgh, and secured many victims, until he was at length detected, and suffered the extreme penalty of the law, Jan. 28, 1829. Burke, from whom it was called burking, admitted having perpetrated fifteen murders of the kind. A woman named M'Dougal, who was charged with being his accomplice, was acquitted. This terrible crime was revived in London by Bishop and Williams, who were convicted of burking an Italian boy, and were executed Dec. 5, 1831. They admitted having murdered several persons in this manner.

BURLINGTON ARCADE was built in 1819, by Samuel Ware, an architect.

BURLINGTON HEIGHTS (Battle).—In a night attack upon the American camp near this place, June 6, 1813, an English force, consisting of 704 men, completely routed the Americans, 3,500 strong including cavalry. The action was continued during the night; but the Americans were repulsed in every attempt to retrieve their disaster, and eventually took to flight, leaving 100 prisoners and four guns in the hands of the victors.

BURMAH (Asia).—This extensive kingdom, sometimes called Ava, from its capital, when first visited by the Portuguese in the 16th century, was divided into four states,—Arracan, Ava, Pegu, and Siam. Very little is known of its history previous to the establish-

ment of intercourse with Europe. Buddhism is said to have been introduced amongst the inhabitants about A.D. 301. The seat of the government was removed from Panya to Ava in 1364. With the assistance of the Portuguese, the Burmese subdued the Peguans. Ralph Fitch, who travelled in India at the end of the 16th century, is the first English writer who notices Burmah.

A.D.

- 1687. English take possession of the island of Negrais, at the mouth of the Irawaddy.
- 1709. Captain Hamilton visits Burmah.
- 1740. The Peguans revolt.
- 1752. Ava is captured by the Peguans, and the Burmese are completely subdued.
- 1753. Alompra recovers Ava, and builds Rangoon.
- 1754. The Peguans are defeated in another attempt upon Ava. The French assist the Peguans, and the English the Burmese, in this struggle.
- 1755. Alompra is again victorious.
- 1757. Alompra captures Pegu. The East-India Company obtain a site for a factory.
- 1760. Alompra is taken ill whilst besieging the capital of Siam, withdraws his army, and dies on his way home.
- 1766. Shembuan captures the Siamese capital.
- 1767. Burmah invaded by a Chinese army of 50,000 men. They are defeated, with great slaughter.
- 1771. The Siamese revolt, and regain their independence.
- 1781. Amarapura is made the capital.
- 1783. Arracan is annexed to Burmah.
- 1785. The Burmese fail in an attack upon the island of Junkseylon.
- 1786. The Burmese invade Siam, and are again repulsed.
- 1793. Peace concluded between Burmah and Siam. The provinces of Tenasserim, Mergui, and Tavoy ceded to Burmah.
- 1794. The Burmese make inroads upon the territories of the East-India Company, in pursuit of robbers.
- 1795. A satisfactory explanation is given, and war is averted.
- 1810. Salang conquered.
- 1811. Arracan is invaded by a Mugh force.
- 1819. The Burmese make further inroads upon the territories of the East-India Company.
- 1823. Sept. 23. The Burmese attack and overpower a British guard on the island of Shaparee.
- 1824. March 5. The governor-general of India declares war. Rangoon is captured May 11. Cheduba, Negrais, Tavoy, Mergui, Martaban, the whole of Tenasserim, and Yeah surrender.
- 1825. Feb. 1. Assam conquered. March 8. General Cotton is defeated at Donabaw. It is captured April 2; and Arracan, after a series of actions, March 26, 27, 28, and 29. Promé entered April 25. An armistice for one month, signed Sept. 17, and afterwards extended to Nov. 2. The armistice is broken, and the Burmese army defeated, Dec. 1, 2, and 5. The Burmese send a flag of truce Dec. 26.
- 1826. Jan. 1. First conference held. Jan. 3. Treaty signed. It is not ratified, and hostilities are resumed on the 18th. Melloone captured Jan. 19. The Burmese defeated at the battle of Pagahmallew, Feb. 9. Treaty of Yandaboo signed Feb. 24.
- 1850. Dec. 28. Rangoon is destroyed by fire.
- 1851. Complaints by English seamen of ill-treatment received from the governor of Rangoon. Reparation is demanded, and refused.
- 1852. Jan. 10. The batteries at Rangoon fire upon the *Fox* man-of-war. Martaban taken April 5; Rangoon, April 14; Bassein, April 19; Promé, Oct. 10; and Pegu,

A.D.

- Nov. 21. Pegu is annexed to India, by proclamation, Dec. 30.
- 1853. Several marauding chiefs are punished. The termination of the Burmese war is officially proclaimed by the governor-general of India, June 30.

BURNING ALIVE was a common punishment, amongst ancient nations, for various kinds of offences. The Anglo-Saxons used it in certain crimes, and it was the ordinary punishment for witchcraft during the Middle Ages. Blackstone says:—"In treasons of every kind, the punishment of women is the same, and different from that of men. For as the decency due to the sex forbids the exposing and public mangling their bodies, the sentence is to be drawn to the gallows, and there to be burned alive." The Scandalous Chronicle contains an account of a woman, named Perrette Mauger, who was burnt alive at Paris in 1460 for having committed several robberies, and having harboured thieves and housebreakers. They were generally strangled and their bodies afterwards burned. Katherine Hayes, who suffered for the murder of her husband, was, through the carelessness of the executioner, really burnt alive at Tyburn, Nov. 3, 1726. The last woman executed in this manner was Christian Murphy, alias Bowman, March 18, 1789, for coining. The law was altered by 30 George III. c. 48 (1790), which provided that after June 5, 1790, women under this sentence were to be hanged. Death at the stake was long considered the only method of extirpating heresy, and as early as 304, Alban, the protomartyr of England, suffered in this manner. Lord Hale says:—"Before the time of Richard II., that is, before any acts of parliament were made about heretics, it is without question, that in a convocation of the clergy or provincial synod, they might and frequently did here in England proceed to the sentencing of heretics." By 29 Chas. II. c. 9, s. 1 (1676), the writ commonly called *breve de heretico comburendo*, with all process and proceedings thereupon in order to the executing such writ, or following or depending thereupon, and all punishment by death, in pursuance of any ecclesiastical censures, was utterly taken away and abolished.

BURNING GLASSES.—Gibbon (ch. xl.) remarks:—"A tradition has prevailed, that the Roman fleet was reduced to ashes in the port of Syracuse by the burning-glasses of Archimedes; and it is asserted that a similar expedient was employed by Proclus to destroy the Gothic vessels in the harbour of Constantinople, and to protect his benefactor Anastasius against the bold enterprise of Vitalian. A machine was fixed on the walls of the city, consisting of a hexagon mirror of polished brass, with many smaller and movable polygons to receive and reflect the rays of the meridian sun; and a consuming flame was darted to the distance, perhaps, of 200 feet. The truth of these two extraordinary facts is invalidated by the silence of the most authentic historians; and the use of burning-

glasses was never adopted in the attack or defence of places. Yet the admirable experiments of a French philosopher (Buffon) have demonstrated the possibility of such a mirror; and, since it is possible, I am more disposed to attribute the art to the greatest mathematicians of antiquity, than to give the merit of the fiction to the idle fancy of a monk or a sophist." Leonhard Digges, in his "*Pantometria*," published in 1571, speaks of a burning-glass which he had constructed on the plan of Archimedes; John Napier, the inventor of logarithms, who died in 1618, mentions them as a means of defence. Dr. Gregory sent one that he had constructed to Sir Isaac Newton in 1673. That eminent man's attention having been thus directed to the subject, he is said to have constructed one himself. Kircher investigated the subject with much perseverance. Vilette constructed several burning-mirrors of great magnitude, and experiments were tried in this country with one of them in June, 1718. Buffon made several successful experiments in 1747. Mr. Parker, in 1800, and other men of science at later periods, have improved the construction of burning-mirrors.

BURSE.—This title for a place of resort for financiers and commercial men, now generally termed an exchange, was first applied to the bourse at Bruges, formed early in the 16th century. Lewis Roberts, in "*The Merchants' Mappe of Commerce*," published in 1638, says:—"This city (Bruges) hath an eminent market-place, with a publick house for the meeting of all merchants at noon and evening; which house was called the *Burse*, of the houses of the extinct family Bursa, bearing three purses for their arms engraven upon their houses, from whence these meeting-places to this day are called *burses* in many countries, which in London we know by the name of the Royal Exchange, and of Britain's Bourse." The bourse at Antwerp was established in 1531; that at Amsterdam in 1608; at Paris in 1784. The first stone of Britain's Bourse, or the first Royal Exchange in England, was laid by Sir Thomas Gresham, June 7, 1566, and the building was opened by Queen Elizabeth Jan. 23, 1571.

BURYING ALIVE.—This mode of punishment was occasionally resorted to by the Jews and other nations of antiquity. Herodotus mentions burying alive as a Persian custom, and states that Xerxes buried alive nine sons and nine daughters of the Edonians; and that Amestris, the wife of Xerxes, in her old age ordered fourteen children, selected from the best Persian families, to be buried alive, in order to show her gratitude to the god under the earth. In ancient Rome it was the punishment awarded to the vestal virgin who violated her vow; and, during the Middle Ages, the religious were for a similar offence subjected to the same penalty. Sir Walter Scott, in "*Marmion*," describes the manner in which it was carried out. The culprit was placed in a small niche, made in the massive wall of the convent, a slender meal

of water and bread was deposited in it, and at the words *Vade in Pace*, the opening was closed. Skeletons have been discovered in an upright position in the ruins of abbeys in this country, and it is probable that they are the remains of persons who had been for some offence or other immured. It was at one time the punishment for a female thief.

BURYING-PLACE.—The Jews and other ancient nations buried their dead in fields, near the highways, and other places, without the walls of their cities and towns. Plutarch relates of Lysurgus, that, in order to do away with superstition and to accustom the youth of Sparta to such sights, he ordered the dead to be buried within the city, and permitted their monuments to be erected near the temples (B.C. 830—820). In ancient Rome, the bodies of her more illustrious men were allowed, as a favour, to be buried within the city. The Twelve Tables prohibited burial in the city. Hadrian and several emperors published edicts against the practice. Bingham shows that no burying-places existed either in cities or in churches during the first three centuries of our era. Graves in the public roads, or vaults and catacombs in the fields, were used for this purpose. The Christian emperors prohibited the practice several centuries later. The origin of the change in the custom appears to have arisen from the erection of churches over the graves of martyrs, or the removal of their relics into the churches, and this commenced in the 4th century. The next step was the burial of emperors and kings in the church porch, or some outer building of the church, which originated in the 5th century; and to this privilege the people were admitted in the beginning of the 6th century. The council of Braga, May 1, 563, allowed burial in the churchyard, but prohibited it within the walls. Hereditary burying-places were forbidden in the 9th century (council of Meaux, June 17, 845); but this was afterwards allowed by a decree of Leo V., inserted in the decretals of Gregory IX. about 1230. From this later period it became customary for bodies to be buried in churches and in family sepulchres. (*See CEMETERIES, CHURCHYARDS, &c.*)

BURY ST. EDMUNDS (Suffolk).—This town received its name from Edmund, king of East Anglia, who was crowned at Bury, on Christmas Day, A.D. 856. He was taken prisoner by the Danes, and, refusing to renounce the Christian faith, suffered martyrdom, Monday, Nov. 20, 870. According to the chroniclers, his persecutors bound him to a tree, scourged him, shot at him with arrows, and beheaded him. On account of his heroic constancy, he was afterwards canonized, and a monastery dedicated to him was founded at Bury. Stephen Langton and the barons met here Nov. 20, 1214, and agreed upon the demands which form the basis of Magna Charta. Henry III. held a parliament at Bury in 1267; Edward I. held another here Nov. 3, 1296; and Henry VI. another Feb. 10, 1447, and his example in this respect was on

one or two occasions followed by some of his successors. A large portion of the town was destroyed by fire in 1608. The grammar-school was founded in 1550.

BUSACO (Battle).—Massena and Ney were defeated at the convent of Busaco, near Coimbra, in Portugal, by Wellington, Sept. 27, 1810. The French attacked the British and Portuguese with a superior force. Their loss was 4,500 men killed and wounded, whilst that of the allies was only 1,300. Wellington soon after retired to the famous lines of Torres Vedras.

BUSHEL, supposed to take its name from an old English word *buss*, signifying a "box," was regulated by several enactments. By 14 Edw. III. st. 1, c. 12 (1340), a standard bushel was ordered to be sent throughout the realm, according to a provision in 9 Hen. III. st. 1, c. 25 (1225), which ordained that only one measure should be used throughout the kingdom. The bushel of wheat was to contain eight gallons by 12 Hen. VII. c. 5 (1496). By 22 Chas. II. c. 8, s. 1 (1670), the Winchester bushel, containing eight gallons, was ordered to be used in gauging corn or salt, and in 8 & 9 Will. III. c. 22, s. 9 (1696-7), it was declared to be a round bushel, with a plain and even bottom, being 18½ inches wide throughout, and 8 inches deep. The heaped bushel was done away with by 4 & 5 Will. IV. c. 49 (Aug. 13, 1834), the prohibition taking effect from Jan. 1, 1835. All former statutes were repealed, the Winchester bushel abolished, and a general measure established, from May 1, 1825, by 5 Geo. IV. c. 74 (June 17, 1824).

BUSHIRE (Persia) was made the seat of a factory by the East-India Company in the 17th century. During the Persian war it was captured by the British forces, Dec. 10, 1856, and was occupied by them until the conclusion of peace, May 2, 1857.

BUSIRIS (Egypt).—Four places in ancient Egypt bore this name. One Busiris, in the Thebais, was utterly destroyed by order of Diocletian A.D. 296; and at another Busiris, on the west bank of the Nile, Merwan II., the last caliph of the Ommiades, was slain, Feb. 10, 750.

BUTCHERS.—There were three classes of butchers among the Romans; viz., the *Suarii*, who provided hogs; the *Pecuarii*, or *Boarii*, who provided oxen, sheep, &c.; and the *Lanii*, or *Carnifices*, who killed the animals. During the Middle Ages, a common slaughter-house, in which the inhabitants had their beasts killed, was established in many towns. The butchers of Dunstable are said to have been the first to erect sheds in 1279. A clause in the ordinary of the butchers' company at Newcastle-upon-Tyne, dated 1621, ordered that any member who killed flesh in that town during the Lent season without the general consent of the fellowship, should incur a penalty of £5 for each offence. Edward III., in a letter to the mayor and sheriffs, dated Feb. 25, 1361, ordered that no large beasts should be

slaughtered nearer to London than Stratford on the one side, and Knightsbridge on the other; and a similar injunction was made by Richard II. in 1380. A statute for the regulation of the trade was passed in 1531. The butchers were incorporated under letters patent of James I., bearing date Sept. 16, 1605. They were at that time an ancient fraternity. The blue dress is the uniform of a guild. By 24 Hen. VIII. c. 3 (1532), butchers were required to sell by weight "called Haver-du-Pois." A penalty was fixed for infraction of this law by 25 Hen. VIII. c. 1 (1533). By 27 Hen. VIII. c. 9 (1535), butchers were allowed from April, 1536, to April 12, 1540, to sell meat as they had done previous to the statute of 1532; and by 33 Hen. VIII. c. 11 (1541), former regulations were repealed, and the privilege was continued.

BUTE ADMINISTRATION.—Its advent to power was caused by the retirement of Mr. Pitt, Oct. 5, 1761, from the Newcastle and Pitt (Chatham) Ministry, though the new ministry was not formed till the following year. The earl of Bute, who had been tutor to George III., was made prime minister May 29, 1762.

Treasury	Earl of Bute.
Lord Chancellor	Lord Henley.
President of the Council ..	Earl Granville.
Privy Seal	Duke of Bedford.
Chancellor of Exchequer ..	{ Sir Francis Dashwood, afterwards Lord Le Despencer.
Principal Secretaries of ..	{ Earl of Egremont and State
Admiralty	{ Hon. Geo. Grenville. Earl of Halifax.
Ordnance	{ Viscount, afterwards Earl Ligonier.
Board of Trade	Lord Sandys.

The Hon. George Grenville was replaced by the earl of Halifax early in 1763, and the Hon. George Grenville took the Admiralty. Henry Fox, afterwards Lord Holland, paymaster of the forces, was made leader in the Commons, with a seat in the cabinet. This administration was assailed by Junius and Wilkes, and the earl of Bute resigned April 8, 1763. His opponents called him "the favourite," and in some parts of the kingdom he was burnt under the effigy of a jack-boot. (See GRENVILLE ADMINISTRATION.)

BUTTER.—The word rendered butter in our translation of the Old Testament (Gen. xviii. 8; Job, xx. 17; and other passages) is supposed by the best biblical critics to signify cream or sour thick milk. Herodotus, in his notice of the Scythians, describes a rude process of churning practised amongst them, and as his account is confirmed by Hippocrates, who was almost contemporary with him, Beckmann believes this to be the earliest mention of butter. It was probably introduced at a later period, though not generally, amongst the Greeks and Romans, who derived their knowledge of it from the Scythians. The Romans anointed the bodies of their children with butter; the Burgundians besmeared their hair with it, and Clemens of Alexandria (192) speaks of it as

having been used by the early Christians in lamps, instead of oil. The trade is regulated by act of parliament.

BUTTINGTON (Battle).—Ethelred collected an army and surrounded the Danes in their fortifications at Buttington, on the banks of the Severn, A.D. 894. The Danes were so reduced by famine, having eaten their horses, that their leader, Hasting, was compelled to risk a sally towards the east. This led to a battle, in which the Danes were routed with great slaughter.

BUXAR (Battle).—Major, afterwards Sir Hector Munro, with 7,072 men and 20 field-pieces, defeated the army of the confederated native princes of Hindostan, consisting of 40,000 men and a powerful artillery, at this fortified town in Bahar, Oct. 23, 1764. The loss of the latter was severe, 6,000 men having been left on the field of battle. The victors captured 133 pieces of artillery.

BYE, SURPRISE, or SURPRISING PLOT.—George Brooke, brother of Lord Cobham, who was engaged in the plot to place Arabella Stuart on the throne, this being termed the Main Plot, to distinguish it from the lesser scheme, the Bye Plot, had also conspired with Sir Griffin Markham, Lord Grey of Wilton, and two Roman Catholic priests, named Walton and Clarke, to seize James I., imprison him, compel him to change his ministers, and to grant liberty of conscience and the free exercise of religion. The existence of the plot was made known to the government about midsummer, 1603, and in July the conspirators were apprehended. (See MAIN PLOT.)

BYZANT, or BEZANTINE.—William of Malmesbury (book iv. ch. 2) states that Byzantium, the original name of Constantinople, is still preserved in the imperial coin called a byzant. This coin was current in England from the 9th to the 14th centuries, and Camden, writing in the 16th, says "that a great piece of gold, valued at £15, which the king offered on high festivals, is yet called a Bezantine, which was anciently a piece of gold coined by the emperors of Constantinople; but afterwards there were two purposely made for the king and queen, with the resemblance of the Trinity inscribed,—*In honorem Sanctæ Trinitatis*; and on the other side the picture of the Virgin Mary,—*In honorem Sanctæ Mariæ Virginis*." The last were cast by order of James I., in 1603. The Turks, at the siege of Casarea, in 1102, are said to have hidden byzants in their mouths. The Crusaders struck the captives in the neck, whereupon the coin was disgorged. One writer declares that the bodies of the slain were also piled up and burnt, for the purpose of obtaining the byzants which they had swallowed. A similar coin was struck in other countries, and in the reign of Stephen, a white or silver byzant, of the value of two shillings, is supposed to have been current in England.

BYZANTINE EMPIRE. (See EASTERN EMPIRE.)

BYZANTINE HISTORIANS.—The Greek his-

torians and writers, in whose works are recorded the principal transactions of the Byzantine or eastern empire, from A.D. 325 to 1453, are known by this name. A collected edition of their works was published at Paris, 1645—1711; another, in twenty-three volumes folio, was published at Venice 1722—1733; and a new edition at Bonn commenced in 1828.

BYZANTIUM was founded B.C. 667, by the navigator Byzas, with followers from Argos and Megara, and received a considerable accession of numbers from Megara under Zeuxippus, B.C. 628. It was captured by the Persians B.C. 505, and retaken by the Greeks under Pausanias, B.C. 477, from which circumstance he has been called its founder. Byzantium became subject to Athens B.C. 470, threw off the yoke B.C. 440, but again submitted. Alcibiades took it B.C. 408, Lysander B.C. 405, and Philip of Macedon made an attempt B.C. 340, but was compelled to raise the siege B.C. 339. It was then allied with Rome, and eventually became a Roman colony. In the civil wars that ensued on the accession of Severus, Byzantium remained faithful to Niger, and after having sustained a siege of three years' duration, was reduced by famine A.D. 196. Severus ordered its walls to be demolished, and suppressed many of its privileges. Maximin took it after a siege of eleven days in 313, and in the civil war between Constantine and Licinius, the former captured it in 323. Struck with what Gibbon terms "the incomparable position of Byzantium," Constantine determined to make it the seat of his government, and an imperial edict for the building of the new city was issued in 324. The emperor, at the head of a procession, marked out its boundaries, the capital was forthwith constructed, and inaugurated in May, 330. The rites of inauguration lasted forty days, and the city received the title of Second or New Rome, which soon gave place to that of Constantinople, derived from its founder. The Byzantine church is supposed to have been founded in the 1st century. (See CONSTANTINOPLE.)

C.

CAABA, or the SACRED STONE OF MECCA, was guarded by the Koreish tribe; and the term was applied to the temple in which it was kept. Gibbon (ch. l.) says, that its genuine antiquity "ascends beyond the Christian æra;" and he describes the rites which the idolaters, and after them the Mussulmans, practised. "At an awful distance they cast away their garments: seven times with hasty steps they encircled the Caaba, and kissed the black stone: seven times they visited and adored the adjacent mountains: seven times they threw stones into the valley of Mina: and the pilgrimage was achieved, as at the present hour, by a sacrifice of sheep and camels, and the burial of their hair and nails in the consecrated ground." Mohammed destroyed the three hundred and sixty idols

of the Caaba, A.D. 630. The Carmathians despoiled the temple in 929 and bore away the black stone, which was, however, afterwards restored.

CAB.—This term, an abbreviation of cabriolet, is applied to the conveyances introduced into London in 1820. (*See HACKNEY CARRIAGES.*)

CABAL.—Soon after the dismissal of the earl of Clarendon, Aug. 30, 1667, the formation of the secret council called the Cabal commenced. It has been incorrectly stated that the name "Cabal" originated from the initial letters of the names of the five members of this ministry. This is not the case, as the word Cabal had been employed at an earlier time to denote a secret council, or what is now termed the cabinet. Its influence was directed principally to the direction of foreign affairs, and it was when fully formed, in 1670, composed of the following members: Sir Thomas, afterwards Lord Clifford, Lord, afterwards earl of Arlington, the duke of Buckingham, Lord Ashley, afterwards earl of Shaftesbury, and the earl of Lauderdale. Sir William Coventry was associated with them. The passing of the Test Act, 25 Chas. II. c. 2, early in 1673, spread disunion in its ranks; and by the spring of 1674 it was entirely dissolved. Hallam (*Eng. ii. ch. xi.*), whilst admitting that their counsels soon became "extremely pernicious and dishonourable," declares, "the first measures after the banishment of Clarendon, both in domestic and foreign policy, were highly praiseworthy."

CABBAGE was introduced into England at an early period, and is noticed in documents of the 13th century. Henry says the better kind was known in the time of Edward IV. It is supposed that Evelyn, in assigning the introduction of the cabbage from Holland to the 16th century, alludes to some particular sort. The soldiers of Cromwell's army are said to have introduced the plant into Scotland.

CABBALISTS.—Jewish doctors, who study the Cabbala, described by Dr. Moore as a traditional doctrine or exposition of the Pentateuch, which Moses received from God on Mount Sinai. Prideaux considers Cabbalist to be the general name of all those who profess the study and knowledge of all manner of traditions, which are of the interpretative part of the Hebrew Scriptures. Hallam declares (*Lit. pt. 1, ch. 3*) that the cabbala is the offspring of the Alexandrian Jews and not far from the beginning of the Christian era. It was revived during the 11th and 12th centuries.

CABINET COUNCIL.—(*See ADMINISTRATION OF GREAT BRITAIN.*)

CABIRA (Battle).—Mithridates the Great was defeated near this city, in Pontus, by Lucullus, B.C. 71. The Roman general captured the town itself and secured a large quantity of treasure.

CABLES, made of hemp, rush, papyrus, barks of trees, &c., have existed from time immemorial. Iron cables were first suggested

in the narrative of M. Bougainville's voyage of discovery, which was published in 1771, but no attempt was made to adopt them till Mr. Slater obtained a patent for their manufacture in 1808. The first vessel fitted with iron rigging was the *Penelope*, which made her trial trip in 1811, and satisfactorily proved the efficacy of the system, which was generally adopted in the royal navy in 1812. Captain Brown invented the proving machine, for testing chain-cables, in 1813.

CABOCHIENS.—In 1412, John the Bold, duke of Burgundy, armed a chosen body of about 500 journeymen butchers or skimmers, who took the name of Cabochiens, from John Caboche, their leader. They maintained the cause of Burgundy against the Armagnac faction, and, ruling Paris in the most despotic manner, kept the inhabitants in a state of constant terror. The citizens rose against them in 1418, and the Armagnacs obtained the ascendant.

CABRITA POINT (Sea-fight).—Sir Thomas Dilkes engaged with a French squadron off Cabrita Point, March 10, 1705, when two out of the five ships of which the French squadron consisted were driven on shore and destroyed, and three captured.

CAB STRIKE.—Displeased with the provisions of an act of parliament reducing the fare from 8d. to 6d. per mile, London cabmen withdrew their vehicles after midnight on Tuesday, July 26, 1853. The strike lasted three days, during which time locomotion was entirely paralyzed. Arrangements having however been made for bringing up vehicles from various provincial towns, the cab proprietors and drivers relented, and returned to their work on Saturday, the 30th of July.

CABUL (Afghanistan) is said to have been founded by Pusheng. Baber acquired possession of it in 1504, and in 1547 his son Humáyun expelled his brother Camran from the city. On the accession of Akbar, at the age of thirteen years, in 1556, Cabul was seized by Mirza Soliman; but it was again added to the empire of the Mogul in 1581. An insurrection was quelled in 1611. Nadir Shah took Cabul in 1738, and in 1774 it was made the capital of Afghanistan by Timour Shah, who died there, May 20, 1793. In 1801 a revolt of the Ghiljis took place at Cabul; but after severe struggles it was suppressed, May 11, 1802. In 1809 Shah Shujah was deposed and driven from the city by Futtah Khan, who was murdered in 1818, after which Cabul fell into the hands of Dost Mohammed. Shah Shujah was restored by the English, May 8, 1839. In 1841, Nov. 2, an insurrection broke out at Cabul, and many English officers were massacred; and on Jan. 6, 1842, the British commenced their disastrous retreat from Cabul, leaving Lady Sale and others prisoners in the hands of the enemy. The force consisted of 4,500 men, only one of whom survived the massacre of the Boothank pass. On the 15th of September, 1842, Cabul was retaken by General Pollock. General Nott arrived with another force the following day. Operations for the destruc-

tion of the great bazaar at Cabul, the most celebrated building of Central Asia, in which Sir W. McNaghten's body had been exposed, were commenced Oct. 9, and the objects of the expedition having been fully accomplished, a portion of the English army evacuated Cabul October 11, and the whole force gradually withdrew from Afghanistan.

CACHAO (Anam).—The capital of Tonquin, was nearly demolished by an incendiary fire during the 17th century. Since 1820 the sovereign has resided in Cochin China, and Cachao has of course suffered in consequence.

CACHAB (Hindustan).—This province was invaded by the Burmese in 1774, but no conquests were effected. The Brahminical religion was introduced in 1780. In 1813 Rajah Govind Chunder became sovereign of Cachar. He was soon expelled, and in 1818 Choorjeet gained the ascendancy and maintained it for five years, when Govind Chunder was restored. This prince, finding himself unable to protect his kingdom against Burmese invasion, sought the assistance of the British in 1824, and on his assassination in 1830, his territory was annexed to the possessions of the East-India Company.

CACHET (Lettres de), or **SEALED LETTERS**, issued by the kings of France, and countersigned by a secretary of state, on the authority of which persons were suddenly seized and imprisoned, were not frequently employed until the time of Louis XIV. (1643—1715). Disraeli (Curiosities of Lit. iii. 196) says: "Father Joseph, the secret agent of Cardinal Richelieu, was the inventor of *lettres de cachet*, disguising that instrument of despotism by the amusing term of a *sealed letter*." During the reign of his successor, Louis XV. (1715—1774), they were openly sold by the mistress of one of that monarch's ministers. The practice afterwards led to great abuses. Michelet says that Saint Florentine alone gave away 50,000; adding, "they were the object of a profitable traffic; they were sold to fathers who wanted to get rid of their sons, and given to pretty women who were inconvenienced by their husbands." They were abolished at the Revolution.

CADDEE LEAGUE, originated in Switzerland, and was occasioned by an alliance formed between the subjects of Hartmann, bishop of Coire, and the counts of Werdenberg, A.D. 1396. The peasantry of Upper Rhetia assembled by night at Trons in 1400, and exacted from their feudal lords a recognition of their right to independence, justice, and security. A second league, formed at the same place in May, 1424, was attended by the nobles as well as the peasantry, and all present pledged themselves to unite for the maintenance of justice and public safety. Owing to the predominant colour of the costumes at this meeting, it is known as the *Grey League*, or *League of the Grisons*. A similar alliance, known as the *League of the Ten Jurisdictions*, was established in 1436, and in 1471 the three confederacies met at the village of Vazerol, and united for mutual defence and assistance.

CADESTIA (Battle).—The Saracens defeated the Persians on this plain, near Cufa, A.D. 636. Some authorities are, however, of opinion that this battle was fought early in 635. The battle lasted four days, and the different periods were distinguished by peculiar appellations. The first was called the day of *succour*, because a Syrian reinforcement reached the army; the second the day of *concussion*, the third the day of *embittered war*, and the fourth of *cormorants*, or *howling*, or *barking*. The Saracens sacked Ctesiphon, and obtained the province of Irak, or Assyria.

CADE'S INSURRECTION.—Several risings took place in different parts of England in 1450, caused by general dislike of the duke of Suffolk. The most formidable was excited in Kent during the month of May, by John Cade, an Irish soldier of fortune, who assumed the name of Mortimer, called himself John Amend-all, and claimed relationship with the duke of York. He encamped on Blackheath June 1, defeated the royal army at Sevenoaks June 27, and slew its commander, Sir Humphrey Stafford. Their demands were set forth in fifteen articles. Cade entered London July 1, beheaded Lord Say and Sele and others July 3, and was expelled by the citizens July 5. He was killed by John Iden, sheriff of Kent, July 11, and his head was exhibited on London Bridge. Several of his followers were executed.

CADIZ (Spain).—The ancient Gadir, Latin form Gades, the seat of a Phœnician colony, several centuries before the Christian era. It was made subject to Carthage B.C. 233. The inhabitants entered into an alliance with Rome B.C. 212, and this was confirmed B.C. 78. Julius Cæsar conferred the civitas on all its citizens B.C. 49, and it was made a municipium by Augustus. The Goths destroyed it on their invasion of Spain, 415—418, and it was ravaged by the Danes in the 9th century. The Moors held it for many years, until it was wrested from them by Alonso the Wise in 1262. Sir Francis Drake burnt several ships in its harbour April 19, 1587, and Lord Howard of Effingham and the earl of Essex captured Cadiz June 21, 1596. Two galleons, thirteen ships of war, and twenty-four merchantmen, were taken or burnt. The town was plundered and the fortifications were destroyed. An English expedition failed in an attack in 1625, and another Aug. 15, 1702. Nelson bombarded it July 3 and 5, 1797. Victor invested it in 1810, and raised the siege Aug. 12, 1812. Insurrections broke out here July 7, 1819, and Jan. 1, 1820, and massacres ensued March 9 and 10 in the latter year. It was taken from the revolutionary Cortes by the French, under the duke d'Angoulême, Oct. 3, 1823, and held by them until 1828. It was made a bishopric in 1264. It has two cathedrals, one built in 1597, and the other commenced in 1720, and completed in 1840. Its academy of arts was founded in 1789.

CADMIUM.—This metal was discovered by M. Stromeyer in 1817.

CADSAED (Zealand).—This island was

captured, its Fleming garrison defeated, and the town sacked and burned by the earl of Derby, Nov. 10, 1337. It was overrun by the republican army in 1797, and part of the Walcheren expedition landed in Cadsand July 29, 1809. It was ceded to France by treaty, March, 1810, and was restored to Holland at the close of the war.

CAEN (France), originally called Cathern or Cathorn, was an important city in the 10th century. Henry I. captured it in 1105, Edward III. in 1346, and Henry V. Sept. 4, 1417. The French recovered it in 1449, and it has since remained in their possession. The church of the abbey of St. Etienne, now the cathedral, was founded by William I., between 1061 and 1070. The town was a favourite residence of William I. and his wife Matilda, both of whom were buried here. Louis XI. concluded a treaty at Caen with the duke of Brittany, Dec. 22, 1465, and it was ratified on the following day.

CAERLEON (Monmouthshire), or **CASTLE OF THE LEGION**,—the Isca Silurum of the Romans, is supposed to have been the chief city of Wales when it formed a Roman province. St. Alban, Aaron, and Julius, the proto-martyrs of England, suffered here A.D. 304. The seat of the archbishopric was removed from Caerleon to St. David's, A.D. 519.

CAERMARTHEN (Wales),—the ancient Maridunum, was made a Roman station A.D. 70.

CAERNARVON (Wales).—Edward I. laid the foundations of its castle in 1282, and it was not completed for ten years. Edward II. was born here, April 25, 1284. Edward I. granted the town a charter in 1284, being the first accorded to any town in Wales. The Welsh captured the castle, and put its garrison to the sword in 1294. It was taken and retaken during the civil wars.

CÆSAREIA (Cappadocia), originally called Mazaca, was the residence of the kings of Cappadocia. It was taken by Tigranes, and by the Persians under Sapor, about A.D. 260, and again under Chosroes II. in 612. The gospel was preached here by St. Peter and St. Paul; and it became the metropolitan see of Pontus. A council was held at Cæsareia in 365.

CÆSAREIA (Palestine) was founded by Herod the Great B.C. 10, and named in honour of Cæsar Augustus. St. Paul appeared before Felix, and was imprisoned at Cæsareia A.D. 58 (Acts, xxiii. 33—35). It was made a metropolitan see at an early period. Councils were held here in 334 and 358. It must not, however, be confounded with Cæsareia Philippi, another town in Palestine (Matt. xvi. 13).

CÆSARS, *Æra of.*—(See SPAIN, *Æra of.*)

CAFFA (Crimea).—Built on the site of the ancient Theodosia. The Genoese captured it in 1261. It was wrested from them by the Venetians in 1296, but they recovered it in 1299. The Turks took it in 1474. Caffa was made a free port in 1806.

CAFFRARIA (South Africa) appears to have been quite unknown in 1718, as it is

not mentioned in Peter Kolben's "Description of the Cape," published in that year. In 1797 Mr. Barrow explored part of Caffraria, and obtained the first authentic information as to the manners and customs of the Caffres. The interior was explored by Duncan in 1844, and by Ruxton in 1845. A part of Caffraria was placed under the protection of the English on the termination of the war in 1853. (*See CAFFRE WAR.*)

CAFFRE WAR.—In 1817, the Caffres under Makanna, a pretended prophet, attacked Graham's Town, but were repelled and forced to purchase peace by a cession of territory. In 1834 they again invaded the English settlements under their chief Charlie, who carried slaughter and devastation wherever he appeared. Sir Peregrine Maitland expelled them from the Tyumie district in 1846. In 1850 Sir Harry Smith was appointed governor of the Cape; and in the same year, Dec. 24, the Caffres rose in a general insurrection, and treacherously attacked a British force of 600 men in the Kriskamma defile. On the 29th they blockaded Sir Harry Smith in Fort Cox, and repelled Colonel Somerset, who came to his assistance. On the 21st of January, 1851, Fort Hare was unsuccessfully besieged by the Caffres, who lost more than 100 men. On the 31st of May the Hottentots rose in rebellion, and joined the Caffre chiefs, who continued to harass the colonists. Colonel Fordyce and several other officers and men were killed in a battle fought on the Water-Kloof Hills in November. The war continued with great violence. Sir George Cathcart succeeded Sir Harry Smith as governor April 9, 1852. On the 20th of December the Caffres were defeated near the Berea mountain. They sued for peace Feb. 13, 1853. A meeting between the governor and the chiefs was arranged, and peace was fully restored March 9.

CAGLIARI (Sardinia) occupies the site of the ancient Caralis, said to have been founded by the Carthaginians. It is the seat of an archbishopric. The Genoese were defeated at Cagliari by the united Venetian and Catalan forces in 1352. The university was founded in 1626, and re-established in 1764. During the war of the Spanish succession, Cagliari was bombarded and taken in 1708, and the inhabitants were compelled to declare in favour of Charles III. It was seized by the Spaniards in 1717. The French bombarded the town in 1793, but did not succeed in reducing it to subjection. The king of Sardinia resided at Cagliari from 1798 to 1814.

CAGOTS.—This proscribed race, existing in the Pyrenees, are said by some to have descended from the fugitive Goths who survived the defeat of Voullé A.D. 507. Others refer their origin to the Arabs who fled to Gascony on the defeat of Abd el Rahman, by Charles Martel, in 732. They are first mentioned in the year 1000, when they were under the absolute power of the nobility. In 1288 they were forbidden to sell articles of

food, and compelled to wear a peculiar costume, on the alleged ground of leprosy. From documents dated 1365 and 1385, it appears that the *Cagots* were then located in the province of Béarn; but they afterwards appeared in Navarre, Aragon, and other districts in the north of Spain. It was not till May 13, 1515, that the papal bull was published which established them in the commonest rights of humanity; and even then the privileges obtained were limited to the *Cagots* of Navarre. They subsequently became obnoxious to the Inquisition, which continued to persecute them as late as 1755.

CAL-PONG-FOU (China), or **KAI-FONG**, the ancient capital, was invested by the Mongols about 1227, and yielded in 1232. It was besieged by rebels in 1642, when the embankments were destroyed, and 300,000 persons perished in the inundation.

CAINITES, or **CAINIANS**.—A Gnostic sect that arose in the 2nd century. They pretended that Cain was produced by a superior virtue to that which produced Abel, who was thus easily overcome. They honoured all the worst characters mentioned in Scripture, Judas among the number. Origen did not regard them as Christians.

CAIRO (Egypt), or **CAHERA**, the "Victorious," called by the natives *Musr*, the capital of modern Egypt, was founded by the first of the Fatimite caliphs A.D. 969, and became the chief city of Egypt in 973. On the approach of the Crusaders in 1171 it was partially burnt by the inhabitants, who succeeded in saving it from foreign occupation; and a second attempt to surprise it, made by Louis IX. of France, was defeated in 1249. In 1382 it passed under the rule of the Memlook kings of the Circassian or Borgite dynasty, during whose government a Tartar invasion, under Tamerlane, was successfully resisted in 1393 and 1394. In 1517 the Turks under Sultan Selim took Cairo, and subverted the dynasty of the Egyptian sultans. In 1754 it was nearly destroyed by an earthquake; and in July, 1781, the plague carried off many inhabitants. Cairo was taken July 21, 1798, by Napoleon Bonaparte, who held it till 1801, in which year the inhabitants threw off the French yoke, March 29, and the town was taken by the English and Turks June 27. Cairo was the scene of the massacre of the Mamelukes, by order of Mehemet Ali, in 1811. It was the seat of a Jacobite bishop, who possessed the rights of a metropolitan. Councils were held at Cairo in 1086 and 1239.

CAIRVAN (Tunis), or **KAIRWAN**, was founded A.D. 670, by Akbah, the Saracenic conqueror of Africa. A city of the same name had been built by his predecessor, but Akbah, not liking the site, determined upon erecting another. It was about 33 leagues from Carthage.

CAIUS COLLEGE (Cambridge) was founded in 1348, by Edmund Gonville, and named Gonville Hall, after him. It was completed by W. Bateman, bishop of Norwich. Dr. John Caius rebuilt a portion of the college, erected

a chapel, and increased the endowments, in 1557, and he changed the name from Gonville Hall to Caius College.

CALABRIA (Italy) was anciently peopled by the Messapians, who possessed some of the arts of civilization, as early as B.C. 708. They originally suffered much from the tyranny of the Tarentines, whom they defeated with great slaughter B.C. 473. Another battle was fought B.C. 338. The Romans took possession of Calabria B.C. 266, and suppressed a rebellion in favour of Hannibal B.C. 213. The province subsequently formed part of the empire, until conquered by Odoacer, A.D. 476. On the defeat and death of Odoacer, in 493, it formed part of the Ostrogothic kingdom of Theodoric, until sold to Justinian by Theodatus, in 536. Alboin, king of the Lombards, took it in 570, and made it part of the duchy of Beneventum; and in 823 its richest towns were pillaged by the Saracens, who made a permanent settlement at Bari in 842. In the 11th century it was conquered by Robert Guiscard, the Norman, who was installed duke of Apulia and Calabria, together with all the lands he could rescue from the infidels, in 1051. The emperor Manuel I., in 1155, despatched Michael Palæologus to conquer Calabria; but the success gained was merely temporary, as William I. of Sicily expelled the invaders the following year. Calabria has since formed part of the kingdom of the Two Sicilies. It was erected into a dukedom in 1597.

CALAIS (France) was only a fishing-village until A.D. 997, when Baldwin IV., count of Flanders, improved the harbour, and erected fortifications. Philippe, count of Boulogne, extended its defences in 1224, and built a castle in 1227. It suffered greatly during the wars between England and France. Edward III. invested it in September, 1346, and it surrendered Aug. 4, 1347. The French failed in an attempt to regain possession in 1349. Wolsey was sent to mediate between the emperor Charles V. and Francis I. of France; but the conferences, held in Aug. 1521, proved ineffectual. Henry VIII. landed here on his invasion of France, July 14, 1544. The castle surrendered to the duke of Guise Jan. 6, and the town itself Jan. 7, 1558. By the treaty of Cateau-Cambresis (April 2, 1559) Calais was to be restored to the English, if no act of hostility were committed in eight years. This engagement was not, however, fulfilled, and Calais passed out of the hands of the English, who had held it 210 years. Henry VIII. granted to Calais the privilege of representation in the English parliament, and this it continued to exercise during the reigns of Edward VI and Mary. The Spaniards took Calais April 24, 1596. Several statutes relating to Calais will be found in our statute-book, under the reigns of many of our kings to the time of Edward VI.

CALATAYUD (Spain).—This town, near the site of the ancient Bilbilis, was wrested from the Moors by Alfonso VII. in 1119.

CALATRAVA (Order of).—This order of knighthood was instituted by Sancho III. of Castile, A.D. 1158. His father having taken the town of Calatrava from the Moors in 1147, intrusted its defence to the Templars. They resigned it to Sancho III. in 1158, when Raymond, abbot of a Cistercian monastery, undertook to defend it, and the order was instituted. It was confirmed by Pope Alexander III. in 1164. The grandmastership was united to the crown by Ferdinand and Isabella in 1487.

CALCIUM, the metallic basis of lime, was discovered by Sir Humphrey Davy in 1808.

CALCULATING MACHINES.—The schwanpan of the Chinese, and the Roman abacus, were employed in early times for performing arithmetical operations. Pascal, born in 1623, and Leibnitz, in 1646, invented machines of this kind. Sir Samuel Morland also constructed machines for performing some of the simpler operations of arithmetic about 1670. Mr. Babbage's difference-engine was commenced in July, 1823, government having granted £1,500 to be employed in perfecting the invention. Owing to misunderstandings with the draughtsman, the undertaking was suspended in 1833, at which time it had cost £17,000. This machine was removed to King's College, London, in 1843.

CALCUTTA (Hindustan).—When the East-India Company removed their factory from the Hooghly in 1686, the site on which Calcutta now stands was occupied by one of the villages afterwards granted to them by Aurungzebe. Fort William was erected in 1700, and Calcutta, now the chief city of Bengal, and the metropolis of the English dominions in India, was soon after commenced.

A.D.

- 1707. Calcutta made a separate presidency.
- 1742. A ditch dug round a portion of Calcutta.
- 1752. Defences commenced.
- 1756. June 20. Calcutta taken by Surajah Dowlah. Howell and 145 of his fellow-prisoners thrust into the Black-hole, and only 23 remained alive in the morning.
- 1757. Jan. 1. Watson and Clive anchor in the Hooghly; and plant the British standard on the walls of Calcutta, Jan. 2.
- 1758. Meer Jaffier grants the free tenure of Calcutta to the East-India Company.
- 1773. July 1. Calcutta made the residence of the governor-general, and a supreme Court of Judicature is established.
- 1793. High Court of Criminal Appeal established.
- 1801. University founded.
- 1804. Government House erected.
- 1813. Bishopric established at Calcutta.
- 1820. Bishop's Coll-ge founded.
- 1829. General Assembly's Institution for extending a knowledge of Christianity among the Native Youth, founded by the Scotch Church. Insolvent Court established.
- 1833. The bishop of Calcutta made metropolitan. A high tide in the Hooghly commits great destruction.
- 1836. The Martinière, an institution founded by General Claude Martin, for the education and maintenance of indigent native Christian children, is opened.
- 1855. Jan. 25. Industrial Exhibition opened.

CALDIERO (Battles).—Napoleon I. was defeated in a sanguinary engagement at this

strong position near Verona, Nov. 11, 1796, by Alvinzi, at the head of an Austrian army superior in point of numbers. Massena attacked the Austrians in this celebrated position Oct. 29 and 30, 1806, and after a gallant struggle was repulsed.

CALEDONIA. (See SCOTLAND.)

CALEDONIAN CANAL.—In 1773 James Watt showed the practicability of executing this work, which was commenced by Telford in September, 1803, and was opened Oct. 23, 1822. In 1837 and 1838 the works sustained considerable injury, and as the expenditure far exceeded the revenue, the idea of abandoning the whole undertaking was seriously entertained. An act was obtained in 1840 to permit the transfer of the canal to a joint-stock company; but the project was not carried out. This canal, connecting the North Sea with the Atlantic Ocean, is navigable for ships of 500 or 600 tons burden.

CALENDAR.—The Jews and some ancient nations divided the year into twelve lunar months, a thirteenth being added from time to time to accommodate it to the seasons. The year amongst the ancient Egyptians consisted of twelve months, each of which contained thirty days. At the end of the year five supplementary days were added. The Greeks for a considerable period made the year consist of twelve lunar months. Solon, B.C. 594, introduced a change respecting the length of the months, making them of twenty-nine and thirty days alternately. An intercalary month was occasionally introduced to restore the balance. Romulus is said to have divided the year into ten months, of which March was the first. This year consisted of 304 days, and was the original Roman calendar. Numa added two months, January at the commencement, and February at the end of the year, and caused an additional month, consisting of twenty-two and twenty-three days alternately, to be inserted every second year. The Decemvirs altered this arrangement B.C. 452, by placing February after January. Confusion having arisen in these calculations, Julius Cæsar abolished the use of the intercalations B.C. 47. He adjusted the year according to the course of the sun, and assigned to the months the number of days which they now contain. He added an intercalary day to February every four years. The new system, arranged by Sosigenes, an astronomer of Alexandria, whom Cæsar invited to Rome for the purpose, commenced January 1, B.C. 46, and was called the Julian or solar year. This arrangement was disturbed by the emperor Augustus. The consequence was, that the equinox, which, on the introduction of the Julian Calendar, fell on the 25th of March, retrograded so much that in the year 1582 it fell upon the 11th. Gregory XIII. in that year effected another reformation, which is now generally adopted, and is called the Gregorian calendar. He ordered ten days to be deducted, making the 5th of October, 1582, to reckon as the 15th. In order to make the civil and the natural year of the same length, he ordered that

every hundredth year, excepting the fourth, commencing with 2000, should not be a leap-year. Thus whilst 1700, 1800, and 1900 are not leap-years, 1600 was; and 2000 will be, but 2100, 2200, and 2300 will be common years. (See NEW STYLE.)

CALENDAR (Revolutionary).—The National Convention of France passed a decree Nov. 24, 1793, for the establishment of the new calendar, according to the report presented by Fabre d'Eglantine, Oct. 6. The year was to consist of 365 days, divided into 12 months, each containing 30 days. Five complementary days, called *sansculottides*, were added, and a sixth complementary day was to be introduced every fourth year. The first year of the French republic, according to this calendar, commenced at midnight, Sept. 22, 1792. The Gregorian reckoning was restored from and after Jan. 1, 1806, by an imperial decree, dated Sept. 9, 1805. The following calculations are given by a writer in the "National Cyclopaedia." "Though every period of four years was a *Franciade*, and the last year of the *Franciade* was called *Sextile* (having six complementary days), yet in fact An IV., An VIII., &c., are not leap-years. The following list will afford the necessary explanation:—

" An	I.	begins Sept.	22, 1792.
	II.	" "	22, 1793.
Sext.	III.	" "	22, 1794.
	IV.	" "	23, 1795.
	V.	" "	22, 1796.
	VI.	" "	22, 1797.
Sext.	VII.	" "	22, 1798.
	VIII.	" "	23, 1799.
	IX.	" "	23, 1800.
	X.	" "	23, 1801.
Sext.	XI.	" "	23, 1802.
	XII.	" "	24, 1803.
	XIII.	" "	23, 1804.
	XIV.	" "	23, 1805.

" When the Gregorian year is not leap-year, the beginnings of the months are as follows, according as the Republican year begins on Sept. 22, 23, or 24:—

" 1 Vendémiaire	is Sept.	22, 23, 24.
1 Brumaire	" Oct.	22, 23, 24.
1 Frimaire	" Nov.	21, 22, 23.
1 Nivôse	" Dec.	21, 22, 23.
1 Pluviôse	" Jan.	20, 21, 22.
1 Ventôse	" Feb.	19, 20, 21.
1 Germinal	" March	21, 22, 23.
1 Floréal	" April	20, 21, 22.
1 Prairial	" May	20, 21, 22.
1 Messidor	" June	19, 20, 21.
1 Thermidor	" July	19, 20, 21.
1 Fructidor	" Aug.	18, 19, 20.

" But when the Gregorian year is leap-year, the beginnings of the months are as follows, according as the Republican year begins on Sept. 22, 23, or 24:—

" 1 Vendémiaire	is Sept.	22, 23, 24.
1 Brumaire	" Oct.	22, 23, 24.
1 Frimaire	" Nov.	21, 22, 23.
1 Nivôse	" Dec.	21, 22, 23.
1 Pluviôse	" Jan.	20, 21, 22.
1 Ventôse	" Feb.	19, 20, 21.
1 Germinal	" March	20, 21, 22.
1 Floréal	" April	19, 20, 21.

1 Prairial	is May	19, 20, 21.
1 Messidor	" June	18, 19, 20.
1 Thermidor	" July	18, 19, 20.
1 Fructidor	" Aug.	17, 18, 19.

" For instance, what is 14 Floréal, An XII.? The Republican year begins Sept. 24, 1803, so Floréal falls in 1804, which is Gregorian leap-year. Look at the third table; and, when the year begins Sept. 24, the 1st Floréal is April 21; consequently, the 14th is May 4, 1804." Brady (*Clavis Calendaria*, i. 38) quotes the following summary of the revolutionary calendar:—

" Autumn—wheezy, sneezy, freezy.
Winter—slippy, drippy, nippy.
Spring—showery, flowery, bowery.
Summer—hoppy, c:oppy, poppy."

CALENDS, in the Roman calendar, the first day of the month. Nicolas says the term in the Middle Ages was sometimes used for the first day of the *preceding* month, on which the calends of the ensuing month began to be reckoned.

CALICO, so called from Calicut, a city of India, has been manufactured in Hindostan from time immemorial. The first importation was made by the East-India Company in 1631, and the printing was commenced in London in 1676. In 1768 this branch of industry was introduced into Lancashire. In consequence of the hostility of the Spitalfields silk-weavers, the importation of Indian calicoes was prohibited in 1700, and in 1721 it was made illegal to wear any printed calico whatever. In 1730, British calico, partly made of linen, was permitted under a heavy duty, and it was not till 1774 that cloth entirely of cotton was sanctioned. By 1 Will. IV. c. 17 (March 15, 1831), all laws restricting calico-printing were finally repealed, and the manufacture has since rapidly increased.

CALICUT (Hindostan) was the first port in India reached by Vasco de Gama, in 1498. The Portuguese attacked and burnt Calicut in 1510. They were repulsed, but afterwards obtained permission to erect a factory in 1513. The English East-India Company established their factory in 1616. Hyder Ali seized the town in 1766, and compelled the inhabitants to remove to Nellaru, afterwards called Furruckabad. The English took Calicut Feb. 12, 1782; Tippoo obtained possession in 1789, and completely destroyed the town. The country was finally ceded to the British in 1792, and the people returned and rebuilt the town.

CALIFORNIA (N. America) was discovered by Grivalva in 1534, and visited in 1537 by Cortes. Its coasts were explored by Cabrillo in 1542; but no European settlement was formed till a subsequent period. It is now divided into Lower and Upper California; the former had been previously called Old and the latter New California. Sir Francis Drake landed near the site of the present San Francisco in June, 1579. In the account of the proceedings of the expedition in this part of America,

it is stated, "There is no part of earth here to be taken up, wherein there is not special likelihood of gold or silver." Capt. George Shelvocke, who visited California in 1719, declared that gold dust was promiscuously and universally mingled with the common earth, and he brought away some of the earth for the purpose of making further investigations. This was, however, lost in China, and the actual discovery of the gold was reserved for the 19th century.

A.D.

1578. Sir Francis Drake takes possession, in behalf of Queen Elizabeth, of the northern part of California, calling it New Albion.
1698. The Spanish Jesuits establish the first European settlements in California.
1768. The Spanish Jesuits are succeeded by the Franciscans.
1823. Revolution, by which California is separated from Spain.
1829. Revolt among the Californians and Indians at Monterey.
1831. Don Manuel Victoria becomes Governor, and occasions an insurrection by his tyranny.
1833. The Mexican government seizes all the missionary stations of the Spanish priests, and declares them public property.
1836. Nov. Overthrow of the Mexican dominion in California.
1840. All foreigners are expelled from California.
1846. California is occupied by the army of the United States.
1847. Gold discovered on the Sacramento river in September.
1848. Upper California ceded to the United States by treaty, Feb. 2.
1850. California admitted into the Union as a sovereign state.

CALIGRAPHY.—Varro, who died B.C. 28, is commended by Cicero for the elegance with which he adorned his manuscripts, and Seneca, A.D. 65, speaks of books ornamented with figures. The great Charlemagne (800—813) was a munificent patron of professors of caligraphy, as was also the emperor Basil (867—886). About 1150, great progress began to be made in the art, and Charles V. of France (1364—1379) granted special protection to caligraphic painting in France and Flanders.

CALIPPIC PERIOD.—Calippus of Cyzicus, said to have been a disciple of Plato, lived about B.C. 330. He discovered and corrected the error of the Metonic cycle, which was composed of 235 lunations, or periods from new moon to new moon, containing a few hours more than nineteen years. Calippus observed that a more correct period might be formed by taking four times the period of Meton, all but one day, or 27,759 days, very nearly 76 years. The Calippic cycle is therefore four Metonic cycles all but one day. The first dated from July, B.C. 330, and corresponded with the 3rd year of the 112th Olympiad, and to A.U.C. 423.

CALIXTINES.—In 1420 a schism broke out amongst the Hussites, and they separated into two factions, the Calixtines and the Taborites. The former derived their name

from the circumstance that they insisted on the use of the cup (*calyx*, the Greek word) in the Eucharist. The difference between the Calixtines and the Roman Catholics was very slight, and they were reconciled to the Pope in 1433. In 1458 they persecuted the original Hussites, whom they expelled from Bohemia in 1467.—Also a Lutheran sect, the followers of George Calixtus of Sleswick, who flourished 1586—1656, and endeavoured to unite the various branches of the Romish, Lutheran, and Reformed churches. He was assailed by Buscher in 1639, and other Lutheran divines.

CALI YUGA.—The Hindoo æra of the Deluge. Hales remarks, "Though the date of the Astronomical æra *Cali yuga* be invariably fixed to B.C. 3102, the Historical æra of that name fluctuates considerably.

	B.C.
"The <i>Bhagavat</i> reckons it.....	1913
The <i>Vishnu Purana</i>	1905
Other <i>Puranas</i>	1370
The followers of <i>Vina</i>	1078."

CALLAO (Peru), the port of Lima, from which it is seven miles distant, was founded during the reign of Philip IV. (1621—1665). In 1746, the original town was destroyed by an earthquake and covered by the sea. It surrendered Sept. 22, 1821, during the Peruvian war of independence. In the struggle between Brazil and Buenos Ayres, Callao capitulated, after a siege of two years' duration, Jan. 23, 1826. Severe shocks of an earthquake were felt here in the middle of April, 1860.

CALLINGHUR (Hindustan).—Mahmoud of Ghuznee failed in an attempt to capture this stronghold A.D. 1024; and Sher Shah, the Affghan-leader, was unsuccessful in an attack in 1543. The English failed in an attempt to carry it by storm Feb. 2, 1812; but the fort surrendered on the 7th.

CALLINICUM (Battle).—The Persians defeated Belisarius near this small town on the Persian frontier, Easter Sunday, April 20, 531 A.D.

CALMAR (Sweden).—The celebrated treaty known as the "Union of Calmar," by which Sweden, Norway, and Denmark were united into one kingdom, under Queen Margaret, was concluded here in June, 1397. The Union was finally dissolved by Gustavus Vasa, in 1523. A large portion of the town was destroyed by a fire, which broke out Oct. 13, 1765, and raged till the 21st.

CALMUCKS.—This name was given to one of the three principal Tartar divisions by the Mohammedan Mongols. Expelled from China in 1672, they settled on the banks of the Volga. Repeatedly invited to return, the great transmigration of these hordes commenced in Jan. 1771, when above 300,000 set out for their original seat in China. By the end of May they crossed the Torgan, after a march in which they endured such

terrible hardships, that 250,000 of their number perished in its progress. In June they were compelled to resume their journey, by an army of Bashkirs; and on the 8th of September they arrived in China, where they were permitted to enjoy rest and prosperity after their adversities.

CALOMEL (Chloride of Mercury) seems to have been prepared by the alchemists; but the original discoverer is unknown. Croillus, writing at the beginning of the 17th century, speaks of its preparation as a great mystery. Beguin made the process public in 1608.

CALVARY (Jerusalem), the place where Christ was crucified, Friday, April 5, A.D. 30. Clinton gives the year 29, Hales 31, and other authorities 33, as the date of the passion. In Hebrew, the place where the Saviour suffered is called Golgotha, the place of a skull (Matt. xxvii. 33; Mark, xv. 22; and John, xix. 17). In our version of St. Luke (xxiii. 33) it is called Calvary; and in the original, Cranion, of which the Latin translation in the Vulgate is Calvaria. Hadrian placed statues of Jupiter and Venus on this mount, A.D. 131. (*See HOLY PLACES.*)

CALVES'-HEAD CLUB.—In a tract entitled "The Whigs Unmasked: being the Secret History of the Calves'-head Club, during the Rise and Progress of that infamous Society since the Grand Rebellion, &c.," of which several editions were published at the commencement of the 18th century, Milton and other members of the Commonwealth are said to have instituted this club. This account of its origin is not, however, considered authentic. Some members of such an association met at a French tavern in Suffolk Street, Jan. 30, 1735, and exhibited calves' heads, on which they were feasting, at the window. They drank to the memory of the army which dethroned the king, and of the men who cut off his head on the scaffold. This led to a riot, which was suppressed by the interference of the military.

CALVI (Corsica) was taken by the English under Lord Hood in 1794, after a siege of fifty-one days. Nelson was engaged in this struggle, and received a wound which destroyed the sight of his right eye. The English retired in 1796.

CALVINISM.—This name is given to the peculiar doctrines taught by John Calvin, the reformer, born at Noyon, July 10, 1509. He quitted the Roman Catholic Church, in which he held a cure, in 1532, and published his "Christian Institutes" in 1535, at Basel, where he had taken refuge on leaving Paris in 1534. He went to Geneva in 1536, but having advocated some unpopular views, was expelled in April, 1538. The edict of banishment was cancelled in May, 1541, and in September he returned to Geneva, where he exercised absolute authority. By his influence Michael Servetus was arrested and burnt at the stake, Oct. 27, 1553. The peculiar doctrines of the Calvinists, called the five points, are—1. particular election; 2. particular redemp-

tion; 3. moral inability in a fallen state; 4. irresistible grace; and, 5. final perseverance. Calvinism spread through France, Holland, England, Scotland, and other parts of Europe. Calvin himself died at Geneva, May 27, 1564. Various divisions have broken out amongst his followers. On the subject of predestination they are divided into the *Infra-lapsarians* and the *Supra-lapsarians*; the former contending that God permitted, and the latter that he decreed, the fall of man.

CAMALDULENSIANS, or CAMALDOLITES.—An order of religious persons founded at Camaldoli, or Campo-Malduli, a desert spot on the lofty heights of the Apennines, about 30 miles from Florence, by Romuald, an Italian, A.D. 1023. They follow the rule of St. Benedict, and are divided into *Cenobites* and *Eremites*. One of their houses was established at Grosbois, near Paris, but they do not appear to have ever had an establishment in England.

CAMARINA (Sicily).—Founded by a colony from Syracuse, B.C. 599. It revolted and was destroyed by the Syracusans B.C. 552. Hippocrates restored it about B.C. 495; but it was again destroyed by Gelon B.C. 485. The town was re-established soon after. It fell into the hands of the Carthaginians B.C. 406, and joined the Romans in the first Punic war. The Roman fleet was destroyed off the coast, near Camarina, B.C. 255. Camarina afterwards declined, and no trace of it remains.

CAMBAY (Hindustan), supposed to have been the capital of the Hindoo empire in Western India in the 5th century, was mentioned by Marco Polo on his return to Europe in 1295. In 1780 the English took Cambay from the *Mahrattas*, to whom it was restored in 1783. Cambay has formed part of the British empire in India since 1803.

CAMBODIA (Asia).—Nothing is known of this country beyond the Ganges till about 1590 A.D., when the king of Cambodia implored the assistance of the governor of the Philippines against the king of Siam. Christianity was introduced by the Portuguese Jesuits in 1624. The Siamese invaded the country, in 1809, and made themselves masters of the capital; and in 1819, all direct intercourse of foreigners with the Cochin Chinese portion of Cambodia was prohibited by the emperor of Anam. The final partition of the country between the emperor of Anam and the king of Siam took place in 1820.

CAMBRAY (France), the ancient *Camara-cum*, was fortified by Charlemagne, and was long governed by bishops under the rule of the empire. The English besieged the town in 1339; and in 1477 it fell into the possession of Louis XI., who restored it to Burgundy in 1478. It was captured by Charles V. in 1544. The prince of Parma besieged Cambray in 1580, but without success. In 1595 it was seized by the Spaniards. Louis XIV. reunited it to France in 1667. During the

revolutionary riots of 1793, the cathedral was utterly destroyed. Cambray was twice besieged by the Austrians in 1793, being taken by them Sept. 10. The French were defeated here by the duke of York, April 24, 1794; and the English under Sir Charles Colville captured the town June 24, 1815. Cambray was made a bishopric in 390, an archbishopric in 1556, reduced to a bishopric in 1801, and reconstituted an archbishopric in 1841. It was in union with Arras until 1092, when a separation took place. Fénelon was made archbishop of Cambray in 1695. Councils were held here in 1064; Dec. 27, 1303; Oct. 1, 1383; and in Aug. 1565.

CAMBRAY (League), is supposed to have been determined upon at the meeting between Louis XII. and Ferdinand and Isabella of Spain, at Savona, June 28 to July 3, 1507. The celebrated convention was signed Dec. 10, 1508, between Louis XII. and the emperor Maximilian, the pope, Ferdinand, and other princes being invited to join. Ferdinand and Julius soon after ratified the treaty. Its objects were the humiliation of Venice, and the partition of her territories. The contracting parties advanced into Italy in order to carry out the project, and this proved the signal for a struggle, in which one member of the league was often arrayed against another, until peace was re-established in 1516.

CAMBRAY (Peace of), known as the "Paix des Dames," because the negotiations were commenced by Margaret, duchess-dowager of Savoy, the emperor's aunt, and Louise, mother to Francis I., of France. The treaty of Madrid served as the basis for that of Cambray, signed Aug. 5, 1529. Robertson says the chief articles were, that the emperor "should not, for the present, demand the restitution of Burgundy, reserving, however, in full force, his rights and pretensions to that duchy; that Francis should pay 2,000,000 crowns as the ransom of his sons, and, before they were set at liberty, should restore such towns as he still held in the Milanese; that he should resign his pretensions to the sovereignty of Flanders and of Artois; that he should renounce all his pretensions to Naples, Milan, Genoa, and every other place beyond the Alps; that he should immediately consummate the marriage concluded between him and the emperor's sister Eleanora."

CAMBERIAN ARCHEOLOGICAL ASSOCIATION, for promoting the study and preservation of the antiquities of Wales, was established in 1846.

CAMBRIC, originally manufactured at Cambray, in Flanders, whence its name, was introduced into England by the Dutch emigrants in 1563. In 1745, the importation of foreign cambric was prohibited; and in 1761 the manufacture was established at Winchelsea, and brought to such perfection that, in 1765, the home-made article was considered equal to the French. Cambric was also manufactured at Dundalk, in Ireland. By 7 Geo. III. c. 43 (1767), the restrictions on

the importation of cambric were reimposed; but they were repealed by the commercial treaty between England and France, signed at Versailles, Sept. 26, 1786. They were again enforced June 6, 1797.

CAMBRIDGE, the Camboricum of the Romans, and the Grantabricsir of the Saxons, is said to have been founded by a Spaniard named Cantaber, B.C. 375. In A.D. 871 and again in 1010, it was plundered and burnt by the Danes. William I. founded the castle in 1070, and fortified the town against the attacks of the Saxons. In 1088 it was seized and plundered by the rebellious barons of William II. Cambridge suffered much during the struggles of King John's reign, and in 1215 the barons took the castle, which, however, was soon recovered by the king. Cambridge also suffered from the "Barons' War," in the reign of Henry III., having been plundered by the insurgents, who carried away such of the inhabitants as were able to pay heavy ransom, 1266. In 1381 the town lost its charters in consequence of an attack made by the populace on the university, and from that period nothing noteworthy appears in its history till 1642, when it was seized by Cromwell and made "the prime garrison and rendezvous of the associated counties." The Fitzwilliam Museum was founded in 1816; the Cambridge Philosophical Society was established Nov. 15, 1819, and chartered Aug. 3, 1832. The railway from London was opened in July, 1845.

CAMBRIDGE (University) by some authors is said to have been founded by Sigebert, king of East Angles, who began to reign A.D. 636; and to have been restored by Edward the Elder in 915. The more probable account is that given by Ingulphus, who relates that Joffrid, abbot of Croyland, in 1109, sent Gislebert and three other monks to Cambridge every day, where, having hired a barn, they taught the sciences, and collected a great concourse of scholars. The number had increased so much in the second year after their arrival, that no house or church was large enough to hold them. For this reason they separated into classes, and met in different places. The first mention of the university under the title of the chancellor and masters occurs in 1231, during the reign of Henry III., who granted several charters, and contributed greatly to the welfare of the institution. In 1381, during Wat Tyler's riots, the town of Cambridge rose in arms against the university and burnt its charters, all which were afterwards restored by Richard II. Pope Martin V. gave it full ecclesiastical and spiritual jurisdiction over its students, in 1430, and it was incorporated by Queen Elizabeth in 1571 (13 Eliz. c. 29). In 1687, Feb. 9, the university refused to admit Francis, a Benedictine monk, in consequence of which the vice-chancellor and senate rendered themselves obnoxious to James II. The present university statutes were confirmed by Queen Victoria, by an Order in Council, July 31, 1858. There are seventeen colleges at Cam-

bridge, which, with the date of their foundation, are as follows:—

Name of College.	Found- ed.	By whom Founded.
St. Peter's College	1257	Hugh de Balsham, bishop of Ely.
Clare College	1326	Lady Elizabeth, sister of Gilbert, earl of Clare.
Pembroke College	1347	The widow of Aymer de Valence, earl of Pembroke.
Gonville and Caius College }	1348	Edmund Gonville. Enlarged in 1537, by John Caius, M.D.
Trinity Hall*	1350	William Bateman, bishop of Norwich.
Corpus Christi College	1352	Two "Gilds" in Cambridge.
King's College.....	1441	King Henry VI.
Queen's College ..	1448	Margaret of Anjou. Re-founded, 1465, by Elizabeth Woodville.
St. Catherine's } College	1473	Robert Wodelarke, D.D.
Jesus College	1496	John Alcock, bishop of Ely.
Christ's College ..	1505	Margaret, countess of Richmond. Originally established by Henry VI., under the name of "God's House," in 1442.
St. John's College	1511	Margaret, countess of Richmond.
Magdalene College	1519	Thomas, Baron Audley of Walden.
Trinity College ..	1546	Henry VIII.
Emmanuel College	1584	Sir Walter Mildmay.
Sidney Sussex College	1598	Lady Frances Sydney, countess of Sussex.
Downing College	1800	Sir George Downing.

CAMBRIDGE (United States) was first settled in 1631, under the name of Newtown. Harvard University, the oldest institution of the kind in the United States, was founded in 1638. The Synod of Cambridge met in 1646, and was dissolved in 1648, after adopting the system of church discipline known as the "Cambridge Platform," which formed the religious constitution of the New England states.

CAMBUSKENNETH (Battle).—Wallace defeated John de Warrenne, earl of Surrey, guardian of Scotland, at this place, near Stirling, Sept. 10, 1297.

CAMDEN (Battles).—The first was fought at the village of Camden, in South Carolina, Aug. 16, 1780, between the Americans under General Gates, and the British under Lord Cornwallis. The former were completely routed, with a loss of 1,000 killed and wounded and as many prisoners, the English having only 20 killed and about 200 wounded. The second battle, at the same place, was fought April 25, 1781. The Americans, commanded by General Greene, were defeated. Lord Rawdon, the English commander, evacuated Camden the 13th of May following. This is

sometimes called the battle of Hobkirk's Hill.

CAMDEN SOCIETY, for the publication of documents illustrative of English history, was established in 1838. It takes its name from the celebrated William Camden, author of the "Britannia" and historian of Queen Elizabeth.

CAMEL.—This machine for raising ships, in order to enable them to pass over shallows, was invented about the year 1688, by a Dutchman named Meuvius Meindertzoon Bakker, of Amsterdam.

CAMEL (Battle).—Fought under the walls of Bassorah, A.D. 656, by the caliph Ali, against the Arab chieftains Telha and Zobeir, who were accompanied by Ayesha, the widow of the Prophet. She rode upon a camel; hence the name given to the battle. The rebels were defeated, and Telha and Zobeir were slain.

CAMELFORD (Cornwall), the scene of the famous battle between King Arthur and his rebellious nephew Mordred, in which both leaders were mortally wounded, A.D. 542. A second battle was fought there in 823, between the Britons, and the Saxons under Egbert. Camelford was incorporated by one of the Cornish earls, and sent two members to the first parliament of Edward VI., in 1547. At the passing of the Reform Bill, in 1832, the borough was disfranchised.

CAMERA LUCIDA.—Dr. Hook invented a camera lucida, for making the image of any object appear on the wall in a light room. The modern camera lucida was invented by Dr. Wollaston in 1807.

CAMERA OBSCURA was described by Baptista Porta in the *Magia Naturalis*, of which the first edition was published at Naples in 1558, and is said to have been invented by Friar Bacon.

CAMERINO (Italy) was made a bishopric A.D. 252, by Pope Lucius I. In 1545 Paul III. received Camerino in exchange for Parma and Piacenza. The statue of Sixtus V. was erected in 1587. The see was made archiepiscopal by Pius VI. in 1787, and Pius VII. added the see of Treja to this archbishopric in 1817. Napoleon I. united Camerino to the kingdom of Italy in 1807, but it was afterwards restored to the pope.

CAMERONIANS.—The followers of Richard Cameron, who entered Sanquhar, in Dumfriesshire, June 22, 1680, and made a public declaration that Charles II. had, by usurpation over civil and religious liberties, forfeited all right to the crown. They separated from the Presbyterians, refused the terms of accommodation proposed by Charles II., and demanded the rigorous observance of the Solemn League and Covenant received by the parliament Sept. 25, 1643. They are, on this account, frequently called Covenanters. Cameron was killed in a skirmish with the Royal troops at Airdsmoss, in Kyle, July 20, 1680, and his followers were dispersed. They published declarations against the test of 1681, on the 12th of January, 1682; against the royal authority Oct. 28,

* At Cambridge, colleges and halls are synonymous.
172

1634, and May 28, 1685. On the 1st of August, 1743, the Cameronians formed themselves into a presbytery called the Reformed Presbytery. A writer in "Notes and Queries", (2nd series, vol. v. p. 262) asserts that "the Cameronians still exist as a distinct sect, a small but tenacious body."

CAMERONITES.—Some French Calvinists, the followers of John Cameron, are thus designated. He was born at Glasgow in 1580, and in 1600 went to France, where he held professorships at Sedan and Saumur. Mosheim says that this divine and his followers "devised a method of uniting the doctrines of the Genevans respecting the divine decrees, as expounded at Dort, with the views of those who hold that the love of God embraces the whole human race." They were also called Hypothetical Universalists.

CAMISARDS, so called from the camise or smock which they often wore over their other clothes, were French Protestants, who appeared in the Cevennes early in the 18th century. Their object was the maintenance of religious liberty, which had been sacrificed by the revocation of the Edict of Nantes (*q. v.*). In 1703 their numbers had increased to 10,000. They maintained their ground for some time, gaining several victories, but were at length unable to resist the strong forces sent against them, and were ultimately suppressed in 1705.

CAMLET.—Marco Polo, whose book of travels was circulated in 1298, speaks of camel among the manufactured articles produced in Thibet. This stuff is supposed to have been made entirely of camel's hair, and is a much coarser material than the modern camlet. A mixed stuff of wool and silk was used for gowns in this country in the time of Elizabeth. During the Middle Ages the term camlet appears to have been applied to hair-cloth in general.

CAMPAGNA (Italy).—Clement VII. erected this town of Naples into an episcopal see July 19, 1525, united it to Satriano, and made it subject to Salerno.

CAMPAGNA DI ROMA.—This name is said to have been first applied during the Middle Ages, to the unhealthy plain in which Rome is situated. Pius VI. (1775—1799) drained a considerable portion of this plain.

CAMPANIA (Italy).—This province, in Central Italy, has been considered both in ancient and modern times as the richest plain in the world. The luxuriance and fertility of its soil, and the salubrity of its atmosphere, have been frequently celebrated in prose and verse. The first well-ascertained fact in its history is the settlement of the Greek colony of Cumæ, B.C. 1050. It afterwards fell under Etruscan rule. The Samnites captured Capua B.C. 423, and Campania was afterwards the theatre on which the Romans and the Samnites, and other nations, waged hostilities. A large portion of the province was conquered by the Romans B.C. 340. Pyrrhus passed through Campania B.C. 280; and some of the smaller towns declared in favour of Hannibal B.C. 216; but the Carthaginians

were driven out of Campania B.C. 212. This province became the favourite retreat of the wealthy Romans. The towns of Herculaneum and Pompeii were overwhelmed by an eruption of Vesuvius A.D. 79; but the province speedily recovered from the effects of this terrible calamity. Campania formed part of the kingdom of Naples, under the name of Terra di Lavoro, and is now included in the new kingdom of Italy.

CAMPE (Treaty), between Henry VIII. of England and Francis I. of France, was concluded at this small place, between Ardres and Guignes, June 7, 1546. Henry was to retain Boulogne until the debt of 2,000,000 livres due to him should be paid, and a further claim of 500,000 livres was adjusted. The emperor was included by both parties in the treaty, and Henry agreed to include Scotland, on condition that the Scotch gave him no further cause to make war upon them.

CAMPEACHY BAY (Mexico) was discovered in 1517 by Cordova. The Spaniards founded the town of Campeachy in 1540. It was taken by the English in 1659, who formed a settlement of logwood-cutters about the year 1667; it was again taken in 1678 by the pirate Louis Scott, and by the bucaners in 1685.

CAMPEN (Battle).—The hereditary Prince of Brunswick was repulsed in an attack upon the French at the convent of Campen, on the Lower Rhine, Oct. 15, 1760.

CAMPERDOWN (Sea-fight).—Fought off the Dutch coast, near the village of Camperdown, Oct. 11, 1797, between the Dutch and English fleets commanded by Admirals De Winter and Duncan, in which the latter gained a complete victory, taking or destroying eleven of the enemy's ships. For his valour and address in this engagement, Admiral Duncan was raised to the peerage by the title of Lord Duncan of Camperdown, on the 21st of October in the same year.

CAMPHOR has been long known in the East, although the Greeks and Romans were unacquainted with it. The date of its introduction into Europe by the Arabians is not known. Ætius, who lived at the end of the 5th and the beginning of the 6th century, is the first author who names it, and it is also mentioned by Paracelsus (1493—1541). The results of the first correct experiments on the properties of camphor were published by Neumann in 1725.

CAMPILLO (Battle).—The French, under General Molitor, defeated the Spaniards under De Ballesteros, at Campillo de Arenas, in Seville, July 28, 1823.

CAMPO-FORMIO (Treaty).—The preliminaries of this treaty between Austria and the French republic were signed at the castle of Eckenwald, near Leoben, in Styria, April 18, 1797, and the treaty itself was concluded at Campo-Formio, in Italy, Oct. 17, 1797. The emperor surrendered the Austrian Netherlands, the Ionian Islands, extensive territories in Italy, receiving Venice and some other places in return. He acknowledged the independence of the Cisalpine republic,

and acquiesced in the incorporation with it of the duchies of Modena and Mantua, Massa, Carrara, Bergamo, Brescia, Bologna, Ferrara, and Romagna. This treaty, most humiliating for Germany, consisted of twenty-five articles, to which fourteen secret articles were attached, involving further sacrifices on the part of the emperor. The twentieth article provided that a congress should assemble at Radstadt within one month after the conclusion of the treaty, or sooner if possible. It was to be composed solely of the plenipotentiaries of the German empire and of the French republic, and its object was to conclude a pacification between these powers.

CAMPO MALO (Battle).—Fought, in 1036, between the bishop of Milan and his rebellious vassals, who were aided by numerous auxiliaries. It terminated in favour of the latter.

CAMPONA (Battle).—Constantine defeated the Goths and the Sarmatians, their allies, at this place, in Italy, A.D. 322.

CANAAN (Asia).—This portion of Palestine was named after Canaan, one of the sons of Ham (Gen. x. 6, 15—19). Abram, at the command of God (Gen. xii.), went forth into the land of Canaan B.C. 1921. (See **PALESTINE**.)

CANADA (North America).—This portion of the New World was visited by the Scandinavians in the 12th and 13th centuries. John and Sebastian Cabot discovered Canada in June, 1497; but no permanent settlement was formed here until the French arrived in the next century. According to a Castilian tradition, the Spaniards visited this country before the French, and finding neither gold nor riches of any description, exclaimed "*Aca Nada!*"—"Here is nothing,"—in the presence of the natives. Hence the name Canada. Another account is, that the Spaniards named the country "*El Capo di Nada*," or "Cape Nothing." Charlevoix's derivation of the term is, however, generally received. He says that *Cannáda*, signifying in the Iroquois language a number of huts, or a village, was applied by the inhabitants to the first settlements made by the French, and the entire province afterwards received this designation. The French called it New France.

A.D.

- 1497. June 24. John and Sebastian Cabot discover Canada.
- 1500. The Portuguese mariner Cortereal visits Canada, and is said to have discovered the Gulf of St. Lawrence.
- 1517. June 11. Sir Thomas Pert's expedition, which is accompanied by Sebastian Cabot, enters Hudson's Bay, but does not explore it, owing to the timidity of the commander.
- 1524. Francis I. despatches an expedition, under Verazzano, who takes possession of the N.E. coasts of N. America, which he calls New France.
- 1535. Jacques Cartier ascends the St. Lawrence as far as the present site of Montreal, and carries several of the natives, with their chief, to France.
- 1540. The French erect the fort of Charlesbourg.
- 1549. Roberval sails for Canada, and is lost.

174

A.D.

- 1581. The French again trade to Canada.
- 1591. A French fleet sails to Canada.
- 1598. Henry IV. of France commissions the marquis de la Roche to conquer Canada; but the undertaking proves a failure.
- 1608. July 3 (N.S. 13). Quebec founded by Champlain.
- 1627. Richelieu intrusts the government of the colony to the "Company of a Hundred Associates."
- 1629. Quebec taken by the English.
- 1632. March 17. Quebec and all Canada restored to France by the treaty of St. Germain.
- 1648-49. The colony suffers much from the incursions of the Iroquois Indians.
- 1663. Louis XIV. erects Canada into a royal government, with the laws and usages of France.
- 1665. Canada is granted to the French West-India Company.
- 1667. Peace is made with the Indians.
- 1690. Sir William Phipps is despatched from New England to conquer Canada. He reaches Quebec Oct. 16, and re-embarks, without effecting any conquests, Oct. 22.
- 1711. The British American colonies send another fleet to conquer Canada, but it is wrecked at the mouth of the St. Lawrence, Aug. 22.
- 1713. April 11. The peace of Utrecht restores tranquillity to Canada.
- 1746. Shirley, governor of Massachusetts, projects the conquest of Canada, but only carries his arms into Nova Scotia.
- 1755. The English again attack Canada.
- 1759. Battle of Quebec, and death of General Wolfe, Sept. 13. The town surrenders to the British, Sept. 18.
- 1760. Entire reduction of Canada by the British.
- 1763. Feb. 10. Canada ceded to Great Britain by the treaty of Paris.
- 1765. Canada submits to the Stamp Act.
- 1774. Legislative council of twenty-three members appointed.
- 1775. The American forces invade Canada, and land at St. John's, Sept. 10. General Montgomery takes St. John's, Nov. 3; Montreal, Nov. 12; and, in company with Arnold, assaults Quebec Dec. 31. He is killed in the action, and the Americans surrender to General Carleton.
- 1776. June 18. The Americans evacuate Canada.
- 1791. March 4. Pitt proposes the Quebec Bill, by which Canada is divided into the Upper and Lower provinces, and receives a representative constitution (31 Geo. III. c. 31).
- 1792. The first House of Assembly is opened by Lieutenant-Governor Clarke.
- 1793. Canada is erected into a bishopric.
- 1812. The Americans, under General Hull, invade Canada, but are compelled to surrender Aug. 15. A second army, under General Wadsworth, also capitulates Oct. 14; and a third, under Van Rensselaer, Nov. 27.
- 1813. The Americans take York (Toronto), April 27; Fort George, May 27; they repel the British at Sacket's Harbour, May 29; and are defeated at Stony Creek, June 6. Indecisive battle of Williamsburg, Nov. 11.
- 1814. The Americans gain the battle of Longwood March 4; take Fort Erie July 3; and gain the battle of Chippewa July 5. Indecisive battle of Bridgewater July 25. Peace signed at Ghent Dec. 24.
- 1828. 87,000 Canadians petition the king against the manner in which the governors had applied the revenues.
- 1836. Sept. 22. The Houses of Assembly refuse to vote supplies.
- 1837. The "Sons of Liberty," under Papineau, rise in rebellion at Montreal. They are defeated in an attempt to seize Toronto, Dec. 4; and again at St. Eustace, Dec. 14.
- 1838. Jan. 15. Resignation of Sir Francis Head. He is succeeded by Lord Durham, who arrives at Quebec May 29.
- 1841. Feb. 10. Upper and Lower Canada united into one province.

A.D.

1844. The seat of government is transferred from Kingston to Toronto.
1849. April 25. Disturbances in Canada, owing to the Rebellion Losses Indemnity Bill. The insurgents burn the parliament house at Montreal.
1853. May 9. By 16 Vict. c. 21, the legislature is empowered to make provision concerning the lands known as Clergy Reserves, and their proceeds.
1855. Sept. Extensive immigration from the north of Scotland.
1856. March 12. An accident on the Hamilton Railway. Seventy people killed. April 17. Quebec is made the seat of government.
1858. Ottawa made the capital.
1860. The Prince of Wales visits Canada. Aug. 18. He is received with great enthusiasm at Quebec. Sept. 20. He leaves for the United States.

CANALS.—Canals were made in Egypt as early as 1350 B.C. They existed in England previous to the Conquest, 1066; and the junction of the Trent and Witham was repaired 1121. The Great Canal of China was commenced 1278. The canal of Languedoc was completed in 1680; and that from Amsterdam to Nieuwediep in 1825. Locks were used in the ancient canals of Upper Egypt, and were introduced into England from Flanders in 1652. The following are some of the principal canals of Great Britain :—

	A.D.
Aberdeenshire, opened.....	June, 1805
Arie and Calder Navigation	April, 1778
Barnsley	June 8, 1799
Birmingham	1774
Birmingham and Fazeley	July 12, 1790
Birmingham and Liverpool Junction	1834
Birmingham and Walsall	June, 1799
Birmingham and Wednesbury	Nov. 1769
Bradford	1774
Bridgewater	July 17, 1761
Caledonian	Oct. 1822
Cardiff	Feb. 1794
Chester and Nantwich	1780
Chesterfield	1776
Coventry	July, 1790
Deerne and Dove	1804
Dee River Navigation	April, 1737
Derby	1794
Exeter	1725
Forth and Clyde	July 28, 1790
Grand Junction	1805
Hartlepool	1764
Hereford and Gloucester	1796
Horncastle Navigation	1802
Kennet and Avon	Dec. 28, 1810
Leeds and Liverpool	Oct. 1816
Leicester	Feb. 1794
Leicestershire and Northamptonshire Union	1800
Leominster	Nov. 1796
Newry (Ireland)	1761
Norwich and Lowestoft Navigation	Sept. 30, 1833
Nottingham	1802
Peak Forest	May 1, 1830
Regent's	1820
Stover	1794
Swansea	Oct. 1798
Tavistock	1817
Thames and Severn	Nov. 19, 1789
Trent and Mersey	May, 1777
Ulverstone	1797

CANANORE (Hindustan).—The Portuguese had a fort at this town as early as 1505. They

were expelled by the Dutch, who in 1664 sold their privileges to the native princes. It afterwards formed part of the empire of Hyder Ali. The English were repulsed in an attack upon Cananore in 1768, but it was captured by General Abercrombie in 1790.

CANARA (Hindustan).—This province was wrested from the Hindoos by Hyder Ali in 1763. On the death of his son Tippon, in 1799, it came under the rule of the East-India Company, and has since formed part of the presidency of Bombay. It is divided into North and South Canara.

CANARY ISLES (N. Atlantic Ocean) are supposed to be the Hesperides, or *Fortunate Islands* of the ancients. Their discovery in modern times is attributed to the crew of a French vessel, who were driven to their shores by stress of weather about 1330-4. Some Spanish adventurers visited them about the year 1395, and plundered all the populous districts, carrying off as captives the king and queen and about seventy of the inhabitants. In 1400, the king of Castile granted the Canaries to John de Bethencourt, a Norman baron, who renewed his oath and homage for this estate to John II. in 1412. In 1483 the Spaniards commenced the conquest of the Canaries, which have remained in their possession ever since. In 1494 most of the Guanches, the aboriginal inhabitants who had escaped slavery, war, and famine, were carried off by a terrible pestilence. In 1822 the Canary Isles were formed into a Spanish province, with the right of representation in the Cortes. Ximenes extended the Inquisition to the Canaries in 1516. An episcopal see was established in the Canaries in 1404.

CANADAHAR.—(See KANDAHAR.)

CANDIA (Mediterranean), the ancient Crete, became a Roman province B.C. 67. The capital of the island, also called Candia, was taken by a band of Spanish Arabs A.D. 823, and recovered by the Greeks under Nicephorus Phocas in 961. The Venetians purchased the island Aug. 12, 1204, and took possession in 1205. In consequence of the frequent insurrections of the Candiotas, the Venetians, in 1243, divided the island into three parts; the first for the republic, the second for the Church, and the third for the colonists. Notwithstanding this, the inhabitants remained so turbulent, that it was necessary to despatch a fleet to reduce them to subjection, which was done in 1364. In 1571 the Turks made a short stay in Candia, but soon abandoned it to prosecute their conquests in other directions. They returned June 24, 1645, and after a siege of twenty-four years, gained possession of it in 1669. In 1830 it was ceded to the Pasha of Egypt, and again restored to Turkey in 1840. An insurrection among the Christians of Candia, that broke out in 1841, was suppressed by the Turkish government before the end of the year.

CANDLE (Inch of).—At an auction by inch of candle, persons continued to bid whilst a

small piece of candle continued to burn, the article being knocked down to the person who made the last offer before it was extinguished. In excommunication by inch of candle, the sentence was not passed upon the offender if he repented before the piece of candle burnt out. Shakespeare (2 Hen. IV. ii. 4) alludes to the old custom practised by the amorous gallant, who "drinks off candles' ends for flap-dragons." Nares remarks, that "as a feat of gallantry, to swallow a *candle's-end* formed a more formidable and disagreeable flap-dragon than any other substance, and therefore afforded a stronger testimony of zeal for the lady to whose health it was drunk."

CANDLEMAS DAY.—A festival held on the 2nd of February, to commemorate the purification of the Virgin Mary. Bingham (b. xx. c. 8, s. 5) says, "This at first among the Greeks went by the name of *Hypapante* Ὑπαπαντή, which denotes the meeting of the Lord by Simeon in the temple, in commemoration of which occurrence it was first made a festival in the church; some say in the time of Justin, the emperor; others in the time of his successor Justinian, anno 542." A proclamation against carrying candles on Candlemas was issued by Edw. VI. in 1548.

CANDLES.—Pliny, who died A.D. 79, speaks of the invention of rush-lights, and Apuleius, who flourished in the 2nd century, mentions candles of wax and tallow. Alfred the Great used them to measure time, 871—900. Tallow candles did not come into general use till about 1300, before which time torches and oil lamps were most frequently employed. The composite candle, which does not require snuffing, was introduced in 1840. An attempt to obviate the inconvenience of snuffing was made in 1799. The patents of Gwynne, in 1840, of Wilson, in 1842, and of Tighlman, in 1854, have led to great improvements in the manufacture. A duty on candles was first imposed by 8 Anne, c. 9, s. 1 (1709); it was repealed from Jan. 1, 1832, by 1 & 2 Will. IV. c. 19, passed in 1831.

CANDLESTICKS.—Some of the ancient utensils called by this name were lamps for burning oil. Moses was commanded to make a candelabrum with six branches, of hammered gold, for the tabernacle (Exod. xxv. 31 & 32), B.C. 1491. The golden candlestick, which had been replaced in Solomon's temple by ten golden candelabra, was restored after the Babylonish captivity. It was taken by the Romans on the capture of Jerusalem A.D. 70, carried into Africa by the Vandals under Genseric A.D. 455, and taken from them A.D. 533, by Belisarius, who removed it to Constantinople. It was afterwards transferred to Jerusalem.

CANICULAR YEAR.—The Egyptians and Ethiopians began their year from the rising of the Canicula, or Sirius, the Dog-Star; whence the term. It consisted ordinarily of 365 days, to which another was added every fourth year. It commenced July 20, 2785 B.C.

CANNÆ (Battle), between the Romans under Varro, and the Carthaginians under Hannibal, in which the former suffered a total defeat, was fought Aug 2, B.C. 216. The Roman infantry was cut to pieces; only 3,000 out of 70,000 men escaped.

CANNING ADMINISTRATION.—The earl of Liverpool having been incapacitated from continuing at the head of affairs by a paralytic stroke, with which he was seized Feb. 17, 1827, George IV. applied to Mr. Canning, then secretary of state for foreign affairs, and after protracted negotiations, he received formal instructions from the king to form a ministry, April 10. During the 11th and 12th, the duke of Wellington, Lord Westmoreland, Lord Eldon, Lord Bexley, Earl Bathurst, and Mr. Peel resigned. The king, however, persevered, and Mr. Canning kissed hands April 12. Other resignations followed. The new ministry was composed as follows:—

First Lord of the Treasury and Chancellor of the Exchequer	Rt. Hon. G. Canning.
Lord Chancellor	Lord Lyndhurst.
President of the Council	Earl of Harrowby.
Privy Seal	Duke of Portland.
Home Secretary	Rt. Hon. W. S. Bourne.
Foreign Secretary	Viscount Dudley.
Colonial Secretary	Viscount Goderich.
Board of Control	Rt. Hon. C. W. Wynn.
Board of Trade	Rt. Hon. W. Huskisson.
Chancellor of the Duchy of Lancaster	Lord Bexley.
Secretary at War	Lord Palmerston.
Without office	Marquis of Lansdowne.

Lord Carlisle was gazetted privy seal, July 16, 1827, in place of the duke of Portland, who retained a seat in the cabinet; and the marquis of Lansdowne home secretary in place of Rt. Hon. W. S. Bourne, who became first commissioner of woods and forests, retaining his seat in the cabinet. A reconstruction of this ministry occurred after the death of the Rt. Hon. G. Canning, which took place Aug. 8, 1827. (See GODERICH ADMINISTRATION.)

CANNON have been long known to the Chinese, whose books mention them as early as 618 B.C. Guns to throw stones of 12 lb. weight a distance of 300 paces were constructed A.D. 757, and at the siege of Caifong-fou, in 1232, round stone shot were used to defend the town. No credible record of the employment of cannon in Europe exists previous to 1118, when they were used by the Moors at the siege of Saragossa, and also at the defence of Niebla in 1157, and in 1312 they appear to have been used to throw shells into Baza. We also know that there was a cannon in the arsenal of Bamberg in 1323. The earliest document yet discovered relative to the employment of cannon for siege and defence, is among the ordinances of Florence for 1326, where metal cannon are appointed to be made for the defence of the forts and lands of Florence, and for the injury of her enemies. The first French mention of cannon is dated July 2, 1338, and provides ammunition for the attack on South-

ampton, and there are also documents of October and December, 1339, which prove that Cambay was defended with artillery during its siege by the English. Froissart speaks of cannon used by the inhabitants of Quesnoy against the duke of Normandy in 1340. In September, 1346, a cannon with a square bore was fired at Bruges; but as a man was killed in the experiment, it was not repeated. The employment of artillery by the English at Cressy, in 1346, is doubtful, but it was certainly used at the siege of Calais, in 1347. In 1366 the Venetians first used cannon at the siege of Chioggia. In 1378 Richard II. attacked St. Malo with 400 cannon, which failed to make a breach, though fired night and day. The first authentic date of the use of field-guns is 1382, when they were employed by the men of Ghent against the inhabitants of Bruges. The Turks first used cannon in 1394, at the siege of Constantinople. The use of artillery is mentioned at the siege of Bourges, Etampes, and Melun, in 1420; of Meaux, in 1422; Orleans, 1428; Zurich, 1444; and again at Constantinople, 1453. Mohammed II. established a foundry at Hadrianople in 1452, where a piece of brass ordnance of incredible magnitude was cast expressly for the siege of Constantinople. Gibbon says its bore measured twelve palms, and that the stone bullet weighed 600 lb.; according to another authority, the bullet was double that weight. This gun burst during the siege. Von Hammer declared that he had seen the great cannon of the Dardanelles, and that it furnished a hiding-place for a tailor who had run away from his creditors. Horse artillery was introduced by Charles VIII. of France, about the year 1489. The invention of brass cannon is attributed to John Owen, in 1535. Iron cannon were first cast in England in 1547.

CANNONGATE MARRIAGES.—In the middle of the 18th century, couples were married at public-houses in the Cannongate, Edinburgh, by unauthorized persons. Hence the term by which such marriages were known.

CANONIZATION.—Milman (Lat. Christianity, book xiv. ch. 2) remarks, "Canonization has been distributed into three periods. Down to the 10th century the saint was exalted by the popular voice, the suffrage of the people with the bishop. In the intermediate period the sanction of the pope was required, but the bishops retained their right of initiation. Alexander III. seized into the hands of the pope alone this great and abused prerogative." The first recorded canonization by the pope is that of Ulric, bishop of Augsburg, who received the title of saint from John XV., A.D. 995. In 1176, during the supremacy of Alexander III., the privilege of adding to the calendar of saints was vested in the pope alone.

CANON LAW is a collection of ecclesiastical constitutions, decisions, and rules for the regulation of the Roman Catholic Church. It consists principally of ordinances of provincial

and general councils, the decretals, bulls, and epistles of the papacy. The earliest of these rules (canones) are the Apostolical Canons (*q.v.*). Dionysius Exiguus, a Roman monk, compiled a "Codex Canonum," A.D. 520, and the canons of the four councils of Nice, Constantinople, Ephesus, and Chalcedon, received the sanction of Justinian A.D. 545. The Codex Canonum, with the Capitularies of Charlemagne, and the decrees of the popes from Siricius, A.D. 398, to Anastasius IV., A.D. 1154, formed the chief part of the canon law down to the 12th century. In 1114 Ivo, bishop of Chartres, collected the decrees made by the popes and cardinals, and this work was completed by Gratian, a Benedictine monk, and published in 1140. Raimundus, chaplain to Gregory IX., published in 1234 the decretals, which were rescripts or letters of the popes, in answer to questions on ecclesiastical matters submitted to them. The work consisted of five books, to which Boniface VIII. added a sixth in 1298. Clement V. added what were called the Clementines in 1308, and John XXII. the Extravagants in 1317. To these have since been added some decrees by later popes, and the whole form what is now known as the "Corpus Juris Canonici," or the great body of the canon law received by the Church of Rome. The primary object of this system was to establish the supremacy of ecclesiastical authority. It was not received in England, though attempts at its introduction were made at various times. The legatine and provincial constitutions formed, however, a kind of national canon law, adapted to the English church. The former were made in national councils held in England by Otho, legate of Gregory IX., in 1220; and by Othobon, legate of Clement IV., in 1268. These were edited, with a gloss, by John of Athona, canon of Lincoln, about 1290. The provincial constitutions were made in convocation of the clergy of the province of Canterbury, commencing under Stephen Langton, in the reign of Henry III., and ending under Henry Chicheley, in the reign of Henry V. They were collected, and edited with a gloss, by William Lyndwood, official of the court of Canterbury, and afterwards bishop of St. David's; and were received by the province of York, in convocation, in 1463. By 25 Hen. VIII. c. 19 (1553), it was enacted that these canons should be reviewed by the king and certain commissioners to be appointed under the act, and that until such review was made, all canons, constitutions, ordinances, and synods provincial, being then already made, and not repugnant to the law of the land or the king's prerogative, should remain in force. This act, repealed by 1 Phil. & Mary, c. 8 (1553), was revived by 1 Eliz. c. 1, s. 10 (1559). By 27 Hen. VIII. c. 15 (1535), power was given to the king to appoint thirty-two commissioners under the act of 1533. Divers urgent matters interfered to prevent the exercise of the power, and by 35 Hen. VIII. c. 16 (1544), power was given to the king to nominate them during his life. A commission was duly appointed,

but the death of the king prevented the completion of the work. In the reign of his successor, Cranmer renewed his efforts to obtain a satisfactory settlement of the question. By 3 & 4 Edw. VI. c. 11 (1549), another commission was ordered, and eight persons were appointed to prepare the materials for the larger commission. They were engaged on the work in 1552, and concluded their labours during the year. Various matters interfered to delay the ratification and establishment of the new code of ecclesiastical laws, and after the death of Edward VI., it was almost entirely neglected. The manuscript containing this code of laws, with numerous notes and corrections in the handwriting of Cranmer, is preserved amongst the Harleian MSS. in the British Museum. From this draught Archbishop Parker probably prepared the code published in 1571, under the title of "Reformatio Legum Ecclesiasticarum." It was republished in 1640. The Rev. E. Cardwell has published several editions of this remarkable work.

CANON OF SCRIPTURE consists of those books which are in "the rule or canon, or catalogue of books authorized to be read in the Church," and recognized as inspired, and therefore authentic. The Church of Rome admits into the canon several books which neither the Primitive Church nor the Church of England accepts as canonical. Cyril, bishop of Jerusalem in the 4th century, in speaking of the canonical books, mentions all those in the English Bible, except the book of Revelation. The council of Laodicea, A.D. 366, forbids any but the canonical books to be read in the Church, and gives the following list of them:—Genesis, Exodus, Leviticus, Numbers, Deuteronomy, Joshua, Judges, Ruth, Esther, four books of Kings, two of Paralipomena or Chronicles, two of Esdras, the book of 150 Psalms, Proverbs, Ecclesiastes, Canticles, Job, twelve Prophets, Isaiah, Jeremiah, Lamentations, and epistles of Baruch, Ezekiel, Daniel, the four Gospels, the Acts of the Apostles, the seven Catholic epistles; fourteen epistles of St. Paul. "Where none of the apocryphal books," says Bingham, "nor the Revelation, are mentioned; which is a plain evidence that none of them were read in the churches of that district." Ezra collected the books of the Old Testament about B.C. 444; and Simon the Just, who died about B.C. 291, added the two books of the Chronicles, Ezra, Nehemiah, Esther, and Malachi, and this closed the canon of the Old Testament. With respect to the canon of the New Testament, Townsend (The Holy Bible in Historical and Chronological Order, vol. ii. p. 439) remarks:—"As the canon of the Old Testament was completed by Simon the Just, the last of the great Sanhedrin, so it is probable the canon of the New Testament was completed either by St. John, or that disciple who might be the survivor of the 120, the number of the Sanhedrin, who met at the day of Pentecost. It is not probable that any of these outlived St. John,

who died nearly seventy years after the ascension of his Divine Master."

CANONS (Apostolical).—These ancient canons are attributed by Baronius, Bellarmine, and other Roman Catholic writers, to the apostles. Other authorities ascribe them to St. Clement, whilst some declare that they are the forgeries of some heretic in the 6th century. They are seventy-six or eighty-five in number, according to different modes of division.

CANONS (the Church of England).—In addition to the constitutions and canons formerly used in the Anglican Church, and noticed in the article on Canon Law, a body of canons, 141 in number, was drawn up by Bancroft, bishop of London, accepted by Convocation in 1604, and assented to by the king. They were chiefly composed of the older canons, a few new ones being introduced. They never received the sanction of Parliament, and are considered by the courts of common law to be binding on the clergy only. In 1640 Convocation formed a new body of canons. The House of Commons voted them unlawful Dec. 16, and Archbishop Laud, as their author, was committed to the custody of the usher of the black rod, Dec. 18. Thirteen bishops were impeached for their share in drawing up these canons, Aug. 13, 1641.

CANONS (Regular and Secular).—Mosheim states that this new species of priests, at first called the Lord's Brethren, and afterwards canons, was instituted by Chrodegang, bishop of Metz, in the 8th century. They formed an intermediate class between monks and regulars, and although they followed the discipline and mode of life of monks, took no vows upon them. Canonesses were added in the 9th century. By the 11th century they had, like the other orders, become corrupted, and several efforts were made to effect reforms. Nicholas II. was, at the council of Rome, April 13, 1059, to a certain extent successful in this object; but some communities would not proceed so far in this direction as others. Hence arose the distinction between *regular* and *secular* canons, the former having all things in common, whilst the latter had nothing in common but their dwelling and table. The term canon is now applied to a prebendary of a cathedral.

CANONS (Scottish).—The book of canons for the Church of Scotland, drawn up by the Scottish bishops, was confirmed by letters patent under the great seal, May 23, 1635. It was very unpopular in Scotland, and was withdrawn by Charles I. Sept. 9, 1638.

CANOSA (Italy), the ancient Canusium, in Apulia, which is said to have been founded by the Pelasgi, submitted to the Romans B.C. 318, whereupon the Canusians renounced their alliance with the Samnites, and remained faithful to Rome for many years. Having revolted, their city was besieged and their territory ravaged B.C. 89. During the civil war, Sylla gained a battle here B.C. 83. The modern city occupies the site of the citadel of Canusium. At a very early period of the Christian era, it became the seat of a bishopric which was united to the arch-

bishopric of Bari A.D. 845. It was besieged by the French July 2, 1502. After repulsing two assaults, the Spanish garrison capitulated on honourable terms.

CANOSSA (Italy).—This fortress, near Reggio, in Modena, was the scene of Henry the Fourth's humiliation to Pope Gregory VII. A.D. 1077. The pope had summoned the emperor to appear before him at Rome to answer some charges brought against him by his subjects. Henry, in an assembly held at Worms in 1076, declared that Gregory was no longer pope. Gregory was no sooner informed of this, than he called a council in the Lateran, excommunicated Henry, deprived him of the kingdoms of Germany and Italy, and released his subjects from their allegiance. The emperor at first, bent upon resistance, was frightened by some disaffection that revealed itself at home, and he crossed the Alps to submit and seek absolution. Gregory VII. was at the time in the castle of Canossa, with the Countess Matilda. Henry IV. arrived at its gates in the depth of a winter of unusual severity. Three successive days he remained in an outer court, without food, in a woollen shirt and with bare head and naked feet, and only on the fourth would Gregory admit him to his presence. Absolution was then granted. Henry's friends, disgusted at this base humiliation, deserted him, and, goaded by the insolence of Gregory, he renounced his treaty. The pope summoned a council at Rome, March 7, 1080, deposed Henry IV. and elected Rodolph of Swabia in his place. The emperor summoned a council at Brixen, June 23, 1080, deposed Gregory, and elected Guibert in his stead, under the title of Clement III. Success crowned Henry's efforts in the field; he entered Rome in 1083, after a siege of three years' duration, and was crowned by the new pope. Gregory VII. took refuge with Roger Guiscard, at Salerno, where he died, May 25, 1085.

CANTERBURY (Kent), the Roman Durovernum, is said by Geoffrey of Monmouth to have been founded by Hudibras, who reigned about 900 B.C. Undoubtedly it existed at the time of the Roman conquest of Britain, as it is mentioned in Antonine's Itinerary, written about A.D. 320. At the commencement of the Heptarchy, in 455, it ranked as the chief city of Kent, and continued the residence of the king till Ethelbert gave up his palace to St. Augustine and withdrew to Reculver, 597. The foundation of the cathedral is referred to the same date. Augustine became first archbishop of Canterbury in 602. In 754 the town was nearly destroyed by fire, and in 851 it was taken by the Danes. Between 940 and 960 Archbishop Odo restored the walls and roof of the cathedral, which was, however, much damaged by the Danes, who again sacked the town in 1011, putting Elphege, the archbishop, to death, on Easter Eve, March 24. In 1067 the cathedral was burnt down, and the work of restoration was reserved for Archbishop Lanfranc (1070—1093) and his successors, by

whom the new edifice was finished in 1130. The murder of Becket, which occurred on Tuesday, Dec. 29, 1170, rendered the city a resort for pilgrims. Canterbury was represented in parliament in 1265. The city remained unpaved till 1477. In 1561, Queen Elizabeth permitted the Protestant refugees from the Low Countries to worship in the undercroft of the cathedral. Cromwell passed through the town in 1651, when the cathedral was used as a stable by his troops. The hospital was founded June 9, 1791. Thom's riots at Boughton, near Canterbury, occurred May 28 to 31, 1838, and were only suppressed at the sacrifice of several lives.

CANTERBURY (See of), was founded by Ethelbert A.D. 602, when Augustine became the first archbishop. After a long contest with York, the primacy of the archbishops of Canterbury was established at a council held in England from Easter to Pentecost, in 1072. Lanfranc, at that time archbishop, laboured diligently in order to secure this result. The archbishop is primate of all England and metropolitan. In the following list, the date of the appointment of each archbishop is given. Augustine quitted Rome in 596, landed in England in 597, went to France, and was consecrated by the bishop of Arles, Sunday, Nov. 17, 597; returned to England in 598, received the pallium from Rome in 601, and fixed the see at Canterbury in 602.

CANTON (China) is said by native historians to have been founded about B.C. 200. Its importance as the seat of foreign trade dates from about A.D. 700, when it was appointed the residence of an imperial commissioner of customs. In 1517 the Portuguese obtained permission to trade here, and in 1634 the English made an ineffectual attempt to obtain the same privilege. The original city was destroyed in 1650, after a siege of eleven months. The East-India Company established a factory here in 1680. Canton was nearly destroyed by fire Nov. 1, 1822, and in September, 1833, a flood did much damage to life and property. The forts fired on two English ships of war, Sept. 7, 1834; but they were speedily silenced, and amicable relations re-established. In consequence of the opposition of the Chinese government to the opium trade, Commissioner Lin imprisoned all the English in Canton, March 22, 1839, and kept them in confinement till May 4. Sir Hugh Gough reduced the town to subjection May 30, 1841, after a siege of eight days, and it was ransomed for six million dollars. By the treaty of Nankin, signed Aug. 29, 1842, Canton was made one of the five ports open to British commerce. The factories, however, were burnt down soon afterwards, and the English suffered greatly until April 6, 1847, when, having threatened to bombard the town, they obtained the execution of four murderers of their countrymen. The *Arrow*, a lorcha manned by Chinese but commanded by an Englishman, was boarded by order of Commissioner Yeh, Oct. 8, 1856, and as compensation was refused, Sir M. Seymour seized the forts on the 24th, and bombarded the town on the 28th and 29th. An allied English and French force captured it Dec. 29, 1857, and on Jan. 5, 1858, the governor and Yeh were taken prisoners. Yeh was sent to Calcutta on the 8th. (See CHINA.)

CAP.—The ancient Greeks and Romans usually left the head uncovered, and regarded the Phrygian cap as a mark of barbarism. The Romans gave their slaves a cap when they made them free. Hence the origin of the cap as a symbol of liberty. According to Diodorus Siculus (B.C. 44), the aboriginal British used a conical cap, which was discontinued during the Roman supremacy, and resumed under the Saxons, who wore head-coverings of felt, wool, and skin. After the Norman conquest, skull-caps were introduced, and during the 14th century both sexes adopted head-dresses of most extraordinary forms. It is usual to refer the general use of caps to the year 1449, when

Charles VII. of France entered Rouen; but the change was probably very gradual. The cap was sometimes used as a mark of infamy; and in the 16th and 17th centuries bankrupts in France were compelled to wear a green cap.

CAPE BRETON (N. America).—This island is supposed to have been discovered by Sebastian Cabot in 1497. In 1632 it was ceded to France by the treaty of St. Germain; but the French did not form a settlement until 1712, when they called it *Isle Royale*. They fortified Louisbourg in 1720. In 1745 it was taken by the English, but restored to France by the treaty of Aix-la-Chapelle, Oct. 18, 1748. The English again took it in 1758, and it was finally ceded to them by the fourth article of the treaty of Paris, Feb. 10, 1763. Sidney, the capital, was founded in 1823. It forms part of the colony of Nova Scotia.

CAPE-COAST CASTLE (Africa).—This settlement in Guinea was established by the Portuguese in 1610; taken by the Dutch in 1643, and by the English in 1661. In 1665 it was besieged, though unsuccessfully, by the Dutch under De Ruyter. It was finally ceded to the English by the treaty of Breda, July 10, 1667.

CAPE COMORIN (Hindustan) is first mentioned in the Travels of Marco Polo, published in 1298, and called by him *Komari*.

CAPE FINISTERRE (Sea-fight).—Lord Anson and Admiral Warren defeated and captured a French fleet and convoy, consisting of thirty-two sail, under Admiral La Jonquière, off this cape, May 3, 1747 (O.S.).

CAPE HORN (S. America) is supposed to have been sighted by Sir Francis Drake in 1578. It was first doubled by Le Maire and Schouten in 1616, and named after the birth-place of the last-mentioned.

CAPE OF GOOD HOPE (S. Africa) was discovered by Bartholomew Diaz in 1486, and first doubled by Vasco de Gama, Nov. 19, 1497. The English took possession in 1620, but neglected to plant a settlement, and it remained abandoned by Europeans till colonized by the Dutch in 1650. Diaz named it the Stormy Cape, which the king of Portugal changed to its present appellation. (See **CAPE TOWN**.)

CAPE ST. VINCENT (Sea-fights).—Sir George Rooke, with twenty-three men-of-war and the Turkey fleet under convoy, was attacked near this promontory, in Spain, by a force of 160 vessels, under Admiral Tourville, June 16, 1693. The French captured or destroyed twelve English and Dutch men-of-war, and above eighty of the merchantmen.—Admiral Rodney gave chase to a Spanish fleet in these waters, Jan. 16, 1780, and succeeded in capturing one 80 and five 74-gun ships, on the 17th.—Sir John Jervis, with fifteen ships of the line and a few frigates, defeated a Spanish fleet of twenty-seven men-of-war, four of which he captured, besides sinking others, Feb. 14, 1797.

CAPET (House of).—Hugh Capet, count

of Paris, seized the crown of France on the death of Louis V. A.D. 987, and founded the third dynasty of French monarchs. He was crowned at Noyon by the archbishop of Rheims, July 1, 987. Fourteen kings of this line reigned before 1328, when Philip VI. vested the power in the house of Valois.

CAPE TOWN (South Africa) was founded by the Dutch in 1650, and remained in their possession till captured by the English under Admiral Elphinstone and General Clarke, Sept. 16, 1795. A Dutch squadron, sent to recapture it, was taken by Elphinstone, Aug. 17, 1796. At the peace of Amiens (March 25, 1802), England restored it to the Dutch. It was again taken by Sir Home Popham and Sir David Baird, Jan. 10, 1806. It was finally ceded to England by the treaty signed at London Aug. 13, 1814. An attempt made by government in 1849 to convert the colony into a penal settlement was abandoned, owing to the opposition of the inhabitants. The constitution granted to the colony of Cape Town was officially proclaimed July 1, 1853. (See **CAPE WAR**.)

CAPE VERDE (Africa) was discovered by Dinis Fernandez, a Portuguese, in 1446. It is believed to have been the *Pr. Arsinarium* of the ancients.

CAPE VERDE ISLANDS (North Atlantic Ocean) were known to the ancients as the *Gorgades*. Though the rediscovery is usually attributed to the Genoese navigator Antonio de Noli, sailing in the service of Portugal, in 1449, Nuno Tristan is supposed to have discovered some of them two or three years earlier. Pope Clement VII. erected them into a bishopric in 1532.

CAPITOL, the fortress of ancient Rome, was founded by Tarquinius Priscus B.C. 615, completed by Tarquinius Superbus B.C. 533, and was dedicated to Jupiter by the consul Horatius B.C. 507. It was destroyed by lightning B.C. 188, by fire B.C. 83, rebuilt by Sylla, and dedicated by Catullus, B.C. 69; again destroyed by fire Dec. 19, A.D. 69, and rebuilt by Domitian the same year; again burnt 80, and restored 82. During the sack of Rome by Genseric, in June, 455, the Capitol was stripped of its gold ornaments and roof, and abandoned to decay. Petrarch was crowned here April 8, 1341.

CAPITOLINE GAMES were instituted B.C. 387, to commemorate the preservation of the Capitol from the Gauls, and revived by the emperor Domitian, A.D. 86.

CAPITULARIES, a term derived from *capitula*, 'little chapters,' is applied to all laws passed by the Frankish kings. Guizot enumerates 60 of the first race, and 152 of the second. Of these, no less than 65 were passed during the reign of Charlemagne (768—814). Hallam considers the last capitularies to be those of Carloman in 882, though two have been attributed to Charles the Simple, who died in 921. They have been published at Paris.

CAPPADOCIA (Asia Minor).—The early history of this ancient state is involved in obscurity. Pharnaces, who held it as a fief

of the Persian empire, is said to have founded the kingdom B.C. 744.

B.C.

521. Assassination of the Magi Smerdis by seven nobles, one of whom, Anaphas, is descended from Pharnaces.
 322. Perdicas, regent of Macedon, subdues Cappadocia, puts to death King Ariarathes I., and invests Eumenes with the government.
 290. Mithridates III., king of Pontus, seizes Cappadocia and Paphlagonia.
 288. Cappadocia becomes subordinate to the Seleucidae.
 280. Seleucus Nicator is slain, and Cappadocia regains its independence.
 192. Ariarathes IV. marries Antiochis, daughter of Antiochus the Great.
 158. Ariarathes V., dethroned by Holophernes, is restored by the Romans.
 130. Ariarathes V. is slain with Crassus, in battle against Aristonicus of Mysia. Five of his sons are poisoned by their mother Laodice, but the youngest escapes, and succeeds to the crown.
 96. Ariarathes VI. is put to death by his brother-in-law Mithridates, king of Pontus. He is the last king of the original dynasty.
 93. The Romans appoint Ariobarzanes I. king of Cappadocia, but he is immediately expelled by Mithridates.
 92. Sylla restores Ariobarzanes I.
 88. Ariobarzanes I. is again expelled.
 84. Ariobarzanes I. is again restored.
 66. Mithridates again seizes Cappadocia, which he is compelled to evacuate by Pompey.
 42. Ariobarzanes II. assists Pompey against Caesar, and is slain by Cassius.
 36. Mark Antony deposes and puts to death Ariarathes VII., and appoints Archelaus king in his stead.
 20. Augustus confers new territories on Archelaus.
- A.D.
15. Tiberius invites Archelaus to Rome, and detains him prisoner.
 17. Death of Archelaus at Rome, and reduction of Cappadocia into a Roman province.
 370. A famine prevails in Cappadocia.
 515. Is invaded by the Huns.
 717. Is conquered by the Saracens.
 876. Is reunited to the Empire by Basil I.
 1074. Is conquered by the Seljukian Turks, under Soliman.
 1360. Is added to the Turkish empire.

CAPPEL (Battle), between the Roman Catholics in Switzerland, and the Zurichers, in which the latter were defeated, and their leader, Ulric Zwingli, slain, was fought Oct. 11, 1531.

CAPPIANO (Battle).—Castruccio of Lucca defeated and captured Raymond of Cordova, the Florentine general, at this place, on Monday, Sept. 23, 1325.

CAPRI (Mediterranean), the ancient *Capræ*, a small island close to Naples, and celebrated in ancient history as the retreat

chosen by Tiberius, A.D. 27. He spent the last ten years of his life here, and built twelve villas in different parts of the island. It has two towns, one called Anacapri, 1,600 or 1,700 feet above the level of the sea. The inhabitants communicate with those of the other town, called Capri, by a flight of 538 steps. Christianity was planted in Capri in the earliest times, and it was made a bishopric in 987. The island was wrested from Napoleon by Sir Sidney Smith, May 12, 1806. Sir Hudson Lowe and the garrison capitulated to Murat in 1808.

CAPS AND HATS.—On the assembling of the Swedish diet, May 30, 1738, the house divided into two hostile parties, the *Hats* who opposed, and the *Caps* who favoured the alliance with Russia. Owing to the ascendancy of the former faction, war was declared in Aug. 1741, and continued till the peace of Abo, Aug. 18, 1743. Both parties were suppressed by Gustavus III. on his accession, in 1771.

CAPUA (Naples) was taken from the Etruscans by the Samnites, B.C. 423. In B.C. 216, after the battle of Cannæ, Hannibal made it his winter quarters. The Romans regained the town in B.C. 211, and signalized their victory by their cruel vengeance on the inhabitants, all the senators and nobles being put to death, and the other citizens banished beyond the Tiber. By the *Lex Julia Agraria*, passed B.C. 59, Capua was made a Roman colony, and regained a portion of its ancient splendour. Genseric, king of the Vandals, took it A.D. 456, and reduced it to a very low condition; but it was not destroyed till 840, when it was captured and burnt by the Saracens. The modern town was built in the 9th century, at about two miles' distance from the original site, and was fortified in 1231. It was for many years a republic, under the nominal sovereignty of the Eastern empire, and afterwards formed part of the kingdom of Sicily. Caesar Borgia captured it, and put 5,000 of the inhabitants to the sword, in 1501. Capua was occupied by a French force Jan. 23, 1799, and on the 28th July, in the same year, it surrendered to the British. The French took possession of it in 1806. It capitulated to the Sardinian forces Nov. 2, 1860. Capua was made a bishopric about A.D. 46, and was erected into an archbishopric in 968.

CAPUCHINS.—These friars, of a reformed order of St. Francis, were established by Matthew de Baschi, in 1525. In 1528 they obtained a bull from Clement VII., and the order was fully established in 1529. They derived their name from the cowl (*caputium*), but were at first called Friars Hermits Minor. Paul III. confirmed the order in 1536, and gave them the name of Capuchins of the order of Friars Minor. The right of preaching, taken from them in 1543, was restored in 1545. They were introduced into France in 1573, and into Spain in 1606, but had no houses in England. On the establishment of peace between England and France, April 14, 1629, Louis XIII. arranged that ten Capu-

chins of Paris should go and serve Henrietta Maria, queen of Great Britain, in the capacity of confessors. Accordingly, twelve friars, of whom Father Leonard, of Paris, was the chief, left Calais Feb. 24, 1630. On the 24th Sept. 1636, the queen laid the foundation-stone of a Roman Catholic chapel, to be presided over by the Capuchins, and Dec. 10, in the same year, mass was publicly celebrated in presence of the queen and court. On the departure of the queen to Holland, in 1642, the Parliament imprisoned the Capuchins and closed the chapel.

CARBINE, or CARBINE.—This fire-arm, a small musket, was used by light cavalry as early as the 16th century. A corps of carabiniers was raised in France in 1560.

CARABOBO (Battle).—This strong position, in Venezuela, held by 4,000 Spaniards, was assailed by Bolivar's army, containing a force of English auxiliaries, June 24, 1821. The armies were nearly equal in numbers, and the latter gained a complete victory.

CARABUSO (Mediterranean).—This pirate stronghold was attacked and destroyed by the English fleet Jan. 31, 1828.

CARACAS (South America) was discovered by Columbus during his third voyage, in 1498. The colony was afterwards sold by Charles V. to the Welsers, a company of German merchants, who ruled so tyrannically that they were dispossessed in 1550, when a governor was appointed. Santiago de Leon de Caracas, the chief town, built by Diego Losedain 1567, possesses a university, founded in 1778, and is the seat of an archbishopric established in 1803. In 1810 the colony declared its independence, and took the name of Venezuela, which was formally acknowledged by the Spanish Cortes, July 5, 1811. A disastrous earthquake, which occurred Mar. 26, 1812, laid the city in ruins and destroyed numbers of the inhabitants, which so excited the superstition of the survivors, that they soon afterwards surrendered to the royalists. Independence was re-established by Bolivar, Aug. 26, 1813; and on the 17th of Dec. 1819, New Grenada and Caracas were united into a single state, under the name of Colombia.

CARAÏTES, or READERS, a Jewish sect that adhere closely to the text of the Scriptures, and are distinguished from the Rabbins by their rejection of traditions. They pretend to be descendants of the ten tribes led captive by Shalmaneser, B.C. 721; whilst others trace their descent from Ezra, B.C. 458, though it is generally believed that they did not make their appearance till the 8th century. The Caraïtes exist in Turkey, Poland, Syria, and some parts of the East.

CARAVAGGIO (Lombardy) was taken by the Venetians A.D. 1431. In 1448 Francis Sforza laid siege to it, and after a hotly-contested battle, effected its capture Sept. 14. The Venetians regained possession in 1499. After the battle of Agnadel, May 14, 1509, Caravaggio and other places surrendered to the French.

CARAVAN.—In countries in which neither facility nor security is afforded to the tra-

veller, a number of merchants or pilgrims form themselves into a company for mutual protection. This is more particularly the case in the East. The first caravan is that to which the merchants belonged to whom Joseph was sold by his brethren, about B.C. 1728. It consisted of a company of Ishmeelites, coming from Gilead, "with their camels bearing spicery and balm and myrrh, going to carry it down to Egypt." (Gen. xxxvii. 25.)

CARBERRY HILL (Battle).—Lord Hume encountered Bothwell's army at this place, about six miles from Edinburgh, June 15, 1567. Bothwell took to flight without striking a blow, and Mary was taken prisoner.

CARBONARI, or "CHARCOAL-BURNERS."—The name given to a secret political association, formed in Italy at the commencement of the present century. Its professed aim is the reorganization and reform of the government of Italy; and members of all classes are found in its ranks. In 1814 they formed a plan, subsequently abandoned, of creating a revolution in Naples. The scheme was not relinquished, but deferred, and, July 2, 1820, a constitution was proclaimed at Nola, Salerno, and other places. Ferdinand granted concessions; the forces of the Carbonari entered Naples July 9, and the king of Naples swore to observe the new constitution, July 13. The emperors of Austria and Russia, and the prince of Prussia, met at Troppau, in October, and by letters dated November 20, invited Ferdinand to meet them at Laybach, where measures were determined for an armed interference for the suppression of the revolution. The Austrians entered early in 1821. Naples capitulated March 20, and the revolutionary parliament was closed March 24. By an ordinance dated April 10, any person attending the meetings of the Carbonari was to be punished capitally. The society continued to exist, and, spreading through France, caused insurrections at Rochelle, Colmar, Toulon, and Marseilles, in 1821; and their influences are supposed to have contributed to the revolution of 1848 in France and Germany. The numerous outbreaks that have occurred in the Italian peninsula since 1821 may all be traced, directly or indirectly, to the machinations of the Carbonari.

CARCANO (Battle).—The emperor Frederick I. of Germany was defeated at this place by the republican forces of Milan and Brescia, Aug. 9, 1160.

CARCASSONNE (France), the ancient Carcaso, was made a bishopric in the 6th century. It was captured and pillaged Aug. 15, 1209, during the Albigensian crusade, and the inhabitants were expelled. The Inquisition was established here in 1230.

CARDIFF (Wales).—The castle is supposed to have been commenced A.D. 1080 and completed in 1110. Robert, eldest son of William I., taken prisoner in 1106, is said to have remained in the castle until his death, Feb. 10, 1135, though the story is discredited by some writers. Its first charter was granted by Edward III., in 1338. The Gla-

morganshire Canal was finished in 1798, and the Taff Railway in 1840.

CARDIGAN (Wales).—The name is said to be derived from "Caredigion," signifying the territory of Caredig, the first king. Little is known of its early history. It was assailed by Saxons, Danes, and Normans, and was, with the whole of Wales, annexed to England in 1283. Cardiganshire has returned one member to parliament since 1536. The castle of Cardigan, the chief town, was founded in 1160, and strengthened in 1240. A French expedition, 1,200 strong, landed in Cardigan Bay, Feb. 22, 1797. They surrendered without offering any resistance, Feb. 24, while two frigates that had accompanied the expedition were captured on the way back to France.

CARDINAL.—This title, in early times, was applied to any bishop, priest, or deacon, in office. It probably commenced with the cardinal priest or presbyter, and, though modest in its origin, has, as Gibbon remarks, "aspired to emulate the purple of kings." There were several cardinal presbyters in the same church, and they are not noticed before the time of Gregory the Great (590—604). The word cardinal was long of dubious import. Stephen IV. (768—772) is said to have elected seven bishops, to whom he gave the title of cardinal. Nicolas II., at a council at Rome, April 13, 1059, ordered that cardinals should elect the pope, though he did not exclude the clergy, &c., from a share in the election. The cardinals, however, struggled to obtain the sole power, and, after various altercations, Alexander III., at the third council of Lateran (the eleventh general council), March 5 to 19, 1179, transferred the election of a pope to the college of cardinals. From this time the cardinals have gradually attained the supremacy they now exercise as princes of the Church. The number of cardinals having before varied considerably at different periods, was fixed by the bull of Sixtus V., in 1586, at seventy; six being bishops, fifty priests, and fourteen deacons. The red hat was first assumed at the thirteenth general council, held at Lyons, June 28 to July 17, 1245, by permission of Innocent IV. Boniface VIII. (1294—1303) allowed them to wear the purple cloak, and Paul III. (1534—1549) allowed them to wear the red cap. Their style was altered from "Most Illustrious" to "Eminence" by Urban VIII., Jan. 10, 1630.

CARDIS (Peace) was concluded between Russia and Sweden in 1661. A truce for three years had been signed in 1658, and the treaty of peace of Cardis was a renewal of the treaty of Stolbova, in 1617.

CARDS, originally derived from India, were introduced into Europe by the Saracens. They are noticed in Europe as early as 1275, and were known in England before 1464. Rodolph I. is said to have amused himself with playing cards, and mention of them occurs in German works between the years 1286 and 1384. They were used in Italy in 1299. The invention has long been erro-

neously attributed to the French, who, in 1392, are said to have tried this means of amusing Charles VI. in the intervals of his terrible malady. A duty was first placed upon them in this country, by 9 Anne, c 23, s. 39 (1710). Dr. Buchan explains the number of cards in a pack, &c., in the following manner:—"The whole number of cards in a pack, fifty-two, is equal to the number of weeks into which the year is divided; and the number of cards in each suit, viz. thirteen, is equivalent to the number of weeks contained in each quarter of the civil year. The number of spots or pips upon one suit is 55, which,

"Multiplied by 4, give	220
Pips upon pictured cards	12
Honours, counted at ten each	120
Number of cards in each suit	13

Total..... 365

The precise number of days contained in the solar year."

CARIA (Asia Minor).—The Carians claimed to be the original inhabitants of the country. This view is, however, disputed. They are supposed to have been subject to Minos, king of Crete. The Dorians and the Ionians formed colonies on their territory. The Carians contributed seventy ships to the great armada of Xerxes, B.C. 480. The country was ruled over by the Lydians, the Persians, the Greeks, and the Romans, who divided it, giving part to the king of Pergamus and the remainder to the Rhodians, B.C. 190. The Romans added Caria to their province of Asia, B.C. 129. Caria was the sixth ecclesiastical province of Asia Minor. St. John the Evangelist is said to have converted its inhabitants to Christianity. It now forms part of the Ottoman empire.

CARIBBEE ISLANDS (Atlantic).—The Windward and Leeward Islands, called also the Lesser Antilles, are known by this name. It is derived from the Caribs, an aboriginal tribe of America, distinguished from the other tribes by their athletic stature and superior courage. (*See WEST INDIES.*)

CARICAL (Hindustan).—This strong fortress, held by the French, was invested April 2, 1760, and surrendered April 5. By the 14th article of the treaty of Versailles (Sept. 3, 1763), Carical was delivered up and guaranteed to France, in the possession of which country it still remains.

CARIGNAN (Italy).—This town was besieged by the French early in the spring of 1544, and surrendered after the victory over the Spaniards, gained near Cerisoles, April 14, in the same year.

CARISBROOK CASTLE (Isle of Wight).—A castle was built at Carisbrook, formerly the capital of the island, according to Dr. Stukely, by Carausius, about B.C. 290. This was rebuilt by Richard de Rivers, earl of Devon, in the reign of Henry I., and Elizabeth repaired it in 1598. The French, who had taken possession of the island, besieged it in

vain in 1377. Charles I. was imprisoned here, Nov. 14, 1647. He endeavoured to escape, Dec. 28, but was prevented, and remained in the castle till the end of 1648. Elizabeth, his daughter, died here Sept. 8, 1650, in her 15th year. A tablet to her memory has been erected in Newport church by Queen Victoria.

CARLAVROCK (Scotland).—This castle, on the Nith, was captured by Edward I., between the 6th and 12th of July, 1300. The siege forms the subject of a contemporary poem, of which Sir N. H. Nicolas published a translation in 1828.

CARLISLE (Cumberland) was destroyed by the Danes about 900 A.D. William II. restored it 1093, and founded its castle. Carlisle suffered greatly during the border wars, was destroyed by fire in 1292, and resisted a siege by Robert Bruce in 1315. A parliament was held here July 1, 1300. Richard III. extended the castle, and Henry VIII. ordered the citadel to be built. The bishopric was founded April 11, 1132, and the first bishop was consecrated in August, 1133. Carlisle remained faithful to the cause of Charles I., was repeatedly assailed by the republican forces, and finally captured, after a long siege, July 2, 1645. The Pretender's forces obtained possession Nov. 15, 1745, the garrison having capitulated the day before. It was retaken by the duke of Cumberland, Dec. 30, in the same year.

CARLISLE ADMINISTRATION.—The earl of Carlisle was appointed first lord of the Treasury, May 23, 1715, to supply the vacancy caused by the death of the earl of Halifax. The other members of the Halifax administration continued in office. The duke of Montrose gave up the seals of office Aug. 5; the earl of Sunderland was made lord privy seal Aug. 20, and the dukes of Argyle and Roxburgh were appointed members of the cabinet council, Aug. 31, 1715. It was dissolved in Oct. 1715. (*See WALPOLE'S (First) ADMINISTRATION.*)

CARLOW (Ireland).—The castle was founded by the English in the 12th century. Carlow was made a borough in 1208, and fortified in 1362. The Irish rebels were defeated near this town with great slaughter, May 24, 1798. The railroad from Dublin was opened Aug. 10, 1846.

CARLOWITZ (Treaty), concluded Jan. 26, 1699, between Turkey, and Germany, Poland, Russia, and Venice. The Turks, for the first time, sought to enter into diplomatic relations with the European powers, and ambassadors from Austria, Poland, and Russia assembled at Constantinople to ratify this treaty.

CARLSBAD (Bohemia).—This town has been celebrated for its mineral springs from a very early period. The first spring, the Sprudel, was, according to tradition, discovered by Charles IV., in 1370, during a hunting excursion. A congress of German powers was held at Carlsbad, Aug. 1, 1819, for the purpose of considering what measures were necessary to prevent the spread

of revolutionary principles in Germany. It endeavoured to suppress secret societies and to establish the censorship of the press.

CARLSRUHE (Germany), the capital of the grand-duchy of Baden, was founded by the margrave Charles William, who made it his hunting-seat, in 1715. A new palace was commenced in 1751. A revolution occurred at Carlsruhe May 14, 1849. The town was occupied by the troops of the confederacy, June 23, when the insurrection was suppressed.

CARMATHIANS.—A branch of the Shiite sect, founded by an Arabian preacher, who assumed the name of Carmath. He first appeared in Cafa about 890 A.D. Gibbon says (ch. lii.) that he "assumed the lofty and incomprehensible style of the Guide, the Director, the Demonstration, the Word, the Holy Ghost, the Camel, the Herald of the Messiah, who had conversed with him in a human shape, and the representative of Mohammed the son of Ali, of St. John the Baptist, and of the angel Gabriel." The Carmathians, after a sanguinary struggle, obtained the supremacy in the province of Bahrein, in 900. They conquered Syria and Mesopotamia in 902, pillaged Mecca in 929, and carried away the Caaba. The Carmathians soon after separated into factions, and their power declined. (*See ASSASSINS.*)

CARMEL. Knights of the order of Our Lady of Mount Carmel.—This order was founded in 1607, by Henry IV. of France. Paul V. confirmed it in July, 1608, when it was annexed to the order of St. Lazarus of Jerusalem. In 1645 this arrangement was confirmed by Pope Innocent X., and the order was named *Knights of our Lady of Mount Carmel* and of *St. John of Jerusalem*. The uniform of the order was settled in 1695. In 1779 the two orders were again separated, and *St. Lazarus* took the precedence in rank, *Our Lady of Mount Carmel* holding a secondary station, and being annexed to the pupils of the *Ecole Militaire*. These orders may now be considered extinct, as they have not been conferred since the return of Louis XVIII. to the throne of France, July 8, 1815.

CARMELITES.—This religious order of St. Mary of Mount Carmel was founded in the 12th century. The Carmelites themselves claim an unbroken succession from Elijah, and speak of the Virgin Mary as a Carmelite nun. About 1205, Albert, patriarch of Jerusalem, prescribed a rule for them, which was confirmed by Honorius III. in 1226. They were driven from Syria by the Saracens in the 13th century, and became mendicant friars in 1247. They came to England in 1240, and had forty houses in this country. Gregory XIII. divided them into two branches in 1580, according to a reform projected by St. Theresa in 1540, the more rigid being called *Barefooted Carmelites*, because they went barefooted. During the latter half of the 17th century the antiquity of the order was disputed by the Jesuits; and the quarrel became so vio-

lent, that Innocent III. put an end to it, Nov. 20, 1698. The Carmelite nuns, or Carmelites, were instituted in 1452.

CARNATIC (Hindustan).—This province was conquered by the Mohammedans A.D. 1310. Nizam ul Mulk wrested it from the Mongol empire in 1717. Anwar ud Deen was made nabob of the Carnatic by Nizam ul Mulk, and his son, Mohammed Ali, was put in possession of part of his father's territories by the British in 1754, after a hard struggle with opposing claimants, who were aided by the French. After various reverses, it was again surrendered to Mohammed Ali in 1763, and in 1783 it was wrested from Hyder and Tippoo Saib by the British, who obtained the whole province by treaty in 1801. The last nabob died without issue in 1855, and with him was extinguished one of the Hindoo Mohammedan dynasties.

CARNIVAL, or "FAREWELL TO FLESH," a festive season observed in Roman Catholic countries. It commences on the day of the Epiphany (Twelfth-day), and terminates on Ash-Wednesday. It is an imitation of some portion of the pagan festival of the Saturnalia, and has existed from a remote period.

CAROLINA (United States) is supposed to have been discovered by John Ponce de Leon in 1512, though some writers say that its coasts were explored by Sebastian Cabot in 1498. In 1564 the French built a fort here; but they were expelled by the Spaniards. The colony of Roanoke was planted in this part of America by Raleigh in 1584. The experiment having failed, another attempt was made in 1587, with no better results. In 1630 Sir Robert Heath, attorney-general of Charles I., obtained from that monarch a grant of the district of Carolana, which, though distinct from Carolina, included most of that province in its limits. The first settlements were made in 1660, by emigrants who fled from Virginia to escape religious persecution; and from them the colony received the name of Albemarle. By a charter of March 24, 1663, Charles II. conferred it upon Lord Clarendon and others, from whom it received the name "Carolina," about 1675. Charlestown was founded in 1680. The original constitution of the colony, which had been prepared by John Locke, was abandoned in 1693. The culture of rice was introduced in 1695. The Church of England was established by law in 1704. In 1719 the colonists threw off the proprietary government, and in May, 1729, the English parliament purchased the province of the lords proprietors for the sum of £17,500. In virtue of this arrangement, George II. immediately divided it into the two governments of North and South Carolina. In 1738 a dangerous insurrection of negroes was suppressed. The Cherokees held a conference with the governor of South Carolina in 1755, and ceded an immense territory to the British, which enabled the colonists to extend their settlements farther inland. Disagreements resulted, however, and in 1760 the Cherokees commenced hostilities, and intro-

duced all the horrors of Indian warfare into the province. In 1769 both divisions of the colony declared their opposition to the English government in reference to the Stamp-Act question, and in 1771 about 1,500 insurgents, called "regulators," took up arms, and were defeated at Almansee by Governor Tryon, May 16. In 1780, Sir Henry Clinton led an expedition against South Carolina, and after taking Charlestown, May 12, returned to New York early in June. South Carolina was admitted into the Union May 23, 1788, and North Carolina Nov. 27, 1789. (*See UNITED STATES.*)

CAROLINE BOOKS.—These four books were written by order of Charlemagne against images, and to refute the decree on this subject of the second council of Nice, A.D. 787. They were read before the council at Frankfurt-on-the-Maine in 794, by order of Charlemagne. Roger Hoveden attributes the authorship to Alcuin. They were first published at Paris in 1549.

CARROO (Hindustan).—This fortress was taken by Lang, April 2, 1783; and by General Meadows in June, 1790.

CARPETS have been in use from the earliest times, and are frequently mentioned in the Bible. Plato the philosopher draws the distinction between the coverings placed round the couch and under it, whilst his name-sake, the comic poet, speaks of "purple-cushioned couches." Athenæus states that the art of weaving embroidered cloths was in great perfection about this time. Sophron speaks of coverlets embroidered with figures of birds, as being of great value. Homer calls these cloths spread on the ground, white, neither dyed nor embroidered. Carpets were found in the ruins of Pompeii. Carpets were introduced into Spain from the East, and from Spain they passed into France and England. When Eleanor of Castile, wife of Prince Edward, afterward king, arrived in London, 1255, the rooms of her abode were covered with carpet. They were used generally in the palace during the reign of Edward III. This is spoken of as a Spanish custom, and one that excited much ridicule among the English people. Bedroom carpets occur in 1301. Turkey carpets were advertised for sale in London in 1660. The manufacture of carpets was introduced into France by Colbert in 1664. A manufactory was opened in England during the reign of Henry VIII.; but this branch of industry was not permanently established until 1685, when artisans, driven from France by the revocation of the edict of Nantes, flocked to this country. Brussels carpets were introduced into Kidderminster from Tournay in 1745.

CARPI (Battle).—Prince Eugene, at the head of the imperialists, defeated Marshal Catinat and the French army at this place, in Italy, Aug. 1701.

CARPOCRATIANS.—The followers of Carpo-crates, a native of Alexandria, who in the 2nd century revived several Gnostic errors. He rejected the Old Testament and the gos-

pels of St. Matthew and St. Luke; denied the resurrection of the dead, and advocated the most licentious mode of life. Mosheim calls him "the worst of all the Gnostics."

CARRHÆ (Mesopotamia).—The modern Harran is supposed to be the Haran whence Abraham departed, B.C. 1921 (Gen. xii. 4). Crassus was defeated here by the Parthians, B.C. 53, with the loss of the larger part of the Roman army. Caracalla was assassinated on a pilgrimage he had undertaken from Edessa to the celebrated temple of the Moon at Carrhæ, March 8, 217 A.D.

CARRIAGES of various kinds were used by ancient nations. The horse litter preceded the introduction of carriages into this country. The earliest carriages used by the ladies of England were called *whirligigotes*. Long waggons, for the conveyance of passengers and goods, went between London and some large towns in 1605. They were, however, even at this time, but little used, the principal traffic of the country being carried on by means of pack-horses. The long waggons, or machines, were followed by the waggon-coach, which was superseded by stage-coaches. The principal modern vehicles are noticed under their ordinary names. (See **STAGE CARRIAGES**.)

CARRICKFERGUS (Ireland).—John de Courcy planted a colony here A.D. 1182, and built a castle. The town was taken and burnt by Niall O'Neill in 1384. In 1497 a monastery of Franciscans was founded. The English suffered a defeat here in 1503, and in 1597 the governor, with many others, was slain by some Scottish troops under Sir James Mac-Donnell. William III. landed here June 14, 1690. The French admiral Thurot took the town Feb. 28, 1760; but was very soon compelled to evacuate it; and Paul Jones captured a British sloop of war in the bay, April 24, 1778.

CARROCICUM.—The invention of this vehicle is usually ascribed to Eribert, archbishop of Milan, about 1040 A.D. It was drawn by oxen, had a lofty pole, surmounted with a golden banner, and decorated with a white banner. A crucifix was fixed in the middle of the pole. The carrocium, used at first in the civil wars of Milan, was adopted throughout Italy, and appeared in every army, guarded by a chosen band, to inspire courage in the combatants.

CARRONADE.—This piece of carriage ordnance, invented by General R. Melville, takes its name from the Carron ironworks, where it was first cast in 1779. A trial of a hundred-pounder carronade was made at the Leith battery, Oct. 6, 1781. The result was satisfactory. They were first used in action by Lord Rodney, in his contest with De Grasse, April 12, 1782. Allen ("Battles of the British Navy") remarks, under 1800, that "at the commencement of this century, carronades were in general use in all classes of ships."

CARTHAGE.—According to the legend followed by the poet Virgil in the *Æneid*, Carthage was founded by Dido, or Elissa,

daughter of a king of Tyre. Her brother Pygmalion, at that time king, murdered her husband for the sake of his treasures, with which Dido, accompanied by several noble Tyrians, managed to escape. Having touched at Cyprus, from which island her followers carried off eighty maidens to be their wives in their new home, they landed on the coast of Africa, near Utica, a Phœnician city. From the natives they obtained for an annual tribute as much land as a bull's hide would encompass. Dido cut the bull's hide into small shreds, and thus obtained a large tract of territory. The new city, called Byrsa, was afterwards the citadel of Carthage. This event has been assigned to different periods, ranging from 140 to 65 years before the foundation of Rome. There can be little doubt that Carthage was a colony of Tyre. It may, as some authorities suppose, have been at first an emporium established by the merchants of Utica and of Tyre. At any rate, it speedily became important and concluded a commercial treaty with Rome B.C. 503.

B.C.

- 573. Dido founds Carthage.
- 503. A commercial treaty is concluded with the Romans.
- 480. Gelon defeats the Carthaginians, and slays their general, Hamilcar, at Himera, in Sicily.
- 410. The Carthaginians again invade Sicily.
- 406. They take Agrigentum, in Sicily, after a siege of about eight months.
- 398. The Carthaginians are defeated in Sicily, and return to Carthage.
- 396. The Carthaginians, under the younger Hamilcar, return to Sicily, and, after many victories, lay siege to Syracuse, which they are compelled by a pestilence to abandon.
- 392. Dionysius defeats the Carthaginians in Sicily, and compels them to sue for peace.
- 379. Sicily is again invaded by the Carthaginians, who effect a landing in Italy.
- 348. Second commercial treaty with the Romans.
- 340. Discovery and suppression of Hanno's conspiracy to massacre the senate and establish a despotism.
- 339. Timoleon defeats the Carthaginians on the banks of the Crimessus, in Sicily.
- 310. Agathocles, tyrant of Sicily, is defeated at Himera, and invades Carthage.
- 308. Revolutionary conspiracy of Bomilcar.
- 306. Third commercial treaty with Rome.
- 264. First Punic war.
- 260. The Romans, under the consul Duillius, defeat the Carthaginians in a sea-fight off Tyn-daris.
- 255. Regulus is defeated and made prisoner in Africa, by the Carthaginian leader Xanthippus, the Spartan.
- 251. Metellus defeats Hasdrubal, and the Carthaginians send Regulus to Rome to sue for peace.
- 250. Regulus urges his countrymen to prosecute their conquest of Carthage and returns to his captors, by whom he is cruelly executed. Defeat of the Romans at Lilybœum.
- 247. Hamilcar Barca becomes the Carthaginian leader. Birth of Hannibal.
- 241. Lutatius defeats the Carthaginians, who are compelled to sue for peace, which ends the first Punic war. The mercenary troops rebel, but are defeated by Hamilcar.
- 238. Hamilcar Barca invades Spain, and subjects many of the native tribes to Carthage.

B.C.

229. Hamilcar falls in battle against the Vetrones. His son-in-law Hasdrubal succeeds him, and founds New Carthage, now Carthagera.
221. Assassination of Hasdrubal, who is succeeded by Hannibal.
219. Hannibal is victorious in Spain.
218. Hannibal invades Italy, and begins the second Punic war. He defeats the Romans at Ticinus and Trebia.
217. Hannibal wins the battle of Thrasymene.
216. Aug. 2. Hannibal defeats the Romans at Cannae.
210. Publius Scipio takes New Carthage.
207. Defeat and death of Hannibal's brother Hasdrubal, near the Metaurus.
206. Scipio expels the Carthaginians from Spain.
204. Scipio besieges Utica.
203. Hannibal returns to Carthage.
202. Battle of Zama. Scipio utterly defeats the Carthaginians, who lose 40,000 men, killed or made prisoners, the Roman loss being 2,000 men.
201. Peace puts an end to the second Punic war.
174. Roman embassy at Carthage, to inquire into the conduct of Masinissa, king of Numidia.
149. Third Punic war.
146. July. Scipio Africanus destroys Carthage by order of the Roman senate.
123. Carthage rebuilt, and established as a Roman colony.
46. Julius Caesar plans the restoration of Carthage.
19. Augustus sends thither 3,000 colonists.

A.D.

215. Is erected into a bishopric.
439. Is taken by the Vandal Genserich.
533. Is recaptured by Belisarius, by whom it is named Justiniana.
698. Is taken and destroyed by the Saracens under Hassan.

Councils were held at Carthage in the following years:—200, 217, 251, 252, 253, 254, 255, 256, 312, 330, 348 or 349, 386, 390, 397, 398, 401, 403, 404, 405, 407, 403, 409, 410, 411, 412, 416, 417, 418, 419, 425, 484, 525, and 535.

CARTHAGENA (South America), the capital of a province of the same name, in New Granada, was founded by Pedro de Heredia, in 1532, and was taken by Sir Francis Drake in 1586. Admiral Vernon attacked it March 9, 1741. After some temporary success, the siege was raised April 14. The town was again cannonaded on the 16th, but without any decisive result. A large portion of the town was destroyed by an earthquake, Nov. 9, 1761. During the revolutionary war in South America, Carthagera was captured by the royalists, after a siege of four months' duration, Dec. 6, 1815. It was retaken by the republicans Sept. 25, 1821. An episcopal see, under the metropolitan of Santa Fé, was established here in 1537.

CARTHAGENA (Spain), the ancient Carthago Nova, was founded by Hasdrubal, the son-in-law of Hamilcar Barca, B.C. 229. It was celebrated for the rich silver-mines in the neighbourhood. Hannibal made it his winter quarters B.C. 218. Scipio Africanus took it B.C. 210. Christianity was introduced into this city during the 1st century. Among the signatures at the first council of Tarragona, A.D. 516, is that of Hector, bishop of Carthagera. The Vandals devastated the place in 428, and the Goths destroyed it in the 6th century; after which

the see was removed to Bigastro. It was, however, restored, and in 1291 the bishop obtained permission to transfer it to Murcia. The modern Carthagera was taken by Sir John Leake, June 13, 1706 (O.S.), but was retaken by the duke of Berwick, Nov. 18 (N.S.), in the same year. The port was blockaded by an English fleet in 1758, and again in 1805. The French took possession of Carthagera in 1823.

CARTHUSIANS.—This order of monks, a branch of the Benedictines, was instituted by Bruno of Cologne, canon of Rheims, A.D. 1080. Their first monastery was at Chartreux, or Chartreuse, in France, and from this their establishments in England were called Chartreuse or Charter-houses. The customs and usages of the order were committed to writing by Guigo in 1110, and were confirmed by Alexander III. about 1174. They were frequently altered, and a complete code was compiled in 1581, and this was approved by Innocent XI. in 1688. All houses of the order were placed under the control of the prior of the Grand Chartreuse in 1508. The Carthusians came into England in 1180 or 1181, and their first house was at Witham, in Somersetshire. They had only nine houses in this country. The Charterhouse in London was one of their monasteries. It is the only order which has never required reform. There were nuns of this order. In 1775 they had, however, but five houses in the world; viz. at Prémol, near Grenoble, founded in 1234; at Melan, in Savoy, in 1288; at Salette, on the Rhone, in 1299; at Gosné, in the diocese of Arras, in 1308; and at Bruges, in 1344.

CARTOONS are large drawings made in chalk or body-colour, preparatory to the completion of any important work in oil or fresco. The most celebrated are those of Raphael, executed as designs for tapestry by order of Leo X., during the two last years of the painter's life (1519-20). They were originally twenty-five in number; but only seven now remain; of which the subjects are, "Christ's Charge to St. Peter," "The Miraculous Draught of Fishes," "Elymas struck blind," "The Healing of the Cripple at the Beautiful Gate," "The Death of Ananias," "The Sacrifice at Lystra," and "Paul preaching at Athens." On the recommendation of Rubens, Charles I. purchased them in Flanders in 1629.

CARTS.—These carriages on two wheels were used for agricultural purposes in very early times, and appear to have been introduced into this island by the Romans. Carts of war, a peculiar kind of artillery, are described in an act of the parliament of Scotland in 1456; and by another act, in 1471, the chieftains are ordered to provide them for use against the English.

CARWAR (Hindustan).—The English established a factory here A.D. 1663. It did not, however, prove prosperous. The fort of Carwar was taken by Carpenter in 1783, and was ceded to the East-India Company in 1779.

CASBIN, or CASWEN (Persia), was founded by Shapoor Zoolactaf, A.D. 154. Until the accession of Shah Abbas, in 1582, it was the capital of the Sooffee dynasty, and it is still a town of considerable size and commerce.

CASHEL (Ireland) was erected into a bishopric at a very early period, but no certain record of the episcopal succession remains earlier than A.D. 901. The cathedral is said to have been built in the 11th century. In 1152 the see was made archiepiscopal by Pope Eugenius III.; and in 1172 the great synod of Cashel acknowledged the civil authority of the king of England and the ecclesiastical superiority of the Anglican church. In 1179 the city was destroyed by fire; but it was soon rebuilt, and in 1223 was erected into a borough. The abbey was founded about 1260, by David MacCarwell. In 1498 the earl of Kildare set fire to the cathedral, and ravaged the town, in consequence of a disagreement with the archbishop. Charles I. erected this borough into a city in 1640, and during the Rebellion the inhabitants espoused his cause until 1647, when the royalist garrison was expelled with great slaughter. Since the Revolution in 1688, Cashel has lost much of its importance. The cathedral was unroofed in 1752, and is now a ruin. By the Church Temporalities Act, 3 & 4 Will. IV. c. 37, s. 32 (Aug. 14, 1833), the see was again made a bishopric, in connection with Waterford, Lismore, and Emly, and on the death of Archbishop Lawrence, in 1838, the proposed change was carried into effect.

CASHMERE (Asia).—This country, in the valley of the Himalaya, supposed to be the ancient Caspiria, in which the city of Caspatyrus, mentioned by Herodotus, was situated, fell under the Mohammedan rule in the 16th century. It was annexed to the Affghan empire in 1754. The Sikhs conquered it in 1819, and ceded it to the East-India Company by the fifth article of the treaty of Lahore, concluded March 9, 1846. It was transferred to the Maharajah Gholab Singh, who was made an independent prince as a reward for his fidelity, by a treaty concluded at Neuritzur, March 16, 1846. Cashmere is celebrated for its shawls, which are of beautiful texture, and have been sold in London at prices as high as from 400 to 500 guineas each. They are made from the hair of the Thibet goat. The capital of the country, also called Cashmere, or Srinagur, the ancient Caspatyrus, is said to have been founded by Pravaraseva, who reigned from A.D. 128 to 176. It stands on the river Jhelum.

CASILINUM (Italy).—This town, situated on the river Vulturius, was occupied by Fabius B.C. 217, and held by the Romans after their defeat at Cannæ, until the garrison was reduced by famine, B.C. 215. The Romans regained possession B.C. 214. Narses defeated the Franks and Alemanni at Casilinum A.D. 554. The modern town of Capua is built upon its site.

CASSANO (Battles).—Prince Eugene, at the head of the imperialists, encountered

the French, led by the duke of Vendôme, at this town, on the Adda, Aug. 16, 1705. Both sides claimed the victory. Suwarrow, with an army composed of Russian and Austrian troops, assailed the French in the neighbourhood of Cassano, April 27, 28, and 29, 1799. The latter lost 2,000 killed and 3,000 prisoners, with thirty guns; and Moreau at once withdrew from Lombardy.

CASSATION (Court of).—This tribunal, to revise the sentences of inferior courts, was established at Paris by the National Assembly in 1790. The chamber in which it is held was redecored by Peyre in 1810.

CASSEL (Germany).—The capital of Hesse-Cassel, founded towards the end of the 9th century, was a place of little importance until it became a refuge for the French Protestants, who commenced the Ober Neustadt, or New Town, in 1688. In 1760 it was taken by the French; was besieged by Count Lippe in 1761; and by Prince Ferdinand, by whom it was taken, Nov. 1, 1762. The fortifications were destroyed in 1767. It was occupied by the French in 1806, and formed the capital of the kingdom of Westphalia, under Jerome Bonaparte.

CASSITERIDES.—These islands, famous for their tin-mines, are first mentioned by Herodotus (born B.C. 484), though he admits that he could furnish no information respecting them. Aristotle (born B.C. 384) and Polybius (born B.C. 206) also allude to these islands. Strabo describes them as being inhabited by men in black cloaks, with tunics reaching to their feet, carrying staves in their hands, and bearded like goats. This group is now generally believed to be the Scilly Isles.

CASTEL FIDARDO.—Cialdini, the Sardinian general, defeated the papal army led by Lamoricière, at this place, near Loreto, Sept. 18, 1860. Lamoricière took refuge in Ancona.

CASTELLA (Battle).—Suchet attacked the English and Spanish in this strong position, in the south of Spain, April 13, 1813. The allied army consisted of 17,000 men, while the French, who were completely defeated, only mustered about 15,000.

CASTELNAUDARY (France) was deprived of its walls A.D. 1229, by the count of Toulouse, and was taken and burnt by the Black Prince in 1355. In 1366 it was rebuilt. The battle of Castelnauudary, in which Marshal Schomberg defeated the duke of Montmorency, was fought in 1632.

CASTELNUOVO (Battles).—After the victory of Arcola, Napoleon defeated the rear-guard of the Austrian army, under General Davidovich, at Castelnauovo, and made 1,200 prisoners, Nov. 21, 1796. The French, under General Marmont, defeated the Russians at the same place, Sept. 29, 1806.

CASTIGLIONE (Battle).—The French, under Augereau, defeated the Austrian general Wurmser, at this town, near Mantua, Aug. 5, 1796. A pageant, representing the battle of which Castiglione had been the theatre, took place here in 1805. Napoleon I.

and the empress, seated on a lofty throne, witnessed the display.

CASTILE (Spain).—The Christian inhabitants of Spain, compelled to retire before the Saracen invaders in the 8th century, took refuge in the mountains, where they maintained their independence. Their descendants, gathering strength, advanced into the open country, and for the protection of the territory which they wrested from the Moors, constructed forts, called in Spanish *castillos*. From this circumstance, the name Castile was applied to a portion of the country rescued from the grasp of the invaders. Castile, governed at first by counts dependent on Leon, was erected into a kingdom by Ferdinand, son of Sancho the Great, king of Navarre and Aragon, in 1035.

- A.D.**
 860. Rodrigo, first authentic count of Castile.
 762 (about). Castile declared independent under Count Rodrigo Fructaz.
 791. Alfonso II., surnamed the *Chaste*, becomes king of the Asturias, Leon, and Castile.
 950. Ramiro II. abdicates in favour of his son.
 970. Death of Gonzalez, count of Castile.
 995. Don Sancho Garcés rebels against his father, Don Garcia Fernandez, count of Castile, who is defeated and taken prisoner by the Cordovans.
 1026. Sancho the Great conquers Castile, and becomes its king.
 1037. Ferdinand, king of Castile, becomes king of Leon.
 1065. Death of Ferdinand I., king of Castile, and consequent separation between Castile and Leon.
 1072. Sancho II. of Castile is assassinated at Zamora, and Alfonso VI. of Leon reunites the kingdoms.
 1135. Alfonso VIII., king of Castile and Leon, assumes the imperial title.
 1157. On the death of Alfonso VIII., the two kingdoms are again separated, Sancho III. becoming king of Castile.
 1169. The Cortes assemble at Burgos.
 1170. Marriage of Alfonso III. of Castile with Eleanor, daughter of Henry II. of England.
 1230. Ferdinand III. of Castile seizes Leon, and reunites the two kingdoms.
 1252. Death of Ferdinand III., who is canonized by Clement X. in 1671.
 1256. Alfonso X., of Leon and Castile, is elected emperor of Germany, the honour being contested by Richard of Cornwall, brother of Henry III. of England.
 1275. Death of Fernando de la Cerda, heir of Castile and Leon, which occasions disputes respecting the succession.
 1294. Restoration of peace.
 1303. The Pope orders the suppression of the Castilian Templars.
 1327. Alfonso XI. confiscates the estates of John, lord of Biscay.
 1350. Accession of Peter I., the Cruel.
 1356. Peter I. is opposed by his brother Henry, who invades Castile, of which he is solemnly proclaimed king.
 1367. Edward the Black Prince goes to the assistance of Peter. He penetrates into Castile, and utterly defeats Henry and his army at Logrono, April 2, 1367.
 1369. Henry again invades the kingdom, and defeats and puts to death Peter, at Montiel, March 23.
 1381. John I. repels the Portuguese fleet which was sent to invade Castile.
 1386. July. John of Gaunt, duke of Lancaster, invades Castile, and is proclaimed king at Santiago.

A.D.

1387. John of Gaunt foregoes his claim to the crown of Castile, on condition that John's son, Henry, marries his daughter Catherine.
 1390. Oct. 9. Death of John I., in consequence of a fall from his horse. His infant son, Henry III., succeeds him.
 1407. Accession of John II., under the regency of his uncle Ferdinand.
 1439. Revolt of the Castilians, who demand the permanent expulsion of Don Alvaro de Luna from the court.
 1469. Oct. 19. Marriage of Isabella of Castile and Ferdinand of Aragon.
 1474. Ferdinand and Isabella proclaimed sovereigns of Castile.
 1479. Ferdinand becomes king of Aragon, which is thus united to Castile.

SOVEREIGNS OF CASTILE.

A.D.	A.D.	A.D.
Sancho I. the Great 1026	Sancho IV. 1284	
Ferdinand I. 1035	Ferdinand IV. 1295

Sancho III. 1157	Henry III. 1390	
Alfonso III. 1158	John II. 1406	
Henry I. 1214	Henry IV. 1454	
Ferdinand III. 1217	Ferdinand and Isabella 1474	
Alfonso X. 1252		

CASTILLEJOS (Africa).—General Prim, at the head of the Spanish army, defeated the Moors at this place, Jan. 1, 1860.

CASTILLON (France).—Charles VII., of France, defeated John Talbot, earl of Shrewsbury, near this town, in Guienne, July 7, 1453. Talbot was slain in the battle, in which the French were greatly superior in point of numbers. Castillon surrendered to the French, July 16. The result was that Guienne passed out of the possession of the English. Admiral Penrose destroyed a flotilla at Castillon, April 6, 1814.

CASTLE.—The ancient Greeks and Romans erected castles very similar in appearance to ours; and Gildas relates that the aboriginal British built very strong tall houses on the tops of hills, which were fortified for purposes of defence. Perhaps the oldest castle whose date is determined is the Roman fortress at Richborough, in Kent, which was commenced *A.D.* 43, and completed by Severus, about the year 205. Anglo-Saxon castles consisted of a round or square tower-keep, ascended by a direct flight of steps in front; and such a one was erected at Bamfborough, by Ida, king of Northumberland, about 548, though they appear not to have become common till the reign of Alfred. The chief alteration introduced by the Normans, was an enlargement and elaboration of the keep, which was built of prodigious strength and security. One of the most famous is that at Rochester, built by Bishop Gundulph, about 1088.

CASTLEBAR (Battle).—General Humbert, at the head of a French force of 1,150 men, defeated General Lake near this town, in Ireland, Aug. 27, 1798. The former, who had landed at Killala Aug. 22, were after-

wards surrounded, and laid down their arms at Ballinamuck, Sept. 8.

CATACOMBS, called *cryptæ* and *arenaria*, says Bingham, from their being digged *privately* in the sand under ground, were the places used for Christian burial during the first three centuries of our æra. The catacombs in the Via Appia, near Rome, extend for six miles under ground, and are supposed to have been quarries. The bodies of St. Peter and St. Paul are said to have been interred in these catacombs. They were, it is believed, used as places of interment by the pagans before they were thus employed by the Christians, who often assembled in them for the celebration of divine worship. Catacombs are found in various countries. The catacombs of Egypt, explored by Belzoni in 1815-17, were found to contain vessels of various kinds, works of art, deeds, and other documents. Romanelli discovered in a catacomb at Naples, inscriptions recording the ravages committed by the plague in that city A.D. 1020. The catacombs at Paris are the quarries out of which materials were excavated for the building of the city. The victims of the massacres of September, 1792, were interred in these crypts, to which the remains of human beings taken from the Paris cemeteries, suppressed in 1784, had been removed. Several persons were lost in these labyrinthine chambers, which, on account of their dangerous nature, are now closed to the public.

CATALOGUES OF BOOKS.—George Willer, a bookseller at Augsburg, who frequented the fairs at Frankfurt, first published a catalogue of new books, with titles and size. There is a difference of opinion respecting the date of his first catalogue, some authorities placing it in 1554, and others in 1564. Hallam is in favour of the latter. The earliest known catalogue of English books for sale is one published by Andrew Maunsell, in 1595.

CATALONIA (Spain).—This province, forming part of the Roman *Tarraconensis Provincia*, the new name given to *Hispania Citerior* by Augustus, was, on the decline of the Roman power, invaded by the Goths and the Alani, about A.D. 410, and a settlement formed by them was called Goth-Alania. The Saracens conquered it A.D. 712, and it was wrested from them by Charlemagne in 788, and included in his Spanish march. Catalonia was annexed to Aragon by the marriage of Queen Petronilla with Raymond Berenger, count of Barcelona, in 1137. Philip III. of France invaded it in 1273. A general insurrection against the Aragon dynasty broke out in Catalonia in 1461, and the inhabitants, in 1466, elected René the Good, of Anjou, king. He was, however, unable to accept the proffered crown, and an accommodation was made with the king of Aragon, who swore to respect the laws and constitution of Catalonia, Dec. 22, 1472. Both Aragon and Catalonia were united with Castile by the marriage of Ferdinand

and Isabella, Oct. 19, 1469. Ferdinand emancipated the serfs of Catalonia in 1486, and transferred his court to this province in October, 1492. The inhabitants of Catalonia rose against the French in 1808; but, after a desperate struggle, it was subjugated and annexed to France in 1812. The struggle was renewed, and, with the assistance of the English, the French were expelled in 1814.

CATAMARAN.—During the invasion panic of 1804, some projector induced Lord Melville to countenance a plan for the destruction of the flotilla at Boulogne, by means of catamarans. They were copper vessels of an oblong form, containing a quantity of combustibles, and so constructed as to explode in a given time by means of clockwork. They were to be towed and fastened under the bottoms of the enemy's gunboats, by a small raft, rowed by one man, who, being seated up to his chin in the water, would, it was hoped, escape detection in a dark night. Fire-ships were also to be employed. Lord Keith anchored at about a league and a half from Boulogne on the 2nd of October, for the purpose of carrying out the experiment. Operations commenced at a quarter after nine the same evening, and terminated at a quarter after four on the morning of Oct. 3. No damage was, however, done to the enemy's fleet, and their loss was only twenty-five in killed and wounded. In fact the catamaran project proved a failure.

CATANIA (Sicily), the ancient *Catana*, founded about B.C. 730, by a Greek colony. The original inhabitants were expelled by Hieron of Syracuse, B.C. 476, and a colony of Syracusans and Peloponnesians introduced, the name of the city being changed to *Ætna*. The original inhabitants were restored B.C. 461. Dionysius of Syracuse captured it, and sold the people to slavery, B.C. 403. It submitted to the Romans B.C. 263, and having been captured by the Goths, was wrested from them by Belisarius, A.D. 536. This city, situated close to Mount *Ætna*, has frequently been partially destroyed both in ancient and modern times. Richard I. held a conference with Tancred at this city, 1190. The earthquake of 1693 committed the greatest havoc. Catania, however, rose from the ruins, and is considered the finest city in Sicily. It was made a bishop's see at an early period, but remained vacant for nearly 200 years, from the close of the 9th century, about which time Catania was captured by the Saracens, from whom it was wrested by the Normans. The nave of the celebrated cathedral, constructed from the ruins of an ancient pagan temple, was completely destroyed by the earthquake of 1693. The university was founded in 1445. During the Sicilian rebellion, it was captured by the royal troops, April 2, 1849.

CATAPHRYGIANS.—The followers of Montanus, who founded his new church at Pepuza, a small town of Phrygia, A.D. 171 or 172. (See MONTANISTS.)

CATEAU-CAMBRÉSIS (Peace).—The conferences for peace between England, France,

and Spain, opened at Cambray in Oct. 1558, were brought to a sudden close by the death of Queen Mary, Nov. 17, 1558. The commissioners, however, met again first at Cercamp, and afterwards at Cateau-Cambrésis, in Feb. 1559, and the peace known by this name was concluded between England, France, and Spain, April 2, 1559. The French called it the Unfortunate Peace. Two treaties were signed; the one between France and Spain, and the other between England and France. By the former, the contracting parties engaged to maintain the Roman Catholic worship inviolate, and the conquests made by each country during the previous eight years were restored. Henry II., of France, renounced all claims to Genoa, Corsica, and Naples. His sister Margaret was given in marriage to the duke of Savoy, with a dowry of 300,000 crowns; and his daughter Elizabeth, betrothed to the Infanta Don Carlos, was given to Philip II., of Spain, with a dowry of 400,000 crowns. By the treaty with England, Henry II. engaged to restore Calais within eight years, and to give security for the payment of 500,000 crowns in case of failure; the queen's title to Calais to remain unaffected by this payment. This was a general peace, to which all the principal powers of Europe acceded.

CATECHISM.—Bingham (book x. ch. 1, s. 6) shows that the subjects of the ancient catechisms were as follows:—The doctrine of repentance and remission of sins; the necessity of good works; the nature and use of baptism; the explanation of the several articles of the Creed; the nature and immortality of the soul; and an account of the canonical books of Scripture. The Catechism of the Church of England was published in 1551; the Tridentine Catechism in 1566; Noel's Catechism in 1570; and James I., at the Hampton Court conferences, recommended additions that were adopted in 1604; the Catechism of the orthodox Greek Church was published in 1642; the Shorter Catechism, prepared by the Assembly of Divines, in 1647; and the Longer in 1648.

CATHARISTS, or CATHARI.—This word, signifying pure, was applied to several sects in the early Church. The Apotactici and the Montanists, and especially the followers of Novatus, who separated from the Church A.D. 251, were called Cathari. The appellation was subsequently assumed by the descendants of the Paulicians, who appeared during the 12th century. Mosheim represents these Catharists as proceeding from Bulgaria, and spreading over Europe. He says they were divided into two principal parties, the one holding two first causes, and the other but one; and of the last-mentioned he makes the Albigensians a branch. There is much confusion in the accounts of these sects, and it is certain that the Albigenses of Languedoc were not Catharists.

CATHAY. (See CHINA.)

CATHEDRAL.—The name given to the episcopal church of every diocese, because it

contains the *cathedra*, or bishop's seat, was not used, in its present sense, before the 10th century, and is confined to the Western Church.

CATHERINE (Knights of St. Catherine of Mount Sinai).—This order of knights was instituted A.D. 1063, for the protection of pilgrims to the shrine of Catherine, saint, virgin, and martyr, who suffered at Alexandria, under Maximin, A.D. 307, and whose relics are said to have been miraculously conveyed to Mount Sinai, where they are preserved in a monastery. Landon (Eccles. Dict.) remarks: "She is said to have been put upon an engine made of four wheels joined together and armed with spikes, which, when the wheels were moved, were intended to lacerate her body; but at the instant at which the machine was put into motion, her bonds were miraculously broken, and she was released, only, however, to be instantly beheaded. Hence the name of *Catherine-wheel*."

CATHERINE HALL (Cambridge).—Founded in 1473.

CATHERINE, St. (Nuns of).—The earliest record of this order, which was originally for monks only, occurs A.D. 1188, when it is mentioned as connected with the hospital of St. Opportune. The title was changed to St. Catherine in 1222, and nuns were admitted about the year 1328. In 1558 the order became exclusively one of nuns, who received a new constitution and regulations from Eustace du Bellay, bishop of Paris, about 1564.

CATHERINE, St. (Order of), for females only, was instituted by Peter the Great, of Russia, or, as some say, by his wife Catherine, in 1714, in memory of his escape from the Turks in 1711.

CATILINE'S CONSPIRACY was formed by Lucius Sergius Catilina, a Roman patrician, born B.C. 108. He was elected prætor B.C. 68, governor of Africa B.C. 66, and intended to offer himself for the consulship B.C. 65; but the senate declared him ineligible, because he was under an accusation for misconduct in his late African administration. Annoyed at this, he entered into a conspiracy with P. Autronius and Cn. Piso to murder the new consuls on the day of their inauguration, the 1st of January. Piso was to be sent with an army to secure Spain, and the other two conspirators intended to seize the consulship. Suspicion having been excited, the execution of the plan was postponed until the 5th of February, when several senators were included in the list of proposed victims. Catiline gave the signal too soon, and the scheme miscarried, though its authors were not molested. Soon after, Catiline was brought to trial for alleged misconduct in Africa, and acquitted. In B.C. 63 he formed plans for a second revolution on an extended scale. Cicero, who was consul, obtained some intimation of his proceedings, and informed the senate of what he had learned. They made the usual provision to avert the peril, and Catiline, who

was again a candidate for the consulship, was rejected. His agents took up arms in Etruria, and attempted to assassinate Cicero, who called a meeting of the senate in the temple of Jupiter Stator on the Palatine Hill, Nov. 8, B.C. 64, and denounced Catiline, who in vain attempted to reply, and was compelled to quit Rome. Catiline left some of his associates behind, who, on a certain day, were to set fire to the city in several places, murder the magistrates and leading men, whilst Catiline was to be ready in the neighbourhood with an army to complete the massacre and put the finishing stroke to the revolution. By the vigilance of the authorities, the principal conspirators were arrested, Dec. 3, B.C. 64, and soon after strangled. Catiline's followers rapidly deserted him, and he was slain in a conflict with the army of the republic early in B.C. 63. Some critics question the accuracy of the account of this conspiracy given by Sallust and Cicero.

CAT ISLAND (Atlantic), St. Salvador, one of the Bahamas, is the first portion of the New World on which Columbus landed in 1492.

CATO-STREET CONSPIRACY, so called from the place, near the Edgeware Road, where the conspirators assembled to arrange their plans, was formed by one Arthur Thistlewood, who had imbibed revolutionary projects during a residence in France just after the fall of Robespierre. He had collected a few associates, and on Saturday, Feb. 19, 1820, they finally resolved to murder the ministers separately in their own houses, to seize the Bank, and set fire to London in several places, on the following Wednesday. Finding that a cabinet dinner was to be given at Lord Harrowby's, in Grosvenor Square, on the day they had fixed for carrying out the plot, they determined to obtain entrance by stratagem, and to murder the whole party. Information was given to government by one of the conspirators, and several of them were arrested in Cato Street, at eight on the Wednesday evening; Thistlewood, the leader, escaped; but he was taken on the following day in bed, in a house near Finsbury Square. They were found guilty. Thistlewood and four of his fellow conspirators were executed, May 1, 1820; five were transported for life, and one was pardoned.

CATTARO (Dalmatia).—The ancient Cattarus was a Roman colony. The modern town was probably founded in the 6th century. It suffered from earthquakes in 1563 and 1667. Formerly the capital of a small state, it was ceded to France by the treaty of Presburg, Dec. 26, 1805, and was to be given up in three weeks from that date. The Austrian garrison, however, surrendered it to the Russians, March 4, 1806, who held it till the next year, when they gave it up to France by the treaty of Tilsit. An English squadron captured Cattaro Jan. 5, 1814, and it was ceded to Austria at the general peace of 1814-15.

CAUDINE FORKS.—In the valley of Cau-

dium, supposed to be the modern Arienzo, the Romans were completely surrounded by the Samnites, in the spring of B.C. 321. Half their number were cut to pieces on the spot, and the remainder capitulated to the Samnite general, C. Pontius. The treaty was, however, flagrantly violated by the Romans. The name of the pass into which the Roman army had been allured was *Furcula Caudina*. According to Livy (b. ix. 2), it consisted of two narrow defiles, which opened into a plain, surrounded, excepting at these outlets, by mountains. The Romans advanced through the first defile, and found the second blocked up to oppose further progress, and their vigilant enemy at once closed the one through which they had entered. Hence retreat was impossible.

CAULIFLOWER was brought from the Levant to Italy about the end of the 16th century, and was introduced into Germany at the end of the 17th. Alpinus mentions that it was very plentiful in Egypt in 1588. It was introduced into England in the 17th century, and had become very plentiful towards its close.

CAUSINES, or the POPE'S MERCHANTS, Italian usurers who came to England early in the 13th century. They practised the most flagrant extortion, and are denounced by Matthew Paris as "a horrible nuisance." Roger, bishop of London, expelled them from the city of London A.D. 1235. They obtained the protection of the Pope, and became numerous. To such a height did they carry their extortion, that, in 1251, many of them were prosecuted in the civil courts and punished. They managed, by the payment of a large sum of money, to obtain permission to pursue their nefarious traffic, but were at length expelled.

CAUTIONARY TOWNS.—In July, 1585, Queen Elizabeth accepted the protection of the Netherlands, repeatedly urged upon her by their inhabitants. She engaged to supply them with 5,000 infantry and 1,000 cavalry, for which they were to pay at the close of the struggle with Spain. As security for this repayment, Briel, Flushing, Rammekins, and Walcheren, were placed in Elizabeth's possession; and these were called the Cautionary Towns. The Dutch only refunded a third of the sum due to England, but the Cautionary Towns were, notwithstanding, delivered to them June 14, 1616, the treaty for the purpose having been signed May 22.

CAVALIERS.—The apprentices of London published and circulated a petition against popery and prelates in 1641. Seditious cries having been raised, and the bishops assaulted on their way to Parliament, skirmishes between the malcontent apprentices and their followers, and many gentlemen who voluntarily offered their services to form the king's body-guard, were of almost daily occurrence. "And, from these contestations," says Clarendon, "the two terms of *roundhead* and *cavalier* grew to be received in discourse, and were afterwards continued for the most succinct distinction of affections

throughout the quarrel: they who were looked upon as servants to the king being then called *cavaliers*; and the other of the rabble contemned and despised, under the names of *roundheads*."

CAVALRY.—All ancient nations appear to have used horses in warfare. The Canaanites, whom Joshua defeated at the waters of Merom, are said to have assembled "with horses and chariots very many," B.C. 1445 (Josh. xi. 4). The Jews, however, possessed no cavalry till the time of David, who took from Hadadezer, king of Zobah, a thousand chariots. David houghed all the chariot horses except sufficient for a hundred chariots, B.C. 1040 (2 Sam. viii. 4). The conquests of Alexander the Great may be attributed to his numerous cavalry; and this arm of warfare gained for Scipio the battle of Zama, B.C. 202. Edward III. divided the English cavalry into small bodies, commanded by *constables*, A.D. 1324. The word *troop*, as applied to a body of horse-soldiers, first appears in an army list for 1557. The cavalry force of the United Kingdom for 1859-60 amounted to 21,117 men.

CAVAN (Ireland).—Part of Cavan was formed into a county of Ulster in 1584, and the remainder was escheated to the crown in 1610, in consequence of the rebellion of the O'Reillys. The chief town, Cavan, was burned in 1690.

CAWNPORE (Hindustan), the chief town of a district of the same name, was founded in the 18th century. The district belonged to Oude in 1777, and was ceded to the East-India Company in 1801. On the breaking out of the Sepoy revolt in 1857, the English residents of Cawnpore were placed in the greatest peril. Their efforts to obtain reinforcements failed, and the 2nd regiment of native cavalry revolted June 5. Their example was speedily followed by the native infantry. The English, their wives and children, with native servants, amounting to nearly 900 persons, were besieged within a narrow intrenchment, by the rebel soldiers commanded by Nana Sahib. They defended themselves heroically against overwhelming numbers. Death, however, rapidly thinned their ranks, and, June 24, Nana Sahib sent a message to Sir Hugh Wheeler, offering to allow the English to proceed unmolested to Allahabad, provided they gave up the public treasure, the guns, and ammunition. A contract to this effect was signed on the following day, and on the 27th, the remnant of the 900 besieged at Cawnpore, embarked in boats prepared to convey them to Allahabad. No sooner, however, had they quitted the shore, than the treacherous sepoys opened fire upon them, following them along the banks in order to insure their destruction. The boats were sunk, many of the men killed, and the survivors, with the women and children, carried back to Cawnpore. Other prisoners, male and female, were brought in, and all who survived were barbarously slaughtered on the 15th of July. Havelock defeated Nana Sahib near Cawn-

pore, July 16, and entered the town on the following day, when the horrors that had been enacted there became known. The Gwalior rebels defeated General Windham near Cawnpore, November 27 and 28, 1857. Sir Colin Campbell soon after reached the scene of action, and completely routed the rebels, 25,000 strong, at Cawnpore, Dec. 6.

CAYENNE (South America) was settled by the French A.D. 1604, and again in 1635. In 1654 the English supplanted them, and retained the colony till 1664. The Dutch seized it in 1676, but were compelled to restore it to the French in 1677. The British took Cayenne, Jan. 12, 1809, and relinquished it to France at the peace of Paris, May 30, 1814. During the revolution, many persons were transported to Cayenne. Many of the insurgents who fought at the barricades in Paris, June 22—26, 1848, were also sent there; and numerous political prisoners since that time have been transported to this colony by the French government.

CAZAN, or KAZAN (Russia).—Baton, a celebrated khan of the Golden Horde, founded this town A.D. 1265. It was taken and completely destroyed, its inhabitants having been cruelly massacred, by the Russians about 1405. The town was rebuilt by another khan of the Golden Horde in 1445. The Russians sent several expeditions against it, and committed great ravages. Ivan captured it Oct. 2, 1552, when the town was burnt, and the dominion of the khans overthrown.

CECRYPHALÆ (Battle).—The Athenians defeated the Corinthian and Epidaurian forces in a sea-fight off this island, B.C. 458.

CELEBES (Indian Archipelago).—The Portuguese occupied this island in the 16th century, and were followed by the English and the Dutch. The latter entered into treaties with the native rulers, and formed permanent settlements. The English wrested Celebes from the Dutch in 1811, but restored it at the general peace, and the Dutch returned in 1816. The harbour of Macassar, on the west coast, was made a free port from Jan. 1, 1847, by a decree dated Oct. 7, 1846.

CELIBACY.—Under the law of Moses, priests were allowed to marry, and the office was confirmed to the descendants of one particular family. The vow of perpetual celibacy, or abstinence from conjugal society, was not required of the clergy for the first three ages. "For the contrary is very evident," says Bingham (Antiq. b. iv. c. 5, s. 5), "from innumerable examples of bishops and presbyters, who lived in a state of matrimony without any prejudice to their ordination or function. It is generally agreed by ancient writers that most of the Apostles were married. Some say all of them, except St. Paul and St. John. Others say, St. Paul was married also, because he writes to *his yoke-fellow*, whom they interpret *his wife*." (Phil. iv. 3.) A life of celibacy began to be extolled in the 2nd century, and the withdrawal of ascetics and hermits to desert places, and the subsequent introduction of

monasteries, tended to bring it into repute. A proposal for compelling the clergy to abstain from all conjugal society with their wives, was rejected by the Council of Nice A.D. 325. The Council of Gangra, about 379, anathematized Eustathius, the heretic, because he taught men to separate from those presbyters that retained the wives to whom they had been married while they were laymen. Sericius, 385—398, was the first pope who ordered the clergy not to marry. It was not, however, until the time of Gregory VII., 1073—1085, that the system of the celibacy of the clergy was fully established. It met with much resistance, and the question was re-opened at the Council of Trent, which, by the ninth canon of the twenty-fourth session, decreed that persons in holy orders, and regulars who had made a vow of chastity, were incapable of contracting marriage, and that such marriages are null and void (1545—1563). Anselm, in 1102, introduced the practice into the English church. Convocation, in 1547, passed a law allowing the English clergy to marry.

CELTÆ, CELTS, or KELTS.—Turner (Anglo-Saxons, vol. i. b. i. c. 2) says: "The tendency of the notices of the Kelts, by Herodotus, Aristotle, and Ephorus, is to show, that in their times, this people lived in the western parts of Europe, about Gaul and Spain. They are spoken of as being in the same places by later writers." About B.C. 600, they invaded Italy, and, at a subsequent period, attacked Rome itself. They invaded Greece about B.C. 290. The earliest inhabitants or settlers in Britain came from this stock. The origin and history of the Celtæ have given rise to much controversy amongst learned men.

CELTIBERIANS.—The inhabitants of Celtiberia, an extensive inland division of ancient Spain, were known by this name. They are supposed to have arisen from a union of the aborigines, the Iberians, and their Celtic invaders. Various limits have been assigned to their country by ancient writers. Hannibal subdued the Celtiberians, and they afterwards passed under the Roman yoke. They revolted B.C. 181, and were subdued by Tiberius Gracchus, B.C. 179. Another struggle, which commenced B.C. 153, was waged with more or less fury until B.C. 133, when the Celtiberians were again reduced to subjection. Sertorius raised his standard against Sylla, B.C. 77. The Celtiberians at first gained several advantages, but the assassination of Sertorius, B.C. 72, proved fatal to their cause. The Roman authority was completely re-established, and the Celtiberians, as an independent people, do not again appear in history.

CEMETERY.—Ornamental burial-grounds existed in Turkey previous to their introduction into Western Europe. The National Assembly, in 1790, prohibited burial in churches, and ordered that public cemeteries should be formed. The ground for the Père la Chaise cemetery, at that time consisting of forty-two acres, was purchased by the

municipality of Paris, in 1800, to form the first national cemetery. It was consecrated in 1804, and the first grave was opened May 21. It has been since increased in size, and at present consists of 112 acres, surrounded by a wall. The Metropolitan Interments Act (13 & 14 Vict. c. 52, Aug. 5, 1850) laid down some salutary regulations respecting the London churchyards. This measure was amended by the Interment Act (14 & 15 Vict. c. 89, Aug. 7, 1851); and in consequence of these salutary changes in the law, the practice of intramural interments is being gradually discontinued. Bunhill Fields was opened as a suburban burial-place in 1665.

CENSORS.—Two Roman officers of state, first appointed B.C. 443. The office was the highest in the commonwealth after the dictatorship, and had been exercised from an early period, first by the kings and afterwards by the consuls, until two patricians received the appointment, B.C. 443. The censors attended to numbering the people. Public morals and the finances of the state were also placed under their control. The office was filled by patricians until B.C. 351, when C. Martius Rutilus, a plebeian, was elected. In B.C. 131 two plebeians were appointed. The duration of office, fixed at five years, was reduced to a year and a half by the lex Æmilia, B.C. 433. The office having ceased under the emperors, was revived by Decius A.D. 251, Valerian, afterward emperor, being unanimously appointed censor Oct. 27. Gibbon (c. x.) remarks, "A censor may maintain, he can never restore, the morals of a state."

CENSUS.—God commanded Moses to number the Israelites (Numbers, i. and ii.), B.C. 1490. David was punished for having numbered Israel (2 Sam. xxiv. 1), B.C. 1017. A census was taken at Athens B.C. 317, when the population was found to consist of 127,660 citizens and 400,000 slaves. The term census originated at Rome. The first census took place there B.C. 566, when the city was found to contain 84,700 citizens. After B.C. 432, it was held in the Campus Martius. It was generally taken every five years at Rome. The first census of Great Britain was made in 1801; the act of Parliament ordering a census to be taken every ten years, 41 Geo. III. c. 15, having passed Dec. 31, 1800. Ireland was not included in this return, and the census for that portion of the United Kingdom was first taken in 1813.

CENTRAL CRIMINAL COURT.—This criminal tribunal, with authority to hear and determine all treasons, murders, felonies, and misdemeanors committed in London or Middlesex, and some parts of the adjacent counties, and all offences committed within the jurisdiction of the Admiralty of England, was established by 4 Will. IV. c. 36 (July 25, 1834). It meets at least twelve times in the course of the year.

CEPHALONIA (Mediterranean).—The ancient Cephalenia, the largest of the Ionian Islands, became subject to Rome B.C. 187.

On the division of the empire, it passed under the rule of the emperors of the East, and was taken by the Franks in the 12th century. The princes of Achaia held it until 1224, when it came into the possession of the Venetians. The Turks took Cephalonia in 1479, but it was retaken in 1489 by the Venetians, who held it until the overthrow of their republic in 1797. By the treaty of Campo Formio it was ceded to France. (*See* IONIAN ISLANDS.) Cephalonia was a bishopric of the early church, and was united to the see of Zante in 1621. It was ravaged by an earthquake in 1767, and was captured by an English squadron in October, 1809.

CEPHISUS (Greece).—On the banks of this river, in Attica, Walter of Brienne, duke of Athens, was defeated and slain by the Catalans, in March, 1311. The Greeks defeated the Turks with great slaughter whilst passing this river, July 5, 1823.

CERCAMP (France).—At this abbey, near Cambay, the envoys from Spain, France, and England, assembled in the middle of October, 1558, for the purpose of negotiating a peace. The proceedings were suspended by the death of Queen Mary of England, Nov. 17, and the congress afterwards re-assembled at another place.

CERCICSFORD (Battle).—At this place, supposed to be Charford, in Hants, Cerdic and Cynric defeated the Britons, A.D. 519, and began to reign in Wessex.

CERCICSCORE (Battles).—The Saxons frequently landed at this port, supposed by some writers to be Yarmouth, in the 5th and succeeding centuries. They defeated the Britons in great battles in the neighbourhood, A.D. 495 and A.D. 514.

CERDONIANS, the followers of Cerdo or Cerdon, a Gnostic of Syria, who advocated the Persian doctrine of the two principles of good and evil. He abjured his errors at Rome, A.D. 140, but afterwards relapsed, and was expelled from the Church. Tertullian says that Marcion borrowed many of his errors from him.

CERET (France).—The plenipotentiaries of France and Spain assembled at this town, in the Pyrenees, to settle the boundaries of their respective kingdoms in 1660. During the revolutionary war, the Spaniards seized the town, and resisted several attempts of the French to recover it (1793). Having been defeated in a battle fought here April 30, 1794, the Spaniards abandoned the position.

CERIGNOLA (Battle).—Gonsalvo de Cordova, at the head of the Spanish troops, defeated the French under the duke of Nemours, at this town, in Italy, Friday, April 28, 1503. Each army consisted of about 6,000 men, and while the Spanish loss was small, 3,000 of the French were killed.

CERINTHIANS.—This sect was founded by Cerinthus, a Jew, who lived at the close of the apostolic age. He studied at Alexandria, and afterwards taught in Palestine. Irenæus says that he appeared A.D. 88, and that St. John wrote his gospel to refute his errors, which were a strange mixture of Judaism

and Gnosticism. He inculcated the greatest laxity in morals. The sect was not of long duration, though the doctrines were reproduced in an altered form.

CERISOLES (Battle).—The imperialists, commanded by the marquis of Gnasco, were defeated by the French, under the count d'Enghien, at this place, in Piedmont, April 14, 1544. The French captured tents, baggage, and artillery, and 10,000 of the imperialists were killed. It is also called the battle of Ceremola.

CERIUM.—This metal was discovered by Hisinger and Berzelius, in a Swedish mineral called carite, in 1803. It is named after the planet Ceres.

CEUTA (Africa), the ancient Septem or Septa, was taken during the campaign of Belisarius in Africa, A.D. 534, and was afterwards fortified and adorned by Justinian. The Goths captured it in 618, and the Moors in the following century. John I. of Portugal wrested Ceuta from the Moors in 1415, and it passed under the Spanish rule in 1580. The Africans have frequently attempted to regain possession of this fortress.

CEUTLA (Battle).—During the expedition led by Cortes for the discovery of Mexico, he defeated the Indians in the plain of Ceutla, near Tabasco, on Lady-day, March 25, 1519. The town of Santa Maria de la Vitoria was founded on the spot where the battle took place.

CEVENNES (France).—In this mountain-range and the adjoining districts, the Reformed doctrines first took root in France. They afterwards became the arena of religious warfare. The Huguenots took refuge in those retreats in times of persecution, and heroically resisted many attempts at their extermination. (*See* CAMISARDS.)

CEYLON (Indian Ocean).—This island, the ancient Taprobane, was made known to the Greeks by the conquests of Alexander the Great, B.C. 325. Pliny relates that ambassadors from Ceylon visited Rome and did homage to the emperor, in the reign of Claudius (A.D. 41—54). Christianity was preached in India and a church founded at Ceylon. Marco Polo, who wrote in 1298, refers to it under its name of Zeilan. He says it produces many precious and costly stones, and speaks of a ruby a span in length, and the thickness of a man's arm, brilliant beyond description, and without a single flaw. It was in the possession of the king, who, being offered the value of a city for it by the great khan, replied, that he would not sell it for all the treasure in the universe, nor allow it to go out of his dominions, because it was a jewel that had been handed down to him by his predecessors. Ceylon is said to have been described by the Portuguese Thome Lopez, in 1502, but its re-discovery by Europeans is usually ascribed to Lorenzo de Almeida, who was driven to the port of Galle by stress of weather, in 1506. In 1517 the Portuguese obtained permission to erect a fort or factory at Colombo, where they remained in peace till 1527, when the

mountaineers of Kandy began to resist their encroachments. The native princes, however, were so overawed by the power of the Europeans, that they assisted in suppressing the rebels, and in 1541, Franciscan missionaries were allowed to establish themselves in the island. In 1542 the sovereign of Cotta, with many of his court, embraced Christianity. In 1550, the king of Kandy professed a desire for spiritual instruction, but treacherously attacked and routed the mission sent for his benefit. In 1586 Colombo was besieged by Rajah Singha, who was compelled to retire the following year. Ralph Fitch, the first Englishman who visited Ceylon, landed in Colombo, March 5, 1589. In 1592 the sovereignty of the whole island fell into the hands of Wimala Dharma, who carried on war with the Portuguese for many years. The lawful emperor of Ceylon died in May, 1597, and bequeathed his empire to the king of Portugal. The Dutch first visited Ceylon, May 30, 1602; in 1609 they entered into a treaty with the native rulers; and in 1612 they built a fort at Cottiar. War followed between the Dutch and Cingalese and the Portuguese, and in August, 1630, the latter were defeated with great slaughter. The Portuguese were again defeated in 1638, and a pyramid of their skulls was erected by the victorious Kandians. In 1656 hostilities broke out between the native rulers and the Dutch; but the latter preserved their footing. Trade was restored and brought to great perfection in 1664. In 1763 friendly relations were established between the British and Kandians; but the intercourse was broken off, from the indifference of the English government. Trincomalee was taken by the British Jan. 11, 1782; recaptured by the French Aug. 30, 1782; restored to the Dutch in 1783; and taken by the British, after a siege of three weeks, Aug. 26, 1795. The whole island submitted Oct. 1. By a treaty signed at Colombo Feb. 15, 1796, the Dutch ceded all their fortified stations in Ceylon to the British, who have since been rulers of the island. In 1802 war broke out between the king and the British governor, and a terrible massacre of the British took place at Kandy, June 24, 1803. No effort was made to resent this aggression until January, 1815, when war was declared, and in March the king was deposed, and his territories ceded to the English crown. Rebellion again broke out in 1817, and it was not till the end of 1818 that peace was restored. Sir Edward Barnes became governor in 1820, and under his jurisdiction a military road of stupendous magnitude was carried into the midland districts of the island.

CHÆRONEIA (Greece).—This town was situated on the river Cephissus, in Boeotia. There was another town at no great distance from it, named Coroneia, and battles fought in the neighbourhood of these places are sometimes mentioned under one and sometimes under the other name. The Athenians

were defeated near Chæroneia B.C. 447, when their supremacy over Boeotia was destroyed. Philip defeated the united Athenian and Boeotian forces near Chæroneia, Aug. 7, B.C. 338; and Sylla defeated the generals of Mithridates B.C. 86.

CHAIN BRIDGE.—Suspension-bridges of five parallel chains, on which a light bamboo flooring is laid, have been long used in China, though they were not introduced into Europe till 1741, when one of very primitive construction was built across the Tees, in England. Mr. Finlay commenced the erection of a bridge of this kind in America in 1796, and took out a patent for their construction in 1801. Little progress was made, however, till 1814, when Mr. Telford commenced his experiments on the tenacity of iron. Capt. Brown patented his invention of bar-chain bridges in 1817, and completed the first structure of the kind, across the Tweed, in July 1820. The act for erecting the Menai bridge was passed in July, 1819; and on the 30th Jan. 1826, the bridge was opened.

CHAIN CABLE.—Cæsar (Bell. Gal. iii. 13) relates, that when he was in Gaul, B.C. 57, the Veneti, who inhabited the coast of Brittany, used iron chains instead of ropes for their anchors. In 1771, M. Bougainville suggested the idea of substituting iron for hemp; and, in 1808, Mr. Slater, a surgeon in the navy, took out a patent for a chain-cable. The chain cable was introduced into the royal navy in 1812.

CHAIN-SHOT.—This invention, of two iron balls linked together by a chain eight or ten inches long, was made by John de Witt, in 1666.

CHALCEDON (Bithynia) was founded by a colony from Megara, B.C. 684, directly opposite Byzantium. Darius captured it B.C. 505, and it came into the possession of the Romans B.C. 74. It was plundered by the Goths A.D. 259. Chosroes II. captured it after a long siege in 616. Chalcedon was repeatedly ravaged by the barbarians, and the Turks employed the materials of the ancient city for their mosques and other edifices in Constantinople. It was made a bishopric in the 4th century. The fourth general council assembled at Chalcedon Oct. 8, 451, and above 500 bishops were present.

CHALCIS (Greece), the capital of the island of Eubœa, was, according to tradition, founded before the Trojan war, and is mentioned by Homer. It became the seat of an Ionic colony, and flourished greatly. The Athenians landed here and defeated the Chalcidians B.C. 506; and Chalcis fell under their yoke. The people rebelled several times, and in B.C. 411 became independent; but they were again subdued by the Athenians. After various vicissitudes, it passed under the rule of Macedonia, and was unsuccessfully assailed by the Romans B.C. 207. Maximus destroyed the ancient city B.C. 146. (See NEGROPONT.)

CHALDÆA (Asia) was, in its restricted sense, a province in the Babylonian empire,

though its actual position and history cannot be ascertained. The term was often applied to the Babylonian dominion, which is called the Babylonian-Chaldaean, or the Chaldæo-Babylonian empire. (*See* BABYLON.)

CHALGRAVE (Battle).—On this plain, in Oxfordshire, an encounter occurred between the Royalists, commanded by Prince Rupert, and the Parliamentary forces, June 18, 1643. The latter were defeated, with a loss of 200 prisoners. In this action Hampden received a wound which caused his death, June 24.

CHALONS-SUR-MARNE (France), the ancient Catelauni, where Aurelian defeated Tetricus, A.D. 272 or 273; Jovinus overcame the Alemanni A.D. 367; and Aëtius and his allies defeated Attila and the Huns A.D. 451. Chalons was made a bishopric at an early period. Its cathedral was founded A.D. 450, and having suffered greatly from fire, was rebuilt in 1672. This place must not be confounded with Chalons-sur-Saône, the ancient Cabillonum, or Caballinum, in the department of Saône-and-Loire, France.

CHALUS (France).—Richard Cœur de Lion was wounded by an arrow March 26, 1199, whilst reconnoitring this castle, which belonged to the viscount of Limoges, who had refused to surrender some treasure which he had found. Richard lingered twelve days, expiring April 8.

CHAMBERLAIN.—The office of lord great chamberlain, which has existed in England from a very early period, was granted to the family of De Vere during the reign of Henry I. (1100—1135). Owing to the extinction of the family in 1625, it became the subject of litigation, but was ultimately confirmed to Lord Willoughby d'Eresby, in whose family it still remains.—Lord Chamberlain of the Household is mentioned as early as 1208. In 1341 it was ordered that he should swear, on his appointment, to keep the laws of the land, and the great charter; and, in 1406, he was appointed a member of the Privy Council.

CHAMBERS OF AGRICULTURE, for the promotion of agriculture, were formed in many parts of France in 1851.

CHAMBERS OF COMMERCE.—The first institution of this kind was formed at Marseilles early in the 15th century, and after various changes it was established on a permanent footing in 1650. A chamber of commerce was opened at Dunkirk in 1700, and during the 18th century similar institutions were established in the principal commercial towns of France. They were suppressed in 1791, restored in 1802, and have since been extended and organized. A chamber of commerce was established at Glasgow in 1783, at Edinburgh in 1785, at Manchester in 1820, and at Hull in 1837. They have since been introduced into several of our important commercial centres.

CHAMBERY (Savoy), the chief town of the ancient duchy, came into the possession of the French in 1690, but was restored to the duke of Savoy by the treaty of Utrecht in 1713.

The French republicans took the town in September, 1792, and a Jacobin club, consisting of 1,200 members, was immediately formed. Chambery, with the whole of Savoy, was annexed to France Nov. 27, 1792. The Austrians took possession of Chambery in 1814, but were soon after expelled by the French. Chambery was restored to the house of Savoy in 1815. Sardinia ceded it to France by a treaty signed March 24, 1860, and a detachment of French troops entered the town March 28.

CHAMBORD (France).—This Gothic castle, which gives the title of count to the last descendant of the elder branch of the Bourbons, was founded by Francis I. in 1526, and completed by Louis XIV. It is in the department of Loire-and-Cher, and about twelve miles from Blois. The treaty between Henry II. of France, and Maurice, duke of Saxony, was ratified at Chambord Jan. 15, 1552.

CHAMPAGNE (France).—This old province, wrested from the Romans about A.D. 486, was long ruled by its own counts, and was annexed to Navarre in 1234. Philip IV., by his marriage, Aug. 16, 1284, with Jeanne, heiress of Navarre, Champagne, and Brie, united it to France, with which kingdom it was formally incorporated in 1316.

CHAMPARTY, or CHAMPERTY.—This was a bargain between the plaintiff or defendant in a suit with a third party, generally a lawyer, whereby the latter was to divide the land or matter sued for in case of success, and was to carry on the action at his own expense. Though prohibited in 1275, by 3 Edw. I. c. 25, it was still practised, as the acts 13 Edw. I. c. 49 (1285), 28 Edw. I. c. 11 (1300), 7 Rich. II. c. 15 (1383), and 32 Hen. VIII. c. 9 (1540), are all directed towards its suppression.

CHAMP DE MARS.—In this celebrated area, used by the garrison of Paris for military exercises, the Fête de la Fédération was held on the anniversary of the taking of the Bastille, July 14, 1790. Deputies from the provinces and the Parisians assembled in great numbers. Talleyrand, bishop of Autun, performed a solemn mass. Louis XVI. and all the principal authorities took the oath of allegiance to the new constitution framed by the republicans. The leaders of the Jacobin, Cordelier, and other clubs, brought a petition to the Champ de Mars, calling upon the king to abdicate, July 14, 1791; and an effort on their part to create an insurrection was suppressed July 17. Louis XVI. again went in procession to the Champ de Mars to celebrate the taking of the Bastille, July 14, 1792. On the fête held in honour of the Supreme Being, June 7, 1794, the people marched in procession to this spot. Napoleon I. distributed eagles to his army on the Champ de Mars the day after his coronation, Dec. 3, 1804. It has since been the scene of many grand commemorations and festivals, and here Napoleon III. distributed eagles to the army, May 10, 1852.

CHAMPION OF THE KING.—Taylor, in "The

Glory of Regality, terms this "the most perfect, perhaps, and most striking relic of feudalism that has come down to us from the ages of chivalry." The office of champion existed under the Norman kings, and was originally held by the family of Marmion. It is supposed that they held the barony of Fontney, in Normandy, by the service of being hereditary champions to the dukes of that province, and that William I. granted the castle of Tamworth and the manor of Scrivelsby, in Lincolnshire, to William of Marmion, one of his followers, on the same tenure. Philip, the last lord of Marmion, died without male issue in 1292, when the castle of Tamworth passed by his elder daughter and co-heir to the family of Freville, and the manor of Scrivelsby, with a younger daughter, to Sir Thomas Ludlow, from whom they descended to the family of Dymoke. This led to a contest; the championship, at the coronation of Richard II., July 16, 1377, was claimed by Sir John Dymoke, as possessor of Scrivelsby, and by Sir Baldwin de Freville, as lord of Tamworth. It was then decided that the office was attached to the manor of Scrivelsby, and it continued in the family of Dymoke. The last appearance of the champion was at the coronation banquet of George IV., July 19, 1821. Taylor says: "The duty of the champion is to ride into the hall where the feast of the coronation is held, during dinner, (before the second course is brought in), mounted on one of the king's coursers, and clad in one of the king's best suits of armour; he is attended by the lord high constable and the earl marshal, and by the mouth of a herald is to proclaim a challenge to any who shall deny that the king is lawful sovereign; which being done, the king drinks to him from a gold cup, which, with its cover, he receives as his fee, and also the horse, saddle, suit of armour, and furniture thereto belonging." This officer has been sometimes erroneously styled champion of England.

CHAMPLAIN (United States).—The English defeated an American squadron on this lake Oct. 11-13, 1776. The Americans escaped on the night of the 11th, but the English went in pursuit, and captured and destroyed most of the flotilla. The Americans, in much superior force, overpowered an English squadron in these waters Sept. 11, 1814. The want of support from the land forces contributed to this result.

CHANCEL.—This part of the church was separated from the rest of the building by rails of wood, curiously and artificially wrought in the form of net-work, called *cancelli*. Hence the origin of the term *chancel*. The thrones of the bishop and his presbyters were in early times fixed in this part of the church. In 1641 the Long Parliament resolved that the chancels should be levelled.

CHANCELLOR OF THE EXCHEQUER.—John Mansell, appointed to reside at the receipt of the exchequer in 1284, is supposed to have been the first chancellor of the ex-

chequer. The equity jurisdiction formerly exercised by the court of Exchequer, was transferred to the court of Chancery by 4 & 5 Vict. c. 52 (1841). The following is a list of the chancellors of the Exchequer since the Restoration:—

A.D.

- 1660. Sept. 8. Sir Robert Long.
- 1667. May 24. Anthony Lord Ashley, afterwards earl of Shaftesbury.
- 1672. Nov. 13. Sir John Duncombe.
- 1679. Mar. 26. Lawrence Hyde, afterwards Viscount Hyde and earl of Rochester.
- 1679. Nov. 21. Sir John Ernley.
- 1683. Apr. 8. Henry Booth, Lord Delamere.
- 1690. Mar. 18. Richard Hampden.
- 1694. May 3. Sidney, Lord Godolphin.
- 1696. May 2. Charles Montague.
- 1699. Nov. 15. John Smith.
- 1701. Mar. 29. Henry Boyle, afterwards Lord Carleton.
- 1708. Feb. 11. John Smith.
- 1710. Aug. 10. Robert Harley, afterwards earl of Oxford.
- 1711. May 30. Robert Benson, afterwards Lord Bingley.
- 1713. Sir William Wyndham.
- 1714. Oct. 13. Sir Richard Onslow, afterwards Baron Onslow.
- 1715. Oct. 11. Robert Walpole, afterwards earl of Orford.
- 1717. April 15. James Stanhope, afterwards Earl Stanhope.
- 1718. Mar. 18. John Aislabie.
- 1721. Jan. Sir John Pratt.
- 1721. Apr. 3. Robert Walpole, afterwards earl of Orford.
- 1742. Feb. 17. Samuel Sandys, afterwards Baron Sandys.
- 1743. July 26. Henry Pelham.
- 1754. Mar. 9. Sir William Lee.
- 1754. April 6. Henry Bilson Legge.
- 1755. Nov. 22. Sir George Lyttelton, afterwards Lord Lyttelton.
- 1756. Nov. 18. Henry Bilson Legge (second time).
- 1757. Apr. 9. William Murray, afterwards Lord Mansfield.
- 1757. July 2. Henry Bilson Legge (third time).
- 1761. Mar. 22. William, Viscount Barrington.
- 1762. May 29. Sir Francis Dashwood, afterwards Lord le Despenser.
- 1763. Apr. 16. George Grenville.
- 1765. July 13. William Dowdeswell.
- 1766. Aug. 2. Charles Townshend.
- 1767. Sept. 12. William Murray, afterwards Lord Mansfield (second time).
- 1767. Dec. 1. Frederick, Lord North, afterwards earl of Guildford.
- 1782. Mar. 27. Lord John Cavendish.
- 1782. July 13. William Pitt.
- 1783. Apr. 5. Lord John Cavendish (second time).
- 1783. Dec. 27. William Pitt (second time).
- 1801. Feb. 17. Henry Addington, afterwards Viscount Sidmouth.
- 1804. May 12. William Pitt (third time).
- 1806. Feb. 5. Lord Henry Petty, afterwards marquis of Lansdowne.
- 1807. April. Spencer Perceval.
- 1812. June 9. Nicholas Vansittart, afterwards Lord Bexley.
- 1823. Jan. 31. Frederick John Robinson, afterwards Viscount Goderich and earl of Ripon.
- 1827. April. George Canning.
- 1827. Aug. 17. John Charles Herries.
- 1828. Jan. Henry Goulburn.
- 1830. Nov. 22. John Charles, Viscount Althorpe, afterwards Earl Spencer.
- 1834. Dec. 9. Sir Robert Peel.
- 1835. April. Thomas Spring Rice, afterwards Lord Monteagle.
- 1839. Aug. Francis Thornhill Baring.
- 1841. Sept. Henry Goulburn (second time).
- 1846. July 16. Sir Charles Wood.

A.D.

1852. Mar. Benjamin Disraeli.
 1852. Dec. William Ewart Gladstone.
 1855. Feb. 22. Sir George Cornewall Lewis.
 1858. Feb. Benjamin Disraeli (second time).
 1859. June. William Ewart Gladstone (second time).

CHANCERY (Court of).—The rise of the power of this, the highest court of judicature in the kingdom, is thus described by Hallam (Eng. i. ch. vi. p. 344): "The equitable jurisdiction, as it is called, of the court of Chancery appears to have been derived from that extensive judicial power which, in early times, the king's ordinary council had exercised. The chancellor, as one of the highest officers of state, took a great share in the council's business; and, when it was not sitting, he had a court of his own, with jurisdiction in many important matters, out of which process to compel appearance of parties might at any time emanate. It is not unlikely, therefore, that redress, in matters beyond the legal province of the chancellor, was occasionally given through the paramount authority of this court. We find the council and the chancery named together in many remonstrances of the Commons against this interference with private rights, from the time of Richard II. to that of Henry VI. It was probably in the former reign that the chancellor began to establish systematically his peculiar restraining jurisdiction." The abolition of the court of Chancery was voted by Barebone's Parliament, in 1653. The court of Chancery was entirely remodelled and its practice amended by 15 & 16 Vict. cc. 86 & 87 (July 1, 1852); and 16 & 17 Vict. c. 98 (Aug. 20, 1853). The famous Berkeley suit, which lasted 190 years, commenced soon after the death of the fourth Baron Berkeley, in 1416, and terminated in 1609. It arose out of the marriage of the fourth Baron Berkeley's only daughter and heiress, Elizabeth, with Richard Beauchamp, earl of Warwick. The castle and heirship of Berkeley was the object of the suit.

CHANDERNAGORE (Hindustan).—The French established a factory at this place on the Hooghley, above Calcutta, in 1676. They fortified it soon after, and it was for some years a formidable rival to Calcutta. Clive took it March 23, 1757, and it was restored to France, by the 11th article of the treaty of Paris, Feb. 10, 1763. The English captured it again in July, 1778, and restored it to France at the end of the war, by the 13th article of the treaty of Versailles, Sept. 3, 1783. It was taken again at the outbreak of war between France and England in 1793; relinquished by the 3rd article of the treaty of Amiens, March 25, 1802; taken again on the renewal of the war in 1803, and restored by the 8th article of the treaty of Paris, May 30, 1814.

CHANDOS CLAUSE.—This name was given to the 20th clause of the Reform Bill (2 Will. IV. c. 45, June 7, 1832), which gave the right of voting to the occupiers of

lands or tenements of a rent of not less than £50 per annum. It had been moved as an amendment in committee of the Reform Bill of 1831, by the marquis of Chandos, afterwards duke of Buckingham, and was carried against the government by a majority of eighty-four. Ministers incorporated it in their measure, and although that Reform Bill was rejected by the House of Lords, the clause was introduced by ministers themselves in the bill of 1832, which passed into a law.

CHANNEL ISLANDS (English Channel).—These islands are the only parts of the ancient duchy of Normandy that remain in our possession. They are situated within a few miles of the coast of France, and came into the possession of England as a portion of the duchy of Normandy, during the reign of Henry I. (See ALDERNEY, GUERNSEY, JERSEY, and SARK.)

CHANTING is supposed to owe its origin to the want of power in the voice, for making itself heard in the large open buildings and amphitheatres of the ancients. It was first introduced into Christian worship between the years 347 and 356. St. Ambrose brought it from the Greeks to Milan, whence it passed to Rome, France, &c.

CHANTRY.—Hallam (Eng. i. ch. ii. p. 94) remarks:—"There was a sort of endowed colleges or fraternities, called chantries, consisting of secular priests, whose duty was to say daily masses for the founders." The English chantries, amounting to 2,374 in number, were suppressed at the Reformation by 37 Hen. VIII. c. 4 (Dec. 15, 1545), and 1 Edw. VI. c. 14 (1547). They generally consisted only of a little chapel or altar placed in a church. Here the priests offered daily prayers for the soul of the founder, and for the souls of the deceased members of the family.

CHAP BOOKS.—Tracts, or little books printed for chapmen, or pedlars, and sold by them about the country in the 16th and 17th centuries, formed the popular literature of those times. The typography and paper were of an inferior kind. Ballads, songs, legends, biographies, tales of wonder, and theological tracts, are found amongst the subjects treated on in chap books.

CHAPEL.—In olden times the French kings always took with them St. Martin's hood when they went forth to war, and the place where it was watched over by an attendant priest, was called *capella*. The word is a diminutive from *capsa*, which signifies a chest or coffer, where the relics of saints were kept. Hence the origin of the application of the word chapel to private oratories. Several kinds of chapels exist now; such as parochial chapels, chapels of ease, chapels of colleges, and private chapels. The places of worship used by dissenters generally bear this designation. Chapels were formerly built upon bridges, which the priests were bound to keep in repair from the benefactions received. There was a chapel on old London Bridge.

CHAPEL, KNIGHTS OF THE, OR POOR KNIGHTS OF WINDSOR, were first established by King Edward III. in 1348, and consisted of twenty-six veteran knights, "infirm in body, indigent, and decayed." The original constitution of the order was altered by Edward IV. in 1482-83, after which it fell into a state of decline, from which it was raised by Elizabeth, who re-established it for thirteen poor knights, Aug. 30, 1559. This number was raised to eighteen in 1659. In Sept. 1833, William IV. changed the title of the order to "Military Knights of Windsor," its present designation.

CHAPLAIN.—By 21 Hen. VIII. c. 13, §§ 14, 15, 16, 17, 18, 19, and 24 (1529), the number of chaplains allotted to various dignitaries was as follows:—Archbishop, 8; baron, 3; baroness, 2; bishop, 6; chancellor, 3; chief justice, 1; comptroller of the household, 2; countess, 2; dean of the chapel royal, 2; duchess, 2; duke, 6; earl, 5; king's almoner, 2; king's secretary, 2; knight of the garter, 3; marchioness, 2; marquis, 5; master of the rolls, 2; treasurer, 2; viscount, 4; warden of the cinque ports, 1.

CHAPTER.—The canons in the cathedral or conventual churches began to form what was called a chapter in the 8th century. This was a kind of council for the bishop. Chapter-houses were built for these meetings, and were generally contiguous to the cathedral.

CHARADE.—Disraeli, in the "Curiosities of Literature," says:—"The charade is of recent birth, and I cannot discover the origin of this species of logogriphes. It was not known in France so late as 1771; in the great Dictionnaire de Trévoux, the term appears only as the name of an Indian sect of a military character." A new species of charade, of a dramatic character, called the Acting Charade, has of late years become popular. The word charade is said to be taken from the name of the inventor.

CHARING CROSS.—Edward I. erected a marble cross, adorned with divers figures, in memory of Queen Eleanor, at the village of Charing, A.D. 1291, and from this the name is derived. This cross was destroyed by the Long Parliament in 1641. The equestrian statue of Charles I. was cast in bronze by Le Seur in 1633, by order of Thomas Howard, earl of Arundel. The Long Parliament ordered it to be broken up after the execution of the king. John River, a brazier, purchased it, concealed it in his garden, in Holborn, and, at the Restoration, presented it to Charles II., who ordered it to be erected upon a pedestal at Charing Cross.

CHARIOTS are frequently mentioned in Scripture, as well as in the works of the ancient poets and historians. The Greeks attributed the invention to Minerva; Virgil to Erichthonius, a mythical king of Athens; and Pliny states that four-wheeled carriages were invented by the Phrygians. (*See WAR CHARIOTS*.)

CHARITABLE BEQUESTS were placed under

the care of commissioners appointed to inquire into the misemployment of property bequeathed or otherwise devoted to charitable purposes by the Statute of Charitable Uses, 43 Eliz. c. 4, s. 1 (1601). The Irish act, 4 Geo. III. c. 18 (1764), orders that a return of all such property bequeathed in Ireland be handed in to the bishop of the diocese or the archbishop of Armagh. This being found ineffectual to secure the proper application of such bequests, the Roman Catholic Bequests Act, 7 & 8 Vict. c. 97 (Aug. 9, 1844), laid down more stringent regulations. The Charitable Trusts Act, 16 & 17 Vict. c. 137 (Aug. 20, 1853), instituted a board empowered to inquire into the condition and management of charities, to examine accounts, to hear witnesses, and to report their proceedings annually to parliament. This act was amended by 18 & 19 Vict. c. 124 (Aug. 14, 1855), and certain charities were temporarily exempted from its operation by 20 & 21 Vict. c. 76 (Aug. 25, 1857).

CHARITABLE INSTITUTIONS.—According to the report of the commissioners appointed to investigate this subject, the following are the oldest charitable institutions in England: St. Bartholomew, Guildford, founded A.D. 1078; Cirencester, 1100; Ripon, 1109; St. Bartholomew, London, 1122; Northampton, 1138; and St. Catherine, London, 1148. By the Charitable Trusts Act, 16 & 17 Vict. c. 137, passed Aug. 20, 1853, a body of commissioners was appointed to inquire into all charities in England and Wales.

CHARITY (Brothers of).—This order of hospitaliers, chiefly laymen, was founded by St. John de Dieu, at Granada, in 1540, and obtained a second establishment at Madrid in 1553. Gregory XIII. confirmed the order in 1572, and Paul V. admitted some of them to take orders in 1609. They attend upon the sick poor, and were introduced into France in 1601.

CHARITY SCHOOLS.—The sixth general council, held at Constantinople A.D. 680-81, by one of its canons ordered charity schools to be established in connection with country churches; and further regulations were, from time to time, issued on the same subject. William Blake, a woollen draper of Covent Garden, about the year 1685, is said to have projected the first charity school in England, and to have purchased Dorchester House, Highgate, for that purpose. Franck, a German divine, laboured for the same object at Glaucha, in 1698. Another, which claims to be the first, was established in London in 1693, and the movement was prosecuted with zeal in 1698. The trustees of the then existing schools formed themselves into a voluntary association in 1700.

CHARLEROI (Belgium).—A fortress was erected here A.D. 1666, by Rodrigo, Spanish governor of the Low Countries, who named it in honour of Charles II. of Spain. By the peace of Aix-la-Chapelle (May 2, 1668), it was ceded to the French. The prince of Orange besieged it in 1672, but was obliged

to raise the siege. Louis XIV. of France added the lower and middle town in 1676. In 1677 the prince of Orange again made an unsuccessful effort to take the town, which was restored to Spain by the treaty of Nimeguen, Sept. 17, 1678. In 1690 it was again taken by the French, and again restored to Spain by the peace of Ryswick, Sept. 20, 1697. The French again captured it Aug. 2, 1746, Nov. 12, 1792, and June 26, 1794. In 1795 the walls were destroyed, but they were rebuilt in 1816, by order of the duke of Wellington. The railroad from Charleroi to Paris was completed in 1856.

CHARLES THE FIRST, the second son of James I. of England and Anne of Denmark, was born at Dumfermline, Nov. 19, 1600. He ascended the English throne March 27, 1625, and married Henrietta Maria of France June 13, in the same year. They had three sons and four daughters; the eldest ascended the throne as Charles II. (*q.v.*), and the third child and second son succeeded his brother as James II. (*q.v.*). Their eldest daughter, Mary, was born Nov. 4, 1631. She married Prince William of Nassau, and died Dec. 24, 1660. Their fourth child was Elizabeth, born Dec. 23, 1635, and died Sept. 8, 1650. Their fifth child, Anne, born in 1637, died young. Their sixth child, Henry, born July 8, 1640, died Sept. 13, 1660; and their seventh child, Henrietta Maria, born June 16, 1644, married Philip, duke of Anjou, and died June 30, 1670. Charles the First was beheaded at Whitehall Jan. 30, 1649, and buried at Windsor Feb. 8.

CHARLES THE SECOND, the eldest son of Charles I. and Henrietta Maria, was born at St. James's, May 29, 1630. He succeeded to the throne, *de jure*, on the death of his father, Jan. 30, 1649, but did not become king *de facto* until May 29, 1660. He married Catherine of Portugal, May 20, 1662. Charles II., who left no legitimate issue, died Feb. 6, 1685, and was buried at Westminster Feb. 14.

CHARLESTOWN (United States).—This seaport town in South Carolina was founded in 1672, and called "Oyster-Point Town." In 1706 it was attacked by the Spanish and French, who were repulsed and defeated. A furious hurricane, in Aug. 1728, occasioned an inundation, which did considerable injury to the town, and a visitation of the yellow fever in the same year carried off multitudes of the inhabitants. In 1740 and 1778 great damage was caused by fires. The English took Charlestown May 11, 1780, and retained possession till Dec. 14, 1782, when it was evacuated. In 1783 it was made a city by the legislature of S. Carolina. In 1796 about a third of the city was destroyed by fire. A negro conspiracy was discovered and suppressed here in June 1822. The college was founded in 1785.

CHARMOUTH (Battles).—Egbert defeated the Danes at this place, in Dorsetshire, A.D. 833. The invaders had disembarked from thirty-five ships. His successor, Ethel-

wulf, was defeated by the Danes at this place A.D. 840.

CHARTER-HOUSE.—This is a corruption of Chartreuse, the name given to a house of Carthusian monks, established in London by Sir Walter Manny A.D. 1371. Before that time the site had been used as a burying-place for the poor. Its last prior was hanged and quartered for denying the king's supremacy, May 3, 1535. After the suppression of the monasteries by Henry VIII., it was purchased by Mr. Thomas Sutton, whom Stow calls "the right Phoenix of charity in our times," from the earl of Suffolk, in 1611, to be converted into an hospital, "consisting of a master, governor, a preacher, a free school, with a master and usher, eighty poor people, and forty scholars." The benevolent founder died Dec. 12, 1611, before his work was completed; but he had provided amply for the endowment, and the hospital was opened Oct. 3, 1614. An attempt having been made by one of Mr. Sutton's relatives to obtain possession of the property, the foundation was confirmed by 3 Charles I. c. 1 (1627).

CHARTER-PARTY.—Agreements between merchants and seamen respecting their ships and cargoes, were regulated by the law of Rhodes as early as B.C. 916. The Scottish parliament passed several acts for their regulation in 1467, which were ratified in 1487.

CHARTERS.—"Nearly all the nations," says Sir Harris Nicolas, "which established themselves upon the ruins of the Roman empire, gave to their charters the form of epistles, in imitation of the Romans." The most ancient Anglo-Saxon charters extant are of the 7th century. It is believed that the earliest known is of the time of Ethelbert, king of Kent, and was granted in full council, April 29, 619. The charters of the Anglo-Saxon monarchs were generally in Latin. Public liberties were secured by the early charters. They were renewed and confirmed so frequently, that between the reign of Edward I. and Henry IV. Sir Edward Coke reckons thirty-two. These were termed royal charters. A calendar of the Charter Rolls in the Tower, extending from 1199 to 1493, which contain grants of privileges to cities, corporations, guilds, religious houses, and individuals, has been published by the government. Charters were frequently forged.

CHARTISTS.—The first demonstration, on a large scale, made by the political agitators called Chartists, because they clamoured for what they termed the six points of the People's Charter, was held in the open air at Birmingham, Aug. 6, 1838. The six points were, 1. Universal suffrage; 2. Vote by ballot; 3. Paid representatives in parliament; 4. Equal electoral districts; 5. Abolition of the property qualification for members of parliament; and 6. Annual parliaments. Large bodies of the Chartists, armed, assembled at night in various parts of the country in the latter part of the year,

and a proclamation was issued declaring all such meetings illegal, Dec. 12. The agitation, however, continued, and an enormous petition, signed, it was said, by 1,200,000 Chartists, was presented to parliament by Mr. Attwood, June 14, 1839. The Chartists attacked Newport Nov. 4, 1839, and were, after some resistance, dispersed by the troops, the leaders being taken and afterwards tried. Another petition, presented in 1843, was said to contain 3,500,000 signatures. In 1848 Chartist disturbances occurred in various parts of the kingdom, and a meeting was summoned by the Chartist leaders to take place on Kennington Common April 10. They avowed their intention of going in procession to the House of Commons with a petition, which, they boasted, contained above 5,000,000 signatures. Every preparation was made by the authorities to preserve the public peace, 170,000 special constables were organized, and the duke of Wellington, as commander-in-chief, was at his post. When the Chartists assembled, their leaders were informed by the police that any attempt to pass the bridges in procession would be resisted. The Chartists gave way, and consigned the petition to three cabs for conveyance to the House of Commons. On examination, it appeared that, instead of 5,706,000, only 1,975,490 names were appended to the monster petition, and of these a large number had been fabricated. Prince Albert and the Queen figured amongst the names appended to the document. The name of the duke of Wellington was signed thirty, and that of Colonel Sibthorp twelve times. This exposure, coupled with the determination evinced by the public to repress agitation, proved fatal to the cause, and from that day Chartism rapidly declined.

CHARTRES (France), the ancient Autricum, was a town of the Carnutes, from whom it received its modern name. The Normans ravaged it A.D. 852 and 872. Rollo received a check here in 912. Henry I. of England entertained Innocent II. at Chartres Jan. 13, 1131. It afterwards fell into the power of the English, but was recovered by surprise in 1432, and was taken and retaken several times during the civil wars in France. The cathedral was founded in 1020, and dedicated in 1260. The roof having been destroyed by fire in 1836, a metal one was erected in 1841. Louis XIII. bestowed the duchy on the duke of Orleans, in whose family the title still remains.

CHARTREUSE.—This monastery, called La Grande Chartreuse, was founded near Grenoble, in France, by St. Bruno of Cologne, A.D. 1084. It was several times injured by fire, and the present building dates from about 1676. St. Bruno followed the rule of St. Benedict with certain modifications. It was called the order of the Chartreux, or the Carthusians. The monks were expelled during the Revolution, but they returned in 1826, and Chartreuse is still the chief monastery of the Carthusians.

CHATHAM.—Queen Elizabeth established a dockyard at Chatham in the 16th century, a little before the time of the invasion projected by Spain. It was removed to its present site in 1622. The Dutch fleet entered the Medway and destroyed several ships June 12, 1667. The "Chest" for the relief of wounded and superannuated seamen, established at Chatham by Queen Elizabeth, was removed to Greenwich by 43 Geo. III. c. 119 (July 29, 1803). The school for engineers was established in 1812. Additional fortifications were ordered to be erected by parliament in 1860.

CHATHAM (FIRST) ADMINISTRATION. (See NEWCASTLE AND PITT ADMINISTRATION.)

CHATHAM (SECOND) ADMINISTRATION.—William Pitt, the elder, created earl of Chatham July 30, 1766, presided over two administrations, the first formed in 1757, and called the Newcastle and Pitt (*q. v.*) Administration; and the second, designated after his title, the Chatham Administration, formed July 30, 1766, on the dissolution of Lord Rockingham's first cabinet. Lord Chatham's ministry contained the following appointments:—

Treasury	Duke of Grafton.
Lord Chancellor	Lord Camden.
President of the Council	Earl of Northampton.
Privy Seal	{ Earl of Chatham, First Minister.
Chancellor of Exchequer	Hon. Charles Townshend.
Principal Secretaries of State	{ Earl of Shelburne and Gen. Conway. The latter leader of the House of Commons.
Admiralty	Sir Charles Saunders.
Board of Trade	Lord Hillsborough.
Secretary at War	Viscount Barrington.
Ordnance	Marquis of Granby.
Paymasters General	{ Lord North and Thomas Townshend.

Sir Edward (afterwards Lord) Hawke succeeded Sir Charles Saunders at the Admiralty Dec. 13, and the Hon. Robert (afterwards Lord) Nugent replaced Lord Hillsborough at the Board of Trade Dec. 16, 1766. The Hon. Charles Townshend, who died Sept. 4, 1767, was succeeded by Lord Mansfield Sept. 12. The earl of Chatham's health rendered him incapable of taking any part in public affairs; and, towards the end of 1767, the whole power fell into the hands of the earl of Grafton, who in December made several changes in the cabinet. Lord Chatham finally resigned the privy seal Oct. 21, 1768. (See GRAFTON ADMINISTRATION.)

CHATHAM ISLANDS (South Pacific).—Lieutenant Broughton discovered these islands Nov. 29, 1791, and named them after H.M.S. *Chatham*, in which he sailed. The group consists of three large and several small islands. A whaling station was established at Oinga by Captain Richard in 1840.

CHATILLON-SUR-SEINE (Congress).—Proposals of peace were made whilst the allied armies were advancing upon Paris in 1814, and Chatillon was fixed upon as the place for the congress, which opened Feb. 4. England

sent three plenipotentiaries, Austria, Prussia, Russia, and France each one to the conferences. The allies demanded that France should be restricted to the limits she had attained before the Revolution. Some temporary successes gained in the field induced Napoleon I., Feb. 17, to send instructions to Caulaincourt, the French plenipotentiary, to sign nothing without his orders. Early in March, Caulaincourt announced to the emperor that the allies had determined to break up the conference if the fundamental principle of reducing France to its ancient limits was not accepted. Caulaincourt delivered a counter-project Mar. 15, from which it became evident that Napoleon was not sincere in his desire for peace, and the congress broke up March 18.

CHAUMONT (Treaty).—The insincerity displayed by Napoleon I. during the negotiations at Chatillon-sur-Seine, induced the great powers whose plenipotentiaries were engaged at that congress, to enter into more solemn obligations for the energetic prosecution of the war, in case France should reject their proposals. With this view, treaties were signed by each of the four powers, England, Austria, Russia, and Prussia, separately with the three others at Chaumont, March 1, 1814. The four treaties were of course, word for word, the same. Each treaty consisted of seventeen articles, and provided for the number of men to be maintained in the field by each power, and the amount of subsidies to be paid by England. By the second article, each contracting power engaged not to enter into separate negotiations, nor to conclude a separate peace, without the consent of the others. The treaty was to remain in force for twenty years, and not to be renewed before the expiration of that period.

CHEDUBA (Bay of Bengal).—This island was taken by the Burmese in the 17th century. The English captured it in May, 1824; and it was ceded to the East-India Company by the third article of the treaty of Yandaboo, Feb. 24, 1826.

CHEESE was known to the Greeks and Romans much earlier than butter, according to Beckmann, who could find no notice of the latter substance in Aristotle, though he frequently mentions cheese. Athenæus speaks of a celebrated Achaian cheese. The inhabitants of the island of Cynthus excelled in the preparation of this article of food, which was stamped upon their coins. In the Middle Ages it was made from deer's milk. The Artotyritæ (from *ἄρτος*, bread, and *τυρός*, cheese) offered cheese with their bread in the Eucharist, in the 2nd century. They pretended that the first inhabitants of the world offered, as oblations, the fruits of the earth and of sheep.

CHELSEA (Middlesex).—Some authorities are of opinion that this is the place called Calcuith, at which a council was held July 27, 816, when it was ordained that all bishops should date their acts from the year of the

Incarnation. It was designated Chelc-hethe in 1291. Sir Thomas More, who lived there, wrote Chelcith; and as late as 1692 it was called Chelchey. Stow describes it as "a town not large, but graced with good well-built houses." During the 16th and 17th centuries it was a favourite place of residence for noblemen and wealthy persons. Chelsea College, for the study of polemical divinity, was projected, in 1609 by Dr. Matthew Sutcliffe, dean of Exeter, who endowed it, though not sufficiently. James I. granted it a charter in 1610, and gave it the name of the College of King James in Chelsea. In 1616, James I. issued a declaration setting forth the reasons which induced him to erect the college. The scheme did not, however, succeed, and it was converted into an hospital for invalid and decayed soldiers by Charles II. who laid the foundation-stone of the new building, designed by Sir Christopher Wren, in 1682. The good work, carried on by James II., was completed by William and Mary, in 1690, at a cost of £150,000. The Royal Military Asylum in connection with the hospital was founded in 1801.

CHELTHENHAM (Gloucestershire).—Doctor Short discovered the medicinal properties of the water at this place in 1740; the first spring having been found in 1716. George III. visited Cheltenham in 1788, and a spring found on the estate where he resided is called the King's Well. A salt spring was discovered in 1803. Cheltenham was enfranchised in 1832, and returns one member to Parliament.

CHEMICAL SOCIETY, of London, was instituted Feb. 23, 1841.

CHEMISTRY.—Ample evidence may be found in the Old Testament to show that the ancient Egyptians possessed a knowledge of chemistry, and from them the Saracens, to whose industry the origin and improvement of the science are attributed by Gibbon, derived much information. Geber, who flourished in the 9th century, admits that he derived most of his knowledge on the subject from the early sages. (*See AL-CHEMY*). Little real progress was made for several centuries. "Chemistry," says Hallam, "as a science of principles, hypothetical, no doubt, and, in a great measure, unfounded, but cohering in a plausible system, and better than the reveries of the Paracelsists and Behmenists, was founded by Becker in Germany, by Boyle and his contemporaries of the Royal Society in England." Becker published his "Physica Subterranea" in 1669, and he died in London in 1685. Boyle's "Sceptical Chemist" appeared in 1661. Ernest Stahl, who died in 1734, originated the phlogistic theory of combustion, and Dr. Hales, 1761, stands first as a pneumatic chemist. Dr. Priestley first obtained oxygen gas, Aug. 1, 1774, and Mr. Cavendish discovered the composition of water in 1784. Lavoisier, who died in 1794, threw considerable light on the theory of combustion, and proved the chemical identity of the diamond and common charcoal.

CHEMISTRY, (Royal College of,) founded in London in July, 1845.

CHEPSTOW CASTLE (Monmouthshire) is said to have been founded in the 11th century and rebuilt in the 13th. It was taken by the parliamentary forces Oct. 10, 1645, and surprised by the royalists early in 1648. Cromwell, who failed in an attempt to retake it by storm, ordered it to be besieged, and the small garrison, having exhausted all their provisions, surrendered May 25. The iron bridge over the Wye, which joins the Severn, two miles below Chepstow, was built in 1816.

CHEQUE.—The first cheque by an English king was the following, given by Edward I. to Bourunonio de Luk, or Luke, a Florentine merchant:—"Whereas, our beloved Robert de Brus, earl of Carrick, is in present need of money, we request that you will cause to be advanced or lent to the said earl or his attorney, for his occasion, forty pounds, and we will cause them to be repaid to you. And when you have lent to him the aforesaid money, you shall take from him his letters patent testifying his receipt of the same. Witness our hand, Windsor, Sept. 10, 1281." A stamp duty of one penny was placed upon all drafts or cheques by 21 Vict. c. 20 (May 21, 1858).

CHERBOURG (France), the ancient *Cherburgum*, *Caroburgum*, or *Cæsaroburgus*, received a visit from Harold, king of Denmark, about the year 945. The castle is mentioned in an act of 1026, and its chapel and the town hospital were founded by William the Conqueror between 1060 and 1064. On the conquest of Normandy by Philip Augustus in 1203, Cherbourg fell under French domination, and in 1295 it was pillaged by the English. Charles the Bad, of Navarre, obtained possession in 1355, and in 1418 it was taken by the English under Henry V. after a three months' siege. Charles VII. retook it Aug. 19, 1450. Louis XIV. conceived the idea of erecting Cherbourg into a naval fort and arsenal about 1687, and Vauban was appointed to superintend the improvements; but the project was abandoned, and the new and even the old defences demolished in 1689. Some of these were restored in the beginning of the 18th century, and the town was of sufficient importance to receive an attack from the English, who effected an entry Aug. 6, 1758, and, after destroying the works and seizing all the stores, re-embarked Aug. 15. In 1781 Louis XVI. resumed the attempts to establish a naval station here, and in 1784 M. Cessart commenced the breakwater, which is acknowledged to be one of the finest in the world. The outbreak of the Revolution of course suspended its progress, but it was resumed by Napoleon in 1803, and inaugurated in 1813. Since then additions have been continually made. In 1828 the foundations were found to have shifted very considerably from their original position. Louis Philippe restored them on a new principle in 1832; but even

now the dike is liable to serious injury from every violent tempest. The military strength of the place has been prodigiously increased by Louis Napoleon, who opened the railway and the Grand Basin of the Napoleon Docks Aug. 4 and 5, 1858, in presence of Queen Victoria, the English court, and many distinguished visitors.

CHERRY.—"Lucullus, after the war with Mithridates," says Isaac Disraeli, "introduced cherries from Pontus into Italy (about B.C. 74); and the newly imported fruit was found so pleasing, that it was rapidly propagated." Pliny states that the cherry-tree was introduced into Britain about 120 years afterwards, that is, A.D. 46. This race of cherry-trees, so called from Cerasus, now Keresoun, was lost in the Saxon period, and another stock brought from Flanders by the gardener of Henry VIII., and planted in Kent in 1540. Native cherries were, it is said, known in Norfolk in the 13th century. The Cornelian cherry was introduced into England from Austria in 1596; and the American Bird Cherry from America in 1629.

CHERRY ISLAND (Arctic Sea) was discovered by the Dutch pilot Barentz, June 9, 1596. It was at first called Bear Island, because the Dutch sailors killed a bear, the skin of which measured twelve feet in length. The Muscovy Company took formal possession of the island in 1609.

CHERSON (Crimea), an ancient city near the site of which Sebastopol now stands, is supposed to have been built about the 5th century. It formed for many years a republic, and joined the alliance against Pharnaces I. about B.C. 184. The inhabitants assisted Constantine I. against the Goths, who were defeated A.D. 334. Justinian II. was banished to this city in 695. He made his escape in 705, and having been restored to the imperial throne, sent an expedition against Cherson in 709. The youth of both sexes were reduced to servitude, seven of the principal citizens were roasted alive, twenty drowned in the sea, and forty-two taken in chains to receive sentence from the emperor. On the return voyage, the fleet was wrecked on the coast of Anatolia, when conquerors and captives perished. Justinian II. sent another expedition in 711. The people of Cherson prepared for resistance. The army sent against them revolted, elected Bardanes emperor, under the name of Philippicus, returned to Constantinople, and put Justinian II. to death in Dec. 711. Theophilus reduced Cherson to subjection in 831. Wolodomir of Russia was converted to Christianity and baptized at this city in 983, and at the same time married to Anna, a Christian princess. The baptism of Wolodomir and his marriage were celebrated at the same time, and to the desire of obtaining a Roman princess for his bride his conversion is attributed by Gibbon. Alexis I. of Trebizond annexed Cherson to his empire about 1210.

CHERSON, or KHERSON (Russia).—The

capital of a province of the same name was founded in 1778 and fortified in 1780. John Howard, the philanthropist, died in this city, Jan. 20, 1790, and the emperor Alexander erected a monument over his grave. Catherine II. of Russia made a triumphant entry into Cherson in 1787, passing under an arch bearing the inscription, "The Way to Byzantium." Joseph II. of Germany met her here, and entered into an alliance against Turkey. During the war with Russia, an allied fleet appeared in the neighbourhood of Cherson in Oct. 1855; but no attack was made upon that city, which must not be confounded with the ancient city of the same name in the Crimea.

CHESAPEAKE.—This frigate, belonging to the United States, was captured by Captain Broke in the British frigate *Shannon*, June 1, 1813. The action, which only lasted a quarter of an hour, was fought near Boston, in the presence of a large number of Americans who lined the shore. The strength of the rival frigates was as follows:—

	Tons.	Guns.	Crew.
Chesapeake	1135	50	376
Shannon	1066	49	330

The former had 46 men killed and 106 wounded, and the latter 24 killed and 59 wounded.

CHESAPEAKE BAY (North America) was first explored by Capt. John Smith in 1607. He arrived in the bay with colonists in April of that year. The squadron of three vessels was commanded by Capt. Newport, and carried 110 settlers.

CHES.—The Chinese are said to have invented chess; but Sir William Jones is of opinion that the game was invented by the Hindoos. He says: "We may be satisfied with the testimony of the Persians, who, though as much inclined as other nations to appropriate the ingenious inventions of a foreign people, unanimously agree that the game was imported from the west of India in the 6th century of our æra. It seems to have been immemorially known in Hindostan by the name of *chaturanga*, i.e. the four *angas*, or members of an army; which are these, elephants, horses, chariots, and foot-soldiers; and in this sense the word is frequently used by epic poets in their descriptions of real armies." Gibbon states that it was introduced into Persia in the reign of Chosroes I. (531–579). Tamerlane, who died in 1406, was fond of the game, which he is said to have improved. The Saracens introduced this game into Spain in the 8th century, and it gradually spread over Europe. The date of its introduction into England has not been clearly ascertained. It was known here in the 11th century, as Canute is represented as having played it in 1028. Caxton published "The Game at Chess" in 1474.

CHESTER was called *Deva* by the Romans, who formed a colony here, and were not expelled until A.D. 476. The Britons called it *Cærlæon*. It was taken by the Saxons in 828; was destroyed by the Danes in 894, and

rebuilt by Edelfleda in 904. The council of London advised the formation of a bishopric at Chester in 1078, but the see was not fully established until 1534. Richard II. made Chester a principality in 1389. Henry VII. separated it from Cheshire by letters patent dated April 6, 1506, and made it a county of itself. The county hospital was founded in 1756, and opened in 1761. Some portion of the cathedral was finished in 1485, and the west end was commenced in 1508. The city was taken by the Parliamentary forces, after a long siege, in 1645. The jurisdiction of the county palatine of Chester was abolished by 1 Will. IV. c. 70, s. 14 (July 23, 1830).

CHESTERFIELD (Battle).—King Henry the Third's troops defeated the forces of the rebellious barons at this place on Whitsun-eve, May 15, 1266.

CHICHESTER (Sussex) was taken by Ella the Saxon A.D. 480, and, having been destroyed by the South Saxons in 491, was rebuilt by Cissa, from whom the name is derived, in 538. The bishop's see was removed here from Selsey in 1015 or 1082. The cathedral, completed in 1108, was burnt May 5, 1114, and rebuilt in 1125. It was again destroyed by fire in 1187, and the rebuilding commenced in 1199. The present edifice was completed in the 13th century. The Parliamentary forces captured the city in 1643, and the fortifications were destroyed by order of the Long Parliament in 1648. The grammar-school was founded in 1497. The spire of the cathedral was blown down Feb. 21, 1861.

CHIERASCO (Treaty), by which the duke of Nemours obtained possession of his territories in Mantua, was signed at Chierasco April 6, 1631.

CHILI (South America).—This country, the name of which is supposed to be derived from the Peruvian word *Tchili*, signifying "snow," was under the rule of the Incas when the Spaniards commenced the conquest of Peru. Pizarro sent Almagro to subdue Chili in 1536, but the marshal, as he was called, returned without having effected his object. Pedro de Valdivia went by Pizarro's order in 1540. He overran the country, founded the city of Santiago in 1541, and remained there twelve years. The people maintained a struggle against the Spaniards for nearly two centuries, the war being terminated by a treaty in 1722. They rose against the Spaniards in 1772 and expelled them from a large part of the country. In 1810 the Chilenos threw off the Spanish yoke, and declared themselves independent Sept. 18. They were, however, subdued in 1814; but, the Spaniards being defeated at Chacabuco Feb. 12, 1817, and at Maipu April 5, 1818, the independence of Chili was secured. It had been officially proclaimed at Santiago Feb. 12, 1818. Several struggles have occurred between the different factions of the republic since it became independent. The present constitution was promulgated May 25, 1833. The independence of Chili was recognized by Mr. Canning in 1823.

CHILLIANWALLAH (Battle).—Lord Gough, at the head of 22,000 men with 125 guns, encountered the Sikh army, 60,000 strong, at this village, near the river Chenab, Jan. 13, 1849. The English remained masters of the field, though their loss was severe, amounting to 2,269 in killed and wounded. The Sikhs lost 3,000 killed and 4,000 wounded.

CHILTERN HUNDREDS.—The forests on the Chiltern Hills, in Buckinghamshire, were in olden times infested with banditti, and an officer called the steward of the Chiltern Hundreds was appointed to prevent their depredations, and protect the people in the neighbourhood. This office, which no longer exists, now serves to enable a member of parliament, in certain cases, to vacate his seat. May ("Parliamentary Practice") thus explains the practice:—"It is a settled principle of parliamentary law, that a member, after he is duly chosen, cannot relinquish his seat; and, in order to evade this restriction, a member who wishes to retire, accepts office under the crown, which legally vacates his seat, and obliges the house to order a new writ. The offices usually selected for this purpose are those of steward or bailiff of her Majesty's three Chiltern Hundreds of Stoke, Desborough, and Bonenhams, or of the manors of East Hendred, Northstead, or Hempholme, which, though sometimes refused, are given by the Treasury in ordinary cases to any member who applies for them; and are resigned again as soon as their purpose is effected." The legality of the practice, which sprung up in 1750, is doubted, as the office is not one of those for which the occupant is required to vacate his seat.

CHIMNEY.—Beckmann contends that the Greeks and Romans were not acquainted with the use of chimneys. None are found at Herculaneum. They appear to have warmed their rooms by means of a large fire-pan, or portable stove, and this, filled with wood well ignited, or burning coals, was brought into the apartment. Hot air, conveyed by means of pipes, seems also to have been employed. There were no chimneys in the 10th, 12th, and 13th centuries. People in the Middle Ages made a fire in a hole or pit in the centre of the floor, and the smoke escaped through an opening in the roof. The first authentic account of chimneys occurs in an inscription at Venice, relating that in the year 1347 many chimneys were thrown down by an earthquake. The first chimneys at Rome were erected by order of Francesco de Carraro in 1368. In a manuscript giving an account of manners and customs in England, written about the year 1678, it is stated that before the Reformation, "ordinary men's houses, as copyholders and the like, had no chimneys, but flues like louver holes; some of them were in being when I was a boy." Chimneys did not come into general use in France until the middle of the 17th century. A chimney-tax, or hearth-money, was levied by 13 & 14

Charles II. c. 10 (1662). It proved so obnoxious, that it was abolished by 1 Will. & Mary, sess. 1, c. 10 (1689).

CHIMNEY-SWEEPERS.—Chimneys were at first swept with a little brushwood fastened to a rope, but when the flues were made narrower, boys began to be employed. The first chimney-sweepers were boys from Savoy and Piedmont. In consequence of the numerous accidents that happened to boys, a machine for sweeping chimneys was introduced into England towards the close of the 18th century, and a society formed for encouraging the sweeping of chimneys without the use of boys. By 3 & 4 Vict. c. 85 (Aug. 7, 1840), any person compelling or allowing a child or young person under the age of twenty-one years, to ascend or descend a chimney after July 1, 1842, was made liable to a penalty of not more than £10 or less than £5.

CHINA (Asia).—The annalists of this country, called the "Celestial Empire," trace its history to the remotest antiquity. Rémusat, accepting their statements, expresses his belief that it goes back with certainty to the 22nd century before our æra, and that the date of its commencement, according to traditions worthy of credit, may be fixed even four centuries earlier, namely, B.C. 2637. Gibbon (ch. xxvi.), who says the æra of the Chinese monarchy has been variously fixed from B.C. 2952 to B.C. 2132, adds that the historical period does not ascend above the Greek Olympiads. This, however, is considered much too early, and the best authorities fix the commencement of the historical period at the beginning of the Han dynasty, B.C. 203. The northern and southern empires, the former ruled by the Great Khan, and the latter by the Chinese, from A.D. 1234 to A.D. 1279, were called Cathay and Magni. In the Middle Ages the name Cathay was sometimes applied to the whole country. China is the most extensive empire in the world. Mr. S. Wells Williams ("The Middle Kingdom") gives the following estimates of the amount of population, at different periods, according to undermentioned authorities:—

	Inhabitants.
1711. Chinese Repository	28,605,716
1736. Grosier, De Guignes	125,044,245
1743. Ditto	157,343,975
1753. Chinese Repository	103,050,060
1760. Yih-tung-chi	143,125,225
1760. De Guignes	203,916,477
1761. Ditto	205,293,053
1762. Allerstain, Grosier, De Guignes	198,214,553
1790. Chinese Repository	155,249,897
1792. Dr. Morrison	307,467,200
1792. Macartney	333,000,000
1812. Chinese Repository	362,467,183

B.C.

- 2700. First Chinese cycle.
- 2357. Accession of the emperor Yao, who reigned a hundred years.
- 2217. Commencement of the Hia dynasty, according to Du Halde.
- 2198. Commencement of the Hia dynasty, according to "L'Art de Vérifier les Dates."

- B.C.
651. Earliest date in Se-ma-tsein's History of China.
550. Birth of Confucius.
246. All Chinese books ordered to be burnt.
211. Completion of the Great Wall of China.
202. Printing known in China.
200. Jewish settlement in China.
170. Invaded by the Tartars.
24. Supposed Chinese embassy at Rome.
15. The Tao-tse sect of philosophers attain great influence.
- A.D.
65. The religious belief in Boodh, or Fo, introduced into China.
94. The emperor Hoty sends an envoy to Arabia.
166. Chinese historians report the arrival at the Chinese court of an embassy from Anthon, who is supposed to be the emperor Antoninus.
184. China is divided into three separate states.
265. China is reunited into one kingdom, under the Tsin dynasty.
420. Seat of government established at Nankin.
635. Christianity is preached by the Nestorian bishops.
845. Expulsion of the Nestorian Christians.
851-877. China is visited by Arab travellers.
1234. The Mongols obtain possession of the northern half of China.
1245. First European mention of China made by friar John de Plano Carpini, missionary to the Mongols.
1253. Rubuquis sent by St. Louis as missionary to the court of the Great Khan.
1260. Kublai Khan builds Peking, and makes it his capital.
1278. Grand canal commenced.
1280. Kublai Khan obtains possession of the whole empire, and founds the Mongol or Yuen dynasty.
1288. Giovanni di Monte Corvino, papal legate at the court of the Grand Khan, dies at Peking.
1295. Marco Polo arrives in Venice, after having resided seventeen years in China.
1317. Oderico de Pordenone travels in China.
1324. The Arab Ibn Batatu arrives in China, of which he publishes a correct description.
1368. Restoration of a Chinese dynasty by Choo, who commences the Ming family of emperors.
1405. Timour the Tartar sets out to invade China, but dies on the march.
1420. A Persian embassy arrives in China.
1517. Aug. 15. The Portuguese, under Andrade, arrive at the island of Tamang, three miles from the mainland, and reach Canton by the end of September.
1521. Jan. Thomas Pires, Portuguese ambassador at the court of China, falls into disgrace, and is imprisoned at Canton. His countrymen are forbidden to enter the empire.
1537. The Portuguese obtain permission to erect sheds for commercial purposes at Macao.
1543. A Spanish colony is established at Manila, and intercourse opened with Chinese merchants.
1556. Friar Diego Bernardo conducts a religious mission into China.
1563. A Spanish fleet arrives at the island of Zebu.
1575. July 5. The Jesuit missionaries, Martin de Herrada and Geronimo Marin, land at Gan-hai.
1576. June 21. Alvaro and other Augustine monks arrive at Canton.
1581. Martin Ignatius conducts a Franciscan mission to China.
1596. Queen Elizabeth despatches a fleet to China; but it is wrecked on its voyage out.
1600. The Jesuit Matteo Ricci obtains the emperor's permission to settle in Peking.
1624. The Dutch open a trade with China.
1637. May 28. The British attempt to trade at Macao, but are prevented by the Portuguese.
- A.D.
1649. Li Keng deposes the last Ming sovereign, and establishes the Mantchoo Tartar dynasty.
1662. The Dutch expelled from Formosa by Koshinga.
1664. The British again attempt to trade with China, but in vain.
1689. Trade opened with Russia.
1692. In consequence of the exertions of the Jesuits, the emperor Kanghy issues a decree permitting Christianity.
1693. A Russian embassy arrives in China.
1699. The East-India Company open a factory at Canton.
1700. Limpo, Amoy, and Canton opened to British commerce.
1719. Peter the Great despatches Ismaloff on an embassy to China.
1723. Christianity is prohibited by the emperor Yoong-t-ching, who expels the Jesuits.
1727. Catherine I. of Russia concludes a treaty with the emperor, and forms an ecclesiastical establishment and regular embassy at Peking.
1755. European intercourse restricted to Canton.
1784. Nov. 24. A Chinese killed by a loaded gun accidentally fired as a salute. The gunner is seized, and strangled Jan. 8 next year.
1792. Sept. 26. Lord Macartney sets sail from Portsmouth.
1793. July. Lord Macartney arrives at Chusan. Sept. 14. He has an interview with the emperor at Zhehol.
1794. Mar. 17. He sets sail for England, where he lands Sept. 6, having accomplished no results of importance during his absence.
1800. An affray takes place between the crew of H. M. S. *Providence* and some Chinese, in which one of the latter is wounded.
1802. First American consul in China allowed to reside at Canton.
1807. Trade with England stopped for a time, in consequence of the death of a native in a skirmish with the crew of the ship *Neptune*.
1814. Oct. 20. Sir George Staunton compels the imperial viceroy to allow the English to correspond under seal and in Chinese with the government, and also to promise that British factories should not be entered by Chinese officers without previous permission.
1816. Feb. 10. Lord Amherst's embassy leaves England. Aug. 12. Reaches Tien-tsin, where his lordship refuses to perform the humiliating *ko-tow*, or prostration, before the emperor, and, consequently, returns without accomplishing the results of the mission.
1821. Dec. 15. The crew of H. M. S. *Topaz* are attacked by the Chinese, who lose two men in the struggle, and attempt to put a stop to trade in consequence.
1822. Feb. 23. Trade recommenced on its old footing.
1834. April 22. Termination of the East-India Company's monopoly in the trade with China. July 25. Arrival at Canton of Lord Napier, chief commissioner, to superintend British trade with China. Sept. 5. Lord Napier sends for a guard of marines, in consequence of the injuries inflicted on his residence, &c. by the natives. Oct. 11. Death of Lord Napier at Macao. He is succeeded by Mr. (afterwards Sir) J. F. Davis. Nov. 3. Imperial edict, prohibiting the opium trade.
1835. Jan. 31. The Chinese seize a boat and its crew belonging to the British merchant-ship *Argyle*.
1837. Mar. 18. The emperor allows the residence of a British commissioner at Canton. Nov. 29. Captain Elliot strikes the British flag at Canton, and retires to Macao.
1838. Jan. Insurrection of the Meao-taze suppressed by the imperial troops. July 12. Admiral Sir F. Maitland arrives at Tunkoo. Dec. 4.

A.D.

- Disturbance and stoppage of trade in consequence of persistence in the opium traffic.
1839. Mar. 10. Arrival of Commissioner Lin at Canton. Mar. 18. He issues an edict for the seizure of opium. Mar. 19. The British forbidden to leave Canton. Mar. 24. They are blockaded in their factories. Mar. 27. Captain Elliot requires the surrender into his hands of all opium in the possession of British subjects, and promises that they shall receive its full value from government. April 8. Half the opium is given over to the Chinese. May 5. Passage from Canton open to all English merchants, except sixteen, who are detained as hostages. May 21. The remaining 20,283 chests of opium are delivered up. May 24. Captain Elliot and the British merchants leave Canton. June. The Chinese destroy the opium. July 7. A Chinaman is killed in a fray with British and American seamen. Aug. 17. The Chinese attack and murder the crew of the British schooner *Black Joke*. Aug. 26. British residents at Macao ordered to quit in twelve hours. Sept. 4. Sea fight between the British and Chinese in the Bay of Coalloon. No decisive result. Nov. 3. War is commenced by the naval action at Chumphee. The *Volage* and *Hyacinth* disable twenty-nine war-junks, sinking three and blowing up one. Dec. 6. Edict of the emperor, prohibiting all intercourse with England.
1840. Jan. 5. Imperial edict, declaring the English outlawed. Jan. 14. Projected massacre of the English. Feb. 28. Attempt to burn the British fleet in Tongkoo Bay by means of fire-junks. May 22. The *Hellas* attacked by pirates. June 9. Another unsuccessful attempt to burn the British fleet at Cap-singmoon. June 28. Canton blockaded by Sir Gordon Bremer. July 3. The *Bionde*, with a flag of truce hoisted, is fired on by the Chinese at Amoy. July 5. Capture of Chusan by the British. Aug. 6. Mr. Stanton seized by the Chinese, and carried prisoner to Canton. Sept. 16. Seizure of Captain Anstruther, and wreck of the *Kite*, the crew of which, with the captain's lady, are made prisoners, and treated with great cruelty. Oct. 17. Lin receives orders to hand over his seals of office to Commissioner Keshen. Nov. 6. Truce proclaimed. Nov. 10. Release of Mr. Stanton. Nov. 29. Admiral Elliot resigns the command of the fleet.
1841. Jan. 6. Cessation of the negotiations, owing to the procrastination of the Chinese. Jan. 7. Two of the Bogue forts are taken by the British. Jan. 20. Hong-Kong is ceded to Great Britain; and an indemnity of 6,000,000 dollars agreed to be paid to the English before 1846. Jan. 26. British flag hoisted at Hong-Kong. Jan. 27. Date of imperial edict disavowing the treaty made by Keshen. Feb. 22. Recommencement of hostilities. Feb. 25. Evacuation of Chusan. Feb. 26. Destruction of the Bogue forts by Sir Gordon Bremer. Feb. 26. Keshen is degraded by an imperial edict, and ordered to be conveyed to Peking for trial. Mar. 1. The English fleet ascends the Pekiang to Canton. Mar. 2. Sir Hugh Gough assumes command of the forces. Mar. 3. Another truce. Mar. 12. The defences of Canton are seized by the British. Mar. 18. The forts and factories at Canton are seized by the British, and a Chinese flotilla is destroyed. Mar. 20. A truce is agreed upon between Captain Elliot and the imperial commissioner Yang. April 14. Arrival of Yihshan, the new imperial commissioner. May 21. The Chinese attempt to burn the English fleet at Canton with fire-rafts. May 24. The British, under Sir Le Fleming

A.D.

- Senhouse, attack Canton, and gain the heights behind the city the next day. May 27. Captain Elliot abandons the attack, and a ransom of 6,000,000 dollars is paid to the British government. June 14. Death of Sir Le Fleming Senhouse. July 16. Imperial proclamation re-opening British trade. Aug. 10. Sir Henry Pottinger, the new British plenipotentiary, lands at Macao. Aug. 26. Amoy is taken by the British. Oct. 1. Recovery of Chusan island by the British. Oct. 9. Capture of the city of Chinhae. Oct. 13. Capture of Ningpo. Dec. 28. Capture of the district cities of Yuyao, Tsikee, and Funghwa.
1842. Mar. 10. The Chinese make a futile attempt to recover Ningpo and Chinhae, with a force of 12,000 men. Mar. 15. Sir Hugh Gough defeats a Chinese force of about 8,000 men at Tse-kee. May 7. Evacuation of Ningpo by the British. May 18. Capture of the city of Chapoo. June 16. Capture of Wosung, on the Yang-tze-kiang. June 19. Capture of Shang-hai. July 21. Storm and capture of Chin-keang-foo. Aug. 6. The English fleet takes its station before the walls of Nanking. Aug. 15. Arrival of Ke-ying, the imperial commissioner, with powers to treat for peace. Aug. 29. Signing of the treaty of Nanking (*q.v.*), whereby an end is put to the first Chinese war. Sept. 16. H.M.S. *Auckland* leaves Nanking with the emperor's ratification of the treaty on board. Oct. 17. Dedication at Hong-Kong of the first Protestant place of worship in China. Dec. 7. Riots at Canton, and destruction of the European factories.
1843. June 26. Hong-Kong is made the British seat of government in China, and placed under the governorship of Sir H. Pottinger. July 27. Canton is opened to the British, under the regulations of the treaty of Nanking. Oct. 8. Supplementary treaty of Homum-Chae.
1844. May 7. Arrival at Hong-Kong of Mr. Davis, Sir H. Pottinger's successor as British governor-general in China.
1846. April 4. Treaty of Bocca Tigris. July 8. Fracas at Canton between the natives and English residents.
1847. April 3. The English residents at Canton present a list of their grievances to Sir John Davis. April 5. A British force, under General d'Aguilar, destroys the Bogue forts, threatens Canton, and compels the Chinese commissioner, Ke-ying, to accede to the demands of the governor. Dec. 5. The natives seize and murder six English residents. Sir John Davis afterwards obtains the execution of the criminals.
1850. Oct. 3. First battle of the Tae-ping rebellion. Oct. 20. The great piratical fleet of Shapng-tsai is destroyed in the Bay of Tonquin, by H.M.S. *Columbine* and *Fury*, and the E.I.C. steam-sloop *Phlegathon*. Nov. 5. Commissioner Lin is despatched against the Tae-pings, but dies on the journey.
1851. April 11. Defeat of the rebels at the Kew-heen-hen ferry. Nov. 30. Organization of the Tae-ping army.
1852. May 19. The rebels raise the siege of Kweilin. Dec. 30. They extend their conquests to the Yang-tze-kiang.
1853. Jan. 12. They take Woo-chang. Mar. 18. Amoy submits to the Tae-pings. Mar. 19. Capture of Nanking by the rebels. May 22. Kae-fung successfully resists a siege by the rebels. Sept. 7. They enter Shaug-hai. Nov. 1. Tae-ping army in a state of blockade at Tsing-hae.
1854. June 26. The rebels take Woo-chang.
1856. Oct. 8. The Chinese board the *Arrow* lorchas, said to be a British vessel, and thus bring about a renewal of hostilities. Oct. 27. Sir M. Seymour opens fire on Canton.

A.D.

- Nov. 12 and 13. Sir M. Seymour captures all the Bogue forts and the Annunghoy forts. Dec. 14. The foreign factories at Canton are burned by the natives.
1857. Jan. 15. Attempt to poison the British residents at Hong-Kong, by mixing arsenic with bread. May. Commodore Elliot and Sir M. Seymour totally destroy the Chinese fleet of war-junks in the Canton waters. June 12. A British squadron sets fire to the suburbs of Canton, and retires to the lower part of the river. July. Lord Elgin, the British plenipotentiary, arrives at Hong-Kong. Oct. Baron Gros, the French plenipotentiary, arrives at Canton. Dec. 28. Bombardment of Canton, which surrenders to the French and English next day.
1858. Jan. 5. The victors enter Canton, and capture Yeh, Peh-kwei, the governor, and Tseang-keun, the Tartar general. May 19. The allied squadrons force an entrance into the Peiho river, in spite of the fire of the Chinese forts. June 26. Signing of the treaty of Tien-tsin. Aug. 11. Capture and destruction of Fort Namtow.
1859. May. The Hon. Mr. Bruce arrives at Hong-Kong, as her Majesty's minister at the court of Peking. June 13. Commercial treaty with Russia. June 24. The forts on the Peiho treacherously open fire on Admiral Hope's squadron, which is compelled to retire to Shang-hai, after losing 64 officers and men killed, and 252 wounded.
1860. Expeditions fitted out by England and France sail for China. Mar. 8. Ultimatum sent by Mr. Bruce to the Chinese government. June 21. Lord Elgin and Baron Gros reach Hong-Kong. Aug. 21. Capture of the Taku forts at the mouth of the Peiho. Aug. 23. Tien-tsin occupied. Sept. 9. The expedition leaves Tien-tsin, and advances on Peking. Sept. 18. Mr. Parkes, Mr. De Norman, and party, consisting of twenty-six, including Sikhs and Europeans, who had started for Tangchow under a flag of truce, are treacherously made prisoners. Oct. 6. The emperor's summer palace is captured and sacked by the French. Oct. 8. Mr. Parkes and other prisoners restored. Oct. 12. The allies prepare to open fire on Peking, when the Chinese government grant all their demands. Oct. 24. Convention is signed at Peking. Nov. 5. The allied forces evacuate Peking. Nov. 14. Treaty between Russia and China. Dec. 27. The conclusion of peace is proclaimed in the city of London.

LIST OF DYNASTIES.

	B.C.		A.D.
1. Hia	2198	12. Souy	590
2. Chang	1766	13. Tang	619
3. Tcheou	1110	14. Heou-Leang ..	907
4. Tsin	246	15. Heou-Tang ..	923
5. Han	203	16. Heou-Tsin ..	937
	A.D.	17. Heou-Han ..	947
6. Heou-Han ..	221	18. Heou-Cheou ..	951
7. Tsin	265	19. Song	960
8. Song	420	20. Yuen	1280
9. Tsi	479	21. Ming	1368

11. Tch'in	557		

EMPERORS OF THE REIGNING DYNASTY.

	A.D.		A.D.
Shun-che	1644	Kea-king	1795
Kang-hy	1662	Taou-kuang	1820
Young-t-ching ..	1792	Hien-fung	1850
Kien-long	1735		

CHINA APPLE.—This tree was introduced into England in 1780.

CHINA ROSE was first successfully raised in England in the year 1789.

CHINA-WARE.—The art of making porcelain was known in China nearly two centuries before the Christian era. For a long time the Chinese supplied Europe with this ware, and on this account it was called China. The ships of the East-India Company first imported it in 1631.

CHINGLEPUT (Hindustan).—This town was taken by the French in 1751. Clive retook it after a short siege Oct. 31, 1752. Hyder Ali besieged it in 1780, and was driven away by Sir E. Coote Jan. 18, 1781.

CHIN-HAE (China).—This town was taken by the English army Oct. 9, 1841. It made a good defence. The victors captured 157 guns. An attack made by the Chinese on the gates of the city, March 10, 1842, was repulsed.

CHIN-KEANG-FOO (China).—This city was taken by the English after a gallant defence, July 21, 1842. The rebels took the city April 1, 1853, and evacuated it in 1857.

CHINON (France).—Geoffrey of Anjou was imprisoned in the castle of Chinon by his brother Fulk, A.D. 1068, and remained there until 1096. Henry II. of England died at Chinon July 6, 1189. His son, King John, concluded a truce for five years with Philip II. of France at this place, Sept. 18, 1214. Joan of Arc, the Maid of Orleans, appeared before Charles VII. in 1429 at this town where he was keeping his court, and announced her mission to raise the siege of Orleans and crown him king at Rheims.

CHINSURA (Hindustan).—The Dutch, who formed a factory here in 1656, were soon after expelled by the native authorities. They returned in 1686. The English took it in 1795, and restored it to the Dutch in 1814. By the 8th and 9th articles of a treaty concluded between Great Britain and the Netherlands, March 17, 1824, it was with other places ceded to England in exchange for some possessions in Sumatra.

CHIOS (Ægean Sea).—This island was, according to tradition, peopled by the Pelasgians. Its inhabitants joined the Ionic confederation. The Persians invaded Chios and committed great devastation B.C. 493. The Chians revolted from the Athenians B.C. 412, and the latter ravaged the island. They again threw off the Athenian yoke B.C. 357. Philip captured Chios B.C. 201. The Chians remained in friendly alliance with the Romans for many years. Their island is supposed, however, to have been included in the Insularum Provincia, established by Vespasian. The chief city, also called Chios, claims the honour of being the birthplace of Homer. Its modern name is Scio (q. v.).

CHIOZZA, (Sea-Fight,) fought off Chiozza, between the Genoese and Venetian fleets, in May, 1379. The latter were defeated with great loss. The island and city of Chiozza fell into the hands of the Genoese. Their fleet was blockaded by the Venetians in the port of Chiozza, and the Genoese were com-

pelled to surrender in 1380, when the island was restored to Venice.

CHIPPAWA (Battles).—General Riall, at the head of 1,500 regular troops, besides militia and 300 Indians, sustained a defeat at this place from an American army 6,000 strong, with a numerous train of artillery, July 5, 1814.—General Riall having been reinforced and supported by General Drummond, advanced against the Americans, who had established themselves at Chippawa. A severe action took place July 25, in which General Riall was wounded. The Americans were, however, defeated, and abandoned their camp, throwing the baggage and provisions into the Rapids. The Americans had 5,000 men engaged, and the English 2,800, of all descriptions. Several hundred prisoners were taken.

CHIPPENHAM (Wilts) was a place of importance in the time of the Anglo-Saxon kings, some of whom resided here. Ethelwulf celebrated the marriage of his daughter Athelwitha with Burrhed, king of Mercia, in this town, A.D. 853. In 878 it was seized by the Danes, who, after having committed great ravages, were expelled by Alfred. In *Doomsday Book* (1086), it is mentioned as forming part of the royal possessions both before and after the Conquest, but in the reign of Richard II. it belonged to the Hungerford family. Chippenham sent two members to parliament in the reign of Edward I. Its charter, dated May 2, 1554, was abolished by Charles II. in 1684. James II. restored the old privileges of the borough by another charter, granted March 13, 1685. Chippenham cloth won the first prize in the Great Exhibition of 1851.

CHITORE (Hindustan).—This fortified town, seated on the summit of a precipice, was at one time the capital of Odeypoor. The Mohammedan emperor of Delhi seized it in 1303, and the Rajpoots recovered it in 1312. The king of Guzerat took it in 1533, and the emperor Acbar in 1567. After having undergone various vicissitudes, it was, in 1790, restored to the ruler of Odeypoor.

CHITTAGONG (Hindustan).—The revenues of Chittagong, with those of other districts, were ceded to the East-India Company by a treaty concluded with Mir Casim, Sept. 27, 1760. It suffered from an earthquake April 2, 1762.

CHITTEBROOG (Hindustan).—Hyder Ali failed in an attack upon this strong fortress in 1776, but obtained possession in 1779. In this fortress Tipoo Saib imprisoned General Matthews, made prisoner at the capitulation of Bednore, April 30, 1783. The troops stationed here seized the military treasure Aug. 6, 1809.

CHITTOOR (Hindustan).—Hyder Ali took this place, in Arcot, in October, 1780. Sir E. Coote laid siege to it Nov. 8, 1781, and it capitulated on the 10th. It came under British rule in 1802, and the native chiefs were expelled in 1804.

CHIVALRY.—"It appears probable," says Hallam, "that the custom of receiving arms

at the age of manhood with some solemnity was of immemorial antiquity among the nations that overthrew the Roman empire." And to this he traces the origin of chivalry, adding that "proofs, though rare and incidental, might be adduced to show that in the time of Charlemagne, and even earlier, the sons of monarchs at least did not assume manly arms without a regular investiture. And in the 11th century it is evident that this was a general practice." The custom for feudal tenants to serve on horseback, equipped with the coat of mail, in the reign of Charlemagne, in his opinion gave birth to the institution. The connection of chivalry with the Crusades gave it a strong religious tinge, and to this, devotion to the female sex was added, so that the love of God and of the ladies constituted a single duty. Its chief virtues were loyalty, courtesy, and munificence. "The young man, the squire," says Guizot, "who aspired to the title of knight, was first divested of his clothes, and put into the bath, a symbol of purification. Upon coming out of the bath, they clothed him in a white tunic, a symbol of purity; in a red robe, a symbol of the blood which he was bound to shed in the service of the faith; in a saga, or close black coat, a symbol of the death which awaited him as well as all men." St. Pelaye ascribes its decline, in the 15th and 16th centuries, to the profusion with which Charles VI. lavished the order, and its extension by Francis I. to lawyers and other civilians. Hallam is of opinion that the invention of gunpowder eventually overthrew chivalry.

CHIVALRY, (Court of,) existed at a very early period, though no records of its history remain. Its jurisdiction extended over matters of honour and courtesy, and its severest penalty was degradation from knighthood, which it only decreed in three cases; that of Sir Andrew Harelay in 1322 being the first. In consequence of abuses, its authority was defined in 1389 by 13 Rich. II. stat. 1, c. 2.

CHLORINE.—This elementary gaseous body was discovered by Scheele in 1774. He called it "dephlogisticated muriatic acid." Sir Humphry Davy corrected some errors that prevailed respecting its nature in 1809, and gave it the name of chlorine on account of its greenish hue. Mr. F. Smith introduced an apparatus for making chlorine in 1847.

CHLOROFORM.—This fluid, regarded as a compound of chlorine and formyle, whence the name, was discovered by Soubeyran in 1832. Its true composition was ascertained by Dumas and Peligot in 1835. The vapour of chloroform was first applied as an anæsthetic agent by Dr. Simpson, of Edinburgh, in 1847. It is considered the safest of all anæsthetics.

CHOBHAM CAMP.—An encampment on a small scale was formed at Chobham, in Surrey, June 14, 1853, for exercising the troops in military evolutions. The Queen reviewed the troops June 14, and the camp broke up August 20.

CHOCOLATE.—Prescott (Mexico, vol. i. b. 1, c. 5) speaking of the products of Mexico, remarks:—"Another celebrated plant was the cacao, the fruit of which furnished the chocolate,—from the Mexican *chocolatl*,—now so common a beverage throughout Europe." When Cortes was at the capital, A.D. 1519, the emperor Montezuma took no other beverage, fifty jars or pitchers being prepared for his daily consumption. Two thousand pitchers were allowed for his household. It was brought from Mexico into Europe by the Spaniards, and was in use in France in 1661. Chocolate-houses were introduced into London in the middle of the 18th century.

CHOCZIM, or CHOTYN (Russia).—This town, in Bessarabia, was taken from the Turks by the Russians in 1739; but the former soon after regained possession. The Turks were defeated in a battle under the walls of Choczim, April 30, 1769, when the Russians followed them into the town, and having set fire to it, retreated. The Russians gained another victory near Choczim, July 13, 1769, and laid siege to the town, but were compelled to retire. They returned, and it fell into their hands in the autumn of the same year, but was restored to Turkey in 1774. The Austrians and Russians captured it, after a gallant defence, Sept. 29, 1788. Though restored by the treaty of Jassy in 1792, it was finally ceded to Russia in 1812.

CHOLERA.—This disease was prevalent in 1669, but the most malignant form, known as Asiatic cholera, first made its appearance amongst some troops stationed at Ganjain, in Hindostan, in 1781, on which occasion several men were carried off in a few days. Occasional outbreaks afterwards occurred in other parts of India, and in 1817 the cholera appeared, in an epidemic form, spreading over different parts of Asia. It reached the Mauritius in 1819, visited the islands of the Indian archipelago, broke out at Canton in 1820, at Peking in 1821, at several places in the Persian Gulf in the same year, and reached Aleppo in 1822, where it spread along the shores of the Caspian Sea, and parts of Russia. For a time its ravages ceased, but in 1829 it again broke out near the Caspian. It appeared in Moscow, St. Petersburg, and other Russian towns, in 1830, at Vienna, and towns in Germany, Hungary, Poland, Turkey, &c. in 1831, and travelling to England, burst forth at Sunderland Oct. 26, 1831. It visited Edinburgh in Jan. 1832, London Feb. 14, Dublin March 22, and gradually extended over the United Kingdom. France and America were devastated by this terrible scourge in the same year; Spain and Portugal in 1834; and different parts of Italy in 1835, 1836, and 1837. In the last-mentioned year it passed over to Algiers, and after an outbreak at Malta, disappeared. The second visitation broke out in Asia in 1845, and after visiting many places in Asia, and on the continent of Europe, reached England in October, 1848. This attack seems to have died out somewhere in America in 1849.

The third visitation appeared in England for a short time in 1853, again burst forth in Sept. 1854, and after spreading over other parts of Europe, ceased in 1856.

CHOTUSITZ.—(See CZASLAW.)

CHOUANS.—This name, given to bands who fought against the republicans in Brittany and La Vendée, during the French revolution, is said to have been derived from their leaders, four brothers named Chouan, or from the watchword "*chou, chou*," which was their battle-cry. Lord Stanhope says, "The insurgents of Brittany were known by that name, a word of doubtful origin, and said to be corrupted from *chat-huant*, the night-owl, to denote their secret signal in their nightly expeditions." The rebellion commenced in 1792, and in Oct. 1793, they defeated the republican forces at Laval, in Brittany. In 1795 they sustained a serious defeat at Quiberon, but their cause was not finally ruined till Nov. 9, 1799, when Napoleon Buonaparte substituted his despotism for the government of the Directory. At the time of their greatest power the Chouans numbered 100,000 armed men, and if their efforts had been directed by an able general, it is difficult to conjecture what effect they might have produced.

CHRISM.—The oil consecrated by the bishop, and used in the Greek and Roman Catholic churches in baptism, confirmation, ordination, and extreme unction. It was prepared on Holy Thursday. Taylor (Glory of Regality, p. 347) remarks, "The distinction between the oil and the chrism of our rituals may be explained by showing their respective uses in the ceremonies of the Christian Church. In the earlier ages three kinds of unction were employed in the offices of religion: 1st, that for sick persons; 2nd, that for the *catechumeni*, or persons not yet baptized or confirmed; and 3rd, that used in baptism, confirmation, or consecration. The former of these were with oil consecrated for the two several purposes by the priest, but the latter with an unguent of oil mingled with balm, which was prepared at a particular season, and always consecrated by a bishop, by whom only it could be used, except in cases of necessity in the rite of baptism." Our sovereigns down to Elizabeth were anointed with this last-mentioned chrism at the coronation. Bingham (Antiq. xi. ch. i. s. 3) says, "And because the divine operations of the Holy Spirit in sanctifying grace are sometimes in Scripture called the *unction* or *anointing of the Spirit*, therefore baptism had also the name of *chrism* or *unction*, from this noble effect attending it."

CHRIST (Order of).—On the abolition of the Templars by Clement V. in 1312, King Dionysius I. of Portugal preserved the order in his dominions, but changed its title in 1317, to that of "The Knights of Christ." This arrangement was sanctioned by Pope John XXII. in 1319. The new order afterwards attained such power that King John III. was obliged to obtain an edict

from Pope Hadrian VI., by which the grand mastership of the order became vested in the kings of Portugal in 1522.

CHRISTAUDINS, or CHRISTODINS.—This name was applied to the Protestants in France, to render them contemptible, because, as their enemies pretended, they could only talk about Christ.

CHRIST CHURCH (Oxford).—This college, called Cardinal College, was founded by Wolsey, who in 1524 obtained permission to convert the priory of St. Frideswide into a seminary. On Wolsey's death it reverted to Henry VIII., who re-established it as King Henry's College Sept. 27, 1532. It received further endowments, was changed into a cathedral church, and called Christ Church, in 1546, the dean and canons being required to maintain the school. The library was annexed in 1716, and completed in 1761. A fire broke out in the hall, March 3, 1809, but it was fortunately extinguished, though the damage amounted to £12,000.

CHRISTANIA (Norway), the capital, was founded by Christian IV. A.D. 1624, on the site of the ancient city of Opslo, destroyed by fire May 24 in that year. Charles XII. advanced to Christiania in 1716, and laid siege to the castle, supposed to have been built about 1302; but he was compelled to retire. It is the seat of a bishop. The university was founded in 1811. A fire occurred at Christiania April 13, 1858, when the Exchange, the Bank, other public buildings, and a large part of the city, were destroyed. Christiania received its name from its founder Christian IV.

CHRISTIANITY.—The religion professed by all believers in Jesus Christ, being the fulfilment and completion of the Mosaic dispensation. The disciples of our Saviour were first called Christians at Antioch (Acts xi. 26), in the year 42; and the word occurs but twice more in the New Testament, namely, in the address of King Agrippa to Paul (Acts xxvi. 28), in the year 60, and in Peter's (1 Epist. iv. 16) exhortation, "If any man suffer as a Christian, let him not be ashamed." This epistle was written about the year 59. Though Christian was the name to which the primitive church adhered, its followers were known under various designations; amongst which may be mentioned, Believers, Brethren, Elect, Jesseans, Gnostics, Nazarenes, Theophori, and Christians.

CHRISTIANSAND (Sweden), founded by Christian IV. in 1641.

CHRISTMAS BOX.—The practice of giving presents on Christmas Day arose out of the Pagan custom of the Paganalia, instituted by Servius Tullius B.C. 550. On these festivals, celebrated at the commencement of the year, an altar was erected in every village, when each person (man, woman, and child) was expected to contribute a coin. From this primitive mode of counting the population, new year's gifts, of which the English Christmas boxes are a modification, arose. Aubrey speaks of a pot, in which Roman coins were

found, resembling the earthen boxes formerly used by our apprentices.

CHRISTMAS DAY.—The Nativity was not celebrated on the same day by all the primitive churches. For two or three centuries the Eastern church kept the feast on the 6th of January, whilst the Latin church observed it on the 25th of December. The festival is believed to have originated in the 2nd century. Dionysius Exiguus, a Scythian monk, about the year 527, first fixed as an æra the birth of Christ, on the 25th of December, in the year of Rome 753, when Lentulus and Piso were consuls. This computation has been followed up to the present time, though the best authorities are agreed that this is neither the month nor the year in which the Saviour of mankind became incarnate. The date now generally received is that of April 5, B.C. 4.

CHRISTMAS ISLAND (Pacific Ocean) was discovered by Capt. Cook in his last voyage, Dec. 23, 1777. He landed on the 25th, and named the island after the day.

CHRISTOPHER'S, ST. (Atlantic).—This island, vulgarly called St. Kitts, and named by the natives "The Fertile Isle," was discovered by Christopher Columbus in 1493. The bucaniers settled upon it in 1623, and the French and English having quarrelled, occupied different portions. An English expedition landed here June 21, 1690, and it capitulated July 14. It was again taken from the French July 15, 1702, and was ceded to England by the treaty of Utrecht in 1713. The French landed 8,000 men here Jan. 11, 1782, during the American war, and the small garrison, only 600 strong, retired to a strong position, called Brimstone Hill. An English squadron sent for its relief under Admiral Hood, engaged with the Count de Grasse's fleet Jan. 26, 1783. Brimstone Hill, closely besieged, capitulated Feb. 13. It was restored the next year.

CHRIST'S COLLEGE (Cambridge).—This college was established by Margaret, countess of Richmond, mother to Henry VII., in 1505. It was founded on the site of Henry the Sixth's College, called God's House, the name being changed to Christ's College.

CHRIST'S HOSPITAL, or the BLUE-COAT SCHOOL.—The site of the monastery of the Grey Friars was granted by Henry VIII. to the city of London, for relieving and succouring the poor. In 1552 the city of London fitted up a part of the monastery for the reception of children, and 340 were received in November. Their dress, at first russet cotton, was at Easter, 1553, changed to blue; whence the present name of the school. The patent of foundation by Edward VI. bears date June 26, 1553. Charles II. added the mathematical school in 1673. The branch establishment at Hertford was founded in 1683, and the writing-school was endowed by Sir John Moore in 1694. Owing to the decay of great part of the original erection, it has been rebuilt. The new infirmary was completed in 1822,

and the first stone of the hall was laid by the duke of York in April, 1825.

CHRIST'S THORN.—The *Zizyphus paliurus*, supposed to be the same from which the crown of thorns was made, was brought to this country from Africa A.D. 1596.

CHROMIUM.—This metal was discovered in 1797, by N. L. Vauquelin, a distinguished anatomical chemist; born in Normandy.

CHUMPANEER (Hindustan), was taken by Mahmoud, king of Guzerat, in 1483, after a siege of twelve years. The emperor Humayun seized it in 1534, and it subsequently formed part of the Mahratta territory. The British took it, Sept. 17, 1802, and in 1803 it was annexed to Scinde.

CHUNAR, or CHUNARGHUR (Hindustan), was held by the emperor Baber in 1529, and taken by the Affghan Shir Khan in 1530. Humayun, the successor of Baber, regained possession in 1538, after a siege of six months. In 1763 the town was taken by the British, to whom it was formally ceded in 1768. A treaty was concluded here between Warren Hastings and the nabob of Oude in 1781.

CHUPAS (Battle).—During the civil wars amongst the Spanish conquerors of Peru, Vaca de Castro defeated Almagro's army after a hotly-contested battle in the plains of Chupas, Sept. 16, 1542. Almagro escaped to Cuzco, where he was immediately made prisoner and executed.

CHUQUISACA (South America), the capital of Bolivar, was founded by one of Pizarro's officers A.D. 1539. It was at first called the "Villa de la Plata," or "City of Silver," in allusion to the mines in the vicinity. Chuquisaca was made a bishopric in 1551, and erected into an archbishopric in 1608. This city is sometimes called Sucre, from the general who secured the deliverance of the country by his victory at Ayacucho, Dec. 9, 1824.

CHURCH.—Bingham supports Mr. Mede's view that churches, or buildings for the performance of divine services, existed in the 1st century. St. Paul (1 Cor. xi. 22) speaks of the church as a place set apart for sacred duties. Towards the end of the 2nd century Clemens Alexandrinus uses the word *ecclesia* for the place of assembly; and Eusebius, referring to the peace enjoyed by the Christians from the persecution of Valerian to that of Diocletian (253—303), declares that the Christians had increased so greatly in that half-century, that "their ancient churches were not large enough to receive them, and therefore they erected from the foundations more ample and spacious ones in every city." St. Austin, moreover, founds the use and building of churches on 1 Tim. ii. 1, and declares that as soon as the Christian religion was planted in the world, then churches were built. Churches existed in this island at a very early period of the Christian æra. Gildas speaks of the restoration of those destroyed during the Diocletian persecution. The emperor Constantine built several new churches, and repaired and beautified others in the East. In 326 he laid the foundation of

the temple called Sancta Sophia, which was completed by his son Constantius in 360. The first English churches were made of wood. During the 4th century Bishop Ninias built a stone church in Galloway, and on account of its extreme rarity the place was called Whitechurch.

CHURCH OF ENGLAND.—The early history of the Church in this island is given under **BRITISH CHURCH**. Many laws for the regulation of the Church were made by the Anglo-Saxon kings. Its right of sanctuary was rigidly enforced. Attempts at encroachment by Rome were frequently opposed, and the first article of Magna Charta (1215) provided that the Church of England should be free, and enjoy her whole rights and liberties inviolable. This was confirmed by subsequent acts. The connection with the Church of Rome was entirely severed at the Reformation. In 1530, the clergy in convocation acknowledged Henry VIII. as supreme head of the English church; and by 25 Hen. VIII. c. 21 (1534), the Papal power in England was abrogated. The king was appointed supreme head of the Church by 26 Hen. VIII. c. 1 (1534). The Articles were drawn up in 1551, and published in 1553. They were forty-two in number. They were revised and reduced to thirty-nine in 1562. At the Union in 1800, the Church of Ireland was united with that of England, under the title of the United Church of England and Ireland.

CHURCH OF NORTH AMERICA. (*See* AMERICAN EPISCOPAL CHURCH.)

CHURCH OF SCOTLAND.—The General Assembly, which met at Glasgow, abolished episcopacy and deposed the bishops Dec. 20, 1638; from which time Presbyterianism has been adopted as the religion of that part of the United Kingdom.

CHURCH-RATES have existed in England from time immemorial, though the earliest documentary record of their existence is found in the Year-books of the 44th Edward III. (1370).

CHURCHWARDENS.—These officers are said to have been first appointed by an African council about A.D. 425. In England they were anciently called church reeves, were sometimes appointed by the clergyman of the parish, and sometimes by the clergyman and the parish, according to custom. The 89th canon of 1603 directs, that "churchwardens shall be chosen yearly in Easter week by the joint consent of the minister and parishioners, if it may be; and if they cannot agree, the minister shall choose one, and the parishioners another." From a communication in *Notes and Queries*, it appears that three churchwardens have been chosen annually at Attleborough, in Norfolk, since 1617.

CHURCHYARD.—The practice of interring the dead in churchyards arose in the 6th century. The council of Braga, A.D. 563, allowed men to be buried in the churchyard, under the walls of the church, but prohibited burial within the church. The French, however, retained the ancient practice until

permission was accorded for interment in churchyards by the council of Nantes in 660. In former times churchyards were privileged places, and property was often carried to them for safety. (*See* BURIAL and CEMETERY.)

CHUSAN (China Sea).—The principal island of this group, called Chusan, was captured by the English July 5, 1840; and evacuated Feb. 25, 1841. Its chief city was again captured, and the island re-occupied, Oct. 1, 1841. By the treaty of Nankin, signed Aug. 29, 1842, the English were to hold this island until the indemnities had been paid, and certain ports opened. It was restored to the Chinese in 1846.

CIBALIS (Battle).—During the civil war between Constantine and Licinius, the latter was defeated near this city, in Pannonia, Oct. 8, 314 A.D. Licinius abandoned his camp and magazines, and retreated with great expedition.

CILICIA (Asia Minor).—This country was originally inhabited by a Phœnician tribe. Syennesis, king of Cilicia, is said to have assisted in a mediation for peace between Croesus, the king of Lydia, and the Medes, B.C. 610. Cilicia was afterwards subject to Persia, and supplied 100 ships for the invasion of Greece, B.C. 480. The inhabitants indulged in piracy. The Romans sent several expeditions to suppress these malpractices, and the country was finally conquered by Pompey B.C. 66, and was made a Roman province B.C. 64. It was overrun by the Saracens in the 7th century. They were expelled by Zimisces A.D. 964. It underwent various changes, and was finally conquered by Amurath I. in 1387.

CIMBRI.—This Celtic tribe, inhabiting Jutland, having joined with the Teutons, entered Illyria, where they defeated Cn. Papirius Carbo, at the head of a consular army, B.C. 113. After this triumph they advanced into Gaul, B.C. 112, passed into Spain, and, reappearing on the frontiers of Transalpine Gaul, defeated two Roman armies B.C. 109 and 107. They inflicted a terrible defeat on another Roman army, led by two consuls, B.C. 105, after which they withdrew into Spain. The Celtiberians drove them from this province B.C. 104; whereupon the Cimbri returned into Gaul. Marius collected a large army and went to oppose them. The Cimbri and Teutons separated into two bodies, the former taking the road through Helvetia, and the latter pressing forward to assail the Roman army. Their intention was to reunite their forces on the Lombard plains. The Teutons were attacked and overwhelmed by the Romans, and 100,000 men are said to have perished on that occasion, B.C. 102. The Cimbri in the mean time had reached the valley of the Adige. Marius allured them into an unfavourable position, in which they were defeated and exterminated, B.C. 101. The women, having put their children to death, committed suicide. A distinct tribe was discovered, in the middle of the 18th cen-

tury, inhabiting the villages in the mountains near Verona and Vicenza, and speaking the Danish language. Some writers endeavoured to prove that these people were a remnant of the Cimbri defeated by Marius.

CIMMERII.—This nomadic race, inhabiting the Crimea and parts of the neighbouring country, having been expelled by the Scythians, passed along the shores of the Euxine, invaded Asia Minor, and pillaged Sardis, the capital of Lydia, B.C. 635. In this country they are said to have remained until about B.C. 617, when they were defeated and driven out of Asia Minor. Little authentic is known of this people. Homer refers to another people of the same name, fabled to have dwelt in a land of perpetual darkness. Hence the term "Cimmerian gloom."

CINCINNATI ORDER was established by the Americans during the revolutionary war, about the year 1783, and was for a time very popular. The French officers wore the decoration, but the order soon ceased.

CINNAMON.—The Hebrews used this spice in their religious ceremonies B.C. 1496 (Exod. xxx. 23). It is also mentioned in the Song of Solomon (iv. 14), and in Prov. vii. 17. Ceylon is the place at which the tree flourishes best, and from this island Europe has derived its principal supplies from the earliest times. The Society for the Encouragement of Arts, Manufactures, and Commerce, in 1773 awarded a gold medal to Dr. Young, for introducing the culture of the cinnamon-tree into St. Vincent's. A few plants found in a French ship bound from the Isle of France to Hispaniola, and captured by Rodney, were presented by him to the Jamaica planters in 1783, and thus the cultivation of the tree was introduced into that island. No sooner had the passage round the Cape of Good Hope been discovered than the Portuguese endeavoured to get the cinnamon trade, which had before that period been monopolized by Arab merchants, into their hands. They established a factory at Ceylon, and concluded a treaty with the king of Kandy, who engaged to furnish them with 124,000 lb. annually, in return for their assistance against his enemies. The Dutch became the rivals of the Portuguese, and in 1612 the king of Kandy engaged to deliver to them all the cinnamon he could collect. This led to a struggle, which was terminated in 1644 or 1645, by an agreement between the Dutch and the Portuguese to share the produce between them. War broke out again in 1652; the Dutch captured Colombo in 1656, and in 1663 the Portuguese were finally excluded from all participation in the trade. Ceylon was captured by the English in February, 1796, when the trade passed from the control of the Dutch.

CINQUE PORTS.—The commencement of this system of defence against invasion may be traced to the period of the Roman occupation of England. Jeake states that the five ports, Hastings, Hythe, Sandwich, Dover, and Romney, were enfranchised in the time of Edward the Confessor, although only three,

Sandwich, Dover, and Romney, are mentioned in Domesday Book. William I. erected the district of the Cinque Ports into a kind of palatine jurisdiction under a warden, in whom the military, naval, and civil authority was combined. Richard I. admitted Rye and Winchelsea to the privileges of the Cinque Ports, by a charter dated March 27, 1191. The number was thus increased to seven principal ports, whilst smaller places were attached to them as subordinate ports. They were required to furnish a fleet for the defence of the sea, and according to an ordinance of Henry III. in 1229, in the following proportions:—Dover and Hastings each 21 ships, carrying 21 men and one boy; Winchelsea, 10 ships; and Hythe, Sandwich, and Rye, 5 each. These vessels were to serve 15 days at the expense of the towns, but were paid for any service beyond that time. The Cinque Ports received their charter of confirmation from Edward I., in 1278, and all their liberties and free customs were secured to them by 25 Edw. I. c. 9 (1297). The jurisdiction of the constable of Dover Castle was defined by 28 Edw. I. c. 7 (1300).

CINTRA (Convention).—The day after the battle of Vimiera, General Kellermann proposed an armistice, which was signed at Cintra August 22, 1808. The convention, erroneously called the convention of Cintra, was finally concluded at Lisbon, Aug. 30, and consisted of twenty articles, to which three additional articles were appended. The French by this convention agreed to evacuate Portugal. Their soldiers were allowed to disembark with arms and baggage, and were not to be considered prisoners of war, the English government furnishing the necessary transports to convey them to their own country. They were, however, compelled to relinquish all their spoils. This agreement excited so much discontent in England, that a board of in inquiry was summoned by a warrant dated Nov. 1, 1808. In the report issued Dec. 22, the Board declared that no further military proceeding was necessary on the subject, and on the 25th of December a majority of the Board voted approval of the armistice of Aug. 22, and of the convention of the 30th.

CIPHER.—The Spartan *Scytale* was in use at least as early as 400 B.C., and is supposed by some authors to be the earliest attempt at writing in cipher. Aeneas Tacticus, who was contemporary with Aristotle, and flourished about 350 B.C., was one of the most eminent ancient masters of the art of writing in secret characters, having collected about twenty different modes, all which were unintelligible, except to those who knew the key. The first modern author who described this art was the Abbé Trithemius, whose "Polygraphia" appeared A.D. 1499; since which period many writers have directed attention to the subject.

CIRCASSIA (Asia) was conquered by the Huns in the 5th century, by the Chhazars in the 11th century, and at the commencement of the 13th century fell under the Mongol

emperor of Kaptchak. Timour invaded it in the 14th century, but was unable to effect a permanent conquest. Its first intercourse with Russia took place in 1555. It afterwards submitted to the khans of the Crimea, but, owing to their tyranny, the Circassians revolted in 1708, and applied for protection to the Ottoman Porte. At the peace of Belgrade in 1739, Circassia was declared independent, but it soon returned to its dependence on Turkey, which did not renounce all right to exercise authority over it till the peace of Koutchouk-Kainardji, in 1774. In 1783 Circassia was claimed as part of the Russian empire, but it was not finally incorporated therewith till the treaty of Hadrianople, in 1830. The Circassians strenuously resisted Russian domination under their leader Schamyl, who was captured Sept. 7, 1859.

CIRCLES OF GERMANY.—Maximilian I. in 1501 carried into execution the design of Wenceslaus, attempted by Albert II., of dividing Germany into circles. The empire, the electorates and the dominions of Austria excepted, was divided into six circles; viz., Bavaria, Franconia, the Rhine, Saxony, Swabia, and Westphalia. In 1512 four more were added; viz., those of Austria, Burgundy, the Lower Rhine, including the three ecclesiastical electors and the elector Palatine, and Upper Saxony, including the electorates of Saxony and Brandenburg. "It was," says Hallam, "the business of the police of the circles to enforce the execution of sentences pronounced by the Imperial Chamber against refractory states of the empire." The circles were abolished by the Confederation of the Rhine, concluded at Paris, July 12, 1806, and each German prince resumed such of his titles as referred to his connection with the German empire, Aug. 1.

CIRCUITS.—In a great council held at Northampton Jan. 26, 1176, Henry II. divided England into six districts, to each of which he appointed three itinerant judges, who were to make their circuit round the kingdom once in seven years, for the purpose of trying causes. Various changes in the number of the circuits, &c., were afterwards made. England and Wales are now divided into eight circuits, to which the judges go twice a year.

CIRCULATING LIBRARY.—Jerome relates that Pamphilus, presbyter of Cæsarea, who died A.D. 309, collected 30,000 religious books, for the purpose of lending them; and this is the first notice of a circulating library. In 1342 the stationers of Paris were compelled to keep books to be lent on hire. This was intended for the benefit of poor students, before printing had been invented. Merryweather (Bibliomania in the Middle Ages) remarks: "The reader will be surprised at the idea of a circulating library in the Middle Ages; but there can be no doubt of the fact that they were established at Paris, Toulouse, Vienna, and other places." Catalogues, with the charge for reading, were exhibited in their shops. A circulating library was established at Edinburgh in 1725, and in London in 1740.

There were, however, only four in the metropolis in 1770; but since that period the number has rapidly increased.

CIRCUMCISION.—The practice of this rite amongst the Hebrews was instituted by Abraham in accordance with the divine command, B.C. 1897 (Genesis, xvii. 10—14). It existed amongst other nations previous to that time. Rawlinson considers that it was practised by the Egyptians long before the birth of Abraham, or B.C. 1996. The custom prevailed amongst many nations, and has been found to exist in the islands of the Pacific.

CIRCUMNAVIGATION OF THE GLOBE.—The first ship by which the circumnavigation of the world was accomplished was the *Vittoria*, forming one of the expedition that sailed from San Lucar under Ferdinand Magellans, or Magellan, a Portuguese commander, Sept. 20, 1519. With three out of the five ships that formed the expedition, he passed through the straits which bear his name, connecting the Atlantic and Pacific oceans, Nov. 28, 1520. Magellan was killed in an encounter on the Philippine Islands in 1521. Sebastian del Cano, in the *Vittoria*, the only ship which returned to Europe, sailed round the Cape of Good Hope, and arrived at San Lucar Sept. 6, 1522, having achieved for the first time the circumnavigation of the globe. The following are the most celebrated expeditions:—

Caius Flaminius, who was defeated by Hannibal at Thrasymentum, B.C. 217.

CIRCUS FACTIONS.—The race, at its first institution, was a contest between two chariots, distinguished by *white* and *red* colours. To these *green* and *blue* were afterwards added; the four colours, according to some authorities, being intended to represent the four seasons. So excited did the people become in these contests, that the supporters of the different candidates degenerated into factions, and frequently provoked tumults that ended in sanguinary conflicts. Even princes shared in this folly, and Gibbon (ch. xl.) relates that Caligula, Nero, Vitellius, Verus, Commodus, Caracalla, and Eliagabalus, were enrolled in the blue or green factions of the circus. The system, with its abuses, was transferred to Constantinople, in which two factions, the greens and the blues, contended for supremacy. Justinian I. favoured the former, and during the celebration of the festival of the Ides of January, in the fifth year of his reign, A.D. 532, a quarrel arose between them. For five days the city was in their power, and the cathedral of St. Sophia, the baths of Zeuxippus, part of the palace, and many edifices, were destroyed by fire. Their watchword was *Nika*, "Vanquish," by which name the contest is sometimes designated. The outbreak was suppressed by Belisarius, when a terrible slaughter ensued, and though

* Only part of Dampier's expedition returned in 1706, the remainder, with the commander, being detained in the East Indies, as prisoners, by the Dutch.

† Cook was killed by the Sandwich Islanders, Feb. 14, 1779. He was succeeded in the command by Captain King.

CIRCUS, called by the Greeks Hippodrome, was devoted by the Romans to horse and chariot races. The most celebrated and the earliest was the Circus Maximus, said to have been built by Tarquinius Priscus, B.C. 605. There were several of these buildings in Rome. The Circus Flaminius was erected B.C. 220. The founder is supposed to be

the circus was closed for several years, the fury of the factions again burst forth at its restoration.

CIRENCESTER (Gloucestershire).—This ancient city was a station of the Romans, which they called Corinium. A fine mosaic pavement was found here in 1723, and many antiquities have been from time to time discovered. The

Danes captured it A.D. 878, and Guthrum wintered here in 879. Canute held a council at Cirencester in 1020. Henry I. founded its abbey in 1117. The inhabitants assailed and expelled the earls of Huntingdon, Kent, and Salisbury, who had formed a plot to restore Richard II., Jan. 6, 1400, and were rewarded for this service by Henry IV. Prince Rupert captured the town in Feb. 1643, but it surrendered to the parliamentary army during the same year. The Grammar School was founded in 1750, and the Agricultural College in 1846.

CIRRHÆA (Greece).—This town of Phocis, the seaport of Delphi and Crissa, with the latter of which it is often confounded, was of ancient origin. Its inhabitants levied exorbitant tolls on pilgrims passing through on their way to the temple of Delphi, and committed other outrages, on which account the Amphictyonic council declared war against them B.C. 595. This, the first sacred war, was carried on by a joint force of Athenians, Sicyonians, and Thessalians, and after a long siege Cirrha was taken and razed to the ground, B.C. 586. The assailants are said to have poisoned the spring which supplied the town with water. All the males were put to the sword, the women and children sold to slavery, and the Pythian Games were founded with the spoils. Crissa, said to have been the seat of a colony of Cretans, is mentioned by Homer. It had fallen into insignificance before the Sacred War.

CISALPINE REPUBLIC was formed by the union of the Cispadane and Transpadane republics, by Napoleon Bonaparte in 1797. By the 8th article of the treaty of Campo-Formio, Oct. 17, 1797, the emperor of Germany recognized this new state, which was therein stated to comprehend "Austrian Lombardy, the Bergamasque, the Bressau, the Cremasque, the city and fortress of Mantua, Peschiera, part of the Venetian states, the Modenois, the principality of Massa and Carara, and the three legations of Bologna, Ferrara, and Romagna." By a decree dated Oct. 10, 1797, Napoleon annexed the Valtelline to this republic. Constitutions were made and abrogated in rapid succession, and the interference of Napoleon became intolerable. Treaties of alliance and commerce were concluded between France and this republic in 1798, by which the last vestige of independence was destroyed. Austria refused to recognize its envoy, sent to Vienna in 1798, and its fortunes declined, owing to the reverses sustained by the French. It was, however, once more recognized by the emperor of Austria by the treaty of Lunéville, Feb. 9, 1801; its independence was guaranteed, and some alterations were made in its limits, and it received an addition in the duchy of Modena. Other changes were made in 1802, and on the 26th of January Napoleon nominated himself president, and changed its name to that of the Italian Republic. It was merged in Napoleon's Italian kingdom in 1805.

CISPADANE REPUBLIC.—In 1796 Napoleon

conceived the design of forming two republics from the Italian territories wrested from Austria and other Italian states. They were called the Cispadane and Transpadane republics, and were both merged in 1797 in the Cisalpine Republic (*q. v.*).

CISTERCIANS.—This religious order was founded A.D. 1098, by Robert, abbot of Molesme, in Burgundy, and received its name from Cîteaux, in which forest, near Dijon, the first convent was situated. They increased rapidly, although their rules were extremely severe, and became engaged in a quarrel with the Cluniacs or Cluniacensians, who accused the Cistercians of too great austerity, whilst the Cistercians taxed them with having abandoned their regular discipline. The Cistercians followed the rule of St. Benedict, and having been reformed early in the 12th century by Bernard, abbot of Clairvaux, were afterwards called Bernardines. There were nuns of this order. (*See* BERNARDINES.)

CITATE (Battle).—The Russian troops occupied a strong position at this village on the Danube in the winter of 1853-4. Several skirmishes between the Cossacks and the Turkish cavalry took place near Citate towards the end of December and the beginning of January. The Turks assailed the lines at Citate Jan. 6, and, after a desperate combat, expelled the Russians.

CITY.—In Kerr's "Blackstone" a city is described as "a town incorporated, which is or hath been the see of a bishop: and though the bishopric be dissolved, as at Westminster, yet still it remains a city." The term is, however, applied to many large towns that have not enjoyed this distinction. Alfonso V. granted a charter to Leon A.D. 1020, and Berenger, count of Barcelona, in 1025, confirmed to the inhabitants of that city all the franchises they already possessed. Charters as old as 1110, though the precise date has not been ascertained, granted to French cities, are in existence. Lord Lyttleton states that in England many cities and towns were bodies corporate and communities long before the alteration introduced into France by Louis le Gros.

CIUDAD RODRIGO (Spain).—This strongly-fortified town has sustained several memorable sieges. Henry II. of Castile failed in an attempt to wrest it from the Portuguese in 1370. Lord Galway captured it May 26 (O.S.), 1706. The French invested it June 1, 1810, and their breaching batteries commenced fire June 25. The Spanish garrison, after a gallant defence, surrendered July 11. Wellington invested it Jan. 8, 1812, and carried it by storm Jan. 19.

CIVIL LAW. (*See* ROMAN LAW.)

CIVIL LIST.—All the expenses of the English government, including military charges, were formerly comprehended in one list, and defrayed out of the royal revenue. At the Restoration in 1660, a division took place between the military expenses and those incurred for ordinary purposes. The revenues employed for the last-mentioned were termed the hereditary or civil-list revenues. The

civil-list revenues averaged, during the reigns of William III. and of Queen Anne, £680,000 per annum. They were raised to £700,000 under George I.; to £800,000 under George II.; and in 1812 had reached the sum of £1,080,000. By the settlement of the civil list, made by 1 Will. IV. c. 25 (April 22, 1831), a net yearly revenue of £510,000 was allotted to the king. Queen Victoria surrendered the hereditary revenues of the crown by 1 Vict. c. 2 (Dec. 23, 1837), receiving a clear yearly sum of £385,000 for the support of the royal household, and of the honour and dignity of the crown. The following is the distribution of the money according to the act :—

1. For her Majesty's privy purse	60,000
2. Salaries of her Majesty's household, and retired allowances	131,260
3. Expenses of her Majesty's household	172,500
4. Royal bounty, alms, and special services	13,200
5. Pensions to the extent of £1,200 per annum	
6. Unappropriated moneys	8,040
Total	£385,000

CIVIL SERVICE.—This term is applied to the large body of men by whose labours the executive business of the country is carried on. In its widest sense the civil service has been said to consist of above 50,000 persons. There are about 17,000 civil servants, exclusive of 17,000 inferior revenue officers, postmen, &c., 15,000 artificers and labourers in the government dockyards, and 4,000 office-keepers and messengers. By an order in council, May 21, 1855, a civil service commission was appointed to examine candidates for this service.

CIVIL SERVICE ESTIMATES.—The general expenditure of the state, exclusive of the sums required for the army and navy. For the financial year ending in March, 1861, these estimates were :—

Public works and buildings	£622,000
Salaries and expense of public departments	1,414,000
Law and justice	2,565,000
Education, science, and art	1,306,000
Colonial and consular services	484,000
Superannuation and retired allowances and gratuities	254,000
Miscellaneous and special	723,000
Total	£7,368,000

CIVITA CASTELLANA (Battle).—Macdonald defeated the Neapolitans at this town, in Central Italy, Dec. 4, 1798.

CIVITA VECCHIA (Italy), or OLD TOWN, is built on the site of the Centumcellæ of the Romans. Trajan constructed the port A.D. 103. It was captured by Belisarius in 539; taken by Totila in 544, and recaptured by Narses in 552. The Saracens destroyed Centumcellæ in 812, and the remnant of the inhabitants formed a settlement in the interior; from which circumstance the town was called Civita Vecchia, or Old Town. Clement XII. made it a free port. An Eng-

lish fleet appeared off Civita Vecchia in 1708, and threatened to destroy it on account of the assistance rendered to the cause of the Pretender by Clement XI., and another threat of the same kind was made in 1743. It capitulated to an English squadron Sept. 30, 1799. Captain Louis, of the *Minotaur*, rowed up the Tiber in his barge, hoisted the English colours in the Eternal City, and was made provisional governor of Rome. The French expedition to Rome landed here May 25, 1849.

CLANS.—Chalmers (Caledonia, vol. i. b. iv. c. 7) has the following observations respecting the Scottish clans:—"During Gaelic times, there existed, in every part of North Britain, clanship, from blood. Throughout the whole Scotch-Saxon period, as we have seen, there existed, from conquest and birth, universal villeynage, which disappeared during the 15th century. Amidst the anarchy of subsequent times, there arose various clans, which were divided, in the policy of those ages, into the clans of *the borders* and the clans of *the highlands*. From this state of society, and the want of employment, we may account for the facility with which great bodies of men could then be brought into action. In 1587, the chiefs of all those clans were obliged to give sureties for their quiet conduct, and were made answerable for their wrongs. The union of the two crowns dissolved the clans, and established the quiet of the borders: several of the other clans remained to our own times, often disturbing domestic tranquillity, and sometimes defying the mandates of law." The following list of the clans is given at the end of the statutes of the 11th parliament of James VI. (July 29, 1587):—

MIDDLE MARCH.

Ellottes.	Nicksonnes.
Arme-stranges.	Crosers.

WEST MARCH.

Scottes of Eusdail.	Carruthers.
Beatissonnes.	Grahames.
Littles.	Johnstones.
Thomsonnes.	Jardanes.
Glendunninges.	Moffettes.
Irvinges.	Latimers.
Belles.	

HIE-LANDS AND ILES.

Buchannannes.
Mak-farlanes of the Arroquhair.
Mak-knabbes.
Grahames of Monteith.
Stewartes of Balquhider
Clan-Gregoire.
Clan-Lauren.
Campbells of Lochinel.
Campbells of Innerraw.
Clan-Dowall of Lorne.
Stewartes of Lorne, or of Appin.
Clan-Mackeanne Awricht.
Stewartes of Athoill and partes adjacent.
Clanne-Donoquhy in Athoill and partes adjacent.
Meinzie in Athoill and Apnadull.
Clan-Mak-Thomas in Glensche.
Fergussonnes.
Spaldinges.
Makintosches in Athoill.

Clan-Chamron.
 Clan-Rannald in Loch-Aber.
 Clan-Rannald of Knoydart, Moydart, and Glen-garrey.
 Clan-Lewid of the Lewis.
 Clan-Lewid of the Harriach.
 Clan-Neill.
 Clan-Kinnon.
 Clan-Jeane.
 Clan-Chattane.
 Grants.
 Frasers.
 Clan-Keinzie.
 Clan-Avercis.
 Munroes.
 Murrays in Southerland.

The act for abolishing heritable jurisdictions in Scotland (20 Geo. II. c. 43, 1747), put an end to the legal authority of the chiefs of clans.

CLARE HALL (Cambridge).—University Hall, founded A.D. 1326, having been destroyed by fire in 1342, was rebuilt and endowed in 1347 by Elizabeth de Burgh, one of the sisters and coheirs of Gilbert, earl of Clare. From this benefactress it received its new name. The present hall was built in 1638. The old chapel, built in 1535, was never consecrated. The new chapel was commenced in 1763 and consecrated in 1769.

CLAREMONT (Surrey) was built by Vanbrugh in the reign of Queen Anne, and named after the earl of Clare, who became duke of Newcastle in 1715. It was sold in 1769 to Lord Clive, by whom the house was rebuilt and the grounds newly arranged. On the death of Clive, in 1774, the house and estate passed into the hands of Lord Galway, and subsequently of the earl of Tyrconnel, who sold them to Mr. Ellis in 1807. By 26 Geo. III. c. 25 (1816), the property was purchased by government as a residence for the Princess Charlotte, who died here Nov. 6, 1817. Louis Philippe, king of the French, lived at Claremont on his retirement to England, March 4, 1848; and here he died, Aug. 26, 1850.

CLARENCIEUX (King-at-Arms).—This name was given to a herald of the duke of Clarence during the reign of Edward III. (1327—1377), and was confirmed by Edward IV., at whose funeral in 1483 Clarenceux king-at-arms was present.

CLARENDON CONSTITUTIONS.—A council was held at Clarendon, near Salisbury, Jan. 25, 1164, when these laws, defining the limits between the civil and ecclesiastical jurisdiction, and regulating certain church matters, were passed. Thomas Becket, archbishop of Canterbury, having refused to sign them, withdrew from the kingdom in disguise, and landed at Gravelines Nov. 3. He excommunicated many of the bishops, clergy, and influential laymen, who had subscribed to them, June 12, 1166; whereupon Henry II. banished 400 of the archbishop's supporters. The king and archbishop met at Fretville, in Touraine, July 22, 1170, and were reconciled. Soon after his return to Canterbury, Dec. 3, he excommunicated several nobles, and was assassinated before the altar of St. Benedict, in the cathedral, Dec. 29, 1170. These constitutions, most of which were annulled by

the pope, are given in Roger of Wendover's "Flowers of History," Lord Lyttleton's "Life of Henry the Second," and other works.

CLARENDON-DALLAS TREATY, intended to clear up difficulties that had arisen between England and the United States, respecting the interpretation of the Bulwer-Clayton Treaty of April 19, 1850, was signed in London Oct. 17, 1856. It was altered in the United States, and signed in the new form March 12, 1857. To one of the amendments the British government objected, and the treaty was never ratified.

CLARENDON PRESS (Oxford).—The design of establishing a press for the use of Oxford university was formed in 1672, at which time the business was carried on at the Sheldonian Theatre. Owing to the profits arising from the sale of Lord Clarendon's "History of the Rebellion," the university was enabled, in 1711, to erect a special building for the purpose, after the designs of Vanbrugh. In 1721 the statue of Lord Clarendon was placed over the south entrance. The present university printing-office was commenced by Robertson in 1825, and completed by Blore in 1830, when the business was transferred thither from the Clarendon, which was converted into a museum, lecture-hall, &c. In Feb. 1838, the new building was damaged by fire to the amount of £2,000.

CLARE, St. (Order), or CLARISSES.—This religious order was founded by St. Clare, with the aid of St. Francis of Assisi, A.D. 1212. The order was confirmed by a bull of Innocent IV. At first the nuns followed the rule of St. Benedict; this was, however, modified by St. Francis in 1224, and by Urban IV. in 1264. They were brought into England in 1293, under a license from Edward I., but they had only four houses in this country. They were called Poor Clares.

CLASTIDIUM (Battle).—Marcellus defeated the Gauls at this place, in Cisalpine Gaul, B.C. 222, whereupon they sued for peace. The modern town of Casteggio occupies its site.

CLAUSENBERG (Transylvania), the capital of Transylvania, was founded A.D. 1178. The cathedral was founded in 1399, and the citadel erected in 1721.

CLAVICHORD, or CLARICHORD.—This musical instrument is mentioned by Ottomar Luscinius in 1536; but its invention is no doubt to be referred to a considerably earlier date. It was much used by nuns in convents.

CLAVIJO (Battle).—Ramiro defeated the Moors at Clavijo A.D. 844. No less than 60,000 of them are said to have perished in the conflict and the retreat.

CLEMENTINES.—These spurious writings, amongst which are two epistles to the Corinthians, represented as the works of Clement, bishop of Rome in the 1st century, are supposed to have been concocted by one of the sect of the Ebionites. This father of the Church is generally believed to be the Clement mentioned by St. Paul (Phil. iv. 3).

He died A.D. 100. Some apostolic canons, constitutions, recognitions, &c., are included in the Clementines.—The constitutions of Pope Clement V. (1305—1314) are also called Clementines.

CLEMENTINES AND URBANISTS.—Gregory XI. returned to Rome, after a long residence at Avignon, in April, 1377, and thus terminated what is called the Babylonish Captivity of the popedom. He died March 27 or 28, 1378. An outcry was immediately raised for the election of an Italian pope, and Bartholomew Prignani, archbishop of Bari, was chosen, April 9. He took the title of Urban VI. The French cardinals at Avignon declared the election void, August 9, and elected Robert of Geneva pope, who took the title of Clement VII., Sept. 16. Such was the commencement of the schism by which the Latin Church was agitated and divided for thirty-eight years. Each pope had his followers, and these were known by the names of Clementines and Urbanists.

CLEMENT'S INN.—This inn of Chancery is said by Dugdale, on the authority of an ancient record, to have been in existence long before 1479. The hall was built in 1715.

CLEOBURY (Battle).—Leofgar, bishop of Hereford, having led an army against the Welsh king Griffith, was defeated and slain at this place, in Herefordshire, June 17, 1056 A.D. Several of his priests who had accompanied him to the field of battle fell at his side. The chroniclers do not agree respecting the name of the place at which the battle was fought. Roger of Hoveden says Glastonbury.

CLEPSYDRA, OR WATER-CLOCK.—The Chaldeans and the Egyptians are said to have made use of some ingenious invention of this kind in order to measure time. Vitruvius ascribes the invention to Ctesibius of Alexandria, who lived about B.C. 245. P. C. Scipio Nasica introduced them at Rome B.C. 157. There can be no doubt that they were used by the Greeks at an early period. They were known in India in the 12th century. Modern water-clocks were invented during the 17th century. They were introduced from Burgundy into Paris in 1693.

CLERGY.—Bingham (Antiq. h. i. ch. v. s. 8) says: "As to the reason of the name *clerici* and *clerus*, St. Jerom rightly observes, that it comes from the Greek *κληρος*, which signifies a lot; and thence he says, 'God's ministers were called *clerici*, either because they are the lot and portion of the Lord, or because the Lord is their lot, that is, their inheritance.' Others think some regard was had to the ancient custom of choosing persons into sacred offices by lot, both among Jews and Gentiles; which is not improbable, though that custom never generally prevailed among Christians." The distinction between the clergy and the laity commenced at the foundation of the Christian church. The name clergy was at first given to the bishops, priests, and deacons, the only orders in the Church. In the 3rd century sub-deacons,

acolythists, readers, and other inferior orders, were appointed; and these were also styled clerici. The clergy were afterwards divided into the regular and secular, the former living under some religious rule, such as abbots and monks, and the latter mingling with the people and having the care of souls, as bishops and priests. The term the clergy is now applied in England to all persons in holy orders belonging to the established church. A clergyman is exempted from serving on a jury, or as a bailiff, reeve, constable, &c. A clergyman is incapable of sitting in the House of Commons, or of being a councillor or alderman in a borough. He is free from arrest in a civil suit whilst engaged in divine service, or whilst going to or coming from the performance of this duty (9 Geo. IV. c. 31, s. 23, June 19, 1828). The mode of proceeding against the clergy for ecclesiastical offences is regulated by the Church Discipline Act, 3 & 4 Vict. c. 86 (Aug. 7, 1840). At one time the clergy engrossed every branch of learning, and were remarkable for their proficiency in the study of the common law. The judges were selected from their ranks, and from the lower clergy the inferior offices were supplied. Hence the term clerk.

CLERGY (Sons of).—The festival of the Sons of the Clergy, celebrated every year at St. Paul's Cathedral, was instituted A.D. 1658. The society's charter of incorporation is dated July 1, 1678. It is not known whether the annual sermon was instituted at the origin of the feast. It has, however, been preached regularly since 1697.

CLERK. (See CLERGY.)

CLERKENWELL is called by Stow "Clarkes-Well, or Clarken-Well." The same writer adds, the well "took name of the parish clarks in London, who (of old time) were accustomed there yearly to assemble, and to play some large history of Holy Scripture. For example of later time, to wit in the year 1390, the 14th of Richard the Second, I read, that the parish clarks of London, on the 18th of July, plaid interludes at Skinners' Well, near unto Clarks'-Well, which play continued three days together, the king, queen, and nobles being present." Dugdale records the foundation of a nunnery here about 1100, and the erection of the priory of St. John of Jerusalem about 1110. In Fitz-Stephen's "Description of the most noble City of London" (1190), Clerkenwell is named as one of the spots where "the scholars, and youth of the city, do take the air abroad in the summer evenings." In 1563 the locality was still unoccupied, except by the monasteries and St. John's Street and Cow Cross; but the number of houses was much increased before 1598. The Bridewell was erected in 1615; Sadler's Wells Theatre was built as a music-house in 1683; the Workhouse was erected in 1790; the Middlesex House of Correction in 1794; and the New Prison, or House of Detention, was built on the site of the Bridewell in 1818, and rebuilt in 1844.

CLERMONT FERRAND (France), the
221

ancient Augustonemetum, was sacked by the Vandals A.D. 408, and by an army under Honorius in 412. Thierry captured it in 507, and it became the capital of Auvergne. It was frequently besieged. The Normans took it in 853 and in 916, committing great ravages on each occasion. It was the seat of the bishopric of Auvergne, founded about 250; but since 1160, the occupants of the see have taken the title of bishops of Clermont. Parts of the church of Notre Dame du Port were built in 863, and the cathedral was founded in 1248. In the Middle Ages, Clermont, called *Clarus Mons*, or *Claromontanum*, was the scene of two celebrated councils. The first, which led to the first crusade, was summoned by Urban II., and lasted from the 18th to the 28th of Nov. 1095; and the second was held in 1130.

CLEVES (Germany).—This district was ruled by counts from the 9th century until 1439, when Thierry VIII. was made duke by the emperor Sigismund. It passed into the possession of the house of Brandenburg in 1609; the French seized it in 1794, united part of it to Berg in 1806; but it was restored to Prussia in 1815. (*See* BERG.) The town of Cleves is pleasantly situated about two miles from the Rhine. The cathedral was built in 1346, and the castle, built in 1439, was the birthplace of Anne of Cleves, married to Henry VIII. Jan. 6, 1540. The marriage was abrogated by act of parliament July 24, in the same year.

CLIFFORD'S INN received its name from the De Clifford family, who granted it to students-at-law in the reign of Edward III., about the year 1344, when it was made an inn of Chancery.

CLIFTON MOOR (Battle).—During the retreat of the Pretender, Charles Edward, from England, the English were repulsed in an attack upon the Scottish rear-guard, at Clifton Moor, Dec. 18, 1745. The former lost one hundred men in killed and wounded, and the latter only twelve.

CLISSAU (Battle).—Charles XII. of Sweden having invaded Poland, gained a complete victory over Augustus, king of Poland, on this plain, between Warsaw and Cracow, July 20, 1702. Charles XII. in pursuit of the king of Poland, fell from his horse and broke his collar-bone.

CLOACA MAXIMA. (*See* SEWERS.)

CLOCK.—Sun-dials and clepsydre, or water-clocks, preceded clocks moved by wheels and weights. Beckmann assigns the invention of the last-mentioned to the 11th century. The first public clock was erected at Padua. Others were put up at Westminster in 1288; at Canterbury in 1292; at Dover in 1348 (the oldest extant); at Bologna in 1356; and at Paris in 1364. Their general introduction into England may be referred to 1368, in which year Edward III. invited three Dutch clock-makers from Delft to settle in the country. The Strasburg clock was erected about 1370. The duke of Burgundy took away the clock at Courtray, and removed it to Dijon in 1352. A public clock was set up at Spire

in 1395; and another at Nuremberg in 1462. Balance clocks were used by Walther for astronomical observations as early as 1484. A clock was erected at Venice in 1497. Portable clocks are supposed to have been invented about 1525, in order to be used at sea in computing the longitude. The first English clock that measured time with accuracy is said to have been that at Hampton Court, which bears date 1540. Charles I. incorporated the company of Clockmakers Aug. 22, 1632. The invention of pendulum clocks is claimed for three persons,—Richard Harris in 1641; Vincenzo Galileo, who is said to have rendered his father's discovery of practical utility in 1649; and Huygens in 1657. Repeating clocks were first constructed by Barlow in 1676; the anchor escapement by Clement in 1680; and equation clocks, whose inventor is unknown, some time previous to 1699. Jewelled pallets and pivot-holes were introduced by De Baufre about 1704, and the compensation pendulum by Graham and Harrison in 1715. The electric clock was first exhibited to the Royal Society by Professor Wheatstone in 1840, and was much improved by Messrs. Bain, Appold, and Shepherd, the last of whom supplied the clock at the Exhibition of 1851. Clocks were formerly subject to a duty of 25 per cent., which was reduced to 10 per cent. in 1842, and still further diminished in 1853.

CLOGHER (Ireland) was erected into a bishopric A.D. 493 by St. Macartin, who founded a monastery, and died in 506. The cathedral was rebuilt in 1041 and again in 1295. The first Protestant bishop of Clogher was Miller Magrath, whom Queen Elizabeth appointed Sept. 10, 1570. Charles I. erected this town into a borough, and it returned two members to the Irish parliament till its disfranchisement at the Union. On the death of the Right Hon. Lord R. P. Tottenham, bishop of Clogher, April 28, 1850, the see was united to Armagh by the Church Temporalities Act.

CLONFERT (Ireland).—St. Brendan founded a monastery here A.D. 558, and became the first bishop of the diocese. In 1601 the see was united to Kilmacduagh, and in 1834 to the sees of Killaloe and Kilfenora.

CLONMEL (Ireland) was incorporated at a very early period, but did not receive its charter till 1608. The manufacture of woollen goods, introduced in 1667, declined at the Revolution. The trial of Smith O'Brien for high treason commenced here Sept. 28, and terminated Oct. 9, 1848.

CLONTARF (Battle).—Brian Boru, king of Ireland, with a force of 20,000 men, defeated 21,000 Danes, under King Sitric, on the plains of Clontarf, near Dublin, on Good Friday, April 23, 1014. 7,000 Irish, including Brian and his son Murrogh, fell in the action. The Danish loss amounted to 13,000.

CLOSETINGS.—The name given to the private conferences to which James II. in 1687 and 1688 summoned members of parliament

and various public functionaries, for the purpose of winning them over to his plan for the re-establishment of the Roman Catholic religion and other arbitrary measures.

CLOSH, or CLOSSYNGE.—An old game of ninepins, prohibited by 17 Edw. IV. c. 3 (1477-8). The penalty for a person allowing this and several other games to be played in his house, was three years' imprisonment and a fine of £20, the players to be imprisoned two years and to forfeit £10. By 33 Hen. VIII. c. 9 (1541-2), any person keeping a house or place for the practice of this and other games mentioned in the statute, was to forfeit £2 per diem, and those using or haunting the place, 6s. 8d. for every offence.

CLOSTER-SEVEN (Convention).—The duke of Cumberland, at the head of 38,000 Hanoverians, Hessians, and other Germans, being hardly pressed by the French army, at the intervention of the count de Lynar, the Danish ambassador at Hamburg, signed this convention Sept. 8, 1757. It consisted of five articles, to which three separate articles were annexed. The troops laid down their arms and were dispersed. George II., as elector of Hanover, disavowed the authority of his son, the duke of Cumberland, to sign it, and the latter resigned all his commands. It led to innumerable difficulties and disputes.

CLOTH.—The manufacture of woollen cloth was practised in Tyre B.C. 588, but its invention may no doubt be referred to a still earlier period. Plaids were made in England about A.D. 500. In 960 the business became considerable in Flanders; whence it was introduced into England in 1111. The first exportation of British cloth occurred in 1189, in which year the manufacture appears to have spread widely in England. Broad-cloth was made in 1197. In 1261 all Englishmen were commanded to wear British cloth; but, after the arrival of the Flemish weavers, in 1331, an exception was made in favour of their goods. The manufacture had obtained a firm footing in Yorkshire before 1461, and on the passing of the act to confine the manufacture to towns, and limit the number of looms allowed to each weaver (2 & 3 Phil. & Mary, c. 11, ss. 9 & 10), in 1555, this county was exempted from all restrictions. Medley cloths were invented in 1614. In 1643 cloths were fully finished in England, although some kinds were still sent to Holland to be dyed. The art was, however, completely introduced in 1667. In 1698 both houses of parliament petitioned William III. to diminish the Irish manufacture of woollen cloth and substitute that of linen in its stead; and measures were afterwards taken with this view. The Clothworkers' Company was incorporated April 28, 1482, and confirmed by Henry VIII. in 1528. It was re-incorporated and named Clothworkers by Elizabeth, whose charter was confirmed by Charles I. in 1634.

CLOUD, St. (France).—The name is said to be derived from St. Clodoald, a son of Clodo-

mir, who became a monk and founded a monastery at this place, about five miles from Paris, A.D. 551. The palace was built in 1572 by Jerome de Gondy, a rich financier. Henry III. was assassinated here in 1589. Louis XIV. purchased it in 1658, and presented it to the duke of Orleans, and it remained the seat of that family until 1782, when Louis XVI. purchased it for Marie Antoinette. The council of the Ancients and that of the Five Hundred assembled at St. Cloud. The capitulation of Paris was signed at this palace in 1815. The palace and the park have been embellished and improved by successive sovereigns of France.

CLOVESHOOT (Kent).—A celebrated council was held at this place, Cliff, near Rochester, in Sept. 747 A.D. Twelve English prelates assembled, with the nobility and clergy, under the sanction of Ethelbald, king of the Mercians. Thirty canons were passed, relating to the government and discipline of the Church. Councils were held here in 800; Oct. 12, 803; in 822; and in Aug. 824.

CLOYNE (Ireland) was erected into a bishopric by St. Colman, who died Nov. 24, 604. In 1431 the see was united to Cork, but was separated in 1638. The celebrated Dr. Berkeley was bishop of Cloyne from 1733 to 1753. On the death of Bishop Brinkley, in 1835, this see was permanently united to those of Cork and Ross, by 3 & 4 Will. IV. c. 37 (Aug. 14, 1833).

CLUB (the Literary).—Dr. Johnson and Sir Joshua Reynolds formed a small circle of friends, which was called "The Club." It was founded in 1764, and the original members were nine in number, Edmund Burke and Oliver Goldsmith being included in the list. They first met at supper, but in 1772 they resolved to dine together once every fortnight during the session of parliament. The first meeting recorded in their books took place at the "Turk's Head," Gerard Street, April 7, 1775. At Garrick's funeral, in 1779, it took the title of the Literary Club.

CLUBMEN.—During the Great Rebellion, bands of armed men, bearing this title, opposed the military oppression to which they were subjected by both armies. In 1645 they petitioned Prince Rupert against their grievances, but, not receiving the satisfaction they required, they harassed the royalist forces, and, in the words of Clarendon, "did him (General Goring) more mischief than all the power of the rebels."

CLUBS.—Dr. Johnson defined a club to be "an assembly of good fellows, meeting under certain conditions." A club of this kind, under the name of "La Court de bone Compagnie," was established during the reign of Henry IV. Occleve was one of its members; and Chaucer is supposed to have belonged to it. Sir Walter Raleigh established the celebrated club at the Mermaid, in Friday Street, about the beginning of the 17th century. This was the scene of the

wit-combats between Shakespeare and Ben Jonson, described by Beaumont:—

“What things have we seen
Done at the Mermaid! heard words that have
been
So nimble and so full of subtle flame,
As if that every one from whom they came
Had meant to put his whole wit in a jest.”

Ben Jonson founded another club in Fleet Street. The Civil Club was established in 1669. These, however, were social clubs, and the political club did not come into existence until a later period. Lord Stanhope, in commenting upon the formation of the Rockingham administration in 1765, says, “It was at this period and under such a condition of parties that rival clubs for politics were formed, and rose into great vogue and importance. Under Lord Bute the Ministerial Club, as it was at first termed, used to meet at the Cocoa Tree Tavern, from which it soon derived its name.” Gibbon describes it in his journal for Nov. 1762. The principal London clubs are:—

	Established.	House Built.
	A.D.	A.D.
Alfred	1808	.. 1848
Army and Navy 1848
Arthur's	before 1756	.. 1829
Athenaeum	1823	.. 1848
Boodle's	before 1772	.. 1848
Brooks's	1764	.. 1848
Carlton 1848
City of London 1848
Cocoa-tree	before 1711	.. 1848
Conservative 1848

Travellers'	1814	.. 1848
Union 1848
United Service 1848
University 1848
White's.—Established as a chocolate-house 1698, and as a private club, 1736. 1848
Whittington 1848

CLUBS (Foreign).—Political societies, established in Paris in 1782, were suppressed by the police in 1787. The Breton Club was formed at Versailles in 1789, and in 1792 it changed its name to that of the Jacobins. The “Club des Feuillants,” of which La Fayette was a member, was founded in 1791; that of the Réunion was commenced by the Girondins, but suppressed Aug. 10, 1792. All these French clubs were abolished Sept. 4, 1797. An attempt was made to revive these institutions during the revolution of February, 1848, but they were totally prohibited in 1849. During the first revolution several female clubs were formed in Paris, and the number of members at one time amounted to 6,000. They led to such grave disorders that they were closed by the Convention.

CLUGNI, or CLUGNY (France), celebrated

for its Benedictine abbey, founded by William I., count of Auvergne, A.D. 910. Louis IX. of France and Pope Innocent IV. held a conference here in 1245. The monastery was frequently assailed by the Huguenots, and was almost entirely destroyed during the revolution in 1789. (*See CLUNIACS.*)

CLUNIACS, or CLUNIACENSIS.—Monks of the abbey of Clugny received this name. They were a branch of the Benedictines. Odo, abbot of Clugny, A.D. 927, reformed their rule, and the Cluniacs became renowned throughout Europe. William of Warrenne, made earl of Surrey by William II., introduced the Cluniacs into England, and gave them their first house, at Lewes, in Sussex, in 1078. They had forty-two priories and cells in this country, the last having been established at Slesesholm, Norfolk, in 1222. Wolsey dissolved four of their establishments in 1525, and the rest were suppressed at the Reformation. There were also nuns of this order.

CLUSIUM (Italy).—One of the twelve cities of which the Etruscan confederation was composed. Its original name was Camars. Porsenna, who is represented, by tradition, as having besieged Rome B.C. 508, was ruler of Clusium. It was besieged by the Gauls B.C. 388, B.C. 295, and B.C. 225. It became the seat of a bishopric at an early period, and is known under the modern name of Chiusi.

CLYDE CANAL.—The act for making this important communication between the rivers Forth and Clyde was obtained in 1768, and the works were commenced by Sir Laurence Dundas, June 10 in the same year. Mr. Smeaton was the chief engineer, and under his direction the works were completed July 28, 1790.

CLYST, ST. MARY'S, (Battle,) was fought between the Protestant forces under Lord Grey and the Roman Catholic peasantry of Devonshire, on the evening of Saturday, Aug. 3, 1549, when the latter were defeated. Miles Coverdale, who afterwards translated the Bible into English, preached a thanksgiving sermon for the victory on the battlefield.

CNIDUS (Asia Minor).—This city, in Caria, was the metropolis of the Dorian confederacy. It is celebrated for the victory gained by Conon over the Lacedæmonian fleet, commanded by Pisander, B.C. 394. The inhabitants carried on a flourishing trade with Egypt at an early period. Aphrodite was the great object of worship amongst the Cnidians.

CNOSUS (Crete), also written Cnossus and Gnosus, was founded, according to tradition, by Minos, the mythical king of Crete. It was colonized by the Dorians, and, in alliance with the cities of Gortyna and Cidonia, ruled over the whole of the island. The Romans captured it and planted a colony in it, B.C. 67. The celebrated labyrinth of Crete, in which the Minotaur was confined, is always represented as having been situated in this city.

COACH.—The precise period at which coaches were introduced is not known; but Italy, France, Spain, and Germany all claim the honour of the invention. Towards the end of the 13th century, the queen of Charles of Anjou entered Naples in a *caretta*, which appears to have borne some resemblance to our carriages, and to have been regarded with favour by the French ladies, as Philip the Fair prohibited the use of similar vehicles to citizens' wives in 1294. The emperor Frederick III. visited Frankfort in a covered carriage in 1474, and in 1509 the elector of Brandenburg possessed a coach gilt all over. The first carriage seen in England was introduced by the earl of Arundel in 1580, but they were not generally used till about 1605. The first who drove six horses in his coach was the duke of Buckingham, in 1619; and his example was immediately emulated by the earl of Northumberland, who set up a team of eight. Hackney coaches were first let for hire in London in 1625, in Paris in 1650, and at Edinburgh in 1673. Stage-coaches were introduced into England during the 17th century, but the earliest public notification of their establishment is dated April 26, 1658. One was started between London and Edinburgh before 1754; and in 1784 mail coaches were instituted. Mr. Josiah Child brought the first cabriolet from Paris in 1755, and Horace Walpole states that every man of fashion soon set up a similar conveyance. Cabs were introduced into London in 1820, and cabriolets were first let for hire in 1823.

COAL is supposed to have been known to the Britons before the arrival of the Romans, and to have been used in England A.D. 852. The earliest document in which its name occurs, is Bishop Pudsey's Boldon Book, dated 1180, in which we read of colliers established at Escomb and Bishopwearmouth. Newcastle coal is first mentioned in 1234, when Henry III. granted the inhabitants a charter to dig it; and seaborne coal was sold in London before 1245, though at first only employed in the arts and manufactures. The Chinese used it in 1295. In consequence of a petition presented by Parliament to Edward I. in 1306, the use of coal in London and the suburbs was prohibited by proclamation as a nuisance; but, in 1321, the palace was warmed by its means. The exportation of coal from Newcastle commenced in 1325, in which year several cargoes were conveyed to France. A tax of twopence per chaldron on all coals sold to persons not franchised in the port of Newcastle was imposed in 1421, and made payable to the king; but the payment being very irregular, such large arrears were claimed by Queen Elizabeth, in 1599, that the town voluntarily agreed to pay a duty of one shilling per chaldron. Coal was first employed in the manufacture of glass and iron in 1624; and in 1638 its sale was made a monopoly by Charles I. The duty of 1s. per chaldron was granted by Charles II. to the duke of Richmond, in 1677; whence

it became known as the Richmond shilling. Its existence in Newfoundland was discovered in 1763, and mines were opened in Cape Breton in 1767. The production of tar from coal was discovered in 1779. The impost of the Richmond shilling was finally relinquished March 1, 1831; at which time the arrears, in consequence of which it was first claimed, were redeemed, with an overplus of £341,900. The following tables are given in Hunt's "Mineral Statistics for 1858."

Produce of the United Kingdom for 1858.

	Tons.
Durham and Northumberland.....	15,853,494
Cumberland.....	920,137
Yorkshire.....	8,302,150
Derbyshire, Nottinghamshire, and Leicestershire	4,710,750
Warwickshire.....	356,500
Staffordshire	6,680,780
Lancashire	8,050,000
Cheshire	695,450
Shropshire	749,360
Gloucestershire, Somersetshire, and Devonshire	1,125,250
North Wales	1,022,500
South Wales	7,495,289
Scotland	8,926,249
Ireland	120,750
Total	65,008,649

Exports of Coal from the United Kingdom in 1858.

	Tons.
France received	1,344,342
Germany	679,264
N. America	363,628
Prussia	363,499
Denmark	344,667
Russia	306,306
S. America	269,415
E. Indies	258,807
Mediterranean	258,534
Spain	251,423
Holland	245,552
W. Indies	215,615
Italy	208,419
Turkey	198,031
Africa	166,653
Sweden	142,093
Other countries	461,023
Total	6,077,271

COAL EXCHANGE.—In 1807 the corporation of London possessed a coal exchange, which was converted into a market in 1831. The first stone of a new building was laid Dec. 14, 1847. It was opened by Prince Albert Oct. 30, 1849.

COALITION (NORTH AND FOX) ADMINISTRATION.—The vote of censure on the peace of Versailles, passed Feb. 21, 1783, induced the earl of Shelburne and his colleagues to resign office. Mr. Pitt, then only twenty-three years of age, was requested by George III. to form a ministry; but he declined, and a long interregnum ensued, which was brought to a close by a coalition between Mr. Charles James Fox and Lord North, under the premiership of the duke of Portland. The new ministry kissed hands

April 2, 1783. The cabinet was thus constituted :—

Treasury Duke of Portland.
 President of the Council.. Viscount Stormont.
 Privy Seal..... Earl of Carlisle.
 Chancellor of Exchequer.. Lord John Cavendish.
 Home Secretary..... Lord North.
 Foreign Secretary..... Mr. Fox.
 Admiralty..... Viscount Keppel.

The cabinet consisted of only seven persons. The great seal was placed in commission. Viscount Townshend was master-general of the ordnance; Edmund Burke, paymaster-general; Mr. Richard Brinsley Sheridan, secretary to the treasury; and Mr. Charles Townshend, treasurer of the navy. Mr. Fox's India Bill was rejected on its second reading, in the House of Lords, Dec. 17, 1783; and on the 18th, George III. sent a messenger to Lord North and Mr. Fox, requesting them to deliver up the seals of their offices, which was done on the 19th of December. (*See* PITT (FIRST) ADMINISTRATION.)

COAST-GUARD.—This force, at first formed for the prevention of smuggling, but now organized for defensive purposes, was transferred from the Customs department to the Admiralty by 19 & 20 Vict. c. 83 (July 29, 1856).

COAST VOLUNTEERS, OR NAVAL COAST VOLUNTEERS.—By 16 & 17 Vict. c. 73 (Aug. 15, 1853), the Admiralty were empowered to raise a number, not exceeding 10,000, of royal naval coast volunteers, by voluntary entry from among seafaring men and such others as may be deemed suitable. They were to be entered for a period of five years, and were to be exercised on board ship or on shore for a time not exceeding twenty-eight days in each year. By 19 & 20 Vict. c. 83, s. 10 (July 29, 1856), the officers of the coast-guard are to train and exercise the Royal Naval Coast Volunteers.

COBALT.—"The name Cobalt," says Beckmann, "is given at present to that metal, and its ores, the oxides of which are largely employed in the manufactures of glass, porcelain, and pottery, for the production of a blue colour." It was not known to the ancients. In 1754 the Society for the Encouragement of Arts and Sciences offered a premium for the discovery of a cobalt-mine in the south of England. One was found at Gwennap, in Cornwall, to the proprietor of which the premium was awarded in December of the same year. The word cobalt is said to be derived from the *kobold*, goblin, a term applied to it by the German miners, because, as they assert, more valuable metals are never found where it occurs.

COBLENTZ (Prussia), the Confluentes of the Rhine, is a town of great antiquity. The church of St. Castor, consecrated A.D. 836, is the spot where the grandsons of Charlemagne met when they divided the Western empire into Germany, France, and Italy, A.D. 843. At a council held here June 5, 860, peace was concluded between Lothaire,

king of Lorraine, and the sons of Charles the Bald. Another council took place in 922, and a third in 1012. Edward III. of England had an interview here with the emperor Lewis of Bavaria in 1338. The palace, built by the elector of Treves in 1779, was used by the French as barracks during their occupation of the town in 1792. The Russians occupied Coblenz in 1814. A wooden bridge was built over the Rhine in 1819. In the spring of 1830, the waters of the Moselle thawed before those of the Rhine, and, being stopped by the ice, occasioned a destructive inundation. The millennial jubilee of the church of St. Castor, built A.D. 836, was celebrated with great solemnity in 1836.

COBURG (Germany).—Capital of Saxe-Coburg Gotha. The palace was built A.D. 1549. Wallenstein made an unsuccessful effort to besiege the castle during the Thirty Years' war (1632). The gymnasium was founded in 1604.

COCCEIANS.—The followers of John Cocceius, of Bremen, born A.D. 1603. He was professor of divinity at Leyden, and taught that the whole of the Old Testament "was a kind of emblematic history of Christ, and of the Christian church; that the prophecies of the ancient prophets, in their literal import, treated of Jesus Christ; and that whatever was to occur in the Christian church, down to the end of time, was all prefigured in the Old Testament, in some places more clearly, and in others less so." He believed in a visible reign of Christ upon earth, after the conversion of the Jews.

COCHEREL (Battle).—Bertrand du Guesclin defeated John, king of Navarre, at this place, near Evreux, Thursday, May 16, 1364. Although the forces of the king of Navarre were much inferior to those of the enemy in number, the struggle was maintained with great resolution. By this victory nearly the whole of Normandy was brought under subjection to Charles V. of France.

COCHIN (Hindustan).—This native state was made tributary by Hyder A.D. 1776. Treaties were concluded by the East-India Company with the rajah of Cochin in 1791 and May 6, 1809, by which, on the payment of an annual tribute, it was placed under British protection. The seaport town of Cochin was founded by Albuquerque in 1503, being the first Portuguese establishment. The Dutch captured it in 1663, but it was wrested from them by the English in 1796, and was, with its dependencies, ceded to England, in exchange for the island of Banca, by the second and third articles of the convention between England and the United Netherlands, signed at London Aug. 13, 1814.

COCHIN CHINA (Asia) formed part of the Chinese empire till a few centuries after our era. Its ancient history is very little known. In 1774 the reigning family was expelled, and the land divided between three brothers, with whom Warren Hastings in vain sought to establish commercial intercourse in 1778. The rightful heir returned

in 1790, and recovered his possessions from the usurpers, and in 1797 he commenced the introduction of many European arts into his dominions, being assisted in his efforts by a French missionary. The East-India Company again attempted to trade with the country in 1804 and 1822, but they were disappointed in both instances. Cochinchina was invaded by a French and Spanish force in 1858, and the fort and bay of Turon were taken Sept. 1. In the spring and summer of 1859 other victories followed, and the French having captured all the forts on the Saigon, and driven back the native troops, a treaty of peace was signed July 30, and the French admiral withdrew his fleet. (See ANAM, CAMBODIA, and TONQUIN.)

COCHINEAL was discovered by the Spaniards in Mexico, A.D. 1518. The insect from which the dye is obtained was introduced into St. Domingo by Thierry, a French naturalist, in 1777, and into India in 1795. Only an inferior quality of dye is produced there. Prescott says that the rich crimson of the best kinds is the modern rival of the famed Tyrian purple. The excise duty on cochineal, reduced to a shilling the hundred-weight in 1842, was finally repealed by 8 & 9 Vict. c. 90, passed in 1845.

COCKADE.—The ancient custom of wearing badges in the bonnet is generally considered to have given rise to the modern cockade. As worn by gentlemen's servants, it is supposed to have originated during the wars of the Roses. In later times the black cockade was the Hanoverian badge, the white that of the Stuarts.

COCK-CROWER (the King's).—This officer during Lent crowed the hour every night within the precincts of the palace. George II., then prince of Wales, was sitting down to supper on Ash-Wednesday, 1715 (the first Lent after the Hanoverian accession), when the occupant of the office entered the apartment, and performed his peculiar duty. The prince, mistaking it for an intended insult, was greatly incensed, and the custom was from that time discontinued.

COCK-FIGHTING was established at Athens as a public or solemn pastime by Themistocles, before B.C. 465. The Romans received the custom from the Greeks, although they appear to have preferred quail-fighting. The date of its introduction into England is uncertain, but may probably be referred to the period of Roman supremacy. The earliest record on the subject occurs in a work of Fitz-Stephen's, who died A.D. 1191. He mentions that it was the practice of school-boys to bring their cocks to the master on Shrove Tuesday, and devote the morning to an exhibition of their prowess. The sport was prohibited in France in 1260, and in England, by Edward III., in 1365; again by Henry VIII., by Elizabeth in 1569, and by Cromwell, March 31, 1654. It was prohibited in England by the Cruelty to Animals Act, 5 & 6 Will. IV. c. 59 (Sept. 9, 1835). This act was extended to Ireland by 1 Vict. c. 66 (July 15, 1837). It is common in Asia,

is a fashionable pastime with the ladies of Peru, and is carried to a great height in the island of Ceylon.

COCK-LANE GHOST.—This famous deception, practised in a house in Cock Lane, West Smithfield, in the years 1760, 1761, and 1762, created considerable sensation. The second and most notorious visitation commenced in January, 1762. A child about eleven years of age was thrown into violent fits by scratchings and knockings heard in different parts of the room, and communications were held with the supposed ghost who produced these noises. The case was taken up by several influential persons. The child was removed to the house of the Rev. Stephen Aldrich, rector of St. John's, Clerkenwell, and an investigation took place in the presence of several influential persons, on the night of Jan. 31. Measures had been taken to prevent any collusion, and the result was that the people assembled were unanimously of opinion, that "the child has some art of making, or counterfeiting, particular noises; and that there is no agency of any higher cause." The girl was moved from house to house, and was ultimately detected in an attempt to play off a trick upon her auditors. William Parsons, the officiating clerk of St. Sepulchre's, the father; Elizabeth, his wife; Mary Frazer, a girl who assisted in the deception; a clergyman, and a tradesman, were tried at Guildhall, July 10, by a special jury, before Lord Mansfield, and convicted of a conspiracy against the life and character of Mr. K—. Sentence having been deferred for seven or eight months, the clergyman and the tradesman paid Mr. K— between five and six hundred pounds, and were dismissed with a severe reprimand. The father was sentenced to stand in the pillory three times in one month, once at the end of Cock Lane, and after that to be imprisoned two years; his wife to one year's imprisonment, and Mary Frazer to six months in Bridewell, with hard labour.

COCKNEY.—The origin of this term, and its application to a native of London, are involved in obscurity. In 1517, Henry VIII. made an order with reference to the feast of the King of the Cockneys, held on Childermas-day.

COCOA.—The properties of the kernel or seed of the cocoa-tree were known to the Spaniards and Portuguese before any other Europeans. In 1649 only one cocoa-tree existed in all the Windward Isles, and that was grown as a curiosity in the garden of an Englishman. The tree was discovered in Martinique in 1655, and the cultivation was commenced in 1660. The use of the beverage called cocoa did not become general till the end of the 17th century.

COCOA-TREE CLUB, the Tory chocolate-house of Queen Anne's reign, is mentioned by Addison in the first number of the "Spectator," Thursday, March 1, 1711. A club was subsequently formed here, which was called the "Cocoa-tree Club" from the place of meeting.

CODE NAPOLEON.—The commission for the formation of a new civil code was appointed by Napoleon in 1800. The code was promulgated in 1804, as the "Code Civil des Français." It was afterwards greatly extended. Napoleon introduced it into Italy in 1805, into Portugal in 1808, into the Papal States in 1809. It was afterwards adopted in other countries.

CODES.—A collection or system of laws, made by order of Theodosius II., was promulgated in the Eastern empire A.D. 438, and in the Western empire by Valentinian III. in the same year. This was called the Theodosian code. Justinian appointed a commission in Feb., A.D. 528, to compile one code from those of Gregorianus, Hermogenianus, and Theodosius. It was promulgated April 7, 529. The Institutes were completed Nov. 21, 533, and the *Pandects*, or *Digest*, Dec. 16, 533. A second edition of the code appeared Nov. 16, 534. This formed the celebrated Theodosian code. Other systems of laws, framed in different countries, are also called codes. (See **CODE NAPOLEON**, &c.)

CELESTINES, or CÆLESTINIANS.—This religious order was founded near Sulmona, in the Abruzzi, by Peter of Morone, afterwards Celestine V., in 1254; was approved by Urban IV. in 1264, and called the order of the Hermits of St. Damien, or Moreonites. Raised to the pontificate in 1294, Peter of Morone favoured the new order, and they took the name of Celestines. They spread through Italy and France, and were suppressed in the latter country in 1778.

COFFEE was introduced into Arabia from Persia in the 15th century, and brought to Constantinople in 1554. The Venetians were the first Europeans acquainted with its use. It was brought to Marseilles in 1644, to London in 1652, and to Paris in 1657; but until 1660 its use was restricted to those who had travelled in the East. In 1690 the plant was reared at Amsterdam; it was planted at Surinam in 1718, at Cayenne in 1722, at Martinique in 1727, and before 1732 formed one of the staple productions of Jamaica. Various acts encouraging the growth of British plantation coffee were passed in 1781, 1783, 1788, and 1796. Prosper Alpinus, the botanist, who spent several years in Egypt, and who died in 1617, is said to have been the first European author who mentioned coffee. By 12 Charles II. c. 24 (1660), a duty of fourpence on every gallon of coffee made and sold was granted to the king.

COFFEE-HOUSES were established at Constantinople A.D. 1554. One was opened at Oxford in 1650, at London in 1652, at Paris in 1662, and at Marseilles in 1671. By a proclamation of King Charles II., issued in Dec. 1675, they were suppressed; but were soon re-opened by request of the tea and coffee merchants. For many years the use of coffee and the coffee-houses was assailed by various writers.

COFFINS are said to have been invented by the Egyptians, who made them of stone and

of sycamore-wood. Joseph was embalmed and placed in a coffin (Gen. l. 26) in that country B.C. 1635. Coffins were made of lead, of iron, and of wood, at a very early period. Bede states that the Saxons buried their dead in wood.

COGGLESHALL, or COGGESHALL (Essex).—King Stephen founded a Cistercian abbey in this place A.D. 1142, and some remains exist at this day. It was once celebrated for the manufacture of white baize, called "Coggles-hall whites."

COGNAC (League), called the Holy League, because the pope was at the head of it, was concluded between the pope, the Venetians, the duke of Milan, and Francis I. of France, May 22, 1526. The objects were to compel the emperor Charles V. to release the French king's sons, on the payment of a reasonable ransom, and to re-establish Sforza in the possession of the Milanese. The king of England was made protector of the league; a principality in the kingdom of Naples, with an annual revenue of 30,000 ducats, was to be settled upon him, and lands to the value of 10,000 ducats given to Wolsey. Cognac was one of the cautionary towns granted to the Huguenots by the peace signed Aug. 11, 1570.

COIF.—Serjeants-at-law first adopted the coif as their badge during the reign of Henry III. (1216—1272). They used it to conceal their baldness, as there were then few lawyers who were not also priests, and, consequently, obliged to shave their heads. When it became incumbent on judges to have passed through the degree of serjeant-at-law, they retained the coif in their higher dignity, as we learn from Sir John Fortescue's discourse *De Laudibus Legum Angliæ*, written between the years 1461 and 1470. On the appointment of official legal costume by the decree of the Westminster judges, subscribed June 4, 1635, the coif became an established portion of judicial uniform. As a portion of female attire, coifs were introduced early in the 17th century. The use of the coif in the coronation has been discontinued since the reign of George II.

COIMBATORE (Hindustan).—This state, annexed to Mysore A.D. 1746, was taken by the English in 1783, and was formally incorporated with our possessions in India in 1799. The town of Coimbatore, captured by the English Nov. 26, 1783, was restored at the peace concluded in 1784. It was retaken July 21, 1790. Tippoo invested it June 13, 1791, and, having summoned it in vain, made a general assault, which was repulsed, Aug. 11. Having received reinforcements, Tippoo compelled the garrison to surrender Nov. 3, 1791.

COIMBRA (Portugal), the Conimbrica of the Romans, was erected into a bishopric during the 6th century. It was taken from the Moors A.D. 872, recovered by them in 982, and finally reconquered by Ferdinand the Great and the celebrated Cid in 1064. The monastery of Santa Cruz was founded June 28, 1131. On the elevation of Portugal

into a kingdom in 1139, Coimbra became the capital; and in 1308 the university was temporarily removed there from Lisbon by King Dionysius. The murder of Inez de Castro by Alfonso IV. took place Jan. 7, 1355. On the accession of John I., April 6, 1385, the seat of government was transferred to Lisbon. The plague carried off many of the inhabitants in 1423. The university was finally transferred to Coimbra in 1537. The aqueduct was built in 1568. Coimbra suffered much from an earthquake in 1755, and was the scene of a victory gained by the English over the French in 1810.

COIN.—The Parian chronicle attributes the invention of coin, or metal stamped for currency, to Pheidon of Argos. He is said to have coined silver money in the island of Ægina, B.C. 895. Herodotus (i. 94) says the Lydians were the first who coined gold and silver money. The first known copper coins of Greece are about the date B.C. 490. Silver coinage commenced at Rome B.C. 266, and gold coinage B.C. 204. A metallic currency existed in Britain previous to the Roman occupation. Under the Romans, the coin of England resembled that of Rome; but the Saxons introduced money of a totally different character. Silver *skeattas*, coins worth about a twenty-fifth less than the penny afterwards used, have been discovered, which were struck probably before the conversion of Ethelbert, king of Kent, A.D. 597, as they are without the sign of the cross. The *stycas*, minute coins of copper, zinc, and silver, were coined by the kings of Northumberland about 670, and are remarkable for the excellence of their workmanship. Silver pennies, worth three of ours, were introduced about 725 or 794, and formed the principal English money till some time after the Norman conquest. Edward the Confessor issued a few gold pennies, but no regular gold coinage took place till the time of Henry III.; since which the history of English coin is much better defined. During the Anglo-Saxon and early Anglo-Norman periods, gold byzants had a legitimate circulation in England, and were indeed the chief commercial medium throughout Europe. Elizabeth withdrew the base coinage of former sovereigns in 1560, and the fact is noticed in the inscription on her tomb.

- A.D.
1227. Groats, or "grotes," ordered to be coined.
1247. Henry III. forbids the currency of the old money, and commands a new coinage.
1257. First gold coinage in England by Henry III. This piece was called a "gold penny," and passed current for twenty ordinary pence.
1279. Round pennies, halfpennies, and farthings are coined by Edward I., who introduces many improvements.
1344. First gold florins and nobles are coined by Edward III.
1465. New issue of gold nobles, called *rials* and *angels*, by Edward IV.
1489. Sovereigns ordered to be struck by Henry VII.
1504. Shillings coined by Henry VII.
1551. Crowns, half-crowns, and sixpences are coined by Edward VI.

- A.D.
1560. Irish shillings are struck by Elizabeth. Their intrinsic value was nine pence, but they were ordered to pass current for twelve pence.
1562. Milled money is first coined by Elizabeth.
1601. First copper coinage in England, by Elizabeth. This money was for use in Ireland.
1663. Guineas of twenty shillings are first coined by Charles II.
1665. Copper halfpence and farthings are coined by Charles II.
1670. Gold coins of ten, forty, and one hundred shillings are ordered.
1672. Aug. 16. Copper currency is established.
1699. Reformation of the silver coinage by Mr. (afterwards Sir Isaac) Newton.
1717. The value of the guinea is settled at twenty-one shillings.
1718. Quarter-guineas are coined by George I.
1797. Gold seven-shilling pieces, and copper two-penny pieces, are coined by George III.
1817. July 1. The new sovereign of twenty shillings is first coined.
1849. Florins are coined.

COIN-CLIPPING.—This crime was of frequent occurrence in early times. The custom of cutting the silver penny into halves and quarters served to encourage it. Henry III. prohibited the circulation of clipped coin, by letters dated at Merton, Nov. 17, 1248, and in 1278, 280 Jews were hanged in London for coin-clipping. By 7 & 8 Will. III. c. 1 (1696), £1,200,000 was raised by a house-duty to defray the expense of withdrawing the clipped coin. Scarcely any of the coin in circulation was worth half the nominal value.

COINING.—The coining of money is the exclusive prerogative of the Crown. The privilege was in early times occasionally granted to bishops and abbots. By the common law of England, and in many statutes, the crime of counterfeiting the money of the realm was declared high treason. By 27 Edw. I., *de Falsâ Monetâ* (1299), the importation of false money was made a capital crime. The counterfeiting of foreign coin current in England was declared high treason by 1 Mary, st. 2, c. 6 (1553), and as such rendered the offender subject to all the penalties used and ordained in that case. By 8 & 9 Will. III. c. 26, ss. 1 & 4 (1696-7), the mere possession of coiner's tools, as well as the colouring, gilding, &c., any coin resembling the current money, was made high treason. This was continued in 1702 by 1 Anne, c. 3. All former acts, however, were repealed by 2 Will. IV. c. 34 (May 23, 1832), which made the manufacture, purchase, or importation of false money, and the wilful injury of good money, punishable by transportation, since altered to penal servitude; while those guilty of uttering such coin were liable to imprisonment. The provisions of this act were extended to the colonies by 16 & 17 Vict. c. 48 (Aug. 4, 1853). Attempts having been made to use coin for advertising purposes, by stamping names upon it, this was made a misdemeanour by 16 & 17 Vict. c. 102 (Aug. 20, 1853). The process of coining was, in early times, accomplished by hammering bullets of metal flat, and placing them between two dies; these were struck with heavy mallets until the impression was obtained. The

French made an improvement upon this process about the middle of the 16th century, by the application of the screw. Antoine Brucher invented the coining-press in 1553, and milled money was coined by Elizabeth in 1562, though it was not general in England until 1662. Boulton invented his coining-machine in 1788, and the greater part of the coinage of the realm was carried on at his works at Soho, Birmingham, till the Mint was established in 1810. During the Middle Ages the right of coining was considered the best guarantee of independence. The citizens of Lucca, in the 13th century, by way of asserting their independence of Pisa, went and coined money at the gates of that city.

COLAPOOR (Hindustan).—This Mahratta state was founded by Sumbajee, the grandson of Sevajee, who overran the country A.D. 1670. At the commencement of the century, pirates from several of its ports infested the seas, and by treaty concluded Oct. 1, and ratified Nov. 13, 1812, the seaboard was ceded to the East-India Company. The rajah was assassinated in 1821, and such confusion prevailed, that the state was for some time occupied by English troops.

COLBERG (Pomerania).—The Russians having besieged this place for 29 days, retired Oct. 31, 1758. They returned in 1760, with a fleet of 27 ships and an army of 15,000 men. General Werner came to the assistance of the garrison, who held out bravely, Sept. 18, and in a few days dispersed both fleet and army. The Russians returned in 1761, and Prince Eugene of Würtemberg, at the head of the army sent for its relief, cut his way through the Russians Nov. 14, and the place, long defended with wonderful heroism, surrendered Dec. 16.

COLCHESTER (Essex), the *Camalodunum* of the Romans, and the *Caer Colin* of the Britons, is said to have been the birthplace of the emperor Constantine, A.D. 265, and to have sent a bishop to the council of Arles 314. Neither of these stories is supported by trustworthy evidence. It was seized by the Danes in 838, and was not finally retaken till 921, when Edward the Elder expelled the foreigners and rebuilt the fortifications. Richard I. granted the first charter, Dec. 6, 1189. The castle was besieged and the town plundered by King John's barons in 1215. The plague prevailed here in 1348 and 1360. Henry VI. visited the town Aug. 5, 1445, and Catherine of Aragon in 1516. The Dutch and Flemish exiles settled here in 1571, and established the manufacture of various woollen goods. Colchester was besieged and taken by the Parliamentarians during the civil war, the defence lasting from June 13 to Aug. 27, 1648. Between Aug. 1665 and Dec. 1666, the plague carried off 4,731 of the inhabitants. Colchester was deprived of its charter in June, 1684, but recovered it in 1693. The theatre was built in 1812; and the Essex and Colchester Hospital in 1820.

COLCHIS (Asia).—This country, celebrated in mythical history, is said by Herodotus to

have been peopled by the remnant of the army led by Sesostris into Scythia. Xenophon attacked and defeated the Colchians during his celebrated retreat, B.C. 401. Colchis, long subject to Persia, became independent before the time of Alexander the Great (B.C. 336—323). It was subjected by Mithridates, of Pontus, from whom it was wrested by Pompey, B.C. 65; but the Romans did not reduce the country into the form of a province. Gibbon remarks (ch. xli.) that "the riches of Colchis shine only through the darkness of conjecture or tradition; and its genuine history presents an uniform scene of rudeness and poverty." In early times the Colchians were noted for their manufacture of linen and knowledge of navigation. It is the scene of the exploits of the fabled Argonautic expedition, the first attempt of the Greeks at distant navigation, said to have been undertaken B.C. 1260. Its original name was *Æea*, and it comprised the modern Mingrelia, and part of the neighbouring country.

COLDINGHAM (Berwickshire).—This place is celebrated for a nunnery, founded as early as the 7th century. In 679 it was destroyed by lightning, and in 870 seized by the Danes. The nuns cut off their noses and lips, in order to disfigure themselves; which so infuriated their brutal captors, that the whole sisterhood was burnt in the monastery. King Edgar founded a Benedictine priory on the same site in 1098.

COLDSTREAM GUARDS.—This regiment was enrolled in the town of Coldstream, Berwickshire, by General Monk, Jan. 1, 1660, and on the disbanding of the army in January, 1661, was retained by Charles II. in his special service.

COLERAINE (Ireland) was originally the seat of a bishop's see, founded by St. Cabreus about A.D. 540. In 1171 it was plundered by the king of Down, and again in 1213 by Thomas MacUchtry, who used the stones of the abbey as materials for a castle which he erected here. A monastery for Dominican friars was founded about 1244. James I. granted Coleraine and the surrounding districts to a company of London merchants, known as the "Governor and Assistants of the New Plantation in Ulster," in 1613, and in 1614 the town was incorporated by the same monarch.

COLISEUM.—This celebrated amphitheatre at Rome was commenced by the emperor Vespasian A.D. 75, and completed by Titus A.D. 80. It received the name of Coliseum on account of its magnitude. Gibbon (ch. xii.) thus describes the magnificent edifice:—"It was a building of an elliptic figure, five hundred and sixty-four feet in length, and four hundred and sixty-seven in breadth, founded on fourscore arches, and rising, with four successive orders of architecture, to the height of one hundred and forty feet. The outside of the edifice was encrusted with marble and decorated with statues. The slopes of the vast concave, which formed the inside, were filled and surrounded with

sixty or eighty rows of seats, of marble likewise, covered with cushions, and capable of receiving with ease above fourscore thousand spectators." A bull-feast was celebrated in the Coliseum, Sept. 3, 1332. Eugenius IV. surrounded it with a wall, and it was consecrated by Benedict XIV.

COLLAR.—The use of collars of gold and jewellery is of the greatest antiquity. They were worn by the ancient Babylonians, Egyptians, Jews, Greeks, and Romans, Manlius Torquatus, who was consul at Rome B.C. 287, received his surname from a collar he took from a Gaul whom he slew in fight. Collars were afterwards used as part of the insignia of the various orders of knighthood. The collar of SS. is said to have been adopted in honour of the two martyrs Simplicius and Faustinus, who were thrown into the Tiber with stones and chains round their necks, by order of Diocletian; but this and other explanations of its origin do not rest upon good authority. This subject has been discussed in the second volume of the first series of "Notes and Queries." Boutell gives the following explanation:—"Next to the Garter itself, the most celebrated knightly decoration of this class is the Collar of SS. introduced by King Henry IV., apparently as a memorial of the success with which his aspiring ambition had been crowned: this letter S, repeated either in links of gold, or in gold embroidery, worked upon a fillet of blue, is the initial of the word 'Souveraine,' Henry's motto, which he bore while earl of Derby." It was originally the livery of John of Gaunt, adopted by Henry IV. as part of the royal livery in 1399. Previous to the battle of Agincourt, Oct. 25, 1415, Henry V. permitted all the untitled members of his retinue to wear this collar; thereby conferring upon them the privileges of nobility. The collar of the order of the Garter was assigned by Henry VII. some time between the years 1496 and 1502.

COLLECTS were introduced by Pope Gelasius between A.D. 492 and 496. The collects for the day of the Church service appeared in the first prayer-book of Edward VI., in 1548. Many are very ancient, some being the composition of St. Jerome, and even of Gelasius himself.

COLLEGIANTS, or COLLEGIANS.—This sect was formed in Holland A.D. 1619. They were thus named because they called their assemblies, or sacred conventions, held twice a year at Rheinsburg, near Leyden, colleges. Three brothers, John-James, Hadrian, and Gisbert Koddeus, were its authors. Mosheim describes them as "a very large society of persons of every sect and rank, who assume the name of Christians, but entertain different views of Christ; and which is kept together neither by rulers and teachers, nor by ecclesiastical laws, nor by a formula of faith, nor, lastly, by any set of rites, but solely by the desire of improvement in scriptural knowledge and piety." In 1686 the Collegians split into two opposing sects, but

the breach was healed early in the 18th century.

COLLIERY.—The earliest mention of collieries occurs in a charter of Henry III. (dated 1239), granting to the burgesses of Newcastle permission to dig for coal. In 1330 they were regarded as valuable property. The employment of females in collieries was regulated by 5 & 6 Vict. c. 99 (Aug. 10, 1842), which ordered that no new female workers should be engaged at all; that in three months after it was passed, no female under eighteen should be so employed; and that after March 1, 1843, female service in mines should be totally abolished.

COLLODION.—The iodized collodion now so largely employed for photographic purposes, was discovered by Mr. Scott Archer, who published an account of its preparation and properties in the "Chemist" for March, 1851.

COLLYRIDIANs.—Arabian heretics, who "invested the Virgin Mary with the name and honours of a goddess." Epiphanius says they were all females, and that they sacrificed to the Virgin Mary. They arose towards the close of the 4th century, and received their name from the collyrides, or little cakes, which they offered to the Virgin Mary. They came from Thrace and parts of Scythia.

COLMAR (France), near the site of the ancient Argentaria, was raised to the rank of a town A.D. 1220. It was made a free imperial city in the 13th century, and was fortified in 1552. The Swedes captured it in 1632, and Louis XIV. took it and destroyed its fortifications in 1673. It was ceded to France in 1697 by the treaty of Ryswick. The plague committed great ravages in 1541. Its cathedral was founded in 1363.

COLOGNE (Prussia), the Colonia Agrippina of the Romans, received its name from the empress Agrippina, who established a colony here about A.D. 50. It was erected into an archbishopric before 314.

A.D.

- 508. Clovis is declared king of the Franks at Cologne.
- 700. The church and nunnery of Santa Maria in Capitolio are founded.
- 715. Charles Martel sustains a defeat near Cologne.
- 782. Charlemagne holds a council here.
- 870. Sept. 26. A council is held on discipline.
- 873. Sept. 26. A council is summoned.
- 887. April 1. A council held against robbers of churches.
- 957. Cologne is declared an imperial town.
- 980. Archbishop Bruno founds the church of St. Pantaleon.
- 1057. A council for the reformation of the clergy.
- 1066. St. Gereon's Kirche is founded.
- 1110. A council is held.
- 1115. The emperor Henry V. is excommunicated at a council held here.
- 1119. The excommunication of Henry V. is published at a council.
- 1164. The relics of the three kings are removed to Cologne.
- 1185. The outer walls are built.
- 1186. A council is held.
- 1187. Another council.
- 1259. All ships trading to the neighbourhood are compelled to unload here.

- A.D.
 1261. March 12. A council is held.
 1266. Another council.
 1270. The cathedral is commenced.
 1281. March 9. A council on discipline.
 1307. Feb. 22. A council against the Beghards.
 1310. The year is ordered by council to commence at Cologne at Christmas, instead of at Easter, according to their custom.
 1322. Oct. 31. Another council is held.
 1388. The university is founded.
 1390. Sept. 16. The ancient statutes of the province are renewed at a council.
 1424. April 22. A council is held on discipline.
 1425. Persecution and expulsion of the Jews.
 1452. March 3. A council on discipline.
 1536. A council on the duties of ecclesiastics, &c.
 1571. The town-hall is built.
 1577. Birth of Rubens at Cologne.
 1618. Expulsion of the Protestants.
 1636. Church of the Jesuits is founded.
 1642. Mary de Medicis dies at Cologne.
 1655. Sept. Prince Charles, afterwards Charles II. of England, arrives at Cologne, and remains in this city above two years.
 1787. The Protestants are allowed to erect a place of worship and a school.
 1795. Cologne is seized by the French.
 1801. It is made the capital of the French department of La Roer.
 1814. It is restored to Prussia.
 1815. The fortifications are restored.
 1837. The navigation of the Rhine is opened, which enables Cologne to carry on a direct foreign trade.
 1841. Sept. 1. The railroad to Aix-la-Chapelle is opened.
 1848. Sept. The newly-finished parts of the cathedral are thrown open to the public.
 1855. A permanent bridge over the Rhine, for railway and common traffic, is commenced.

COLOMBIA (South America).—The ancient vice-royalty of New Granada and Quito, and the state of Venezuela, having thrown off the Spanish yoke, torned themselves into a republic under the name of Colombia, in 1819.

- A.D.
 1820. July 13. The Congress express willingness to enter into negotiations with Spain, if their republic is acknowledged independent.
 1821. June 24. The republican troops, under General Bolivar, defeat the royalists at Carabobo. Dec. Spain loses all power in the new republic.
 1822. Nov. 13. Battle of Maracaibo, in which the republicans are defeated by the royalists, under General Morales.
 1823. March 8. Treaty of alliance between Colombia and Buenos Ayres. Nov. 6. The Colombians take Puerto Cabello.
 1824. Feb. 10. Bolivar is elected dictator by the Congress of Peru. June 30. Alliance between Colombia and Mexico.
 1825. Jan. 1. Great Britain recognizes the independence of Colombia. March 15. A treaty of alliance is concluded with Guatemala. May 28. Treaty of friendship and commerce with the United States. Nov. 7. Treaty of friendship and commerce with Great Britain.
 1826. Aug. 19. The Congress at Lima declares Bolivar president for life. Sept. 1. Bolivar appoints Santa-Cruz his deputy during his absence in Peru. Nov. 14. Bolivar returns to Bogota. Nov. 23. He accepts the dictatorship.
 1828. April 18. Insurrection of Colombian troops. April 23. The Congress of Ocaña declares Ignacio Marques president. Sept. 25. Santander excites a revolt against Bolivar, who escapes assassination, and quells the insurrection.

- A.D.
 1829. Venezuela constitutes itself a separate republic.
 1830. Jan. 20. Bolivar tenders his resignation of the presidency, and retires to Carthagena shortly afterwards. Venezuela again joins New Granada. Dec. 17. Death of Bolivar.
 1831. Nov. 17. Venezuela, New Granada, and Colombia, again become separate states. (See VENEZUELA.)

COLOMBO (Ceylon) was founded by the Portuguese A.D. 1517, and fortified by them in 1520. Rajah Singha laid siege to it in Aug. 1586, but was forced to withdraw the following year. The Dutch wrested it from the Portuguese in 1656, and retained possession till Feb. 14, 1796, when it was taken by the English.

COLONY.—The formation of colonies is among the earliest events of which any historical record exists. The Phœnicians and the Carians planted several colonies in the Mediterranean, and the Greeks followed their example. The Romans began to establish colonies during the monarchical period. In modern times, the Venetians, the Portuguese, the Spanish, the French, the English, and the Dutch, have been distinguished by their attempts to form colonies. In this respect England has distanced all competitors, having succeeded in establishing the most extensive colonial empire of ancient or modern times. The following is a list of the British colonies with the date of their settlement, capture, &c.:—

	A.D.
African Forts—Settled in	1618
Anguilla	1666
Antigua	1632
Ascension Island—Granted by Spain	1827
Australia, South—Settled	1834
" West	1829
Bahamas	1630
Barbadoes	1614
Bengal—Ceded by the emperor Shah Allum	June 20, 1765
Berbice—Capitulated	Sept. 1803
Bermudas—Settled	1609
Bombay—Ceded by Portugal	June, 1661
British Colombia—Settled	1858
British Guiana—Capitulated	Sept. 1803
Canada, Lower	Sept. 18, 1759
" Upper	Sept. 8, 1760
Cape Breton Island—Taken from the French	1745
Cape Coast Castle—Ceded by the Dutch	1661
Cape of Good Hope—Capitulated	Jan. 10, 1806
Ceylon—Capitulated	Sept. 17, 1795
Demerara	Sept. 1803
Dominica—Ceded by France	1763
Essequibo—Capitulated	Sept. 1803
Falkland Islands—Settled	1833
Fernando Po—Taken possession of	1815
Gambia—Settled	1618
Gibraltar—Capitulated	Aug. 4, 1704
Gold Coast—Settled	1618
Gozo—Capitulated	Sept. 1800
Granada—Ceded by France	1763
Heligoland—Capitulated	1807
Honduras—Treaty	1670
Hongkong	1842
Ionian Isles—Placed under British protection	1814
Jamaica—Capitulated	1655
Labuan—Settled	1847
Madras	1639
Malacca—Received from the Dutch in exchange for Sumatra	April 9, 1825
Malta—Capitulated	Sept. 1800
Mauritius	Dec. 3, 1810

Montserrat—Settled	A.D. 1632
Natal—Taken from the Dutch	1842
Nevis	1628
New Brunswick—Ceded by France	1713
Newfoundland—Settled before	1548
New South Wales—Settled	1787
New Zealand	1815
Nova Scotia—Ceded by France	Oct. 7, 1748
Port Phillip—First sale of crown lands in ..	1835
Prince Edward's Island—Taken from the French	1758
Prince of Wales Island—Purchased by the East-India Company	1786
Sierra Leone—Settled	1787
Singapore—Treaty	Feb. 26, 1819
St. Helena—Taken from the Dutch	1673
St. Christopher's, or Kitt's—Settled	1623
St. Lucia—Capitulated	June 22, 1803
St. Vincent—Ceded by France	1763
Swan River—Settled	1829
Tobago—Ceded by France	1763
Tortola—Settled	1666
Trinidad—Capitulated	Feb. 18, 1797
Vancouver—Settled	1848
Van Diemen's Land—Settled	1803
Victoria (Hongkong)	1842
Victoria (Port Phillip)—Erected into a separate colony	1851
Virgin Islands	

COLOPHON (Asia Minor).—An Ionian city, founded, according to tradition, by Andræmon. It was a flourishing city as late as B.C. 66. Strabo says that the Colophonians were celebrated for the excellence of their cavalry. It was, in fact, considered invincible, and gave rise to the proverb, "He has put the Colophon to it," or given the finishing stroke, used to show that a matter had been brought to a certain termination. Old works, before the introduction of a title-page, had title, date, &c., printed at the end; and this, as the last thing printed, was termed a colophon.

COLOSSIANS, (Epistle to the,) was addressed by St. Paul to the Christians of Colossæ, in Phrygia, in June A.D. 60.

COLOSSUS OF RHODES, a brazen statue of Apollo, commenced by Chares B.C. 290, and completed B.C. 280. The statement that one foot rested on each side of the harbour of Rhodes, and that ships passed under it in full sail, does not rest on good authority. It was 105 feet in height, and was ascended by a winding staircase. An earthquake threw it down B.C. 224, and it was never re-erected. The remains were sold to a Jewish merchant of Edessa, A.D. 672, and 900 camels were loaded with the brass. It was one of the seven wonders of the world.

COLUMBINIA.—This metal was discovered by Mr. Hatchell in a ferruginous mineral from North America, A.D. 1801. Ekeberg, who afterwards found it in a Swedish mineral, gave it the name of Tantalum.

COLUMBUS (United States), the chief town of Ohio, was founded A.D. 1812. The old state-house was destroyed by fire in 1852.

COMBS were made by the Greeks and Romans, and during the Middle Ages, of boxwood, ivory, and other materials. They often occur in early barrows, British, Roman, and Saxon; and were buried with both pagans and Christians. Some were found at

Pompeii like the modern small-tooth combs. In the 13th century combs were sometimes made of gold and set with jewels.

COMEDY was introduced at Athens by Susarion and Dolon, B.C. 562. Thespis, the "father of comedy," performed on a wagon B.C. 535. A decree for its prohibition was passed B.C. 440, but was evaded, as performances are recorded to have taken place B.C. 439 and B.C. 437. Aristophanes, the chief poet of the old comedy, exhibited his first production B.C. 427. The middle comedy commenced B.C. 375, and was supported by thirty-five poets, none of whom are of great repute. The new comedy, which began about B.C. 335, owes its chief celebrity to the productions of Menander, who began his theatrical career B.C. 321. The principal Latin comedy writers are Plautus, who died B.C. 184, and Terence, B.C. 159. Some difference of opinion prevails respecting the origin of English comedy. Hallam (Lit. vol. ii. pt. ii. ch. 6) speaks of "Ralph Roister Doister, written by Udal in the reign of Henry VIII., as the earliest English comedy in a proper sense, so far as our negative evidence warrants such a position." This comedy, probably written before 1540, was first printed in 1565. Hallam believes it to be "the earliest lively picture of London manners among the gallants and citizens, who furnished so much for the stage down to the civil wars." For a long time "Gammur Gurton's Needle," supposed to have been written by John Still, afterwards bishop of Bath and Wells, was considered the first English comedy. It was represented at Christ's College, Cambridge, about the year 1565, and the earliest edition is that of 1575. "Misogonus," written by Thomas Rychardes, another comedy, is known to have been written before 1560. In France, Jodelle's comedy of "La Rencontre" was represented before Henry II. in 1552; and his comedy of "L'Abbé Eugène" was published about the same time. Hallam terms the "Le Menteur" of Corneille "the first French comedy written in polite language, without low wit or indecency." The comedies of Larivey were published in 1579; and Molière began to write in 1653. Spanish comedy commenced in the latter portion of the 16th century, and was chiefly supported by Lope de Vega, who flourished in 1600, and by Calderon, who published twelve comedies in 1635. Ariosto wrote the first regular Italian comedies in 1495, and Machiavelli composed his "Mandragola" before 1520. Flaminio Scala first published the outline of a series of extemporaneous comedies in 1611, and they afterwards became the most popular branch of the Italian drama. The German theatre is not very rich in comic authors. Hans Sachs, whose works appeared in 1578, perhaps supplied its earliest comedies.

COMETS.—Humboldt (Cosmos, vol. i. p. 84) remarks, that "Kepler, with his usual animation of expression, said that there were more comets in the regions of space than fishes

in the depths of ocean. As yet, however, there are scarcely one hundred and fifty whose paths have been calculated, if we may assume at six or seven hundred the number of comets whose appearance and passage through known constellations have been ascertained by more or less precise observations." The Chinese observations, which go back 500 years before the Christian æra, are of great value. Mr. John Russell Hind has published a history of comets; and to his work we are indebted for much of the information given in the following list:—

B.C.

370. A comet mentioned by Aristotle. Calculated by Pingré.

136. Mentioned by Justin, and observed in China.

A.D.

178. Observed by the Chinese.

389. Mentioned by contemporary historians as of extraordinary brilliancy and size, and as a cause of much terror.

582. Recorded in the Chronicle of Idatius.

615. July. Observed in China. First mention of coruscations in the tail of a comet.

891. May. Observed in Europe and China.

989. Observed in China; and supposed to have been *Halley's Comet*.

1066. Observed in Europe, and considered ominous, as it occurred in the year of the Norman conquest.

1264. Calculated by Pingré, and supposed to be identical with that of 1556.

1337. Fine comet, described by Nicephorus Gregoras and in the Chinese annals.

1402. A very splendid comet visible in Europe and Asia.

1456. *Halley's Comet*, observed in Europe and China.

1472. A very splendid comet, with a prodigiously long tail, observed in Europe and China.

1577. Parallax of this comet ascertained by Tycho Brahe.

1618. Nov. Discovered by Kepler. Gassendi, and others, and observed by Harriot.

1680. Nov. 14. Discovered by Godfrey Kirch, at Coburg. This comet directed Newton's attention to cometary astronomy.

1682. *Halley's Comet*, discovered by him to be identical with that of 1456 and succeeding years, and to be periodical in its return. This was the first demonstration of the periodicity of comets.

1707. Nov. 25. Discovered by Manfredi and Stan-
cari, at Bologna.

1744. The finest comet of the 18th century. It was observed by almost every astronomer of the age.

1772. *Biela's Comet*.

1786. Jan. 17. *Encke's Comet*, discovered by Mechain.

1811. March 26. The *Grand Comet*, discovered by Flaugergues, at Viviers.

1815. March 6. *Olbers' Comet*, discovered by Olbers, at Bremen.

1819. *Encke's Comet*, discovered by Pons. During this appearance its periodicity was detected by Encke.

1823. Dec. Discovered in various parts of Europe. This comet had two tails, one turned from the sun, and the other towards it.

1825. July 15. The *Great Comet* of 1825, discovered by Pons. Calculated by Hansen.

1826. Feb. 27. *Biela's Comet*, discovered by Biela, at Josephstadt. During this appearance its recurrence at short periods was ascertained.

1843. Feb. 28. The *Great Comet* of 1843, discovered in America, Italy, and at the Cape.

A.D.

1844. Nov. 22. *Faye's Comet*, discovered by Faye, at Paris, and ascertained to be periodical.

1851. June 27. *D'Anest's Comet*, discovered by D'Anest, at Leipsic, and ascertained to be periodical.

1858. June 2. *Donati's Comet*, discovered by Donati, at Florence. It was seen in Great Britain in September and October.

1861. June 30. A brilliant comet is first visible in England.

COMFITS.—During the reign of Henry III. of France (1574—1589) an abundant use of comfits was one of the flagrant follies of fashion. Disraeli (*Curiosities*, i. 221) says, "All the world, the grave and the gay, carried in their pockets a *comfit-box*, as we do snuff-boxes. They used them even on the most solemn occasions; when the duke of Guise was shot at Blois, he was found with his comfit-box in his hand."

COMMERCE.—The Phœnicians, who were the most ancient nation of traders on the earth, are called the inventors of commerce and navigation. Their ships traded with Greece as early as B.C. 1800, and they founded many colonies as centres of trade B.C. 1450. The chief commercial nations of the Middle Ages were the Venetians, whose importance commenced about A.D. 722; the Pisans, who reached the culminating point of their prosperity about 1063; and the Genoese, who rose to great power and affluence in 1064. The Hanseatic league, a confederacy of towns for the protection of trade, became influential about the year 1140. In 1252 Flanders attained a high position from the success of its merchants, and the Florentine republic was one of the chief commercial powers in 1298. The commercial importance of England was considerably improved by Edward I., who granted a charter in behalf of foreign merchants in 1302. From this charter it appears that the British then had intercourse with Germany, France, Spain, Portugal, Flanders, Lombardy, Florence, and other less considerable powers. France was so poor in 1360, that a leather currency was adopted, and long afterwards commerce was in a very languishing state. Jacques Coner, however, who held some financial office under Charles VII., was said to be the wealthiest merchant in the world in 1449. The discovery of America by Columbus in 1492, and the other results of the marine enterprise of the 16th century, developed new fields for commercial activity.

COMMON COUNCIL (London).—This arose out of the folk-mote, a general *mote*, or meeting of the people, an institution of Anglo-Saxon origin. It was held at a much earlier date than 1208, the year mentioned by many authorities as the first in which a folk-mote was summoned. There were three principal folk-motes in the year; one at the feast of St. Michael, to know who was to be sheriff; the second at Christmas, to arrange the wards; and the third at the feast of St. John (June 24), to protect the city from fire, by reason of the great

drought. Each citizen neglecting to attend was fined forty shillings, a large sum in those days. Stow relates that in the time of Edward II. the citizens claimed the east part of St. Paul's churchyard to be the place of assembly of their folk-motes; and that "the great steeple, there situate, was to that use, their common bell; which being there rung, all the inhabitants of the city might hear, and come together." The same author refers to a solemn meeting or common council held on the 11th of October, 1190, in St. Paul's churchyard, and adds, "it is likely in that place where the folk-mote used to assemble." The meetings in the open air were discontinued, and in 1347 each ward was instructed to send delegates according to its extent. The common council now meets in the Guildhall every Thursday, and the annual elections occur on St. Thomas's day (Dec. 21).

COMMON LAW.—Concerning the unwritten law of England, Dugdale observes (Origines, c. 3), "The common law is, out of question, no less ancient than the beginning of differences betwixt man and man, after the first peopling of this land." It has been bequeathed us by the Britons, Romans, Saxons, and Danes, and was digested into a code by Edward the Confessor, who began to reign in 1044. This code was confirmed by William the Conqueror about 1070; and the statute of Merton, enacted in 1235-36, declared the intention of the nobles not to change laws which had been so long used and approved.

COMMON PLEAS (England).—Originally the trial of common causes was referred to the *aula regia*, or court of exchequer, which followed the king in all his progresses; but the 11th chapter of Magna Charta, June 15, 1215, ordered that they should be tried in a court always held at one place. Westminster Hall was the place fixed upon, and a chief-justice of the Common Pleas was forthwith appointed, with power to hear and decide all civil cases between subject and subject. Originally no barrister below the rank of serjeant could plead in this court, although all were permitted to move or show cause against a rule for a new trial; but the act 9 & 10 Vict. c. 54 (Aug. 18, 1846), allowed the privilege to all barristers practising in the superior courts at Westminster. The following is a list of the chief-justices of the Common Pleas:—

A.D.

- 1272. Gilbert de Preston (in office before this year, but appointment unknown).
- 1274. Roger de Seyton.
- 1278. Thomas de Weyland.
- 1290. John de Mettingham.
- 1301. Sept. 19. Ralph de Hengham.
- 1309. March 15. William de Bereford.
- 1326. July 18. Hervey de Staunton.
- 1327. Feb. 4. William de Herle.
- 1329. Sept. 3. John de Stonore.
- 1331. March 2. William de Herle (again).
- 1355. July 7. John de Stonore (again).
- 1341. Jan. 8. Roger Hillary.
- 1377. June 26. Robert de Beaknap.

A.D.

- 1388. June 30. Robert de Charleton.
- 1396. Jan. 15. William Thirning.
- 1413. June 26. Richard Norton.
- 1423. May 5. William Babington.
- 1436. Feb. 9. John Juyn.
- 1439. Jan. 20. John Cotesmore.
- 1439. Oct. 14. Richard Newton.
- 1449. June 16. John Priset.
- 1461. May 11. Sir Robert Dauby.
- 1471. May 29. Thomas Brian.
- 1500. Oct. 20. Thomas Wood.
- 1502. Sept. 30. Thomas Frowyk.
- 1506. Oct. Robert Read.
- 1519. Jan. 27. John Erule.
- 1521. April 13. Robert Brudenell.
- 1531. June. Robert Norwich.
- 1535. April. John Baldwin.
- 1545. Nov. 6. Edward Montague.
- 1553. Sept. 5. Richard Morgau.
- 1554. Oct. 8. Sir Robert Brook.
- 1558. Oct. 5. Anthony Browne.
- 1559. Jan. 22. Sir James Dyer.
- 1582. May 2. Edmund Anderson.
- 1605. Aug. 26. Sir Francis Gawdy.
- 1606. June 30. Sir Edward Coke.
- 1613. Nov. 26. Sir Henry Hobart.
- 1626. Nov. 28. Sir Thomas Richardson.
- 1631. Oct. 26. Sir Robert Heath.
- 1634. Oct. 14. Sir John Finch.
- 1640. Jan. 27. Sir Edward Lyttelton.
- 1641. Jan. 26. Sir John Banks.
- 1648. Oct. 12. Oliver St. John.
- 1660. June 1 (O.S.). Sir Orlando Bridgeman.
- 1668. May 20 (O.S.). Sir John Vaughan.
- 1675. Jan. 23. Sir Francis North.
- 1683. Jan. 22. Sir Francis Pemberton.
- 1683. Oct. 1. Sir Thomas Jones.
- 1686. April 21. Sir Henry Bedingfield.
- 1687. April 16. Sir Robert Wright.
- 1687. April 21. Sir Edward Herbert.
- 1689. May 6. Sir Henry Pollexfen.
- 1692. April 30. Sir George Treby.
- 1701. July 5. Sir Thomas Trevor.
- 1714. Oct. 26. Sir Peter King.
- 1725. June 1. Sir Robert Eyre.
- 1736. Jan. 31. Sir Thomas Releve.
- 1737. Jan. 29. Sir John Willes.
- 1762. Jan. 23. Sir Charles Pratt.
- 1766. Aug. Sir John Eardley Wilmot.
- 1771. Jan. 25. Sir William De Grey (afterwards Lord Walsingham).
- 1780. June 9. Alexander Wedderburn (afterwards Lord Loughborough).
- 1793. Feb. 11. Sir James Eyre.
- 1799. July. Lord Eldon.
- 1801. May 30. Richard Pepper Arden (afterwards Baron Alverley).
- 1804. May 8. Sir James Mansfield.
- 1813. Nov. 29. Sir Vicary Gibbs.
- 1818. Nov. 5. Sir Robert Dallas.
- 1824. Jan. 8. Sir Robert Gifford.
- 1824. April 28. Sir William Draper Best (afterwards Lord Wynford).
- 1829. June. Sir Nicholas Conyngham Tindal.
- 1846. July 11. Sir Thomas Wilde (afterwards Lord Truro).
- 1850. July 16. Sir John Jervis.
- 1856. Nov. Sir Alexander Cockburn.
- 1859. June. Sir William Erle.

COMMON PLEAS (Ireland).—The following is a list of the chief-justices of the court of Common Pleas in Ireland, from the year 1532. The constitution of this court is similar to that of the court of Common Pleas in England.

A.D.

- 1532. Aug. 22. Richard Delahyde.
- 1534. Oct. 17. Thomas Luttrell.
- 1554. July 7. John Bathe.
- 1559. Sept. 3. Robert Dillon.
- Nicholas Nugent.

A.D.

1581. June 28. Robert Dillon.
 1593. Oct. 10. Sir William Weston.
 1594. March 15. Sir Robert Dillon (again).
 1597. Nov. 15. Sir Nicholas Walshe.
 1610. Nov. 28. Sir Dominick Sarsfield.
 1634. April 24. Sir Gerard Lowther.
 1660. Jan. 19. James Donelan.
 1685. Jan. 27. Sir Edward Smith.
 1669. March 17. Sir Robert Booth.
 1679. May 3. John Keating.
 1690. Jan. 22. Richard Pyne.
 1695. June 7. Sir John Hely.
 1701. May 16. Sir Richard Cox.
 1703. Feb. 1. Robert Doynne.
 1714. Oct. 14. John Forster.
 1720. Dec. 5. Sir Richard Levinge.
 1724. Nov. 9. Thomas Wyndham.
 1726. Feb. 10. William Whitshed.
 1727. Nov. 24. James Reynolds.
 1740. May 30. Henry Singleton.
 1753. Feb. 19. William Yorke.
 1761. May 21. Richard Aston.
 1765. March 19. Richard Clayton.
 1770. July 4. Marcus Patterson.
 1787. May 10. Hugh Carleton (afterwards Lord Carleton).
 1800. Dec. 20. John Toler (afterwards Lord Norbury).
 1827. June 18. Lord Plunkett.
 1830. Dec. 23. John Doherty.
 1850. Oct. 22. James Henry Monaghan.

COMMON PRAYER.—The first proposition to revise and correct the Roman Catholic church services was made in 1542, when it was ordered that the names and titles of the popes and of Thomas Becket should be rigorously expunged. The Litany was published in its present form June 11, 1544, and commanded to be used in churches by Henry VIII., and the Order of Communion was substituted for the Mass, April 1, 1548. The book of Common Prayer was completed and presented to the king the same year, and the Act of Uniformity (2 & 3 Edw. VI. c. 10, s. 1), passed Jan. 15, 1549, ordered that all public service should be celebrated according to the ritual there prescribed.

A.D.

1549. June 9 (Whitsunday). First Prayer-Book used.
 1550. Feb. English Ordinal is published.
 1551. Prayer-Book revised.
 1552. Nov. Second Prayer-Book is published and used.
 1558. Dec. Two editions of the Litany are published.
 1559. June 24. Queen Elizabeth's revised Prayer-Book is published, and ordered to be used.
 1560. Haddon's Latin translation of the Prayer-Book.
 1571. The Thirty-nine Articles are adopted, and a correct Latin version of the Prayer-Book is published.
 1578. Puritan Prayer-Book published.
 1604. James the First's Prayer-Book is published.
 1637. Charles the First's Prayer-Book for Scotland is published.
 1661. Prayer-Book revised.
 1662. Charles the Second's Prayer-Book is published.
 1689. Attempted revision of the Prayer-Book.

COMMONS. (*See HOUSE OF COMMONS.*)

COMMONWEALTH. (*See INTERREGNUM.*)

COMMUNION.—The ancient church was exceedingly strict in the administration of the Eucharist, and during the 3rd century

denied the privilege of communication to a converted sinner who twice relapsed into error. Communion in two kinds was enjoined by Leo the Great A.D. 445, in order to discover Manicheans, who objected to take wine. The council of Agda in 506 enacted that clergy not communicating at Easter, Whitsuntide, and Christmas, should no longer be regarded as Catholics, and the fourth general Lateran council, held Nov. 11, 1215, ordered all the faithful of both sexes to confess and communicate at Easter. Communion in one kind only was instituted by Pope Urban II. at the commencement of the Crusades in 1096, but it was not rendered imperative till 1414, when the council of Constance forbade the clergy to administer wine to lay communicants, under pain of excommunication. The Romish church has ever since administered the communion in one kind. The communion service of the Church of England was adopted in 1552.

COMMUNISTS.—The followers of Robert Owen, Saint-Simon, Fourier, and Prudhon, are distinguished from other Socialists, of which they form a branch, by this name. Communism was first promulgated by Robert Owen in "A New View of Society, or Essays on the Principle of the Formation of the Human Character, and the Application of the Principle to Practice," published in 1813. He attempted to form a communist society in 1825, but this failed; and "Harmony Hall," established in Hampshire in 1843, did not prove more successful. Similar attempts made on the continent have also failed.

COMO (Italy), the Comum of the Romans, who planted a colony here B.C. 288. It was erected into a bishopric by St. Felix, A.D. 379. In 1127 it was besieged and burnt by the Milanese, who did not finally annex it to their territories till 1335. The cathedral was commenced in 1396.

COMORN, or **KOMORN** (Hungary), a town of great antiquity, was taken and burnt by Soliman A.D. 1543. It was soon rebuilt; but the Turks returned in 1594, and again captured it. The Imperialists obtained possession in 1597, and in 1598 it again fell under Turkish power. Comorn was erected into a royal town in 1751. The fortress was rebuilt in 1805. During the Hungarian revolution, the Austrians were defeated in a battle near this place, July 11, 1849. The town was given up to the Austrians Oct. 1, 1849.

COMPANIES.—Trade guilds are mentioned in *Judicia Civitatis Londonie*, compiled by King Athelstan, and other Anglo-Saxon laws; and they therefore existed as early as A.D. 939. The company of Steelyard Merchants settled in England before 967, and the original foundation of the Saddlers' company is referred to about the same period. Henry I., who reigned between the years 1100 and 1135, granted a charter to the weavers, and is supposed to have established the first Anglo-Norman guild. In the reign of Henry II. trade guilds were common institutions, and their formation was encouraged by that king and his successors John and Henry III.

THE CHIEF COMPANIES STYLED HON-
OURABLE.

Incorporated. A.D.	Incorporated. A.D.
Clothworkers 1482	Haberdashers 1407
Drapers 1439	Ironmongers 1463
Fishmongers (salt) 1433, (stock) 1509, united 1536	Mercers 1394
Goldsmiths 1327	Merchant Tailors 1466

Glovers 1638	Wax-chandlers .. 1484
Gold and silver wire-drawers 1623	Weavers .. Henry I.
Gun-makers 1638	Wheelwrights 1670
	Woodmongers 1605
	Woolmen

COMPASS.—The Chinese are said to have used this instrument as early as B.C. 1040, though their written records of the properties of the loadstone only date from A.D. 125. The period at which it was introduced into Europe is very uncertain; for although very obvious allusion to its use seems made in a French poem written by Guyot de Provins about 1190, it remained generally unknown, or at least unemployed, till a much later date. Some authorities insist that Marco Polo brought the instrument from China in 1260, while others claim the honour of its invention for Flavio Gioja, a seaman of Amalphi, near Naples. There is no doubt that the latter did in 1302 commence the manufacture of compasses, which were employed by the Mediterranean voyagers, and that the general use of the invention began in his time. The declination of the magnetic needle was discovered by Columbus in 1492, and the

variation of the declination by Mr. Gellibrand in 1625.

COMPIÈGNE (France).—This ancient town was formerly fortified. Ecclesiastical councils were held here June 22, 756; 823; Oct. 1, 833; 871; May 1 and Dec. 8, 877; 1085; Nov. 4, 1198; Aug. 5, 1235; May 19, 1270; April 9, 1278; Jan. 4, 1303; and Sept. 8, 1329. It was rebuilt by Charles the Bald in 876, taken from the Burgundians by Charles VI. in 1415, and besieged by the English, who took Joan of Arc prisoner here, May 26, 1430.

COMPLUTENSIAN BIBLE.—This polyglot Bible was printed A.D. 1514 and 1515, at the Spanish town Alcala, from the Latin name of which, Complutum, it derives its name. It was projected by Cardinal Ximenes, who spent 52,000 ducats in forwarding its preparation; but Leo X. delayed its publication till 1522, and then only permitted an issue of 600 copies, lest the diffusion of scriptural truth should weaken his supremacy.

COMPOSTELLA (Order of).—This order originated in consequence of the obstructions offered by the Moors to pilgrims journeying to the shrine of St. James at Compostella. It received the papal sanction July 5, 1175, and continued under the government of an independent grand master till 1493, when the administration was seized by Ferdinand and Isabella, and permanently vested in the crown of Spain.—A similar order for ladies was founded in 1312, to afford food and shelter to pilgrims. The ladies of this order were originally at liberty to marry and quit the institution; but in 1480 they were compelled to adopt the conventional laws of poverty, chastity, and obedience.

COMPREHENSION SCHEME.—This measure for the enlargement of the basis of the Church of England, by making certain alterations in the liturgy, in order to admit dissenters, passed through the House of Lords A.D. 1689. The Commons presented an address to the king, requesting him to summon a convocation, and, this having been done, discussions arose, which ended in the abandonment of the plan. An attempt to pass a similar scheme in Scotland in 1673 also failed.

CONCEPCION (South America).—The capital of a province of the same name, in Chili, was built A.D. 1763. It was destroyed by an earthquake Feb. 20, 1835.

CONCEPTION BAY (Newfoundland) was first settled by about forty colonists in 1640.

CONCERT.—This entertainment originated in Italy, and the earliest on record is that of the Filarmonici, which was established at Vicenza as early as 1565. The Academy of Ancient Music, founded in 1710, introduced concerts into England. The Concert Spirituel was established at Paris in 1725. Some of the following were of short duration:—

- A.D.
1738. Royal Society of Musicians.
1741. Madrigal Society.
1763. Bach's concerts.

A.D.

- 1776. Concert of Ancient Music.
- 1785. Cecilian Society.
- 1791. Salomon's concerts.
- 1791. Choral Society.
- 1792. Harrison and Knyvett's concert.
- 1813. Philharmonic Society.
- 1823. British concerts.
- 1832. Sacred Harmonic Society.
- 1833. Vocal Society.
- 1837. Purcell Club.
- 1839. Society of Female Musicians.
- 1843. The Round, Catch, and Canon Club.
- 1845. Musical Union.

CONCHOLOGY.—Pliny divided shell-covered animals into soft, crustacean, and testaceous; but no correct system for their classification was known till Dr. John Daniel Major, of Kiel, published his tables of Ostracology A.D. 1674. Martin Lister announced another arrangement in 1678, and published his great work in 1685; and Philip Bonanni published his system in 1684. George E. Rumphius in 1711, and Nicholas Languis in 1722, contributed to bring the science to its present state of accuracy.

CONCLAVE.—The assembly of the cardinals, by which, when a vacancy occurred in the papal see, a new pope was elected, was instituted by Gregory X. at the council of Lyons, the 14th general council, A.D. 1274. It received its name from a gloomy apartment in the Vatican, called the Conclave, in which the cardinals were shut up to nominate the new pope, on the tenth day after the death of the former occupant of the see. If the election was not made in three days, the cardinals were only allowed a single dish at dinner and at supper, and after the eighth day received only a small allowance of bread, water, and wine. John XXI. suspended the operations of the conclave, and after the death of Nicholas IV. an interval of two years and three months elapsed before a successor was elected in the person of Peter Morone, who took the title of Celestine V., July 5, 1294. It was, however, re-established. Gregory XV. in 1621, and Urban VIII. in 1625, issued bulls for the regulation of the conclave.

CONCORD (Battle).—The first struggle between the revolted Americans and the English troops occurred near this town, in Massachusetts, April 19, 1775. The latter, after having destroyed three guns and all the military stores, withdrew to Lexington. This is sometimes called the battle of Lexington.

CONCORDANCE.—The first concordance, or verbal index to the Bible, was drawn up by Antony of Padua, who flourished from 1195 to 1231. It was entitled *Concordantiæ Morales*, and was the basis of the more important concordance of Cardinal Hugo de Santo Caro, who died in 1262. Mordecai Nathan's Hebrew Concordance appeared at Venice in 1523. Calasio published an improved edition at Rome in 1621. Buxtorf's Concordance was published in 1632, and the abridgment by Pavius in 1677. Thomas Gybson's "Concordance to the English New

Testament" appeared before the year 1540, and Marbeck's, who was organist to the royal chapel at Windsor, Concordance to the whole Bible in 1550. Several books of the kind followed; but these were surpassed by Cruden's celebrated work, of which the first edition appeared in 1737. Ayscough published a concordance to Shakespeare in 1790; Twiss another in 1805; and Mrs. Cowden Clark the "Complete Concordance to Shakespeare" in 1847. A concordance to Milton appeared at Madras in 1856 and 1857.

CONCORDAT.—This term is generally applied to a treaty or agreement between the pope and any foreign sovereign for the regulation, in the dominions of the latter, of matters relating to the Roman Catholic religion. The following are the most celebrated concordats mentioned in history:—

- Calixtus II. and the emperor Henry V. concluded one at Worms in 1122.
- Nicholas V. and the emperor Frederick III. concluded one at Vienna in 1448. It was settled at Aschaffenburg, and is sometimes called the Concordat of Aschaffenburg.
- Leo X. and Francis I. of France concluded one in 1516.
- Clement VII. and the emperor Charles V. concluded one at Barcelona in 1529.
- Benedict XIV. and Ferdinand VI. of Spain concluded one in 1753.
- Pius VII. and Napoleon I. concluded one July 15, 1801.
- Pius VII. and Napoleon I. concluded another at Fontainebleau, Jan. 25, 1813.
- Pius VII. and Louis XVIII. concluded one at Paris, Nov. 22, 1817.
- Pius IX. and Francis-Joseph of Austria concluded one at Vienna, Aug. 18, 1855.

CONDOTTIERI.—Though the word signifies chiefs or leaders, it was applied to the mercenaries, or soldiers of fortune, who, during the Italian wars in the 13th and 14th centuries, took service under any prince or government that chose to engage them. They consisted exclusively of heavy-armed cavalry, and for a long period the wars of Italy were left entirely to them. Prescott remarks (Ferdinand and Isabella, pt. ii. ch. i.), "The common interests of the *condottieri* being paramount to every obligation towards the state which they served, they easily came to an understanding with one another to spare their troops as much as possible; until at length battles were fought with little more personal hazard than would be incurred in an ordinary tourney." Machiavelli refers to two battles at Anghiari and Castracaro, of which the shortest in duration lasted four hours, at the former of which not a single soldier was killed, and at the latter only one, who was crushed beneath the weight of his own armour.

CONDUITS, or cisterns, of stone or lead, were formerly used for the conveyance of water. The great conduit in West Cheap was commenced A.D. 1285, the Little Conduit in 1442, the conduit at Holborn Cross in 1498. This was repaired in 1577 by Mr. William Lamb, and named after him. This conduit was taken down in 1746. The

conduit at Bishopsgate was made about 1513, at London Wall about 1528, at Aldgate about 1535, and at Lothbury in 1546. On festive occasions the conduits were often made to flow with wine.

CONFEDERATION OF THE RHINE.—On the overthrow of the old German empire, Napoleon induced several rulers of German states to separate themselves from the Germanic body and to enter into a confederation of which he was named protector. The act of this confederation was signed at Paris July 12, 1806, and ratified at Munich on the 25th. It consisted of forty articles. The contracting parties were Napoleon I., the kings of Bavaria and Würtemberg, the archbishop of Ratisbon, the elector of Baden, the duke of Berg, the landgrave of Hesse-Darmstadt, the princes of Nassau-Weilburg and Nassau-Usingen, of Hohenzollern-Hechingen and Hohenzollern-Sigmaringen, Salm-Salm, and Salm-Kyrburg, Isenburg-Birchstein and Lichtenstein, the duke of Arensburg, and the count of Leyen. In accordance with the 3rd article of the act of the confederation, these princes declared their entire separation from the German empire, at the diet of Ratisbon, Aug. 1. By the 38th article the contingents fixed for the several states were as follows:—

	Men.
France	200,000
Bavaria	30,000
Würtemberg	12,000
Baden	3,000
Berg	5,000
Darmstadt	4,000
Nassau, Hohenzollern, and others ..	4,000
Total	258,000

The grand-duke of Würzburg joined the league Sept. 30, 1806; the king of Saxony Dec. 11, 1806; the king of Westphalia and other German princes joined in the next and following years. The emperor of Russia recognized it by the 15th article of the treaty signed at Tilsit July 7, 1807, and the king of Prussia by the 4th article of the treaty signed at the same place July 9, 1807. Russia and Prussia issued a proclamation for its dissolution Feb. 23, 1813, and in 1815 it was replaced by the Germanic Confederation.

CONFESSIONAL. (*See* **AURICULAR CONFESSION.**)

CONFIRMATION, or imposition of hands, is a ceremony that dates from the apostolic age (Acts, viii. 17 and xix. 5 & 6). In the primitive church "this was always," says Bingham (Ecc. Antiq. xii. ch. i. sec. i.), "administered together with baptism, if the bishop, who was the ordinary minister of it, were present at the action. But if he were absent, as it usually happened to be in churches at a distance from the mother-church, or when persons were baptized in haste upon a sick-bed, then confirmation was deferred till the bishop could have a convenient opportunity to visit them." It

is one of the seven sacraments of the Roman Catholic Church.

CONFLANS, (Treaty,) was concluded between Louis XI. and the count of Charolois on the part of the chiefs of the League of the "Public Good," Oct. 5, 1465; Normandy was ceded to the duke of Berri. It was confirmed by the treaty of Peronne, Oct. 14, 1468. Louis XI. having induced the estates assembled at Tours, in the spring of 1470, to release him from the engagements of these treaties, they were again confirmed by the treaty of Crotoy, Oct. 3, 1472.

CONGÉ D'ELIRE, or leave to elect, the king's writ or license to a dean and chapter to elect a bishop, when a vacancy had occurred in a see, was first established by King John A.D. 1215. This was confirmed by Magna Charta in 1215. By 25 Hen. VII. c. 20 (1533), the ancient right of nomination was restored to the crown.

CONGO (Africa).—The name is applied to an extensive tract of country, portions of which were visited by Diego Cam A.D. 1484 and 1489, Ruy de Souza in 1490, Battel in 1607, Gattina and Piacenza in 1666, Sorrento in 1682, Daffer in 1686, Barbot in 1688, and many enterprising missionaries and travellers. It is the seat of several European settlements described under their designations. (*See* **ZAIRE.**)

CONGREGATION OF THE LORD.—During the regency of Mary Stuart an attempt was made to restore the Roman Catholic religion in Scotland by the aid of French mercenaries. The reformers took up arms in 1557, and demanded aid from England, styling themselves "the Congregation of the Lord." Their leaders assumed the title of Lords of the Congregation. Their bond of union, sometimes called the First Covenant, was signed at Edinburgh Dec. 3, 1557.

CONGRESS.—The following are the principal diplomatic meetings for the arrangement of business between various powers:—

B.C.	A.D.
432. Congress of Lacedæmon.	1793. At Antwerp.
	1797-99. At Radstadt.
	1813. At Prague.
A.D.	1814. „ Chatillon.
897. Congress at Pavia.	1814-15. At Vienna.
1644. At Munster.	1818. At Aix-la-Chapelle
1663. „ Aix-la-Chapelle	1820. „ Carlsbad.
1676-78. At Nimeguen.	1820. „ Troppau.
1697. At Ryswick.	1821. „ Laybach.
1722. „ Cambray.	1822. „ Verona.
1728. „ Soissons.	1856. Feb. 25. At Paris
1790. Jan. 7. At Brussels.	

CONGREVE ROCKETS, so called from Sir William Congreve, Bart., born May 20, 1772, who invented these destructive engines of warfare in 1804. They were first employed in the attack upon Boulogne, Oct. 8, 1806, and, having been found effective, were used at the siege of Copenhagen, Sept. 2-5, 1807, and at other places. They proved so effective at the battle of Leipsic, in Oct. 1813, that the emperor of Russia bestowed the order of St. Anne of the second class on their inventor. They have, however, been,

to a certain extent, superseded by more recent inventions.

CONI, or CUNEO (Italy).—The French besieged this strong town, but without success, A.D. 1691. The French and Spaniards, who besieged it in 1744, were ultimately compelled to withdraw. It was surrendered to Bonaparte April 29, 1796. The French surprised it Dec. 5, 1798, and they surrendered it to the Austrians Dec. 4, 1799. It was ceded to France by the convention of Alessandria in 1800. The Austrians concluded a treaty with Piedmont, July 26, 1821, by which Coni and other places were to be occupied by their troops until Sept. 1822. Coni was made the seat of a bishopric in 1817.

CONIC SECTIONS were first investigated by Aristæus, the mathematician, by whom they were made known to Euclid, who lived B.C. 323—253. Apollonius of Perga collected all that previous mathematicians had written on the subject, and wrote his work, in eight books, B.C. 250. He first named the three sections *parabola*, *ellipse*, and *hyperbola*. Galileo, who died Jan. 8, 1644, discovered the parabola to be the natural direction of a projectile flying in unresisting space; and Kepler in 1609 identified the ellipse as the curve of the planetary orbits.

CONJEVERAM (Hindustan).—This town was taken from the French by Clive in Dec. 1751. The English having retired, it fell into the hands of the French, from whom it was again wrested April 18, 1759. The French surprised it Jan. 12, 1760. Hyder defeated the East-India Company's army near this place Sept. 10, 1780.

CONNAUGHT (Ireland).—The division of Ireland into the provinces of Ulster, Munster, Connaught, and Leinster, was made by Pope Eugenius II. A.D. 1152. Until 1590 Connaught constituted a kind of independent kingdom; but in that year it was divided into counties and rendered directly subject to the English crown. Clare county was separated from Connaught in 1602.

CONNECTICUT (United States).—Two settlements, formed in Connecticut in 1633 and 1638, were united by a charter granted by Charles II. in 1665. This state adopted the constitution of the United States Jan. 9, 1783.

CONNOR (Ireland).—This bishopric was founded about A.D. 500, by Aengus Mac Nisse, a pupil of St. Patrick, who erected a church, of which he became bishop, and where he was buried in 514. This see was united to Down in 1442. On the death of James Saurin, last bishop of Dromore, April 9, 1842, his see was united to Down and Connor by the Church Temporalities Act.

CONSARBRUCK (Battle).—The duke of Lorraine defeated the French, under Marshal Crequi, at this place, near Trèves, in 1675.

CONSCIENCE (Courts of).—Courts of conscience, or of requests, for the recovery of small debts, were established in London as

early as 1517, by an act of the Common Council. It was dated Feb. 1, and ordered that two aldermen and four discreet commissioners should be appointed to sit on Wednesdays and Saturdays to determine cases in which the debt or damage did not exceed forty shillings. The power of the court was confirmed by 2 James I. c. 14 (1604), which ordered all inhabitants of the city of London, who had debts owing them not exceeding forty shillings, to sue for their recovery in the Court of Requests at Guildhall. This statute was enforced by 3 James I. c. 15 (1605), which enacted that all creditors living in London who sued for the recovery of such debts in any other court, should not only lose the suit, but pay all the expenses. These courts were afterwards introduced in other parts of the kingdom. They were, however, superseded by 9 & 10 Vict. c. 95 (Aug. 23, 1846), which established the county courts for the recovery of small debts.

CONSCRIPTION.—This mode of obtaining recruits was practised by the Romans, and introduced into France in the 8th century. General Jourdan proposed in the council of the Five Hundred the law of the conscription, which was approved and adopted Sept. 5, 1798. Every Frenchman from the age of 20 to 45 was liable to serve. Alison gives the following table of the levies made in France during the revolutionary war, compiled from Capefigue and the *Moniteur*:—

A. D.	Men.
1793	300,000
1793	1,200,000
1798	200,000
1799	200,000
1801	30,000
1805. Jan. 17	60,000
1805. Sept. 24	80,000
1806. Dec. 4	80,000
1807. April 7	80,000
1808. Jan. 21	80,000
1808. Sept. 10	160,000
1809. April 18	30,000
1809. April 18	10,000
1809. Oct. 5	36,000
1810. Dec. 13	120,000
1810. Dec. 13	40,000
1811. Dec. 20	120,000
1812. March 13	100,000
1812. Sept. 1	137,000
1813. Jan. 11	250,000
1813. April 3	180,000
1813. Aug. 24	30,000
1813. Oct. 9	280,000
1813. Nov. 15	300,000
Total	4,103,000

The standard of height was gradually lowered and the age reduced, in order to supply the necessary number of conscripts. In 1813 boys little above 17 years of age were compelled to serve, and the height required was little above five feet. A new law was promulgated March 21, 1832. A similar system prevails in Russia, Prussia, and other continental states.

CONSECRATION.—The first-born of man and beast were ordered to be consecrated to

God B.C. 1491 (Exod. xiii. 2, 12, 15). The family of Aaron and the tribe of Levi (Num. i. 49, and iii. 12 & 13) were set apart B.C. 1490. The Hebrews consecrated both cattle and fields to the Lord (Lev. xxvii. 28 & 29); Solomon dedicated the temple B.C. 1004 (1 Kings, viii.); and Nehemiah (xii. 27, &c.) describes the ceremonies practised at the dedication of the walls of Jerusalem B.C. 445. On the introduction of Christianity, churches were consecrated. Bingham (bk. viii. ch. ix. sec. 1) says,—“Anciently, when churches were finished and adorned, it was then usual to proceed to a dedication or consecration of them.” This ceremony, which signified the devoting, or setting them apart peculiarly for divine service, consisted during the first three centuries only of particular prayers and thanksgiving to God. In the 4th century churches were consecrated with great solemnity. The church built by Constantine over the Saviour’s sepulchre at Jerusalem was consecrated in a full synod of all the bishops of the East, A.D. 335. The council of Antioch, Aug. A.D. 341, was summoned on purpose to dedicate the famous church in that city commenced by Constantine. A canon passed at a British council in 450, ordered that “a presbyter, though he builds a church, shall not offer the oblation in it, before he brings his bishop to consecrate it, because this was regular and decent;” and the first council of Braga, in Portugal, May 1, 563, makes it deprivation for any presbyter to consecrate an altar or a church, declaring that the olden canons forbade it also. The distinct consecration of altars is first mentioned at the council of Agda, Sept. 11, 506. The water in baptism was consecrated in the early Church.

CONSERVATIVE CLUB.—This club was founded in 1840. The house, situated on the west side of St. James’ Street, was built from the designs of G. Bassevi and Sydney Smirke, between the years 1843-45, and was opened Feb. 19, 1845. The expense of the erection and furniture amounted to £73,211.

CONSERVATIVES.—This term was first applied to a political party about the year 1830. By some authorities its origin is attributed to John Wilson Croker, who in an article on internal policy, published in the *Quarterly Review* (vol. xlii. No. 83, p. 276) for Jan. 1830, declared,—“We despise and abominate the details of partisan warfare; but we are now, as we always have been, decidedly and conscientiously attached to what is called the Tory, and which might with more propriety be called the Conservative party.”

CONSERVATORS, WARDENS, OR KEEPERS OF THE PEACE, were appointed by the common law of England. The power of trying felonies was given them by 34 Edw. III. c. 1 (1360), when they received the title of Justices of the Peace (q. v.)

CONSISTORY COURT, which has jurisdiction in all ecclesiastical causes arising within the diocese, was separated from the hundred

court by William the First’s charter for the separation of the ecclesiastical from the civil courts, A.D. 1085. By 24 Hen. VIII. c. 12 (1533), an appeal to the archbishop of the province from the Consistory Court was established.

CONSOLIDATED FUND.—Three capital funds, the Aggregate Fund, the General Fund, and the South-Sea Fund, constituting the revenue of the country, were united in 1786, under the title of the Consolidated Fund. By 56 Geo. III. c. 98 (1816), the Consolidated Fund, or revenue of Great Britain, was combined with that of Ireland, forming “the Consolidated Fund of the United Kingdom,” pledged for the repayment of the interest of the consolidated national debt of the United Kingdom.

CONSPIRACY. (See PLOT.)

CONSTABLE.—The statute of Winchester (13 Edw. I. st. 2, c. 6), passed Oct. 8, 1285, enacts that two constables shall be chosen in every hundred or franchise. This is the first authentic record of the appointment in this country of high constables. Inferior officers, called petty constables, subordinate to the high constable of the hundred, were first appointed in the reign of Edward III. Justices of the peace are empowered, in cases of necessity, to swear in householders as special constables, by 1 & 2 Will. IV. c. 41, passed Oct. 15, 1831, and by 5 & 6 Will. IV. c. 43, passed Aug. 31, 1835. (See LORD HIGH CONSTABLE.)

CONSTANCE (Council of).—The seventeenth general council held its first sitting Nov. 16, 1414. Nicolas says, “In the second session, 2nd of March, 1415, the pope solemnly published his act of cession; in the third session, on the 26th of the same month, the council was declared to be lawful; the fourth session was held on the 30th of March; in the fifth, held on the 6th of April, all persons were enjoined to obey the decrees of the council. On the 29th of May, Pope John XXIII. was deposed. Gregory XII. abdicated 4th of July. The errors of Wycliffe were condemned in the seventh session, 2nd of May, 1415: in the fifteenth session, held 6th of July, 1415, John Huss was condemned to be burnt: in the forty-first session, held 11th of November, 1417, Otho Colonna was elected pope, under the name of Martin V. The council ended 22nd of April, 1418.” It established the authority of a general council above that of a pope, and terminated the great schism that had divided the Latin Church for nearly forty years.

CONSTANCE (Germany).—Peace was concluded at this town A.D. 1183, between the emperor Frederick and twenty-four Lombard cities; by which the freedom of the latter was secured. By another treaty signed here in 1474, the contest between Austria and the Swiss was brought to a close. Charles V. issued the ban of the empire against Constance, Oct. 15, 1548; and Ferdinand I. of Austria annexed it to his dominions in the following year. It was transferred to Baden by the 8th article of the treaty of Presburg,

Dec. 26, 1805. In addition to the fifteenth general council (*q. v.*), from 1414-18, councils were held here in 1005, in 1043, in 1094, and in 1153. Its bishopric, transferred from Windich about A.D. 570, was suppressed in 1802.

CONSTANTINA (Africa), the ancient Cirta, was the residence of the kings of the Massylii, and the chief city of Numidia. The Romans, in the time of Julius Cæsar, sent out a colony to this place. The French captured it Oct. 13, 1837; and it is now the capital of the province of Constantina, in their colony of Algiers.

CONSTANTINOPLE, (*Æra of*), was adopted in Constantinople before the middle of the 7th century, and commences with the creation of the world, B.C. 5508, according to this calculation. It is still used by the Greek Church, and the Russians followed it until the time of Peter the Great. The civil year commenced September 1, and the ecclesiastical March 21, and sometimes April 1.

CONSTANTINOPLE (Turkey), the ancient Byzantium, named Constantinople after its founder, Constantine the Great, who fixed the seat of the empire here A.D. 324. The new city, called Second or New Rome, was dedicated May 11, 330. Gibbon (*ch. xvii.*) says, "As often as the birthday of the city returned, the statue of Constantine, framed by his order, of gilt wood, and bearing in its right hand a small image of the genius of the place, was erected in a triumphal car. The guards, carrying white tapers, and clothed in their richest apparel, accompanied the solemn procession as it moved through the Hippodrome. When it was opposite to the throne of the reigning emperor, he rose from his seat, and with grateful reverence adored the memory of his predecessor." The rites of inauguration lasted forty days. The Turks call the city Istambul or Stambul.

A.D.

- 365. Constantinople is seized by Procopius.
- 378. It is threatened by the Goths.
- 381. Nectarius becomes the first patriarch.
- 395. It is again besieged by the Goths, under Alaric.
- 413. Theodosius the Younger surrounds it with walls.
- 441. It is attacked by the Huns.
- 447. The walls are destroyed by an earthquake.
- 465. A fire consumes nearly half the city.
- 507. Anastasius builds the long wall.
- 532. Jan. Great part of the city is destroyed during the Nika sedition, which is quelled by Belisarius.
- 537. Dedication of St. Sophia's.
- 559. Belisarius saves Constantinople from the Bulgarians.
- 616. It is threatened by Chosroes II.
- 626. Heraclius compels the Persians and the Avars to raise the siege.
- 668. Arrival of the Saracens, who lay siege to the city.
- 675. The Saracens raise the siege.
- 695. Revolution at Constantinople, and dethronement of Justinian II.
- 716. It is again besieged by the Saracens.
- 718. The Saracens raise the siege.
- 865. It is unsuccessfully attacked by the Russians.
- 904. Second attack of the Russians.

A.D.

- 941. Third attempted capture by the Russians.
- 1203. July 18. It is taken by the Latins, during the fourth crusade.
- 1204. April 9. It is again taken by the Latins, and abandoned to pillage.
- 1261. July 25. It is recovered by the Greeks under Michael Palæologus, who restores the walls.
- 1422. June 10. It is besieged by the Turks, under Amurath II. Aug. 24. The siege is raised.
- 1453. April 6. It is besieged by Mohammed II. May 29. Mohammed II. effects its capture.
- 1590. An English embassy arrives at Constantinople.
- 1705. Revolt of the Janissaries suppressed.
- 1729. A calamitous fire does considerable injury.
- 1756. A fire consumes 8,000 houses and 200 mosques.
- 1778. Sept. 4. The city is again devastated by fire.
- 1782. It is visited by plague and fire.
- 1808. Nov. 14 and 15. Revolt of the Janissaries, who massacre the regular troops.
- 1821. Massacre of the Christians.
- 1822. March 25. Second massacre of the Christians.
- 1826. June 14 and 15. Insurrection of the Janissaries, who are nearly all put to death.
- 1854. March 12. Signing of the tripartite treaty between England, France, and Turkey.
- 1857. Dec. 5. Signing of the final act settling the Asiatic boundaries between Russia and Turkey.
- 1858. Conference between the representatives of Great Britain, France, Austria, Prussia, Russia, and Turkey, relative to the Montenegrin territory.

PRINCIPAL COUNCILS HELD AT CONSTANTINOPLE.

A.D.

- 336. By the Eusebians in favour of Arius.
- 359. By the Arians.
- 360. By the Arians.
- 381. May to June 30. Second general council, by Theodosius and Damasius, against heretics.
- 382. To reconcile differences in the churches.
- 383. For the reunion of schismatics.
- 394. Sept. 29. To settle a dispute respecting the Arabian bishopric of Bostra.
- 403. In favour of St. John Chrysostom.
- 404. To depose St. John Chrysostom.
- 426. Feb. 28. To ordain Sisinnius.
- 448. Nov. 8-22. By which Eutychus was condemned.
- 449. April 13. To confirm Eutychus's condemnation.
- 450. Aug. Against Eutychus and Nestor.
- 459. Against the Simoniacs.
- 478. To depose Peter the Fuller and others.
- 492. To confirm the Council of Chalcedon.
- 495 or 496. To excommunicate and depose the patriarch Euphemius.
- 516. Against the Council of Chalcedon.
- 518. July 20. In favour of certain exiles.
- 520. Feb. 25. To appoint Epiphanius patriarch.
- 531. To suspend Stephen, bishop of Larissa.
- 532. Between the Catholics and Severians.
- 536. To condemn certain heretic bishops.
- 543. Against Origen.
- 551. To depose Theodore of Cæsarea.
- 553. May 4 to June 2. Fifth general council, against Origen and the three chapters.
- 588. Which tried and acquitted Gregory of Antioch.
- 626. In favour of the Monothelites.
- 638. To confirm the edict of Heraclius in favour of the Monothelites.
- 680-1. Nov. 7 to Sept. 16. Sixth general council, against the Monothelites.
- 691. To consider matters of discipline.
- 712. By the Monothelites, against the council of 680-1.
- 715. Against the Monothelites, in favour of the council of 680-1.

A.D.

- 730. Jan. 7. To depose St. German.
- 754. Feb. 10 to Aug. 8. Against image-worship.
- 786. Aug. 1. Dissolved, in consequence of violent opposition.
- 806. To regulate the consecration of an archimandrite.
- 809. Jan. Which declared the marriage of the emperor Constantine valid.
- 812. Nov. 1. To consider a proposed peace between the Bulgarians and the emperor Michael.
- 814. By Nicephorus, against the Iconoclasts.
- 815. By the Iconoclasts, who depose Nicephorus.
- 821. Wherein the Catholics refuse to confer with the Iconoclasts.
- 829. Against the use of images.
- 842. Feb. 19. Against the Iconoclasts.
- 847. To depose the bishop of Syracuse.
- 858. To reinstate Ignatius in the patriarchy.
- 861. May 25. Which again deposed Ignatius, and decreed in favour of images.
- 867. Nov. 23. Which deposed Photius.
- 869. Oct. 5 to Feb. 28. Eighth general council, which anathematized the heretics.
- 879. Nov. to March 13. Concerning Photius, the Nicene Creed, and the general councils.
- 906. Jan. The patriarch Nicolas is deposed.
- 911. May. Whereby Nicolas is restored.
- 920. July. To heal schism.
- 931. Sept. 2. To receive the abdication of the patriarch Tryphon.
- 963. To confirm the marriage of the emperor Nicephorus Phocas.
- 1027. To consider donations to monasteries.
- 1029. Against the patriarch of Antioch.
- 1054. June. Wherein the papal legates were anathematized.
- 1066. Against incestuous marriages.
- 1067. Against breach of promise of marriage.
- 1110. Against the heresy of the Bogomiles.
- 1140. May. To condemn the books of Constantine Chrysomela.
- 1143. Aug. 20. Against the ordination of two bishops. Oct. 1. Against Niphon, a monk.
- 1144. Feb. 2. Against Niphon.
- 1147. Feb. 26. To depose the patriarch Comas.
- 1157. Jan. 26. On the celebration of divine service.
- 1166. April 11. Concerning marriage, discipline, and certain doctrinal points.
- 1170. To reject a proposal to reunite the two churches.
- 1186. On the irregular election of certain bishops.
- 1222. On the differences between the Greek and Latin bishops of Cyprus.
- 1275. May 26. To elect John Veccus patriarch.
- 1277. April. To make a creed like that of Rome. July 16. To excommunicate those unwilling to reunite the two churches.
- 1280. May 3. On doctrinal matters.
- 1283. Jan. To condemn Veccus. Easter. To condemn the promoters of the proposed union.
- 1285. On doctrinal points.
- 1297. To consider Athanasius's anathema of the emperor.
- 1299. To consider the marriage of Alexis, nephew of the emperor.
- 1341. June 11. On doctrinal points.
- 1345. Against the Palamites.
- 1347. To depose the patriarch John of Apri.
- 1450. Against the reunion of the churches.

CONSTELLATIONS, or groups of stars, are mentioned in the book of Job, written, according to the best authorities, by Moses, B.C. 1520. Arcturus, Orion, and Pleiades, are noticed Job, ix. 9, and again, with the addition of Mazzaroth, ch. xxxviii. 31 & 32.

CONSULS.—On the expulsion of the kings, B.C. 509, two consuls were appointed, as the chief magistrates of the Roman republic. Their tenure of office was for one year only.

Decemvirs were appointed B.C. 451, three military tribunes B.C. 444, and a dictator obtained the chief authority B.C. 391. Although the direction of affairs was occasionally vested either in decemvirs, military tribunes, or a dictator, the consulship was the office generally adopted. After the appointment of an emperor, B.C. 31, it became a nominal dignity, and continued as such, with certain interruptions, until A.D. 642. Milan proclaimed itself a republic, and elected two consuls in 1107, and other Italian cities immediately followed its example. The consulate was established in France by the influence of Bonaparte, Nov. 10, 1799. The new constitution was proclaimed Dec. 24, when three consuls were appointed, the chief authority being vested in one of them, called the First Consul. Napoleon Bonaparte, Cambacérès, and Lebrun, were the consuls named, and Aug. 4, 1802, the former was made first consul for life. The Consulate was, however, superseded by the Empire, May 18, 1804.

CONSULS, as the representatives of the commercial interests of England in foreign countries, were first officially appointed by Richard III. in 1485, when Laurentio Strozzi, of Florence, was by patent of the king made consul and president of the English merchants in Italy.

CONTRACTORS.—By 22 Geo. III. c. 45, s. 1 (1782), government contractors are disqualified from holding a seat in the House of Commons. A similar bill had passed the Commons in 1780, but was rejected by the Lords. The law was extended to Ireland by 41 Geo. III. c. 52, s. 4 (1801).

CONVENTICLES.—This term, derived from the Latin *conventiculum*, an assembly, was, in the early period of Christianity, applied to a church. It was afterwards used to describe the meetings of heretics, and is, in this country, applied to the meeting-places of dissenters from the Established Church. By 35 Eliz. c. 1 (1593), persons attending any assemblies, conventicles, or meetings, under colour or pretence of any exercise of religion, were to be imprisoned until they conformed. If they did not do so in three months, they were to abjure the realm, and if they refused to do so, or returned after abjuration, they were to be hanged. It was enacted by the Conventicle Act (16 Chas. II. c. 4), passed in 1664, that wherever five persons above those of the same household assembled in religious congregation, every one of them was liable to three months' imprisonment, or a fine of five pounds for the first offence: the penalty was doubled for a second, and increased to transportation for seven years, or a fine of £100, for the third. This act was only temporary, and a second Conventicle Act, in which the penalties were modified (22 Chas. II. c. 1), was passed in 1670. It was repealed by the Toleration Act (1 Will. & Mary, c. 18), passed May 24, 1689.

CONVENTION PARLIAMENTS.—This term is applied to two parliaments, called in times of

great emergency, without the usual authority of the king's writ. The first convention parliament, summoned by order of General Monk, met April 25, 1660, and having completed the work of the Restoration, was dissolved by Charles II., Dec. 29 in the same year. The second, convened by William III., then Prince of Orange, met Tuesday, Jan. 22, 1689 (O.S.), and established William and Mary on the throne of England. A bill to convert the convention into a parliament passed through both branches of the legislature, and received the royal assent Feb. 23, 1689. It was dissolved by William III. Feb. 6, 1690.

CONVENTIONS. (See TREATIES.)

CONVENTS. (See ABBEYS, &c.)

CONVICTS. (See TRANSPORTATION.)

CONVOCAION, or a general assembly of the clergy of the kingdom, was summoned by the king's authority, for the purpose of assessing themselves in levies of taxes. The clergy assembled for this purpose in Anglo-Saxon times; but the first attempt to establish a convocation of this character by royal authority, was made by Edward I. in 1294; on Sept. 21 of which year Convocation met at Westminster by his order. The Convocation is divided into an Upper and a Lower House. Richard III., on the petition of both houses of Convocation, relieved them from the jurisdiction of the secular courts, by charter dated Feb. 23, 1484. It was deprived of the power of performing any act whatever without the king's license by 25 Hen. VIII. c. 19 (1534). This act was repealed by 1 & 2 Phil. & Mary, c. 8 (1554), and re-enacted by 1 Eliz. c. 1 (1559). By 16 & 17 Charles II. c. 1 (1665), the clergy, as well as the laity, were bound by the act, which was for the raising of a tax, and were discharged from the payment of subsidies levied in convocation. Its business was confined to the granting of subsidies, except in 1603 and 1640, and ceased to sit for business in 1717, until revived for a formal sitting at the commencement of each session in 1854.

CONVOLVULUS.—The Canary convolvulus was introduced into England A.D. 1690, and the many-flowered convolvulus in 1779. They were both brought from the Canary Isles.

CONVULSIONISTS, or CONVULSIONARIES.—This sect of the Jansenists arose in 1730, and were so called, because they threw themselves upon the ground and went into convulsions. An order for the imprisonment of these fanatics was issued in 1733. The dancers of the 14th century, and the jumpers of the 19th, indulged in similar extravagances.

CONWAY (Caernarvonshire), CONWY, or ABERCONWY.—One of the Welsh princes, founded a Cistercian monastery at Conway A.D. 1185. Edward I. built a castle at this ancient town in 1233, and was besieged here by the Welsh in 1290. Richard II. fled to this place in 1399. It was taken by the Parliamentary army in 1646. The suspension-bridge, commenced by Telford in 1822, was completed by him in 1826.

COOKERY.—When Abraham entertained the three angels, he took a calf, had it dressed, and, with butter and milk, set it before his guests, B.C. 1897 (Gen. xviii. 6-8). Disraeli (*Curiosities of Literature*, vol. ii. p. 246) remarks: "The numerous descriptions of ancient cookery which Athenæus has preserved, indicate an unrivalled dexterity and refinement: and the ancients, indeed, appear to have raised the culinary art into a science, and dignified cooks into professors." Fitzstephen, the monk of Canterbury, who wrote during the reign of Henry II. and died in 1191, in his description of London says: "There is in London upon the river's bank, a public place of cookery, among the wines to be sold in the ships, and in the wine cellars. There every day, ye may call for any dish of meat, roast, fried, or sodden. Fish both small and great; ordinary flesh for the poorer sort, and more dainty for the rich, as venison and fowl." And after some further remarks, adds: "This is the public cookery, and very convenient for the state of a city, and belongs to it. Hence it is, we read in Plato's *Gorgias*, that next to the physician's art is the trade of cooks, the image and flattery of a fourth part of a city." The cooks having formed an ancient brotherhood, were incorporated July 11, 1472, confirmed by Elizabeth, and again by James I., May 19, 1615. "This is the Boke of Cokery" was printed in London in 1500.

COOPER.—The art of the cooper is of great antiquity. The company of Coopers was incorporated A.D. 1501.

COORG (Hindustan), under the government of independent princes A.D. 1583, preserved its freedom till 1779, when Hyder seized Beer Rajindra, the heir, and excluded him from the succession. In 1787, however, he escaped from his prison, and recovered his hereditary possessions. He died in 1808, and bequeathed his dominions to his infant daughter, from whom they were wrested by Linga in 1810. In 1832 hostilities broke out between the rajah and the British government, in consequence of the protection afforded by the latter to some political fugitives, and an army was despatched under Colonel Lindsay, which entered Mercarah, the capital, April 6. The rajah was deposed April 10, 1834. He was dispossessed of all his territories, which were permanently annexed to the British empire in India.

COPENHAGEN (Denmark).—Absolon, bishop of Roskilde, and afterwards archbishop of Lund, erected a castle here A.D. 1168. In 1254, Bishop Erlandsen of Roskilde granted certain rights to the town that had grown up beneath the protection of the castle, and these were extended by King Eric in 1284. In 1443 Copenhagen was made the capital of Denmark. It has suffered greatly from conflagrations, and was almost completely destroyed in 1795. Nelson captured the city April 2, 1801; and it surrendered, after three days' bombardment, Sept. 5, 1807. The

Danish Royal Society was founded in 1742, and the Academy of Arts in 1754. The Casino was built in 1846.

COPERNICAN SYSTEM.—Hallam (Lit. Hist. pt. i. ch. ix.) says, "It appears to have been about 1507 that, after meditating on various schemes besides the Ptolemaic, Copernicus began to adopt and confirm in writing, that of Pythagoras, as alone capable of explaining the planetary motions with that simplicity which gives a presumption of truth in the works of Nature." It was completed in 1530, and published at Nuremberg in 1543. Pope Paul V. condemned it in 1616, but Pius VII. in 1818 repealed the prohibitory edicts against Galileo and the Copernican system. Nicolas Copernicus was born at Thorn, Feb. 19, 1473, and died May 2, 1543.

COPPER.—This metal was known in the earliest times, and is frequently noticed in the Bible. Thus, the fetters with which Samson was bound (B.C. 1117) were in reality of this material (Judges, xvi. 21). Ezekiel (xxvii. 13, B.C. 588) speaks of Tyre as trading in vessels of brass or copper, and Ezra (viii. 27, B.C. 458) speaks of "two vessels of fine copper, precious as gold," which formed part of the treasure of the temple. The origin of the art of smelting and working copper was attributed by the Egyptians to Osiris. Cadmus conveyed it to Greece B.C. 1313. Cyprus and Rhodes were celebrated as early manufactories of copper. It subsequently became one of the most important metals known to the ancients. Copper-mines were worked in England A.D. 1189. They are first mentioned in Sweden in 1396, and in 1399 one was discovered in Shropshire. A mine of pure copper was discovered in Cumberland in 1561; but the art of working the metal made little progress till 1689, when it was carried on with success in Cornwall. It afterwards increased to a prodigious degree, and in 1721 employed 30,000 people. Copper was first used to sheathe ships in 1758, and the demand for it so much increased that its exportation was prohibited in 1780 by 20 Geo. III. c. 59, s. 1. In 1783 all the ships of the royal navy were ordered to be sheathed. The Burra-Burra mines of South Australia, discovered about 1843, are perhaps the richest copper-mines in the world.

COPPER MONEY.—The Romans used copper as a circulating medium prior to the reign of Numa, B.C. 715, but it was not coined, being measured by weight. The square "as" of copper was struck some time before Servius Tullius, B.C. 578, and the circular "as" about B.C. 385. The first Greek copper money was that of Æropus, king of Macedonia, struck B.C. 397. Copper never became a chief medium with the Greeks. Cunobeline, king of Britain, is known to have coined copper about A.D. 40, as pieces still remain bearing his mark. It was made and circulated in Ireland in 1339, in France about 1590, and in Scotland before 1603. Copper tokens were coined in England in

1609, and patented in 1625; but the first real coinage was by Charles II., who failed in an attempt to establish a copper currency in 1665, but succeeded in 1672. In 1722 George I. granted a patent to Mr. Wood to coin copper halfpence and farthings for Ireland; but the measure was very unpopular, and was so vehemently opposed by Dean Swift, who published his Drapier letters in consequence, that it had to be abandoned. The English copper coinage was so defective in 1792, that a large number of tradesmen's tokens were issued; but these were superseded in 1797 by the coinage of 500 tons of copper pence, struck by Mr. Boulton, at Soho. A new bronze coinage was issued in 1860 to supply the deficiency of copper money.

COPPER-PLATE. (See ENGRAVING.)

COPYRIGHT IN BOOKS was established by 8 Anne, c. 19 (1709). From April 10, 1710, it was vested in the author for fourteen years. At the expiration of that term it was renewed for another fourteen years, if the author was then living. The act was extended to the whole of the United Kingdom by 41 Geo. III. c. 107 (July 2, 1801). By 54 Geo. III. c. 156 (July 29, 1814), the copyright was to last for twenty-eight years certain, and for the remainder of the author's life if he outlived that term. By 5 & 6 Vict. c. 45, passed July 1, 1842, the copyright was extended for the duration of the author's life and seven years from the day of his death. In case the seven years expired before the book had been published forty-two years, the copyright was to endure until that period had elapsed. The copyright of works published after the death of the author was also fixed at forty-two years. The privilege was extended to all British colonies.

COPYRIGHT IN DESIGNS for manufactures was fixed at three years by 5 & 6 Vict. c. 100, passed Aug. 10, 1842. It repealed all former acts on the subject, and came into operation Sept. 1, 1842, and was extended to designs not ornamental, but having reference to some purpose of utility, by 6 & 7 Vict. c. 65, passed Aug. 22, 1843. The Board of Trade received authority to extend the copyright in ornamental designs for an additional term not exceeding three years, by 13 & 14 Vict. c. 104, passed Aug. 14, 1850.

CORBACH, (Battle), fought between the French army and the allied English and Germans at this place, in Westphalia, July 10, 1760. The former were victorious. The allied army was saved from a total ruin by a charge of British dragoons.

CORBISDALE (Battle).—The marquis of Montrose was defeated at this place, in Caithness, by the Covenanters, Saturday, April 27, 1650. The marquis, captured a few days after the battle, was put to death with "every circumstance of ignominy and cruelty," May 21.

CORCYRA. (See CORFU.)

CORDELIERS.—This minor order of Franciscan or Grey Friars was founded by St.

Francis d'Assisi in 1223, and was sanctioned by Pope Honorius III. in a bull published Oct. 30 the same year.

CORDELIERS CLUB.—This society of republicans, formed at Paris in December 1790, received this name because their meetings were held in a chapel which had been built by the monastic order of the Cordeliers. Danton was the first president, and amongst the more celebrated members, were Marat, Camille Desmoulins, Fabre d'Eglantine, Robert, and Hébert. The Cordeliers demanded the abolition of royalty in 1791. A most powerful body, assembled at this club, took part in the insurrection of Aug. 10, 1792. They clamoured for the death of the king in 1793, and, in conjunction with the Jacobins, conspired for the overthrow of the Girondists in the same year. It was dissolved in 1794.

CORDOVA (South America), the capital of a province of the same name, a member of the Argentine Confederation, was founded by Jerome Cabrera A.D. 1573.

CORDOVA (Spain), the Corduba of the Romans, was founded by M. Claudius Marcellus, who wintered here B.C. 132. It was nearly destroyed by Cæsar, in consequence of its fidelity to Pompey, and when rebuilt, was peopled by the pauper gentry of Rome. Its erection into a bishopric occurred A.D. 264, and it fell under the Gothic sway in 572. The Moors seized it in 711, and made it the capital of their empire in Spain in 756. The great mosque was begun by Abderahman in 786. A fire which raged here for three days in 917, laid waste much of the city, but it was soon rebuilt more magnificently than ever. Soliman took the town in 1012, after a siege of about three years. In 1091 it fell into the hands of the Almoravides, who retained it till its capture by the Almohades in 1148. St. Ferdinand, king of Castile, took it June 30, 1235, and it has ever since been under Christian domination, although the Moors made a powerful effort to retake it in 1365. The French under General Dupont seized Cordova June 7, 1808, when the city was abandoned to pillage for three days, and the populace cruelly massacred. The town was again plundered in 1836 by the Carlists under Gomez, who took possession Oct. 1, and carried off booty to the amount of £200,000.

CORDWAINERS.—The name by which shoemakers were for some time called in this country. Stow says the term cordwainer or cobbler was not then a name of contempt for a man of less skill in that mystery, or only a mender, but for a maker and seller of that commodity. The cordwainers were incorporated in 1410, confirmed by Mary in 1558, by Elizabeth in 1562, and by James I. They built a new hall, which was opened Tuesday, July 23, 1577. (See SHOEMAKERS.)

COREA (Asia) is said to have been civilized by the Chinese about B.C. 1120. In 1692 A.D. it became subject to Japan; but the Coreans having requested aid from China, the emperor delivered them from Japanese tyranny

in 1698, and substituted his own dominion instead. Corea has since formed part of the Chinese empire.

CORFU (Ionian Sea).—This island, the ancient Corcyra, was colonized by the Corinthians B.C. 734. The first sea-fight on record is said to have taken place between the fleets of Corcyra and of Corinth, B.C. 664. The two states were continually at war. The Corcyreans defeated the Corinthian fleet off Cape Actium B.C. 435. The Spartans captured the island B.C. 303, and the Romans B.C. 229. After passing through various vicissitudes, Corfu was taken by the Venetians A.D. 1386. The Turkish fleet was defeated by the Venetians near Corfu in July, 1716. The Turks returned, and after besieging the town of Corfu for forty-two days, retired Aug. 18, 1717. By the 5th article of the treaty of Campo-Formio, Oct. 17, 1797, the emperor of Germany allowed it to pass to the French. The allied Turkish and Russian forces wrested the island from the French March 3, 1799; and this, with other islands, were formed into the republic of the Ionian Islands. Having again fallen into the hands of the French, they were recovered by the English in 1809, and placed under British protection in 1815. A conference respecting the affairs of Greece was held by the plenipotentiaries of Great Britain, France, and Russia, at Corfu in 1828.

CORINGA (Hindustan).—The English took possession of this place, and established a factory in the neighbourhood, A.D. 1759. Coringa is subject to terrific inundations of the sea. One in May, 1787, swept away all the houses, and destroyed nearly the entire population, besides extending far inland. The total loss of life was estimated at about 15,000 people, besides more than 100,000 head of cattle. A similar catastrophe happened in 1832.

CORINTH (Greece).—Some authors are of opinion that Corinth was originally the seat of a Phœnician colony. According to the traditional account, it was founded B.C. 1520, under the name of Ephyre, which was exchanged for that of Corinth at a subsequent period. Sisyphus seized the place B.C. 1376, erected it into a kingdom, and founded the Isthmian games. The first event in its history that has been ascertained with any degree of accuracy is its conquest by the Dorians, B.C. 1074. Aletes was the first Dorian king, and the dynasty, which lasted 327 years, consisted of twelve monarchs.

B.C.

925. Reign of Bacchis, a descendant of Aletes.

His successors take the name of Bacchidæ.

786. The Corinthians invent triremes.

745. The Corinthians depose their king Telestes, and elect Automenes for prytanis, or annual magistrate. The annual prytanes govern for ninety years.

734. A colony of Corinthians, under Archias, lands in Sicily, and founds Syracuse. Chersicrates founds Corcyra.

664. Corcyra revolts, and defeats the Corinthians in a naval engagement.

B.C.
655. Cypselus expels the Bacchidæ, abolishes the dignity of prytanis, and begins to reign at Corinth.

625. Reign of Periander, who reduces Corcyra to its old obedience, and encourages learning and the arts.

585. Death of Periander, who is succeeded by his nephew Psammeticus.

581. End of the Cypselian dynasty, and establishment of a republic.

457. War with the Athenians, who defeat the Corinthians in the Megarid.

435. The Corcyreans again defeat the Corinthians in some naval engagements, and capture Epidamnus.

395. Corinthian war begins; Corinth, Athens, Argos, Thebes, and Thessaly being opposed to Sparta.

387. Peace of Antalcidas, which puts an end to the Corinthian war.

344. Timophanes attempts to establish a despotism at Corinth; but is defeated, and murdered by his brother Timoleon.

338. Congress at Corinth, which declares war against Persia, and appoints Philip of Macedon the Greek generalissimo. Corinth falls into the power of the Macedonians.

243. Aratus delivers Corinth from the Macedonian sway, and annexes it to the Achæan League.

228. First arrival of Roman ambassadors at Corinth.

223. The Achæans surrender Corinth to Antigonus Doson.

197. Battle of Cynoscephalæ, after which Corinth is declared free, and reunited to the Achæan League.

146. Sack of Corinth by L. Mummius, who slaughters all the male inhabitants; sells the women and children for slaves; conveys the art-treasures of the city to Rome; and, having abandoned it to pillage, destroys it by fire.

44. Corinth is restored by Julius Cæsar.

A.D.
363. The Isthmian games are celebrated under the emperor Julian.

396. It is taken by Alaric.

532. Justinian rebuilds the walls and fortifications.

1146. It is plundered by Roger, king of Sicily.

1205. The Crusaders lay siege to it.

1209. It is besieged by Geoffrey Villehardoin.

1210. It is erected into an archbishopric about this year.

1247. It is taken by William Villehardoin, prince of Achaia.

1358. It is granted to Niccolò Acciaiuoli.

1422. It is ceded to the Venetians.

1453. The Turks seize it.

1687. It is taken by the Venetians.

1714. June 20. Retaken by the Turks.

1822. Oct. 2. The Greeks capture the fortress.

1823. The city is taken by the Greeks, and added to their newly-formed kingdom.

1858. Feb. 21. The town destroyed by an earthquake.

CORINTHIAN ORDER of architecture was invented by Callimachus B.C. 540.

CORINTHIANS (Epistles to the).—Two letters written by St. Paul to the church which he had founded at Corinth during his stay there in 51 and 52. The first epistle was written by St. Paul from Ephesus, in March, 55, and the second from Philippi, about October in the same year.

CORINTHIAN WAR.—Corinth, Athens, Argos, Thessaly, and Thebes, entered into an alliance against the Spartans B.C. 395, and the war was prosecuted with great vigour, until brought to a conclusion by the peace of Antalcidas, B.C. 387. Hostilities were, for

the most part, waged on the territory, or in the vicinity of Corinth. Hence it was called the Corinthian war.

CORIOLO (Italy) was taken from the Latins by the Volscians, from whom it was wrested by the Romans B.C. 493. All traces of the town had disappeared by B.C. 443. The story of Coriolanus in connection with this city is not considered authentic by Niebuhr and others.

CORK (Ireland) is said to owe its origin to St. Barr, who founded a cathedral and monastery here in the beginning of the 7th century. (See **CORK**, SEE OF.) It was laid waste by the Danes A.D. 832. A fire destroyed the greater part of the town in 978, and it was again reduced to ashes during another Danish invasion in 1013. In 1172 it surrendered to Henry II., who established an English garrison; but the Irish besieged it in 1182 and in 1185, and finally effected its capture in 1195. King John granted Cork its first charter in 1185. The Franciscan monastery of Grey Friars was founded in 1214, and that of the Dominicans in 1229. This city was represented in the Irish parliament in 1359. In 1493 the charter was forfeited, in consequence of the favourable reception given to Perkin Warbeck, but it was restored by James I. in 1609. In 1612 and 1622 fires destroyed great part of the city, and a flood swept away some public buildings and bridges in 1633. Cork was besieged in 1642, and in 1643 all its Irish inhabitants were expelled. The parliamentary forces seized it in 1649, and during the Protectorate it suffered much oppression in consequence of its adherence to the royalist cause. James II. landed here in 1689, and in 1690 the forces of William III., under the earl of Marlborough, took the town after a spirited resistance. The North-Gate Bridge over the Lee was erected in 1712. The cathedral was taken down in 1725, in consequence of the injuries it had sustained during Marlborough's siege; but a new one was commenced on the original site in 1735. The Mansion-House was erected in 1767, the library was established in 1792, the house of correction built in 1818, and the city and county court-house was completed in 1835. Riots, caused by scarcity of food, broke out June 10, 1842, and Daniel O'Connell held a monster meeting in the neighbourhood June 8, 1845. Queen Victoria landed here Aug. 3, 1849, and desired that the town should henceforward be called Queen's Town in consequence. In 1850 Cork and Dublin were united by railway, and an industrial exhibition was opened June 10, 1852.

CORK (See of).—This see was founded by St. Barr, or Finnbar, about 606. In 1490 it was united to Cloyne by Pope Innocent VIII., and in 1586, May 17, the see of Ross was also added. Cloyne was separated from Cork and Ross between 1638 and 1660, and in 1678 Cork was again made distinct. The three sees were ordered to be permanently united by act 3 & 4 Will. IV. c. 37, s. 32, passed Aug. 14, 1833, which came into operation at the death of Bishop Brinkley in 1835.

CORK-TREE.—The bark of this tree, a kind

of oak, was used by the Greeks and Romans for various purposes; and amongst others, to make floats to their nets, anchor-buoys, swimming-jackets, and soles for their shoes. Beckmann contends that the Romans also used it to stop vessels of every kind. Cork was first used for this purpose in Europe on the invention of glass bottles, in the 15th century. The cork-tree was introduced into England from the south of Europe A.D. 1699.

CORN.—Jacob sent his ten sons into Egypt to buy corn (Gen. xlii.) during the great famine, about B.C. 1707. According to the Arundelian marbles, Ceres taught the art of sowing corn at Athens B.C. 2409, and sent her son Triptolemus into other cities to inculcate the same art. Corn was regularly distributed to the citizens of Rome, of Constantinople, and other towns, in ancient times. Greece was supplied with corn from the countries bordering on the Black Sea in the time of Xerxes. Corn was imported to Rome from Sicily B.C. 486.

CORN EXCHANGE.—The London Corn Exchange was projected and opened A.D. 1747. Alterations were commenced in 1827, and the new building was opened June 24, 1828.

CORN LAWS.—The exportation of corn from England, except in certain cases, was prohibited by 34 Edw. III. c. 20 (1361). Modifications of the law ensued, and in 1436 exportation was permitted by 15 Hen. VI. c. 2, provided the home price did not exceed 6s. 8d. per quarter. Dealers were first allowed to engross their corn, *i.e.*, to buy in one market with intent to sell at a profit in another, by 15 Chas. II. c. 7 (1663). The importation of corn, unless the price of wheat exceeded 6s. 8d. per quarter, that of rye 4s., and of barley 3s., was prohibited by 3 Edw. IV. c. 2 (1463), the preamble of the statute stating, "Whereas, the labourers and occupiers of husbandry within this realm be daily grievously endangered by bringing of corn out of other lands and parts into this realm, when corn of the growing of this realm is at low price." Further regulations on the subject followed, and the importation of corn was heavily taxed by 22 Chas. II. c. 8 (1670), and also by 1 Will. & Mary, c. 12 (1689), which substituted a bounty for the previous duty on exported corn. The rapid increase of population, however, and the extended commerce and manufactures of the country, demanded alterations in the regulations respecting importation; and at length the act 13 Geo. III. c. 43 (1773) permitted foreign wheat to be imported on payment of a duty of 6d. per quarter, when the home price was not less than 48s. The same statute ordered the bounty on exportation to cease when corn was at or above 44s. These regulations were again modified by 31 Geo. III. c. 4 (1791), which increased the duties on imported corn. Mr. Robinson's act, 55 Geo. III. c. 26 (March 23, 1815), removed all restrictions on foreign corn imported in order to be warehoused, and permitted its importa-

tion for home consumption when at 80s. per quarter. This bill was very unpopular, and occasioned serious riots in London and Westminster, on the 6th, 7th, 8th, and 9th of March. By 3 Geo. IV. c. 60 (July 15, 1822), the importation price was reduced to 70s. per quarter, and for corn from British North America to 59s. per quarter. Mr. Canning's Corn Bill, proposed March 1, 1827, passed the House of Commons, but was rejected by the Lords. The following year the same principles were embodied in 9 Geo. IV. c. 60 (July 15, 1828), which is known as the Sliding Scale, because the duty varied; being 24s. 8d. when the home price was 64s. per quarter, 16s. 8d. when it was 69s., and 1s. when it was at or above 73s. The second Sliding Scale act (5 Vict. c. 14, April 29, 1842) amplified this scale from £1 for under 51s. per quarter to 1s. for 73s. Sir Robert Peel's Corn Importation Bill, 9 & 10 Vict. c. 22 (June 26, 1846), reduced the duty on all corn imported at 53s. per quarter to 4s., until Feb. 1, 1849, when the duty was permanently reduced to 1s. per quarter on all grain imported, whatever the price might be.

CORNWALL (England) is said to have been governed by a prince named Corineus (whence its name) as early as B.C. 1145. Vespasian is supposed to have been its Roman conqueror, about A.D. 41; but little is known of its history till a much later period. Vortigern, earl of Cornwall, became king of Britain in 425, and his earldom formed part of the kingdom till about 460, when the Saxons murdered 300 of the British nobility and compelled the rest to seek retirement in the mountainous wilds of Wales and Cornwall, where they re-established an independent kingdom. Arthur, who began to reign in 517, and ultimately extended his dominions far beyond their original limits, is the most celebrated of the Cornish sovereigns. Cuthred, king of Wessex, annexed a portion of Cornwall to his territories in 753, and in 835 Egbert gained the whole kingdom at the battle of Hengstone Hill. Alfred erected Cornwall into an earldom before 901, and the earls continued in uninterrupted succession from the old British kings of the country till 1066, when William the Conqueror substituted in their place his half-brother Robert. The dignity remained in the royal family till the death of the last earl, Edmund, in 1300, when it reverted to the crown. In 1337 Edward III. created the Black Prince duke of Cornwall, and the title has since formed part of the style of the prince of Wales. In 1497 one Thomas Flamock incited the Cornishmen to rebellion, and led them in arms to Blackheath, where they were defeated by Lord Daubeney, June 22, 1497. In June 1549 the county again rose against the imposition of the Protestant prayer-book, and the rebellion was only quelled at the battle of Sampford Courtenay (*q.v.*). In 1595 the Spaniards made a descent on the Cornish coasts, and committed several depredations.

CORONATION.—Justin II., who succeeded Justinian Nov. 15, 574 A.D., was the first emperor crowned with ceremony by the patriarch of Constantinople. Charlemagne adopted the custom, and was crowned by the pope, at Rome, Dec. 25, 800. Edward, crowned on Whitsunday, 902, is said to have been the first English monarch to adopt the ceremony. The custom for the queen to be crowned originated here before the Conquest. The French queens were for a long time crowned at the abbey of St. Denis, near Paris. Kingston-on-Thames, London, Westminster, and Winchester, were chosen by different English kings, in early times, as the place of coronation. Edward the Confessor, who was crowned at Winchester, formally fixed the monastery founded by him at Westminster as the place for the ceremony.

CORONATION BANQUET.—The feast usually held in Westminster Hall on the day of the coronation, was omitted by William IV. on his coronation, Sept. 8, 1831, and has been since discontinued.

CORONATION OATH.—The oath taken in Sweden before the conversion of the country to Christianity is still extant. It contains the name of Odin, and was accommodated to the Christian faith by Eric A.D. 1156. The Greek emperors in their coronation oath, which consisted of six articles, professed, amongst other things, their acceptance of the Apostles' Creed and of the apostolical traditions, confirmed the rights of the Church, and acknowledged the constitutions of the seven œcumenical councils. The oath of the kings of France was similar to that of Ethelred II., king of England. The oath taken by Ethelred II., who was crowned in 978, is still extant. The next of which a copy exists is the oath taken by Henry I. in 1100, and it agrees exactly with the former. The office used by King Ethelred appears to have been adopted by his successors down to the reign of Edward II., when some slight alterations were made. One of the articles of impeachment against Archbishop Laud was the charge of having altered the coronation oath for Charles I. By 1 Will. & Mary, c. 6 (1689), a new coronation oath was framed, the former oath containing, according to this statute, "doubtful words and expressions with relation to ancient laws and constitutions now unknown." This was altered at the union with Scotland.

CORONATION STONE.—"The legends of the old historians," says Taylor (Glory of Regality, p. 53), "inform us that this is the very stone on which the patriarch Jacob laid his head in the plain of Luz; that it was brought from Egypt into Spain, by Gathelus, the supposed founder of the Scottish nation; that it was thence transported into Ireland, 'amongst other princelie jewells and regall monuments,' by Simon Brech, who was crowned upon it about B.C. 700, and that it was thence carried to Scotland by King Fergus, B.C. 330." The real history is, that it was transferred from Ireland to Scotland at an

early period, and was placed in the abbey church of Scone in 850. The Scottish kings were crowned here until 1296, when Edward I. carried it to England. It was agreed by the treaty of Northampton, in 1328, that the stone should be returned to Scotland, but this was not done. It is fixed in a chair made of oak.

CORONEIA (Greece).—Agesilaus defeated the Thebans and their allies in a plain near this city, B.C. 394. Several battles were fought in the vicinity. (See *CHERONEIA*.)

CORONER.—This office is of very ancient institution, and is said by Ducange to be peculiar to the English. The laws of Malcolm II., who began to reign A.D. 1004, contain many regulations respecting the authority of this officer in Scotland. The lord chief-justice of the Queen's Bench is the chief coroner in the realm; but there are, besides, particular coroners for every county, who were first appointed in 1276 by the statutes of Westminster (4 Edw. I. st. 2). Originally none but knights were permitted to hold the office; but it has gradually become sufficient that a man possess landed property worth £20 per annum. Coroners are chosen for life; but by 25 Geo. II. c. 29, s. 6, passed in 1752, extortion, neglect, or misbehaviour, are made reasons for removal. In case of sickness or other sufficient cause, coroners are allowed to act by deputy by 6 & 7 Vict. c. 83, s. 1, passed Aug. 22, 1843.

CORONET.—The exact period at which coronets were used by the different orders of the nobility is not known. Henry III. granted them to earls, James I. to viscounts, and Charles II. to barons. Dukes and marquises also wear coronets. The coronet was originally a circlet or garland, worn as an ornament. Some authorities say it was not used by knights before the reign of Edward III., and then indiscriminately by princes, dukes, earls, or knights.

CORPORATIONS are of two kinds, aggregate or sole; the first consisting of many persons united together into one society, and kept up by a perpetual succession of members; the second of one person only and his successors. The honour of their invention is attributed to the Romans. (See *MUNICIPAL CORPORATIONS*.)

CORPULENCE.—In Sparta, citizens who grew too fat were soundly whipped. Nauclicis, the son of Polytus, was brought before the Ephori, and his excessive corpulence was exposed to the public. He was, moreover, threatened with perpetual banishment if he failed to reduce his body within reasonable dimensions. Sennertus mentions a man and a woman who weighed respectively 600 and 450 lb. Bright, of Essex, who died in 1750, weighed 588 lb. Daniel Lambert, who died June 21, 1809, weighed, a few days before his death, 52 stone 11 lb., or 739 lb.

CORPUS CHRISTI.—This festival of the Romish church, in favour of the doctrine of transubstantiation and the adoration of the host, was first celebrated at Liege A.D. 1241, by the canons of St. Martin. Urban IV. pub-

lished a bull in favour of it between 1262 and 1264; but it did not become general until the order was repeated by Clement V. in 1311, and it was strictly enjoined by the council of Vienna, the 15th general council, 1311 and 1312. It is celebrated on the Thursday after Trinity Sunday.

CORPUS CHRISTI, or BENEDICT COLLEGE (Cambridge), was founded A.D. 1351, by the brethren of the guilds of Corpus Christi and the Virgin Mary. The old building was replaced by a new one in 1823. The chapel was built by Sir Nicholas Bacon in 1578.

CORPUS CHRISTI COLLEGE (Oxford) was founded by Richard Fox, bishop of Winchester, A.D. 1516. An additional building was erected by Dr. Turner in 1706.

CORRESPONDING SOCIETY.—In 1794 two political societies, established in 1791, attracted considerable attention in England. One of them was styled the Society for Constitutional Information, and the other, the most numerous, the Corresponding Society. The professed object of both was reform in the parliamentary representation of the people; but they cherished designs of a dangerous character. The latter, in particular, denounced the war with France, and corresponded extensively with the leading republicans in France. The London Corresponding Society and four other societies forwarded a sympathetic address to the French National Convention, bearing date Sept. 27, 1792. A proclamation against seditious meetings had been issued May 21, 1792, and in 1794 the secretaries to the two societies, Horne Tooke and others, were arrested as guilty of treasonable practices, and committed to the Tower. The trials came on before a special commission at the Old Bailey, Oct. 25, and having in three cases resulted in an acquittal, the prosecution was abandoned. The London Corresponding Society held open-air meetings near Copenhagen House, Oct. 26, Nov. 13, and in Marylebone Fields Dec. 9, 1795, and again in the fields near Copenhagen House, Nov. 12, 1796. Bills for the safety and preservation of his Majesty's person and government, and to prevent seditious assemblies, were passed late in 1795. The London Corresponding Society called a meeting in a field near St. Pancras, July 28, 1797, when their proceedings were interrupted by the authorities, and several of their leaders kept in custody until they procured bail. The mutiny at the Nore, Sept. 1, 1797, was stirred up by emissaries from these societies. Prompt measures were adopted by the government, and although the London Corresponding Society ceased to exist, its members formed other associations, which continued to create discontent during this critical period.

CORRUPTIBLES and INCORRUPTIBLES.—Two factions into which the Monophysite church at Alexandria was divided. Mosheim gives the following account of their origin. Julian of Halicarnassus, in the year 519, maintained that "the divine nature had so insinuated itself into the body of Christ, from the very moment of conception, as to

change its nature and render it incorruptible." Hence the schism, which lasted many years, and even produced contentions that ended in bloodshed.

CORSICA (Mediterranean Sea).—This island, called by the Greeks Cyrenus, became the seat of a colony of Phœacians B.C. 564. They were expelled by the Tyrrhenians. The Romans attacked the inhabitants B.C. 259, but they were not finally subdued until B.C. 231. The Vandals overran Corsica A.D. 456, and it fell into the power of the Saracens in 852. In 1077 the pope ceded it to the Pisans, and in 1297 it was given to James II., of Aragon, by Boniface VIII. James, however, made no effort to secure it, and it remained in the hands of the Pisans till they were expelled by the Genoese in 1312. The French and Turks made an attempt to conquer the island in 1553, but it was finally secured to the Genoese by the treaty of Cateau-Cambrésis in 1559. A revolt broke out in 1730; and in 1755 General Paoli delivered great part of the country from the Genoese yoke. Finding itself unable to reduce the inhabitants to subjection, the republic of Genoa ceded Corsica to France by the treaty of Compiègne, Aug. 5, 1768. In 1793 Paoli renewed his efforts to liberate his country, and succeeded in delivering it from French domination. The Assembly unanimously voted the union of Corsica to the crown of Great Britain, June 8, 1794. Lord Minto ruled as viceroy till 1796, when it was recaptured by a French force under Gentili. Under the republic, Corsica formed the two departments of Golo and Liamone. In 1811 they were united into one. The British attempted its recapture in 1814. Since the peace of Paris, May 30, the same year, it has remained in undisturbed possession of France.

CORTENUOVA (Battle).—Fought between the emperor Frederick II. and the Lombard League, at this place, near Milan, Nov. 27, 1237. The conflict was sustained with great vigour, but the Italians were at length defeated.

CORTES.—The name given to the national assembly in Spain and in Portugal. The commons were admitted by representation in the Cortes of Aragon A.D. 1133, and in the Cortes of Castile in 1169, or, according to some authorities, in 1160. The convocation of the states in Aragon was made annual, instead of biennial, in 1307. About ninety towns sent 192 representatives to the Cortes of Burgos in 1315; and fifty towns sent 126 to the Cortes of Madrid in 1391. The Spanish Cortes assembled at Cadiz in 1810, after a long interval, and opened Sept. 24. They drew up a constitution, which was finally accepted March 19, 1812. Ferdinand VII. suppressed the Cortes in May, 1814, but restored them, and took the oath of allegiance to the constitution of 1812, March 8, 1820. They were again suppressed Oct. 1, 1823, and a decree was issued for their restoration April 13, 1834, and they reassembled July 24, in the same year.

CORTICELLA (Battle).—The tyrant Ecezio defeated the papal forces at this place, in Italy, Aug. 30, 1253.

CORTONA (Italy), the Corythus of Virgil (*Æn.* iii. 167; vii. 206), is supposed to have been founded by the Umbrians, from whom it was wrested by the Pelasgians. Situated on a lofty hill between Arretium and Clusium, in an almost impregnable position, it was one of the most important cities of Etruria, and formed one of the twelve of the Etruscan confederation. It afterwards fell under the power of the Romans, but the exact period when this happened has not been ascertained. The modern Cortona was one of the earliest bishoprics of the Christian church. The bishop of Arezzo claimed spiritual jurisdiction over it in the 13th century. This led to a war, and Cortona was taken and its castle destroyed A.D. 1258. It was sold to the Florentines in 1411, and has since remained in their possession. The *Academia Etrusca*, in this city, was established in 1726.

CORUNDUM.—The identity of this mineral, long known under the name of adamantine spar, with the sapphire, pointed out by Pelletier and De Lametherie in 1787, was confirmed in an account read before the Royal Society of London, by Mr. Greville, June 7, 1798.

CORUNNA (Battle).—Soult having followed the British in their retreat from Spain, came up with them near this seaport town, on the night of the 13th of January, 1809. The English general, Sir John Moore, made preparations for the embarkation of the troops; but the transports had not arrived, and he was compelled to give battle. The action commenced at two in the afternoon of the 16th, and though the English were at first repulsed, by dint of great exertion, they defeated their opponents. Sir John Moore fell in the hour of victory; and Sir John Hope, on whom the command had devolved, succeeded in embarking the army during the night. The French army amounted to 20,000 and the English to about 14,000 men. The loss of the former was 2,000, and that of the latter nearly 1,000 in killed and wounded. Corunna is called by English sailors "The Groyne."

CORVÉE, or forced labour.—Turgot issued a decree for the abolition of the system in France in 1775; but it was not carried out. It was, however, abolished in 1789. Baron Stern abolished it in Prussia in October, 1807.

CORWEN (Battles).—Henry II. was defeated near this town, in Wales, by Owen Gwynneth, A.D. 1165. Henry IV. sustained a reverse in the same locality from Glendower, in 1402.

CORYGAUM (Battle).—A force consisting of 500 native infantry, 26 European artillerymen, and a small number of auxiliary horse, was assailed at this village, in Hindostan, Jan. 1, 1818, by the Peishwa, with an overwhelming force. The former maintained its ground, and the Peishwa made a precipitate retreat.

Cos (Archipelago), the capital of a small island of the same name, was destroyed by an earthquake, during the Peloponnesian war, B.C. 431–404. The island belongs to Turkey, and is now called Stanko, or Stanchio.

COSA, or **COSSA** (Italy).—This city of Etruria, received a Roman colony B.C. 273.

COSENZA (Italy).—The ancient Consentia, the chief city of the Brutii. Alaric died in this city A.D. 410. The course of the Busento, a small river that washes its walls, was diverted, and in its bed, the body of the hero, with the spoils and trophies of Rome, was interred, when the waters were restored to their natural channel. Consentia was destroyed by the Saracens in 988. It is the seat of an archbishopric.

COSSACKS.—The origin of the Cossacks has occasioned much controversy. The generally received opinion is, that they are a native Russian race, intermixed with Calmucks and Tartars. They are divided into two principal classes, the Cossacks of the Don and the Cossacks of Little Russia. The latter are first mentioned in the 14th century, during the Polish invasion of Russia. They were not known by the name of Cossacks until 1516. Stephen Bathon, king of Poland, formed them into regiments, under the control of a hetman, or headman, in 1592. They placed themselves under the protection of Russia in 1654, and revolted in 1708. The Cossacks of the Don entered the service of Russia in the 16th century. Tscherkask, their capital, destroyed by fire in 1744, was rebuilt in 1805.

COSSIMBAZAR (Hindustan).—The East-India Company established a factory here A.D. 1706. Surajah Dowlah seized it in June, 1756.

COSSOVA (Battles).—The sultan Amurath defeated a combined army of Albanians, Dalmatians, Hungarians, and Wallachians, on the plains of Cossova, in Servia, in Sept. 1389. A Servian soldier, lying wounded on the field of battle, stabbed Amurath in the belly, and the wound proved mortal. Amurath II., one of his successors, defeated John Corvinus Huniades at the same place in 1448. The Turkish army amounted to more than 100,000, whilst Huniades could only muster 24,000 men.

COSTA RICA (South America) formed part of the kingdom of Guatemala, until the declaration of independence by the Spanish colonies in South America, A.D. 1821, when it was united to the Mexican kingdom of Iturbide. It formed one of the Central American Confederacy in 1823, and, on the dissolution of that confederacy, became an independent republic. A commercial treaty between England and Costa Rica was signed at San José Nov. 27, 1849, and ratifications were exchanged in London Feb. 20, 1850. It consists of sixteen articles. The rich gold-mines in the forest of Aguacate were first worked in 1821.

COSTROMA (Russia), the capital of a province of the same name, was founded A.D.

1152. The monastery of Ipatskoi, from which the founder of the Romanoff dynasty emerged in 1613, was established in 1330. Costroma is the seat of a bishopric.

COSTUME. (*See DRESS.*)

COTTAGE.—By 31 Eliz. c. 7, passed in 1589, no cottage was to be erected unless four acres of land were attached to it, and only one family was allowed to inhabit it. The act did not apply to towns or to places on the coast; nor did it interfere with the erection of cottages for miners, or keepers in parks, forests, &c. It was repealed by 15 Geo. III. c. 32, passed in 1775.

COTTON.—This useful material is obtained from the cotton-plant, which Linnæus subdivided into five species. It has been grown in India from time immemorial, and is mentioned in the annals of Egypt.

A.D.

1252. Cotton goods made in Persia.

1253. Flemish weavers make linen in England.

1328. A species of woollen goods, called "Manchester cottons," made at Manchester by Flemish emigrants.

1368. Cotton manufactured in China.

1390. Cotton (woollen) first made at Kendal.

1497. First European manufacture of cotton goods attempted in Spain and Italy.

1590. Cotton cloth brought to London from Guinea.

1634. Linen trade commenced in Ireland.

1650. Very fine calicoes made, at Calicut, in India.

1756. Cotton velvets first made in England.

(*See COTTON TRADE and MANUFACTURE.*)

COTTONIAN LIBRARY.—This collection was formed by Sir Robert Bruce Cotton, who was born Jan. 22, 1570, and who died May 6, 1631. It was largely augmented by his son and grandson. In 1700 an act of parliament was passed for the better securing and preserving this library in the name and family of the Cottons, for the benefit of the public. The house was purchased for £4,500 in 1706. In 1730 the library was removed to Ashburnham House, Westminster, and Oct. 23, 1731, it suffered greatly from a fire that broke out in the building. In 1757 the Cottonian library, with other collections, formed the commencement of the British Museum. The number of manuscript volumes contained in the library before the fire was 958. Of these 114 were either destroyed or rendered useless, and 98 damaged.

COTTON TRADE and MANUFACTURE.—The first mention of the cotton trade of Great Britain occurs in Lewis Roberts' "Treasury of Traffic," published A.D. 1641, where Manchester is named as receiving cotton-wool from Smyrna and Cyprus, and manufacturing it into "fustians, vermillions, dimities, and other such stuffes." In 1660 all colonial cotton was ordered to be sent to England for manufacture, and in 1760 the annual value of the trade was only estimated at £200,000. A machine for spinning by rollers was patented by Messrs. Wyatt and Paul as early as 1738; but the inventors were unable to render it of practical utility, and it was

subsequently abandoned. The first great improvement in the manufacture was Hargreave's invention of the spinning-jenny, which was perfected in 1767. Sir Richard Arkwright's spinning-frame, patented in 1769 and improved and again patented in 1775, completely superseded the laborious process of spinning by hand. The mule-jenny was invented by Samuel Crompton in 1775, and was immediately substituted for the previous machine of Hargreave. The expiration of Arkwright's patent in 1785 gave new impetus to the ingenuity of inventors, and the power-loom, which was patented by the Rev. Mr. Cartwright in 1787, wonderfully increased the rate of manufacture. Importation of the raw material from America commenced in 1791, when 189,316 lb. were received. The invention of Eli Whitney's machine for separating the wool from the seed, which was completed in 1793, added so much to the facility of transportation, that in 1794 the amount received was 1,601,760 lb. The total amount exported from the United States since the beginning of the trade amounted, in 1858, to 1,118,624,012 lb. In 1857 the total value of the cotton goods exported from Great Britain amounted to £39,113,409, and the quantity of raw material consumed to 786,000,000 lb.

COUNCIL, or SYNOD.—The chief authorities of the Church assembled in the 2nd century, in council or synod, to regulate ecclesiastical affairs. The council of Pergamus, in Asia, A.D. 152, is the first on record. (*See GENERAL COUNCILS.*)

COUNCILS, in which persons assembled to deliberate on public affairs, existed in very early times. The Roman *concilium* was an assembly of the people from which the patricians were excluded. (*See PRIVY COUNCIL, TOWN COUNCIL, &c.*)

COUNT.—This title, under its Latin equivalent *comes*, dates from the reign of the emperor Augustus, who conferred it upon the senators who surrounded him most nearly. It was used in Spain about A.D. 650, and for a long period seems to have been of equal dignity with that of duke, no distinction being made till 1297. During the Norman period in England, count and earl were titles of equal rank.

COUNTIES, or SHIRES.—Hume states that Alfred (A.D. 871-901) divided all England into counties. The system certainly did not originate with him, as the shire-man is mentioned in the laws of King Ina, who died in 727. Knights of the shire were first summoned to parliament in 1258.

COUNTY-COURTS.—These useful tribunals for the recovery of debts under £20 were established by 9 & 10 Vict. c. 95 (Aug. 26, 1846), being "An act for the more easy recovery of small debts and demands in England." This act was amended by 12 & 13 Vict. c. 101 (Aug. 1, 1849), and the jurisdiction of the county-courts was extended to suits for sums not exceeding £50 in amount by 13 & 14 Vict. c. 61 (Aug. 14, 1850). Some amendments were

made in certain details relating to these courts by 15 & 16 Vict. c. 54 (June 30, 1852), by 17 Vict. c. 16 (June 2, 1854), by 19 & 20 Vict. c. 108 (July 29, 1856), and by 20 & 21 Vict. c. 77 (Aug. 25, 1857). By 22 & 23 Vict. c. 57 (Aug. 13, 1859), the power of committal vested in the county-court judges by 9 & 10 Vict. c. 95, ss. 98, 99, 100 (Aug. 26, 1846), was only to be exercised in cases in which credit had been obtained by fraud or breach of trust. England and Wales, exclusive of London, were divided into sixty districts, to be enlarged or diminished by the sovereign in council; and the courts are held in the most important towns in each district, once in every calendar month. For particulars respecting the county-courts that existed in the Saxon period of English history, see SCHYREMOTES.

COURIERS.—Xenophon says they were first employed by Cyrus. Herodotus (viii. 98) speaks of the Persian couriers, who travelled with great rapidity. They were stationed on the road, one man and one horse to each day's journey; and by these messengers Xerxes sent the news of his defeat to Persia, B.C. 480. Gibbon bears testimony to the rapidity with which communication was carried on in the Roman empire by the regular institution of posts. "Houses," he says (ch. ii.), "were everywhere erected at the distance only of five or six miles; each of them was constantly provided with forty horses; and by the help of these relays it was easy to travel an hundred miles in a day along the Roman roads." The couriers could, therefore, travel at great speed. Prescott speaks of the Mexican couriers, who travelled with incredible swiftness. The Peruvian chasquis, or runners, carried government despatches at the rate of 150 miles a day. Prescott says it is remarkable that this important institution should have been known to both the Mexicans and the Peruvians, without any correspondence with one another, and that it should have been found among two barbarian nations of the New World, long before it was introduced among the civilized nations of Europe.

COURLAND (Russia).—This province, composed of the old duchies of Courland and Semigallia, the bishopric of Piltan, and Polangen, a district of Samogitra, was annexed to Russia A.D. 1795. Courland was conquered by the Danes in 1218, and by the knights of the Teutonic order in 1239. In 1561 it was rendered tributary to the king of Poland, who erected it into a duchy, and invested the grand master of the order with the title of duke. Till 1737 Courland was governed by hereditary dukes; but it was then agreed that the dignity should become elective. Numerous complications resulted; Russian troops occupied the duchy in 1786, and the inhabitants ultimately petitioned the empress Catherine to unite their country to the Russian empire, which was accomplished March 18, 1795. Alexander liberated the serfs of Courland Sept. 24, 1818.

COURT BARON.—The court of civil jurisdiction within a manor was anciently held once every three weeks, its chief business being the settlement of questions relative to the right of lands within the manor. By 20 Geo. II. c. 43 (1747), its jurisdiction was limited to the right of recovery of rent, &c., and of deciding civil questions in which the damage did not exceed forty shillings. Its operation was still further restricted by 3 & 4 Will. IV. c. 27, s. 36 (July 24, 1833), and it has now fallen into disuse, in consequence of the permission granted to lords of manors by 9 & 10 Vict. c. 95, s. 14 (Aug. 28, 1846), to surrender their right of holding these courts to the crown. It also had jurisdiction in criminal matters, and this, by 20 Geo. II. c. 43 (1747), was limited to assaults, batteries, and smaller offences, for which a fine of not more than twenty shillings, and in default of payment one month's imprisonment, might be inflicted.

COURT-LEET AND VIEW OF FRANK-PLEDGE.—This court of record was established in the Anglo-Saxon period of our history, and it dealt with all crimes punished by the common law. Its original intent was to view the frank pledges, i.e., the freemen within the liberty, who, according to the institution of King Alfred, were all mutually pledged for the good behaviour of each other. By 52 Hen. III. c. 10 (1267), prelates, peers, and clergymen were exempted from attendance at this court. A portion of the business of the court was transferred to Quarter Sessions by 1 Edw. IV. c. 2 (1461), and this statute materially reduced its functions.

COURT-MARTIAL.—During the Tudor supremacy, military causes were decided by courts of war, held at stated periods, under the presidency of the marshal of England. Courts-martial, as now constituted, were distinguished into general and regimental in 1686, and their power regulated by the Mutiny Act, 2 Will. III. c. 6 (1690). Naval courts-martial are regulated by 22 Geo. II. c. 33 (1749).

COURT OF REQUESTS. (See CONSCIENCE, COURTS OF.)

COURTRAY (Belgium) was a municipal city in the 7th century. The fortifications were built A.D. 1290, the castle in 1385, and the citadel in 1647. The battle of the Spurs, in which the French army, amounting to 47,000 men, was defeated by 20,000 Flemings, was fought near this place July 11, 1302. Courtray was captured by the French in 1643, 1646, 1667, 1683, and May 17, 1744. They obtained possession of it again towards the end of June, 1792, but were compelled to evacuate it on the 30th. General Beaulieu completely routed the French near this city in 1793. The church of Notre Dame was founded in 1238, and the Town-hall in 1526. The first cloth manufacture in Flanders was commenced at Courtray in 1260.

COURTS for the administration of justice are referred to in Exodus. xviii. 25 & 26, in which the measures adopted by Moses about

B.C. 1491, for the judicial government of the Israelites, are described. The ancient Hebrews had two kinds of courts,—the great Sanhedrim, or great Consistory, and the Council, or Lesser Court. The court of the Areopagus is said to have been established at Athens B.C. 1506. The Cretan courts of justice attributed to Minos, were celebrated. Suits in courts in this country were first regulated by the provisions of 43 Hen. III. (1259). The Irish law-courts were confirmed in their independent rights by 23 Geo. III. c. 28 (1783).

COUTRAS (Battle).—During the war of the three Henries in France, the Roman Catholic army, led by the duke of Joyeuse, was defeated and almost annihilated near Coutras, in Perigord, Oct. 20, 1587, by the Huguenot forces, led by Henry of Navarre.

COVELONG (Hindustan).—This fortified town was taken by stratagem by the French A.D. 1750. Clive besieged and captured it in September, 1752, when the fortifications were destroyed.

COVENANTERS.—The Covenant, professing to be based upon a document which James VI. of Scotland had signed in 1580, was drawn up and published by the Four Tables in Edinburgh, March 1, 1638. Of the Four Tables, as they were called, one consisted of the nobility, another of gentry, another of ministers, and another of burgesses; and in their hands the whole authority of the kingdom was vested. They elected a general assembly, which met at Glasgow Nov. 21, 1638, and abolished episcopacy; ordering that every person should sign the Covenant on pain of excommunication. The Covenanters prepared for war, and though a treaty of peace was concluded June 18, 1639, they entered England Aug. 20, 1640. An agreement was signed at Ripon, Oct. 26, 1640, by which commissioners were to be appointed, to whom the settlement of the points in dispute were referred. This covenant, under the name of the Solemn League and Covenant, was received by the parliament at the assembly of divines, Sept. 25, 1643. It differed essentially from the Covenant of 1638, and according to Hallam (Eng. ch. x. pt. 1), "consisted in an oath to be subscribed by all sorts of persons in both kingdoms, whereby they bound themselves to preserve the reformed religion in the Church of Scotland, in doctrine, worship, discipline, and government, according to the word of God and practice of the best reformed churches; and to endeavour to bring the churches of God in the three kingdoms to the nearest conjunction and uniformity in religion, confession of faith, form of church-government, directory for worship, and catechizing; to endeavour, without respect of persons, the extirpation of popery, prelacy (that is, church-government by archbishops, bishops, their chancellors, and commissaries, deans and chapters, archdeacons, and all other ecclesiastical officers depending on that hierarchy), and whatsoever should be found contrary to sound doctrine and the power of godliness;

to preserve the rights and privileges of the parliaments, and the liberties of the kingdoms, and the king's person and authority, in the preservation and defence of the true religion and liberties of the kingdoms; to endeavour the discovery of incendiaries and malignants, who hinder the reformation of religion, and divide the king from his people, that they may be brought to punishment; finally, to assist and defend all such as should enter into this covenant and not suffer themselves to be withdrawn from it, whether to revolt to the opposite party, or to give in to a detestable indifference or neutrality." This document was signed by members of both houses, and by civil and military officers. A large number of the benefited clergy, who refused to subscribe, were ejected. Charles II. gave an unwilling assent to it Aug. 16, 1650. A majority in the House of Commons ordered it to be burned by the common hangman, May 17, 1661. In the same year the Scottish parliament renounced the Covenant, and declared the king supreme. Heavy fines were imposed on many of the Covenanters.

COVENT GARDEN, originally called Convent Garden, because it occupied the site of the garden and fields of a large convent or monastery. It was, with the lands, granted by Edward VI. to the duke of Somerset, and after his attainder was granted to John, earl of Bedford, by patent dated May, 1552. The square was formed about 1634 or 1635, from designs by Inigo Jones, and the church of St. Paul's was erected by the same architect about 1632. Covent Garden was made a parish by an ordinance of Lords and Commons, Jan. 7, 1645; and the bounds of the parish were more clearly defined in 1660. Covent-Garden Market, which originated about 1656, at first consisted of a few temporary sheds. In 1671 Charles II. made a grant of it to William, earl of Bedford, and from that time it gradually increased in importance. The present building was erected by Mr. Fowler in 1830.

COVENT-GARDEN THEATRE was opened by John Rich, the harlequin, Dec. 7, 1732; rebuilt by Henry Holland, 1792; and destroyed by fire Sept. 20, 1808. The first stone of the second theatre was laid by the prince of Wales Dec. 31, 1808, and the building, designed by Sir Robert Smirke, opened at increased prices Sept. 8, 1809. A riot ensued, known as the "Old Prices," or "O. P." riot, which lasted sixty-seven nights, and terminated in a compromise. During the years 1843-45, this theatre was leased by the members of the Anti-Corn-Law League, and used for public meetings. After having been altered and decorated by Mr. Albano, it was opened for Italian opera, April 6, 1847. This theatre was again burnt down March 5, 1856, during a *bal masqué*. The present magnificent edifice, from the designs of Mr. E. M. Barry, was opened May 22, 1858.

COVENTRY (Warwickshire).—Canute founded a nunnery here, which was burnt by the traitor Edric A.D. 1016. Leofric, earl of

Mercia, who died in 1057, founded a monastery on the ruins of the old nunnery, and granted the town a charter of immunity from taxation, at the intercession of his wife Godiva. Edward III. granted a charter of incorporation in 1344, and in 1355 the city was surrounded by walls. In 1404, Henry IV. held here the *Parliamentum Indoctorum*, or Parliament of Dunces, so called because lawyers were excluded from it. Henry VI. erected it into a separate county in 1451; and in 1459 a second parliament was held, which received the epithet of *Parliamentum Diabolicum*, because it passed attainders against the duke of York and his chief supporters. In 1607 an inundation destroyed 257 houses, and in 1641 Charles I. made an unsuccessful attempt to take the city by storm. The walls were destroyed in 1662 by order of Charles II. The manufacture of silks and ribbons was introduced in 1685, and soon became the chief employment of the inhabitants. In consequence of the commercial treaty with France, concluded at Paris Jan. 25, 1860, the Coventry weavers were thrown out of employment, and reduced to great distress. Efforts to relieve them were made in the early part of 1861; and the proceeds of several musical performances, held in the more important English towns, were devoted to this object.

COVENTRY ACT.—Sir John Coventry, K.B. and M.P., was attacked in the streets of London, had his nose slit, and was otherwise maimed, Dec. 21, 1670, by Sir Thomas Sandys and other members of the royal guard. The attack was provoked by some remarks made by Sir John Coventry on the life led by Charles II., and is said to have been instigated by the duke of Monmouth. In consequence of this outrage, malicious wounding and maiming was made a capital offence by 22 & 23 Chas. II. c. 1, passed March 6, 1671, and the measure received the name of the Coventry Act. It was repealed by 9 Geo. IV. c. 31, s. 1, passed June 27, 1828.

COVERIPAUK (Battle).—Clive defeated the French at this town, near Arcot, in the Carnatic, March 3, 1752.

CRACOW (Poland), the ancient capital of the country, was founded by Cracus, about A.D. 700. In 1146 it was taken by the rebellious subjects of Uladislas II., and in 1189 was the scene of a council for the reform of the clergy. The Mongols ravaged it about 1240. It was besieged in 1279 by the discontented nobles of Lesko the Black, but opposed a gallant and successful resistance. The university was founded in 1364 by Casimir III., and enlarged in 1401 by Ladislas Jagellon. In 1655 the city was taken by the Swedes under Charles Gustavus, and again in 1702 by Charles XII. Kosciusko delivered it from the Russians March 24, 1794, but it was seized by the Prussians June 15; and at the final partition of Poland, in 1795, was allotted to Austria. In 1809 it formed part of the duchy of Warsaw, but according to the provisions of the congress

of Vienna, subsequently became a republic under the protection of Russia, Austria, and Prussia, June 20, 1815. In Sept. 1831, it was occupied by 10,000 Russians; and on Nov. 16, 1846, was seized by the emperor of Austria, to whom it has ever since belonged. A fire which broke out at noon, July 18, 1850, laid a large portion of the city in ruins.

CRANGANORE (Hindustan).—According to a Jewish tradition, the descendants of those Jews who escaped, on the destruction of Jerusalem, obtained permission from the native sovereign to settle at this seaport, on the coast of Malabar, about A.D. 490. The Portuguese captured it in 1505, and the Dutch wrested it from them in 1663, and erected fortifications. Hyder obtained possession in 1780; but the Dutch recovered the place, which they sold to the rajah of Travancore, an ally of the British government, in 1788. Tippoo having failed in an attempt to capture it, Dec. 29, 1789, was more successful in 1790, and the town fell on the 8th of May. The East-India Company's forces recovered it in 1791, and it was ceded to them by the treaty of peace, of which the preliminaries were signed Feb. 24, 1792, and the treaty itself March 17.

CRANIOLOGY. (See PHRENOLOGY.)

CRANON (Battle).—The confederated Greeks were defeated by the Macedonians at Cranon during the Lamian war, B.C. 322.

CRAON (Battle).—An army of French, German, and English troops, commanded by the duke of Montpensier, was defeated near this city, in Anjou, in 1592, by the duke of Mercœur at the head of the Spanish troops and those of the League.

CRAONNE (Battle).—A great battle was fought at this place, near Laon, in France, March 7, 1814, between the French under Ney and Victor, and the Prussians and Russians led by Blücher and Woronzoff. The former had 23,000, and the latter 21,000 men engaged; but the strength of the position counterbalanced this numerical superiority. The French retained possession of the field of battle. There were, however, no trophies, and the losses on both sides were severe.

CRAVANT (Battle).—The earl of Salisbury defeated the allied French and Scottish army at this place, near Auxerre, in Burgundy, July, 1423.

CRAYFORD (Battle).—Hengist defeated the Britons, led by Vortimer, near this place, in Kent, at that time called Creceanford, A.D. 457.

CRAYONS of various colours were used in France early in the 15th century. Conté crayons were invented in France in 1795, and named after their inventor, Conté.

CREATION OF THE WORLD.—The learned Dr. Hales, in his great work entitled "A New Analysis of Chronology and Geography, History and Prophecy" (vol. i. p. 210), remarks: "In every system of historical chronology, sacred and profane, the two grand *æras*, of the *Creation of the World*, and of the *Nativity of Christ*, have been

usually adopted as standards, by reference to which all subordinate epochs, æras, and periods have been adjusted." This author gives a list of 120 dates, commencing B.C. 6984, and terminating B.C. 3616, to which this event has been assigned by different authorities, and he admits that it might be swelled to 300. Dr. Hales places it at B.C. 5411. The date commonly adopted is B.C. 4004; being that of Usher, Spanheim, Calmet, Blair, &c., and the one used in the English Bible. The following are some of the principal variations :—

CRECY (Battle).—Edward III. landed at La Hogue, July 10, 1346, and ravaged the country on the left bank of the Seine, as far as Paris. On his return he halted at Crecy, a village near Abbeville, Aug. 25. King Philip of France, who followed with an immense army, came up with the English at this place, and the battle commenced about four in the afternoon of Saturday, Aug. 26. The French army amounted to 130,000, whilst Edward III. could only muster 36,800 men. The king divided this small force into three lines. The first was commanded by the prince of Wales, the Black Prince, who distinguished himself greatly in that well-fought field, and the second by the earl of Arundel. Edward himself led the third. After a severe struggle, the French were completely routed. They lost 30,000 of their infantry, 4,000 men-at-arms, 1,400 gentlemen, 1,200 knights, and several nobles; whilst the kings of Bohemia and Majorca were slain in that fatal fray. The English loss did not

amount to a hundred of all ranks. Hallam attributes the result to "the yeomen, who drew the bow with strong and steady arms, accustomed to use it in their native fields, and rendered fearless by personal competence and civil freedom." Some continental writers attribute this extraordinary victory to the effect of cannon, which they pretend was used by the English for the first time on this occasion. The statement is not supported by satisfactory evidence.

CREDIT MOBILIER.—This company was created by a decree Nov. 18, 1852. Its head quarters are in Paris, and its operations consist in the undertaking or origination of public enterprises, such as railroads, canals, and mines. It is constituted on the limited liability principle.

CREDITON (Devonshire).—Winfred suffered martyrdom here June 5, 354 A.D. A collegiate church was founded at this town in 905. In 909 it became the seat of a bishopric, which was removed to Exeter in 1050. Crediton has frequently suffered from extensive conflagrations, and in 1743 the greater part of the town was destroyed.

CREEDS, as the standard and rule of faith, existed in the Primitive church. Bingham (Antiq. b. xvi. ch. 1, s. 1) says, "For as to fundamental articles of faith, the Church had then always collected or summed up out of Scripture in her creeds, the profession of which was ever esteemed both necessary on the one hand and sufficient on the other, in order to the admission of members into the Church by baptism; and consequently both necessary and sufficient to keep men in the unity of the Church, so far as concerns the unity of faith generally required of all Christians to make them one body and one Church of believers." The Apostles', the Nicene, and the Athanasian, the most ancient creeds extant, are described under their respective heads. The Augsburg Confession was drawn up in 1530, and modified in 1579. Forty-two articles of the Church of England, afterwards reduced to thirty-nine, were drawn up in 1551. The creed of Pope Pius IV. was promulgated in 1564. Mogila, metropolitan of Kiow, drew up the creed for the Russian branch of the Greek church in 1642. The Confession of the Westminster Assembly, passed in 1643, was ratified by act of parliament in 1690.

CREMA (Italy).—The emperor Frederick I. captured this town A.D. 1160, and having permitted the inhabitants to withdraw, abandoned it to the flames. The town was much injured from the explosion of a powder-magazine and a fire that followed, April 13, 1768. In 1797 the inhabitants were incited by French emissaries to throw off the yoke of Venice, and declare in favour of the Cispadane republic; and it was made part of the Cisalpine republic by the treaty of Campo-Formio, Oct. 17, 1797.

CREMERA (Italy).—On the banks of this small river, which flowed into the Tiber near Rome, the 300 Fabii established a fortified post, and carried on hostilities against the

Veientes. They were surprised July 16, B.C. 477, and not one of the band escaped.

CREMONA (Italy), the capital of a province of the same name, was the seat of a Roman colony B.C. 221. The Gauls were defeated in a great battle under its walls B.C. 200, and it received a new colony B.C. 190. Cremona suffered during the civil wars. The vanquished legions of Vitellius, after his defeat by the generals of Vespasian, A.D. 69, having taken refuge here, carried the city by assault. It was given up to pillage, and completely destroyed. Though rebuilt by Vespasian, it did not recover its former prosperity, and was again destroyed by the Lombards A.D. 605. The inhabitants erected their city into a republic in 1107. It joined the Lombard League in 1176. The emperor Henry VII. imprisoned many of the inhabitants, abolished their privileges, and destroyed the ramparts of the city, in 1311. After this time it passed through the hands of several masters, and was ceded to Venice in 1428. Louis XII. took it in 1499, and bestowed it upon the Swiss, in return for their alliance. He obtained possession of it in 1509, and the inhabitants threw off the French yoke in 1512. The Venetians recovered it for France in 1515. It shared the varied fortunes of the Italian cities, submitted to Bonaparte in 1796, and its incorporation with the Cisalpine republic was recognized by the emperor Francis II. in the treaty of Campo-Formio, Oct. 17, 1797. It was recovered by the allies in 1799, but the French regained possession in 1800. It was ceded to Austria at the settlement of Europe in 1814-15, and remained in its possession, with the exception of a short interval in 1848-49, until it was incorporated with Sardinia by the treaty of Zurich, Nov. 10, 1859. Cremona is the seat of a bishopric.

CRESCENT.—Gideon took from Zebah and Zalmunna, kings of Midian, B.C. 1245, "ornaments like the moon," that hung on their camels' necks (Judges, viii. 21-24). The Midianites were Ishmaelites, and it is therefore probable that the Turks derived the use of the crescent, as one of their standards, from their ancestors, though some authorities state it was first used by them A.D. 1446, after the taking of Constantinople. Warburton (Crescent and the Cross) says, "The crescent was the symbol of the city of Byzantium, and was adopted by the Turks. This device is of ancient origin, as appears from several medals, and took its rise from an event thus related by a native of Byzantium. Philip, the father of Alexander the Great, meeting with great difficulties in carrying on the siege of this city, set the workmen one dark night to undermine the walls. Luckily for the besieged, a young moon suddenly appearing, discovered the design, which accordingly miscarried; in acknowledgement whereof the Byzantines erected a statue to Diana, and the crescent became the symbol of the state." Philip besieged Byzantium B.C. 340.

CRESCENT (Orders of).—Charles I., king of Naples and Sicily, instituted an order of

knighthood of the Crescent, A.D. 1268; René of Anjou instituted another in 1448; and the Sultan Selim established an order of the Crescent in 1801, in honour of the battle of Aboukir.

CRESPY, (Treaty,) between Francis I. of France, and the emperor Charles V., was signed at this small town, near Meaux, in Valois, Sept. 18, 1544. They agreed, among other things, to restore all conquests made subsequent to the truce of Nice in 1539, and to join in making war against the Turks. Charles V. renounced his claim to Burgundy, and Francis I. renounced all pretensions to the kingdom of Naples, the duchy of Milan, and the suzerainty of Flanders and Artois.

CREST.—The custom of adopting the figure of some animal as a cognizance is of great antiquity. Herodotus (i. 171) attributes to the Carians the invention of crests for helmets, devices for shields, and handles for bucklers. Alexander the Great is said to have assumed a ram's head as his device, and Julius Caesar a star. Richard I. of England is believed to have been the first modern to revive the practice, as his image on a seal of the period is represented in a helmet adorned with a sprig of the *planta-genista*, or broom, from which the name of his family was derived. Edmund Crouchback, earl of Lancaster, is represented with a crest before 1286 A.D., and Baron de Spencer, in 1296, adorned his horse with the same embellishment. These earlier crests were mostly plumes of feathers. In 1322, the earl of Leicester assumed a dragon as his cognizance. Edward III. originated the custom of conferring crests as military honours in 1333.

CRETE. (See CANDIA.)

CREVELDT (Battle).—Prince Ferdinand of Brunswick defeated the count of Clermont at the head of the French army, on this plain, near Cleves, June 23, 1758.

CRICKET.—Although a game with bat and ball, somewhat similar to the modern pastime, was played in England as early as the 13th century, the name of cricket first occurs in the "Mysteries of Love and Eloquence," by Edward Phillips, Milton's nephew, published A.D. 1685. Fosbroke states, that club-ball, a game played in the time of Edward III., was its ancestor. A match was played at Moulsey Hurst, between six unmarried and six married women, Aug. 3, 1775. The former proved victorious. One of the fair cricketers scored seventeen runs.

CRIMEA (Russia) was peopled originally by the Tauri. The Greeks formed settlements towards the middle of the 6th century B.C., and founded the little kingdom of Bosphorus (*q. v.*) about B.C. 480. The Goths descended on its shores A.D. 250, and during the 4th century it submitted to the Huns, who were expelled by Justinian (527-565). In 679 it was seized by the Chazars, and after various reverses of fortune, submitted to the Tartars in 1237. In 1261 the Genoese obtained considerable trading pri-

vilages, and ultimately seized the country; but, in 1475, Mohammed II. overthrew their power, and submitted the Crimea to the Turkish yoke. It afterwards existed for about three centuries as a dependency of the Sultan, under the nominal government of native khans. In 1696 it was invaded by the Russians under Peter the Great, and again in 1736, under Count Munich, who defeated the Tartar forces sent against him, but failed to accomplish any signal success. A third Russian army of 40,000 men, led by Dolgoruki, entered the Crimea July 26, 1770, and reduced the whole peninsula to subjection within a month; and in 1771 a new khan was chosen, who owed his elevation to Russian influence. In 1783 the khan abdicated, and an imperial manifesto was issued, stating the intended incorporation of the Crimea with the Russian empire; to accomplish which, more than 30,000 Tartars, of every age and sex, were massacred. The formal cession of the Crimea by Turkey did not take place till the peace of Jassy, Jan. 9, 1792. During the Russo-Turkish war of 1853-56, the Crimea was the scene of many of the principal operations. An army of 58,000 men, of whom 25,000 were English, 25,000 French, and 8,000 Turks, landed at Old Fort, twenty miles from Eupatoria, Sept. 14, 1854. The final evacuation of the Crimea by the allies took place July 12, 1856.

CRIMEAN MEDALS.—The public distribution of these medals to the brave men who distinguished themselves in the Crimean campaign against Russia, was made by Queen Victoria in St. James's Park, May 18, 1855.

CRIMISUS (Battle).—Timoleon of Corinth, with an army of 11,000 men, defeated the Carthaginians, 70,000 strong, on the banks of the Crimisus or Crimissus, a river in Sicily, B.C. 339.

CRINOLINE. (*See HOOPS.*)

CRIPPLEGATE.—An ancient gate of the city of London, is noticed under this name as early as A.D. 1016. It was so called from the cripples who congregated here to seek alms. For some time a part of the postern was used as a prison for debtors and trespassers. The gate was rebuilt by the brewers of London in 1244, and was repaired in 1663. The materials were sold for £91 in 1760, the purchaser agreeing to commence the work of demolition Sept. 1 in that year, and to clear away all the rubbish within one month from that date.

CRISSA. (*See CIRRHÆ.*)

CROATIA (Austria).—This province of the Austrian empire, forming part of the ancient Pannonia, was incorporated with Illyria by Augustus. The Goths settled here A.D. 509, and the Crothians, a tribe of the Wends, in 640; and from them the country received its name. They conquered several neighbouring states, and erected Croatia into a kingdom in the 10th century. It was incorporated with Hungary in 1100, and with that kingdom passed under the Austrian rule.

CROCKARDS.—Base coin imported into this

country from Flanders, in large quantities, during the reign of Edward I. By 27 Edw. I., passed A.D. 1299, the circulation of this coin was prohibited under severe penalties.

CROCKERY-WARE is supposed to have been invented by the Egyptians, who are said to have introduced it into Greece about B.C. 1490. In a hundred years from that time it was in general use. (*See EARTHENWARE.*)

CROMLECHS.—These ancient structures, found in different parts of the island, are now believed to be sepulchral monuments, though an opinion long prevailed that they were heathen altars or temples. The most celebrated is the cromlech at Plas Newydd, in the island of Anglesey.

CRONSTADT (Russia).—This strongly fortified seaport-town was founded by Peter the Great A.D. 1710. Menschikoff wrested the island, on which part of the fortifications stand, from the Swedes in 1703. It received the name of Cronstadt in 1721. Nelson followed the Russian fleet to Cronstadt in May, 1801. The allied English and French fleets arrived off Cronstadt the last week in June, 1854, and returned June 1, 1855; but on neither occasion were the fortifications assailed.

CROPREDY BRIDGE (Battle).—The royal troops defeated the Parliamentary army led by Sir William Waller at this place, near Banbury, June 29, 1644.

CROSBY HALL, Bishopsgate, formerly called Crosby Place, was built about 1470 A.D., by Sir John Crosby, grocer and woolman, knighted by Edward IV. in 1471. It was built of stone and timber, very large and beautiful, and, according to Stow, "the highest at that time in London." Richard, duke of Gloucester, afterwards Richard III., lodged here.

Cross.—The sign of the cross was used by Christians in the sacrament of baptism in the 2nd century, and the cross was adopted as the standard of Christian warriors by Constantine the Great, who solemnly affirmed that he saw one two miles long shining in the heavens at mid-day, Oct. 26, 312 A.D. The cross on which our Lord suffered is said to have been discovered by the empress Helena, mother of Constantine, A.D. 326. Three having been found buried beneath Calvary, the identity of the true cross was determined by the miraculous cures it wrought on such sick people as touched it. This discovery is commemorated every 3rd of May, by the feast of the "Invention of the Cross." After this event images of the cross were erected on altars, which first took place about 340. In 614, Chosroes II., king of Persia, plundered Jerusalem and carried away the true cross, which was recovered by the emperor Heraclius, and restored to Calvary Sept. 14, 629. The festival of the "Exaltation of the Cross," held Sept. 14, is in memory of this event. The worship of crosses was established at the council of Nicæa, in Bithynia, in 786. During the Middle Ages crosses were erected to mark the site of any particular event. Thus Edward I. marked the spots on

which the bier of his queen, Eleanor, rested, on its way from Herdeby, in Lincoln, to Westminster, by building crosses over them. Eleanor died Nov. 28, 1291, and was buried Dec. 17.

CROSS (Maid of the).—This sisterhood was instituted A.D. 1625, at Roie, in Picardy, by four young women, who resolved to devote themselves to the education of poor girls. In 1636 they were compelled by persecution to remove to Paris, where their society was erected into a regular order by the archbishop in 1640, and confirmed by royal letters patent in 1642.

CROSS (Order of).—This order of ladies was founded by Eleonora de Gonzaga, A.D. 1668, to commemorate the miraculous preservation from fire of a gold cross containing relics of the true cross. It was confirmed by bull of Clement IX., July 27, 1668, and by the emperor Sept. 9.

CROSS-BOW. (*See* ARBALIST.)

CROSSED, or CROUCHED FRIARS.—Originally three orders of friars were thus called, in England, Flanders, and Bohemia, all of whom claimed St. Cletus, A.D. 78, as the founder; and St. Cyriacus, who was bishop of Jerusalem in 331, as the restorer of their fraternity. The rules and constitution were granted in 1169 by Pope Alexander III.; but the blue robe and silver cross, which distinguished the order in later times, were not adopted till 1462. In 1568 Pius V. sought to restore the friars to their original sanctity of life by confirming and enlarging their privileges, but apparently with little success, as the order was finally suppressed by Pope Alexander VII. in 1656.

CROTONA (Italy).—This city was founded by a colony of Achæans B.C. 710. War having broken out between the inhabitants and the people of Sybaris, the latter were defeated in a great battle, and their city was destroyed B.C. 510. The elder Dionysius took Crotona B.C. 389, and Agathocles B.C. 299, and it afterwards fell under the power of Pyrrhus. The Romans seized it B.C. 277. A colony of Romans was sent here B.C. 194. It suffered greatly during numerous wars, and the modern town of Cotrone, which occupies its site, is a place of no importance.

CROWN.—The first mention of a king's crown is in 2 Sam. i. 10, which describes the delivery of Saul's crown and bracelet to David, B.C. 1055. At first crowns were plain fillets, bound round the head, though that taken by David from the Ammonites B.C. 1033 (2 Sam. xii. 30), which weighed one talent, or 120 lb., and was adorned with precious stones, was doubtless of a different description. Tarquinius Priscus, B.C. 618, is said to have been the first Roman king who assumed a crown; but as a similar ornament was worn by his officers and magistrates, it cannot be considered a mark of royalty. The ordinary use of the modern crown commenced, according to Selden, with Constantine, whose reign began A.D. 306. Crowns were adopted by the Spanish sovereigns about 580; by the kings of Lombardy,

who wore iron crowns, about 590; and by the French kings in 768. Egebert, who became king of Kent in 786, is represented on his coins as crowned. The papal triple crown was originally a plain pointed cap. Pope Hormisdas added the first crown about 523, Boniface VIII. the second (1294—1303), and John XXII. the third (1316—1334).

CROWN AND HALF-CROWN.—The first commission for coining these pieces of money was signed by Edward VI. on the 1st Oct. 1551.

CROWN POINT (America).—General Johnson defeated the French near this fort, situated on Lake Champlain, Sept. 7, 1755; and they abandoned it in July, 1759. The fort was surprised by the revolted Americans in 1775. They evacuated it Oct. 13, 1776, after the signal defeat of their squadron on Lake Champlain.

CROWS AND ROOKS.—In consequence of the depredations committed by these birds, an act (24 Hen. VIII. c. 10) was passed A.D. 1532, to compel every one, under penalty of a fine, to do his best to destroy them, and to render it incumbent on all villages and country towns to provide and maintain nets for their capture. This statute was partially repealed in 1565, by 8 Eliz. c. 15.

CROYDON (Surrey), called in Domesday Book Croinedone, was given to Lanfranc soon after the Conquest. A palace built of timber was in existence A.D. 1278. Archbishop Parker entertained Elizabeth at the new palace of Croydon in 1575. It was converted into a factory in 1780. Archbishop Whitgift founded the hospital in 1596. The canal was commenced in 1801, and the railroad to London opened June 1, 1839.

CROYLAND (Lincolnshire).—Ethelbald, king of Mercia, founded a monastery on this island A.D. 716. The building was completed in 726. The Danes killed the abbot and plundered the monastery in 870. It was restored by King Edred in 948. The abbey was destroyed by fire in 1091, and rebuilt in 1112. It was again burnt in 1142, and restored about 1170. Croyland was suppressed with the other monasteries at the Reformation.

CROZIER, the pastoral staff of an archbishop, is distinguished by a cross, and must not be confounded with the staff of a bishop, which terminates in a shepherd's crook. The origin of the crozier is referred to the original staff of the Romans. It was adopted at a very early period in the Church's history, and is known to have been in use about the year 500. In the 12th century the crozier was appointed to be borne by metropolitans and patriarchs, which privilege was afterwards extended to all archbishops by Gregory IX. (1227—1241). A writer in *Notes and Queries* (ii. 313) states that a crozier was borne at the funerals of Brian Duppa of Winton, A.D. 1662; Juxon of London, 1663; Frewen of York, 1664; Wren of Ely, 1667; Cosin of Dunelm, 1671; Trelawney of Winton, 1721; and Lindsay of Armagh, 1724. It is engraven on the monuments of Goodrich of

Ely, 1552; Magrath of Cashel, 1622; Hacket of Lichfield, 1670; Creggletton of Wells, Lamplugh of York, 1691; Sheldon, 1677; Hoadley of Winton, and Porteus of London.

CROZIER (Order of).—These monks claim St. Cletus, who flourished A.D. 78, as the founder of their order. All that is known with any certainty respecting the origin of the order, is that it was in existence in Italy when Alexander III. succeeded to the papacy in 1159. In 1211 Theodore of Celles founded a similar order in Flanders, and in 1236 another establishment was formed at Prague, in Bohemia. All these orders have gradually become extinct.

CRUCIFIXION, 'fastening to the cross,' was a mode of execution common to most nations of antiquity. The Jews are said to have practised it very early, and the death of Saul's sons, whom the Gibeonites hanged on a tree (2 Sam. xxi. 9, B.C. 1022), is instanced as a proof; but it can scarcely be considered satisfactory. It has long existed in China, was practised by the Carthaginians, and is mentioned as in use in the earliest period of Assyrian history. Amongst the Carthaginians all ranks were liable to crucifixion, but the Roman law restricted it to slaves. Christ suffered this death Friday, April 15, A.D. 29. During the siege of Jerusalem by Titus in 70, the Romans crucified about 500 Jews daily, inasmuch that Josephus assures us the soldiers were unable to find wood for the crosses, or crosses for the bodies. The emperor Constantine abolished death by crucifixion in 325.

CRUELTY TO ANIMALS.—The Society for the Prevention of Cruelty to Animals was established in 1824. The laws on this subject were consolidated and amended by 5 & 6 Will. IV. c. 59 (Sept. 9, 1835), and the provisions of the act were extended to Ireland by 1 Vict. c. 66 (July 15, 1837).

CRUSADES.—These wars, for the recovery of the Holy Land from the Saracens, took place in the 11th, 12th, and 13th centuries. The first Crusade was undertaken in consequence of the appeals of Peter the Hermit, who was so shocked at the barbarous treatment experienced by Christian pilgrims to the Holy Sepulchre, that he resolved in 1093 to preach in favour of a war against the Mohammedan persecutors.

A.D.

- 1095. Nov. 18 to 28. Pope Urban II. addresses the Council of Clermont on the sanctity of the enterprise, and announces the first Crusade.
- 1096. During this year four abortive attempts are made to commence the Crusade, by about 275,000 fanatics, nearly all of whom perish on the march. In August, the properly-organized force of Godfrey of Bouillon sets out.
- 1097. March. Godfrey crosses the Hellespont. May 8 to June 24. Siege and capture of Nicæa, in Bithynia. Oct. 21. Siege of Antioch.
- 1098. June 3. Capture and sack of Antioch. June 28. The battle of Antioch is gained by the Christians.

A.D.

- 1099. June 7. The Christian army, in number 40,000, invests Jerusalem. July 15. Jerusalem is taken, and the inhabitants are put to the sword. July 23. Godfrey is elected king of Jerusalem, and the first Crusade ends.
- 1146. Easter. St. Bernard preaches the second Crusade, which is conducted by Louis VII. of France, and Conrad II. of Germany.
- 1148. Defeat of the Christians at the siege of Damascus.
- 1149. Conrad II. and Louis VII. return to Europe. The end of the second Crusade.
- 1187. Oct. Jerusalem is recaptured by the infidels, under Saladin.
- 1188. Philip Augustus of France and Henry II. of England resolve on a third Crusade.
- 1189. The emperor Frederick Barbarossa joins the enterprise. Aug. Siege of Acre is commenced by Guy of Lusignan.
- 1191. March. Philip arrives at Acre. June 8. Richard Cœur de Lion arrives at Acre. July 12. Capture of Acre.
- 1192. Oct. 25. End of the third Crusade, and departure of Richard I. for England.
- 1195. Henry VI. of Germany undertakes the fourth Crusade, at the instigation of Pope Celestine III.
- 1197. The Crusade abandoned, in consequence of the death of the emperor.
- 1199. Innocent III. commissions Fulk of Nully to preach the fifth Crusade.
- 1202. Boniface, marquis of Montferrat, undertakes the command of the expedition, which sets out soon after Easter. Nov. Capture of Zara by the Christians.
- 1203. June 25 to July 18. Siege and capture of Constantinople, and end of the fifth Crusade.
- 1216. The Germans and Hungarians commence the sixth Crusade.
- 1218. May. The Crusaders besiege Damietta.
- 1219. Nov. 5. Capture of Damietta.
- 1228. Aug. The emperor Frederick II. sails from Brundisium, and arrives at Acre.
- 1229. Feb. 20. A truce is agreed upon between Frederick II. and the Sultan, for ten years and forty days, and Jerusalem is restored to the Christians.
- 1238. The Turks seize Jerusalem.
- 1239. Thibaud, count of Champagne, commences the seventh Crusade.
- 1241. Richard, earl of Cornwall, ransoms Jerusalem, and obtains a nominal surrender of Palestine to the Christians.
- 1244. Jerusalem is besieged and taken by the Korasmians.
- 1245. The eighth Crusade is determined on by the Council of Lyons.
- 1248. Aug. Louis IX. of France sails as leader of the Crusade.
- 1250. Louis IX. is made prisoner by the infidels at Mansourah. June. He is ransomed, and a ten years' truce is agreed upon.
- 1254. April. Louis IX. returns to France.
- 1268. Louis IX. and Edward, prince of Wales, resolve to undertake a ninth Crusade.
- 1270. Departure of Louis IX. Aug. Louis IX. dies of a pestilence at Carthage.
- 1271. April. Prince Edward arrives at Acre.
- 1272. July. The English quit Palestine.
- 1291. May 18. The Mamelukes take Acre; thereby destroying all Christian power in Syria.

CRUSTUMERIUM (Italy), also called Crustumia or Crustumium, was one of the Latin cities that took up arms against Romulus, to avenge the rape of the Sabine women, B.C. 750. After several conflicts, it was reduced to subjection to Rome, B.C. 499.

CRUZADO.—Alfonso V. of Portugal first struck this gold coin, bearing the impression of a cross, about A.D. 1457, when Calixtus III. ordered a crusade against the infidels.

CRYOPHORUS.—This instrument, the frost-bearer, or carrier of cold, for freezing water by its own evaporation, was invented by Dr. Wollaston. The "Philosophical Transactions" for 1813 (p. 73) contain Dr. Wollaston's account of the invention.

CRYPTOGRAPHY, or the art of secret writing, was practised at a very early period. (*See* CIPHER.)

CRYSTAL PALACE (Hyde Park).—The building committee appointed by the commissioners, invited designs March 13, 1850, and reported upon 253 plans, all of which they rejected May 9. The contract for the Crystal Palace was signed July 10. The first column was fixed Sept. 26, and the building was delivered to the commissioners Feb. 3, 1851. Its length was 1851 feet, corresponding with the year, and its width 408, with an additional projection on the north side, 936 feet long by 48 wide. The central portion was 120 feet wide, by 64 high; on either side of this was another portion, 72 feet wide, by 44 high; and the north and south portions were 72 feet wide, by 24 high. The transept was 72 feet in width and 108 in height. The entire area was 772,784 square feet, or about 19 acres, nearly seven times as much as St. Paul's Cathedral. Therewere three entrances, with eight pay-places to each, and 18 doors for exit. Four galleries, accessible by 10 double staircases, ran lengthways. The building contained 3,300 iron columns, 1,074 base pieces beneath the columns, and 3,500 girders. For the roof 17 acres of glass were required. There were also 1,500 vertical glazed sashes. The galleries and the floor contained 1,000,000 square feet of flooring, and the woodwork was estimated at 600,000 cubic feet. It was opened May 1, and closed Oct. 11, 1851. The entire building was removed in 1852. (*See* GREAT EXHIBITION.)

CRYSTAL PALACE (Sydenham).—At the close of the Great Exhibition of 1851, a company was formed, in order to purchase the materials of the building, and to re-erect them on another site. This was registered as the Crystal Palace Company, May 17, 1852. Penge Park and the adjacent property, amounting to 200 acres, was soon after purchased.

A.D.

1857. June 15, 17, and 19. Preliminary performances take place in preparation for the Handel festival. Sept. 2. Tonic Sol-Fa concert, by 3,000 children.

1858. July 2. Second rehearsal for the Handel festival.

1859. June 20, 22, and 24. Handel festival.

1860. June 25, &c. Concerts by 3,000 Orpheonists. July 9. Distribution of prizes to volunteers, for proficiency in rifle-shooting.

1861. Feb. 20 and 21. The north wing of the building is blown down. May 26. The Palace is opened to shareholders and their friends on Sunday.

CTESIPHON (Assyria).—The date of the foundation of this city, on the eastern bank of the Tigris, and only a short distance from Seleucia, has not been ascertained. It was the favourite winter residence of the Parthian monarchs, and was sacked by the Romans about A.D. 165. The emperor Severus took it by assault A.D. 198, and carried off 100,000 captives. The Persians, defeated by the emperor Julian, in June, 365, took refuge in Ctesiphon; but the emperor would not undertake the siege. Omar sacked it in March, 637; and from this blow it never recovered. At this period it was known by the name of Madayu. (*See* CUBA.)

CUBA (Atlantic).—This, the largest of the West-Indian islands, was discovered by Christopher Columbus, Oct. 28, 1492. It was named Juana, then Fernandina, and afterwards Santiago. The natives called it Cuba, which name has since come into general use. Columbus returned to the island April 29, 1494, and again in 1502. The first Spanish settlement was formed in 1511. They carried on continual war with the aboriginal inhabitants, who were almost exterminated by 1560. The cultivation of tobacco and the sugar-cane was introduced about 1580. Nearly the whole of the island was captured by the English in 1762; but it was restored to the Spaniards by the 19th article of the treaty of Paris, concluded Feb. 10, 1763. (*See* HAVANNAH, &c.)

CUBAN, or KUBAN (Russia).—The territory on the banks of the river Cuban was recognized as independent by the Russians and Turks in 1774, but in 1783 the empress Catherine and Prince Potemkin added it to the Russian empire.

CUBIT, the first measure of which we have any record. Noah was ordered to make the length of the ark 300 cubits, its breadth 50, and the height 30, B.C. 3468 (Gen. vi. 15). Authorities are divided respecting its length, which was probably about twenty inches.

CUCKING-STOOL, or TUMBREL, an instrument, invented for the punishment of scolds, by ducking them in the water, was in use in this country at a very early period. The churchwardens' and chamberlains' accounts at Kingston-upon-Thames for the year 1572 contain the following:—

	s.	d.
The making of the cucking-stool	8	0
Ironwork for the same	3	0
Timber for the same	7	6
Three brasses for the same and three wheels 4 10		

A.D.

1862. Aug. 5. Mr. Laing, M.P., erects the first column of the new building.

1853. Aug. 15. Twelve workmen are killed by the fall of a scaffold. Dec. 31. Mr. Waterhouse Hawkins gives a dinner to twenty-four scientific men, in the body of his model iguanodon.

1854. Feb. 28. The directors announce the intended opening of the Palace in May. June 10. The Palace is opened by the Queen. Oct. 28. Military musical fête, in aid of the Patriotic Fund.

1855. April 20. Visit of the emperor and empress of the French. Dec. 13. Extraordinary general meeting of the shareholders, who complain greatly of management.

1856. June 18. First complete display of the water-works. Nov. 1. Robson is sentenced to twenty years' transportation, for forgery and fraud on the Crystal Palace Company, to the amount of £28,000.

The punishment was administered in this town in April, 1745. The newspaper of the time thus chronicles the event: "Last week a woman that keeps the Queen's Head ale-house, at Kingston, in Surrey, was ordered by the court to be ducked for scolding, and was accordingly placed in the chair, and ducked in the river Thames, under Kingston Bridge, in the presence of two or three thousand people." Another woman was punished in the same manner at this place as late as 1801.

CUCUMBER.—The Greeks and Romans pickled the cucumber. It is said to have been common in England in the time of Edward III., and having been lost during the wars of the Roses, was reintroduced in the reign of Henry VIII.

CUDDALORE (Hindustan).—This town was ceded by its native prince to the East-India Company A.D. 1681. They built a factory, which was extended and fortified in 1702. The French took it in 1758, and abandoned it on the approach of Coote in 1760. The French, assisted by Hyder, captured it April 4, 1782. The English failed in an attempt to retake it in 1783, but it was restored to them by treaty, March 11, 1784.

CUFA (Assyria).—"The name of Cufa," says Gibbon (ch. li.), "describes a habitation of reeds and earth." It was founded by Omar, after the sack of Ctesiphon, A.D. 637, and, in its construction, the ruins of that city were employed. It revolted against Othman in 656, and Ali was killed in the mosque of Cufa, Jan. 21, 661.

CUIRASS.—This defence for the breast and back existed among the Egyptians, Persians, Greeks, and Romans, though its form was, of course, subject to many modifications. Its modern name is derived from the French *cuir* or Latin *corium*, both of which signify leather, because that was the material usually employed. Subsequently, rings and scales were added, and at length, cuirasses were formed of solid plates of iron and brass, which protected the body, from the neck to the girdle. These became general during the reign of Edward III. (1327-1377). Its use was revived in the English army in 1820.

CUIRASSIER.—Captain Cruso ("Militarie Instructions for the Cavallrie," 1632) says:—"This sort of Cavallrie is of late invention, namely by the Germanes." Cuirassiers also formed part of the French army, and were retained when it was reorganized in 1791.

CULDEES.—The name given to the members of a religious order, established in England, Ireland, and Scotland, in the early ages of the Church. The origin of the Culdees is assigned to the 5th century, and St. Patrick, whose mission to Ireland occurred in 432, is said to have been of the number. Columba, the apostle of the Picts, who landed in Scotland in 563, was also a Culdee; and the same sect includes Columbanus, who introduced Christianity to the Burgundians, Franks, and Swiss, in 590. The Culdees never acknowledged the papal

supremacy, and they possessed several seats of learning in Scotland. That of Melrose, which was one of the chief, was burnt by the Danes in 850. St. Andrews was so renowned, that King Constantine II. spent the last years of his life there, and died there in 943. The Culdees existed at Bardsey as late as 1188, and at Iona until 1203. They flourished at Dunkeld until 1127, when King David I. converted their monastery into a cathedral, and took measures, by which the Culdees were gradually suppressed.

CULLODEN (Battle).—The duke of Cumberland defeated the Pretender Charles Edward on this moor, near Inverness (O.S.) April 16, 1746. This victory entirely crushed the rebellion.

CULM (Battle).—A battle was fought between the allied Austrians, Prussians, and Russians, and the French, near Culm, in Prussia, Aug. 29 and 30, 1813. The French, who were defeated, lost, in the two days, 18,000 men, whilst the loss of the allies did not exceed 5,000. Sixty pieces of cannon, two eagles, and 300 ammunition-waggons, were captured from the French.

CULVERIN.—A culverin of 4 lb. calibre was made by the Moors A.D. 1132, and called Salamonica; and several instruments of a similar kind were employed at the battle of Tongus in 1408. Hand culverins were introduced about 1440.

CUMÆ (Italy).—This, the earliest Greek colony in Italy, is said by some authorities to have been founded B.C. 1050. It must, however, be referred to a later date. From about B.C. 700 to B.C. 450, it enjoyed the highest prosperity. It resisted an invasion of the Etruscans B.C. 522. Aristodemus obtained the supremacy B.C. 505, and was expelled by the nobles after he had exercised it about twenty years. Tarquinius Superbus, the exiled king of Rome, sought refuge at Cumæ B.C. 496. Hieron, tyrant of Syracuse, came to the aid of the Cumæans, and defeated the Carthaginian and Tyrrhenian fleet B.C. 474. The Samnites captured Cumæ B.C. 420, put the male inhabitants to death, and established a colony. It was admitted to the Roman franchise B.C. 338. Sylla retired to the neighbourhood of Cumæ after his abdication, B.C. 79. Narses captured the town after a long siege, A.D. 553. It was destroyed by an earthquake in 1538. Cumæ was also celebrated as the abode of the fabled Sibyl, and for a long time her supposed cave was shown to visitors. Justin Martyr saw it in the middle of the 2nd century. Cumæ was for some time the seat of a bishop.

CUMANA (Venezuela), the capital of a province of the same name, is the oldest city founded by Europeans in South America. Diego Castellon commenced it A.D. 1523. It was almost entirely destroyed by an earthquake in 1766. The inhabitants joined in the revolt against Spain, April 19, 1810.

CUMBERLAND is said to owe its name to the Cymbri or Cumbri, its aboriginal inhabitants. In 945, Edmund, king of

England, gave it to Malcolm I., of Scotland, on condition that the latter should assist him in his endeavours to repel hostile invasions, and in 1032 this arrangement was confirmed by Canute. At the period of the Conquest, Malcolm II. aided the northern rebels in their opposition to Norman tyranny; in consequence of which, William I. led an army against him in 1072, and added Cumberland to his own territories, giving Malcolm some English towns as a compensation. The county remained an object of contention between the two kingdoms for some time, and was ravaged by the Scotch in 1091 and 1135; on which last occasion Stephen resigned his claim. Henry II. recovered it in 1157. Cumberland was finally annexed to England in 1237. The Border service was instituted by Edward I. in 1296, when Robert de Clifford was made Lord Warden of the Marches, and appointed to guard the country against Scotch invasion, and to decide disputes between the people of both kingdoms. Edward Bruce ravaged Cumberland in 1315, and in 1322 his brother Robert also entered the county, whence he returned with immense booty; and for a long period the whole border territory was the scene of continual marauding incursions.

CUNAXA (Battle).—Cyrus the Younger was defeated and slain by Artaxerxes II., at this place, in Upper Asia, B.C. 401.

CUNERSDORF (Battle).—Frederick II., of Prussia, attacked the allied Austrian and Russian army at this place, near Frankfort, Aug. 12, 1759. The Prussians were at first successful, and a messenger was sent to Berlin, with the following message to the queen:—"Madam, we have driven the Russians from their intrenchments. In two hours expect to hear of a glorious victory." Their opponents, however, renewed the contest with great vigour, and the king was compelled to order a retreat, having lost 30,000 men in killed and wounded, and 200 pieces of artillery.

CURACOA (Atlantic).—The Spaniards formed a settlement on this island, one of the Antilles, A.D. 1527. It was taken by the Dutch in 1634. The inhabitants having claimed the protection of England, the island and its dependencies surrendered to an English squadron Sept. 13, 1800. The island, restored by the 3rd article of the treaty of Amiens, March 25, 1802, was, on the renewal of the war, again captured by a British squadron, Jan. 1, 1807. Towards the end of August, 1814, England restored the island to the Dutch, in whose possession it has since remained.

CURFEW BELL.—The Couvre-feu, or Curfew, was a signal for putting out fires and lights. William I. is said to have introduced it into England A.D. 1068, although it is probable that he only enforced a regulation already in existence, as a similar custom at that time prevailed in Italy, France, Spain, and other countries. The severity, however, with which William I. enforced it, compelling the people to extinguish both fires and lights

when the curfew-bell rang at eight in the evening, caused the introduction of the custom to be attributed to him. In those early times, the fire was generally made in a hole in the middle of the floor, the smoke escaping through an aperture in the roof. When the bell tolled, the wood and embers were raked together, and the fire was extinguished. The curfew was modified by Henry I. in 1100. The *Liber Albus* contains regulations of the city of London, passed during the reigns of Edward I. and Edward III., by which persons were forbidden to wander about the city armed, after curfew. The practice of ringing the bell at eight o'clock is still kept up in many places in England.

CURIA MURIA ISLANDS (Indian Ocean), on the south coast of Arabia, were visited by Portuguese missionaries A.D. 1588; at which time the population, only one of them being inhabited, consisted of a few savages, who subsisted on fish, which they dried in the sun. In 1819 they were invaded by the Wahabees, who destroyed their houses, killed their goats, and sold some of their children to slavery. The islands, five in number, were explored and described by Dr. Hulton in 1836. They are also called the Koorya Moorya Islands.

CURLING.—This game is said to have been introduced into Scotland by the Flemish immigrants, at the commencement of the 16th century.

CURRENTS, or "raisins de Corinthe," were first introduced into this country in the 16th century, when they were called "Corinthes," from the part of Greece in which they are produced in the greatest abundance. An attempt was made in the reign of Henry VIII. to introduce the culture of this particular vine in England. The duty on currents, which was very high, was reduced in 1834 and in 1844.

CURRENT-TREE was first planted in England A.D. 1533. The hawthorn current-tree was introduced from Canada in 1705.

CURSE OF SCOTLAND.—The reason why the nine of diamonds is called the curse of Scotland, has been discussed in *Notes and Queries*. Amongst the reasons assigned are the following:—Because the duke of Cumberland, after the battle of Culloden, April 16, 1746, wrote upon the back of this card a very cruel and inhuman order for the destruction of the persons and property of the rebels. Because the armorial bearings of the earl of Stair, who was very unpopular in Scotland, on account of the part he took in promoting the Union in 1707, were so arranged as to resemble the nine of diamonds. Because "curse of Scotland" is a corruption of "cross of Scotland," the allusion being to St. Andrew's cross, which is supposed to resemble the nine of diamonds. Because diamonds imply royalty, being ornaments to the imperial crown; and every ninth king of Scotland has been a tyrant and a curse to his country. Because the heraldic bearings of the Dalrymple family are, on a saltire

azure, *nine lozenges of the field*; the second Viscount Dalrymple and first earl of Stair being called the curse of Scotland, from the part he took in the massacre of Glencoe in 1692. Because it is the great winning card at cornette, a game introduced into Scotland in 1538, by the French attendants of Mary of Lorraine, queen of James V., to the ruin of many Scotch families. Because the nine of diamonds is the pope in the game of Pope Joan, originally called Pope Julio, and said to have been played as early as the time of Queen Elizabeth. The latter explanation, from the anti-papal spirit displayed by the Scottish people, is believed to be the true one.

CURSITOR BARON.—Although the functions of this officer originated at the same time as the Exchequer, they did not give rise to a separate dignity till the reign of James I. The first mention of baron-cursitor occurs in May, 1610, when Thomas Caesar received the title. By 3 & 4 Will. IV. c. 99 (Aug. 29, 1833), many of the duties of this office were abolished.

CURTATONE (Battle).—The Austrians, after a severely-contested action, defeated the Italian army at this village, between Mantua and Vicenza, May 29, 1848.

CURZOLA (Adriatic), the ancient Corcyra Nigra, so called from the dark colour of the pines that grow upon it, is said to have been colonized by the Cnidians. It was seized A.D. 997, by the Venetians, under the Doge Pietro Urseolo II., and in 1298 a Genoese defeated a Venetian fleet in its vicinity. In 1420 it was retaken by the Venetians, and incorporated with the province of Venetian Dalmatia, and in 1485 it resisted the attempts of Frederick of Aragon for its capture. The Turkish corsair Uluz-Ali attacked Curzola in 1571, and the governor and garrison having fled, the women put on armour, and saved the place from pillage. The Russians twice seized Curzola in 1806. In 1807 it was ceded to France by the treaty of Tilsit. The English obtained possession in 1813, and retained it till its cession to the Austrians, July 15, 1815.

CUSHEE PIECES were invented by Richard Leake, who was born A.D. 1629. He fought in the great sea-fight against Van Tromp in 1673, and died in 1696. Leake held the position of master-gunner of England and store-keeper of Woolwich.

CUSHION-DANCE, also called Joan Sander-son, is a very old round dance. According to Fosbroke, in most ancient dances a man and a woman danced together, holding each other by the hand or arm, and a kiss was the established fee of the lady's partner. One of the characters in Heywood's play of "A Woman killed with Kindness," 1600, remarks, "I have, ere now, deserved a cushion; call for the Cushion-dance." Playford's "Dancing-Master," published in 1698, contains a description of this dance, usually introduced at weddings.

CUSTOM-HOUSE.—The business of the Customs was transacted at Billingsgate

A.D. 979, but no building was especially devoted to this purpose till 1385. In 1559 a larger house was erected, which was destroyed during the Great Fire of 1666; and the new edifice, built by Sir Christopher Wren in 1668, was also burnt in 1718. It was rebuilt by Ripley soon after, and shared the fate of its predecessors Feb. 12, 1814. The first stone of a new custom-house had been laid in 1813, as the former building was found inadequate to the requirements of the times, and this was opened May 12, 1817. In 1825, owing to the defective manner in which the foundations had been laid, part of the new building fell in, when the whole central portion was taken down and restored by Mr. Smirke.—The custom-house of Dublin was completed in July, 1621, and rebuilt before 1661. In 1707 a new building was erected; but as this was found to be unsafe in 1773, another was commenced in 1781, and completed in 1791. A dreadful fire, which broke out in the sugar and spirit stores, Aug. 10, 1833, destroyed 700 puncheons of spirit, 300 casks of tallow, and nearly 5,000 hogsheads of sugar.

CUSTOMS were paid on vessels and goods at Billingsgate, during the reign of Ethelred II., A.D. 979. They were granted to the king in 1274 by 3 Edw. I., and in 1282, the duty of collecting them was intrusted to foreigners. Queen Elizabeth farmed them to Sir Thomas Smith, receiving at first £14,000, which sum was raised, in 1590, to £42,000, and afterwards to £50,000. In 1666, Charles II. farmed them for £390,000. In 1787 they were regulated by the Customs Consolidation Act (27 Geo. III. c. 13), which has been since amended, by 16 & 17 Vict. c. 107 (Aug. 20, 1853), and 18 & 19 Vict. cc. 96 & 97 (Aug. 14, 1855).

CUSTOS BREVIUM.—This office in the court of Queen's Bench and in the court of Common Pleas was abolished by 1 Will. IV. c. 58 (July 23, 1830).

CUSTOS ROTULORUM, or keeper of the Rolls or records of the session of the peace, was ordered to be appointed under the sign manual, by 37 Hen. VIII. c. 1 (1545), and 1 Will. & Mary, c. 21 (1689).

CUSTOZA (Battle).—Marshal Radetsky defeated the Italians at this place, near Mantua, July 23, 1848.

CUTCH (Hindustan) was an independent state A.D. 1582, and held possessions in Scinde and other neighbouring territories, all of which were lost by Rao Lacka, who succeeded to power in 1751. Futeh Mohammed, the general of the army, expelled the reigning prince in 1792, and was himself overthrown in 1802; after which Cutch became notorious as the seat of hordes of robbers, who were a source of constant annoyance to the adjoining provinces. Consequently, the East-India Company interfered in 1809, and compelled the government of Cutch to promise that the offences complained of should be discontinued. In 1815 it became necessary to enforce this agreement by an appeal to arms; and the result was, that

another more stringent treaty was entered into in 1816. In 1819 the Rao was dethroned for misgovernment, and a regency was appointed until his infant heir should be able to rule. A secret but extensive trade in slave children was discovered and suppressed in 1835; and other improvements, such as the abolition of sutteeism and infanticide, have also resulted from British intercourse.

CUTLERY.—The manufacture of cutlery is an art of great antiquity. The precise period at which it was introduced into Great Britain is not known. Sheffield was famous for its steel manufactures in the 13th century, as Chaucer speaks of the "Sheffield thwytel," as a common article. Henry V. incorporated the London cutlers in 1417. The Sheffield artisans did not receive their charter till 1624. By 59 Geo. III. c. 7, s. 1, passed March 23, 1819, makers of wrought-steel cutlery obtained the privilege of marking them with the figure of a hammer; and by sec. 5, a penalty of ten pounds per dozen was imposed on all vendors of cutlery falsely stamped "London made."

CUTTACK (Hindustan).—The Mohammedan writers, about 1212, mention this country under the name of Jagepore. It was conquered and annexed to Bengal in 1592. The Maharrattas obtained possession of it in 1751, and it was ceded to the East-India Company by the second article of the treaty of Deogaum, Dec. 17, 1803. The capital of the district, also called Cuttack, sustained a celebrated siege in 1592. It was captured by the East-India Company's army Oct. 14, 1803.

CUXAR.—This strongly-fortified post, near Baza, in Spain, was taken from the Moors by the Spaniards in 1489.

CUXHAVEN (Germany).—This seaport town, belonging to Hamburg, was occupied by the Prussians in 1800. The French took possession in 1804, and evacuated it in 1813, when it was occupied by a British force.

CUZCO (Peru), the capital of the Lucas, said to have been founded by Manco Capac, in the 10th or 11th century, was entered by Pizarro Nov. 15, 1533. The siege of Cuzco commenced early in Feb. 1536, when the city having caught fire in several places, was nearly consumed. The Peruvian army waged the conflict for more than five months, and withdrew in August. Prescott says: "It stood in a beautiful valley on an elevated region of the plateau, which, among the Alps, would have been buried in eternal snows, but which within the tropics enjoyed a genial and salubrious temperature. It was, moreover, the 'Holy City,' and the great temple of the Sun, to which pilgrims resorted from the furthest borders of the empire, was the most magnificent structure in the New World, and unsurpassed, probably, in the costliness of its decorations, by any building in the Old."

CYANOGEN is a gaseous compound, discovered by Gay-Lussac in 1815.

CYCLADES (Aegean Sea).—This group of twelve islands received this name because

they lay in a circle around Delos, the smallest of them. Artemidorus increased the number to fifteen. Originally inhabited by Carians, who were expelled by Minos, they were afterwards colonized by Ionians and Dorians. The Cyclades passed from Turkish rule, and were included in the new kingdom of Greece, formed in 1829.

CYCLE.—The Chinese cycle of sixty years, or 720 revolutions of the moon, was instituted by Hoang-ti, who flourished about 2660 B.C.; and that of Cleostratus, who proposed a cycle of eight years, began about 532 B.C. The Metonic cycle was invented by Meton of Athens about 432 B.C., and was superseded by that of Callippus, which commenced B.C. 330.

CYDER is said to have been first made in Africa, and introduced by the Carthaginians into Spain, whence it passed into Normandy. In addition to the hereditary duty on cyder granted by 12 Charles II. c. 23, s. 4 (1660), a duty of 4s. per hogshead was levied by 13 Will. III. c. 5, s. 5 (1701), upon all cyder and perry made in England. A duty of £4 per tun on all cyder and perry imported from foreign countries was imposed by 5 Will. & Mary, c. 7, s. 27 (1694), and continued for ninety-five years by 4 Anne, c. 6, s. 11 (1705). The duties having undergone various modifications, were repealed by 1 Will. IV. c. 51 (July 16, 1830), from Oct. 10, 1830.

CYNICS.—These philosophers received this name on account of their snarling disposition, or from the Cynosarges, a gymnasium in the suburbs of Athens, in which their founder Antisthenes, born B.C. 420, used to lecture. Diogenes, born B.C. 414, was one of the most celebrated of this sect. They were sometimes called the School of Barkers.

CYNOSCEPHALÆ (Battles).—Two battles were fought in this mountain-range in Thessaly; the first, B.C. 364, between the Thebans and Alexander of Phæræ, when the former were victorious, though Pelopidas, their leader, was slain; and the second B.C. 197, in which the Roman consul Flaminius defeated Philip V. of Macedon.

CYNOSSEMA (Sea-Fight).—The Athenians defeated Mindarus and the Spartan fleet, off Cynossema, on the coast of Caria, B.C. 411.

CYPRESS, said to be the Tezzah of Scripture, is remarkable for its durability; and on this account was used for statues of the gods and cases of mummies. The gates of St. Peter, at Rome, made of this wood, lasted 1,100 years. It was used for coffins. The common cypress is known to have been cultivated in England as early as A.D. 1551, and was probably introduced from Canada about 1548. The deciduous cypress was brought into this country from North America about 1640, and the cedar of Goa in 1683. A common age for the cypress on the American continent is 400 years.

CYPRUS (Knights of).—The order of the Sword, in Cyprus, was instituted by Guy de Lusignan towards the end of the 12th century. It numbered 300 barons, and became extinct when the Turks took Cyprus in 1570.

CYPRUS (Mediterranean).—This island was colonized by the Phœnicians at a very early period. It passed successively under the supremacy of the Syrians, the Greeks, the Egyptians, and the Persians. On the death of Alexander the Great it was incorporated with Egypt. It was made a Roman province B.C. 58. Cæsar gave it to Arsinoë and Ptolemy, the sister and brother of Cleopatra, B.C. 47. It was made an imperial province B.C. 27, but was given up to the senate B.C. 22. Paul and Barnabas visited the island A.D. 44 (Acts, xiii. 4). The island was an independent province of the early Church, and was divided into thirteen, or, according to other authorities, fifteen dioceses. The Jews of Cyprus rebelled during the reign of Hadrian (A.D. 117–138), and massacred above 200,000 of the inhabitants. A council was held in Cyprus in 399. The Saracens took possession of the island in 648, but soon after retired. Haroun al Rashid captured it about 803, and John Zimisces expelled the Saracens in 964. Richard I. of England wrested the island from Alexis Comnenus in 1191; and at first ceded it to the Templars, but in 1192 bestowed it upon Guy of Lusignan. Cyprus was reduced to subjection by the Genoese in 1373, and fell under the power of the Venetians in the 15th century. Selim II. took it in August, 1571, and it has since remained in the possession of the Turks. The Turks massacred several thousands of the Christians in 1821. These outrages commenced in May. Cyprus was not included in the new kingdom of Greece, formed in 1829.

CYR, St. (France).—Louis XIV., at the instigation of Madame de Maintenon, in 1686, founded at this village, near Versailles, an institution for the education of 250 ladies of noble birth. Madame Maintenon died at this place in 1719. In 1793 it was converted into a military hospital. Napoleon I. transferred the military school of Fontainebleau to St. Cyr in 1806. It is called the "Ecole spéciale Militaire de St. Cyr."

CYRENAICA (Africa), a district of Africa, which received this name from Cyrene, its chief city, and was also called Pentapolis, because it contained five principal cities, Apollonia, Arsinoë, Barce, Berenice or Hesperus, and Cyrene. It was colonized by the people of Thera, under Battus, who founded Cyrene B.C. 631. A republic was established in the middle of the 5th century. Ptolemy, son of Lagus, reduced it under subjection to Egypt B.C. 321. It became a Roman province B.C. 74, and was united with Crete B.C. 67. The Saracens completed the conquest of the country A.D. 647, and it is now inhabited by different Arab tribes. Cyrenaica was explored by Dr. Della Cella in 1817, and by Capt. Beechey, R.N., and H. W. Beechey, in 1821 and 1822.

CYRENAICS.—This ancient school of philosophers was thus named from Cyrene, the birthplace of the founder, Aristippus. He began to teach B.C. 365. They made pleasure the *summum bonum*.

CYRENE, or CYRENÆ.—The chief city of Cyrenaica, in Africa, was founded by Battus and his followers from Thera, B.C. 631. Seven kings of this race succeeded, and about B.C. 450 a republic was established. It was afterwards made subject to Egypt, and passed under the dominion of Rome, B.C. 74. The ruins of this town, called by the Turks Ghrennah, still exist.

CYRICUS (Asia Minor) is said to have been settled by some Pelasgi, driven from Thessaly by the Ionians. At an early period it was subject to Athens, and having revolted, was reduced to submission B.C. 411. Mindarus, the Spartan admiral, was defeated in the neighbourhood of Cyzicus, B.C. 410. It was ceded to Persia by the peace of Antalcidas, B.C. 387. Mithridates failed in an attempt to take it B.C. 74; and the Romans made it a free city; of which privilege it was deprived by Tiberius A.D. 37. Christianity was introduced at an early period, and it was made a bishop's see. The Goths ravaged the city A.D. 259, and Procopius seized it A.D. 365. The Mohammedan army besieging Constantinople went into winter quarters at this place in 668, and it soon after declined in importance. In ancient times Cyzicus was seated on an island of the same name; but an isthmus has gradually formed, and what was formerly an island is now a peninsula.

CYROPÆDIUM, or CORUPÆDIUM (Battle).—Lysimachus was defeated and slain at this place, in Phrygia, by Seleucus, B.C. 281.

CYTHERA (Mediterranean Sea).—This island is celebrated as the place whence the worship of the Syrian goddess Aphrodite was introduced into Greece; and is represented, in the ancient mythological accounts, as the spot which received her when she rose from the foam of the sea. It was long dependent upon Argos, and then passed under the rule of Sparta. The Athenians under Nicias seized it B.C. 424. It reverted to Sparta. The Athenians, under Conon, captured it B.C. 393. It is now called Cerigo, and is one of the Icnian Islands.

CZAR.—Voltaire considers this title to have been derived from the tzars or tchars of the kingdom of Cazan. It is evidently of oriental origin. Ivan III. was the first Russian monarch to assume the title. The eldest son is called czarowitz, and the empress czarina.

CZASLAU (Battle).—The Austrians, led by Prince Charles of Lorraine, encountered the Prussians at this village, near Chotusitz, in Bohemia, about thirty-five miles from Prague, May 17, 1742 (O.S.). After a hard-fought battle they were compelled to retire, which they did in good order, carrying away fourteen standards, two pair of colours, and 1,000 prisoners. The Prussians took eighteen pieces of cannon, two pairs of colours and 1,200 prisoners. The Austrians had only gained the village of Czaslau, by a forced march, the night before the battle.

CZERNOWITZ (Austria).—This circle, formerly a part of Moldavia, was ceded to

Austria by Turkey A.D. 1777, and annexed to Galicia in 1786. By the imperial patent of Dec. 31, 1851, it was constituted a crown land, under the name of Buckowina. The chief city, of the same name, is the seat of a Greek bishop.

D.

DACCA (Hindustan) became the capital of the eastern portion of Bengal A.D. 1608, and was confirmed as such by Meer Jumla, the general of Aurungzebe, in 1657. The town reached its greatest prosperity under the viceroyship of Shaista Khan, which terminated in 1689; since which period it suffered a gradual decline, till its opulence was partially restored by the establishment of provincial councils in 1774. A bank was established at Dacca in 1846, and the Serampore mission established a station in 1816.

DACIA, including parts of Hungary, Transylvania, Wallachia, Moldavia, and Bessarabia, was originally peopled by the Getæ, whom Alexander defeated B.C. 335. Lysimachus conducted an expedition into the country B.C. 292. Their retreat having been cut off in the plains of Bessarabia, they were all made prisoners. Valerius Messala attacked the Dacians B.C. 34, and Augustus despatched Lentulus against them B.C. 10; but neither general achieved any striking success. Domitian sent a large force into Dacia under Cornelius Fuscus, A.D. 86, but the expedition proved a failure, owing to the determined valour of the Dacian leader Decebalus. A peace was agreed upon in the year 91, Domitian consenting to pay tribute to the barbarian monarch, and to acknowledge his regal rights; and these humiliating terms seem to have been fulfilled till 101, when Trajan discontinued the payment, and invaded Dacia. After gaining many victories, he granted peace to Decebalus in 103, and assumed the title of *Dacicus*; but war was renewed in 104. The final subjugation of the Daci, and the reduction of their territory to a Roman province, did not occur till the death of Decebalus, in 106. Hadrian, who took measures to contract his empire in 117, retained Dacia, and it remained a province of Rome until Aurelian abandoned it to the Goths, 270. In 376 the Goths were expelled by the Huns, and in 379 Dacia was made part of the Eastern empire by Gratian. In 453 Ardaric, king of the Gepidæ, seized the country, and in 566 it was conquered by a colony of Scythians. They were subdued by Charlemagne, and the Magyars overran Dacia in the 9th century. (*See HUNGARY.*)

DADAR (Battle).—The Brahmoes, 5,000 strong, were defeated, in an attack upon the British forces, near this town, in Beloochistan, Nov. 3, 1840.

DAGGER.—Gregory of Tours, writing in the 6th century, mentions this weapon as part of the equipment of the Frankish soldiery. It afterwards acquired the name *Misericorde*, "because," says Hewitt, "in

the last struggle of contending foes, the uplifted dagger compelled the discomfited fighter to cry for mercy." Under this title, it is mentioned in the Charter of Arras, A.D. 1221, and also by Guiart in 1302. Du Guesclin speaks of its use as a missile in 1368.

DAGHISTAN (Asia).—Peter the Great overran this province of the Caucasus, situated between the Euxine and the Caspian Sea, A.D. 1722. It was incorporated with Russia, as part of the province of Georgia, in 1801; since which period the inhabitants have waged several contests to recover their independence.

DAGUERRETYPE.—This process, by which the pictures of the camera lucida are rendered permanent, was invented by M. Daguerre, A.D. 1838. The method, described by M. Arago, at the meeting of the Académie des Sciences, Jan. 7, 1839, was afterwards greatly improved by other scientific men. (*See PHOTOGRAPHY.*)

DAHARA MASSACRE.—During the war in Algeria, the Ouled-Riahs, a Kabyle tribe, pursued by a French army led by Colonel Pelissier, afterwards duke of Malakoff, took refuge in the caverns of Dahara, June 18, 1845. The French surrounded the caverns, and failing to induce the Ouled-Riahs to surrender, placed lighted faggots at the entrance. When the troops obtained admission, June 20th, they found 500 dead bodies; and of 150 who remained alive, but few recovered.

DAHLIA.—This flower is indigenous to Mexico, whence it was sent to Spain A.D. 1789. The marchioness of Bute introduced it into England the same year; but the stock having become extinct, Lady Holland caused new plants to be imported in 1804. The present British stock is chiefly derived from a large assortment of plants brought from France in 1815. This flower received its name from the Swedish botanist Dahl. On the continent it is called *Georginia*.

DAHOMEY (Africa).—This negro kingdom was founded by Tacoodonon, chief of the Foys, A.D. 1625. It first came under the notice of Europeans early in the 18th century, when King Trudo, who began to reign in 1708, destroyed all the white settlements on the coast. In 1727 the kingdom of Whyda was conquered and annexed, and in 1772 the court of the king of Dahomey was visited by Mr. Norris, who published a very interesting narrative of the cruel customs of the people.

DAINSTADT (Battle).—The Russians, 3,600 strong, were defeated at this place, in Finland, by a Swedish force, amounting to 2,200 men, June 28, 1789. Gustavus III., king of Sweden, served as a volunteer in this action.

DALMATIA (Austria) revolted from Illyria, and became an independent state B.C. 180. C. Marcius Figulus invaded the country B.C. 156, and took Delminium, the capital, compelling the Dalmatians to purchase peace by the payment of an annual tribute.

Another expedition was led against them B.C. 155, and the capital sustained such serious injury that the seat of government was transferred to Salona. L. Cæcilius Metellus headed a third invasion B.C. 119, and was rewarded for his success by a triumph and the surname of Dalmaticus. Gabinius commenced the fourth Dalmatian war B.C. 48, but he was defeated. Octavianus defeated the Dalmatians B.C. 35, and obtained the submission of the country, and its reduction into a Roman province, B.C. 34. Revolts occurred B.C. 16 and 11, and it continued in a very unsettled state until its subjection by Tiberius, A.D. 9. Diocletian, on his abdication, May 1, 305, retired to Dalmatia, which remained undisturbed till 461, when it was threatened by the Suevi, and saved by the valour of Marcellinus. The Heruli, under Odoacer, effected its conquest in 481; and it remained under Gothic sway till Justinian regained possession in 535. In 634 Heraclius invited the Croats to dispossess the Avars, who had attained considerable power, and in five years Dalmatia was occupied by Croatian and Servian vassals of the empire. Christianity was introduced in 640, and in 806 the country submitted to the Franks, who were expelled in 837 by Terpinir, who established the ducal authority. In 887 Dalmatia was plundered by the Narentines, and in 997 the Venetians gained some influence, which they lost in 1052. The Hungarians entered Dalmatia in 1091, and for some time after, its history is little more than a record of struggles between these invaders and the Venetians. The latter ceded all claim Feb. 18, 1358. The Turks invaded Dalmatia in 1500, and for 200 years the country was almost incessantly the seat of war. A peace was concluded in 1573, but war was renewed in 1596; and in 1646 Dalmatia was again invaded by an immense Turkish force. Peace was again concluded in 1669, but broken in 1685; renewed Jan. 26, 1698, again violated in 1714, till at length the peace of Passarowitz in 1718 restored tranquillity to the country. By the treaty of Campo-Formio, Oct. 17, 1797, Dalmatia was ceded to Austria, which power surrendered it to France by the treaty of Presburg Dec. 26, 1805. Under French dominion it was first incorporated with the kingdom of Italy, and subsequently, in 1810, with that of Illyria. In 1814 Dalmatia was restored to Austria, in whose possession it still remains.

DAMASCUS (Syria) is first mentioned in the time of Abraham, B.C. 1912 (Gen. xiv. 15). It was taken by David B.C. 1040 (2 Sam. viii. 6), and was the capital of Syria during the reign of Benhadad, B.C. 930 (2 Chron. xvi. 2). Jeroboam restored it to Israel B.C. 822, but Tiglath-Pileser, king of Assyria, took it B.C. 740, and carried its inhabitants captive to Kir (2 Kings, xvi. 9). It afterwards remained subject to the Assyrians and Persians till B.C. 333, when it was taken by Parmenio, the general of Alexander the Great. The Romans under Pompey effected its capture B.C. 64. Paul commenced his ministry at Damascus A.D. 33 (Acts, ix. 19);

and, according to some authorities, Ananias, by whom the Apostle was ordained, was the first bishop of the see. The city was taken from the Romans in Jan. 635, and by the Saracens, who made it the seat of their government, in 661. In 1006 it was taken by the Ghiznivites, who yielded it in 1075 to the Seljukian Turks. Nouredin (1145—1174) added the kingdom of Damascus to that of Aleppo. The Crusaders laid siege to it in 1149, but without success; and it was taken and sacked by Tamerlane, Jan. 23, 1401. In 1516 it was seized by Selim I. and annexed to the Ottoman empire. In 1832 Damascus was taken by Ibrahim Pasha, and, by a firman, dated May 6, 1833, was granted to Mehemet Ali. In Feb. 1840, it was the scene of a cruel persecution of the Jews. Damascus was restored to Turkey at the conclusion of peace in 1841.

DAMASK.—Rich stuffs of silk and linen were so called because they were originally manufactured at Damascus; whence the trade was carried to Venice, Genoa, and Lyons. In the 15th century most extravagant prices were given for superior qualities, the fashion of wearing it being adopted by Henry V. and Edward IV. Damask table-cloths were first imported from France in 1575.

DAMASK ROSE, so called from Damascus, was introduced into Europe A.D. 1573. It is still largely cultivated in Syria for the purpose of making otto of roses.

DAMIANISTS, the followers of Damianus, the Monophysite patriarch of Alexandria, arose in the 6th century. They made a distinction between the divine essence and the three persons in the Godhead.

DAMIETTA (Egypt), near the site of the ancient Tamiathis, underwent several sieges during the Crusades. It was taken Nov. 5, 1219, but the infidels regained possession in 1221. Louis IX. captured it in June, 1249, and having been taken prisoner, purchased his freedom in 1250, by the surrender of the city to the Saracens, who soon afterwards ordered it to be destroyed. The modern town, erected four miles further from the sea, was fortified by Bonaparte in 1798. The French evacuated it in 1801. An English force took possession of Damietta in 1807.

DANCE OF DEATH.—This subject, so popular with the artists of the Middle Ages, seems to have been first painted A.D. 1312, in the church of the Dominicans at Basle. The earliest printed work on the subject which bears a date is "La danse Macabre," published at Paris in 1485. Holbein's "Dance of Death" was first published at Lyons in 1538. It comprises forty-one cuts, each surmounted by a Latin text, and having underneath four French verses. A second edition of this work appeared in 1542, and it has since been frequently reprinted.

DANCERS.—This sect arose at Aix-la-Chapelle A.D. 1373, and spread through various parts of the Netherlands. Its members, of both sexes, hand in hand, danced furiously till they fell upon the ground. They were

the forerunners of the Convulsionists in France and the Jumpers in England and America.

DANCING is said to have been invented by Athothus, the Egyptian Mercury. The Curetes introduced dancing to time B.C. 1534, and Miriam and the Israelitish women testified their joy at their deliverance from the Egyptians by dancing to the sound of their timbrels, B.C. 1491 (Exod. xv. 20). David danced before the ark of God B.C. 1044 (2 Sam. vi. 14). Æschylus united dancing to the dramatic performances of the Greeks about B.C. 499, and pantomimic dances were introduced on the Roman stage B.C. 22. Dancing was an ordinary recreation at the convivial meetings of the Greeks. Meursius mentions 184 kinds of dancing. Dancing was prohibited in A.D. 366 by the council of Laodicea. The Church Dance, which may still be seen on certain festivals in the cathedral at Seville, was stopped in France in the 11th century. Sir Christopher Hatton, afterwards lord chancellor, is said to have ingratiated himself with Queen Elizabeth by his excellence in dancing.

DANEBOG (Order of Knighthood).—Some authorities refer the institution of this order to the earliest period of the Danish kingdom, while others say it was founded by Valdemar II., A.D. 1219, in commemoration of a miraculous standard which descended from heaven, and rallied his troops when they were on the point of fleeing before the Livonian pagans. In the 15th century the order fell into decay, but it was revived by Christian V. Oct. 12, 1671, and received new statutes Dec. 1, 1693. The constitution of the order was extended by Frederick VI., who issued letters patent to that effect June 28, 1808.

DANEGETL, or DANE MONEY, a tribute exacted by the Danes to secure the cessation of their invasions of England. It was first paid by Ethelred II., or the Unready, A.D. 991, on the advice of Siric, archbishop of Canterbury, and consisted of 16,000 pounds of silver. Another levy of 24,000 pounds of silver was exacted in 1002, and it afterwards became a regular custom for the Anglo-Saxon kings to extort money from their subjects to bribe the Danes. Edward the Confessor abolished the Danegelt in 1051. It was restored by William I. in 1068, and again suppressed at the council held at Oxford by King Stephen in 1136. The last recorded payment of Danegelt took place in 1175. The citizens of London were relieved from the payment of this tax by the 5th article of Henry the First's charter.

DANES.—The Scandinavian tribes who in the 8th, 9th, and 10th centuries, invaded many parts of the continent, and of England, were known under this general name. Their ravages in France and upon the continent of Europe are described under the article NORTHMEN.

A.D.

794. The Danes are defeated at Wearmouth.

795. They land in Ireland.

832. They seize Sheppey Island.

833. They defeat Egbert at Charnmouth.

835. Egbert defeats them at Hengston, in Cornwall.

837. The Danes are defeated at Southampton, but gain a victory on the isle of Portland.

845. They are defeated by Ethelwulf at the Parret.

851. They winter in Sheppey; sail up the Thames with 350 ships; plunder Canterbury and London; and are defeated by Ethelwulf at Ockley, in Surrey.

853. They are victorious in Thanet.

860. They land at Southampton, and threaten Winchester; but are driven back by Osric and Ethelwulf.

867. They take York, which is defended by Ella and Osbert, who both fall in the battle.

869-70. They subdue East Anglia, and destroy the monastery of Bardney and the abbey of Croyland, Coldingham, and Ely.

871. They fight nine battles in the country south of the Thames, and conclude peace with King Alfred.

874. They conquer Mercia.

875. Healfden invades Northumberland, and destroys Tynemouth and Lindisfarne. Guthrum and other chiefs seize Cambridge, where they winter.

876. They take Wareham and Exeter, and conclude a second treaty with Alfred.

877. Danish fleet of 120 vessels wrecked at Swansea. Third treaty with Alfred, done at Exeter.

878. They compel Alfred to hide in Athelney. After six months, he collects his forces, defeats them at Ethandun, and persuades Guthrum to embrace Christianity.

881. The Danes land in Scotland.

884. They renew their attacks, and lay siege to Rochester, which is relieved by Alfred.

894. Alfred defeats Hastings at Farnham, Barmfleet, and Chester.

896. Hastings leaves England.

897. Alfred defeats them near the Isle of Wight.

901. Ethelwold, son of Ethelred, is defeated in a project to assume the crown, and compelled to seek refuge with the Northumbrian Danes, who elect him king.

911. The Danes suffer a great defeat at Wodensfield, from Edward, king of Wessex.

921. The Northumbrian Danes submit to Edward the Elder.

978. The Danes are defeated by the Irish on Tara Hill.

981. A Danish fleet ravages Devon and Cornwall.

991. Another formidable invasion. They are induced to retire on receiving £10,000 of tribute money. (See DANEGELT.)

992. They renew their attacks, and are defeated by Ethelred, in a naval engagement.

994. Sweyn is defeated in an attempt to take London. He ravages Essex, Kent, and the southern counties; and receives £16,000, on condition of his quitting the country.

999. Four thousand Danes are slain at the battle of the Suck, in Ireland.

1002. Danish invasion bought off for £25,000. Ethelred orders the massacre of every Dane in England, which is perpetrated on the eve of St. Bride's day, Nov. 13.

1003. Sweyn invades England, and plunders Exeter and Wilton.

1005. He leaves England, in consequence of a famine.

1006. Another Danish invasion lays waste nearly all England.

1010. The Danes burn Oxford and Cambridge, and obtain possession of sixteen English counties.

1011. They burn Canterbury, and carry away the archbishop, whom they murder the following year.

1012. They receive £48,000 tribute, and disband their fleet.

A.D.

787. First appearance of the Danes in England.

793. They pillage Lindisfarne, and ravage Northumberland.

A.D.

1013. Sweyn takes London, and asserts his rule over the whole country north of Watling-street.
1014. The battle of Clontarf, in Ireland, is lost by the Danes. (*See CLONTARF.*)
1016. Canute, son and successor of Sweyn, gains many victories, and obtains from Edmund Ironside the cession of the northern half of England.
1018. Canute exacts a tribute of £80,000.
1047. An invading fleet lands at Sandwich.
1054. They fight against Macbeth, under Siward, earl of Northumberland.
1066. Sept. 25. They are defeated by Harold, at Stamford-bridge.
1069. The sons of Sweyn arrive, with 240 ships, in the Humber. They burn York, and slay more than 3,000 of its Norman defenders.

DANEWIRKE (Battle).—General Wrangel, at the head of 30,000 Prussians, defeated the Danes, 10,000 strong, after a struggle of eight hours' duration, at this place, near Schleswig, on Easter Sunday, April 23, 1848.

DANISH AMERICA.—The islands of St. Thomas, Santa Cruz or St. Croix, and St. John, which belong to Denmark, are described under their respective heads.

DANTZIC (Prussia), which existed as early as A.D. 970, was taken by Mestwin, duke of eastern Pomerania, in 1271, and by the Poles in 1294. In 1310 it fell under the domination of the Teutonic Order, who retained it till 1454, when it became a free town under Polish protection. In 1517 it was besieged by the Teutonic Knights; and, in 1577, was taken by Stephen Batory, king of Poland, whose authority it had disputed. Charles Gustavus, of Sweden, invested John Casimir II. within its walls in 1656, but without success. In 1709 the plague committed great ravages amongst its population; and, in 1734, it was besieged and taken by the Russians and Saxons. At the second partition of Poland, in 1793, Dantzic was assigned to Prussia. It was taken by the French May 20, 1807, and restored to its former independence by the treaty of Tilsit, July 9, 1807. But though nominally independent, it was really subject to the French, who garrisoned it, and retained it under their authority until they were expelled, after a long siege, by a Russian and Prussian force under Alexander, duke of Würtemberg, Jan. 2, 1814; since which date it has been restored to Prussia. The city was much injured by the explosion of a powder-magazine Dec. 10, 1815. An inundation which occurred April 9, 1829, laid the whole city under water, and destroyed many thousand houses and cattle, besides causing considerable loss of life. In July and September, 1831, Dantzic was visited by the cholera, which destroyed 1,023 lives. The principal buildings are the cathedral, commenced in 1343, and finished in 1503; Trinity Church, founded in 1514; the Rathaus in 1556; and the Hohe Thor in 1588.

DANUBE.—The ancient Danubius, or Ister, was crossed by Darius on his expedition into Scythia, B.C. 515; and by the Celtic bar-

barians previous to their invasion of Greece, B.C. 280. Trajan built a fine stone bridge across it A.D. 103, which was destroyed by Hadrian in the year 120, lest it should enable the northern barbarians to invade the Thracian provinces. Charlemagne formed a magnificent project, which was never carried out, of connecting the Rhine with the Danube by means of a canal. Steam navigation was established on the Danube in 1838, when the Austrian company was formed and incorporated by the emperor. The Bavarian company was established in 1836. The navigation of the Danube was declared free from all impediment or toll by the 15th article of the treaty of Paris, March 30, 1856.

DANUBIAN PRINCIPALITIES.—Moldavia and Wallachia were united under the name of the "United Principalities of Moldavia and Wallachia," by the convention of Paris, signed Aug. 19, 1858. They were placed under the suzerainty of the sultan, but with power to carry on their own administration without his interference, government being administered by a hospodar and elective assembly in each principality, and a central commission common to both principalities. (*See MOLDAVIA and WALLACHIA.*)

DARA (Mesopotamia) was founded by Anastasius, A.D. 505, as a bulwark against the Persians. It was frequently besieged, and was taken by Chosroes I. in 572.

DARDANELLES.—Xerxes threw a bridge of boats across this channel, anciently called the Hellespont, B.C. 481. The bridge was destroyed by a storm. In consequence of this disaster, the water received 300 lashes, and the next bridge remained secure. Alexander crossed the straits B.C. 334 with an army of about 35,000 men. The Saracens under Soliman, the son of Orchan, crossed this channel A.D. 1360, and first erected the Mohammedan crescent in Europe. In 1465 Mohammed II. erected two forts to defend the passage, and in 1659 two more, named Sestos and Abydos, were added by Mohammed IV. The passage of the Dardanelles was effected by Admiral Sir Thomas Duckworth, Feb. 19, 1807, in spite of the severe fire of the forts. He returned through the channel March 1 the same year, when the squadron sustained much injury, owing to the unfavourable weather and to the immense stone shot used by the enemy. The straits were also passed by the allied fleets of England and France at the commencement of the Russo-Turkish war (*q.v.*), Oct. 14, 1853. By a secret article of the treaty of Unkiar-Skelessi, between Russia and Turkey, signed at Constantinople July 8, 1833, the latter power agreed to close the Dardanelles against vessels of war belonging to foreign powers. The ancient rule of excluding all ships of war in time of peace, confirmed in the convention signed at London, July 13, 1841, is recognized by the 10th article of the treaty of Paris, March 30, 1856.

DARDANELLES (Sea-fight).—The Genoese defeated the Venetians, the Catalans, and

the Greeks in an engagement in the Dardanelles, A.D. 1352.

DARIC, a Persian gold coin, struck by Darius the Mede, B.C. 538. The daric was originally coined at Babylon; whence its circulation extended over all the East, and even into Greece. The device was an archer in the act of drawing his bow. Dr. Bernard estimates the weight of the daric at 15 grs. more than our guinea. Specimens in the British Museum weigh 128.4 and 128.6 grs. Hussey estimates its value at £1. 1s. 10d. 1.76 farthing. There were also darics of silver.

DARIEN (Central America).—This isthmus was discovered by Columbus, who founded Porto Bello A.D. 1502. Vasco Nunez de Balboa crossed it and discovered the Pacific Ocean, Sept. 25, 1513. A Spanish colony was established on the isthmus in 1510. William Paterson, the originator of the Bank of England, first proposed to form what is known as the Scottish settlement at Darien in 1694. The company was incorporated by an act of parliament, to which the royal sanction was given June 26, 1695. Three ships and two tenders, having on board 1,200 men, besides women and children, left Leith July 26, 1698. They reached the isthmus Nov. 1. The chiefs of the expedition landed on the following day, and took formal possession of the country, naming it New Caledonia. They built a fort, which they called New St. Andrew, and soon became involved in a quarrel with the Spaniards, who regarded them as pirates and bucaners. Disease committed terrible ravages amongst them, and those that remained alive were compelled to embark in three vessels. More than half of them perished during the voyage to New York. A second expedition, consisting of four ships, with 1,300 men, that had left Edinburgh in August, 1699, did not reach the colony until four months after its abandonment. They built a new fort, and having been assailed by a Spanish fleet and army, concluded a treaty March 30, 1700, engaging to evacuate Darien in fourteen days. They embarked on the 11th of April. Two of the ships were lost, and only a small number of the colonists returned to their native land. In November, 1827, the isthmus was surveyed by Mr. Lloyd, acting under the orders of General Bolivar, with a view to ascertain the best route, either for a road or a canal, by which it might be traversed.

DARLING RIVER (Australia) was discovered by Captain Sturt in 1829, and was named after the then governor of the colony.

DARMSTADT (Germany) was made a city A.D. 1330, and became the residence of the landgraves of Hesse-Darmstadt in 1567. The grand-ducal palace was commenced in 1568, and the town-hall was built in 1580. Darmstadt has been the scene of two conventions: the first, between the grand-duke of Hesse-Darmstadt and Baden, was signed Oct. 5, 1806, and the second, between the grand-duke and Jerome Bonaparte, June 3, 1810.

DARTFORD (Kent) was either founded by the Romans, or built on the site of a former Roman town, as numerous remains of Roman furniture, houses, coffins, &c., are found in its vicinity. Ethelbert founded a nunnery here A.D. 604, which was ravaged by the Danes in 770. The marriage by proxy of Isabella, sister of Henry III., to Ferdinand II. of Germany, was solemnized in Dartford church in 1235. Edward III. held a great tournament in the town in 1330, and founded the priory in 1349. Wat Tyler's insurrection broke out at Dartford in 1382. In 1538 the priory was abolished, and the house converted into a royal palace, and in 1576 the grammar-school was founded. Sir John Spilman erected the first paper-mill in England at Dartford in 1580. In 1780 a camp was formed at Dartford, and in 1790, 1795, and 1805, the powder-mills were blown up, causing, on each occasion, considerable loss of life. The infant-school and mechanics' institute were established in 1843.

DARTMOUTH (Devon) was an important borough, market-town, and seaport at an early period. The crusading fleet assembled in its harbour A.D. 1190. The charter for a market and fair at Dartmouth was granted in 1226, and that by which the town was endowed with a corporation in 1342. In 1347 it was the third in the list of seaports which furnished Edward III. with a fleet for the siege of Calais, and in 1377 it was attacked and nearly destroyed by a powerful French army. In 1404 it was again assailed by a French force under M. du Chastel, whose army was compelled to take flight, after losing its commander and many of the principal officers. During the Great Rebellion, Dartmouth was twice taken; by the Royalists under Prince Maurice in 1643, after a siege of a month's duration, and by the Parliamentary forces under Sir Thomas Fairfax, Jan. 18, 1646. The mechanics' institute was established in 1846.

DAUPHIN, the title of the eldest son of the king of France, was first assumed by Charles (grandson of Philip VI.), afterwards Charles V., to whom the province of Dauphiny was ceded by its sovereign, Humbert II., July 16, 1349. The title was permanently attached to the eldest sons of the French kings by John II. in 1356, and was last used by Louis Antoine, who assumed it in September, 1824, on the accession of his father as Charles X. The dauphins quartered on their shields the arms of France and Dauphiny, and only yielded precedence to crowned heads.

DAVIDISTS, or DAVID-GREGORIANS.—This sect was founded by David George, or Joris, the son of a market crier, who was born at Delft A.D. 1501. He joined the Anabaptists in 1534, when he began to have visions and revelations. He published his "Book of Wonders" in 1542. In 1544 he retired to Basel, in Switzerland, and lived in retirement there twelve years. He called himself the third David, another son of God, and held various heretical opinions. His followers

existed in Holland till about a century after his death.

DAVID'S, ST. (Wales).—The see at Carleon was removed here by St. David before the year 546. In 810 the town was burnt, and in 904 and 906 it was taken and ravaged by the Danes. In 930, Sampson, the archbishop, removed to Dole, in Brittany, and the see became merely episcopal, although the bishops still exercised archiepiscopal authority. In 981 the town was again pillaged by Gothrit and Harold, and in 998 by the Danes, who slew the archbishop. The Saxons took it in 1011, and committed great devastation, and in 1020 it was destroyed by Eilaf. About 1115 Bishop Bernard professed his subjection to the archbishop of Canterbury, and the see lost all archiepiscopal power. John of Gaunt founded a college here in 1365, of which only the chapel is now in existence.

DAVID'S, ST., DAY.—The Welsh custom of wearing a leek in the cap on the 1st of March originated A.D. 540, when the Britons, under Cadwallader, defeated the Saxons. St. David ordered the British warriors to wear a leek, that they might be known to each other; whence the present custom is derived.

DAVIS'S STRAITS (North America) were discovered by Captain John Davis, Aug. 11, 1585, during his first voyage in quest of the north-west passage.

DAVY LAMP for lighting the miner, without risk from the explosion of fire-damp, was invented by Sir Humphry Davy, in 1816.

DEACONS were first appointed by the Apostles to superintend the daily ministrations to the poor, A.D. 31 (Acts, vi. 1—6). The original number was seven; viz., Stephen, Philip, Prochorus, Nicanor, Timon, Parmenas, and Nicolas. Deacons of the Church of England were prohibited from consecrating the Holy Communion by 13 & 14 Chas. II. c. 4, s. 14 (1662), under penalty of £100.

DEACONESSSES are of very early origin in the Christian church, as St. Paul (Rom. xvi. 1) speaks of Phebe as "a servant (*δῆακονος*, or *deaconess*) of the church which is at Cenchrea," A.D. 58. By a law in the Theodosian Code, published A.D. 438, they were to be widows who had had children and were above 60 years old; but instances were not uncommon in which the office was filled by virgins. Their duties were to baptize and catechise women, to attend the sick and martyrs in prison, and to superintend the behaviour of female worshippers at church. It is doubtful when the office was discontinued; but the council of Orange, Nov. 8, 441, forbade any more deaconesses to be ordained; which prohibition was repeated by the Council of Albon in 517, and the Council of Orleans June 23, 533. The order did not, however, become extinct till the 11th century, and in the Greek church deaconesses continued as late as the end of the 12th century.

DEAF AND DUMB.—The earliest legis-

lation for the deaf and dumb appears in the code of Justinian (A.D. 528), which declares persons born thus, incapable of making a will, manumitting a slave, and performing other civil offices. The Venerable Bede states that John, bishop of Hagulstad (Hexham), enabled a deaf man to talk in 685, and Rodolphus Agricola (1442—1485), states the capacity of those born deaf to receive instruction, and mentions instances in which it had been successfully imparted. The art was first reduced to a system by Jerome Cardan (1501—1576), and was successfully practised by the Spanish Benedictine, Pedro de Ponce, who died in August, 1585. Jean Bonifacio published his work on the language of action in 1616, and John Bulwer's "Philocophus, or the Deafe and Dumbe Man's Friende," published in 1648, is probably the earliest English work on the subject. Dr. Wallis announced his ability to teach the deaf in 1653, and George Dalgarno's manual alphabet, the first published in England, appeared in 1680. The great French teachers of the deaf and dumb are the abbé de l'Epée (1712—1789), and the abbé Sicard (1742—1822), who laboured arduously and successfully to establish an effective system of instruction for their unfortunate pupils. The first school for the deaf and dumb was opened in Edinburgh about 1760, by Thomas Braidwood, who removed it to Hackney, London, in 1783. The London Asylum for poor deaf and dumb children was projected and established in 1792, by the Rev. John Townsend, who collected a considerable sum of money for the purpose. The duke of Gloucester laid the first stone of the new Asylum in the Old Kent Road, July 11, 1807. The Asylum of Edinburgh was founded in 1810; that of Birmingham in 1812; of Claremont (Dublin) in 1816; of Glasgow in 1819; of Manchester in 1823; and of Liverpool in 1825. According to the census of 1851, Great Britain and Ireland contained 17,300 deaf and dumb persons, being in the proportion of 1 to 1,590 of the whole population.

DEAN FOREST (Gloucestershire) contained iron-mines at a very early period of English history, probably before the Roman invasion. Its boundaries were defined by 20 Chas. II. c. 3 (1667). The mine law courts, for the protection of the free miners, &c., were abolished in 1777, and the free miners have since lost many of their alleged rights. Riots broke out here June 8, 1831, in consequence of the opposition of the foresters to the inclosure of any part of the forest, when upwards of 2,000 men destroyed the fences, and indulged in other riotous proceedings.

DEATH (punishment of).—Among the ancient Jews, stoning, burning, and crucifixion were the chief capital penalties. Draco, B.C. 621, endeavoured to repress crime among the Greeks, by visiting every offence with death; but Solon, B.C. 594, limited the extreme sentence of the law to murder, and a few other heinous offences.

The Romans inflicted it on murderers, traitors, violators of public morals, and vestals who broke their vows of chastity. The codes of Theodosius and Justinian, promulgated A.D. 438 and 528, were very merciful as regards capital punishment, which was chiefly confined to murder, treason, adultery, forgery (if committed by a slave), and man-stealing. Under the Anglo-Saxons, it was almost limited to theft, other offences, including murder, being dealt with by fines. William the Conqueror (1066—1087) abolished it altogether as a system, and substituted mutilation. Nevertheless the first instance of decapitation for treason, in this country, occurred in his reign, Waltheof, earl of Northumbria, being beheaded at Winchester, May 31, 1076. Henry I. revived the capital penalty in certain kinds of theft in 1108, and in 1241, hanging, drawing, and quartering were first inflicted on a pirate named Maurice. The punishment of death subsequently became much more common, and in the time of Edward II. (1307—1327) was awarded to traitors, who were drawn and hanged; to murderers, robbers, and incendiaries, who were hanged; to heretics, who were burned; and to offenders against nature, who were buried alive. By 4 & 5 Vict. c. 56 (June 2, 1841), it is now limited to the crimes of treason, murder, unnatural offences, setting fire to the queen's ships or stores, injuring life with intent to murder, burglary accompanied with attempts to murder, robbery accompanied with stabbing or wounding, setting fire to a dwelling-house having any person therein, setting fire to, casting away, or otherwise destroying ships with intent to murder, exhibiting false lights with intent to bring ships into danger, and piracy, accompanied with stabbing, &c.

DEATH'S HEAD, (Order of,) was founded by the duke of Würtemberg, A.D. 1652. It is for females only.

DEBTORS. (See **BANKRUPTS**, **IMPRISONMENT FOR DEBT**, &c.)

DECCAN (Hindustan).—The boundaries of this territory have varied greatly at different periods. The term is now usually applied to the southern portion of India, situated between the Nerbudda and Kustna rivers. Its first independent sovereign was Allah ud Deen, A.D. 1337; and in 1690 it was conquered by Aurungzebe, who divided it into six provinces. In 1717 Nizam ul Mulck wrested it from the Mongol sovereigns of Delhi, and rendered it subject to the Mahrattas, who maintained their ascendancy till 1818, when a large portion was ceded to the British.

DECELEIA (Greece).—This place, originally one of the twelve cities of Attica, was taken and fortified by the Lacedæmonians B.C. 413, and was retained by them till the end of the Peloponnesian war.

DECEMBER, so called from *decem*, ten, was the tenth month in the year of Romulus, B.C. 753; and became the twelfth, when Numa Pompilius placed the months of January and February before March,

B.C. 713. During the reign of Commodus (A.D. 180—192) it was called Amazonius, in honour of the emperor's mistress Martia, who had been painted in the habit of an Amazon.

DECEMVIRS.—The supreme council of ten, appointed at Rome B.C. 451, compiled their laws of the ten tables the same year, and at first governed so as to win the respect of their fellow-citizens. But, in the year B.C. 449, they were deposed, in consequence of the tyranny of Appius Claudius towards Virginia, and the consular government was restored.

DECENNALIA.—These festivals were instituted by the emperor Augustus, B.C. 24, in acknowledgment of the prosperity of his administration during the preceding ten years. They were continued by the emperors every tenth year of their reign, with games, sacrifices, and largesses to the people. The last was celebrated by Theodosius II. A.D. 411.

DECIMAL SYSTEM was applied by the French government to coinage, weights, and measures, in 1792. Sir John Wrottesley introduced it to the notice of Parliament, Feb. 25, 1824, but no measures were adopted for testing its utility. A committee of the House of Commons reported in favour of its adoption Aug. 1, 1853; and in Nov. 1854, a commission of inquiry was appointed, consisting of Lord Monteagle, Lord Overstone, and Mr. Hubbard. The Decimal Association, formed in June, 1854, and the International Association, instituted at Paris in 1855, both labour for the introduction of the decimal system.

DECIMATION was introduced among the Romans as a military punishment by Appius Claudius, about B.C. 449, and continued in use till it was abolished by Theodosius, A.D. 383.

DECIMUS (Battle).—Belisarius defeated the Vandals Sept. 14, 533 A.D., on a plain ten miles from Carthage, and on this account the victory received the name of *Decimus*.

DECLARATION OF RIGHTS.—This declaration for vindicating and asserting the ancient rights and liberties of the subject was agreed to by the lords spiritual and temporal, and the Commons, Feb. 12, 1689 (O.S.). It was read before William, prince of Orange, at Whitehall, and accepted by him Wednesday, Feb. 13 (O.S.). (See **BILL OF RIGHTS**.)

DECRETALS, letters written by the popes to decide questions in ecclesiastical law. Pope Sericius wrote the first A.D. 385, to Himerius, bishop of Tarragona, in Spain. A series of forged decretals were written in France between the years 829 and 845, the aim of which was to exalt the episcopal dignity, and increase the power of the upper magnates of the Church. Gratian published a collection of decretals in 1150, and Gregory IX. compiled five books of them, which were called the *Pentateuch*, in 1234, to which Boniface VIII. added a sixth in 1298. Clement V. issued his five books, known as the

Clementines, in 1313, and John XXII. used them as the foundation of the canon law in 1317. This was the last authentic series of decretals. The later ones, called Extravagantes, have only been occasionally preserved, and the latest of them was written by Sixtus IV. in 1483.

DEDICATION OF CHURCHES.—We read in Exodus (xl. 33, B.C. 1490), that Moses dedicated the tabernacle in the wilderness, and in 1 Kings (viii. 1—64, B.C. 1004), that Solomon devoted his temple to the service of God. The second temple was likewise dedicated, as we learn from Ezra (vi. 16, 17, B.C. 515). According to Bingham, the first authentic accounts of the consecration of Christian churches occur in the 4th century, when, in the words of Eusebius, "it was a desirable sight to behold how the consecrations of the new-built churches and the feasts of the dedications were solemnized in every city." The church of Jerusalem, erected by Constantine on the site of the Holy Sepulchre, was consecrated by a full synod of bishops specially convened for the purpose, A.D. 335; and in 341 the church of Antioch was also dedicated by a great company of bishops summoned for that end.

DEEDS.—Among the Anglo-Saxons, when title-deeds were lost, new ones were prepared, from memory, of similar effect; an instance of which occurred A.D. 903. Deeds were not generally dated until the reign of Edward II., although the practice commenced in the time of Edward I. The indenture of deeds was rendered unnecessary by 7 & 8 Vict. c. 76, s. 11 (Aug. 6, 1844).

DEEG (Hindustan) was fortified by Sooraj Mull, A.D. 1760. In 1776 it was taken by Nujiff Khan, after a siege of twelve months. General Fraser defeated Holkar under its walls Nov. 13, 1804; and Lord Lake took the fortress by storm Dec. 14 in the same year.

DEFAMATION.—By the laws of Lothaire, king of Kent (A.D. 673—684), calumny and defamation were visited by severe fines. Under Alfred, Edgar, and Canute, those who spread false reports forfeited their tongues, unless they paid the full amount of their mulct. The law respecting defamation of character was amended by 6 & 7 Vict. c. 96 (Aug. 24, 1843); and the offence was removed from the jurisdiction of the Ecclesiastical courts by 18 & 19 Vict. c. 41 (June 26, 1855).

DEFENCE OF THE REALM ACT.—This act, "To make better provision for acquiring lands for the defence of the realm" (23 & 24 Vict. c. 112), was passed Aug. 28, 1860.

DEFENDER OF THE FAITH.—Leo X. conferred the title of "Fidei Defensor" on Henry VIII., as a mark of approval of his work against Luther, dedicated to that pontiff. The bull by which it was granted bears date Oct. 11, 1521, and the title was confirmed by 35 Hen. VIII. c. 3 (1543). The title had, however, been assumed by the kings of England previous to the time

of Henry VIII. Richard II. used it in his proclamation against the opinions of Wycliffe, dated Westminster, July 3, 1382.

DEFENDERS, AND PREP-O'DAY BOYS.—two Irish factions, the first being Roman Catholics, and the last Presbyterians, which originated July 4, 1784, near Market-hill, in the county of Armagh. On Whit-Monday, 1785, seven hundred Protestants, known as the Nappagh fleet, met the Defenders, who had assumed the title of the Bawn fleet, and were on the point of coming to an engagement, when they were induced to separate by some private gentlemen. In January, 1793, Ireland was much disturbed by the Defenders, who attacked the houses of Protestants. A battle was fought between these two factions Sept. 21, 1795, at the village called the Diamond; in which forty-eight Defenders were killed, and many more wounded. To commemorate this battle the first Orange lodge was formed.

DEGRADATION.—In the Primitive Church this sentence was awarded to all who were guilty of very flagitious crimes. In 767 it was executed upon the patriarch of Constantinople, who was compelled to leave the church backwards, and was stripped of his pallium, while an anathema was pronounced over him. By 23 Hen. VIII. c. 1, s. 6 (1531), clerks convicted of treason, murder, &c., were to suffer degradation. In chivalry, knights are degraded only for the most heinous offences. Instances occurred as early as 1322, and as late as 1621. The mode of execution was for the culprit's spurs to be hacked off his heels, his sword broken over his head, and himself announced to be "no longer knight, but a scoundrel-knave." Peers can only lose their nobility by death or attainder; though one instance occurs in which parliament degraded a nobleman for poverty; viz. that of George Neville, duke of Bedford, who was degraded in 1477.

DEGREES OF GEOMETRY were first measured by Eratosthenes, who flourished B.C. 275—194. Hipparchus of Nice, B.C. 162, first determined the relative positions of places by means of their latitudes and longitudes.

DEGSASTAN, or DEGSTAN (Battle).—Ethelfrith defeated the Scots at this place, by some supposed to be Dalston, in Cumberland, A.D. 603.

DEIRA.—The conquests of Ida, in the North of England, were, on his death, divided into two states—Deira and Bernicia. Ella became king of the former A.D. 559. On his death, in 588, Deira was joined to Bernicia. Oswin seized Deira in 644, and was slain by Oswy, king of Bernicia, Aug. 20, 651.

DEISTS.—This appellation was assumed in France and Italy about the middle of the 16th century, by those who were sceptical in regard to Christianity, but acknowledged the existence of a God; and they are mentioned as a new sect in the preface to the second volume of Viot's "Instruction

Chrétienne," published in 1563. Among the earliest writers who erected deism into a system, must be classed Lord Herbert of Cherbury, whose work "De Veritate" appeared at Paris in 1624. Other eminent deists were Hobbes, who died in 1679; Toland, in 1722; Tindal, in 1733; Bolingbroke, in 1751; Hume, in 1776; Gibbon, in 1794; Paine, in 1809; and among foreigners, Voltaire, in 1778; Rousseau, in 1778; and Condorcet, in 1794.

DELAWARE (United States), so called from Lord De la War, governor of Virginia, who was the first to enter the bay, A.D. 1610. It was colonized by the Swedes in 1627; taken by the Dutch in 1655; and seized by the English in 1664. In 1704 it was erected into a separate colony, which rank it maintained till the separation from the mother country. Its constitution was formed in 1776, and amended in 1831.

DELEGATES (Court of).—On the prohibition of appeals to the pope, the Court of Delegates was created to exercise the supreme appellate jurisdiction. It generally included the judges of the court of Westminster, and the doctors of the civil law, and was established by 25 Hen. VIII. c. 19 (1533). Its jurisdiction was abolished by 2 & 3 Will. IV. c. 92 (Aug. 7, 1832), which provided that all appeals formerly made to it should in future be laid before the sovereign in council; and this act was amended by 3 & 4 Will. IV. c. 41, s. 3 (Aug. 14, 1833), which ordered all such appeals to be referred to the judicial committee of the privy council.

DELFT (Holland) was founded by Godfrey le Bossu, duke of Lower Lorraine, A.D. 1074. The new church was erected in 1381; and the town was much injured by a fire in 1536. Here Hugo Grotius was born, April 10, 1583; and William I., prince of Orange, assassinated by Balthazar Gérard, July 10, 1584. The Hôtel de Ville was built in 1618. A mausoleum, erected in memory of William, in the new church, in 1620, is considered one of the finest objects in the town. Delft suffered severely from the explosion of a powder-magazine in 1654.

DELHI (Hindustan), the ancient capital of the Patan and Mongol empires, was an important city, governed by its own rajah, as early as A.D. 1008. In 1011 it was taken and pillaged by Sultan Mahmoud, of Ghuznee; and in 1193, Cuttub ud Deen wrested it from the Hindoo princes, and founded the Patan, or Affghan empire. Timour crossed the Indus, and captured Delhi, in 1398; and in 1525, Sultan Baber took the city, and abolished the Patan dynasty, establishing in its stead that of the Mongols. Akbar, the greatest of the Mongol emperors of Delhi, commenced his reign in 1556, and died in 1605. In 1735 the city was partially burnt by the Mahrattas, and soon afterwards, March 9, 1739, it was taken by Nadir Shah, who rendered its capture notorious by the

cruelty and rapacity with which it was effected. The Mahrattas obtained possession of Delhi in 1770, and the Rohillas in 1788. The battle of Delhi was fought Sept. 11, 1803, between the French and Mahrattas, under Bourquin, and the English, under General Lake, and gained by the latter, who entered the city the following day. In Oct. 1804, it was besieged by Holkar, who was compelled to retire in spite of his superior force. From this period no event of importance occurs in the history of Delhi until May 11, 1857, when it was entered by fugitive rebel sepoys from Meerut, and made the head-quarters of the rebellion. The English laid siege to it on the 8th of June, commenced the cannonade Sept. 11, and completed the capture Sept. 20. The king and his two sons were taken Sept. 21, and the latter were immediately shot by Lieut. Hodson. The English troops left Delhi in pursuit of the rebels Sept. 23.

DELICATE INVESTIGATION.—This inquiry into certain alleged improprieties on the part of Caroline Elizabeth, then princess of Wales, and afterwards queen of England, as wife of George IV., was conducted by a commission appointed by the king, May 29, 1806, and composed of Lords Spencer, Grenville, Erskine, and Ellenborough. The chief promoters of the investigation were Sir John and Lady Douglas, who laid charges against the princess, of which the committee declared her innocent, although they condemned her for culpable levity of conduct. Sir John and Lady Douglas persisted in their assertions, and in March, 1813, the subject was much discussed in the House of Commons. The bill for the degradation of the queen was proposed by Lord Liverpool, and read for the first time, July 5, 1820. Its second reading took place Aug. 17, and the case was opened by the Attorney General in support of the bill, Aug. 19. Mr., afterwards Lord Brougham, commenced the defence, Oct. 3, and the Lords voted in favour of the third reading of the bill, Nov. 10. In consequence, however, of the strong feeling of the country in favour of the queen, and of the nearly equal state of opinion among the peers, the majority only amounting to 9, the bill was abandoned on the motion of Lord Liverpool.

DELINQUENTS.—All persons assuming powers not authorized by statute were, by the Long Parliament, in 1640, declared to be delinquents. On the 15th of Feb. 1641, the House of Commons ordered a person to be sent for as a delinquent for speaking scandalous words against a member; and June 7 in the same year the House of Commons ordered, that when any man was sent for as a delinquent, and afterwards by order of the House was bailed, he should not on that account be discharged of arrest in other suits. Hume remarks, "This term was newly come into vogue, and expressed a degree or species of guilt not exactly known or ascertained." Many of the nobility and gentry, for exercising what they believed to

be the legal powers of magistracy, were involved in the crime of delinquency.

DELUM (Battles).—The Boeotians defeated the Athenians near the temple of Apollo, at Delium, B.C. 424. Socrates, and his pupil Alcibiades, took part in this battle. The troops of Antiochus of Syria defeated the Romans at Delium, B.C. 192.

DELOS (Aegean Sea).—This island, one of the Cyclades, is said to have been the birth-place of Apollo, and was one of the chief seats of his worship. It was made the common treasury of the states united against Persia, B.C. 477. The Athenians purified it by removing all its tombs, &c., B.C. 426; and banished all its inhabitants B.C. 422. About B.C. 146 it became important as a seat of commerce, but it subsequently lost all trade, and is now a mere heap of ruins.

DELPHI (Greece).—The celebrated temple and oracle of the Pythian Apollo is said to have been founded by the Amphictyons B.C. 1263. It was destroyed by fire B.C. 548, and some accuse the Pisistratidæ of having burnt it, but Herodotus (ii. 180) acquits them of any such intention. It was rebuilt by the Amphictyons, and decorated by the Alcmaeonidæ, who so enriched the new edifice that Xerxes sent an expedition in search of plunder, B.C. 480. The Persians, however, were compelled to retreat by the immense blocks of stone which were hurled upon them by supernatural means, according to the report of the priests. The Phocians seized the temple B.C. 357, and enriched themselves with its immense wealth, which amounted to 20,000 talents of gold and silver. Philip of Macedon restored it to the custody of the Amphictyons B.C. 346, and it remained undisturbed until attacked by the Gauls under Brennus, B.C. 279, when the enemy was a second time repelled by the overthrow of huge masses of rock. It was again plundered by Sylla, B.C. 82; and by Nero, who took from it 500 brazen statues, A.D. 67. The temple was suppressed by Theodosius, who died A.D. 395, and with it the existence of the town may be said to have ceased.

DELPHIN CLASSICS.—This edition, suggested by the duke of Montausier, was prepared by order of Louis XIV. for the use of the Dauphin, whence the name (*In usum serenissimi Delphini*). Hallam (Lit. Hist., vol. iv. pt. 4, ch. 1), says,—"The choice of authors as well as of editors was referred to Bishop Huet, who fixed the number of the former at forty." The first edition consisted of sixty-four volumes, all of which, with the exception of Ovid, issued at Lyons, were published at Paris. Florus and Sallust appeared in 1674, and Ausonius in 1730. Mr. Valpy commenced the republication of the Delphin Classics in 1818. The editions are unequal in merit.

DELUGE.—The first mention of the Deluge occurs in Gen. vi. 7—22, which describes the directions received by Noah relative to the construction of the ark. The commencement of the flood is related Gen. vii. 10—12. The

waters increased for forty days (v. 17), and remained upon the earth 150 days (v. 24), at the end of which time the ark rested on Mount Ararat (Gen. viii. 4). The following are some of the dates assigned to this event:—

	B.C.		B.C.
Septuagint	3246	Playfair	2352
Jackson	3170	Usher and English	
Hales	3155	Bible	2348
Josephus	3146	Marsham	2344
Persian	3103	Petavius	2329
Cali Yuga	3102	Irish	2296
Chinese	3000	Strauchius	2293
Samaritan	2998	Hebrew	2288
Howard	2698	Vulgar Jewish	2104
Clinton	2482		

Besides the general Deluge, there are others recorded by classical authors, of which the chief are those of Ogyges, about B.C. 1760, and Deucalion, B.C. 1504, the first of which was confined to Attica, and the latter to Thessaly.

DEMBEWIELKIE (Battle).—The Poles defeated the Russians with great slaughter at this place, near Warsaw, March 31, 1831.

DEMERARA AND ESSEQUIBO (South America).—Colonies were planted on the banks of these rivers by the Dutch, about 1580. They were taken by the British under General Whyte, April 22, 1796; and restored to Holland, by the peace of Amiens, March 27, 1802. The English captured them again Sept. 20, 1803. By an agreement, signed Aug. 13, 1814, the Dutch surrendered these possessions to England. (*See* GUIANA.)

DEMETRIA.—The Athenians instituted an annual festival under this name in honour of Demetrios Poliorketes, B.C. 307.

DEMMIN (Prussia).—This was an important town in the time of Charlemagne, and has sustained several sieges. The Swedes took the garrison prisoners A.D. 1757, and the Prussians regained possession in 1759. The French captured Demmin April 17, 1807.

DENAIN (Battle).—At this village, in France, Marshal Villars, at the head of a French army, defeated the allied Dutch and German troops, commanded by the earl of Albemarle, July 24, 1712. Prince Eugene, who by some writers is represented as having taken part in the action, was, by the admirable strategy of Marshal Villars, compelled to witness a defeat that he could not avert.

DENARIUS, the standard silver coin among the Romans, was first coined B.C. 269. Its value amounted to ten bronze asses, or eight-pence halfpenny. About B.C. 216 its value was raised to sixteen asses, the as being reduced considerably in weight. Gold denarii were struck at Rome B.C. 206.

DENIS, St. (France).—A chapel in honour of St. Denis was founded at this place A.D. 250. Dagobert was buried here in 580. Dagobert I. founded the abbey in 613, and it has ever since been the place of sepulchre for the French monarchs. The first church was finished in 775, and the present edifice, commenced in 1130, was completed in 1231.

A battle between the Roman Catholics and the Huguenots was fought in its vicinity in 1567, when the latter were victorious. The abbey was suppressed in 1792. By a decree of the Convention, Aug. 6, 1793, the royal tombs were opened, but they were restored by Napoleon in 1806.

DENMARK.—The early history of this country is involved in obscurity. Some native writers give lists of its sovereigns from the time of Noah, while others are content with ascribing the foundation of the kingdom and the name of the country to Dan, whose reign, they say, began B.C. 1038. The first inhabitants were probably the Cimbric or Cimmerians, who were supplanted by the Goths four or five centuries before the Christian æra.

B.C.

1038. Alleged accession of Dan.

483. Reign of Ruric Slingeband, during which the events that form the basis of Shakespeare's "Hamlet" occurred.

70. Arrival of Odin.

40. Death of Skjold, usually reputed the founder of the monarchy.

A.D.

794. Ragnar Lodbrog perishes in an attempt to invade Northumberland.

828. Harold I., the first Christian sovereign of Denmark, retires to a monastery.

912. Rollo, the Dane, obtains Normandy.

944. Harold II. assists the Normans against the French king, whom he conquers and makes prisoner.

991. Harold II., famous for his prowess in war and his zealous adoption of Christianity, is assassinated by order of his son Sweyn.

1013. England submits to Sweyn.

1014. Accession of Canute the Great.

1028. Canute conquers Norway, which he governs simultaneously with England and Denmark.

1042. Magnus, king of Norway, inherits the throne of Denmark.

1047. Separation of Norway and Denmark; Sweyn II. ascending the throne of the latter country.

1087-1095. Reign of Olaf II., surnamed the Hungry, in consequence of a terrible famine which visited his kingdom.

1147. The sovereignty is divided between Canute V. and Sweyn III., who wage a long and bloody civil war with each other.

1157. Valdemar the Great succeeds to the undivided throne.

1250. Murder of Eric VI. by his brother Abel.

1325. Christopher II. is expelled by his subjects.

1326. Aug. 15. Count Gerhard, of Holstein and Stormarn, receives the duchy of South Jutland as an hereditary fief, with royal rights over the inhabitants of Sleswig.

1340. Valdemar IV. is elected king.

1397. June. The Union of Calmar. Margaret becomes queen of Denmark, Norway, and Sweden, which are united into one kingdom.

1440. Eric bestows Sleswig on Adolf, count of Holstein.

1448. Christian I. ascends the throne, and founds the Oldenburg dynasty. Sweden resumes its independence under Charles Knutson.

1457. John Bengtson, archbishop of Upsal, defeats Charles Knutson, and reunites the three kingdoms under one monarch.

1464. Christian I. is made duke of Sleswig and count of Holstein.

1477. Christian I. relinquishes his efforts to maintain the sovereignty of Sweden.

1481. May 22. Death of Christian I. He is succeeded on the Danish and Norwegian thrones by his son John.

A.D.

1497. Nov. 19. Sweden submits to John.

1523. Deposition of Christian II.

1525. Gustavus Vasa becomes king of Sweden, which he renders independent of Denmark and Norway.

1527. Frederick I. declares in favour of Lutheranism.

1533. On the death of Frederick I., the succession is disputed by the deposed Christian II., Christian duke of Holstein, and Prince John of Holstein. The duke of Holstein succeeds as Christian III.

1620. Tranquebar, in Hindostan, is ceded to Denmark.

1652. Instigated by the Dutch, Frederick III. seizes and sells twenty-two English vessels at anchor in the port of Copenhagen. Cromwell compels the Dutch to make reparation.

1658. Denmark is invaded by Charles Gustavus, of Sweden, who threatens Copenhagen, and receives Scania, Blekingen, Halland, Bornholm, Bahus, Janetland, Krontheim, and parts of Bremen and Rugen.

1660. Oct. The authority of the king is made absolute and hereditary.

1667. Acquisition of Oldenburg and Delmenhorst.

1720. June 14. Peace of Stockholm, between Denmark and Sweden.

1726. Rantzau is added to Denmark.

1728. A fire at Copenhagen lays the city in ruins, burning six churches, the university, with its library, the town-hall, many other public buildings, and 2,500 private houses.

1761. Holstein-Plön is added to Denmark.

1772. Jan. 16. Caroline Matilda, queen of Christian VII., is arrested on a charge of incontinence, and afterwards banished. April 28. Execution of Counts Struensee and Brandt, for implication in the queen's offence.

1773. Holstein-Gottorp is ceded to Denmark by Russia, in return for Oldenburg and Delmenhorst.

1784. March 28. Christian VII. having become insane, his son, Prince Frederick, is appointed regent.

1786. Liberation of the serfs in Denmark.

1795. Establishment of tribunals of conciliation, to adjust law disputes by mediation instead of litigation.

1801. April 2. Bombardment of Copenhagen by Lord Nelson, who destroys or captures seventeen sail of the line. The Danish loss is said to amount to 1,800 men. This victory puts an end to the Armed Neutrality.

1803. The Danish poor-law comes into operation. Its provisions are, the maintenance of the destitute at the public cost, and the total prohibition of begging. The Danes suppress the slave-trade.

1806. Sept. 9. Holstein is declared an integral part of the Danish monarchy, quite and for ever separate from the Germanic empire.

1807. Aug. 16. Copenhagen is invested by the British fleet under Admiral Gambier, and the army under Lord Cathcart. Sept. 2. Firing commences. Sept. 5. The town capitulates, and its fleet, consisting of 18 ships of the line, 15 frigates, 6 brigs, and 25 gun-boats, falls into the hands of the English.

1810. The conscription is introduced.

1813. Sept. 5. War is declared against Sweden. Dec. 16. Holstein is held by the allies.

1814. Jan. 14. Peace of Kiel. Denmark cedes Heligoland to Great Britain, and Norway to Sweden, receiving in return Swedish Pomerania and Rügen.

1815. June 4. Denmark cedes Pomerania and Rügen to Prussia, receiving Lauenburg and a pecuniary compensation as indemnity. June 8. The king joins the German Confederacy.

1816. Introduction of savings' banks.

- A.D.
1820. Introduction of system of mutual instruction.
1824. June 16. Commercial treaty with Great Britain signed at London.
1825. A violent storm breaks through the isthmus between the North Sea and the Lyneford, thereby making the north part of Jutland an island.
1831. Frederick VI. institutes provincial states.
1846. July 8. Christian VIII. issues a letter patent, declaring his undoubted right to the duchy of Sleswig, and his intention to submit his claim to Holstein for due consideration.
1848. Jan. 28. Frederick VII. publishes a new constitution, by which Sleswig, Holstein, and Denmark, are to be governed by "common states," elected alternately in the duchies and Denmark. March 24. Revolt of Sleswig and Holstein commences at Kiel. April 23 (Easter Sunday). The Prussians defeat the Danes, and take possession of Sleswig. May 1. Jutland is occupied by the Prussian forces. Aug. 26. Armistice for seven months is signed at Malanö.
1849. July 10. The armistice is renewed for six months.
1850. July 2. Peace with Prussia is signed at Berlin. July 17. Danish troops enter Flensburg. July 25. The Danes conquer the troops of Sleswig-Holstein, at Idstedt. Aug. 17. Cession of the Danish possessions on the coast of Africa to Great Britain. Oct. 4. The Holsteiners, under General Willisen, attack Friederichstadt, but are driven back.
1851. Jan. 11. Submission of the duchies to Denmark, and reference of the matters in dispute to the arbitration of the Germanic Confederation.
1852. Feb. 18. The government of Holstein is assigned to the Danish minister, for Holstein-Lauenburg, by the German commissioners. The Prussian and Austrian troops leave the duchy. May 8. International treaty, relative to the succession of the crown of Denmark, is signed at London.
1855. Oct. 1. The Danish government sends despatches to all the states interested in the question of the Sound dues, inviting them to confer with Denmark relative to a definite arrangement. Oct. 2. The king publishes a new constitution.
1857. March 14. Denmark agrees to abolish the Sound dues, on receiving a compensation equal to £3,386,258.
1858. Nov. 6. Great changes in the constitution of Holstein.
1859. July 14. Denmark is connected with Great Britain by submarine telegraph.
1860. May 3. The Prussian diet resolves to assist the duchies of Sleswig-Holstein against Denmark.
1861. Jan. Preparations are made to resist the anticipated attack of Germany and Prussia. March. Holstein rejects the propositions of the Danish government. April 8. The infantry is ordered to be doubled. April 27. The government delivers its final answer respecting Holstein, and refuses to make further concessions. July 27. About 500 Sleswigers, in favour of the rights of Denmark over Sleswig, visit Copenhagen where they meet with an enthusiastic public reception.

SOVEREIGNS OF DENMARK.

DENNEWITZ (Battle).—The allied Prussian, Swedish, and Russian army defeated the French, under Marshal Ney, at the village of Dennewitz, in Prussia, Sept. 6, 1813. The Prussians, who for some time maintained their ground against overwhelming numbers, were, by the arrival of Bernadotte with the Swedes and Russians, strongly reinforced, when the French were completely routed. They lost 13,000 men, 43 pieces of cannon, three standards, and 6,000 stand of arms, whilst the loss of the allied army was about 6,000 men.

DEODAND.—By 9 & 10 Vict. c. 62 (Aug. 18, 1846), the forfeiture of any chattel for having been the cause of the death of a man, was abolished from and after Sept. 1, 1846. Deodands, at first given to the Church, afterwards became the property of the Crown.

DEORHAM (Battle).—Ceaulin, king of the West Saxons, defeated the Britons at Deorham, supposed to be Dirham, in Gloucestershire, A.D. 577. Three British kings fell in the battle, and the victors took possession of Bath, Cirencester, and Gloucester.

DEPTFORD (Kent).—Henry VIII. established a storehouse here about 1513, and granted a charter to the shipmen and mariners of England to found a guild in the parish church, under the name of the "Guild of the Most Glorious and Undivided Trinity," May 20, 1514. Here, too, Queen Elizabeth visited the *Golden Hind*, in which Drake had circumnavigated the globe, April 4, 1581. The town suffered from a fire in 1652, and from a flood in 1671. Trinity House hospital was founded in 1685. In 1698 Deptford was the residence of the Czar Peter the Great, during his initiation into the mysteries of ship-building. Waterworks were erected here in 1699; and the victualling-office, built in 1745, was burnt in 1749. The ancient hall of the Trinity House was taken down in 1787, and the hospital was rebuilt in 1788.

DEPUTIES (Chamber of).—The French legislative assembly received this title by a charter of Louis XVIII. in 1814, and retained it till the publication of Louis Napoleon's constitution, Jan. 14, 1852, which appointed the Corps Législatif in its stead.

DERBEND (Asia), the capital of Daghistan, occupies the site of the ancient Albania. The Russians took it A.D. 1722, restoring it to the Persians in 1735. It again fell into the power of Russia in 1796, and was incorporated with that empire early in the present century.

DERBY (Derbyshire) is supposed to have been founded by the ancient Britons. At the Conquest, A.D. 1066, it was granted to William Peverell, natural son of William I., and in 1160 a Benedictine nunnery, of which some vestiges still remain, was founded. The grammar-school, which is supposed to be one of the most ancient endowments in England, was granted to the corporation in 1554. In 1592 the plague visited the town and carried off many of its inhabitants, and in 1745 it was the extreme point reached by the Pretender in his invasion of England. The silk manufacture was introduced by John Lombe in 1717, that of porcelain in 1750, and in 1793 Messrs. Strutt erected here the first fire-proof mill in England. The infirmary was erected in 1800, and the town-hall in 1828. In 1833-4, 2,400 factory hands struck work, and the prosperity of the town materially suffered in consequence. The arboretum, which was presented to the town by Mr. Joseph Strutt, was opened Sept. 16, 1840, and in Oct., 1841, the town-hall was destroyed by fire. A new cattle-market was opened in 1861.

DERBY ADMINISTRATIONS.—The first was formed on the resignation of the Russell Administration, officially announced Feb. 23, 1852. The cabinet was thus constituted:—

Treasury	Earl of Derby.
Lord Chancellor	Lord St. Leonards.
President of the Council ..	Earl of Lonsdale.
Privy Seal	Marquis of Salisbury.
Chancellor of Exchequer ..	Mr. Disraeli.
Home Secretary	Mr. Walpole.
Foreign Secretary	Earl of Malmesbury.

Colonial Secretary	Sir John Pakington, Bart.
Admiralty	Duke of Northumberland.
Board of Control	Mr. Herries.
Public Works	Lord John Manners.
Board of Trade	Mr. Henley.
Postmaster-General	Earl of Hardwicke.

They were defeated on their budget Dec. 16, 1852, and on the following day resigned the seals of office. (See **ABERDEEN ADMINISTRATION.**)—The second was formed on the resignation of the first Palmerston Administration, Feb. 20, 1858. The Cabinet was thus constituted:—

Treasury	Earl of Derby.
Lord Chancellor	Lord Chelmsford.
President of the Council ..	Marquis of Salisbury.
Privy Seal	Earl of Hardwicke.
Chancellor of Exchequer ..	Mr. Disraeli.
Home Secretary	Mr. Walpole.
Foreign Secretary	Earl of Malmesbury.
Colonial Secretary	Lord Stanley.
Admiralty	Sir John Pakington, Bart.
Board of Control	Earl of Ellenborough.
Secretary at War	Colonel Peel.
Public Works	Lord John Manners.
Board of Trade	Mr. Henley.

Lord Stanley became president of the Board of Control (and on the passing of the India bill, minister for India) on the resignation of the earl of Ellenborough in June, 1858; and Sir E. Bulwer Lytton, Bart., took Lord Stanley's place as colonial secretary. Mr. Walpole resigned the home secretaryship, and Mr. Henley the presidency of the Board of Trade, Feb. 28, 1859. The former office was taken by Mr. Sotherton Estcourt, and the latter by the earl of Donoughmore. An amendment to the address was carried against the ministry June 10, 1859, and they resigned on the following day. (See **PALMERSTON'S SECOND ADMINISTRATION.**)

DERBY TRIALS.—At the assizes held at Derby, July 26, 1817, the grand jury found an indictment of high treason against Brandreth, Turner, Ludlam, and others. As participators in the Luddite insurrections, they were charged with levying and making war against the king. Special commissions were opened Sept. 25, and the trial commenced Oct. 15, and terminated on Saturday, Oct. 25, when twenty-three of the prisoners received sentence of death. Brandreth, Turner, and the elder Ludlam were executed at Derby on the 7th of November, and the others were reprieved.

DERBY (Ireland), See of.—The date of the establishment of this bishopric is unknown. Columbille founded a monastery at Derry about A.D. 546. The first bishops of the district were called bishops of Tyrone, and had their see at Ardsrath or Ardstraw, in Donegal county; but in 597 they removed to Rathlone or Maghera, in Londonderry. In 1158 a council of bishops decreed that Derry should be erected into a see, and a bishop was apparently appointed, though there is no regular succession of bishops of Derry till 1279. The Church Temporalities Act, 3 & 4 Will. IV. c. 37,

s. 32 (Aug. 14, 1833), directed that on the death of the bishop of Raphoe then in office, that diocese should be united to Derry. Under this provision the union of the two sees took place in 1834.

DESOLATION ISLAND (Indian Ocean) was discovered by the French navigator Kerguelen in 1772, and named after him. Captain Cook landed here Dec. 24, 1776, and having discovered that it was not a continent, as Kerguelen supposed, changed the name from Kerguelen's Land to the Island of Desolation.

DESPARD'S PLOT.—In the year 1800 Colonel Edward Marcus Despard began to plot against the government, and having induced about six-and-thirty persons to join him, formed a conspiracy to assassinate the king and subvert the government. The blow was fixed for Tuesday, the 16th of November, 1802, the day that had been appointed for the opening of parliament. Despard and about thirty of his associates were arrested at their place of assembly, the Oakley Arms public-house, in Lambeth, on the night of Nov. 16. After a long examination, Colonel Despard and fourteen others were committed to take their trial for high treason before a special commission. The ringleader and six of his associates were executed at Horsemonger-lane Gaol, in presence of an immense crowd, Feb. 21, 1803.

DESSAU (Battle).—Wallenstein defeated Mansfeld and John Ernest of Weimar, in an engagement at the bridge of Dessau, in Germany, April 25, 1626. It was the scene of several encounters between the French and the allied squadrons in 1813.

DESVENTURADAS, or UNHAPPY ISLANDS (Pacific), were discovered by Magellan during his voyage across the Pacific in the spring of 1521. The name was given to them by this enterprising navigator on account of their lonely and deserted appearance. It is doubtful whether they have been visited by any European since their discovery.

DETROIT (United States) was founded by the French A.D. 1683. The English captured it in 1759, and it suffered greatly during the revolutionary war. It was incorporated in 1802. The act of incorporation having been withdrawn in 1810, it was again incorporated in 1815. Lansing took its place as the capital of Michigan in 1847.

DETROIT FORT (Upper Canada).—The American general Hull, with 2,500 men and 33 pieces of cannon, capitulated at this fort to a British force consisting of 700 men, including militia, and 600 auxiliary Indians, Aug. 16, 1812. The English withdrew from the fort in 1813.

DETTINGEN, (Battle), was fought June 16, 1743, near the village of Dettingen, in Bavaria, and is memorable as being the last battle in which a king of England appeared in person on the field. The Hessians and Hanoverians, under George II. of England, defeated the French under Marshal Noailles. The former lost 1,500, and the latter 3,000 men.

DEVI-COTTA FORT (Hindustan) was taken from the rajah of Tanjore, by Clive, A.D. 1749. The French took it in 1758; but it was recaptured by the English in 1759.

DEVIZES (Wiltshire) is a very ancient town, although no authentic information remains respecting its early history. The castle, at one time one of the strongest in the kingdom, was erected by Roger, bishop of Salisbury, about A.D. 1132. In 1233 it was the prison of Hubert de Burgh; and in 1299 was, together with the town and park, settled by way of dower on Margaret, queen of Edward I. In July, 1643, the army of Charles I. was besieged here by the parliamentary forces. The latter sustained a total defeat near the town, July 13. The county bridewell was erected in 1810.

DEVONPORT (Devonshire) received its present title in 1824, having previously been styled Plymouth Dock. A mechanics' institute was established in 1825; and the column to commemorate the change in the name of the town was erected in 1827. (*See* **PLYMOUTH.**)

DEVONSHIRE ADMINISTRATION took office in November, 1756. The cabinet was thus constituted:—

Treasury	The Duke of Devonshire.
President of the Council	Earl of Granville.
Privy Seal	Earl Gower.
Chancellor of Exchequer	Hon. Henry Bilson Legge.
Secretaries of State	{ Mr. Pitt, afterwards earl of Chatham.
	{ Earl of Holderness.
Admiralty	Earl Temple.
Board of Trade	Earl of Halifax.
Secretary at War	Viscount Barrington.
Treasurer of the Navy	Rt. Hon. George Grenville

The great seal was placed in commission. The king demanded the seals of office from Lord Temple April 5, 1757. Pitt was dismissed a few days later, and the administration was dissolved. An interregnum of nearly three months' duration followed. (*See* **NEWCASTLE and PITT ADMINISTRATION.**)

DHARWAR (Hindustan), taken from the Mahrattas by Hyder Ali A.D. 1778, was recaptured in 1791. In 1837, religious disputes between the Brahmins and Lingayets rose to such a height here, that the British government was compelled to interfere.

DIADDEM.—Selden ("Titles of Honour") states that although the crown and the diadem have been from ancient times confounded, yet the latter was a very different thing from what a crown now is or was. The diadem was a fillet of silk, or linen; and no other crown was used, excepting in some Asiatic kingdoms, before the Christian era. Diocletian assumed the diadem A.D. 303.

DIALS were in use among the Jews as early as B.C. 713, when the dial of Hezekiah went back ten degrees, in answer to the prayer of Isaiah (2 Kings, xx. 11; and Isaiah, xxxviii. 8). Pliny ascribes their invention to Anaximander, who flourished B.C. 547, and says that the first dial at Rome was set up by Papirius Cursor, who

had taken it from the Samnites B.C. 293. The first dial constructed at Rome was in B.C. 164, for before that year they had been brought from foreign parts; and in the time of Plautus (B.C. 184) they were common, as he makes one of his characters rail at their frequency. Their adoption as ordinary parts of ecclesiastical architecture dates from A.D. 615, when they were set up in the churches of Burgundy.

DIAMOND.—This gem is mentioned as the sixth jewel of Aaron's breastplate, B.C. 1491 (Exod. xxviii. 18). Some authorities consider that the original would be more correctly rendered by some other word. Pliny, in the "Natural History," written A.D. 77, speaks of it as the most costly of human possessions, and states that the ancient writers mention Ethiopia as its locality, but that it had been brought from India shortly before his own time. India, and especially the districts around Golconda, furnished nearly all the diamonds of Europe, until the discovery of the Brazilian mines in 1728. In 1730, the Rio Janeiro fleet brought 1,146 ounces of diamonds into Europe. These mines were let, in 1740, to a company of Rio Janeiro merchants. The diamond mines of the Ural mountains were discovered June 22, 1829. The art of cutting diamonds was discovered by Louis Berghem, of Bruges, in 1476. The diamond was first used for writing on glass in the 16th century. In 1562, ornaments cut with a diamond on Venetian glasses were common. In 1564, Clement Birague, of Milan, succeeded in engraving on them. The inflammability of the diamond was first asserted by Boetius de Boot in 1607, and demonstrated at Florence in 1694; while the products resulting from its combustion were ascertained by Lavoisier in 1772. Among celebrated diamonds may be mentioned the Kohinoor, which was found in one of the Golconda mines before the Christian era. In 1526 it passed into the hands of the emperor Baber, by whose descendant, Mohammed Shah, it was surrendered to Nadir Shah, in 1739. Runjeet Singh, the lion of the Punjab, obtained it as a ransom from Shah Shooja in 1813, and in 1849 it was delivered to the English by Dhuleep Singh. Queen Victoria received it from the chairman of the East-India Company July 3, 1850, and it formed one of the attractions of the Great Exhibition of 1851. In 1852 it was recut, and now weighs 102 carats, being worth £276,768.—The Pitt, or Regent diamond, was bought by T. Pitt, Esq. (grandfather of Wm. Pitt), during his governorship of Fort St. George, for £12,500, in Feb. 1702. In 1717 it was purchased by the regent of Orleans for £135,000. It weighs 137 carats, and is the most perfect diamond in the world.—The Orloff, or great diamond of the Russian sceptre, originally formed the eye of an Indian idol. In 1775 it was sold to the empress Catherine for £90,000, an annuity of £4,000, and a patent of nobility. It is said to weigh 193

carats.—The Pigott diamond was brought to England by Earl Pigott, and sold by lottery in 1801. It weighs 49 carats, and is worth £40,000.—The great diamond of the emperor of Brazil was discovered in 1808 by a negro slave. It is uncut, and weighs 1,680 carats: its value has been estimated at £5,644,800.—Free importation and exportation of diamonds were permitted by 6 Geo. II. c. 7 (1733). They were allowed to be landed without entry, report, or warrant, by 3 & 4 Will. IV. c. 52, s. 2 (Aug. 23, 1833).

DIAMOND NECKLACE.—Boehmer and Basanges, the court jewellers of France, were commissioned by Louis XV., in 1774, to collect the most beautiful diamonds, for a necklace, which he intended to present to Madame du Barry. The king died before the necklace was completed; but the jewellers persevered with their work, hoping that Louis XVI. would purchase it for Marie Antoinette. The necklace was valued at 1,800,000 francs, or £72,000. An intriguing woman, Madame Lamotte, who took the title of countess, pretending to have received authority from Marie Antoinette to purchase the necklace, induced the jewellers to part with it in return for orders, to which the forged signature of the queen was attached, amounting to 1,400,000 francs, or £56,000. This negotiation was completed in January, 1785. Several persons connected with the court became the dupes of Madame Lamotte, and a girl, named Leguet or D'Olive, was on one occasion made to personate the queen. The Cardinal de Rohan, grand almoner, who had been employed as an instrument to carry out her schemes by Madame Lamotte, was arrested Aug. 15, 1785, and Madame Lamotte herself was taken at Bar-sur-Aube on the 19th. They were both sent to the Bastille. At the trial that ensued, brought to a close May 31, 1786, the cardinal's innocence was clearly established, and Madame Lamotte was sentenced to be flogged, branded on both shoulders, and imprisoned for life. She managed, however, to escape after an imprisonment of about ten months' duration, and took refuge in England. Having been pursued for debt, she endeavoured to escape by a window on the second story of her house, and falling from the window-sill, was killed on the spot. The scandal created by this affair proved most disastrous. Talleyrand Perigord wrote to a friend: "Attend narrowly to that miserable affair of the necklace: I should not be surprised if it overturned the throne."

DIAMPER (Hindustan).—The archbishop of Goa held a council here A.D. 1599, for the purpose of compelling the inhabitants to abjure the heresies of the Nestorians.

DIANA (Temple). (See EPHEBUS.)

DIARBEKIR (Asia).—This town, occupying the site of the ancient Amid or Amida, was sacked by Tamerlane A.D. 1393. It was frequently besieged, and was captured by Selim in 1515. The Persians regained possession in 1605, but it reverted to the Turks at the peace in 1639. It is the seat of a

Nestorian archbishop and of a Jacobite patriarch. The Turks call it Kara Amid, or Black Amid, in allusion to the black basalt used in the construction of the houses, &c.

DICE are said to have been invented by Palamedes at the siege of Troy, about B.C. 1183, though some authors ascribe their origin to the Lydians, B.C. 600. They were used by the Romans, by whom they were called *tesserae*. The *talus*, though frequently mentioned as a species of dice, is hardly entitled to the distinction, as it always signified a figure with only four sides on which it could rest. The practice of cogging dice was known to the Romans. The council of Eliberis in 305 passed a general canon forbidding laymen to play at dice, under the penalty of suspension from communion for a whole year. The council of Constantinople in 691 prohibited the use of dice to both clergy and laity, the penalty for the former being deprivation, and for the latter excommunication. Dice were introduced into England at a very early date, and at the period of the Conquest (1066) they formed one of the chief amusements of the people, who played with them in a most extravagant manner. By 9 Geo. IV. c. 18, s. 2 (May 9, 1828), the duty on dice was fixed at twenty shillings the pair.

DICTATOR.—The Roman dictators possessed sovereign power in the state, and were the generals-in-chief of the army. The first was Titus Lartius, who was appointed B.C. 499. The dictators were at first chosen from the patrician order of the people; but in the year B.C. 356, Marcus Rutilus, a plebeian, obtained the honour. The office was finally abrogated by the law of Antony, B.C. 44.

DICTIONARY.—The oldest dictionary of which we have any record, is one in the Chinese language, compiled by Pa-out-she, about B.C. 1100. Marcus Terentius Varro, who flourished B.C. 116–123, was one of the first classic authors who turned his attention to lexicography; but the most celebrated dictionary of antiquity is the *Onomastikon* of Julius Pollux, which was completed before A.D. 177. The earliest Latin dictionary of modern times was published by John Balbi of Genoa in 1460; but that of Calepio, published in 1502, is much more perfect. Sebastian Munster's *Chaldee Dictionary* appeared in 1527; Pagninus' *Lexicon of the Hebrew language* in 1529; Robert Stephens' *Thesaurus* in 1535; and Erpenius's *Arabic Dictionary* in 1613. Schindler's *Lexicon Pentaglotton* appeared in 1612, and Edmund Castells's *Lexicon Heptaglotton* in 1669. Phillips's *World of Words* appeared in 1657. Moreri published his *Biographical, Historical, and Geographical Dictionary* in 1673. Elisha Cole's *English Dictionary* appeared in 1677; and Bayle's *Historical and Critical Dictionary* and the *Dictionary of the French Academy* in 1694. Dr. Johnson's *English Dictionary* was completed in May, 1755, Walker's *Dictionary* appeared in 1791, and Francis Grose's *Dictionary of the Vulgar tongue* in 1785.

DIDYMIUM, a rare metal, the discovery

of which was announced by Mosander in 1841.

DIEPPE (France), as early as the 10th century, was a fishing village possessing some fortifications. In the 11th century the town was called Bertheville. Henry II. erected the castle in 1188, and the church of St. Jacques was commenced in 1200. Dieppe was attacked by the English in 1442, and again in July, 1694; being on the latter occasion nearly destroyed by fire.

DIERSHEIM (Battle).—Moreau effected the passage of the Rhine at this place, after a series of combats with the Austrians, April 19 and 20, 1797. Desaix and Davoust distinguished themselves in these encounters.

DIEST (South Brabant).—This town, taken from the French by the duke of Marlborough in 1705, was recaptured by them in the same year.

DIET.—The name given to the assembly of the German states, which was instituted in the most ancient times, and reconstituted by Charles IV. in 1356, on the publication of the "Golden Bull." These sittings were made permanent at Ratisbon, Dec. 23, 1663. They were removed to Frankfort by the "Confederation of the Rhine," July 17, 1806. The following are some of the most celebrated diets.

A.D.

1180. Diet of Würzburg, which deposed Henry the Lion, duke of Brunswick.

1467. Diet of Nuremberg, which divided the States into the College of Electors, the College of Princes, and the College of Imperial Towns.

1521. Diet of Worms, at which Luther refused to recant.

1529. Diet of Spire, which prohibited the spread of the reformed religion, and occasioned the famous protestation from which the reformers are called Protestants.

1530. Diet of Augsburg, summoned by Charles V., to reunite the princes of Christendom, and secure their co-operation against the Turks.

1541. Diet of Ratisbon, summoned to reunite the Protestants with the papists, who were unable to agree respecting twenty-two articles of faith submitted to their consideration by the pope's legate.

DIEU ET MON DROIT, or, God and my Right, the motto of the royal arms of England, was the parole of the day, given by Richard I. at the battle of Gisors, Sept. 20, 1198. It was assumed by him and his successors, but did not appear on the broad seal before the time of Henry VIII. Anne discontinued "Dieu et mon Droit," substituting "Semper eadem" in its place; but George I. restored the old motto.

DIGEST.—The first digest of the Roman laws was made by Varro, B.C. 66. Gregorianus, A.D. 306; Hermogenianus, 365; and Theodosius the Younger, 438, also compiled and simplified the laws; but the term "Digest" is usually applied to the *Pandects* of Justinian, which formed the second part of his code, finished in 529. They were in fifty books, and a copy of them was found at Amalphi in the year 1137.

DIGGERS.—These levellers, who pre-

tended that the earth ought to be held in common, and commenced cultivating some waste land in Surrey, were dispersed by the military, April 16, 1649.

DIGIT.—The term applied to any whole number under ten. The system of notation by digits, commonly called the Arabic system, was used by the Hindoo Aryabhata in the 5th century, and was first employed in Arabia by Mohammed Ben Musa towards the latter part of the 9th century. By the end of the 10th century they were fully established throughout Arabia, and were soon after introduced into Europe. Their general adoption by European accountants was, however, very gradual; and even at the beginning of the 16th century the Roman notation was common.

DJON (France), the ancient Dibio, or Divio, is said to have been founded by Marcus Aurelius. Clovis defeated the Burgundians in a battle near this place, A.D. 500. It was burnt in 1137, rebuilt in 1157, and in 1179 became the residence of the dukes of Burgundy. The cathedral dates from 1291, and the church of Notre Dame was completed in 1334. The castle was completed in 1513. Dijon is the seat of a bishop. Councils were held here in July, 1077; in 1116; and from Dec. 1 to 13, 1199.

DILETTANTI.—This society was established in 1734 by some gentlemen who had travelled in Italy, for the purpose of encouraging a taste for the fine arts. They sent an expedition to the East, which left England June 9, 1764, and returned Nov. 2, 1766. The result of their investigations was the "Ionian Antiquities," of which part I. was published in 1769, part II. in 1797, and part III. in 1840; Chandler's "Travels in Asia Minor," published in 1775; Chandler's "Travels in Greece," published in 1776; and a volume of Greek Inscriptions, published in 1774. Another expedition was sent to the Levant in 1814. The society consists of fifty members, who dine together at the Thatched House tavern, the first Sunday in every month, from February to July.

DINANT (Belgium).—Notice of this town occurs in records of the 6th century. It was taken and destroyed in 1486, by Philip the Good, duke of Normandy. It was speedily rebuilt, and was again seized by the duke of Nevers in 1554. The French, under the Marshal de Crecqui, took it in 1675; under Marshal Saxe in 1746; and again in 1794, when it was erected into the chief town of the department of Sambre-et-Meuse. It was restored to Holland in 1814.

DINDIGUL (Hindustan) was conquered by the rajah of Mysore A.D. 1755, taken from Tippoo Saib by the British in 1783, and restored in 1784. In 1792 it was ceded to the British government. In 1809, 1810, and 1811, this town and its neighbourhood were visited by a very fatal epidemic, which carried off numbers of the population.

DIOECSE.—Bingham (Antiq. ix. c. 1, s. 3), speaking of the division of the Roman empire into dioceses, says,—"It is generally owned

that the division of provinces is more ancient than that of dioceses: for the division into dioceses began only about the time of Constantine" (A.D. 306–337). A list of the dioceses of the empire is given in the "Notitia Imperii," said to be written about the year 400, at which time they seem to have numbered thirteen. The term was first used in its episcopal sense about the time of the council of Arles, 314, which addressed a letter to Pope Sylvester I., wherein mention is made of his holding "the greater dioceses." The first division of a large diocese into several smaller ones took place in 569. The establishment of dioceses in Britain was coeval with the introduction of Christianity, but information on the subject is very meagre. British bishops attended the council of Arles, 314, as well as that of Sardica, 347. For further information on the English dioceses see BISHOPS.

DIOCLETIAN ÆRA, or the ÆRA OF MARTYRS, dates from the proclamation of Diocletian as emperor, Aug. 29, A.D. 284. This æra was generally used by Christians till the introduction of the Christian æra, about 527.

DIORAMA.—This mode of exhibiting paintings of landscapes, architecture, &c., with such effects of light as to produce most complete optical illusion, was first established at Paris by M.M. Daguerre and Bouton in 1822. In 1823 a building was erected for its exhibition at Regent's Park, London, and for some time the speculation proved prosperous. After a time, however, the amusement failed to attract visitors, and the building was ultimately sold to Sir Morton Peto, for conversion into a Baptist chapel, in 1855.

DIPHTHERIA, a diseased state of the mucous membrane of the throat, which causes the development of a false membrane. The best authorities believe it to be no other than the "putrid sore throat" described by early writers. The ancient Greek physician Aretæus refers to a similar disease. It prevailed in an epidemic form in Italy, Spain, and other European countries in the 16th and 17th centuries. In England, the continent of Europe, and North America, it broke out in the 18th century. It appeared again at Tours, in France, in 1818, and in 1856 raged with epidemic violence at Boulogne. The first accurately described cases in this country occurred in 1857. M. Bretonneau, of Tours, gave it the name of "diphthérie" in 1821.

DIRECTORY.—The first London Directory was published by Lee and Major in 1677, under the title of "A Collection of the Names of Merchants, &c." The first bearing the name was published in 1734, under the title of "Kent's Directory; or, a List of the Principal Traders in London." The Post-Office Directory appeared in 1800.

DIRECTORY.—The French Directory was appointed by the constitution published June 23, 1795. It exercised authority from Oct. 27, 1795, till Nov. 11, 1799, when the consular government was established in its

stead. It was composed of five members, one of whom was to retire yearly, and governed the republic conjointly with the Council of Ancients and the Council of Five Hundred.

DIRECTORY FOR PUBLIC WORSHIP.—During the civil war, the puritans supplied the place of the Book of Common Prayer by a volume bearing the above title. It was prepared by a committee appointed Oct. 17, 1643, and was established by parliament Jan. 3, 1645.

DISCIPLINE.—The first book of discipline was drawn up by the ministers of the Scottish Church in 1560, for the purpose of establishing discipline and uniformity in the Church. It abolished the government of bishops and the observance of fasts and saint days, and established kirk sessions, besides appointing other minor particulars. The second book of discipline, approved by the General Assembly in April, 1578, did not receive the sanction of Parliament, and then only in a modified form, until 1592.

DISPENSARIES were set up in monasteries and the houses of the wealthy during the Middle Ages. They were established in their present form towards the end of the 18th century. The first was the Royal General Dispensary, Smithfield, founded in 1770. The Westminster Dispensary was established in 1774; the London Dispensary in 1777; the Surrey Dispensary in 1777; the Finsbury Dispensary in 1780; the Eastern Dispensary in 1782; the Public Dispensary in 1782; the Marylebone Dispensary in 1785; the Western Dispensary in 1789; the Tower Hamlets Dispensary in 1792; the London Electrical Dispensary in 1793; the Bloomsbury Dispensary in 1801; the Islington Dispensary in 1821; and the University of London Dispensary in 1828.

DISPENSATIONS.—Papal dispensations were first granted by Innocent III. in 1200. Subjects of the English sovereign were forbidden to appeal for them by 25 Hen. VIII. c. 21 (1533), which, however, empowered the archbishop of Canterbury to grant, by an instrument under his seal, unto the king and his successors, for causes not contrary to the laws of God, all such dispensations as were formerly from the see of Rome.

DISPENSING POWER.—The power of suspending or dispensing with the laws, or the execution of the laws, claimed and exercised by some of the English sovereigns, was declared illegal, and formally abolished by the Bill of Rights (1 Will. & Mary, sess. 2, c. 2) passed in 1689.

DISPERSION OF MANKIND.—This took place at the building of the tower of Babel (Gen. xi. 8), and various dates are assigned to it by different authorities. It occurred, according to the chronology adopted in the English Bible, B.C. 2234.

DISSIDENTS.—Protestants holding different views from the Church of England are thus named. About the year 1565 they

were called Puritans. Their numbers were much increased by the Act of Uniformity, 13 & 14 Chas. II. c. 4 (1662), from which about two thousand clergymen dissented, thence receiving the name Nonconformists or Dissenters. The Test Act, 35 Chas. II. c. 2 (1672), excluded from government employment all who refused to take the oaths of allegiance and supremacy, and to take the sacrament according to the rites of the Established Church. The Toleration Act, 1 Will. & Mary, c. 18 (1688), first gave dissenters legal security in the celebration of their worship; but the great act for their relief was the Corporation and Test Repeal Act (9 Geo. IV. c. 17, May 9, 1828), which enabled them to accept public employment without violating their scruples respecting the taking of the sacrament. Dissenters were first permitted to solemnize marriages in their own places of worship, or at a registrar's office, by 6 & 7 Will. IV. c. 85 (Aug. 17, 1836).

DISSIDENTS.—The term applied to dissenters from the established religion of Poland, viz., the Roman Catholic. They were allowed the free exercise of their religion by the *pacta conventa*, in 1573, but were persecuted in 1718. In 1766 Russia and Prussia supported them in their claims for unrestricted worship, and in 1775 their rights, with a few exceptions, were completely restored.

DISTAFF.—Spinning by distaff was introduced into England A.D. 1505. The day after the Epiphany, or Twelfth-day, was jocularly called St. Distaff's or Rock Day, because the Christmas holidays having then terminated, housewives resumed the distaff, &c.

DISTILLATION.—This art, said to have originated amongst the inhabitants of northern Europe, was, with many others connected with chemical science, introduced into Spain by the Moors about the year 1150. Argand's improvements in mechanical processes were perfected about 1780.

DITCH, or the NATIONS.—The third expedition of the Koreish against Mohammed, A.D. 625. Gibbon (ch. l.) remarks:—"This third expedition is variously named, from the *nations* which marched under the banner of Abu Sophian, from the *ditch* which was drawn before the city, and a camp of 3,000 Mussulmans. The prudence of Mohammed declined a general engagement: the valour of Ali was signalized in single combat; and the war was protracted twenty days, till the final separation of the confederates. A tempest of wind, rain, and hail overturned their tents: their private quarrels were fomented by an insidious adversary; and the Koreish, deserted by their allies, no longer hoped to subvert the throne, or to check the conquests of their invincible exile."

DIU (Hindustan).—This island was taken A.D. 1515 by the Portuguese, who made it a strong fortress. The Arabs of Muscat assailed and pillaged it in 1670. It was garrisoned by British troops in 1809.

DIVINATION.—The Israelites were prohibited from practising divination of any kind by the law of Moses (Deut. xviii. 9-12), B.C. 1451. Among the ancients, divination was practised in many different forms. It is supposed to have originated among the Etruscans. Disraeli (Amenities of Literature, ii. 258) remarks, "The mystery of the divining-rod is as ancient as the days of Cicero. The German miners introduced its practice among our Cornish miners."

DIVINE RIGHT OF KINGS.—The doctrine that kings are entitled to the unqualified submission of their subjects was maintained by the Convocation Book of 1603, by Hobbes in 1642, by Sir Robert Filmer in his "Patriarcha" in 1680, and by Sherlock in 1684. Dr. Pusey's sermon, Nov. 5, 1837, exhibits the views of modern High Church writers on the subject.

DIVING-BELL.—In the time of Aristotle (B.C. 384-322), divers used a kind of kettle to enable them to continue long under water. The earliest positive mention of the use of the diving-bell in Europe occurs in the works of John Taisnier, who was born A.D. 1509. In 1665 it was employed to raise some portions of the Spanish Armada, which had been wrecked off the Isle of Mull, and in 1687 William Phipps succeeded by its means in recovering £200,000, which had been lost in a Spanish vessel off the coast of Hispaniola. The instrument was much improved by Witsen in 1671. Dr. Halley's grand plan for introducing a supply of fresh air, which he effected about 1715, is the most important event in the history of the apparatus. Further improvements were effected by Mr. Spalding, who was drowned while prosecuting some experiments with the diving-bell, June 1, 1783. Smeaton first applied it to engineering operations in 1779, and in 1788 he contrived a means of supplying air by means of a forcing air-pump.

DIVORCE was permitted by the Mosaic law B.C. 1451 (Deut. xxiv. 1-4). The first instance among the Romans occurred B.C. 331, and the custom afterwards became very frequent, in spite of the *Lex de maritandis ordinibus*, passed B.C. 18, and the *Lex Pappia-Poppæa*, A.D. 9, which attempted to restrain the facilities for obtaining it. In England divorces were of two kinds,—*à mensâ et thoro*, when the parties lived separate but without a dissolution of the marriage vow, and *à vinculo matrimonii*, when their union was declared illegal from the first, and was consequently totally dissolved. The first example of a divorce effected by act of parliament, without the previous consent of the spiritual court, was that of the notorious countess of Macclesfield, who was separated from her husband April 2, 1698. In 1798 Lord Loughborough obtained the passing of a series of resolutions which required every application for divorce to be supported by an ecclesiastical sentence and by a previous verdict at law. Previously to 1840, divorce bills in the House of Commons were decided by the whole house; but in that year they

were referred to a committee of nine members. In December, 1850, commissioners were appointed to inquire into the law of divorce. The Divorce and Matrimonial Causes Act (20 & 21 Vict. c. 85, Aug. 28, 1857) abolished all authority of the Ecclesiastical Court respecting divorces, and vested it in the "Court for Divorce and Matrimonial Causes," which was to be presided over by three judges, the judge of the Probate Court being one. This act was amended and extended by 21 & 22 Vict. c. 108 (Aug. 2, 1858), and by 22 & 23 Vict. c. 61 (Aug. 13, 1859).

DIZIER, St. (France), was besieged by Charles the Fifth's army, commanded by Ferdinand de Gonzaga, in 1544. It surrendered after a brave resistance. In 1775 the town was nearly destroyed by fire through the carelessness of a baker. Napoleon I. drove back the advanced guard of the allies here, Jan. 27, 1814.

DJEVAN-BOULAK (Battle).—The Russians gained a victory over the Persians at this place, in Persia, July 18, 1827.

DJIDDA, or JIDDA (Arabia), was surrounded by a wall A.D. 1501 by the sultan of Egypt. In 1803 Sherif Pasha attempted to render the town independent of the Sherif of Mecca, but failed, and died suddenly in 1804, about which time it surrendered to the Wahabees, who expelled the Turks. In 1811 Mohammed Ali took measures to recover it, and in 1812 he succeeded in obtaining possession. The celebrated traveller Burckhardt arrived here July 15, 1814.

DOBRO (Battle).—Prince Menschikoff, at the head of a Russian army, defeated the Swedes at this place, in the Ukraine, Sept. 20, 1709.

DOBRYNITCHI, (Battle,) was fought in this plain, in Russia, by the pretender Dmitri, at the head of about 20,000 Poles and Cossacks, against 70,000 Russians, led by the generals of the Czar, Jan. 20, 1605. The former was defeated, with the loss of seven-eighths of his army and all his baggage and artillery.

DOCETÆ, or DOCETES.—These heretics, who contended that Christ was a god, and that he did not really suffer death on the cross, but only in appearance, arose in the 1st century. Gibbon says:—"While his blood was still recent on Mount Calvary, the Docetes, a numerous and learned sect of Asiatics, invented the *phantastic* system, which was afterwards propagated by the Marcionites, the Manichæans, and the various names of the Gnostic heresy." They denied the resurrection and ascension, and separated into various divisions under different leaders.

DOCKS.—The first docks constructed in England were the Commercial Docks, at Rotherhithe, part of which existed as the Howland Great Wet Dock in 1660. The present title was adopted in 1807. The first dock at Liverpool was completed about 1720, and the first at Hull in 1778. The West-

India Docks, which are the most extensive warehousing establishment in the port of London, were commenced in February, 1800, and partially opened in August, 1802. The south dock was added in 1829. The East-India Docks were opened in 1806. Bristol floating harbour, which has all the characteristics of a dock, was commenced in 1804, and finished in 1809. The first stone of the London Docks was laid June 26, 1802, and they were opened in February, 1805, and till January, 1826, were the only docks at which ships bound for the Thames, with cargoes of wine, brandy, tobacco, and rice (except ships from the Indies), were permitted to unload. These docks were improved by a new entrance in 1832, and by an enlargement of the basin in 1853. St. Catherine's Docks were partially opened Oct. 25, 1828, and the Victoria Docks in November, 1855. Docks were commenced at Glasgow about 1662.

DOCKYARDS.—The formation of dockyards commenced in England during the reign of Henry VIII. There are seven in England; viz., Woolwich, founded before 1515; Portsmouth, before 1548; Deptford, about 1513; Chatham, established by Elizabeth; Sheerness, by Charles II.; Plymouth, founded soon after 1688, and called Devonport Dockyard since 1824; and Pembroke, originally established at Milford Haven in 1790, and removed to Pembroke in 1814.

DOCTOR.—Doctors of law existed among the Jews. Some authorities state that the Venerable Bede and John of Beverley received the title of doctor, at Cambridge, before 721; but this is doubtful. The degree was introduced at Bologna in the 12th century by Irnerius; and in 1207 it was conferred in England. Doctorships in medicine may be traced to 1384, and in music to 1463.

DOCTORS' COMMONS.—Soon after the accession of Henry VIII., in 1509, some civilians privileged to plead in the court of Arches formed a plan of association, by which they were to occupy contiguous houses and board in common. The spot first selected by them is not recorded; but in February, 1568, Dr. Henry Hervie procured a lease of Montjoy House and other tenements, which he devoted to the accommodation of the advocates, and which received the title of Doctors' Commons. The original edifice was destroyed in 1666 by the great fire of London. The courts were held in Essex House, Strand, until the college was rebuilt in 1672. They were incorporated in June, 1768, as "The College of Doctors of Law, exercent in the Ecclesiastical and Admiralty Courts." Doctors' Commons consisted of five courts; viz., the Court of Arches, the Prerogative Court, the Court of Faculties or Dispensations, the Consistory Court, and the High Court of Admiralty. The new courts of Divorce and Matrimonial Causes and of Probate, came into operation in January, 1858.

DODONA (Greece).—The site of this ancient town, celebrated for its oracle of Jupiter, has 286

not been ascertained. The Ætolians razed the temple of the god B.C. 219. It was a bishopric in the early church, and one of its bishops is mentioned as late as A.D. 516. Notice of the town itself occurs in the 6th century.

DOG.—The act for preventing the stealing of dogs (10 Geo. III. c. 18) was passed in 1770. A tax was imposed upon dogs by 36 Geo. III. c. 124 (May 19, 1796), which was extended to Ireland by 48 Geo. III. c. 42 (May 27, 1808). The use of dogs for purposes of draught was abolished as regards London by 2 & 3 Vict. c. 47, s. 56 (Aug. 17, 1839), which prohibition was extended to all parts of the United Kingdom by 17 & 18 Vict. c. 60, s. 2 (July 31, 1854).

DOG-DAYS.—The Venerable Bede, who flourished between 673 and 735, gives as the commencement of the dog-days, July 14. In a calendar prefixed to Queen Elizabeth's Book of Common Prayer, ordered to be used in 1559, they are made to begin July 6, and to end Sept. 5, which arrangement continued till the Restoration in 1660, when they were omitted altogether from the Prayer-book, and made to begin July 19, and end Aug. 20. On the reformation of the British calendar in 1752, their commencement was fixed on July 30, and their termination on Sept. 7. They now begin July 3, and end Aug. 11.

DOGE.—According to some authorities, Venice was governed by a duke bearing the title of doge as early as 440; but Daru assigns 697 as the date of the creation of the honour, and mentions Paul Luke Anafesto as the first who bore it. The Genoese revolted against their counts in 1030, and elected a doge in 1034.

DOGGER-BANK (Sea-fight).—An English fleet, commanded by Admiral Sir Hyde Parker, engaged the Dutch near this sand-bank, between Great Britain and Holland, Aug. 5, 1781. After an obstinate conflict, the Dutch bore away. The English fleet having suffered severely in the action, was not able to follow in pursuit.

DOGGET'S COAT AND BADGE.—A rowing-match, which takes place on the Thames every year, on the 1st of August, between the Old Swan near London Bridge and the White Swan at Chelsea, when the tide is strongest against the competitors, was instituted by Thomas Dogget, the actor, to mark his attachment to the house of Hanover, Aug. 1 being the date of George the First's accession. It was first rowed for Aug. 1, 1715. Dogget died Sept. 22, 1721, and bequeathed a sum of money, the interest of which was to provide annually a waterman's coat and badge, to be rowed for in perpetual remembrance of the day.

DOIT, or DOIRKIN, a base coin of small value, the circulation of which was prohibited by 3 Hen. V. c. 1 (1415).

DOL (France).—William I. suffered some very severe losses in a vain attempt to capture this town, in Brittany, A.D. 1075. A dispute which broke out between the churches

of Dol and Tours respecting the metropolitan rights which the former claimed against the latter, was decided in favour of Tours in 1199. In 1793, during the Vendean war, Rossignol, at the head of the republican forces, was defeated at this town.

DOLCINITES.—This sect, according to Milman (*Lat. Christ.* vol. v. b. xii. ch. 6), was of "kindred tenets with the Fraticelli, or Spiritual Franciscans, with some leaven of the old doctrines of the Patarines (the Puritans) of Lombardy." It was founded by Dolcino, who was born at a village near Novara. He denounced the popes. The Dolcinites made their first appearance at Gattinara, in the Val de Sesia, in Piedmont, in 1304. The Inquisition sent forces against them in 1307, and after a brave resistance, during which numbers perished, Dolcino and a few of his followers were made prisoners. They were cruelly tortured, and afterwards burned alive.

DOLÉ (France), the Dola of the Romans, is of very ancient date, and was formerly the capital of Franche-Comté. Its university was founded in 1426, by Philip the Good, duke of Burgundy, and a parliament was established in 1442. The French failed in attempts to capture it in 1435 and in 1477; but it was taken and sacked by Louis XI. in 1479. Charles V. erected strong fortifications here in 1530, and in 1636 it was unsuccessfully besieged by the French, who obtained it with the rest of Franche-Comté in 1668. By the treaty of Aix-la-Chapelle, concluded May 2, 1668, it was restored to Spain, which finally lost all power over it in 1674, when it was seized by the army of Louis XIV. Its parliament was transferred to Besançon in 1676, and its university in 1691, since which time it has declined in importance.

DOLLAR.—This coin, as well as the German thaler, derives its name from the town of Joachimsthal, in Bohemia, where silver pieces, of an ounce weight, were first coined in 1518. It is the principal coin of the United States, where Spanish dollars, worth 4s. 4½d., passed current until 1772, when a new coinage was struck. Spanish dollars were issued from the Bank of England March 10, 1797, the value being 4s. 9d. each. They were recalled Oct. 3 in the same year. By an act passed in the United States in 1837, the dollar must weigh 412½ grains of standard silver. Its value is 4s. 4d. of our money.

DOMESDAY BOOK, defined by Ellis as "the register from which judgment was to be given upon the value, tenure, and services of lands therein described," was undertaken by William the Conqueror, but the precise year in which he commenced it is not known. The frequently assigned date, 1080, is founded on an erroneous quotation of the Red Book of the Exchequer, and there is good reason to believe the Anglo-Saxon Chronicle is not far wrong in fixing its commencement in 1085, and its completion in 1086. Domesday Book continued the authority as to the amount of taxation till

1522, when Henry VIII. caused a more accurate survey to be taken, which is known as the New Domesday Book. In 1767, George III. ordered the publication of the original survey, which was commenced about 1770, and completed early in 1783. Ingulphus says the book was so called because it was as general and conclusive as the last judgment will be.

DOMINGO, St. (Hayti).—This city was founded A.D. 1496 by Bartholomew Columbus, by whom it was first called Nueva Isabella. In 1502 it suffered severely from the effects of a hurricane, but was rebuilt by Ovando soon afterwards, and adorned with a fine Gothic cathedral in 1540. In the latter part of 1585 it was taken by Sir Francis Drake, who exacted from the inhabitants a ransom of £6,875. By the treaty of Basel, July 22, 1795, it was ceded to France, together with the other Spanish possessions in the island, and in 1801 it was seized by the negro chief Toussaint l'Ouverture. (*See HAYTI.*)

DOMINICA (W. Indies) was discovered by Columbus on Sunday, Nov. 3, 1493. In 1668 it submitted to the English, by whom it was again captured June 6, 1761. By the treaty of Paris, Feb. 10, 1763, it was ceded to Great Britain, and it was erected into a separate government under Sir W. Young, July 18, 1770. In 1778 it was taken by the French, but was restored to Great Britain by the treaty of Versailles, Sept. 3, 1783. The French made an ineffectual attempt to retake it in 1795, and in 1802 its peace was disturbed by an insurrection of the negroes. The French again assailed it Feb. 22, 1805, when they opposed 4,000 men to the resident force of 200; but, after having destroyed Roseau by fire, they were compelled to retreat without achieving any substantial success.

DOMINICAL LETTER.—The first seven letters of the alphabet are used in ecclesiastical and other calendars to signify the days of the week, and the letter which stands for Sunday is known as the Dominical letter. January 1 is always expressed by A; hence the Dominical letters change every year.

DOMINICALS.—The name anciently given to the lessons of Scripture appointed to be read on Sundays. Aleuin, tutor of Charlemagne, is said to have instituted them between A.D. 750 and 760; but the custom of selecting the Sunday lessons in a systematic order was not generally adopted till the 12th century. An oblation made on Sundays to the rector of the church in which a person attended service and received the sacraments, was also, in the early English church, known by this name.

DOMINICANS.—This order of Friars, called in England, Black Friars, and in France, Jacobins, was founded by St. Dominick in 1215, and confirmed by Innocent III. in the same year. Honorius III. renewed the approval in 1216, and constituted the order under the rules of St. Augustine, which enjoined perpetual silence, almost continual fasts, poverty, and other mortifications. At the first gen-

eral chapter of the order, in 1220, the renunciation of all possession and revenue was also enjoined. The convent in Paris was founded in 1218. In 1221 the order was introduced into England, where the monks were called Black Friars, their first establishment being formed at Oxford. In 1276 the corporation of London granted the order two lanes near the Thames, where a monastery was erected, the neighbourhood of which still retains the name Blackfriars. —The order of the Dominican nuns was founded by St. Dominick in 1206.

DONATISTS.—On the election of Cecilianus to the see of Carthage, A.D. 311, the minority chose another bishop, who, dying in 313, was succeeded by Donatus. He formed the malcontents into a separate party, named after himself. The peculiarity of the sect was its strictness in matters of church discipline. Severe laws were passed against it in 316, and it was condemned by the council of Carthage in 411. It was not totally extinguished till the 7th century.

DONAUWERTH (Bavaria) was the scene of the execution of Mary of Brabant, by her husband, Louis the Severe, on an ill-founded charge of infidelity, Jan. 18, 1256. In consequence of its adherence to the reformed religion, it was placed under the ban of the empire in 1607, and was seized by an army of 17,000 men under Maximilian of Bavaria, who abolished the Protestant religion, and transferred the city's municipal privileges to the elector. The duke of Marlborough gained an important victory here over the Bavarian army of the count of Arco, July 2, 1704 (O.S.), when the allied army lost nearly 5,000 men. In 1706, Donauwerth recovered its rights as an imperial city, but again lost them by the peace of Baden, signed Sept. 7, 1714. Its subjection to Bavaria was finally determined by an agreement signed June 18, 1782. A second battle was fought here Oct. 6, 1805, between the armies of Marshal Vandamme, and of Colloredo, in which the French were victorious.

DONNELAN LECTURESHIP, in Dublin University, was established Feb. 22, 1794, the expense being defrayed from a legacy of £1,243, bequeathed by Mrs. Ann Donnelan to the College of Dublin. It is a divinity lecture.

DORCHESTER (Dorsetshire), the Roman *Durnovaria* and *Dunium*, became a bishopric A.D. 886, and continued an episcopal town till 1078, when the see was transferred to Lincoln. The free grammar-school was founded in 1579. Judge Jefferies presided over a special commission here in 1685, which he rendered infamous by the cruelty and injustice of his judgments. In 1705, 10,000 persons assembled in the Roman amphitheatre to witness the burning of Mary Channing. The town-hall was built in 1791, and the hospital in 1840.

DORIANS.—A people of ancient Greece, who asserted their descent from Dorus, son of Hellen and the nymph Orseis, or of Apollo and Phthia, who is said to have flourished

B.C. 1400. The Heraclidae, of Doric extraction, returned to the Peloponnesus B.C. 1104; settled in that part of Greece, and overran Attica B.C. 1045. About B.C. 800 they were attacked by the Thebans, who expelled them from their country, of which they took possession. The Phocæans declared war against them B.C. 458, and seized most of their important towns.

DORIC ORDER of Architecture, originated among the Dorians about B.C. 1104. It is more airy and graceful in style than the Tuscan, and ranks as the second of the five orders.

DOROGOBUSH (Battle).—The Russians defeated the French at this town, in Russia, Oct. 12, 1812.

DORPAT, or **DÖRPT** (Russia).—This town, in Livonia, formerly belonged to Sweden. Gustavus Adolphus founded its university in 1632. Having been removed to Pernau, it was re-established at Dorpat in 1802. The town was taken by Peter the Great, July 23, 1704, and was destroyed by fire in 1775.

DORSET (England).—The Danes landed at Wareham, in this county, A.D. 876. They renewed their ravages in 982, 998, 1001, and 1015. They were defeated and put to flight in 1016 by Edmund Ironside.

DORT, or **DORDRECHT** (Holland).—This town, capital of a district of the same name, was founded A.D. 994, and is said to be the oldest town in Holland. Fortifications were erected in 1231. In 1421 it was separated from the mainland by an inundation, which covered upwards of 70 villages, and drowned 100,000 persons. The church of Notre Dame, founded in 1366, and a large part of the town, were destroyed by fire in 1457. The first meeting of the States of Holland after their successful revolt from Spanish dominion was held here in 1572, when William, prince of Orange, was made stadtholder. The celebrated synod of Dort assembled Nov. 13, 1618, and ended its sittings May 25, 1619. It was a meeting of the Protestant clergy for the purpose of deciding whether Calvinism or Arminianism is the true doctrine of Scripture, and they declared in favour of the former system.

DORYLÆUM (Battle).—The Crusaders defeated Soliman and the Turks at this town, in Phrygia, July 4, 1097. Three thousand Pagan knights are said to have fallen in this battle. The Turks lost above 30,000 men. Soliman's camp was pillaged, and large quantities of spoil fell into the hands of the Crusaders.

DOUAI (France), the Roman *Duacum*, at which a synod was held A.D. 871, was taken by Philip the Fair in 1297. In 1368 it was given to Louis, count of Flanders, and in 1562 Philip II. of Spain founded its university. The college for English papists was established by the same monarch in 1569. Louis XIV. took Douai from the Spaniards in 1667. It was captured by the allies, under the duke of Marlborough, June 25, 1710; but Marshal Villars retook it in 1712. The peace

of Utrecht, signed April 11, 1713, finally restored Douai to France.

DOUAI BIBLE.—This Bible, which was translated into English by the students at the Roman Catholic college of Douai, is the only English translation which is sanctioned by the pope, and was published at Douai in 1609. It only contains the Old Testament, as the English college at Rheims had printed a translation of the New in 1582.

DOURO (Passage of the).—The British army, under Sir Arthur Wellesley, succeeded in crossing this river in spite of a very resolute opposition by the French under Marshal Soult, May 12, 1809. The English casualties amounted to 23 killed, among whom was Lieutenant-General Paget; 96 wounded, and 2 missing. The French lost 500 killed and wounded, 5 guns, and a large quantity of ammunition. They left 700 sick and wounded in the hospital of Oporto, and 50 guns in the arsenal.

DOVER (Kent), the Roman *Dubris*, where Julius Cæsar landed, Aug. 26, B.C. 55. Some authors consider him the founder of the castle, but it was most probably built by Mandubratius, king of the Trinobantes, who died B.C. 19. It was strengthened by Arviragus, A.D. 70. In 209 the emperor Severus built a gate, of which the foundations still remain; and in 367 a cohort of 1,100 men was stationed in the town. Withred, king of Kent, fortified the town, and built St. Martin's church, about 700. In 1051 the inhabitants resisted the troops of Eustace, earl of Boulogne. In 1052 Godwin, earl of Kent, compelled them to give him hostages and ships, and in 1066 the town was burnt by the Norman invaders. The priory was founded by Archbishop Corboil in 1132. In 1216 Hubert de Burgh held the castle against Louis, the dauphin of France; and in 1299 a mint was established in the town by Edward I. By a statute passed in 1330, the charge for conveying passengers from Dover to Calais was fixed at sixpence for a foot-passenger, and two shillings for a man and a horse. All travellers to the continent were compelled to embark at Dover in 1339. In 1515 a fellowship of Trinity pilots was established. A pier was built in 1549; and in 1606 a charter was granted by James I., which tended very considerably to increase the maritime importance of the place. During the civil war, the Parliamentary forces took Dover by stratagem, Aug. 21, 1642. Charles II. landed here on his restoration, May 27, 1660. In 1780 important alterations were commenced in the castle, which has since been entirely remodelled. The theatre was built in 1790, and the custom-house in 1806. In May, 1808, the town received considerable injury from a fire. An ancient well was discovered in the keep in 1811. Louis XVIII. embarked here for France on his restoration to the throne, April 23, 1813; and the emperor of Russia and the king of Prussia landed June 6, 1814. Lighting by gas was introduced into the town in 1822. Prince Albert landed here, previous to his marriage with Queen Victoria,

Feb. 6, 1840. The London and Dover (South-Eastern) Railway was opened Feb. 7, 1844; and the London, Chatham, and Dover Railway in 1861. The submarine telegraph to Calais was permanently established Oct. 13, 1851.

DOVER (Sea-fight).—Blake, with a squadron of fifteen vessels, reinforced during the engagement by eight under Captain Bourne, fought a severe action with the Dutch fleet, consisting of forty-two ships, under the command of Admiral Van Tromp, May 19, 1652. The action was maintained with great gallantry for five hours. Blake captured one ship and sunk another, and the Dutch withdrew to the coast of Holland during the night.

DOVER (Treaty).—Charles II. and Louis XIV. concluded a secret treaty, which was signed at Dover May 23, 1670. Charles II. agreed to reconcile himself with the Church of Rome as soon as the affairs of the kingdom should be sufficiently established to permit him. Louis XIV. engaged to pay him two millions of livres Tournais, one half three months after the ratification of the treaty, and the remainder in six months; and to furnish and maintain, at his own cost, 6,000 troops to assist Charles II. in his design. Charles also engaged to aid Louis in subjugating Holland, and in upholding the Bourbons in Spain.

DOVER (United States), in New Hampshire, was founded in 1623 by Edward and William Hilton. It was placed under the jurisdiction of Massachusetts in 1642, and on the 27th of June, 1689, it was attacked by Indians, who burnt five or six houses and mills, and killed several of the inhabitants.

DOWER.—Wharton (Laws relating to Women, b. iv. c. 1, s. 6) defines dower as "the right which a widow has in the third part of the lands and tenements of which her husband died solely and beneficially possessed." By 5 & 6 Edw. VI. c. 11 (1551), the widows of traitors lost all right to dower. Five kinds of dower originally existed; viz., dower by the common law, dower by custom, dower *ad ostium ecclesie*, dower *ex assensu patris*, and dower *de la plus belle*. The last was abolished by 12 Chas. II. c. 24 (1660), and the third and fourth by the Dower Act, 3 & 4 Will. IV. c. 105 (Aug. 29, 1833), which came into operation Jan. 1, 1834, and virtually placed the right of dower entirely at the husband's disposal.

DOWLETABAD (Hindustan).—This town, considered the key of the Deccan, the ancient Deoghir, was taken by the Mohammedans under Allah-ud-Deen in 1293, and in 1306 was rendered subject to the emperor of Delhi, who changed its name to Dowlatabad, and endeavoured to make it the capital of his dominions. About 1595 it surrendered to Ahmed Nizam Shah, of Ahmednuggur, whose dynasty becoming extinct in 1600, it was seized by an Abyssinian slave, named Malik Amber. In 1634 it was taken by the Mongols, from whom it was wrested in 1717 by Nizam-ul-Mulk, whose descendants have ever since retained it. In 1758 it

was occupied for a time by a French force under M. Bussy.

DOWN (Ireland).—This see is supposed to have been founded about the close of the 5th century, and to have been originally located at Downpatrick (*q. v.*). The diocese was united to Connor at an early period, but they were separated A.D. 1136 or 1137. They were permanently united by the pope in 1441. In 1609 James I. made the church of the Holy Trinity at Downpatrick the cathedral of the diocese; but this falling into decay, Charles II. transferred the title to the parish church of Lisburn, by a patent dated Oct. 27, 1662. On the death of James Saurin, bishop of Dromore, April 9, 1842, that see was united to Down and Connor, according to the provisions of the Church Temporalities Act (3 & 4 Will. IV. c. 37 Aug. 14, 1833).

DOWNING COLLEGE (Cambridge).—Sir E. Downing, Bart., by his will, dated Dec. 20, 1717, left estates, which, in the failure of heirs in a certain line of succession, were to be devoted to the foundation and maintenance of a college at the university of Cambridge. The college was founded by charter, Sept. 22, 1800, and the statutes were framed in 1805. Land having been purchased, the first stone of the college buildings was laid May 18, 1807, and undergraduates were admitted to reside in 1821.

DOWNPATRICK (Ireland).—One of the most ancient towns in Ireland, existing in the days of St. Patrick, who is said to have founded the cathedral. He died A.D. 493. In 1538 its church was pillaged by lord-deputy Grey, and in 1609 it was made the cathedral of the diocese of Down. In consequence of the decayed state of the building, Charles II. transferred the title of cathedral to Lisburn church Oct. 27, 1662; but in 1790 Downpatrick cathedral was restored for divine service.

DRACO'S CODE, which punished all offences with death, was compiled about B.C. 621, and remained in force until superseded by the milder legislation of Solon, B.C. 594.

DRAGOONS.—Knights called *dracones*, because they fought under the standard of a dragon, are of very ancient date. Modern dragoons are of French origin, having been instituted by Charles de Cossé, marshal of Brisac, about the year 1600. In 1632 two kinds existed, called pikemen and musketeers. The oldest English regiment of dragoons is the Scots Greys, first enrolled Nov. 19, 1683.

DRAINAGE was practised by the ancient Egyptians and Assyrians at a very early date. Attempts were made to drain the Pontine marshes B.C. 160, but without permanent effect. Baldwin I., count of Flanders, is believed to have commenced the drainage of his territories about A.D. 863, but they were not effectually protected from inundations of the sea till 1180. In 1633 the Spaniards constructed works for the purpose of draining the city of Mexico, which, from its situation in the centre of a lake, was

subject to frequent inundations. The draining of the great Bedford level, under the management of the earl of Bedford and others, was completed March 25, 1653. In consequence of the frequent recurrence of cholera, measures have recently been adopted for securing a better system of drainage in this country. The Metropolitan Board of Works, appointed by 18 & 19 Vict. c. 120, s. 43 (Aug. 14, 1855), exercises control over all main sewers of the city of London, and, by the terms of the act, was bound to complete sewers, to prevent the passage of any sewage into the Thames near London, before Dec. 31, 1860 (s. 135). By 21 & 22 Vict. c. 104 (Aug. 2, 1858), the board was to commence, as soon as possible, works for the main drainage of the metropolis, and for preventing the further pollution of the Thames, the shores and bed of which they were empowered to improve by embankments, &c. To enable them to effect this, they were permitted to borrow money to the amount of £3,000,000, and to levy a rate of threepence in the pound on the annual value of property in London and its environs, on the basis of the county rate. This rate is called the Metropolis Main Drainage Rate.

DRAKE'S CIRCUMNAVIGATION OF THE GLOBE.—This, the first voyage round the globe accomplished by an Englishman, was performed by Sir Francis Drake, who sailed from Plymouth Dec. 13, 1577. He arrived in the *La Plata* April 14, 1578, and entered Port St. Julian June 20. Here Drake executed Mr. Thomas Doughtie on a charge of mutinous conduct, after which he resumed his voyage, Aug. 17. He seized Callao, where he captured seventeen heavily-laden ships, Feb. 15, 1579; and on the 1st March he took a Spanish galleon, which yielded a booty of about £150,000. After completing the circumnavigation of the globe, and meeting many surprising adventures, the expedition returned to Plymouth in safety, Sept. 26, 1580, where Queen Elizabeth visited him on board his ship and knighted him.

DRAMA.—The ancient drama originated with the Greeks, whose efforts were at first wholly extempore. Comedy was introduced at Athens B.C. 562, by Susarion and Dolon, whose company of buffoons performed on waggons, and smeared their faces with the lees of wine, instead of concealing them with masks. The chorus, which was of Doric origin, was added B.C. 556. Thespis of Icaria introduced a single actor, who related the mythological deeds of Dionysius or Bacchus, and carried on serious conversations with the chorus, B.C. 536. He is therefore regarded as the founder of tragedy. Phrynichus introduced other subjects besides the deeds of Bacchus, and also employed female characters in his productions, B.C. 511. Written comedy began with Epicharmus of Cos, who attired his performers in costume, and adorned his stage with purple curtains. He flourished about B.C. 500. Anaxandrides, the comic poet, who flourished B.C. 376, was the first who wrote plays with regular plots.

The principal Greek poets were:—*Tragic*: Æschylus (B.C. 525—456), Sophocles (B.C. 495—405), and Euripides (B.C. 480—406). *Comic*: Eupolis (B.C. 429—?), Aristophanes (about B.C. 427; last comedy, B.C. 388), and Menander (B.C. 342—291). Theatrical exhibitions were introduced at Rome during a pestilence, in B.C. 364, in order to propitiate the favour of the gods, or to divert the minds of the populace from the miserable condition to which they were reduced. The actors were Etruscans, and their performances consisted of dances without words or dramatic plot. Songs, however, were soon added, as accompaniment, and at length Livius Andronicus, who flourished about B.C. 240, wrote Latin plays with regular plots and fables. In consequence of losing his voice from the frequency of his performances, he employed a boy to sing the ode whilst he himself danced; thus introducing a most important improvement. Tragedy never flourished at Rome, although several distinguished authors endeavoured to render it popular. The chief of these were Nævius, who flourished B.C. 235, and Ennius (B.C. 239—169). The principal Roman comic dramatists are Plautus (B.C. 227—184), Statius (flourished B.C. 179, died B.C. 168), and Terence (B.C. 195—159). The old drama maintained its footing till the 4th century, when Gregory of Nazianzus banished it from the Constantinople theatres, and introduced in its stead dramatic compilations from the Sacred Writings. From Constantinople these productions were conveyed to Italy. They were succeeded by the Mysteries, or religious comedies, from which the modern drama is almost entirely derived. Thus the “Feast of Fools” and the “Feast of the Ass,” with other similar religious farces, were instituted by Theophylact, patriarch of Constantinople, about A.D. 950. These mysteries were introduced into England about 1110, when the Story of St. Catherine was exhibited at Dunstable. In 1264 a society *del Gonfalone* was established at Rome to represent the passion of the Saviour, and before 1300 sacred dramas were performed in Germany. The Chester mysteries are referred by Warton to the year 1327, though Hallam considers that date a century too early. The “Confrarie de la Passion” was established in France as a regular theatrical company about 1400. The earliest drama of a secular kind was Bibiena’s comedy of the Calandra, which was performed at Venice in 1508. Udal’s “Ralph Roister Doister,” written about 1540, and printed in 1565, is the first secular English play. The creation of the office of master of the revels, whose duty was to arrange the theatrical entertainments of the court, occurred in 1546, and contributed greatly to the rise of the British drama. In 1574 the earl of Leicester’s servants received a patent to act plays in any part of England, and in 1576 they built the theatre at Blackfriars, which was the first building of the kind in England. Marlowe’s “Edward II.,” which appeared in 1593, is regarded as the earliest English historical play. Burbage,

Shakespeare, Hemmings, and others, received a license to act plays in any part of the kingdom, May 19, 1603. Actresses, who were originally from France, first appeared in England, at the Blackfriars theatre, in Michaelmas, 1629; but the innovation was vehemently opposed by the stricter portion of the community, and in great part occasioned the publication of Prynne’s “Histriomastix, or Players’ Scourge,” which appeared in 1633. During the supremacy of the Puritans the drama was discouraged, all the theatres being closed by a parliamentary order dated Sept. 2, 1642, and their fittings and furniture destroyed by another, dated Jan. 22, 1648. Sir William Davenant, however, opened a kind of theatre in Rutland House, Charterhouse Yard, May 23, 1656, on which occasion scenes were first employed in a public theatre; and, in 1662, both he and Killigrew obtained patents to open playhouses by monopoly, from Charles II. Davenant’s theatre in Lincoln’s-Inn Fields was opened early in 1662, the actors being styled “the Duke of York’s Company of Comedians.” Killigrew’s company, known as the “King’s Company,” opened Drury Lane in 1663. The theatre in Dorset Garden was opened in 1671; and in 1682 the king’s and the duke’s companies united patents, and removed to Drury Lane. The popularity of operas so injured the pay of the actors, that Betterton and other leading performers opened another theatre in Lincoln’s-Inn Fields in 1695. By 10 Geo. II. c. 28 (1737), plays were ordered to be revised and licensed by the lord chamberlain before they could be legally performed. 3 Will. IV. c. 15 (June 10, 1833), known as the Authors’ Dramatic Copyright Protection Act, prohibited the performance of any play unless the sanction of the author had been previously obtained. The provisions of this act were extended to operatic performances by 5 & 6 Vict. c. 45, ss. 20 & 21 (July 1, 1842).

DRAMATIC COLLEGE.—Mr. Henry Dodd having placed five acres of land and 100 guineas at the disposal of a provisional committee, for the founding of an institution to bear this name, a public meeting was held at the Princess’s Theatre on the morning of Wednesday, July 21, 1858. Mr. C. Kean presided, and was, with three others, appointed trustees. On the 20th of September a dispute commenced between Mr. Dodd and the committee, respecting the conditions of the gift, and at a meeting held at the Adelphi Theatre, Jan. 12, 1859, Mr. Dodd’s offer was rejected, and arrangements were made for erecting the building elsewhere. A site was subsequently selected at Maybury, near Woking, and the foundation-stone of the college was laid by the Prince Consort, Friday, June 1, 1860.

DRAPERS’ COMPANY was incorporated A.D. 1430. The patent for their arms bears date 1439.

DRAPIER’S LETTERS.—These letters, written by Dean Swift under the signature of M. B. Drapier, condemned the govern-

ment for granting a patent in 1723, to supply a deficiency of £108,000 in the copper coinage of Ireland, to a man named Wood. They began to appear in 1723, and created a sensation in Ireland, perhaps unparalleled in the literary history of the country. In April, 1724, Harding, the printer of the letters, was imprisoned and prosecuted by the crown; but, in spite of persecution, he refused to betray their author. In consequence of the excitement in the country, the patent was abandoned, after £40,000 in halfpence had been coined; and Wood, who received an indemnity of £3,000 per annum for twelve years, was compelled by the popular indignation to leave the country.

DRAWING.—This art is evidently of extreme antiquity, being, at least, as old as the Egyptian hieroglyphics, which were invented about B.C. 2122. The Greeks attribute its origin to the ingenuity of a young girl of Sicyon, who traced, with a piece of charcoal, the shadow of her lover's profile on the wall, in order that she might possess a likeness of him during his absence.

DREPANUM (Sea-fight).—During the first Punic war, the Roman consul was defeated off Drepanum, in Sicily, with a loss of ninety-three ships, by Adherbal and the Carthaginian fleet. This event occurred B.C. 249.

DRESDEN (Battle).—An allied Austrian, Russian, and Prussian army, about 150,000 strong, under Prince Schwartzberg, attacked 131,000 French troops led by Napoleon I. at Dresden, Aug. 26, 1813. The battle, which commenced at four o'clock p.m., was renewed on the 27th, when Napoleon totally defeated his opponents. The allied army lost above 6,000 men in this battle, and General Moreau, who was engaged as a volunteer, fell in the conflict. The French loss amounted to 4,000 men.

DRESDEN (Saxony) was originally a miserable fishing village, founded in the 11th century. In 1136 it was beautified and enlarged by Henry the Illustrious, and in 1485, on the division of Saxony between the sons of Frederick II., it fell to the lot of Albert, who made it his residence. In 1491 it was destroyed by fire, but was speedily rebuilt, and, in 1534, a castle was erected by George le Barbu. In 1548 it became the capital of the electorate, and in 1610 was visited by war, plague, and famine. The Prussians took it in 1745 and in 1756, when they were commanded by Frederick the Great, who again laid siege to it, July 13, 1760. He was, however, compelled to retire on the 22nd, after submitting the city to a bombardment, which reduced some of its noblest buildings to ruins. An Austrian army entered Dresden June 11, 1809, and, after various reverses, quitted it July 21, the same year. The allied army entered Dresden April 26, 1813, but it was soon evacuated and taken by the French (*see* **BATTLE OF DRESDEN**), who were compelled to retire Nov. 11. Riots occurred here Sept. 9-13, 1830, during which the town-hall was attacked and plundered, and many excesses were committed. Another insurrection broke

out June 3, 1849, which was finally suppressed on the 7th. Mr. Paget, an English traveller resident in Dresden, was arrested on a false charge of aiding the Hungarian revolution, Sept. 2, 1852. His liberation took place on the 25th.

DRESDEN (Treaties).—Several treaties were concluded at Dresden, the most important being the Alliance of Dresden, signed June 28, 1709, by which Frederick IV. of Denmark, and Augustus II. of Saxony united against Charles XII. of Sweden; and the peace of Dresden, Dec. 25, 1745, between Saxony, Prussia, and Hungary.

DRESDEN CHINA.—John Frederick Böttcher, an apothecary's assistant at Berlin, having fled to Dresden to avoid prosecution for alchemy, was protected by the elector Augustus II., who provided him with means to discover the philosopher's stone. Although unsuccessful in this enterprise, he unexpectedly produced something so like oriental porcelain, that he abandoned his former useless pursuits, and directed his attention to the perfection of his new discovery. After several years of arduous labour, he at length, in 1709, succeeded in his attempt, and manufactured the first white porcelain made in Europe. A factory was established at Meissen in 1710, of which he was appointed director, and in 1715 he brought his invention to perfection.

DRESS.—In the "Book of Costume" it is stated that "all ancient nations seem to have had the same costume, formed of long garments, without much shape or ornament; and as these were all much alike, they descended from father to son for many generations. The colours most valued among the ancients appear to have been purple, red, and violet; but white was the most used by the Israelites." The costumes of the early Greeks were remarkable from their close fit; loose flowing garments being of later introduction. Among the Romans, the toga, a dress derived from the Etruscans, was the characteristic costume, and, although discouraged by Augustus (B.C. 27—A.D. 14) and Domitian (A.D. 81—96), it maintained its popularity till the removal of the seat of government to Constantinople, A.D. 330, when it was superseded by the Greek pallium. The earliest mention of the Britons is by Herodotus (B.C. 478), who alludes to their custom of staining their bodies with woad as a proof of high descent. Strabo (B.C. 71—A.D. 14) says that their dress consisted of a long black robe bound round the breast; and Herodian, writing A.D. 207, states that the inhabitants of the fenny districts wore little or no clothing, both that they might be at liberty to swim and wade through the marshes, and that their tattooed bodies might be seen and appreciated. The Druids wore long white robes and mantles, with oak-leaves bound round the forehead, and the chief priest was adorned with a breastplate of a crescent form, which was believed to possess the power of strangling the wearer if he ever gave false judgment. When the Romans conquered England, they of

course introduced their costume, which Tacitus tells us began to be adopted in the time of Agricola (A.D. 78). The Saxons introduced drawers, trowsers, long and short tunics,—whence the modern rustic smock is derived; cloaks, caps of wool, felt, or fur; stockings, usually cross-gartered; boots, shoes, and gloves. The Danes wore dresses similar in style, but more ornamental, and the Normans introduced no novelty on their first arrival, except the ladies' surcoat, a short cloak, with long and ugly sleeves. Parti-coloured coats were first worn in England in the reign of Henry I., chaplets, or wreaths of artificial flowers in the time of Edward III., hoods and tabrets in the reign of Henry IV., hats in the time of Henry VII., shoes in 1633, and breeches superseded trunk hose in 1654. In the 13th century the tabard, a sleeveless garment, consisting of two pieces, hanging before and behind, came into use, and in the 14th century a great variety of sleeves, cloaks, and head-gear, with pantaloons, sleeveless spencers, scarfs, and long-pointed shoes, became characteristic features. The women of this century were chiefly distinguished by the whimsical designs of their head-dresses; they also wore stay-like garments outside their other dress. In the 15th century tight breeches and slashed sleeves were introduced. Strutt states, "At the close of the 15th, the dress of the English was exceedingly fantastical and absurd, insomuch that it was even difficult to distinguish the one sex from the other. The men wore petticoats over their lower clothing; their doublets were laced in the front like a woman's stays across a stomacher; and their gowns were open in the front to the girdle, and again from the girdle to the ground." The horned head-dress for ladies appeared at the beginning of this century, and continued in vogue till 1461, when the steeple fashion became prevalent. Swords, as a part of domestic dress, were introduced in the latter part of the 15th century. The chief innovations of the 16th century were the enormous puffed doublets and trunk breeches of the men, and the hooped fardingales and high wing-like collars of the ladies. In the 17th century, judges' wigs, coats with short sleeves, puffed breeches, and boots with very large tops, were favourite fashions, and the Puritans embroidered their garments with religious maxims. Muffs for the hands are mentioned as part of the equipment of gentlemen during the frost of 1633-4. In the early part of the 18th century the ladies' commodes, introduced in 1687, attained the extravagant height which excited Addison's railery in the *Spectator*; and the hooped petticoats were so altered in fashion, that, in the words of a writer in the *Weekly Journal* of 1718, "when a slender virgin stands upon a basis so exorbitantly wide, she resembles a funnel, a figure of no great elegance." Gentlemen wore square-cut coats, stiffened with wire and buckram. Towards the middle of the century, head-dresses of enormous height were worn by the ladies,

who, according to the *London Magazine* for 1768, used such expensive modes of dressing the hair, that it was sometimes left nine weeks without attention, which time, says the author, is "as long as a head could well go in summer." The formation of the Macaroni Club in 1772 contributed greatly to extravagance of costume, which continued undisturbed by any important novelty until the introduction of the modern round hat for gentlemen in 1789. Short waists became fashionable in 1794, but in 1798 they resumed more graceful proportions, and at length regained their proper shape.—Various laws have been enacted at different times for the regulation of costume in England. Such are 37 Edw. III. c. 8, &c. (1363); 3 Edw. IV. c. 5 (1463); 22 Edw. IV. c. 1 (1482); 1 & 2 Phil. & Mary, c. 2 (1554); and 13 Eliz. c. 19 (1570). The last act required every person above six years old, except maidens, ladies, and gentlewomen, and lords, knights, and gentlemen of 20 marks a year, to wear on Sundays and holidays a woollen cap of English manufacture, under a penalty of 3s. 4d.

DREUX (France).—This town was taken and destroyed by the English A.D. 1188. An obstinate battle was fought between the Roman Catholic army and the Huguenot forces, led by Condé, at this place, Dec. 19, 1562. Both commanders were made prisoners. Henry IV. of France took the town, after a siege of eighteen days, in 1593.

DRINKING-FOUNTAINS.—A meeting in support of the movement to erect drinking-fountains was held at Willis's Rooms, April 12, 1859. The first public fountain in London was erected by the Metropolitan Drinking-Fountains Association, at the expense of S. Gurney, Esq., M.P., at the corner of St. Sepulchre's churchyard. It was opened for general use April 21, 1859. Numbers of drinking-fountains have since been erected in London, and in various provincial towns.

DROGHEDA (Ireland) was fortified by Turgesius the Dane, A.D. 911. Lucas, archbishop of Armagh, founded a Dominican convent here in 1224, and in this building the four Irish kings, O'Neill, O'Hanlon, O'Donnell, and Macmahon, did homage to Richard II., March 10, 1395. In 1412, Henry VI. granted a corporation, and the town afterwards became of considerable political importance, courts and parliaments being held in it by the English viceroys. "Poyning's Law," which rendered the Irish parliament subservient to that of England, was passed at Drogheda in 1494. Cromwell stormed and took the town Sept. 11, 1649, putting 3,000 of the inhabitants to the sword; and in 1690 it resisted an assault by King William III.'s army, to which it surrendered after the battle of the Boyne.

DROMORE (Ireland) was erected into a bishop's see by St. Coleman about 510, but there is no regular succession of bishops till the 12th century. Jeremy Taylor became bishop of Dromore in 1661. The Church Temporalities Act (3 & 4 Will. IV. c. 37,

Aug. 14, 1833) provided that, when next vacant, the see of Dromore should be united to those of Down and Connor. This occurred on the death of Bishop Saurin, April 9, 1842.

DRONTHEIM, or TRONDHJEM (Norway).—This town, founded by Olaf I. in 997, was the capital of Norway, until that kingdom was united to Denmark. The cathedral was commenced in 1033. Drontheim was made an archbishopric in 1151, was ceded to Sweden in 1658, and restored to Denmark in 1660. The Swedes invested Drontheim, but without success, in October, 1718.

DROWNING (Punishment of).—This punishment, common amongst many nations of antiquity, was treacherously inflicted near Nicomedia, A.D. 370, on eighty legates, who complained of certain grievances, which the emperor Valens found it inconvenient to redress. It was awarded, by a charter of Richard I., dated 1189, to any crusader of his army who should kill a fellow-soldier on shipboard. In this country it was long a punishment inflicted upon women. During the French revolution, it was revived by the monster J. B. Carrier, who, in 1793, constructed vessels in which a hundred victims might be drowned at once. (See **NOYADES**.)

DRUIDS, the priests of the ancient Gauls and Britons, who revered the oak and mistletoe, and were the legislators and teachers of the people. Their origin is unknown. Suetonius Paulinus put numbers of them to the sword, when he took Anglesey, the ancient Mona, in the year 61 A.D., and from that time their authority was at an end.

DRUM.—Representations of this instrument occur on Egyptian sculptures of the 16th century B.C., where it is always depicted as being struck by the hands. It was introduced into Europe by the Saracens, and was played, probably for the first time in France, on the entry of Edward III. into Calais in 1347.

DRUMCLOG (Battle).—Graham of Claverhouse was defeated here by the Scottish Covenanters, Sunday, June 1, 1679 (O.S.). Forty of the royalists and one of the rebels fell in the action, and Claverhouse himself was nearly made prisoner.

DRUNKARDS.—By a law of Pittacus, B.C. 599, the ancient Greeks inflicted double punishment upon such as committed crime in a state of intoxication; one penalty being awarded for the actual offence and the other for the intemperance which occasioned its commission. The Apostolical Canons, A.D. 250, declared all drunken priests degraded from their sacred office, and Pope Eutychian (A.D. 275—283) denounced sentence of excommunication against laymen guilty of intoxication. In England a law was passed against drunkenness in 975, and by 4 James I. c. 5 (1606), and 21 James I. c. 7, s. 3 (1623), offenders are liable to a fine of five shillings, to be devoted to the use of the poor, or six hours in the stocks, and for a second offence, to be bound with two sureties in £10 for good behaviour.

DRURY-LANE THEATRE was opened by the king's company under Thomas Killigrew, April 8, 1663. In January, 1672, it was burnt down, and a new one, erected from the designs of Sir Christopher Wren, was opened May 26, 1674. This theatre became the only one in London, when Davenant's company united with the king's, Nov. 16, 1682. After undergoing considerable alterations, it was reopened Sept. 23, 1775. The Theatrical Fund was established by Garrick in 1776. The last performance in Wren's theatre took place June 4, 1791, after which it was pulled down and rebuilt by Henry Holland. The new building was opened with a performance of sacred music, March 12, 1794. It was burnt down Feb. 24, 1809. The first stone of a new theatre, designed by Mr. B. Wyatt, was laid Oct. 29, 1811, and the new building was opened with a prologue by Lord Byron, Oct. 10, 1812.

DRUSES, a people of Syria, who trace their descent from Durzi, a disciple of the Fatimite caliph Hakem (A.D. 996—1020). In 1588 they were subdued by Amurath III., but regained a portion of their independence in the middle of the 18th century. An insurrection occurred among the Druses and Maronites in the spring of 1840. It was suppressed by the Turks in 1841. In 1860 they rose in arms against the Maronite Christians, and slew about 12,000 men, women, and children, of whom 200 were priests; besides destroying 163 villages, 220 churches, and seven convents. The massacre was suspended July 10, and the sultan dispatched Fuad Pasha as commissioner to restore tranquillity. The consequence was, that 167 of the most guilty Druses were publicly executed at Damascus Aug. 20, and many others sent to Constantinople to undergo imprisonment and hard labour.

DUBLIN (Ireland) is mentioned by Ptolemy, under its Latin name "Eblana," A.D. 140. Its early history is involved in obscurity.

A.D.

- 448. St. Patrick converts the king of Dublin and his subjects to Christianity.
- 498. First arrival of the Danes, who surround the city with walls.
- 964. Mentioned by Edgar, king of England, in a charter called "Oswald's Law."
- 1005. The suburbs are burnt by Melaghlin, king of Meath.
- 1014. April 23. Brian Boru defeats the Danes of Dublin, at the battle of Clontarf (q. v.).
- 1038. Donat, bishop of Dublin, and Sitric, king of Dublin, found St. Michael's chapel, afterwards called Christchurch.
- 1105. St. Catherine's church built.
- 1170. Sept. 21. It is besieged and taken by the English, under Earl Strongbow.
- 1173. Henry II. grants Dublin, by charter, to the citizens of Bristol.
- 1190. A disastrous fire destroys great part of the city. Christchurch is rebuilt, and St. Patrick's church founded.
- 1205. Aug. 31. A patent is granted by King John, directing Fitzhenry, the governor of the town, to commence the castle.
- 1215. A bridge is built over the Liffey.
- 1235. Monastery of St. Francis is founded.
- 1259. Monastery of the Holy Trinity is founded.
- 1278. Whitefriars monastery is founded.

- A.D.
 1283. Jan. 2. The greatest part of the city is destroyed by fire.
 1308. A provost and two bailiffs are appointed.
 1320. A university is established in St. Patrick's church, by Alexander de Bicknor, archbishop of Dublin.
 1362. April 6. St. Patrick's church is destroyed by fire.
 1409. A mayor first appointed.
 1487. Lambert Simnel is crowned king in Christchurch, by the title of Edward VI.
 1500. The city is besieged by a son of Gerald, earl of Kildare, and lord-deputy.
 1541. The priory and convent of Christchurch constituted a deanery and chapter.
 1548. The bailiffs of Dublin are first called sheriffs.
 1591. March 13. Trinity College is founded by Thomas Smith, mayor.
 1614. A convocation of bishops held, which establishes the Thirty-nine Articles.
 1635. John Ogilby erects the first theatre in Dublin.
 1647. June 18. Surrenders to the parliamentary forces.
 1649. June 19 to Aug. 2. Unsuccessfully besieged by the marquis of Ormond. Aug. 14. Occupied by Cromwell previous to the siege of Drogheda.
 1652. High court of justice is established, for the trial of papist rebels.
 1662. Phoenix Park is commenced.
 1665. The chief magistrate is first called lord mayor.
 1670. The Blue-coat Hospital and Bloody-bridge are built.
 1676. Sir Humphrey Jervis builds Essex Bridge.
 1684. April 7. Great part of the castle is destroyed by fire.
 1686. The Royal Hospital at Kilmalnam is completed.
 1688. March 24. James II. enters Dublin.
 1695. The Four Courts are built in Christchurch Lane.
 1701. July 1. The equestrian statue of William III. is inaugurated.
 1704. The Foundling Hospital is commenced.
 1707. Old Custom-house is founded in Essex Street.
 1720. Steven's Hospital is founded.
 1725. The market-house in Thomas Street is built.
 1728. Aug. The infirmary is founded on the Inns' quay.
 1729. Parliament-house on College Green is begun.
 1745. St. Patrick's Hospital is founded by Dean Swift. It is opened in 1757.
 1749. April 2. The Royal Dublin Society is incorporated, and St. Patrick's steeple erected.
 1753. April. St. Nicholas' Hospital is opened. Rebuilding of Essex Bridge commenced, and completed in 1756.
 1758. The new theatre in Crow Street is opened.
 1764. Queen's Bridge is founded. Finished in 1768.
 1767. June 11. Magdalen House, Leeson Street, is opened.
 1769. Aug. 2. The Royal Exchange is founded, and opened in 1779.
 1770. Meath Hospital is founded.
 1772. The Foundling Hospital and workhouse are incorporated.
 1773. New goal founded; completed in 1780. Act for paving the streets passed, and penny post established.
 1775. Four Courts Marshalsea founded.
 1781. The new custom-house is founded, and opened Nov. 7, 1791.
 1783. June 25. Bank of Ireland is opened in St. Mary's Abbey.
 1784. July 17. Assembly-rooms, Cavendish Row, are founded.
 1786. New Four Courts founded, and police established.
 1787. Soldiers' Infirmary, Phoenix Park, is founded, and new theatre of Trinity College opened.
 1789. Jan. 15. Astley's theatre royal, for equestrian performances, is opened.
 8791. Apothecaries' Hall established, and Carlisle and Sarah's bridges are founded.

- A.D.
 1792. Feb. 27. The House of Commons is partly destroyed by fire.
 1796. July 29. Commercial Buildings are founded. Oct. First meeting of the city armed association. Nov. 3. New Four Courts opened.
 1798. May 19. Rebellion in Dublin, and arrest of Lord Edward Fitzgerald.
 1801. Jan. 1. The united standard unfurled from the castle towers, in consequence of the union with Great Britain.
 1803. July 23. Emmet's insurrection breaks out in Thomas Street.
 1804. May 14. Fever hospital opened.
 1806. Nov. 28. Bedford Asylum is founded.
 1808. The Parliament-house is converted into the Bank of Ireland.
 1814. Dec. 16, &c. Riots at the Crow-Street Theatre.
 1817. The General Post-office is completed.
 1819. April 16-20. More riots at the theatre.
 1821. Aug. 12. George IV. visits Dublin. Theatre Royal, Hawkins Street, and George's dock, are opened.
 1822. Dec. 14. Riot at the theatre, on the occasion of the lord lieutenant's visit. From the circumstance of a bottle being thrown at the vice-regal box, it is called the bottle riot.
 1824. New Anatomy Buildings, and Royal Hibernian Academy of Arts, are founded.
 1825. Gas introduced.
 1827. Dec. 12. The King's Bridge is founded.
 1829. Northumberland Buildings are erected.
 1832. First appearance of the cholera.
 1833. Aug. 10. Great fire at the Custom-house.
 1834. Dec. 17. Railroad to Kingstown is opened.
 1836. July 4. Dublin New Police Act passed (6 & 7 Will. IV. c. 29).
 1837. Mechanics' Institute is founded.
 1839. Jan. 6. Much injury is done by a hurricane.
 1843. Oct. 14. O'Connell and others are arrested on charges of conspiracy and sedition.
 1844. Sept. 6. Great demonstrations of popular joy, in consequence of the liberation of O'Connell and his fellow-prisoners.
 1848. May 15. Trial of Smith O'Brien. (See CLONMEL.) May 16. Trial of Meagher. May 24-27. Trial of Mitchell, who is sentenced to fourteen years' transportation.
 1849. Aug. 6. Dublin is visited by Queen Victoria and the royal family.
 1850. April 18. A hail-storm destroys property to the value of £27,000.
 1852. Sept. The Exchange is inaugurated as the City-hall.
 1853. May 12. The Dublin Exhibition is opened by the lord-lieutenant.
 1854. Aug. 10. Act passed for the establishment of a National Gallery, Library, and Museum in Dublin (17 & 18 Vict. c. 99).
 1858. March 12. Serious fray between the students of Trinity College and the police, on occasion of the entry of the lord-lieutenant.
 1861. April 6. Six persons are killed in an omnibus which falls into the canal. Aug. 22. The Queen arrives, and leaves for Killarney Aug. 26.

DUBLIN (See of).—St. Patrick is said to have placed a bishop over the church he founded at Dublin, A.D. 448, but no names of prelates remain earlier than Livinus, who was promoted to the see in 633. In 1152, Bishop Gregory was raised to the archiepiscopal dignity, and in 1214 the diocese was enlarged by the addition of the see of Glendaloch. George Brown, who succeeded to the archiepiscopal throne in 1535, was the first Protestant archbishop of the diocese. In agreement with a provision of the Church Temporalities Act (3 & 4 Will. IV. c. 37.

Aug. 14, 1833), the see of Kildare was united to Dublin, Aug. 8, 1846.

DUBLIN INDUSTRIAL EXHIBITION.—At a meeting of the Royal Dublin Society, held June 24, 1852, Mr. William Dargan offered to place the sum of £20,000 in the hands of a committee of twenty-five gentlemen, for the construction of a building in which an Irish industrial exhibition might be held. The offer was accepted, and the committee held its first meeting July 5. The building, designed by Mr. John Benson, was sufficiently advanced to admit exhibitors to deposit their goods, March 1, 1853; by which time Mr. Dargan's advances fell little short of £80,000. The ceremony of opening the exhibition was performed by Earl St. Germain, the lord-lieutenant, May 12. On the 29th of August it was visited by Queen Victoria and Prince Albert, and after a most successful season, was closed on the 1st of November.

DUCAT.—This gold coin is said to have been first struck in the 6th century by Longinus, duke or *duca* of Ravenna. Others attribute its introduction to Roger II., duke of Apulia, who coined a large number of ducats in 1140. Gibbon attributes the origin of the name to the dukes of Milan. The Venetians adopted them in 1290, and they subsequently became the favourite medium of the commercial republics of Italy. A silver coin, known as the ducatone, was extensively used in Spain and Holland.

DUDLEY'S CONSPIRACY.—In February, 1556, Sir Henry Dudley, cousin to the duke of Northumberland, entered into a conspiracy, with other young men, to dethrone Queen Mary and establish the Princess Elizabeth in her stead. The French agreed to furnish means, and it was proposed to rob the Treasury; for which purpose five of the conspirators were selected. The plot was, however, betrayed, and Throgmorton, and about fifteen more, were arrested and committed to the Tower, March 18. Dudley succeeded in making his escape. Throgmorton was executed April 28; Captain Stanton, May 19; Derrick, June 2; and Sir Henry Peckham and John Daniel, July 7.

DUELLING.—No doubt this mode of settling disputes originated in the old system of assize of battle (*q.v.*), the first instance in England approaching to the modern duel being the encounter between William count d'Eu and Godfrey Baynard, in 1096. In 1361 a projected duel between Henry, duke of Lancaster, and the duke of Brunswick, was prevented by John, king of France; and, in 1398, Richard II. prohibited one arranged between the dukes of Hereford and Norfolk. Hallam remarks that duelling in the modern sense of the term was unknown before the 16th century. In 1528 Francis I. challenged the emperor Charles V. to a mortal encounter; but, though accepted, the challenge led to no engagement. Charles IX. of France prohibited the practice in his dominions in 1566. Duelling with small-swords was first introduced into England in 1587.

In 1597 duelling was allowed in England by Queen Elizabeth. Cromwell published an ordinance for its suppression in 1654, and Charles II. issued a proclamation denouncing death against any who should kill another in a duel, in 1679. A severe edict against duelling was published in Bavaria, Nov. 9, 1773, which enacted that principals and seconds in a duel, even although no wounds were given, should suffer death, and be buried as criminals. A court of honour was established for its suppression in Prussia in 1786, by deciding questions which otherwise would have occasioned duels. Three new articles of war were issued in 1844 to abate the practice in the English army. The following are some of the most remarkable duels:—

A.D.

- 1712. Nov. 15. The duke of Hamilton and Lord Mohun kill each other, the duel being fought with small-swords.
- 1762. Oct. 5. Between John Wilkes and Lord Talbot, neither being injured.
- 1763. Nov. 16. Between John Wilkes and Samuel Martin, M.P., when the former was wounded by a pistol-shot.
- 1765. Jan. 26. Lord Byron kills Mr. Chaworth, at the Star and Garter, in Pall Mall.
- 1769. Sept. Henry Flood shoots James Agar dead.
- 1772. Jan. 31. Two French ladies of quality fight a duel with knives, in order to settle a question of precedence.
- 1773. Feb. 2. Lord Townshend wounds the earl of Bellamont.
- 1777. Oct. A Frenchman of quality is severely wounded in a duel by his lover, whom he had abandoned. The lady was the challenger.
- 1778. March 21. The count of Artois is wounded by the duke of Bourbon, at Paris.
- 1779. Nov. 30. Charles James Fox is wounded by Mr. Adam.
- 1780. March 22. Colonel Fullerton wounds Lord Shelburne, in consequence of expressions used in a parliamentary debate.
- 1782. June 18. The Rev. Mr. Allen mortally wounds Lloyd Dulany, Esq. He was tried July 6, found guilty of manslaughter, and sentenced to pay a fine of one shilling, and to be imprisoned for six months.
- 1783. Sept. 4. Colonel Cosmo Gordon kills Lieutenant-Colonel Thomas. Oct. 17. Mr. Green is killed by Mr. Munro.
- 1786. June 8. Lord Macartney is wounded by Major-General Stuart.
- 1787. Robert Keon murders Mr. Nugent while their seconds are making preliminary arrangements for a duel. He was tried Jan. 31, 1788, and executed Feb. 16.
- 1788. Dec. 21. Colonel Roper is killed by Mr. Pinefoy, who is tried and acquitted, Aug. 14, 1794.
- 1789. May 26. The duke of York and Colonel Lenox meet on Wimbledon Common, but neither is wounded.
- 1790. April 1. Mr. Curran and Major Hobart, neither of whom is wounded. April 14. Sir George Ramsay is killed by Captain Macrae. May 4. Mr. Power is killed by Captain Grumbleton. Sept. 20. Mr. Anderson kills Mr. Stephens.
- 1791. July 19. Mr. Graham is killed by Mr. Julius.
- 1792. March. A duel takes place between Messrs. John Kemble and Aikin, the actors, neither of whom is injured. June 9. The earl of Lonsdale and Captain Cuthbert have a meeting without dangerous results. July 2. Lord Lauderdale and General Arnold exchange shots without effect.
- 1794. June 18. Richard England shoots Mr. Rowlls. He is tried, and found guilty of manslaughter, Feb. 19, 1796.

- A.D.
 1796. June 28. Mr. Gawler wounds Lord Valentia. Aug. 20. Mr. Carpenter is killed by John Pride.
 1798. May 27. A duel is fought between Mr. Pitt and Mr. Tierney, neither of whom is wounded.
 1800. Mr. Grattan wounds Mr. Corry. May 10. Mr. Corry kills Mr. Newburgh.
 1801. Aug. 26. Major Impey is killed by Lieutenant Willis, at Quebec.
 1802. Jan. 10. Mr. Hamilton is shot at New York, by Mr. G. J. Eaker. June 15. Lieutenant Rae kills Mr. Bremen, at the Cape of Good Hope.
 1803. March. Lieutenant W— and Captain J— exchange shots, with fatal effects to both. April 6. Captain Macnamara kills Colonel Montgomery. He is tried April 22, and is found not guilty, in spite of his own confession.
 1804. March 6. Captain Best kills Lord Camelford. July. General Hamilton is killed by Aaron Burr, Vice-president of the United States.
 1806. Jan. 1. Ensign Butler kills Ensign Brown. March 22. Lieutenant Turrens is killed by Mr. Fisher. May 3. Messrs. Rogers and Long kill each other in a duel. Sept. 21. Mr. Richardson and Baron Hompesch have a meeting, and the former is shot through the body. Oct. 12. Mr. Long is shot by Mr. Armstrong.
 1807. May 5. Sir Francis Burdett and Mr. Paull wound each other. June 8. Mr. Alcock kills Mr. Colclough, and shortly afterwards becomes deranged. June 23. Major Campbell shoots Captain Boyd. He is executed in Aug. 1808.
 1808. May 3. M. de Granpreé and M. le Pique fight in balloons, with blunderbusses. M. le Pique's balloon is pierced by his adversary's shots, and he and his second are dashed to pieces by its sudden descent.
 1809. May 30. Lord Paget and Captain Cadogan meet, but without result. Sept. 22. Mr. Canning is wounded by Lord Castlereagh.
 1810. Sept. 6. Mr. Payne is killed by Mr. Clark.
 1811. March 4. Ensign de Betton kills Captain Boardman at Barbadoes.
 1812. Oct. 7. A duel between Lieutenants Stewart and Bagnall terminates fatally to the latter.
 1813. July 12. Lieutenant Blundell is killed by Mr. Maguire.
 1814. April 23. Lieutenant Cecil kills Captain Stackpole, at Port Royal, Jamaica.
 1815. Feb. 1. Mr. D'Este is killed by Mr. O'Connell. Dec. Major Hillas is shot by Mr. Fenton.
 1816. Feb. 21. Mr. Dillon is shot by Mr. Kane.
 1817. March 8. Lieutenant Conroy kills Lieutenant Hinds. Dec. 12. Mr. Cochrane is killed by Major Lockyer.
 1818. Jan. 13. Lieutenant Bailey is shot by Mr. O'Callaghan. March 1. Lieutenant Cartwright is killed by Lieutenant Maxwell.
 1819. Aug. 1. Mr. Uniacke kills Mr. Bowie. Oct. 6. Captain Fellow is killed by Lieutenant Walsh.
 1820. June 11. A duel between Lord Clare and Mr. Grattan terminates without injury. Aug. 13. Mr. Travers is killed by Mr. Hungerford. Aug. 20. Messrs. Stuart and Townsend fight with muskets, and both fall. Sept. 17. Mr. Burrows is killed by Mr. Fulliot, whose skull is fractured.
 1821. Feb. 16. Mr. Scott is killed by Mr. Christie. April 10. M. Manuel is killed by M. Beaumont. April 21. Viscount Petersham and Mr. Wedderburne meet without injury. May 22. Mr. Cuddie is killed by Mr. Brittlebank.
 1822. March 26. Sir Alexander Boswell, son of the biographer, is killed by Mr. Stuart. May 2. The dukes of Buckingham and Bedford meet without result.

- A.D.
 1823. Feb. 28. Generals Pepe and Carnesca fight with swords, and the latter is wounded.
 1824. Oct. 30. Captain Gourlay is killed by Mr. Westall.
 1826. July 1. Messrs. Lambton and Beaumont meet without any casualties. Dec. 26. Mr. Bric is killed by Mr. Hayes.
 1829. March 21. The duke of Wellington and the earl of Winchelsea exchange shots without effect. April 1. Captain Helsham kills Lieutenant Crowther.
 1830. Jan. 8. Mr. Clayton is killed by Mr. Lambrecht. March 17. Mr. O'Grady is killed by Captain Smith. Aug. A duel between Dr. Smith and Dr. Jeffries, at Philadelphia, terminates fatally for both parties.
 1833. May 10. Sir J. Jeffcott kills Dr. Hennis.
 1834. Jan. 30. General Bugeaud kills M. Dulong, at Paris.
 1835. April 25. Mr. St. John kills Count Catraffiana. Nov. 21. Colonel Bellamy kills Captain White, at Washington, and is desperately wounded himself.
 1836. April 8. General Evans is wounded by Captain Dickson. Aug. 4. The Hon. Grantley Berkeley and Dr. Wm. Maginn exchange three shots without effect.
 1838. April 27. Mr. Pigot is wounded by Mr. Carroll. June 16. M. Gerard de Meley wounds Lord Castlereagh. Aug. 22. Mr. Mirin is shot by Mr. Eliot.
 1839. Jan. 13. Lord Londonderry and Mr. Grattan exchange shots without effect. Feb. 28. Lord Powerscourt and Mr. Roebuck meet without serious results. Dec. 10. Lords George Loftus and Harley exchange shots without effect. Dec. 20. Lord William Paget and Mr. Fiske exchange shots.
 1840. May 17. Messrs. Wynn and Brown fight in a stage-coach, between Penn and Chicago, and both are killed. Sept. 12. Lord Cardigan wounds Captain Tuckett. He is brought to trial before the House of Lords, Feb. 16, 1841, and acquitted.
 1842. July 15. The Hon. Craven Berkeley and Mr. Boldero exchange shots without effect.
 1843. July 1. Colonel Fawcett is killed by Lieutenant Munro.
 1845. May 20. Mr. Seton is killed by Lieutenant Hawkey.

DUFFINDALE (Battle).—The earl of Warwick, at the head of the German lanzknechts, defeated the Norfolk rebels, at this place, Aug. 27, 1549, when about 3,500 of the latter were cut down.

DUKE, the highest title of nobility in England, is derived from the Latin *dux*, a leader. It is applied to the descendants of Edom, in Genesis xxxvi. 15—43 (B.C. 1575—1533), and was used as a title of honour by the Roman governors of provinces under the later emperors. It was introduced into England by Edward III., who created his son, the Black Prince, duke of Cornwall, A.D. 1337. The order had become extinct in 1572, and was revived by James I. The first Irish duke was Robert Vere, created duke of Dublin in 1385. The title was introduced into Scotland by Robert III., who created his son David duke of Rothesay in 1399. The title of archduke is said to have been created by Rodolph I., emperor of Germany, in favour of his son Albert, in 1234. The first grand-duke was Cosmo di Medici, of Florence, who received the title from Pope Pius V. in 1569.

DUKE OF YORK'S ISLAND (South Pacific

Ocean).—This island was discovered by Commodore Byron, June 24, 1765.

DULWICH COLLEGE (Surrey) was founded by Edward Alleyn, the actor, and designed by Inigo Jones. The chapel was finished in 1616, and the foundation opened Sept. 13, 1619. Its original name was God's Gift College, and its purpose the maintenance of a master, four fellows, six poor brethren, six sisters, twelve scholars, and thirty out-members. Alleyn was buried in the chapel Nov. 27, 1626. The east wing was finished in 1740. The girls' school was founded by James Allen, Aug. 31, 1741, and the picture-gallery was completed in 1813. The paintings were bequeathed by Sir Francis Bourgeois in 1811, and the gallery was opened to the public in 1817. Owing to the increased value of land, the wealth of the college accumulated so fast, that provisions were made for extending its benefactions by 20 & 21 Vict. c. 84 (Aug. 25, 1857).

DUMBARTON (Scotland).—The castle of Dumbarton, which is of very ancient date and resisted a siege by Agricola, was taken by Eadbert, king of Northumbria, A.D. 756. In 1221 the town was erected into a burgh by Alexander II., and in 1456 the countess of Lennox founded a collegiate church, of which nothing but the ruins now remain. In 1563, Mary, queen of Scots, visited the castle, and in May, 1571, it was taken, under circumstances of remarkable daring, by Captain Crawford. Queen Victoria inspected this fortress Aug. 17, 1847.

DUMBLANE, or DUNBLANE (Scotland), was erected into a bishopric about the year 1160. A battle (see **SHERIFF-MUIR**) was fought near this town between the forces of the Pretender, under the earl of Mar, and those of George I., under the duke of Argyle, on Sunday, Nov. 13, 1715 (O.S.), in which both parties claimed the victory.

DUNBAR (Scotland) was conferred upon the earl of Northumberland in 1072 by Malcolm Caenmore. In 1296, John Warren, earl of Surrey, defeated John Baliol, in a great battle fought here, which for the time decided the fate of Scotland as a conquest of Edward I. In 1567 its castle was demolished by order of parliament. Cromwell gained a great victory over the Scottish army at this place, Sept. 3, 1650, killing 4,000, and taking 10,000 prisoners.

DUNDALK (Ireland), seized by Edward Bruce in 1315, was the scene of his coronation as king of Ireland in 1317, and of his death in a battle fought with Lord Bermingham, Oct. 5, 1318. In 1641 it was taken by Sir Phelim O'Neill, who destroyed its castle and fortifications, and in 1642 it was stormed by Lord Moore and Sir Henry Tichbourne. It surrendered to Cromwell in 1649, and was occupied by the forces of William III., June 27, 1690.

DUNDEE (Scotland).—Malcolm III., who reigned A.D. 1056—1093, built a palace here, in which he sometimes resided. It was made a royal burgh in 1210, and placed under the government of a constable in 1298. Edward

Bruce took it in 1313. In 1544 the plague committed terrible ravages among its population, and in 1641 Charles I. conferred upon it the present charter. In 1645 it was besieged and taken by the earl of Montrose, and in 1651 was sacked by Monk, who massacred about 1,300 of its inhabitants. Queen Victoria landed at Dundee in September, 1844, in commemoration of which a magnificent triumphal arch has been erected. Nineteen persons were killed by a boiler explosion at one of the linen-factories here, April 15, 1859.

DUNES, (Battle,) was fought near Dunkirk during the siege of that town by the combined armies of France and England, June 4 (14 N.S.), 1658. The Spaniards, who had advanced to the relief of Dunkirk, were totally defeated by the allied troops led by Turenne.

DUNGAN-HILL, (Battle,) fought at this place, in Ireland, between the Parliamentary army, under Colonel Michael Jones, and the Irish, under General Preston, Aug. 8, 1647. The numbers were nearly equal, and Jones gained a complete victory.

DUNGENESS (Kent).—A French fleet of fourteen ships of the line anchored off this point Jan. 22, 1744, but sailed away on the approach of the English squadron commanded by Sir John Norris, and was subsequently scattered by a storm. Towards the end of the last century a lighthouse was erected on this cape, after the model of the Eddystone, and in 1807 a series of martello towers was commenced, to defend the coast between Dungeness and Folkestone.

DUNKELD (Scotland).—The Culdees had a monastery at this place, in Perthshire, as early as A.D. 729, which was erected into a cathedral by David I. in 1127. Kenneth I. removed the remains of St. Columba to Dunkeld in 850. The present cathedral was begun in 1330, and the charterhouse erected by Bishop Lauder in 1469. James VI. founded the grammar-school in 1567, and the bridge over the Tay was built in 1809.

DUNKERS, or GERMAN BAPTISTS.—This religious sect was founded in Germany by Alexander Mack about 1708. In 1723 they were driven by persecution to America, where they established themselves at Germantown, and founded a church. Among their doctrines may be mentioned vegetarianism, the necessity for good works, and the separation of the sexes. The origin of the name Dunkers is unknown.

DUNKIRK (France) was founded by Baldwin III., count of Flanders, about A.D. 960. It afterwards passed into the possession of the counts of Hainault, who sold it to its former lords in 1280. In 1388 it was burnt by the English, and in 1435 was transferred to the house of Luxemburg, whose right passed by marriage to the Bourbons in 1487. Early in the 16th century it was seized by the Spaniards, who retained it till July 1558, when it was re-taken by the French. The duke of Parma re-annexed it to the Spanish empire in 1585. In 1646 it was taken by the

great Condé, and in 1652 was again seized by the Spaniards. Marshal Turenne retook it June 25, 1653, after the battle of Dunes (*q. v.*), fought June 4, and gave it to the English, who had assisted him in its capture. Charles II. sold it to France for £500,000, Oct. 17, 1662. Louis XIV. increased its fortifications, which were sufficiently strong to resist a bombardment by the united fleets of Great Britain and Holland, July 26, 1694. By the treaty of Utrecht, April 11, 1713, it was agreed that all the military defences should be destroyed; but these conditions were evaded, and the restriction was consequently renewed by the treaty of Paris, Feb. 10, 1763. The enforcement of the order was, however, found impracticable. It was repealed by the treaty of Versailles, Sept. 3, 1783, and the works have since been largely increased. The duke of York was defeated in an attempt to take Dunkirk, Sept. 7, 1793. The fortifications were greatly enlarged, and the port enfranchised in 1816.

DUNMOW (Essex).—The priory was founded A.D. 1104, by Juga Baynard. The manor is held by a curious tenure, which has given the town notoriety beyond its real importance. The prior and canons were obliged to give a flitch of bacon to any couple who could swear, a year and a day after their wedding, that they had never quarrelled, or wished themselves unmarried again. It is unknown who originated this tenure, but probably it was one of the Fitz-Walters, the first of whom died in 1198. The flitch was claimed and awarded in 1445, 1467, 1510, 1701, 1751, on Thursday, July 19, 1855, and in 1860. In 1855 the ceremony was performed at Great Dunmow Town Hall, as the lord of the manor refused to revive the custom. The happy candidates were Mr. and Mrs. Barlow, and the Chevalier de Chatelain and his lady. A similar custom prevailed in the manor of Wichnor, Stafford, where corn was given in addition to the flitch of bacon.

DUNSINANE (Battle).—The army of the usurper Macbeth was defeated at Dunsinane, in Perthshire, July 27, 1054, by Malcolm, the eldest son of the murdered Duncan, assisted by an English force under Siward, earl of Northumberland. Macbeth escaped to Lanphanan, where he was slain in 1066.

DUNSTABLE (Bedfordshire) was founded by Henry I., and granted to a priory of Black canons, A.D. 1131. The corpse of Queen Eleanor rested here on its way from Lincolnshire to London in 1290, in consequence of which a cross was erected, which was pulled down during the Commonwealth. Cranmer opened a court here to consider the validity of Henry the Eighth's marriage with Catherine, May 10, 1533, and pronounced a divorce between them, May 23. The free school was founded in 1727. A large quantity of Roman copper coins of the reigns of Antoninus and Constantine was discovered here in 1770.

DUPPELN (Battle).—The Prussians and

Hanoverians endeavoured to drive the Danes from their position at Duppeln, June 5, 1848. The latter were compelled to retire, but the engagement was renewed the following day, when the Danes re-occupied the position they had abandoned the day before.

DUPPELN-MOOR (Battle).—The English forces under Edward Baliol defeated the Scots under the earl of Mar, at this moor, in Perthshire, Aug. 11, 1332. The loss of the Scotch amounted to 13,000 men, while the English only lost two knights, thirty-three squires, with a few common soldiers.

DURANGO, or **GUADIANA** (Mexico).—This city was founded by Velasco in 1559, and erected into a bishop's see in 1620.

DURAZZO, **DYRRACHIUM**, or **EPIDAMNUS** (Albania).—This city, when founded by the Corcyraeans, B.C. 627, was called Epidamnus. It was seized by Glaucus, king of Illyria, B.C. 312. It was taken by the Normans, under Robert Guiscard, Feb. 8, 1082; and in 1216 withstood a siege by the Venetians, who effected its capture in 1386. The sultan, Bajazet II., took it in 1500, and annexed it to the Turkish empire, of which it still forms a part.

DÜREN (Prussia).—Several cohorts of the Ubii were defeated at this place, the ancient Marcodurum, by the Batavian chief Civilis, A.D. 70; and Charlemagne held diets here in 775 and 779, previous to his conflict with the Saxons. In 1543 it was besieged and taken by Charles V., and in 1642 was restored to Prussia by Duke Frederick William, who again surrendered it to the Imperialists the same year. The French seized it in 1794, and erected it into the capital of the department of Roër; but it was finally restored to Prussia in 1814.

DURHAM was founded by the monks of Lindisfarne, or Holy Island, A.D. 995. In 1040, Duncan, king of Scotland, made an ineffectual attempt to capture it; and in 1069 the inhabitants were so oppressed by Robert Comyn, earl of Northumberland and governor of the city, that they rose in rebellion and slew him, with 700 of his followers, Jan. 28. It was to revenge this atrocity that William I. devastated the northern counties in the latter part of the same year. The castle was founded in 1072, and a riot against the authority of Bishop Walcher terminated in his murder by the infuriated inhabitants, May 14, 1080. In 1323 the walls were restored by Bishop Beaumont, and in 1424 the city was the scene of the marriage of James I., of Scotland, with Lady Jane Seymour. The plague raged here with great fury in 1416, 1589, and 1597. In 1633 it was the residence of Charles I., and in 1640 was taken by the Scotch. It sent two members to the House of Commons in 1675. The infirmary was founded in 1791, and the county gaol and court-house erected in 1809. The palatine jurisdiction of the county was transferred from the see (*q. v.*) to the crown, by 6 Will. IV. c. 19 (June 21, 1836).

DURHAM (See of).—In 634, Aidan came from Scotland to Northumberland, at the solicitation of King Oswald, who established him as bishop in Lindisfarne, or Holy Island, in 635. In 664 the see was merged in the diocese of York, but in 678 was again separated. In 875 the see was removed to Chester-le-Street, and in 995 was transferred to Durham. The see was suppressed by 7 Edw. VI. c. 17 (1553). It provided that two sees were to be established at Durham and Newcastle, and all the temporalities were granted to the duke of Northumberland. The deanery and twelve prebends were established by charter, dated May 12, 1541, which was confirmed by 1 Mary, s. 3, c. 3 (1553).

DURHAM LETTER.—The pope having published a bull establishing a Roman Catholic hierarchy in England and Wales, Sept. 30, 1850, Lord John Russell, who was then premier, addressed a letter on the subject to the bishop of Durham. In this letter, which bore date Nov. 4, he not only expressed the strongest indignation at the attempted aggression, but condemned as "unworthy sons of the Church of England," all clergymen who approved of "the honour paid to saints, the claim of infallibility for the Church, the superstitious use of the sign of the cross, the muttering of the Liturgy so as to disguise the language in which it is written, the recommendation of auricular confession, and the administration of penance and absolution."

DURHAM OR NEVILLE'S CROSS (Battle).—Philippa, queen of Edward III., totally defeated the Scottish army under David II., and took the king prisoner, at Neville's Cross, near Durham, Oct. 17, 1346. The loss of the Scotch in this battle was estimated at 15,000.

DURHAM UNIVERSITY.—Oliver Cromwell signed a writ of privy seal for establishing a university at Durham, May 15, 1657, which was suppressed at the Restoration. The present institution was founded, with the consent of the bishop, by an act of chapter, Sept. 29, 1831, and parliament sanctioned the proposal by a private act (2 & 3 Will. IV. c. 19), which received the royal assent July 4, 1832. The university was opened Oct. 28, 1833, and its regulations were approved by convocation, March 4, 1836. It was incorporated by royal charter, June 1, 1837, and the first degrees were conferred June 8. Durham Castle was devoted to the accommodation of the students by an order in council, dated Aug. 8, 1837. Bishop Hatfield's Hall was opened in 1846, and enlarged in 1849, and bishop Cosin's Hall was opened in 1857. Durham University held the same position as the other universities in the Medical Act (21 & 22 Vict. c. 90 Aug. 2, 1858), and like them it elects a member of the General Council of Medical Education and Registration.

DÜRRENSTEIN (Battle).—A division of the French army under Marshal Mortier was attacked by the Russians under Doctoroff,

while marching through a defile near this town of Lower Austria, Nov. 11, 1805. The French, though surrounded on all sides, fought with determined valour, and were at length rescued by the division of Dupont, after losing 3,000 men and three standards.

DÜSSELDORF (Prussia).—Adolphus V., duke of Berg, raised this place from a village into a municipal town, A.D. 1288. The town-hall was built in 1567, and the bridge over the Rhine in 1690. Carlstadt, the handsomest part of the city, was founded by the elector, Charles Theodore, in 1786. In 1794, Düsseldorf was bombarded by the French, and, in 1802, the fortifications were destroyed by one of the articles of the treaty of Luneville. In 1806 the grand-duke of Berg fixed his residence here, and made it the seat of government, and in 1815 it was ceded to Prussia, together with the rest of the duchy. In 1829 it was made a free port. A famous picture-gallery, founded here in 1710, by the elector John William, was removed to Munich in 1805, but a native school of painting, established by Cornelius in 1828, still sustains the artistic reputation of the town.

DUTCH AMERICA.—The possessions of the Dutch in America, consisting of Surinam, or Dutch Guiana, the islands of Curaçoa, St. Eustatius, and St. Martin, are noticed under their respective designations.

DUTLINGEN (battle).—The Austrian army, under Generals Von Werth, Mercy, and Hatzfeld, defeated the French troops at this place in 1643. The vanquished lost many men in the action, and all their general officers were made prisoners.

DUUMVIRI, two patricians, first appointed in Rome by Tarquinius Superbus, to take charge of the Sibylline books and consult them in times of public difficulty, B.C. 520. They held their office for life, and were exempted from military service. The title was given to various authorities at Rome in cases where the functions of the office were vested in two persons.

DWARFS.—The custom of employing dwarfs to contribute to the amusement of the great is of high antiquity in the East, where the art of retarding human growth was successfully practised. This art passed into Greece B.C. 324, and from thence to Rome about A.D. 50. Domitian exhibited gladiatorial contests between dwarfs and beautiful women in 81, and the Roman ladies employed them as domestic servants. The passion for dwarfs reached its height in Europe during the reigns of Francis I. and Henry II. of France (1515—1559). The last prince who kept them for his amusement was Stanislaus, duke of Lorraine, whose favourite dwarf died in 1764. The following are some of the most famous dwarfs:—

Philetus of Cos, born B.C. 330, died B.C. 285. He was a poet and philosopher, and was so short or thin that he was jocularly said to carry lead in the soles of his shoes, lest he should be blown away.

Alypius, a philosopher of Alexandria, who flourished in the 5th century.

Jean d'Estrix, born in 1557, was scarcely a yard high at the age of 35.

Jeffrey Hudson, born in 1619, was 18 inches high at 7 years old, after which he did not grow till he was 30, when he attained the height of 3 feet 9 inches. In 1644 he attended Queen Henrietta Maria to France; and in 1682 was seized on suspicion of being implicated in the popish plot, and imprisoned in the Gatehouse, Westminster, where he died, aged 63.

John Coan, born in 1728, when 23 years old weighed 34 lb., including his clothes, and measured 38 inches when in his hat, wig, and shoes.

Hopkin Hopkin, born in 1736, was only 13 lb. in weight, and 2 feet 7 inches in height, at the age of 15 years, when he exhibited all the infirmities of advanced old age.

Borowlawski, a Polish gentleman, born in 1739, attained the height of 39 inches, and died, in England, Sept. 7, 1837. He was remarkable for the acuteness of his intellectual faculties, and had a sister so much shorter than himself, that she could stand under his arm.

Nicolas Ferry, or Bébé, was born in 1741, and lived at the court of Stanislaus, king of Poland, who was much attached to him. At the age of 15 he displayed symptoms of old age, and he was only 22 when he died, at which time he measured 33 inches.

Anne Theresa Souvray, born in 1746, was only 33 inches high at the age of 73 years, when she was remarkable for her gaiety and vigour.

General Tom Thumb was brought to England in 1846, where he appeared at the Lyceum Theatre, March 16.

DYEING.—This art, which originated in Asia with the Phœnicians, was practised by the Egyptians at a very early date, and appears to have been introduced into Canaan before B.C. 1728 (Gen. xxxvii. 3). The Tyrian purple was known as early as B.C. 1500, and in Exodus xxxv. 23 (B.C. 1491), mention is made of blue, purple, scarlet, and of red skins of rams. On the decline of the Roman empire, and the consequent decay of the arts in Europe, dyeing was neglected; but in the 8th century some advance was made. In 1353 scarlet and a few other colours were dyed in England, and in 1429 the first book on the subject appeared in Venice. Before 1643 English cloth was exported to Holland to be dyed, but in that year the whole process was performed in England. The art of dyeing cotton scarlet or crimson was discovered in 1779. Turkey red was introduced in 1785. The principal statute relating to the business of the dyer is 23 Geo. III. c. 15, passed in 1783, and entitled "The Act for Preventing Frauds and Abuses in the Dyeing Trade." A great number of new colouring materials have been discovered and rendered available for dyeing purposes since 1850.

DYERACHUM. (*See DURAZZO.*)

E.

EAGLE.—Xenophon states that the eagle was first used as a military ensign by the Persians. It was adopted as the sole standard of the Roman legions in the second year of the consulate of Marius, B.C. 104. Gibbon (ch. i.) remarks—"The golden

eagle, which glittered in the front of the legion, was the object of the fondest devotion of the Roman troops." Though the double-headed eagle is said to have been introduced by Constantine I. (A.D. 306—337), its origin may with greater justice be attributed to Charlemagne, who, A.D. 802, added the second head to the eagle, to denote that the empires of Rome and Germany were united under him. The Roman eagle was adopted by Napoleon I., and confirmed by Napoleon III., as the standard of imperial France: Austria, Russia, and Prussia use the double-headed eagle as their national ensign. Prescott states, on the authority of the Spanish annalists, that a golden eagle with outspread wings, in the fashion of a Roman signum, richly ornamented with emeralds and silver-work, was the great standard of the republic of Tlascala.

EAGLE.—A base coin of this denomination was current in Ireland about the year 1272, and was declared illegal by 27 Edw. I. stat. *De falsâ Monetâ* (1299). The American eagle of ten dollars, together with the half and quarter eagles, were first coined by order of an act of congress passed April 2, 1792. The value of the American eagle is £2. 1s. of English money.

EAGLE (Orders of the).—The order of the White Eagle of Russia was instituted by George Ossilinsky, great chancellor of Poland, and confirmed by Pope Urban VIII. in 1634. It was, however, soon suppressed, and its actual foundation only dates from 1713, when it was reconstituted by Augustus II., king of Poland. In 1831 this order was united with those of Russia. The order of the Black Eagle was founded by Frederick I., of Prussia, on his coronation day, Jan. 17, 1701. The Golden Eagle was instituted at Würtemberg in 1702, and reconstituted in 1807. The order of the Red Eagle, or of Sincerity, was founded in Prussia by George William, hereditary prince of Anspach and Bayreuth, in 1705; and reorganized July 13, 1734. In 1791 Frederick William II. erected this into the second Prussian order, and in 1810 it was again reconstituted.

EARL.—Selden believes that this title, which originally signified a man of birth, was synonymous with the Saxon *etheling*, and that it was applied to ealdormen about A.D. 1020. In the reign of Edward the Confessor the whole kingdom was divided among five earls. The first English earl created after the Conquest was William Fitz-Osbern, made earl of Hereford in 1066. Sir John de Courcy, made earl of Ulster in 1181, is the first Irish earl. Previous to the creation of dukes in 1335, earls were the highest nobility in England: they now rank third, after marquesses. Originally earls had the third part of the profits arising from the pleas of the country. Their privileges, however, were much diminished by 27 Hen. VIII. c. 24 (1535). The title of countess was first borne by the wives of earls in the 9th century.

EARL MARISCHAL OF SCOTLAND.—This offi-
301

cer, whose duty was to command the Scottish cavalry, was always chosen from the Keith family, the founder of which obtained it at the battle of Barry, fought A.D. 1010, against the Danes. At first, the title was great marischal; James II. made it earl marischal before July 4, 1451. In 1593 the holder of the title founded the college at Aberdeen, which is called after him the Marischal College. The office became extinct in 1716, owing to George Keith's participation in the rebellion of the earl of Mar.

EARL MARSHAL OF ENGLAND.—This, the eighth officer of state, is the only nobleman who bears the title of earl by virtue of his office. The title is of great antiquity. Roger de Montgomery, marshal of the Norman army at the Conquest, is said to have been the first marshal of England. The first on record was in 1135. King Stephen conferred the office upon Gilbert de Clare, afterwards earl of Pembroke, in 1139. Originally the holders of it were merely styled lord marshals. The title of earl marshal was conferred upon Thomas, earl of Nottingham, by special charter of Richard II. signed Jan. 12, 1386. The duties of the office were allowed to be discharged by deputy by a grant of Charles II., signed Oct. 19, 1672. (*See* CHIVALRY, Court of.)

EAR-RINGS are first mentioned in Gen. xxiv. 22 (B.C. 1857), when Jacob is said to have buried the idols of his household, with the "ear-rings which were in their ears." They were worn by the ladies of Greece and Rome, and by males in Lydia. The Parisian ladies adopted them in the 13th century, but their use was not general till the 15th and 16th centuries; when, Stubbes says, the ladies "are not ashamed to make holes in their ears, whereat they hang rings, and other jewels of gold and precious stones." English gentlemen also wore them in the reigns of Elizabeth and James I.

EARTHENWARE.—The art of the potter is probably one of the most ancient in existence. It was introduced into Greece from Egypt, B.C. 1490, and was encouraged at Rome by Numa Pompilius, about B.C. 700. The funereal earthenware of the Greeks was manufactured until about A.D. 350. During the dark ages that succeeded the decline of the Western empire, none but the coarsest of pottery was manufactured; but a better kind was introduced into Spain by the Moors A.D. 711, and was thence taken to Italy by the Pisans in 1115. In the 13th century the Italians made earthenware overlaid with an opaque coloured glaze, which was considerably improved after 1300. Earthenware was manufactured at Beauvais, in France, in the 12th century, and French Palissy ware was invented by Bernard Palissy about 1556. The Germans invented a glaze for earthenware in 1278, and exported stoneware in the 16th century. The earliest specimens of native British ware consist of earthenware tiles of the 13th century. Pitchers and jugs were soon afterwards

introduced. Wedgwood's most important discoveries were made from 1760 to 1762. A duty of 10*d.* per lb., levied on all imported earthenware, by the "Additional Book of Rates" attached to 11 Geo. I. c. 7 (1724), was repealed by 15 Geo. III. c. 37 (1775). A duty of 50 per cent. on the value of imported earthenware was levied by 49 Geo. III. c. 98 (June 10, 1809). All duties on imported earthenware were abolished by the Customs Amendment Act, 23 Vict. c. 22, s. 5 (May 15, 1860).

EARTHQUAKE.—No satisfactory account of the causes which produce this phenomenon has yet been given to the world. Humboldt remarks: "The phenomena of volcanoes, and those of earthquakes, have been considered of late as the effects of voltaic electricity, developed by a particular disposition of heterogeneous strata. It cannot be denied, that often, when violent shocks succeed each other within the space of a few hours, the electricity of the air sensibly increases at the instant the ground is most agitated; but to explain this phenomenon, it is unnecessary to recur to an hypothesis, which is in direct contradiction to everything hitherto observed respecting the structure of our planet, and the disposition of its strata."

B.C.

1491. An earthquake, accompanied by thunder and lightning, occurred on Mount Sinai, on the occasion of the delivery of the law. (Exod. xix. 18).
1450. One in Central Italy, which swallowed up a city, and produced Lake Ciminius in its place.
595. In China.
425. In Greece, especially in Eubœa, which is converted into an island by an inundation of the sea.
373. In the Peloponnesus. Helice is overwhelmed by the sea.
364. A chasm opens in the Roman forum, into which Quintus Curtius voluntarily leaps. It afterwards forms a lake.
285. A lake 72½ miles long by 12½ wide, formed in one night in the Japanese island Niphon.
- 282 (about). The city Lysimachia is destroyed.
224. The Colossus of Rhodes overthrown. Eusebius places this catastrophe B.C. 105.
33. In Palestine. 30,000 persons perished.

A.D.

17. Thirteen cities of Asia Minor are overthrown.
33. In Palestine and Bithynia, on the occasion of the Crucifixion, the city of Nicæa was destroyed.
79. In Misenum and its neighbourhood; followed next day by the destruction of Herculaneum and Pompeii.
115. Antioch destroyed; and a violent earthquake felt in China.
127. Severe shocks are felt in Nicopolis, Neocæsarea, Hierapolis, Laodicea, Nicomedia, and Syracuse.
262. An earthquake in Rome, Libya, and Asia Minor, is attended by an eclipse and terrible inundations of the sea.
358. Aug. 24. One in Asia Minor, Bithynia, and Macedonia, the effects of which are experienced by 150 cities.
359. Nov. or Dec. Nicomedia, in Bithynia, is destroyed.
365. July 21. An earthquake felt in the Roman world.
446. One is felt throughout the civilized world.

- A.D.
 494. Laodicea, Hierapolis, and Tripoli, are destroyed.
 526. Nov. 29. Antioch again reduced to ruins.
 543. Sept. 6. One is felt throughout the then known world.
 553 or 555. Aug. 15. An earthquake at Constantinople and many other places; shocks being felt even in Egypt. The city of Berytus is demolished.
 557. Oct. 6 and Dec. 14. At Constantinople, where thousands of the population perish.
 684. More than 5,000 acres of land in the Japanese island Sikokf are swallowed up by the sea.
 742. One of great violence in Egypt and Arabia. Its convulsions were observed at 600 places.
 778. At Trevisa, in Italy, where 48 persons lost their lives.
 794. One at Alexandria, which overthrows the Pharos.
 801. April. In France, Germany, and Italy.
 859. Upwards of 1,500 houses are overturned at Antioch. Laodicea and other towns of Syria also suffer considerable injury.
 893. An earthquake in India destroys 180,000 lives.
 986. Oct. One at Constantinople. It is also felt throughout Greece.
 1007. Deinar, in Irak, is overturned, and 10,000 persons are buried in the ruins.
 1029. Half of Damascus is destroyed.
 1040. Tabriz, in Persia, is reduced to ruins, and 50,000 of the inhabitants are destroyed.
 1048. May 1. One is felt at Worcester, Derby, and other parts of England.
 1089. Aug. 11. An earthquake is felt throughout England.
 1115. Dec. Antioch, Aleppo, Jerusalem, and other towns in Syria, are greatly injured.
 1139. Gansana, in Persia, is destroyed, and 100,000 persons are buried in its ruins.
 1142. Dec. One is felt at Lincoln.
 1158. Antioch, Tripoli, Damascus, Aleppo, and other Syrian towns, are reduced to ruins, and 20,000 lives lost.
 1169. Feb. 4. Catania, and other towns of Sicily and Calabria, are ruined, and 15,000 persons killed.
 1186. Sept. Throughout Europe, but especially in England, Calabria, and Sicily.
 1218. In Franche Comté a mountain opens, and engulfs 5,000 men.
 1227. In France, towards the mouth of the Rhone; 5,000 persons perish from the fall of rocks from the mountains.
 1268. Sixty thousand persons are killed by an earthquake in Cilicia.
 1274. Dec. 25. An earthquake is felt throughout England.
 1318. Nov. 14. In England. The most violent recorded in that country.
 1353. Jan. 1. One occurs at Borgo-San-Sepolero and Modena, where 2,000 people perish.
 1456. Dec. 5. Throughout Naples, where many towns are injured, and 60,000 lives lost.
 1491. Oct. In the Archipelago. 5,000 persons perish in Cos.
 1509. Sept. 14. At Constantinople 1,700 houses are overturned, and some thousands of lives lost.
 1531. Jan. 26. One in Spain, Portugal, &c. In Lisbon 1,500 houses and all the churches were thrown down, and many persons buried in the ruins.
 1580. April 6. In France, Belgium, and especially England. It was most violent at London and Dover. The bells at Westminster and other places were made to sound by the violence of the shock.
 1596. July 22. In Japan, where many cities were reduced to ruins.
 1624 or 1628. An island of more than a league and a half long is raised near St. Michael, in the Azores.

- A.D.
 1626. July 30. Thirty towns and villages are destroyed in the provinces of Capitanata and La Puglia. Naples also suffers; and 17,000 persons are killed.
 1638. March 27. One hundred and eighty towns and villages of Calabria and Sicily are reduced to ruins.
 1667. Schamaki is reduced to ruins, and 80,000 persons are buried.
 1690. Oct. 17. At Dublin and Kilkenny in Ireland.
 1692. June 7. Jamaica. At Port Royal, three-fourths of the houses are overwhelmed by the sea, and 3,000 of the inhabitants lose their lives.
 1693. In Sicily and Calabria, where 49 towns, many villages, and 972 churches or monasteries are reduced to ruins, and 93,000 lives lost.
 1703. Feb. 2. Aquileia is overthrown, and 5,000 lives lost. Jeddo, in Japan, is reduced to ruins, and 200,000 of the inhabitants are buried.
 1706. Nov. 3. In Abruzzo, where 15,000 persons perish.
 1716. May and June. A violent earthquake destroys 20,000 lives at Algiers.
 1726. Sept. 1. A terrible earthquake at Palermo. Four churches, ten palaces, and 1,600 houses, are overthrown, and from 3,000 to 6,000 lives lost.
 1727. Tabriz, in Persia, is ruined, and 77,000 persons are overwhelmed.
 1731. Nov. 30. In China. The first shock buries 100,000 persons in Pekin alone.
 1732. Nov. 29. Violent shocks in the kingdom of Naples. 1,940 persons are killed, and 1,455 wounded.
 1746. Oct. 28. In Peru, where Callao, Cavallos, and other towns, are overwhelmed by the sea.
 1750. Feb. 19. In London, and the country for seven miles round. Several earthquakes occur at London this year. June 7. Two thousand persons perish in the island of Cerigo.
 1752. July 29. A very violent one at Hadrianople and Constantinople, where mosques and houses sustain considerable injury.
 1754. Grand Cairo is destroyed, and 40,000 lives are lost.
 1755. April 28. Quito is overthrown. June 7. Kashan, in northern Persia, is reduced to ruins, and 40,000 persons killed. Nov. 1. The great earthquake of Lisbon, which was felt from Iceland on the north to Morocco on the south, and from Bohemia on the east to the West-India islands on the west. It took place at 9:40 a.m., and lasted several minutes, there being three principal shocks. In Lisbon 12,000 houses were overturned. The loss of life is variously estimated at from 20,000 to 50,000 persons. Faro, Setubal, and Cascaez, also sustained much injury. In Spain, the towns which suffered most were Seville, St. Lucar, Xeres, Coudil, and Cadiz. In Morocco, 10,000 people were swallowed up. Nov. 19. Mequinez, in Morocco, is completely ruined, and 25,000 Arabs are lost.
 1759. Oct. 30. In Syria, where 20,000 persons perish in the valley of Baalbec alone.
 1763. July 29. At Comorn, in Hungary, 1,500 houses are overturned.
 1767. Aug. One thousand six hundred persons perish at Martinico.
 1773. June 7. The city of St. Jago, in Guatemala, is buried. 5,000 or 8,000 families perish in the ruins.
 1778. July 3. A very violent earthquake nearly destroys Smyrna.
 1780. Feb. Tabriz, in Persia, sustains severe injuries.
 1783. Feb. 5. Awful devastation in Calabria and Sicily, attended with great loss of life.
 1784. July 23. The city of Arsingham, in the peninsula of Erzeroum, is overthrown, and upwards of 5,000 lives lost.

- A.D.
 1788. Aug. 12. At St. Lucia, in the West Indies, where 900 persons perish.
 1789. Sept. 30. In Tuscany. Houses, men, and cattle are engulfed at Borgo-San-Sepolcro.
 1793. April 1. In Japan, near the volcano Illigigama, which throws forth torrents of water, destroying 53,000 persons.
 1794. June 12. Throughout Campania, but especially in the neighbourhood of Vesuvius, which bursts forth into active eruption, and overwhelms the city of Terre del Greco, June 17.
 1796. Feb. 26. In Asia Minor, where 1,500 persons perish.
 1797. Feb. 4. Quito, in Peru, is overthrown, burying 40,000 persons in its ruins. Dec. 14. Cumana is destroyed.
 1800. Sept. 26. One occurs at Constantinople.
 1802. Oct. 23. A very widely-extended earthquake is felt at Cronstadt, St. Petersburg, Bucharest, Constantinople, &c. The shocks are most violent in the Danubian principalities.
 1804. Jan. At Rotterdam, Haarlem, and other Dutch towns.
 1805. Friday, July 26. A most destructive earthquake throughout Calabria, La Puglia, and the Terra-di-Lavoro. Six towns and villages destroyed and 20,000 persons killed.
 1808. April 2. Very violent shocks in Piedmont and the valley of the Rhone.
 1810. Aug. 11. The village of Las Casas, in the island of St. Michael, one of the Azores, disappears, and is supplied by a lake of boiling sulphurous water.
 1812. March 26. Caracas is totally destroyed by an earthquake.
 1817. April. Chang-Ruh, in China, is overthrown, and 2,800 persons buried in its ruins.
 1818. March. Philippolis, in Turkey, a city of 30,000 inhabitants, is said to be entirely engulfed in the earth.
 1819. June 16. Severe shocks are experienced in the north of Hindostan. Bhooj, the capital of Cutch, is reduced to ruins, with the loss of 2,000 of its inhabitants.
 1822. May 7. The town of Carthago, in Costa-Rica, Central America, quite overthrown. Aug. 10, 13, and Sept. 5. Aleppo is destroyed, and other towns injured, with the loss of 20,000 of their inhabitants. Nov. 19. The coast of Chili, for more than 100 miles, is permanently elevated by an earthquake.
 1825. March 2. Algiers and Blida (an adjacent town) are severely injured. 7,000 persons perish.
 1827. Sept. Fort Kolitaran, near Lahore, Hindostan, destroyed, with about 1,000 persons.
 Nov. 16. Very destructive shocks in Columbia, S. America.
 1828. March 30. In Peru. Scarcely a house in Lima and Callao escapes injury.
 1829. March 21. A very disastrous earthquake occurs in the province of Murcia, Spain, and is attended with fearful destruction of property and life.
 1830. May 26 and 27. The city of Canton sustains severe shocks, which destroy between 6,000 and 7,000 of its population.
 1835. Feb. 20. Concepcion, Santiago, and other towns of Chili, are reduced to ruins. Oct. 12. Castiglione, in Calabria, is utterly destroyed, and 100 of its inhabitants are buried.
 1837. Jan. 1. A terrible earthquake in Syria utterly ruins the town of Saphit, and destroys 3,500 of its inhabitants, besides overwhelming entire villages.
 1839. Jan. 11. Violent shocks are felt in the island of Martinique.
 1840. Feb. 14. A terribly destructive earthquake occurs in the island of Ternate. June 20 to July 28 (O.S.). The district of Mount Ararat, in Armenia, is devastated by violent earthquakes, attended with great destruction of houses and life.

- A.D.
 1840. Oct. 30. Violent shocks in Zante, where one village is completely overturned.
 1842. May 7. Hayti and Cape Haytien are severely injured by two violent shocks.
 1843. Feb. 8. Very violent shocks occur in the West Indies. In Antigua alone, property to the amount of £100,000 is destroyed. The loss of life is inconsiderable.
 1845. Feb. 8. Severe shocks in Java. April 7. The city of Mexico is much injured by some violent shocks.
 1846. March 14. The most violent earthquake ever recorded in Norway. At Nainstad five houses are overturned.
 1847. Oct. 23. The city of Atlixco, in Mexico, is completely ruined, with the destruction of many of its inhabitants.
 1851. Feb. 23. The islands of Rhodes and Macri are shaken. At the latter place, the Baba-Dagh mountain falls from a height of 2,050 feet, and the village of Ghedrack-Bugasi disappears, with all its inhabitants. April 2. Valparaiso and other towns in Chili experience severe shocks. Aug. 14. The towns of Meli and Barile, in South Italy, are totally destroyed, with 1,000 of their inhabitants.
 1853. July 15. The city of Cumana, in Venezuela, is destroyed, with 800 of its inhabitants. Aug. 18, and throughout the year. Numerous shocks occur in Greece, but more especially at Thebes, which suffers almost total destruction.
 1854. April 6. San Salvador, in Central America, overwhelmed, with a fourth of its inhabitants.
 1855. Feb. 28. Bronssa, the ancient capital of Asia Minor, is nearly destroyed. July 25 and 26. Some shocks are felt throughout Central Europe. Dec. 23. Jeddo is injured, and some towns in Nippon are destroyed by an earthquake.
 1856. March 17. Great Sanghir, one of the Moluccas, is visited by a severe earthquake, which destroys 2,806 of its inhabitants. Oct. 12. The Mediterranean, especially Candia, severely visited. In Candia alone, 4,000 houses and 1,600 people are destroyed.
 1857. Dec. 16. A very destructive earthquake in Calabria destroys many towns, and causes the death of 10,000 persons.
 1858. Feb. 21. Corinth is destroyed by an earthquake.
 1859. March 22. Quito is reduced to ruins.
 1861. April. The city of Mendoza, in South America, is destroyed, more than 2,000 houses being overthrown. The number of lives lost is estimated at 7,000, and the damage to property at 35,000,000 francs.

EAST ANGLES.—This Anglo-Saxon kingdom, which comprised Norfolk, Suffolk, and Cambridgeshire, was founded by Uffa about A.D. 527, and became extinct at the death of Edmund the Martyr in 870. In 628 its king Eorpwald I. was converted to Christianity, and in 630 it was erected into a bishopric under Felix. In 673 the see was divided into Dunwich and Elmham, which were reunited in 955, and in 1070 the see was removed to Thetford, whence it was transferred to Norwich in 1091.

EASTER, the festival in commemoration of the Resurrection, is so called from Eastre, or Eostre, a Saxon goddess, whose feast was anciently celebrated in the month of April. Some ascribe its institution to the Apostles, but the more general opinion is, that it was first observed by their immediate successors, about A.D. 68. The council of

Arles, in 314, decreed that the day of keeping this festival should be the Sunday after the fourteenth day of the March moon, and the council of Nice, in 325, confirmed this decision. But, owing to the intricate calculations this rule rendered necessary, disagreements in the time of celebration still continued, and the Roman method was not established in France till 525, and in Britain and Ireland till about 800. The alteration of the calendar by Gregory XIII. in 1582 permanently fixed the first Sunday after the full moon immediately following the 21st of March, as the day for observing this festival. Offerings, oblations, &c., were collected at Christmas, Easter, Whitsuntide, and other particular occasions, before the reign of Edward VI. By 2 & 3 Edw. VI. c. 13 (1548), it was enacted that such offerings should thenceforth be collected at Easter.

EASTER ISLAND, or DAVIS'S LAND (Pacific Ocean), was discovered by Davis in 1686. It was visited and named by Roggwein, who thought it was a new discovery, April 6, 1722, and visited by Captain Cook, March 11, 1774.

EASTERN EMPIRE.—Valentinian I. first divided the Roman empire in June 364 A.D., when Valens became emperor of the East. The final separation took place A.D. 395. Gibbon (ch. xxxii.) remarks, "The division of the Roman world between the sons of Theodosius marks the final establishment of the empire of the East, which, from the reign of Arcadius to the taking of Constantinople by the Turks, subsisted one thousand and fifty-eight years in a state of premature and perpetual decay."

A.D.

364. The Eastern empire commences, under Valens.

368. Theodosius I. defeats Maximus, the tyrant of the West, who is beheaded by the army.

394. Theodosius I. defeats the Gauls and Germans under Eugenius, who is slain.

395. It is definitively separated from the West, under the youth Arcadius, who governs under the guardianship of Rufus.

408. Persecution of the Pagans.

425. Schools of law are opened at Constantinople.

438. The Theodosian code is published.

474. Leo II., an infant, and Zeno, are joint-emperors. Leo almost immediately dies, as is supposed, by poison.

478. Theodoric, son of Triarius, invades the empire.

514. The Gothic general Vitalian lays siege to Constantinople.

529. The Justinian code is published.

532. The Nika insurrection at Constantinople.

541. Justinian I. abolishes the consulship.

545. The Turks enter Asia.

551. The Slavonians ravage Illyria, and penetrate almost as far as Constantinople.

553. The senate is abolished by Justinian I.

611. Chosroes II. of Persia conquers Syria.

617. Heraclius abjures Christianity, and embraces paganism, in order to conciliate Chosroes II.

626. The Avars besiege Constantinople, and the Persians reach the Bosphorus.

627. Heraclius finally defeats Chosroes II., and recovers all his lost territories.

632. The Saracens invade the empire.

644. Rebellion and death of Valentinian.

668-675. The Saracens besiege Constantinople.

A.D.

678. The Bulgarians obtain the country now called Bulgaria.

693. Loss of Armenia.

695-705. Exile of the tyrant Justinian II., during which the empire is ruled by Leontius and Tiberius Apsimar in succession.

711. The Bulgarians ravage the empire as far as Constantinople.

716. Constantinople is besieged by the Saracens.

717. The emperor Theodosius III. abdicates, and retires to a monastery. He is succeeded by Leo III., the Isaurian.

739. The Greek provinces of the empire are invaded in three parts by the Saracens, who are defeated by Acronius.

770. Constantine IV. abolishes monasteries throughout the Eastern empire.

792. Constantine VI., the last emperor of the Isaurian dynasty, is blinded, by order of his mother Irene.

811. July 6. Nicephorus I. is defeated, and slain by the Bulgarians.

820. Accession of Michael II., the founder of the Amorion dynasty.

825. Dalmatia is taken from the empire by the Servians.

827. Loss of Sicily and Crete.

850. Bogoris, king of the Bulgarians, becomes a vassal of the empire.

867. Accession of Basil I., founder of the Basilian or Macedonian dynasty.

890. Southern Italy becomes subject to the Eastern empire.

928. Five emperors reign simultaneously.

1014. July 29. Great victory over the Bulgarians at Zetunium.

1018. Bulgaria is made a province of the empire.

1035. The empire is visited by famine, and ravaged by invaders.

1040. Restoration of Sicily, and loss of Servia.

1057. Aug. 31. Michael VI. abdicates in favour of Isaac I. End of the Macedonian dynasty.

1123. Revolt of the Servians.

1144. Restoration of the senate.

1186. Revolt of the Bulgarians.

1195. Isaac II. is deposed and blinded by his brother, who ascends the throne as Alexius III.

1203. July 18. Siege and capture of Constantinople by the Crusaders, who restore Isaac, and make his son, Alexius IV., joint emperor with him.

1204. Jan. 28. Murder of Alexius IV., and accession of Alexius V., soon after which Isaac II. dies. The Crusaders again besiege Constantinople, put Alexius V. to death, and found the Latin empire of the East, of which Baldwin, count of Flanders, ascends the throne May 9.

1208. Epirus and Ætolia are erected into an independent state.

1261. July 25. Michael Palæologus restores the Greek empire to Constantinople.

1277. An invasion of Sicilians, Venetians, and French, is repelled.

1321. Civil war of the Andronici.

1328. May 24. Abdication of the elder Andronicus, who is succeeded by Andronicus III.

1353. The Turks enter Europe.

1367. The Mamelukes conquer Armenia.

1373. The treaty of Amurath, which limits the Eastern empire to Constantinople, Thessalonica, part of the Morea, and a few islands.

1390. The empire loses all its Greek possessions in Asia.

1396. Sept. 28. Battle of Nicopolis and massacre of 10,000 Christian prisoners by the Turks.

1400. Manuel II. surrenders part of Constantinople to Bajazet.

1448. On the death of John Palæologus II. the empire is claimed by his three brothers. Constantine XII. is elected.

1453. May 29. Capture of Constantinople by Mohammed II., and extinction of the Eastern empire.

EAST-INDIA COMPANY.—This celebrated association for the purpose of carrying on trade with the East Indies was formed in London A.D. 1599, and obtained its charter Dec. 31, 1600. In 1635 a rival company was established by Sir William Courten and chartered by Charles I., but the two associations united in 1649. In 1657, Cromwell renewed their charter, which was confirmed by Charles II. in 1661, and again in 1677. In 1694 the East-India trade was thrown open, but in 1698 a new company obtained a monopoly, in exchange for a loan to government

of £2,000,000. In 1702, however, the old and new companies amalgamated, and formed the "United Company of Merchants of England trading to the East Indies." In 1772 the company was compelled to apply for a loan, and in 1784 the Board of Control was erected by 24 Geo. III. c. 25, to regulate the civil and military government of the company's territories. By 53 Geo. III. c. 155, s. 7 (July 21, 1813), the importation of any goods but tea from any place except China was declared free to all British subjects, and the commercial character of the company was abolished by 3 & 4 Will. IV. c. 85 (Aug. 28, 1833). The number of directors was reduced from twenty-four to eighteen by 16 & 17 Vict. c. 95 (Aug. 20, 1853), and the government of India was finally transferred from the company to the crown, by 21 & 22 Vict. c. 106 (Aug. 2, 1858). The Dutch East-India Company was formed in 1595. Charles VI. founded an East-India Company at Ostend in 1719. It was dissolved in 1731. The Swedish East-India Company was formed in 1731; the French in 1740, and dissolved in 1770; and the Danish was formed in 1740. The Scotch East-India Company was established by an act of the Scottish parliament in 1695.

EAST INDIES. (*See INDIA.*)

EASTLAND COMPANY.—This association was incorporated A.D. 1579 to trade to all places within the Sound except Narva. When the trade to Norway and Sweden was thrown open, this company declined in importance.

EBIONITES.—A sect of Christian Jews founded at Pella, about A.D. 66, which attained importance in the 2nd century. They spread in the villages around Damascus, and had a church at Aleppo. Gibbon (ch. xv.) says: "The name of Nazarenes was deemed too honourable for these Christian Jews, and they soon received, from the supposed poverty of their understanding, as well as of their condition, the contemptuous epithet of Ebionites." They believed Christ to be a man, though endowed with divine power, and they maintained that the ceremonial law of Moses must be observed. The sect was still in existence in the 4th century.

EBRO. (*See TUDELA, Battle.*)

ECBATANA (Media).—This city is said to have been founded by Semiramis, though Herodotus mentions Dejeos as its founder. An account of the building of the city by Arphaxad is given in the book of Judith (i. 2-4). It was the summer residence of Cyrus and the succeeding kings of Persia. It is mentioned by Ezra under the name of Achmetha, and the modern Hamadan occupies its site.

ECCENTRICS.—This convivial club, an offshoot of the Brilliants, held its first meeting about May, 1800.

ECCLESIASTICAL COMMISSION.—William IV. issued a commission of inquiry into the state of the Church of England, Feb. 4, 1835, which published its first report March 17. A new commission was issued June 6, and by 6 & 7 Will. IV. c. 77 (Aug. 13, 1836) the

commissioners became a corporation, with perpetual succession and a common seal. The constitution of this corporation was materially amended by 3 & 4 Vict. c. 113 (Aug. 11, 1840), and 4 & 5 Vict. c. 39 (June 21, 1841).

ECCLESIASTICAL COURTS.—Previous to the Conquest, all offences were tried in civil courts; but in 1085 William I. published a charter of separation, which established ecclesiastical courts. By 24 Hen. VIII. c. 12, s. 2 (1532), all ecclesiastical jurisdiction was declared to be immediately from the crown. This act, repealed by 1 & 2 Mary, c. 8, s. 6 (1554), was revived by 1 Eliz. c. 1, s. 4 (1558). In July, 1830, a commission was appointed to inquire into their practice and jurisdiction, which recommended sundry important changes in 1832. The Probate and Divorce Court, established by 20 & 21 Vict. c. 77, s. 3 (Aug. 25, 1857), abolished all the authority of the Ecclesiastical Courts in matters relating to wills, &c.

ECCLESIASTICAL TITLES BILL.—In consequence of the papal bull of Sept. 30, 1850, by which an attempt was made to establish a Roman Catholic hierarchy in England, Lord John Russell, then prime minister, introduced a measure into parliament Feb. 7, 1851, which was read for the third time and passed July 4. By this act (14 & 15 Vict. c. 60, Aug. 1, 1851), the papal brief was declared null and void, and a fine of £100 was imposed on all such as should endeavour to carry it into effect.

ECIJA (Spain), the ancient Astigi, celebrated for an aqueduct completed by Abde-rahman III., A.D. 949. The Merines defeated the Castilians near this town in 1275.

ECKMÜHL (Battle).—At this place, in Bavaria, the Austrian army, under the archduke Charles, was defeated by the French, under Napoleon I. and Davoust, April 22, 1809.

ELECTICS, a sect of ancient philosophers, founded by Potamon of Alexandria, who is said by some authorities to have lived in the time of Augustus, and by others in the 2nd century. He persuaded his disciples not to join any of the existing schools of philosophy, but to select from each what seemed most conformable to true reason. Between A.D. 200 and 235 similar principles were taught in reference to Christianity by Ammonius Saccas, who founded the school of the New Platonists. Another sect of Electics arose in the 17th century.

ECLIPSE, signifies "failure," namely of light. The Brahmans appear to have been the first astronomers who attained the power of calculating solar and lunar eclipses. In their great astronomical work the "Suryá Siddhantá," it is stated that a total eclipse of the sun occurred Feb. 18, B.C. 3102, and modern calculations have proved the assertion true. Next in order the Chinese calculated eclipses, and based their entire chronology on their observations of these phenomena, which date from the year B.C. 2940. The Babylonian register of eclipses commenced

in the year B.C. 2226. Hales says, "In the age of Thales, at least, the elements of the calculation of eclipses were known in Greece; for Herodotus says that he foretold to the Ionians the year of the remarkable eclipse that put an end to the battle between the Medes and Lydians."

B.C.

603. May 17. A total eclipse is recorded by the Persian historians.

584. May 28. A total eclipse, which had been predicted by Thales, the Milesian, interrupts a battle between the Medes and Lydians.

479. March 14. The army of Xerxes is alarmed by a total solar eclipse.

424. An eclipse is observed at Athens.

309. Aug. 15. The total eclipse of Agathocles.

A.D.

59. A total eclipse takes place at the death of Agrippina.

346. June 6. An eclipse occurs soon after the siege of Nisibis.

447. Idatius mentions an eclipse.

592. March 19. An eclipse occurs during the march of Mauricius to Thrace.

840. May 5. A total eclipse occurs at the death of Louis I. of France.

1030. Aug. 31. A total eclipse takes place during the battle of Stiklastad.

1140. A total eclipse is visible in England.

1191. June 22. A very remarkable eclipse is visible in England.

1433. A total eclipse is visible in the British Isles.

1598. Another total eclipse is visible in the British islands.

1652. A total eclipse occurs, which is visible in the British islands.

1706. A total eclipse is visible in the south of Europe.

1715. May 3. A total eclipse takes place, during which the stars are visible at London in the daytime.

1724. A total eclipse of the sun is visible in England.

1733. May 2. A total eclipse is visible in the north of Europe. The red appearances round the moon, since known as Baily's beads, were first noticed on this occasion.

1806. June 16. A total eclipse is visible in North America.

1842. July 7. A total eclipse is visible in the south of Europe.

1850. Aug. 8. A total eclipse is observed by M. Kutzeyki in the Pacific Ocean.

1858. March 15. A great annular eclipse is visible in England. Sept. 7. A total eclipse is visible in South America, and observed by order of the Brazilian government.

1860. July 18. A total eclipse, visible in Spain, is observed by a party of English astronomers.

ECNOMUS (Sea-fight).—The Roman fleet, consisting of 330 ships, commanded by the consuls L. Manlius and M. Atilius Regulus, defeated the Carthaginian fleet, consisting of 350 ships, under the command of Hanno, off Ecnomus, near Agrigentum, in Sicily, B.C. 256. Some authorities contend that the Roman fleet had sailed from Ecnomus, and that the encounter took place at another part of the island, off Heracleia Minoa.

ECONOMISTS, a sect of philosophers, who first began to propagate their views in France about 1761, and endeavoured to establish a system of government and social life founded on a knowledge of human nature as it actually exists. Francis Quesnay, born in 1694, and M. de Gournay, in 1712, are the two great

founders of the school. The latter was made intendant of commerce in 1751, in which capacity he strove vigorously to release mercantile men from the numerous restrictions the legislature of the day imposed upon them. Quesnay's great work, *Physiocratie, ou, du Gouvernement le plus avantageux au genre humain*, appeared in 1768. The first assemblies of the Economists were held in Madame de Pompadour's drawing-room.

ECUADOR (South America).—This country was discovered by Pizarro A.D. 1526, and it remained under Spanish rule until the rebellion of 1812. Its independence was secured in 1821, when it formed part of the republic of Colombia. On the disruption of the Colombian republic in 1831, Quito, with its associated provinces, assumed the rank of an independent republican state, with the name of Ecuador or Equator. The navigation of the rivers of this republic was declared free from all dues for twenty years in 1853.

EDDAS, two ancient Scandinavian books, one of which is in verse and the other in prose. Some of the songs in the former probably existed as early as the 6th century, but the majority date from the 7th and 8th. In the 12th century they were written for the first time in Iceland by Sæmund Sigfusson, who died in 1133, and in 1643 the MS. was discovered by Bishop Brynjolf Sveinsson. —The prose Edda was written by Snorrio Sturleson, who died in 1241. It contains the mythological history of Scandinavia, and was discovered in Iceland in 1628. Editions of the Eddas were published at Stockholm in 1818.

EDDYSTONE LIGHTHOUSE.—The first lighthouse on the Eddystone, a narrow rock 14 miles from Plymouth, erected by Winstanley in 1696, was destroyed by a violent tempest, Nov. 27, 1703. Its reconstruction was ordered by 4 & 5 Anne, c. 20 (1705), and completed by Mr. Rudyard in 1708. The new building was destroyed by fire in 1755. In 1757 Smeaton began the present lighthouse, which he constructed on improved principles, and completed Oct. 9, 1759. In 1770 the upper portion, which was of wood, was burnt. It was reconstructed of stone in 1774, and the lighthouse has since remained uninjured.

EDESSA (Mesopotamia) is said to have been built by Nimrod, though Appian ascribes its foundation to Seleucus. It was taken by the emperor Trajan A.D. 102, and erected into a Roman colony in 216, when Abgarus, its last sovereign, was sent in chains to Rome. In 260 it was the scene of a battle between the emperor Valerian and Sapor, king of Persia, in which the latter was victorious. Julian confiscated the whole property of the church here, in consequence of the turbulence of the Arians, in 362, and in 489 its theological school was pulled down by the emperor Zeno. A destructive flood did considerable injury to the city in 525, in 611 it was taken by Chosroes II., king of Persia, and in 718 it was reduced to ruins by an

earthquake. Baldwin, count of Flanders, erected Edessa into a Christian principality in 1097, but in 1144 it was seized by the Mohammedans under Zenghis. From that time it gradually declined, but has lately become important for its commerce, under the modern name of Orfah.

EDGECORES (Battle).—During an insurrection, Edward the Fourth's troops were defeated at this place, near Banbury, July 26, 1469. The queen's father and brother, and the earl of Pembroke, were captured in this encounter, and put to death by the rebels.

EDGEHILL (Battle).—At this hill, near the village of Keinton, or Kineton, in Warwickshire, Charles I. and the royalist forces under Prince Rupert encountered the parliamentary troops of the earl of Essex, on Sunday, Oct. 23, 1642. It was the first great battle in the Civil War, and proved very disastrous to both armies, though the losses were so nearly equal that neither could claim a decisive victory. Among the slain was the earl of Lindsay, who had led the king's infantry. Clarendon estimates the total number of killed at 5,000 men.

EDICT OF NANTES.—This celebrated act of toleration, granted by Henry IV. of France to his Protestant subjects, April 13, 1598, confirmed all their former privileges, removed every obstacle to their deriving benefit from the universities and public schools, and allowed them to establish places of worship throughout his kingdom. It was confirmed by Louis XIII. in 1610, and revoked by Louis XIV. Oct. 22, 1685. This arbitrary act drove from France about half a million Protestants, many of whom settled in England, and introduced various arts and manufactures not previously practised in this country.

EDICTS.—The principal Roman laws so named are the Perpetual edict, prepared by Salvianus Julianus, and promulgated by the emperor Hadrian, A.D. 132, and the edict of Theodoric in 500.

EDINBURGH (Scotland), the capital of Scotland, was founded in the 7th century, and was described as a considerable village in the 8th. During the earlier period of its history it was the scene of numerous contests.

A.D.

626. A castle founded here by Edwin, king of Northumberland, is called Edwin's burgh; whence some derive the name of the city.

685. It is taken by the Picts.

690. St. Cuthbert's church is founded.

956. Restored to Indulphus, king of Scotland.

1093. The town is besieged by Donaldbae.

1128. Holyrood Abbey is founded by David I. In the charter for its foundation Edinburgh is first spoken of as a royal burgh.

1174. The castle is surrendered to the English to purchase the freedom of William the Lion.

1215. The first parliament is held here by Alexander II.

1230. Blackfriars monastery is founded.

1296. The castle is taken by the English, under Edward I.

1313. The castle is recovered by the earl of Moray.

1329. A charter grants Leith to Edinburgh.

A.D.

1336. The English take refuge in Edinburgh, after the battle of Borough Muir. They are made prisoners by the earl of Moray.
1359. St. Giles' cathedral church is built.
1401. Aug. Henry IV. invades Scotland, and burns Edinburgh.
1430. A monastery of Greyfriars is established by James I.
1437. Execution of the earl of Athol and two more, at Edinburgh, for the murder of James I.
1447. Trinity fair is appointed by James II.
1450. The city is first fortified by a wall.
1477. Charter of James III.
1482. James III., having been protected from his rebellious nobles by the inhabitants of Edinburgh, erects their city into the metropolis of Scotland.
1508. Oct. 6. James IV. grants the city a charter.
1515. A serious skirmish, known as "Clear the causeway," takes place between the partisans of the various nobles, 250 of whom are slain.
1519. The High School is first mentioned.
1544. An English army lands at Royston, takes Leith, and plunders Edinburgh.
1547. The English burn Leith.
1555. The streets are ordered to be lighted, owing to the frequent robberies. John Knox begins to preach at Edinburgh.
1560. July 6. A treaty between Elizabeth and the Scotch is concluded at Edinburgh.
1565. July 29. Marriage of Mary, Queen of Scots, and Lord Darnley, in Holyrood House.
1566. March 9. Murder of David Rizzio.
1567. Feb. 10. The house in which Darnley is residing is blown up by gunpowder, and the king killed. April 12. Trial and acquittal of the earl of Bothwell for the murder of the king. May 15. Marriage of Mary and the earl of Bothwell.
1568. Edinburgh is ravaged by the plague.
1571. The castle is besieged by the English.
1572. Nov. 24. Death of John Knox.
1574. The castle is repaired, and the halfmoon batteries are built.
1578. The first high school is built.
1581. Old College is founded by James VI.
1582. April 14. James VI. grants the college a charter of erection.
1584. Edinburgh is divided into four parishes.
1591. Canongate gaol built.
1596. Riots in consequence of James the Sixth's interference with the Edinburgh clergy.
1603. March 24. James VI. leaves Edinburgh, to ascend the English throne as James I.
1610. Coaches are introduced into Edinburgh.
1618. April 9. James revisits Edinburgh.
1624. Feb. 12. Death of George Heriot, who leaves his large fortune to found an hospital, the first stone of which is laid July 1, 1628, and which is opened April 11, 1659.
1633. June 15. Charles I. visits Edinburgh.
1637. July 23. Sunday. Riot in St. Giles's church, in consequence of the introduction of the Liturgy.
1638. The Solemn League and Covenant is signed in the Greyfriars' churchyard.
1639. March 21. The Covenanters take the castle, which is recaptured by the marquis of Hamilton, June 22.
1640. Completion of Parliament-house.
1641. Charles I. revisits Edinburgh, which is divided into six parishes.
1645. The plague rages with fearful violence.
1650. May 21. Execution of Montrose. Dec. 24. The castle surrenders to Oliver Cromwell.
1661. Jan. 8. The *Mercurius Caledonius*, the first Edinburgh newspaper, is published. May 27. Execution of the marquis of Argyre.
1677. In consequence of frequent fires, the town council orders all houses to be built of stone, and roofed with slate or tile.

A.D.

1681. Jan. 11. Riots among students of the university, in consequence of the magistrates having prohibited them from burning the pope's effigy. Oct. The Merchants' Company is incorporated by Charles I.
1685. June 30. Execution of the earl of Argyll.
1695. Bank of Scotland established at Edinburgh.
1700. Feb. 3. Sunday. Two hundred families are rendered houseless by a terrible fire in the Meal-market.
1718. May 7. The spire of the Greyfriars' church is destroyed by fire.
1727. The Royal Bank is founded.
1735. A theatre is erected by Allan Ramsay, in Carrubber's Close.
1736. Sept. 7. The Porteous riots (*q. v.*).
1738. Royal Infirmary founded.
1740. Food riots, which are suppressed by the military.
1745. Sept. 17. Tuesday. Prince Charles Edward takes Edinburgh, and establishes a court in Holyrood.
1752. The New Town is projected.
1753. Sept. 13. The Royal Exchange is founded.
1756. March 13. The old cross is removed.
1763. Oct. 21. The North bridge is founded.
1769. Aug. 3. Five people are killed by a fall of the North bridge. Theatre royal built.
1774. Register-house founded.
1776. Aug. 25. The Observatory on Calton Hill is founded. Penny post introduced by Peter Williamson.
1777. June 24. High school, Infirmary Street, founded.
1779. Feb. 2. Anti-popey riots.
1780. Royal Antiquarian Society founded.
1783. Royal Society of Edinburgh incorporated.
1785. Aug. 1. South bridge founded.
1786. The chamber of commerce is established.
1789. Nov. 16. The present university building is founded by Lord Napier.
1792. Dec. 11. First meeting of the Friends of the People.
1796. The New and Piershill barracks are built. The count of Artois and other French nobles are allowed to find shelter in Holyrood.
1799. Aug. 6. The French refugees leave Holyrood.
1801. Sept. 7. Smart shock of an earthquake felt.
1802. Oct. 10. The first number of the *Edinburgh Review* is published.
1805. April 10. Edinburgh New Police Act.
1807. Oct. 31. Nelson monument, on Calton Hill, is founded.
1812. Jan. 1. Serious riots, in consequence of which three of the culprits are executed, April 22.
1815. Sept. 19. Regent bridge and the new gaol are founded.
1818. March 3. Edinburgh and Glasgow Canal is commenced. April. Gas is introduced.
1821. April 28. The Melville column is founded.
1822. Aug. 14. George IV. arrives at Edinburgh. Aug. 27. The national monument is founded.
1824. June 24 and Nov. 15. Disastrous fires.
1825. July 28. The High School, Calton Hill, founded.
1826. Edinburgh and Dalkeith Railway, and Scottish Academy are instituted.
1827. Aug. 15. George the Fourth's bridge and the Western bridge are founded.
1829. Oct. 15. Infant school founded.
1830. March 27. The museum of the College of Surgeons is founded. Oct. 20. Charles X. of France, expelled from his kingdom by a revolution, resides in Holyrood House.
1831. The new waterworks are completed.
1832. Jan. 27. The cholera first visits Edinburgh.
1834. Sept. 8. The British Association meets at Edinburgh.
1836. National Security savings' bank established.
1839. March 15. Edinburgh and Leith Gas Company is established.
1840. Aug. 15. Kemp's monument to Sir Walter Scott is founded.

A.D.

1842. Feb. 18. The Edinburgh and Glasgow Railway is opened. Sept. 1. Arrival of the Queen and Prince Albert in Edinburgh. Sept. 3. Victoria Hall is founded by her Majesty. Sept. 5. The Queen holds a reception at Dalkeith Palace. Sept. 15. She leaves for England.
1843. May 28. Sunday. Owing to the "Act of Separation," the Free Church ministers officiate in new places of worship, which creates great excitement at Edinburgh.
1845. Jan. 19. Total destruction by fire of the old Greyfriars church. The Southern, Western, and Edinburgh and Leith cemeteries are formed.
1846. June 18. The North British Railway from Edinburgh to Berwick is opened. Aug. 15. The Scott monument is inaugurated.
1847. April 9. Caledonian Railway terminus founded.
1848. March 7. Alarming riots in the city. June 28. The new corn-market is founded.
1850. Aug. 29. The Queen revisits Edinburgh, and stays at Holyrood House. Aug. 30. The National Gallery is founded by Prince Albert. Nov. 6. The new or Free college is opened.
1852. The colossal equestrian statue of the duke of Wellington is erected.
1853. The National Association for the Vindication of Scottish Rights meets in the music-hall.
1857. Aug. 5. Great fire in the Lawn-market.
1859. Aug. 6. The prince of Wales resides in Holyrood Palace, while attending classes at the university.
1880. Aug. 7. Her Majesty reviews about 20,000 volunteers in the Queen's Park.

EDINBURGH, (See of), was created in 1633 by Charles I., who extended its diocese from the Forth to Berwick, and made St. Giles's Church its cathedral. Dr. William Forbes was consecrated the first bishop, Jan. 28, 1634. On the abolition of prelacy in Scotland, July 22, 1689, this see was of course suppressed; but it was re-erected as a post-revolution bishopric in 1720.

EDINBURGH (Treaties).—Peace was concluded at this city between England and Scotland in 1482, and a treaty was concluded between Elizabeth and the Scotch July 6, 1560. It provided that all the French troops should leave Scotland, and that Mary should no longer use the style and arms of sovereigns of England and Ireland. In 1561 Mary refused to ratify this treaty.

EDINBURGH UNIVERSITY.—In 1558, Robert Reid, bishop of Orkney, bequeathed 8,000 merks for the purpose of founding a university in the city of Edinburgh; but the money was detained by the abbot of Kinloss for twenty-four years before it could be applied to the proposed object. Efforts were, however, made by Mary, queen of Scots, April 23, 1561, and in 1563 part of the present site was purchased. In 1581 the magistrates applied for a charter, which was granted by James VI. in April, 1582, and in 1583 Robert Rollock was nominated first principal of the new university. The government of the institution was remodelled Sept. 5, 1704, and the new building was founded by Lord Napier Nov. 16, 1789.

EDOM, or IDUMÆA (Asia), is the name given to the country inhabited by the descendants of Esau, who was living there B.C. 1739 (Gen. xxxii. 3). The inhabitants refused to allow the Israelites to pass through

their territory on their retreat from Egypt, B.C. 1452 (Num. xx. 14–21). Saul made war upon them B.C. 1093 (1 Sam. xiv. 47), and David established garrisons in their land B.C. 1040 (2 Sam. viii. 14). Solomon built a navy at Ezion-geber B.C. 992 (1 Kings ix. 26), and Amaziah, king of Judah, gained a great victory, and took Selah, B.C. 825. The Edomites subsequently extended their borders as far north as Hebron, where they were defeated by Judas Maccabæus B.C. 163.

EDRISITES.—This independent dynasty, which founded the kingdom and city of Fez, lasted from A.D. 829 to 907. The founder was Edris, a posthumous child of a descendant of Ali.

EDUCATION.—Among the ancient Greeks and Romans, education was chiefly carried on in the schools of philosophy. The Britons left all learning to the Druids. The Saxon children were taught to repeat the psalms and other books by heart, reading being still uncommon in the time of Alfred. The English language was not spoken in the 12th century; but after the Norman period children learned their lessons in English, and afterwards translated them into French. Reading and writing became the chief branches of education in the 14th century. The following are some of the most important dates connected with the subject:—

A.D.

880. Alfred the Great invites learned foreigners to establish schools in his dominions.
1070. Westminster school is founded about this year.
1198. Sampson, abbot of St. Edmund's, founds a school at Bury St. Edmunds for forty poor boys.
1387. Winchester school is founded by William of Wykeham.
1441. Eton College is founded by Henry VI.
1552. Christ's Hospital, or the Blue-coat school, is founded.
1560. Westminster school is re-founded by Queen Elizabeth.
1567. Rugby school is founded.
1585. Harrow school is founded.
1690. The first mutual-improvement society is established in London, under the title of the Society for the Reformation of Manners.
1698. The Society for Promoting Christian Knowledge is founded.
1783. Sunday schools are established by Mr. Robert Raikes.
1785. The Society for the Support and Encouragement of Sunday Schools is founded.
1788. The first reform school is established by the Philanthropic Society.
1803. The Sunday-school Union is established.
1805. Joseph Lancaster founds the British and Foreign School Society.
1806. The first evening school is opened at Bristol.
1807. Mr. Whitbread proposes the establishment of parochial schools, on the monitorial system, to the House of Commons, by whom it is rejected.
1811. Andrew Bell founds the National School Society; and the Rev. Mr. Charles establishes the first adult school at Bala, in Wales.
1815. An infant school is established in Lanark.
1818. A committee of the House of Commons publishes its reports on the state of endowed schools in England.

A.D.

1820. Mr. Samuel Wilderspin undertakes the management of the Spitalfields infant school.
1823. The first mechanics' institution is established at London.
1825. The Society for the Diffusion of Useful Knowledge is founded.
1837. The first ragged school is opened at Westminster.
1839. The Council of Education is appointed.
1843. The Field-lane "ragged" school is opened.
1844. The Ragged-school Union is formed.
1857. June 18. The convocation of the Oxford University passes a statute authorizing middle-class examinations. June 22. An educational congress is held in London, under the presidency of the Prince Consort.
1858. June 21. Middle-class examinations commence at Oxford.
1859. July 6. Her Majesty appoints a Committee of Council on Education to superintend the application of any sums of money voted by parliament for the purpose of promoting public education.
1860. May 15. The committee present their report.
1861. July 29. Minute issued, to come into operation after March 31, 1862.

EDWARD THE FIRST, the eldest son of Henry III. and his queen Eleanor, was born at Westminster, June 18, 1239. He married Eleanor of Castile in 1254, by whom he had four sons and eight daughters. Edward I. was proclaimed king, Sunday, Nov. 20, 1272. He was then absent at the Crusades, and reached England Aug. 2, 1274, and was crowned, Sunday, Aug. 19. Eleanor died at Grantham, Nov. 28, 1291, and Sept. 10, 1299, Edward married Margaret, daughter of Philip III. and sister of Philip IV. of France, by whom he had two sons and one daughter. Edward I. died at Burgh, on the sands near Carlisle, July 7, 1307, and was buried in Westminster Abbey, Oct. 27. His second wife survived him, dying in 1317. Edward was surnamed Long-shanks, from the length of his legs. He is sometimes called Edward IV., the three Saxon kings of the name of Edward being reckoned.

EDWARD THE SECOND, the fourth son of Edward I. and Queen Eleanor, was born at Caernarvon, April 25, 1284, and ascended the English throne, Saturday, July 8, 1307. He married Isabella, daughter of Philip IV. of France, Jan. 28, 1308, and was crowned Feb. 25. His wife bore him two sons and two daughters, namely, Edward (*see* EDWARD III.); John, born Aug. 25, 1315, and created earl of Cornwall in 1323, died in October, 1334; Eleanor, born in 1318, married to Count Reynald II. of Gueldres, in 1332, died at Deventer, April 22, 1355; and Joan, born in the Tower, in 1321, married to David II. of Scotland in 1329, and died Sept. 7, 1362. Edward II. was deposed Jan. 20 or 21, 1327, and assassinated at Berkeley Castle, Sept. 21. Isabella died in 1357. Edward was surnamed Caernarvon.

EDWARD THE THIRD, the eldest son of Edward II. and Isabella of France, was born at Windsor, Nov. 13, 1312. The formal deposition of his father took place Jan. 20 or 21, 1327, and Edward III. was proclaimed

king Jan. 24, and crowned on Sunday, Feb. 1. He married Philippa of Hainault, Jan. 24, 1328, by whom he had five sons and five daughters. The most celebrated were, Edward, surnamed the Black Prince, born at Woodstock, June 15, 1330; he died June 8, 1376, and left by his wife, Joan of Kent, one son, afterwards Richard II. (*q. v.*); Lionel, born at Antwerp, Nov. 29, 1338, created duke of Clarence, and died in Italy, in 1368; and John of Gaunt, born at Ghent in 1340. He was created earl of Derby and duke of Lancaster, and died Feb. 3, 1399. Edward III. died at Shene, now Richmond, June 21, 1377, and was buried at Westminster. His queen, Philippa, died at Windsor, Aug. 15, 1369.

EDWARD THE FOURTH, second son of Richard, duke of York, and his wife Cicely, was born at Rouen, April 29, 1441. He acceded to the throne March 4, 1461, was crowned at Westminster, June 28 or 29, and though Henry VI. resumed authority from Oct. 9, 1470, to April 1471, Edward's reign is usually reckoned as if no interruption had occurred till his death, which took place at Westminster, April 9, 1483. Edward IV. married Elizabeth Woodville, widow of Sir Thomas Grey, May 1, 1464. She died June 8, 1492. They had three sons and seven daughters. Their eldest son became king (*see* EDWARD V.), and their daughter Elizabeth, born Feb. 11, 1466, united the houses of York and Lancaster, by her marriage with Henry VII. (*q. v.*).

EDWARD THE FIFTH, the fourth child and eldest son of Edward IV. and Elizabeth Woodville, was born at Westminster, Nov. 4, 1470. He was proclaimed king April 9, 1483, and is supposed to have been assassinated in the Tower by order of Richard III., who usurped the royal authority June 26, 1483. The last document of his reign is dated June 17, 1483.

EDWARD THE SIXTH, the son of Henry VIII. and Jane Seymour, being the only child of that marriage, was born at Hampton Court, Oct. 12, 1537. He succeeded to the throne Friday, Jan. 28, 1547, and died at Greenwich July 6, 1553. Edward VI. was buried at Westminster, Aug. 8, 1553.

Eggs.—By 17 & 18 Vict. c. 122 (Aug. 12, 1854), a duty of 8*d.* per cubic foot was charged on eggs imported from foreign countries, and of 4*d.* per cubic foot on those from British possessions. It was repealed by 23 Vict. c. 22, s. 9 (May 15, 1860).

EGLINTON TOURNAMENT.—A magnificent festivity, in imitation of the mediæval tournaments, was held by the earl of Eglington, afterwards earl of Eglington and Winton, at his castle in Ayrshire, Aug. 28, 29, and 30, 1839. The marquis of Londonderry officiated as "king of the tournament," and Lady Seymour as "queen of love and beauty." Many of the guests were in ancient costumes, and the expense of the entertainment is said to have amounted to £40,000. The emperor Napoleon III., then Prince Louis

Napoleon, was one of the mimic warriors on this occasion.

EGYPT (Africa).—This country, called in the hieroglyphic inscriptions *Chem*, in the Hebrew Scriptures *Mizraim*, and in the Arabic *Mesr*, was one of the earliest seats of civilization. Its history is involved in obscurity. Hales (iv. p. 400) remarks:—"The mysteries of Egyptian chronology are not inferior, perhaps, to those of the *Apocalypse*; both running into vast and unknown periods of time, the one before, the other since, the creation of the world." The following table has been compiled from the works of the best authorities :—

B.C.

- 2717. Menes, the first king of Egypt, and founder of the Thinite dynasty, begins to reign.
- 2280. Thebes founded.
- 2188. Memphis founded.
- 2126. Egypt is divided into Egypt proper, Lower Egypt, This, and Memphis.
- 2122. Hieroglyphics are invented by Athotes.
- 2120. Suphis, and his brother Sensuphis, build pyramids to the north of Memphis, which still exist.
- 2100. Osymandyas extends his conquests into Asia. The worship of Osiris, Isis, Phtha, and Ammon introduced.
- 2080. Memphis is taken by the Shepherd kings of Phenicia, who establish their dynasty.
- 1938. Lake Moeris is constructed.
- 1920. Arrival of Abraham, and expulsion of the Shepherd kings.
- 1891. Syphos introduces common letters.
- 1828. The Phenicians expelled from Lower Egypt.
- 1822. Memnon invents the Egyptian alphabet.
- 1821. Amenophis I. becomes king of all Egypt.
- 1728. Joseph is sold into Egypt.
- 1715. Joseph interprets Pharaoh's dreams, and prepares for the seven years' famine.
- 1706. Settlement of Jacob and his family in Goshen.
- 1702. End of the seven years' famine.
- 1635. Death of Joseph.
- 1618. Accession of Sesostris.
- 1615. The Ethiopians obtain a footing in Egypt.
- 1597. Persecution of the Israelites.
- 1491. The ten plagues are suffered by the Egyptians, and the exodus of the Israelites is accomplished.
- 1485. Reign of Egyptus, from whom the country is named Egypt instead of Mizraim.
- 1322. Commencement of the first Sothic cycle.
- 1308. Reign of Sethos, who builds the temple of Vulcan, at Memphis, and other stupendous works.
- 1214. Reign of Thooris, or Proteus, a wise king, whose politic conduct originates the Greek fable of his ability to assume any semblance he chose.
- 1183. Menelaus arrives in Egypt after the Trojan war, and receives Helen from Thooris.
- 1082. Reign of Cheops.
- 1004. Alliance between Shishak, king of Egypt, and Solomon.
- 972. Shishak invades Judea, and takes Jerusalem.
- 825. Accession of Peterbastes, founder of the Tanaitic dynasty.
- 786. Egypt establishes her supremacy over the Mediterranean.
- 781. Commencement of the Saite dynasty.
- 769. So, the Ethiopian, deposes Anysis, and mounts his throne.
- 722. Alliance with Hosea, king of Israel.
- 719. So abdicates, and returns to Ethiopia.
- 711. Invaded by Sennacherib, king of Assyria.
- 689. Egypt is divided between twelve kings.
- 660. Psammeticus I., one of the twelve kings, obtains the sovereignty of the whole of Egypt.

B.C.

- 630. Siege of Azotus, or Ashdod, by Psammeticus. It lasts twenty years, being the longest siege in history.
- 610. Pharaoh Necho attempts to connect the Mediterranean and Red Seas by a canal; but, after losing 120,000 men, he is compelled to relinquish the undertaking.
- 605. Pharaoh Necho is defeated by Nebuchadnezzar, king of Babylon.
- 600. Psammis, king of Egypt, invades Ethiopia.
- 581. Nebuchadnezzar deposes Pharaoh Hophra, or Apries.
- 572. Nebuchadnezzar ravages Egypt.
- 569. Nebuchadnezzar makes Amasis king, during whose reign Egypt contains 20,000 cities.
- 554. Solon visits Egypt.
- 536. Pythagoras visits Egypt.
- 535. Cyrus, king of Persia, renders Egypt tributary to his power.
- 525. Cambyses, king of Persia, invades Egypt, which he ravages, and abolishes the empire of the Pharaohs.
- 484. Xerxes suppresses an insurrection of the Egyptians.
- 460. Inarus rebels against the Persians.
- 418. Herodotus visits Egypt.
- 413. Amyrtæus restores Egypt to independence.
- 350. Egypt is again subjected to Persia by Ochus.
- 332. Egypt is conquered, and Alexandria founded, by Alexander the Great.
- 322. Ptolemy I. (Soter) restores the independence of Egypt, and transfers the seat of government to Alexandria.
- 320. Revolt of Phenicia, and immigration of about 100,000 Jews.
- 314. Phenicia is wrested from Egypt by Antigonus, king of Phrygia.
- 301. Battle of Ipsus, which secures the independence of Egypt, and final restoration of Phenicia.
- 273. An Egyptian embassy arrives at Rome.
- 272. Memphis is made the capital.
- 246. Ptolemy III. invades Syria, whence he returns with immense booty.
- 217. Battle of Raphia, which subjects Coele-Syria and Palestine to the Egyptian yoke.
- 203. A treaty of alliance is concluded with Rome. Judea is lost.
- 198. Syria regains its independence.
- 183. An insurrection is quelled by Polycrates.
- 171. Antiochus Epiphanes, of Syria, defeats Eulæus, regent of Egypt, and makes him prisoner.
- 164. The kingdom is divided between Ptolemy VI. and his brother Physcon.
- 146. Ptolemy falls in battle, and Physcon usurps the throne. He marries his brother's widow, and murders her son, the rightful heir.
- 131. Physcon (Ptolemy VII.) puts away his wife Cleopatra, and marries her daughter by his own brother.
- 129. Ptolemy VII. is compelled to flee to Cyprus. He murders his two sons, and is restored the same year.
- 128. A pestilence, caused by the putrefaction of immense swarms of locusts, carries off about 800,000 of the population.
- 107. Cleopatra compels Ptolemy VIII. to retire to Cyprus, and governs Egypt with her son Alexander.
- 88. Civil war between Ptolemy VIII. and Alexander I., the latter of whom is slain.
- 82. Capture and destruction of Thebes, which had revolted.
- 80. Abdication of Alexander III., and election of Ptolemy X., who renders his country tributary to the Romans.
- 58. The Egyptians expel Ptolemy X., and establish Berenice and Tryphæna.
- 55. Restoration of Ptolemy X.
- 51. Death of Ptolemy X., who leaves his kingdom to Ptolemy XI. and Cleopatra.
- 49. Ptolemy expels Cleopatra, and civil war ensues.

B.C.

48. Julius Cæsar, in assisting Cleopatra, besieges and burns Alexandria, the splendid library of which city is almost destroyed by fire.
 47. Ptolemy XI. is defeated by Cæsar, and drowned while crossing the Nile. The Egyptian throne is shared by Cleopatra and her younger brother, Ptolemy XII.
 44. Cleopatra poisons her brother.
 42. Mark Antony summons Cleopatra to trial for her brother's murder. They meet on the Cydnus; and he is so overcome by her beauty, that he follows her into Egypt.
 36. Antony confers Phœnicia, Cyrene, and Cyprus on Cleopatra.
 35. Antony confers all Asia, from the Mediterranean to the Indus, on Cleopatra.
 31. Sept. 2. The battle of Actium, and total defeat of Antony and Cleopatra, by Octavius Cæsar.
 30. Invasion and subjugation of Egypt by Octavius, and suicide of Antony and Cleopatra. Egypt becomes a Roman province.
 22. Invaded by 30,000 Ethiopian subjects of Queen Candace, who are repulsed by Petronius.
- A.D.
19. Germanius visits Egypt.
 115. Insurrection of the Egyptian Jews.
 122. It is visited by Hadrian.
 130. Rebellion of the Jews, and second visit of Hadrian.
 171. The Egyptians revolt against the Roman government.
 202. The emperor Severus visits Egypt.
 215. Caracalla visits Egypt, and massacres all the youth of Alexandria for having ridiculed him.
 265. Rebellion of Æmilianus, who is proclaimed emperor at Alexandria.
 269. Invaded by Zenobia, queen of Palmyra.
 272. Fermus renders Upper Egypt independent of Rome. Aurelian regains it the following year.
 278. Probus repels a dangerous invasion of the Blemmyes.
 288. Upper Egypt rebels under Achilleus.
 292. Diocletian besieges and takes Coptos and Busiris.
 297. Siege and capture of Alexandria by Diocletian, who thereby suppresses the rebellion of Achilleus. The Egyptian coinage ceases.
 365. An inundation and an earthquake destroy many of the inhabitants.
 379. Theodosius prohibits pagan worship, in consequence of which the Serapion, and other famous Egyptian temples, are destroyed.
 618. Conquered by Chosroes Purvis, king of Persia.
 640. Dec. 22, Friday. Amer, or Annon, reduces all Egypt under Saracen domination.
 750. The dynasty of the Abbasides is established.
 868. Egypt regains independence for a short period under the Tuloonides.
 969. It is conquered by the generals of El Moez, the Fatimite caliph of Mahadi.
 1168. It is invaded by Amalric, king of Jerusalem, who penetrates to Cairo, and is then compelled to retreat.
 1250. It is conquered by the Mamelukes, who establish their dynasty.
 1517. Overthrow of the Mamelukes by Sultan Selim, who adds Egypt to the Ottoman empire.
 1763. Ali Bey's rebellion.
 1798. Egypt is invaded by the French, under Napoleon Buonaparte.
 1799. July 25. Battle of Aboukir (*q.v.*).
 1801. Expulsion of the French by the English and Turks.
 1806. Mohammed Ali is made pasha.
 1807. March 27. The English are defeated in an attempt to occupy Rosetta. Sept. 23. They re-embark.
 1811. March 1. Massacre of the Mamelukes at Cairo, by Mohammed Ali.
 1814. The Turkish army in Egypt is remodelled.
 1816. Belzoni prosecutes his discoveries.

A.D.

1820. Alexandria is connected with the Nile by the Mahmoud Canal.
1829. The first Egyptian newspaper is published.
1831. Mohammed Ali, pasha of Egypt, revolts from Turkey, and invades Syria.
1834. The cholera visits Egypt.
1835. The plague ravages Egypt.
1839. Mohammed Ali revolts, and claims hereditary possession of Egypt and Syria.
1840. The Egyptians are defeated by the British at Beyrout.
1841. July 11. The dispute with Turkey is adjusted.
1856. Oct. 12. An earthquake is felt in Egypt.
1858. May 14. Achmed pasha, eldest son of Ibrahim pasha, and heir to his titles, is killed at the Kaffer-Said railway-station.

DYNASTY OF THE LAGIDÆ, OR PTOLEMIES.

B.C.

306. Ptolemy Soter I.
284. Ptolemy Philadelphus.
246. Ptolemy Euergetes I.
221. Ptolemy Philopator.
204. Ptolemy Epiphanes.
180. Ptolemy Philometer.
145. Ptolemy Euergetes II.
116. Cleopatra Cocce and Ptolemy Soter II.
106. Cleopatra Cocce and Ptolemy Alexander I.
87. Ptolemy Soter II.
81. Cleopatra Berenice.
80. Ptolemy Alexander II.
80. Ptolemy Neus Dionysius.
57. Cleopatra Tryphæna and Berenice.
51. Cleopatra.

EGYPTIAN ÆRA.—The year of the ancient Egyptians consisting of 365 days, brought back the commencement of the year to the same place in the seasons every 1461 years, which is termed the Sothic period. The first of these periods commenced B.C. 1322. To remedy the inconvenience of this calculation, the astronomers of Alexandria caused five days to be added every fourth year, B.C. 30; and the reform commenced five years after that date.

EHRENBREITSTEIN (Prussia).—This strong fortress and town, on the left bank of the Rhine, opposite Coblentz, is mentioned under another name as early as 1153. The works having been rebuilt on a more extensive scale, were, in 1160, on account of their breadth, named by Hermann Hillin, archbishop of Treves, "Ehrenbreitstein," or the "Broad Stone of Honour." The French, under Marshal Bouffiers, failed in an attempt to capture it in 1688. Jourdan invested Ehrenbreitstein for a short time in 1795, and returned June 9, 1796; but the French forces were compelled to withdraw Sept. 17. In April, 1797, the French again blockaded the fortress, which surrendered Jan. 24, 1799. The French, who restored it by the treaty of Luneville, Feb. 9, 1801, blew up the fortifications before they withdrew. Since the peace of 1814-15, the Prussian government have devoted large sums to the restoration of its defences.

EICHSTADT (Bavaria), the capital of a principality belonging to prince-bishops, was secularized, and conferred upon Austria in 1802. It was ceded to the elector of Bavaria by the peace of Presburg, Dec. 26, 1805, and was given to Prince Eugene Beau-

harnois, duke of Leuchtenberg, in 1817. Its cathedral was founded 1259.

EIDER, or **EYDER**.—This river was connected with the Baltic by the Kiel Canal in 1784. It is twenty-three miles long, and was commenced in 1777.

EIDOGRAPH.—This instrument for copying drawings was invented by Mr. Wallace in 1821.

EIKON BASILIKE; or, *The Portraiture of His Sacred Majesty King Charles I. in his Solitude and Suffering*.—The first edition of this work appeared in 1648, and such was its popularity that no fewer than fifty editions are said to have appeared in England and elsewhere before the end of 1649. The question of the authorship of this work has excited considerable controversy; some ascribing it to the king himself, while others attribute its production to Dr. Gauden, the king's chaplain.

EISENACH (Germany) was founded A.D. 1140, and till 1406 was the residence of the landgraves of Thuringia. In 1521 it afforded shelter to Luther on his return from the diet of Worms. A considerable portion of the town has been rebuilt during the present century, and it was the scene of a meeting between the members of the new liberal party in Germany, who recommended the adoption of a central government instead of the diet, and proposed the formation of a national assembly, Aug. 14, 1859.

EISLEBEN (Prussian Saxony).—Celebrated as the birthplace of Martin Luther, Nov. 10, 1483. He died here Feb. 13, 1546. The house in which he was born was destroyed by fire, June, 1659, and another erected on its site was opened as a free-school, Oct. 31, 1693.

EISTEDDFOD, the name given to the annual assemblies of the British bards. They were of very ancient origin, being held at least as early as the 6th century of our æra, although there is no description of one previous to 1176, when Rhys ap Gryffyd held a congress at Cardigan Castle. The last of these gatherings, convened by royal authority, was summoned by a commission of Queen Elizabeth, dated Oct. 20, 1567. They were revived towards the close of the 18th century, to encourage the study of the Welsh tongue, &c. An eisteddfod was held at Aberdare from Aug. 20 to 23, 1861.

EKATERINBURG (Asiatic Russia) was founded by Peter the Great A.D. 1723.

EKATERINOSLAV (Russia), the capital of a government of the same name, was founded by Catherine II. A.D. 1787. It is also called *Jekaterinoslav*.

EL ARISH (Egypt).—At this place, the ancient Rhinocorura, the French defeated the Turks, near Jaffa, Feb. 18, 1799. The fort capitulated Feb. 20, and was taken by the English Dec. 29, 1799. By the convention of El Arish, signed Jan. 24, 1800, between the French and the Turks, it was stipulated that the French army should be permitted to return to Europe with its own arms and baggage, and that the fortresses of

Egypt, excepting Aboukir, Alexandria, and Rosetta, should be given up within forty-five days.

ELBA (Mediterranean).—This island, on the coast of Tuscany, the Ilva of the Romans and the Æthalia of the Greeks, was ravaged by a Syracusan fleet B.C. 453. During the Middle Ages it was subject to various Italian powers, and, on the 10th of July, 1796, it was seized by the British, by whom it was evacuated Feb. 18, 1797, when part of it was ceded to France by Tuscany. The remainder was given up to France by the treaty of Florence, March 28, 1801. By a treaty between Napoleon I. and the allied powers, signed at Paris April 11, 1814, the island of Elba was conferred upon him, with an annual revenue of 2,000,000 francs, he being permitted to retain the title of emperor. Napoleon I. resided in the island from May 3, 1814, till Feb. 26, 1815, when he re-embarked for France, of which he recovered possession. Elba was afterwards retaken by the Tuscans, July 30, 1815.

ELBING (Prussia) was founded by the Teutonic knights about A.D. 1229. It was ceded to Poland in 1466, taken by Peter the Great in 1709, and united to Prussia in 1772. Frederick William III., king of Prussia, concluded a humiliating convention with Napoleon I. at Elbing in 1807.

ELCESEANS, or **ELCESAITES**.—The followers of Elxai or Elcesai, a Jew, who flourished in the reign of Trajan (A.D. 98—116). They engrafted many opinions derived from Oriental philosophy on a mixture of Judaism and Christianity. Epiphanius says it is doubtful whether the Elcesians should be classed among the Christian or Jewish sects.

ELCHINGEN (Battle).—Ney, at the head of a French army, defeated the Austrians at this village, in Bavaria, Oct. 14, 1805. For this victory Ney received the title of duke of Elchingen in 1808.

EL DORADO, or "the Golden Country," is the name given by Orellana, in 1531, to a country which he pretended to have discovered in the interior of South America, between the rivers Orinoco and Amazon. He asserted that gold and precious stones existed in this region in great abundance. In 1595 Sir Walter Raleigh fitted out an expedition for the purpose of taking possession of El Dorado for the English government. The term has been since applied to different regions in which gold is found.

ELEATICS, a sect of philosophers, founded at Elea, in Sicily, by Xenophanes of Colophon, about B.C. 538. Zeno, who flourished B.C. 464, Empedocles, B.C. 435, and Melissus, B.C. 428, were leading philosophers of this school. They opposed the idea of a plurality of gods, but mingled this truth with many puerile and absurd conceits, which obscured and weakened its efficacy.

ELECTOR PALATINE.—This title was first assumed by Rodolph I., count palatine of the Rhine, in 1294.

ELECTORS.—By 8 Hen. VI. c. 7 (1429), no

person was allowed to vote at the election of a member of parliament unless possessed of forty shillings yearly in land. Excise and custom-house officers were prohibited from voting by 22 Geo. III. c. 41 (1782). The mode of polling at elections is regulated by 9 Geo. IV. c. 59 (July 15, 1828). Several new regulations as to electors were introduced by the Reform Bill, 2 Will. IV. c. 45 (June 7, 1832); and the crown received power to increase the number of polling-places in counties and boroughs, on the petition of the justices of those counties and boroughs, by 6 & 7 Will. IV. c. 102 (Aug. 20, 1836).

ELECTORS OF GERMANY.—The German empire became elective after the death of Conrad I., A.D. 919, when the right of choosing his successor was exercised by the dukes of Saxony, Bavaria, Franconia, and Suabia. In 1257, there were seven electors; viz., the archbishops of Mayence, Trèves, and Cologne, with the count palatine of the Rhine, and the rulers of Brandenburg, Saxony, and Bohemia. These were recognized by the States in 1338, and confirmed by Charles IV. in the Golden Bull of 1356. The treaty of Westphalia added another elector in 1648 in the person of the palatine, Frederick V., whose vote had been recently conferred upon the duke of Bavaria; and in 1692 the emperor, Leopold I., conferred the title on the duke of Brunswick-Lüneburg, who thus became the ninth elector. In 1777 the electorate of Bavaria was re-united to the palatinate, which reduced the number to eight; but in 1803 the diet of Ratisbon increased the number to ten; viz., the arch-chancellor of Mayence, Bohemia, Bavaria, Salzburg, Saxony, Brandenburg, Brunswick, Württemberg, Baden, and Hesse. In 1804, Francis I. declared the empire hereditary, in consequence of which the dignity of elector became merely nominal. The title is now only borne by the princes of Hesse-Cassel.

ELECTRIC CLOCK.—Professor Wheatstone's electro-magnetic clock was exhibited and explained to the Royal Society Nov. 25, 1840, and Mr. Bain patented an electric clock Jan. 8, 1841, which he exhibited at the Polytechnic Institution March 28. Mr. Shepherd's electro-magnetic clock was one of the most remarkable objects of the Great Exhibition of 1851. An electric clock, which has since been removed, was set up in the Strand in 1852.

ELECTRICITY, is so called from the Greek word *electron*, amber, because the first electrical phenomenon of which we have any record, is the property that substance possesses of attracting light bodies when it is rubbed. This peculiarity was observed by Thales of Miletus, B.C. 600. No progress was made, however, in the science, until about 1600 A.D., when Dr. Gilbert, of Colchester, discovered that other substances also possess the same property. He is therefore regarded as the founder of the sciences connected with electricity. The first elec-

trical machine was made by Otto Guericke, of Magdeburg, who flourished between 1602 and 1686. The following are some of the most important dates connected with the subject:—

B.C.

600. Thales of Miletus observes that amber, when rubbed, possesses the property of attracting light bodies.

A.D.

415. Eustatius mentions that a certain philosopher emitted sparks while dressing and undressing.

1600. Dr. Gilbert, of Colchester, commences a series of experiments which prove that other bodies besides amber possess the property of attracting light bodies.

1675. Boyle publishes his "Experiments on the Origin of Electricity."

1705. Hawksbee notices the electric light produced by passing air through mercury in a vacuum.

1709. Hawksbee uses a glass electrical machine.

1730. Grey classifies all bodies as electric or non-electrics.

1733. Dufay discovers vitreous and resinous electricity.

1746. The Leyden phial is discovered. Three persons claim the merit of this discovery; viz., a monk named Kleist, Professor Muschenbroech, of Leyden, and a man named Cunen.

1747. July 14. Dr. Watson conveys a shock across the Thames.

1752. June. Dr. Franklin discovers the identity of lightning and the electric spark.

1753. Aug. 6. Professor Richman, of St. Petersburg, is killed in the prosecution of some experiments.

1767. Lane invents the discharging electrometer.

1773. Mr. Walsh and Dr. Ingenhouz prove the electric nature of the shock of the torpedo.

1776. Volta invents the electrophorus.

1785. Coulomb invents the torsion balance, and discovers static electricity.

1787. Cavendish demonstrates the formation of nitric acid, and decomposes atmospheric air, by means of electricity.

1790. Galvanism is discovered by Galvani.

1800. Volta discovers Voltaic electricity.

1807. Sir Humphry Davy decomposes the fixed alkalies by electricity.

1820. Oersted discovers electro-magnetism, and Bohnenberger invents the electroscope.

1822. Dr. Seebeck discovers thermo-electricity.

1834. Professor Wheatstone experiments on the velocity of electricity.

1837. Professor Jacobi, of St. Petersburg, discovers electro-metallurgy.

1839. The wreck of the *Royal George*, after being submerged for sixty years at Spithead, is blown up by electricity.

1840. Mr. Armstrong invents the hydro-electric machine.

1843. Jan. 26. Round Down cliff is destroyed by electro-blasting.

1847. Professor William Thompson publishes his theory of electrical images and reflections.

1851. Ruhmkorff constructs his electro-dynamic coil.

1858. Aug. 5. Telegraphic signals are exchanged between England and America.

ELECTRIC LIGHT.—As early as 1802 the Chevalier Bunsen conceived the idea of obtaining light by fixing cones of charcoal to the poles of the conductor of a battery, in an exhausted glass globe. In 1846 Messrs. Greener and Staite patented an electric lamp, which was improved by the last-named gentleman in 1847, and exhibited at Hanover

Square Rooms, and in Trafalgar Square, London, in 1848. A new system of electric illumination was employed the same year to light the theatre in the Palais Royal, Paris, and this was also exhibited in London with great success, Dec. 5 and 7. In 1850 Mr. Allman performed experiments at the Polytechnic Institution, with an instrument of his own invention, the light of which continued longer, and was more equable in quality than that of any former apparatus. Staiter's light was again exhibited at Manchester, May 9, 1851. In 1853 Dr. Watson explained a process of his own invention, by which brilliant light was supplied, and costly pigments were simultaneously prepared by the same instrument, and in 1858 the same gentleman lighted the works of new Westminster bridge by means of electricity. The electric light was employed in the lighthouse at the South Foreland in 1859. Mr. Gassiot invented an instrument in 1860, in which electricity discharged from the induction-coil through a spiral carbonic-acid vacuum-tube, is made to produce a brilliant white light.

ELECTRIC LOOM.—This instrument was invented by Bonelli, of Turin, in 1854. In 1855 it was exhibited at the Paris Exhibition, and in 1859 was much improved by M. Froment. Faraday lectured upon it at the Royal Institution, June 8, 1860.

ELECTRIC TELEGRAPH.—The success of Dr. Watson's experiments to prove the instantaneous transmission of electricity through great distances, made in 1747, originated the idea of employing this property for purposes of telegraphic communication. The first attempt to realize this scheme was made by Lesage in 1774, when a series of twenty-four wires was established at Geneva, which communicated with an apparatus for indicating particular letters when the machine was in operation. Modifications of this plan were attempted by Betancourt in 1787, by Reiser in 1794, and by Salva in 1796. Sömmering of Munich applied the voltaic battery to telegraphic purposes in 1811, and in 1816 Mr. Ronalds, of Hammersmith, invented an instrument in which pith balls were used to point out the letter intended. Oersted's discovery of electro-magnetism in 1819 was applied to telegraphic purposes by Ampère in 1820, his plan being to employ as many conducting wires and magnetic needles as there are letters; so that each letter being under a different needle, signals might be transmitted to a great distance. This proposition was lectured upon in England by Ritchie in 1830, and carried into effect by Baron Schilling at St. Petersburg in 1832. In 1833 Gauss and Weber attempted to introduce an apparatus in which a single bar gave all the signals, but its mechanism was too delicate, and its results too uncertain, to render it of practical utility. Cook and Wheatstone's first patent for an electric telegraph was sealed June 12, 1837, and Professor Morse's American instrument, which wrote the message it transmitted, was constructed the

same year. Cook and Wheatstone's electro-magnetic telegraph was patented Jan. 21, 1840, and their signal-needle telegraph, May 6, 1845. The magneto-electric telegraph was patented by Mr. Henley in 1848. (See SUBMARINE TELEGRAPHS.)

ELECTRO-PHYSIOLOGY.—Animal electricity was to some extent known to the ancients, as Aristotle (B.C. 384—322) and Pliny (A.D. 77) both mention the benumbing power of the torpedo, the electrical organs of which were engraved by Lorenzini in 1678, and the shock of which was proved to be electric by Mr. Walsh and Dr. Ingenhouz in 1773. Mr. Symmer performed several interesting experiments on human electricity in 1759, by means of silk and worsted stockings, and in 1786 important discoveries were made by Hemmer respecting the same subject. Galvani's discoveries in 1790 shed fresh light on the science, which has since been illustrated by the experiments of Humboldt and Gay-Lussac in 1805, of Mr. Todd in 1812 and 1816, and of Professor Faraday, who examined the electricity of the gymnotus in 1838. Several interesting discoveries have also been made by M. Matteucci, who performed some fine experiments at York in 1844, and in May 1855 the subject was brought before the members of the British Institution by some lectures of Dr. Du Bois-Reymond.

ELECTRO-TINT.—This application of the electrotype to the art of engraving was invented by Mr. Edward Palmer, who published an account of it in the *Philosophical Magazine* for June, 1840, and patented it June 12, 1841. The process was afterwards improved by him, and again patented, under the name of glyphotography, Jan. 15, 1842.

ELECTRO-TYPE.—The art of plating by electricity was invented almost simultaneously by Mr. Spencer, of Liverpool, and Professor Jacobi, of St. Petersburg, in 1837; made public by the latter, Oct. 5, 1838, and by the former, Sept. 12, 1839. Mr. Murray applied blacklead to non-metallic bodies as a conducting surface in January, 1840. The Messrs. Elkington, of Birmingham, took out their patent for gilding, &c., March 25, 1840; and in the following April the first specimen of printing from an electrotype appeared in a London periodical.

ELEPHANT (Order of the).—The date of the foundation of this celebrated Danish order is very uncertain; some authorities referring it to the period of the first crusade (1096), others to the reign of Canute VI. (1182—1202), and others to that of Christian I. (1448—1481). The Danish official documents ascribe its foundation to the earlier part of the 15th century, and state that it was merely renewed by Christian I. in 1458. As originally constituted, it was of a religious character; but it became secular on the alteration of its statutes by Christian V., Dec. 1, 1693. This order, as well as that of the Danebrog (*q. v.*), is under the presidency of a chapter of the royal orders, established at Copenhagen June 28, 1808.

The annual special festival of the order is celebrated on the 1st of January.

ELPHANTA ISLAND (Hindostan).—This island is remarkable for a huge unwieldy statue of an elephant, cut out of the solid rock, and for a great temple. The date of both curiosities is unknown; though, from their rapid decay since they were first examined, it is thought they cannot be of very high antiquity. In 1814 the neck and head of the elephant dropped off; and in 1824 only two-thirds of the columns of the temple remained in anything like a perfect condition. A visitor to the island in 1836 states that the whole of the elephant, excepting three legs and a fragment of the fourth, had been at that time destroyed.

ELEPHANTINE (Egypt).—A small island in the Nile, opposite Syene, bears this name. It was the last fortified place in the dominions of Psammetichus, and the Romans held it for some time. Diocletian built a temple of Concord here A.D. 297: it was destroyed by Justinian I. in 531.

ELEPHANTINE KINGDOM (Egypt).—This small kingdom, situated on an island in the Nile, flourished at a period prior to the age of authentic history, and declined about B.C. 1450, when its importance was eclipsed by the rising grandeur of Thebes.

ELPHANTS.—The Hindoos employed these animals for military purposes from the most remote periods, but they were not introduced into the regions west of the Indus until about the year B.C. 331, when they were used by Darius against Alexander, at the battle of Arbela. At the battle of Hydaspes, B.C. 327, Porus brought about 100 elephants into the field, 80 of which fell alive into the hands of the victorious Alexander. They were introduced into Italy by Pyrrhus, who used twenty at the battle of Heracleia, B.C. 280; and they were soon adopted as an important branch of military power by the Carthaginians, who surrendered 104 to the Romans at the battle of Panormus, B.C. 250. In consequence of this capture, the Romans also began to use elephants, which they employed with great effect against the barbarous Arverni and Allobroges, B.C. 121. Towards the close of the Roman republic, the use of elephants in war was abandoned to the Orientals, to whom it has ever since been restricted.

ELEUSINIAN MYSTERIES were festivals held annually, in September, at Eleusis, a town of Attica, in honour of the goddess Demeter, or Ceres. According to some authorities, they were instituted by Cadmus, B.C. 1550; others refer their origin to Erichthonius, B.C. 1494; but the usual opinion is that they were commenced by Eumolpus, the first hierophant, B.C. 1356. Great secrecy was observed in the celebration of the festivals, and it was a capital offence to reveal any of the rites. They existed about eighteen centuries, and ceased during the invasion of Alaric, A.D. 396. They consisted of the greater and lesser mysteries. Hales says they were brought from Egypt to

Attica, about B.C. 1399, by Erechtheus, and that they were ultimately borrowed from the Jewish feast of Tabernacles.

ELGIN MARBLES.—This splendid collection of antique statuary is chiefly composed of fragments of the Parthenon at Athens, which was built by Pericles about B.C. 448. In 1799 Lord Elgin conceived the idea of forming such a collection, and in 1800 he proceeded to Athens, in company with several artists, who were permitted by the Porte to make drawings of the Acropolis. In 1801, however, owing to the success of British arms in Egypt, the Turkish government granted him permission to "view, draw, and model the ancient temples of the idols, and the sculptures upon them; and make excavations, and take away any stones that might appear interesting to him." In this manner he obtained the series of marbles which now bears his name. Mr. Perceval offered to buy them for the nation in 1811, but the sum offered (£30,000) was deemed insufficient, and the proposal was rejected. In 1812 more remains were obtained, and in 1815 Lord Elgin petitioned the House of Commons to secure the collection for the national benefit. A select committee was appointed, and an act was passed, 56 Geo. III. c. 99 (July 1, 1816), by which the marbles were purchased for £35,000, and deposited in the British Museum.

ELIS (Greece) appears to have been originally peopled by Pelasgians, and to have been taken by a party of Ætolians under Oxylyus, B.C. 1104. In the 8th century B.C. its inhabitants had extended their conquests as far as the river Neda, and had wrested from the Pisatans the presidency of the festival of Zeus, at Olympia. This presidency was, however, restored to Pisa by Pheidon, tyrant of Argos, B.C. 747; and Pantaleon, king of Pisa, celebrated the games to the exclusion of the Eleians, B.C. 644. The Eleians invaded Pisa B.C. 588, and were in their turn invaded by the Pisatans, B.C. 572; in consequence of which, the Eleians razed their city to the ground. A quarrel broke out between Sparta and Elis B.C. 421, which led to the exclusion of the Spartans from the Olympic festival, B.C. 420. The Eleians with their allies were defeated by the Spartans at the battle of Mantinea, B.C. 418; and were invaded by Agis B.C. 402, and compelled to purchase peace by the surrender of several important towns B.C. 400. They attempted to recover some portion of the ceded territory B.C. 371, but were prevented by the Arcadians, against whom they declared war B.C. 366, and by whom they were defeated B.C. 365 and 364. In consequence, however, of the Arcadians having pillaged the temple of Olympia, so strong a feeling was excited against them, that they were compelled to restore several of their conquests and conclude peace, B.C. 362. Telesphorus, a general of Antigonus, seized the town of Elis B.C. 312, and attempted to erect it into an independent principality, but it was soon afterwards re-

covered by Ptolemæus. After the capture of Corinth by Mummius, B.C. 146, Elis, with the rest of the Peloponnesus, passed under the dominion of Rome. Theodosius abolished the Olympic games A.D. 394, thereby destroying the last remnant of the ancient glory of the country, which was soon afterwards ravaged by Alaric, in 396. It lay to the west of Arcadia, and was called the "Holy Land" of Greece.

ELIZABETGRAD (Russia) was founded by the empress Elizabeth A.D. 1754.

ELIZABETH.—The only surviving child of Henry VIII. and Anne Boleyn, was born at Greenwich, Sept. 7, 1533. She ascended the English throne, Nov. 17, 1558; was crowned at Westminster, Jan. 13, 1559; was never married, and died at Richmond, March 24, 1603. Elizabeth was buried at Westminster, April 23, 1603.

ELIZABETH, St. (Orders of).—One for females was instituted in Bavaria, A.D. 1766. The Royal order of St. Elizabeth of Brazil, for females, was founded in 1804.

ELIZABETPOL, or KANDSAG (Asiatic Russia), was taken by the Seljukian Turks A.D. 1088, and by the Mongols in 1235. General Paskevitch defeated a Persian force here, Aug. 8, 1826, and afterwards occupied the town.

ELLANDUNE (Battle).—Egbert, king of Wessex, defeated Beornwulf, king of Mercia, with great slaughter, at Ellandune, or Ealla's hill, A.D. 823.

ELLISON GALLERY.—The late Mr. Richard Ellison, of Sudbrook Holme, Lincolnshire, having desired that some portion of his collection of water-colour pictures should be given to the nation, his widow presented fifty works by leading artists to Kensington Museum, in April, 1860, "until a separate and permanent building shall be erected for the purpose of holding a national collection of water-colour paintings."

ELOPEMENT.—By the statute of Westminster 2, 13 Edw. I. c. 34 (1235), any wife voluntarily leaving her husband, forfeited for ever all right to dower, unless her husband willingly, and without coercion, restored her to his favour.

ELPHIN (Ireland).—This see was erected about A.D. 450, by St. Patrick, who appointed a monk named Asicus the first bishop; but there is no regular succession of prelates till 1262. The Church Temporalities Act (3 & 4 Will. IV. c. 37 Aug. 14, 1833) directed the annexation of this see to that of Kilmore, which was accomplished in 1841.

ELSINORE (Denmark).—This place obtained the privileges of a city A.D. 1425, and was mentioned in a treaty with England, as entitled to levy the tax known as the Sound dues, in 1450. In 1522 it was taken by the inhabitants of Lubeck, from whom it was recovered by Christian II. in 1535. In 1576 its population was increased by an immigration of Dutch colonists, and about 1580 the celebrated Castle of Cronenberg was erected. This fortress was taken by the Swedes under Wrangel in 1658, but almost

immediately evacuated. A treaty was concluded here between Sweden and the States-general, Dec. 9, 1659. In 1801 the British fleet under Sir Hyde Parker and Nelson forced the passage of the Sound previous to the bombardment of Copenhagen, and in 1807 Admiral Gambier passed the Great Belt. Elsinore is celebrated as the scene of the tragedy of "Hamlet."

ELSTER (Battle).—Henry IV. was defeated near the Elster, or Elbe, during his struggle against Rodolph of Suabia, Oct. 13, 1080. Henry was defeated, and his rival, Rodolph, was slain in the battle.

ELY (Cambridge).—Etheldreda, daughter of Ecgric Anna, king of the East Angles, founded a monastery on this island about A.D. 673, which was remodelled by Ethelwold, bishop of Winchester, in 970. It subsequently became so rich and important, that in the year 1108 a charter was obtained from Henry I. for its erection into a separate diocese, which was effected in 1109. Hervens was consecrated its first bishop, July 27, 1109. In 1837 and 1839 parts of the diocese of Lincoln were transferred to Ely.

EMANCIPATION.—Slavery was abolished throughout the British colonies by 3 & 4 Will. IV. c. 73 (Aug. 28, 1833).

EMANUEL COLLEGE (Cambridge).—This college was founded A.D. 1584 by Sir Walter Mildmay, chancellor of the exchequer and privy councillor to Queen Elizabeth.

EMBALMING.—This custom originated among the Ethiopians, from whom the Egyptians received it at a very early period. It is usually very difficult to ascertain the precise age of mummies, but there is little doubt that many of those in our museums have been preserved at least 3,000 years. Mr. Pettigrew mentions one of that age which he opened, and found uninjured by the lapse of time; but when he soaked out the preservative drugs, the work of putrefaction immediately commenced. We learn from Scripture that Joseph caused the body of his father Jacob to be embalmed (Gen. l. 2, 3), B.C. 1689, and also that forty days were taken up in the operation. Herodotus, who flourished B.C. 484, and Diodorus Siculus, B.C. 60, have left descriptions of the manner in which this process was performed by the Egyptians. It was much used by the early Christians. St. Augustine says it was still practised at the beginning of the 5th century A.D.

EMBARGO is the prohibition of ships from sailing, and the right to impose it may be lawfully exercised by the crown in time of war. But an embargo laid upon corn in 1766 being opposed to certain statutes, a special act (7 Geo. III. c. 7, 1766) was passed to indemnify such as had endeavoured to enforce it. An embargo was imposed on all Russian, Swedish, and Danish vessels in British ports, Jan. 14, 1801.

EMDEN, or EMDEN (Hanover), the chief commercial town of Hanover, was formed after the inundation of the Ems, A.D. 1277. An African trading company existed here in 1682.

It was made a free port in 1751. The French took it in July, 1757, and evacuated it March 19, 1758, at the approach of an English squadron. The French again obtained possession in 1761, but were speedily expelled. A bank was established here Feb. 1, 1769. Embden came into the possession of Holland in 1808, and was incorporated with Hanover in 1815.

EMBER WEEKS.—Pope Calixtus I. (A.D. 218–223) appointed certain fast-days for imploring the Divine blessing on the fruits of the earth and on the ordinations of priests, which were celebrated at these times. From the custom of strewing ashes or embers upon the head on these occasions, the days were called ember days, and the weeks in which they fell, ember weeks. They occur four times a year, being the Wednesday, Friday, and Saturday after the first Sunday in Lent, after Whitsunday, after Sept. 14 (the Feast of Holy Cross), and after Dec. 13 (the Feast of St. Lucia).

EMBROIDERY.—This art is of very ancient origin, and is supposed to have been invented by the Phrygians. It was practised with great success by the women of Sidon, and was employed by Moses in the decoration of the tabernacle, B.C. 1490 (Exod. xxv. 35, and xxxviii. 23). A machine was invented by M. Heilmann, and exhibited in Paris in 1834, by the aid of which a lady could embroider any design as correctly and quickly with one hundred and forty needles as formerly with one. The company of the Embroiderers was incorporated in 1562.

EMERALD.—This gem is mentioned as one of those forming the breastplate of Aaron, B.C. 1491 (Exod. xxviii. 18); but it is uncertain whether the Hebrew word is correctly translated. The earliest emeralds known were brought from the mountains between Ethiopia and Egypt, where extensive mines were worked by the Ptolemies (B.C. 306 to B.C. 30). This gem became very rare during the Middle Ages. Only one specimen, which adorned the tiara of Pope Julius II.

(1503—1513), was known to have existed previous to the discovery of the Peruvian mines by Pizarro in 1545. The finest emerald in existence was exhibited at the Great Exhibition of 1851, and weighs 8 oz. 18 dwt.

EMESA, or EMISSA (Syria), is remarkable for a magnificent temple of the sun. Its young priest, Bassianus, was raised to the imperial dignity A.D. 218, under the name of Elagabalus, corrupted into Heliogabalus. He was assassinated by the Prætorian guards March 10, 222. His mutilated body was dragged through the streets of Rome, and thrown into the Tiber. Aurelian defeated Zenobia, queen of Palmyra, near Emesa, A.D. 272. The Arabs took Emesa A.D. 635. Its modern name is Hems.

EMIGRANTS.—During the Revolution, French refugees (*émigrés*) began to leave France in July, 1789, and soon reached the number of 35,000 persons. Napoleon I. published an amnesty in their favour April 26, 1802, at which time there were no fewer than 50,000, the greater part of whom returned to France. On the restoration of the Bourbons, in 1814, many more returned, and a law was passed by the French chambers, April 27, 1825, to indemnify them for the injury their affairs had sustained during their exile.

EMIGRATION was placed under the regulation of a government commission in 1831. It was one of the modes of relief proposed by the Poor Law Amendment Act, 4 & 5 Will. IV. c. 76, s. 62 (Aug. 14, 1834), and in January, 1840, was placed under the supervision of commissioners, appointed under the royal sign manual, as the Land and Emigration Board. The conveyance of emigrants from the United Kingdom was at first regulated by 5 & 6 Will. IV. c. 53 (Aug. 31, 1835), which was amended by the Passengers Act, 5 & 6 Vict. c. 107 (Aug. 12, 1842). The recent extensive emigration from Ireland commenced in 1846. The following table is extracted from the twentieth report of the Emigration Commissioners (1860).

*Emigration from the United Kingdom during the Forty-five Years
from 1815 to 1859 inclusive.*

Year.	N. American Colonies.	United States.	Australia and New Zealand.	Other Places.	Total.
1815	680	1,209	..	192	2,081
1816	3,370	9,022	..	118	12,510
1817	9,797	10,280	..	557	20,634
1818	15,136	12,429	..	222	27,787

Average annual emigration from the United Kingdom..... } From 1815 to 1859 109,279 For the ten years ending 1859..... 243,958					

EMINENCE.—Pope Urban VIII. granted this title to cardinals, Jan. 10, 1631. Previously they were called *illustrissimi*. This title was also granted to ecclesiastical electors and to the Grand Master of Malta.

EMIR, the title borne by the descendants of Mohammed, who are also allowed to wear green turbans. It was instituted by Fatima, daughter of the Prophet, A.D. 650.

EMLY (Ireland).—This is one of the most ancient bishoprics in Ireland, having been founded by St. Ailbe, about A.D. 448. In old annals it is referred to as "Imleach Inbhair." Originally it was the metropolitan see of Munster; but in the year 1152 Pope Eugenius III. rendered it subordinate to Cashel, with which see it was incorporated in 1568.

EMPALEMENT.—This is still used as a capital punishment by the Turks. It was formerly practised in this country on the bodies of those who committed suicide, but was abolished by 4 Geo. IV. c. 52, s. 1 (July 8, 1823).

EMPEROR.—The Romans distinguished their successful generals by the title Imperator, which was assumed by Julius Cæsar on his elevation to the perpetual dictatorship, B.C. 46. The succession of Roman emperors

dates from Augustus Cæsar, B.C. 27, and that of the Eastern emperors from Valens, A.D. 364. Charlemagne was crowned emperor of the West in 800. The Ottoman empire began under Ottoman or Othman I., in 1299. The Czar Peter assumed the title of Emperor of all the Russias in 1721, and Napoleon I. that of Emperor of the French, May 18, 1804, in which year Francis II. of Germany adopted the style of Emperor of Austria. Brazil became an independent empire under Don Pedro IV. in 1825, and Souluque was proclaimed emperor of Hayti, by the title of Faustin I., Aug. 24, 1849. The present imperial government of France began under Napoleon III., Dec. 1, 1852.

EMPIRICS, a sect of physicians who taught that all knowledge of medical matters must be derived from experiment and observation. This doctrine was first promulgated by Acron of Agrigentum, a Greek physician, who flourished B.C. 430, but his disciples did not form themselves into a separate sect until the time of Philinus of Cos, and Serapion of Alexandria, B.C. 250.

ENAMELLING.—The inventor of this art is unknown, but the Egyptians, Etruscans, and other nations of antiquity practised it

with considerable success. Having fallen into disuse, it was revived in Italy during the pontificate of Julius II. (A.D. 1503-1513), and was much improved by Jean Toutin, a goldsmith of Chasteaudun, who invented the art of painting with opaque enamel in 1630. Enamelled pottery was first made in England in 1642. A process for coating the interior of iron saucepans, &c. with enamel, was patented by Dr. Hickling in Dec. 1790, and improved by Clarke's method, which was patented May 25, 1839.

ENCÆNIA, or "anniversary feasts kept in memory of the dedication of churches" (Bingham, b. xx. c. viii. s. 1), commenced in the time of Constantine I. (A.D. 306-337). They were introduced into England by Gregory the Great (590-604), who ordered Augustine and Mellitus, the first English bishops, "to allow the people liberty, on their annual feasts of the dedication of their churches, to build themselves booths round about the church, and there feast and entertain themselves with eating and drinking, in lieu of the ancient sacrifices while they were heathens" (Bing. b. xx. c. viii. s. 1). Hence arose our church-wakes.

ENCAUSTIC PAINTING.—In this art the colours are prepared with wax. It was anciently practised by Praxiteles, B.C. 360, but gradually fell into disuse until some experiments were made by Bachelier A.D. 1749. The Count Caylus and M. Mignot published a description of the results in 1765, but the art was not recovered until 1785. This was effected by Miss Greenland, afterwards Mrs. Hooker, of Rottingdean, Sussex, and the account of her proceedings is given in the 10th vol. of the Transactions of the Society of Arts, 1792.

ENCRATITES, or ABSTAINERS, the followers of Tatian, an Assyrian, and a disciple of Justyn Martyr. He held matter to be the source of all evil, and corrupted Christianity by introducing various doctrines of the oriental philosophers. His followers discarded all external comforts, and held wine in such abhorrence, that they used water in the Lord's supper. Tatian flourished about A.D. 173. His followers were called, in addition to Enkratites, Tatianists, Apotactites, and Hydrotarastates. They were also called Continentians.

ENCUMBERED ESTATES ACT.—In consequence of the numbers of encumbered estates in Ireland, and the difficulty of disposing of them, three commissioners were appointed by 12 & 13 Vict. c. 77 (July 28, 1849) to superintend their sale and transfer. By this act, the owner or incumbrancer of encumbered land of which the lease had run on for at least sixty years, was empowered to apply within three years to the commissioners for a sale (s. 16). The Commissioners' Court in Dublin commenced its business Oct. 25, 1849, and ceased Aug. 31, 1858, having sold property to the amount of £23,161,093. 6s. 7d. A new court, to be called the Landed Estates Court, Ireland, was appointed by 21 & 22 Vict. c. 72, s. 2 (Aug. 2, 1858).—An Encumbered

Estates Act for the West Indies was provided by Act 17 & 18 Vict. c. 117 (Aug. 11, 1854), which was amended by 21 & 22 Vict. c. 96.

ENCYCLOPÆDIA.—The earliest encyclopædia in existence is one in MS. by Alfarabius, a philosopher of the school of Bagdad, who flourished in the 10th century. The first printed work with this title is the *Encyclopædia, seu Orbis Disciplinarum*, which was published at Basel in 1555. The following table is a list of the most celebrated Encyclopædias in the order of their publication:—

	A.D.
Alsted's Encyclopædia.....	1620
John Harris's Lexicon Technicum (the first English Encyclopædia)	1706-1710
Ephraim Chambers's Cyclopædia.....	1728
Barrow's New and Universal Dictionary of Arts and Sciences	1751-1754
Didérot and D'Alembert's Encyclopédie	1751-1780
Encyclopædia Britannica	1771
Encyclopédie Méthodique	1782-1832
Rees' Chambers's Cyclopædia	1788
Rees' Cyclopædia	1803-1819
Conversations-Lexicon	1809
The Pantalogia	1813
Encyclopædia Metropolitana.....	1817-1845
Encyclopædia Americana	1829
Lardner's Cabinet Cyclopædia	1829-1846
Dictionnaire de la Conversation	1831-1852
Penny Cyclopædia.....	1833-1846
English Cyclopædia	1854-1861
Chambers's (W. and E.) Cyclopædia (in progress)	1859

ENDEAVOUR RIVER (Australia).—Captain Cook anchored at the mouth of this river, July 17, 1770, and remained until Aug. 4, when he named it after the ship in which he sailed.

ENDOR (Palestine).—Saul consulted the sorceress at this village on the eve of the battle of Mount Gilboa (1 Sam. xxviii. 7-25), B.C. 1055. Saul was defeated, and committed suicide (1 Sam. xxxi. 4-6).

ENDOSMOSE, the power possessed by a dense fluid of attracting to itself through an animal or vegetable membrane any less dense fluid, was discovered by M. Dutrochet, who published an account of its properties in 1826. Endosmose is the term applied to this phenomenon when the attraction is from the outside to the inside. In the contrary case it is called exosmose.

ENFIELD (Middlesex).—The free school of this town was endowed A.D. 1413. Enfield Chase was disforested in 1779, and an old palace in which Edward VI. held his court, and his sister, the princess Elizabeth, used to reside, was destroyed in 1792. Experiments to test the powers of small fire-arms were conducted here by government in 1852.

ENFIELD MUSKET.—In consequence of experiments made by government in 1852, to test the capabilities of various rifle arms, the Enfield rifle-musket was adopted in the British army in 1853.

ENGAGERS.—A name given to the duke of Hamilton, and other Scottish noblemen, who shared the counsels of Charles II. during his visit to Scotland in 1650-51. Who-

ever happened to be obnoxious to the Presbyterians, were branded either as Engagers or Malignants.

ENGEL (Battle).—The Austrians were defeated at Engen by the French, May 3, 1800.

ENGLAND.—This name is derived from *Angles* and *lond*, signifying land of the Angles. Sharon Turner doubts the story that the name of England was first given to the country at a council summoned at Winchester by Egbert, A.D. 829, and considers that Athelstan may with greater propriety be entitled the first king of England.

A.D.

835. Egbert defeats the Danes and Britons at the decisive battle of Hengstone Hill.
871. Battle of Merton, in which the Danes defeat Ethelred I., who, being mortally wounded, is succeeded by Alfred.
878. Alfred the Great is compelled by the Danes to seek refuge in the island of Athelney.
890. He publishes his code of laws, by which, according to some authorities, trial by jury was instituted, and England divided into parishes.
896. He institutes the Privy Council.
937. Athelstan defeats the united forces of the Danes, Scots, Irish, and Britons, at the battle of Brunanburgh, and reduces all England under his authority. He first assumes the title of king of Eogland.
946. Mysterious assassination of Edmund the Elder.
959. St. Dunstan flourishes and is made bishop of Worcester.
978. Assassination of Edward the Martyr, by order of Elfrida, widow of Edgar, whose son, Ethelred II., or the Unready, succeeds to the throne.
1002. Nov. 13. Massacre of the Danes.
1003. Sweyn, king of Denmark, lands at Exeter, and devotes several years to the task of avenging the slaughter of his countrymen, and of establishing his own power in England.
1013. Sweyn returns for the last time, compels Ethelred II. to seek shelter in Normandy, and assumes the title of king of England.
1014. Death of Sweyn, and recall of Ethelred.
1017. Canute unites the crowns of England and Denmark.
1042. On the death of Hardicanute, the Saxon dynasty is restored in the person of Edward the Confessor.
1051. Rebellion of Godwin, earl of Kent.
1066. Oct. 14. Battle of Hastings, which finally abolishes the Saxon supremacy, and establishes a Norman dynasty, commencing with William the Conqueror.
1069. William I. ravages Northumbria.
1076. County justices, or conservators of the peace, are first appointed.
1086. Completion of Domesday Book.
1096. St. George becomes the patron saint of England.
1120. Prince William, only son of Henry I., is drowned with 140 young noblemen, on the voyage from Normandy to England.
1139. Stephen's claim to the English throne is disputed by Matilda, daughter of Henry I., widow of Henry V., emperor of Germany, and wife of Geoffrey Plantagenet, count of Anjou. She lands at Arundel, in Kent, and is joined by the earl of Gloucester and 150 knights.
1141. Feb. 2. Stephen is made prisoner while besieging Lincoln. Shortly afterwards Matilda is crowned at Winchester.
1146. Matilda retires to Normandy.

A.D.

1153. Nov. 7. Stephen and Henry Plantagenet, son of Matilda, conclude a treaty at Winchester, by which Stephen is to enjoy the crown during his life, and Henry is to succeed him.
1154. Dec. 19. Sunday. Coronation of Henry II., the first of the Plantagenets, and lineal descendant of the old Saxon sovereigns.
1155. Thomas Becket is made Lord Chancellor.
1164. Jan. 25. Constitutions of Clarendon.
1170. Dec. 29. Tuesday. Thomas Becket is killed in Canterbury Cathedral.
1172. Submission of Ireland to Henry II.
1174. July 12. Henry II. does penance at the shrine of Thomas Becket.
1176. England is divided into six districts, for the administration of justice, and itinerant judges are appointed.
1189. Sept. 3. Coronation of Richard I., which is disgraced by a cruel massacre of the Jews. Dec. 11. The king departs for the Crusades.
1192. Dec. 20. Richard I. is made prisoner by the duke of Austria, who sells him to Henry VI., emperor of Germany, for a large sum.
1194. Feb. 4. He is ransomed for 150,000 marks, or about £300,000 present coinage.
1198. Sept. 20. Battle of Gisors, the watchword on which occasion—"Dieu et mon droit"—is adopted by Richard I. as the national motto.
1199. April 6. Tuesday. Death of Richard I., in consequence of an arrow-wound received at the siege of Chalus. He is succeeded by his brother John.
1204. John loses Normandy.
1208. March 23. Pope Innocent III. lays England under an interdict.
1213. May 15. John surrenders his crown to Pandulph, the Pope's legate.
1215. June 15. Signing of Magna Charta.
1236. Jan. 14. Henry III. marries Eleanor of Provence.
1254. County representation is instituted by Henry III.
1258. June 11. The Mad Parliament assembles at Oxford.
1262. De Montfort's rebellion. (See BARONS' WAR.)
1265. Jan. 20. The first regular representative parliament is summoned by Simon de Montfort, earl of Leicester.
1283. Edward I. completes the subjugation of Wales.
1290. He is invited to decide the Scottish succession.
1292. Nov. 30. He decides in favour of John Balliol, who renders him feudal homage at New-castle.
1294. Guienne is seized by Philip IV. of France.
1305. Aug. 24. Sir William Wallace is executed in Smithfield.
1312. June 19. Piers Gavestone is put to death by order of the earl of Lancaster.
1314. Edward II. invades Scotland, and is defeated by Robert Bruce, at Bannockburn, June 24.
1321. Banishment of the Spensers.
1327. Jan. 20 or 21. Deposition of Edward II. Sept. 21. He is murdered in Berkeley Castle.
1330. Oct. 19. Arrest of Mortimer and the queen dowager at Nottingham. Nov. 29. Execution of Mortimer at Tyburn.
1331. The art of weaving woollen cloth is introduced by seventy Flemish families.
1332. Edward III. invades Scotland on behalf of Edward Balliol.
1339. Edward III. invades France.
1346. Aug. 26. The battle of Crecy. Oct. 12. Battle of Neville's Cross, near Durham, and capture of David Bruce of Scotland.
1347. Aug. 4. Capitulation of Calais.
1349. Order of the Garter instituted.
1356. The Black Prince invades France, and takes King John prisoner at the battle of Poitiers, Sept. 9.

A.D.

1360. May 8. Treaty of Bretigny, by which Edward III. renounces his claim to Normandy, Maine, Anjou, &c., accepting in lieu thereof the provinces of Gascony and Guienne.
1362. The English language is substituted for the French in the courts of law.
1377. Wycliffe opposes the pope's supremacy.
1381. Wat Tyler's insurrection.
1397. Arrest and murder of the duke of Gloucester.
1398. Sept. 16. Richard II. banishes the dukes of Hereford and Norfolk.
1399. Sept. 29. Monday. Abdication of Richard II.
1400. Richard II. is put to death some time in the spring.
1401. Feb. 12. William Sawtre, a Lollard priest, is burnt for heresy. Owen Glendower's insurrection.
1402. Rebellion of the Percies.
1403. July 23. Battle of Shrewsbury, and defeat of the rebels.
1405. The archbishop of York, Lord Mowbray, and others, are frustrated in an attempt to stir up a rebellion in Northumberland.
1408. The Percies again rebel. Defeat and death of the earl of Northumberland, at the battle of Bramham Moor, Feb. 19.
1414. Lollard insurrection, under Lord Cobham.
1415. Aug. 14. Henry V. sets sail for France. Sept. 22. He captures Harfleur. Oct. 25. Henry V. defeats the French army at the battle of Agincourt.
1420. May 21. Treaty of Troyes, by which Henry V. is declared heir to the French crown. June 2. Marriage of Henry V. with the princess Catherine of France.
1426. Oct. Serious disputes commence between the Lord Protector Gloucester and the bishop of Winchester.
1431. May 30. Execution at Rouen of Joan of Arc.
1445. April 22. Marriage of Henry VI. and Margaret of Anjou.
1447. Feb. 23. Mysterious death of the duke of Gloucester.
1450. Jack Cade's insurrection.
1455. May 22. Battle of St. Alban's, the first engagement in the Wars of the Roses.
1460. July 10. Battle of Northampton, when King Henry VI. is made prisoner by the Yorkists. Dec. 30. Battle of Wakefield, and death of the duke of York.
1461. March 4. Henry VI. is deposed by Edward IV. March 29. Battle of Towton (*q. v.*).
1464. May 1. Private marriage of Edward IV. and Lady Elizabeth Grey. May 8. Battle of Hexham, and defeat and flight of Henry.
1469. The earl of Warwick rebels against Edward.
1470. Oct. 3. Flight of Edward IV. Oct. 6. Restoration of Henry VI.
1471. March 14. Return of Edward IV. April 14. Battle of Barnet, and death of the earl of Warwick, with whom the hopes of the Lancastrians become extinct. May 4. Battle of Tewkesbury, where Margaret and her son, Prince Henry, are made prisoners, and the latter is murdered. June. Mysterious death of Henry VI. in the Tower.
1478. Feb. 18. Death of the duke of Clarence in the Tower.
1483. June 26. The duke of Gloucester usurps the throne of his young nephew Edward V., and ascends it as Richard III. Aug. Edward V. and the duke of York are murdered in the Tower.
1485. Aug. 22. Battle of Bosworth Field, and death of Richard III., the last sovereign of the house of Plantagenet.
1486. Jan. 18. Marriage of Henry VII. and Elizabeth, daughter of Edward IV.
1487. June 16. Battle of Stoke, which ends the insurrection of Lambert Simnel.
1492. Oct. 2. Henry VII. invades France, but withdraws his forces on receiving a ransom of 745,000 crowns.
1499. Nov. 23. Execution of Perkin Warbeck.

A.D.

1509. June 7. Marriage of Henry VIII. to Catherine of Aragon, his brother Arthur's widow.
1510. Aug. 18. Execution of Empson and Dudley.
1514. Aug. 5. Rise of Wolsey. He is created archbishop of York.
1520. June 7-24. Meeting of Henry VIII. and Francis I. of France, on the "Field of the Cloth of Gold."
1521. Oct. 11. Papal bull, conferring on Henry VIII. the title of Defender of the Faith.
1529. Oct. 17. Fall of Wolsey.
1530. Nov. 29. Death of Wolsey at Leicester.
1533. Jan. 25. Henry VIII. marries Anne Boleyn. May 23. His former marriage with Catherine is declared null and void by Cranmer.
1534. Abolition of the papal supremacy in England.
1535. June 22. Execution of Bishop Fisher. July 6. Aud of Sir Thomas More.
1536. May 19. Execution of Anne Boleyn. May 20. Henry VIII. marries Lady Jane Seymour.
1537. Oct. 12. Birth of Edward VI. Oct. 24. Death of Jane Seymour.
1538. Suppression of the monasteries.
1539. Cruel statute of the "Six Articles," known as the Bloody Bill, which denounces burning or hanging against all who deny the doctrine of Transubstantiation, &c. (31 Hen. VIII. c. 14).
1540. Jan. 6. Henry VIII. marries Anne of Cleves, from whom he is divorced July 9. July 28. Execution of Cromwell, earl of Essex. Aug. 8. The king marries Lady Catherine Howard.
1542. Feb. 13. Execution of Catherine Howard.
1543. July 12. Henry VIII. marries Catherine Parr.
1547. Jan. 19. Execution of the earl of Surrey. Jan. 28. Death of Henry VIII., who is succeeded by Edward VI., under the protectorship of the duke of Somerset.
1549. March 20. Execution of Lord Seymour, brother of the Lord Protector. June 9. An insurrection in favour of papacy breaks out in the west. Oct. 14. Disgrace of the Lord Protector Somerset.
1552. Jan. 22. Execution of the duke of Somerset.
1553. July 6. Death of Edward VI. July 10. Proclamation of Lady Jane Grey as queen. July 19. She relinquishes the title, and Mary is proclaimed in London.
1554. Feb. 7. Suppression of Sir Thomas Wyatt's insurrection. Feb. 12. Execution of Lady Jane Grey and Lord Guildford Dudley. April 11. Execution of Sir T. Wyatt. July 25. Marriage of Mary with Philip II. of Spain. Nov. 30. Cardinal Pole pronounces the country reconciled to the Church of Rome.
1555. Feb. 4. Mary's persecution of the Protestants commences with the burning of John Rogers. Feb. 9. Hooper is burnt. Oct. 16. Martyrdom of Ridley and Latimer.
1556. March 21. Burning of Cranmer.
1558. Jan. 7. Loss of Calais, the last English possession in France.
1559. The reformed religion is restored by the Act of Uniformity (1 Eliz. c. 2).
1568. May 17. Mary, queen of Scots, seeks shelter in England, and lands at Workington, in Cumberland.
1571. Pope Pius V. endeavours to incite the English to rebellion.
1581. Dec. 1. Execution of Campian, the Jesuit, and others, for conspiracy.
1586. Sept. 20 and 21. Execution of Babyngton and his accomplices.
1587. Feb. 8. Execution of Mary, queen of Scots, at Fotheringhay Castle.
1588. Repulse of the Spanish Armada (*q. v.*).
1598. Tyrone's rebellion in Ireland.
1601. Feb. 25. Execution of the earl of Essex.
1603. March 24. Death of Queen Elizabeth, and accession of James VI. of Scotland as James I., under whom the Scotch and English crowns are united.

A.D.

1604. Oct. 24. James I. assumes the title of king of Great Britain.
1605. Nov. 4. Discovery of the gunpowder plot.
1606. April 12. The present national flag of England is announced by royal proclamation.
1611. May 2. The present English translation of the Bible is completed. May 22. James replenishes his exchequer by creating and selling the title of baronet.
1612. Nov. 6. Sudden death of Henry, prince of Wales.
1616. April 23. Death of Shakespeare.
1618. Oct. 29. Execution of Raleigh.
1621. May 3. Impeachment and disgrace of Lord Bacon.
1625. June 13. Charles I. marries Princess Henrietta Maria, of France.
1626. April 9. Death of Lord Bacon.
1628. Aug. 23. Assassination of the duke of Buckingham by John Felton.
1634. Feb. Punishment of Prynne and others for publishing "Histrio Mastix." Oct. 20. Writs for the collection of ship-money are issued.
1637. Dec. 6. Trial of John Hampden, which terminates the following year, June 12, seven of the judges deciding in favour of the king, and five in favour of Hampden.
1641. Feb. 26. Parliament annuls the judgment against Hampden by 16 Chas. I. c. 14. May 12. Execution of the earl of Strafford.
1642. Jan. 4. The king proceeds to the House of Commons, to seize in person five members accused of treason. Commencement of the civil war. Oct. 23. Battle of Edgehill (*q. v.*).
1643. June 18. Battle of Chalgrove. John Hampden receives a wound, of which he dies, June 24. Sept. 20. First battle of Newbury. Sept. 25. The Solemn League and Covenant is approved by both houses of parliament.
1644. July 2. Battle of Marston Moor. Oct. 27. Second battle of Newbury.
1645. Jan. 10. Execution of Archbishop Laud. June 14. Battle of Naseby (*q. v.*).
1646. May 5. Charles I. seeks protection from the Scotch. Sept. 21. They sell him to the parliament for £400,000.
1647. Jan. 30. The Scotch surrender the king to the parliamentary commissioners.
1648. Dec. 6. "Pride's purge." Colonel Pride expels the Presbyterian members of the House of Commons. About fifty Independents remain, who are known as the Rump Parliament.
1649. Jan. 20. Trial of Charles I. Jan. 27. He is sentenced to death. Jan. 30. Charles I. is executed.
1651. Sept. 3. Battle of Worcester (*q. v.*).
1653. April 20. Cromwell dissolves the Long Parliament. Dec. 16. He is made Lord Protector of the Commonwealth.
1657. April 17. Death of Admiral Blake.
1658. Sept. 30. Death of Oliver Cromwell, who is succeeded by his son Richard.
1659. May 13. Richard Cromwell resigns the title of Lord Protector.
1660. May 29. The Restoration.
1662. May 19. The Act of Uniformity (13 & 14 Chas. II. c. 4). May 20. Marriage of Charles II. to Catherine of Braganza.
1665. The Great Plague.
1666. Sept. 2 and 3. Great Fire of London.
1667. Dec. 18. Banishment of Lord Clarendon.
1674. Nov. 8. Death of John Milton.
1678. Aug. 12. Oates' fictitious "popish plot" is disclosed by Tonge. Oct. 17. Discovery of the body of Sir Edmundbury Godfrey.
1679. May 27. "Habeas Corpus" Act passed (31 Chas. II. c. 2).
1680. Dec. 29. Execution of Lord Stafford, the last victim of the pretended popish plot.
1683. June 12. Discovery of the Rye-house plot. July 21. Execution of Lord Russell.

A.D.

1689. Dec. 7. Algernon Sydney is beheaded.
1685. June 20. The duke of Monmouth rebels against James II., and is proclaimed king at Taunton. July 6. Defeat of Monmouth at the battle of Sedgemoor. July 15. His execution.
1688. June 30. Acquittal of the seven bishops. Dec. 23. Abdication of James II.
1689. Feb. 13. William III. and Mary are proclaimed king and queen.
1690. July 1. Defeat of James II. at the battle of the Boyne.
1692. Commencement of the national debt.
1694. April 25. The Bank of England is incorporated. Dec. 28. Death of Queen Mary.
1701. Sept. 16. Death of James II., at St. Germain.
1707. May 1. England and Scotland are united under the title of Great Britain.
1708. Oct. 28. Death of Prince George of Denmark, husband of the queen.
1710. Mar. 23. Dr. Sacheverell is found guilty of high crimes and misdemeanours, and sentenced to suspension from his pastoral office for three years, and to have his printed sermons burnt by the common hangman.
1713. April 11. By the treaty of Utrecht, England acquires Gibraltar, Minorca, Nova Scotia, Newfoundland, and Hudson's Bay.
1714. Aug. 1. Death of Queen Anne, and accession of the Hanoverian family, in the person of George I.
1715. Sept. 6. Rebellion in Scotland, in favour of the Pretender, breaks out under the earl of Mar. Dec. 22. The Chevalier lands at Peterhead.
1716. Feb. 24. Execution of the earl of Derwentwater and Viscount Kenmore.
1720. Sept. 29. The South Sea bubble bursts.
1722. June 16. Death of the duke of Marlborough.
1737. George II. quarrels with his son Frederick, prince of Wales. Nov. 20. Death of Queen Caroline.
1743. June 16. Battle of Dettingen, which is the last fight in which an English sovereign was personally engaged.
1745. July 25. The Young Pretender lands at Moirdart, in Inverness-shire. Sept. 17. He establishes himself at Holyrood House, Edinburgh. Sept. 21. He gains the battle of Prestonpans. Dec. 4. His army penetrates into England as far as Derby.
1746. Jan. 18. Prince Charles Edward gains the battle of Falkirk. April 16. He is totally defeated at Culloden. Aug. 10. Executions of Kilmarnock and Balmerino.
1747. April 9. Execution of Lord Lovat.
1751. March 20. Death of Frederick Louis, prince of Wales.
1752. Sept. 3. The New Style is introduced into Great Britain, Sept. 3 being accounted the 14th.
1756. May 1. Commencement of the Seven Years' war.
1757. March 14. Execution of Admiral Byng. June 23. Battle of Plassey, which reduces Bengal under English dominion.
1760. Conquest of Canada. Oct. 25. George II. dies, and is succeeded by his grandson, George III.
1761. Sept. 8. George III. marries the Princess Charlotte Sophia, of Mecklenburg-Strelitz. Sept. 22. Their coronation. Oct. 5. The elder Pitt resigns the office of secretary of state.
1763. Feb. 10. By the peace of Paris, England acquires Canada and Florida, and an end is put to the Seven Years' war. April 30. Arrest of Mr. Wilkes.
1765. March 22. The American Stamp Act is passed. Dec. 30. Death of the Pretender, at Rome.
1771. May 8. Establishment of the right to report parliamentary debates.
1772. April 1. Royal Marriage Act passed (12 Geo. III. c. 2).

A.D.

1773. Commencement of the American revolt.
1778. April 7. Lord Chatham is seized with a fit while speaking against the American war in the House of Lords. May 11. He dies.
1780. June 2-7. Lord George Gordon's anti-papery riots.
1781. Feb. 8. Lord George Gordon is tried, and acquitted.
1782. Nov. 30. A provisional treaty, acknowledging the independence of the United States, is signed at Paris. Dec. 5. The separation is announced by the king in his speech on opening parliament.
1786. Aug. 2. Margaret Nicholson, a maniac, attempts the king's life.
1788. Feb. 13. Burke opens the impeachment of Warren Hastings before the House of Lords. March 3. Death of Prince Charles Edward, the Young Pretender, at Rome. Nov. 19. The public are informed of the mental indisposition of the king.
1789. Feb. 19. Recovery of the king, and abandonment of the regency bill. April 23. Public thanksgiving throughout the kingdom, in consequence.
1793. Feb. 11. War is declared against France.
1794. May 23. Suspension of the "Habeas Corpus" Act. Oct. 28 to Dec. 5. Trial of Hardy, Horne Tooke, and Thelwall, who are acquitted.
1795. April 8. The prince of Wales marries Caroline of Brunswick. April 23. Acquittal of Warren Hastings.
1796. Jan. 7. Birth of the Princess Charlotte, daughter of the prince of Wales.
1797. Feb. 20. Commercial panic. Feb. 27. The Bank of England stops payment. July 29. Death of Edmund Burke.
1798. April 30. The "Habeas Corpus" Act is again suspended. May. A rebellion breaks out in Ireland. Aug. 1. Battle of the Nile (*q. v.*).
1800. May 15. James Hadfield fires at the king in Drury-Lane Theatre.
1801. Jan. 1. Legislative union of Great Britain and Ireland. April 2. Battle of Copenhagen (*q. v.*). April 19. The "Habeas Corpus" Act is again suspended.
1802. March 25. The treaty of Amiens is concluded.
1803. May 18. War against France renewed, in consequence of Napoleon's aggressions.
1805. Oct. 21. Death of Lord Nelson at the battle of Trafalgar (*q. v.*).
1806. Jan. 23. Death of Mr. Pitt. April 29-June 12. Trial and acquittal of Lord Melville. May 29. A privy council appointed to examine the charges against the princess of Wales. (See DELICATE INVESTIGATION.) Sept. 13. Death of Mr. Fox.
1807. March 23. Abolition of the slave-trade.
1809. Jan. 27-March 17. Impeachment and acquittal of the duke of York. Oct. 25. Celebration throughout the kingdom of the jubilee of George III.'s reign. Nov. 25. Disastrous result of the Walcheren expedition.
1810. April 6. Arrest of Sir Francis Burdett. A riot is occasioned by an attempt to rescue him. June 21. He is set at liberty. Nov. 2. Death of the Princess Amelia, which so affects the king, that his reason is again shaken.
1811. Feb. 5. The regency of the prince of Wales commences. Nov. 14, &c. Luddite riots in the Midland counties.
1812. May 11. Assassination of Mr. Perceval, the premier, by Bellingham. June 18. The United States declare war against England.
1814. May 30. Peace with France is restored by the treaty of Paris. June 7. The emperor of Russia and the king of Prussia visit England. Dec. 24. The treaty of Ghent is signed, by which peace is concluded with the United States.

A.D.

1815. Modification of the duties on corn. June 18. Battle of Waterloo (*q. v.*).
1816. May 2. Marriage of the Princess Charlotte and Prince Leopold of Saxe-Coburg. July 7. Death of Sheridan. Dec. 2. Serious riots in London, which originate at a meeting held in Spa Fields.
1817. Jan. 28. The Prince Regent's life is attempted. Feb. 4. The "Green Bag" inquiry commences. (See GREEN BAG.) Feb. 24. Suspension of the "Habeas Corpus" Act. Sept. 22. Partial resumption of cash payments by the Bank of England. Nov. 6. Death of the Princess Charlotte.
1818. July 11. Marriages of the duke of Clarence, afterwards William IV., with the Princess Adelaide of Saxe-Meiningen, and of the duke of Kent with Victoria Maria Louisa, daughter of the duke of Saxe-Coburg of Saalfeld. Nov. 17. Death of Queen Charlotte.
1819. May 24. Birth of Queen Victoria. Aug. 16. Monster reform meeting in St. Peter's Fields, Manchester. It is dispersed by the military, and the affair is known as the battle of Peterloo.
1820. Jan. 23. Death of the duke of Kent. Jan. 29. Death of George III., aged 81. May 1. Execution of Thistlewood and his associates for participation in the Cato-street conspiracy. Aug. 19 to Nov. 10. Trial of Queen Caroline.
1821. July 19. Coronation of George IV. Aug. 7. Death of Queen Caroline. Aug. 14. Riots on the occasion of her funeral procession to Harwich. The Bank resumes cash payments.
1824. April 19. Lord Byron dies at Missolonghi, in Greece.
1825. Dec. Commercial panics.
1827. Jan. 5. Death of the duke of York. Aug. 8. Death of George Canning, premier.
1829. April 13. The Roman Catholic Emancipation Bill is passed (10 Geo. IV. c. 7). Nov. 5. Political panic in London.
1830. June 26. Death of George IV. Sept. 15. Opening of the Manchester and Liverpool Railway, at which Mr. Huskisson, M.P., is killed.
1831. Sept. 9. Coronation of William IV. and Adelaide. Oct. 8. Reform riots in the Midland counties. Oct. 26. The cholera first appears in England at Sunderland.
1832. June 7. Passing of the Reform Bill (2 Will. IV. c. 45). June 19. The king is assaulted by Collins, at Ascot races. Sept. 21. Death of Sir Walter Scott.
1833. Aug. 28. Act for the abolition of slavery in the British colonies passed, and £20,000,000 voted to the planters as indemnity (3 & 4 Will. IV. c. 73).
1834. Aug. 1. The act for abolishing colonial slavery comes into operation.
1835. Sept. 9. The Municipal Corporations Act is passed (5 & 6 Will. IV. c. 76).
1837. June 30. Death of William IV.
1838. June 28. Coronation of Queen Victoria. The People's Charter is drawn up, and published this year.
1839. March. The Chinese war commences. (See CHINA.)
1840. Jan. 10. The penny postage comes into operation. Feb. 10. Marriage of the Queen and Prince Albert of Saxe-Gotha. June 10. The Queen's life is attempted by Edward Oxford. Nov. 21. Birth of the Princess Royal.
1841. Nov. 9. Birth of the prince of Wales.
1842. Jan. 24. Visit of the king of Prussia. May 30. John Francis attempts to shoot the Queen. June 22. The income-tax is levied (5 & 6 Vict. c. 35). July 3. John William Bean presents a pistol at the Queen.
1843. April 21. Death of the duke of Sussex. Sept. 2 to 7. The Queen visits Louis Philippe, at the Château d'Eu.

- A.D.
1844. June 1 The emperor of Russia and king of Saxony visit England. Oct. 6. Visit of Louis Philippe, the first occasion on which a French sovereign landed in England on a friendly mission.
1845. Aug. 9. The Queen visits Germany. Nov. 30. The railway mania reaches its highest point.
1846. March. Railway panic. June 26. The corn-laws are repealed by 9 & 10 Vict. c. 22.
1848. April 10. A mouster Chartist meeting is held on Kennington Common, London, to present to parliament a petition signed by nearly 2,000,000 persons.
1849. May 19. William Hamilton fires at the Queen. Aug. 1. The Queen embarks for Ireland. Dec. 2. Death of Adelaide, queen dowager.
1850. May 27. Robert Pate assaults the Queen with a stick. July 2. Death of Sir Robert Peel. July 8. Death of the duke of Cambridge. Aug. 21. The Queen visits Belgium. Sept. 30. The pope publishes a bull establishing a Roman Catholic hierarchy in England.
1851. March 30. The census of the United Kingdom is taken, and the population returned at 27,677,761 persons. May 1. Opening of the Great Exhibition in Hyde Park.
1852. Sept. 14. Death of the duke of Wellington. Nov. 18. His public funeral takes place at an expense of £12,000.
1853. June 16. Visit of the king and queen of Hanover to England.
1854. March 11. The Queen reviews the Baltic fleet at Spithead. March 12. Treaty of alliance between Great Britain, France, and Turkey, signed at Constantinople. March 28. War is declared against Russia. April 26. Fast-day in consequence of the war. June 2. The king of Portugal visits England. June 10. Opening of the Crystal Palace at Sydenham by the Queen. Oct. 1. General thanksgiving observed throughout the kingdom, in consequence of the abundant harvest.
1855. Jan. 29. Parliament orders an inquiry into the conduct of the war, which occasions the resignation of the Aberdeen ministry. Feb. 20. Death of Joseph Hume. Feb. 23. Sebastopol Committee appointed. March 21. General fast-day, in consequence of the war. April 16 to 21. Visit of the emperor and empress of the French. May 18. Public distribution of Crimean medals, by her Majesty, in St. James's Park. June 24 (Sunday). Riots in Hyde Park, in consequence of popular opposition to the Sunday Trading Bill. June 28. Death of Lord Raglan. July 1. Visit of the king of the Belgians. Aug. 18 to 27. The Queen visits the emperor of the French. Sept. 10. News arrives of the fall of Sebastopol. Sept. 15. Visit of Prince Frederick of Prussia. Sept. 30. General thanksgiving for the fall of Sebastopol. Nov. 30. Visit of the king of Sardinia.
1856. Jan. 17. Announcement made that Russia accepts the conditions of peace. March 30. A treaty of peace between Russia and the allies is signed at Paris. April 28. Peace is officially proclaimed. May 4. General thanksgiving, in consequence of the peace. May 29. Public celebration of the peace. Oct. Commencement of war with China. (See CHINA.) Nov. 1. War with Persia (*q. v.*).
1857. March 4. A treaty of peace with Persia is signed at Paris. April 11. First telegraphic intelligence of the Indian mutiny. April 30. Death of the duchess of Gloucester. May 5. Opening of the Art Treasures Exhibition at Manchester. May 30. Visit of the Grand Duke Constantine of Russia. June 26. Distribution of Victoria crosses, by her Majesty, in Hyde Park.

- A.D.
1857. Aug. 25. Meeting at the Mansion House, raise a relief fund for the sufferers by the Indian mutiny. Similar meetings are afterwards held throughout the country. Nov. 12. Suspension of the Bank Charter Act, in consequence of the commercial crisis.
1858. Jan. 25. Marriage of the Princess Royal to Prince Frederick William of Prussia. Feb. 8. Lord Palmerston introduces the Conspiracy to Murder Bill, in consequence of the attempted assassination of Louis Napoleon by Orsini, &c. Feb. 19. It is rejected by the Commons, in consequence of which the Palmerston cabinet resigns. June 15. The Queen visits Birmingham (*q. v.*). June 23. Property qualification of members of parliament abolished by 21 Vict. c. 26. July 23. Jewish Disabilities Bill passed (21 & 22 Vict. c. 49). Aug. 2. Act for the better government of India passed (21 & 22 Vict. c. 106). Aug. 4. The Queen visits Cherbourg (*q. v.*). Sept. 6. The Queen visits Leeds, to open the new Town-hall Nov. 1. Royal proclamation throughout India, announcing the incorporation of that country with the British empire.
1859. May 1. General thanksgiving, in consequence of the suppression of the Indian mutiny. Oct. 17. The prince of Wales becomes a student at Oxford. Nov. Many volunteer rifle corps are formed about this time. Dec. 23. Death of Lord Macaulay.
1860. Jan. 23. The commercial treaty with France is signed at Paris. March 7. The Queen holds a *levee* for officers of the volunteer rifle corps. June 23. The Queen reviews 18,000 volunteers in Hyde Park. July 2. Important failures in the leather trade. Nov. 15. The prince of Wales returns from his visit to America. (See CANADA and UNITED STATES.)
1861. March 16. Death of the duchess of Kent. April 8. The census is taken. Aug. 9. The marriage contract between the Princess Alice and Prince Louis of Hesse is signed at Osborne. Aug. 25. Fatal accident in Clayton tunnel, on the Brighton railroad. Sept. 2. Fatal collision on the Hampstead Junction railroad. Sept. 16. Post-office savings' banks opened. Oct. 31. Middle Temple library inaugurated by the prince of Wales.

THE ROYAL FAMILY OF GREAT BRITAIN.

The QUEEN. Alexandrina Victoria, born May 24, 1819; married Feb. 10, 1840, to her cousin.
 The Prince Consort. Albert Francis Augustus Charles Emanuel, duke of Saxe-Coburg and Gotha, born Aug. 26, 1819.
 Victoria Adelaide Mary Louisa, Princess Royal, born Nov. 21, 1840; married, Jan. 25, 1858, to Prince Frederick William, of Prussia.
 Albert Edward, prince of Wales, born Nov. 9, 1841.
 Alice Maud Mary, born April 25, 1843.
 Alfred Ernest Albert, born Aug. 6, 1844.
 Helena Augusta Victoria, born May 25, 1846.
 Louisa Caroline Alberta, born March 18, 1848.
 Arthur William Patrick Albert, born May 1, 1850.
 Leopold George Duncan Albert, born April 7, 1853.
 Beatrice Mary Victoria Feodore, born April 14, 1857.

ROYAL PRINCES AND PRINCESSES.

George Frederick, duke of Cumberland and king of Hanover, born May 27, 1819; married, Feb. 18, 1843, to Mary Alexandrina, daughter of the duke of Saxe-Altenburg.
 George William, duke of Cambridge, born March 26, 1819.
 Augusta Caroline, born July 19, 1822; married, June 28, 1843, the hereditary grand-duke of Mecklenburg-Strelitz.
 Mary Adelaide (Princess Mary of Cambridge), Nov. 27, 1833.

ENGLAND, NEW. (See NEW ENGLAND.)

ENGLEFIELD (Battle), or "The Field of the Angles," near Reading, celebrated as the scene of a disastrous defeat of the Danes by the Britons, led by Ethelwulf, ealdorman of Berkshire, A.D. 871.

ENGLISH LANGUAGE.—Hallam (Introd. to Lit., pt. 1, c. 1, s. 47) says:—"Nothing can be more difficult than to determine, except by an arbitrary line, the commencement of the English language." The Saxon Chronicle was continued till the death of Stephen

in 1154, though its language lost somewhat of its original purity during its later years. Layamon's translation of the French Brut romance, completed about 1200, exhibits further digressions from the primitive Saxon tongue; and some metrical lives of saints which were written about the year 1250, may be called the earliest specimens of English. The first dated document in the language is a proclamation of Henry III. of the year 1258, and the earliest English book is Sir John Mandeville's travels, written in 1356. By 36 Edw. III. c. 15 (1362), pleadings in courts of law were ordered to be in English, and in 1536 the language was introduced into Ireland. The use of English in all proceedings in English and Scotch law courts was rendered compulsory by 4 Geo. II. c. 26 (1731).

ENGRAVING was practised at a very early date by the Egyptians, who used wooden stamps engraved with hieroglyphics for the purpose of marking their bricks. It is first mentioned by Moses, B.C. 1491 (Exod. xxviii. 9), where we read the Divine command to "take two onyx stones, and grave on them the names of the children of Israel." Its revival in Europe dates from about the 15th century. Engraving on diamonds is said to have been invented in 1500, though some refuse it an earlier origin than 1564. Mezzotint engraving was invented by Colonel von Siegen, about 1643; engraving in colours by J. C. Le Blond, about 1725; in imitation of pencil, by Gilles des Marteaux, in 1756; and aquatinta engraving by Le Prince, about 1762. The property of engravings was vested in the designer for fourteen years by 8 Geo. II. c. 13 (1735); which was amended by 7 Geo. III. c. 38 (1767). These acts proving ineffectual, persons infringing them were made liable to damages and double costs by 17 Geo. III. c. 57 (1777), and the provisions of all three were extended to Ireland by 6 & 7 Will. IV. c. 59 (Aug. 13, 1836). Copyright was applied to foreign engravings by 7 & 8 Vict. c. 12 (May 10, 1844); and the various statutes on the subject were explained by the Copyright Amendment Act, 15 & 16 Vict. c. 12 (May 28, 1852).

ENGRAVING ON COPPER is said to have been practised in Germany about A.D. 1450. The invention is also claimed for the Italian goldsmith Maso Finiguerra in 1460, though no plate exists of earlier date than 1461. Andrea Mantegna (1430—1506) produced many fine works in this branch of art.

ENGRAVING ON STEEL.—Some early prints by Albert Durer, dated 1515 and 1516, are believed to be impressions from steel plates. This metal, however, was very rarely employed by engravers: only one specimen, executed by Mr. J. T. Smith in 1805, being known until 1818, when Mr. C. Warren exhibited an impression from a soft steel plate to the Society of Arts. Bank notes are now printed by this means.

ENGRAVING ON WOOD was practised by the Chinese as early as B.C. 1120. The pre-

cise date of its introduction into Europe is unknown. Some authorities state that a series of woodcuts illustrative of the career of Alexander the Great, was engraved by the two Cunio in 1285. This story is, however, very doubtful; and, perhaps, the origin of the art may be traced to the wooden blocks used by notaries for stamping monograms in the 13th century, and to the engraved playing-cards which appeared in France about 1340. The earliest woodcut in existence represents St. Christopher with the infant Saviour, and is dated 1423. Many block-books exist of about the year 1430, but the art was not brought to great perfection till the commencement of the 16th century. Albert Durer (1471—1528); Lucas of Leyden (1494—1533); Holbein, whose "Dance of Death" (*q.v.*) appeared at Lyons in 1538; Gerard Audran (1640—1703); Woollet (1735—1785); Thomas Bewick (1753—1828); Nesbit, born in 1775; and Harvey, born in 1796, rank foremost among wood-engravers.

ENKÖPING (Battle).—At this place Albert I., king of Sweden, in 1365, defeated Haco of Norway, who had been elected king of Sweden in 1363.

ENLISTMENT.—The enlistment of British subjects to serve in foreign armies was prohibited by 59 Geo. III. c. 69 (July 3, 1819). By 5 & 6 Will. IV. c. 24 (Aug. 21, 1835), enlistment of sailors was limited to five years; and by 10 & 11 Vict. c. 37 (June 21, 1847), military service was restricted to ten years in the infantry, and twelve years in the cavalry, artillery, and marines.

ENNISKILLEN (Ireland) was not a place of much importance when taken by the English, A.D. 1602. In 1612 it was erected into a corporate town, and subsequently became an important asylum for the Protestants of Ulster. The inhabitants proclaimed William and Mary, March 11, 1689; and, mustering to the number of 2,500 men, defeated 6,000 Jacobites under Macarthy, Lord Moncashel, at Newton Butler, July 30. The volunteers who gained this battle and otherwise distinguished themselves in the war of the Revolution, are the origin of the Enniskillen dragoons. In 1776 the town gave its name to a viscount, who was made earl of Enniskillen in 1789.

ENOSH (Book of).—The original version of this apocryphal work, written in Chaldee or Hebrew, is lost, as well as the Greek translation. In 1821 Dr. Lawrence translated the Ethiopic version, brought from Abyssinia by the traveller Bruce, at the end of the 18th century. Dr. Davidson supposed it to have been written about B.C. 40.

ENTAIL.—Wharton defines an estate-tail as "a freehold of inheritance, limited to a person and the heirs of his body general or special, male or female." The custom of confining the succession to property in this manner resulted from the desire of the nobility to retain their possessions in their own families. It was commenced by the second

statute of Westminster, 13 Edw. I. c. 1 (1285). Owing to the inefficacy of attainders of treason when estates were protected by entails, they were evaded in 1472 by a decision that common recoveries should constitute a bar to an entail. By 26 Hen. VIII. c. 13 (1534), high treason confiscates entailed property to the crown; and by 21 James I. c. 19, s. 12 (1623), entailed estates were permitted to be sold in cases of bankruptcy. This latter act was repealed by 6 Geo. IV. c. 16, s. 65 (May 2, 1825), which was again supplanted by 3 & 4 Will. IV. c. 74, ss. 55—65 (Aug. 28, 1833), and 12 & 13 Vict. c. 106, s. 208 (Aug. 1, 1849). Leases made by tenants in tail are regulated by 19 & 20 Vict. c. 120 (July 29, 1856).

ENTOMOLOGY.—Aldrovandus published a history of insects in A.D. 1604, and Mouffet his "Theatrum Insectorum" in 1634; but no good description existed till the appearance of Swammerdam's "General History of Insects," in 1669. In 1710 Ray's "Methodus Insectorum" was published, and in 1735 Linnaeus announced his classification. Latreille's "Précis des Caractères des Insectes" appeared in 1797. The French Société Entomologique was established in 1832, and the Entomological Society of London in 1833.

ENVELOPES.—The practice of using envelopes for letters is supposed to have originated in France. Le Sage mentions them in "Gil Blas." An envelope attached to a letter, dated May 16, 1696, was found in the State Paper Office. Envelopes were not introduced for letters sent through the post till after 1839, as up to that period it was customary to charge double postage on paper inclosed in another paper. The penny postage system commenced Jan. 10, 1840; but the use of envelopes did not become general until May 6, 1840, when stamped and adhesive envelopes were introduced. In 1841 about half the letters which passed through the Post-office were in envelopes, and in 1850 300 out of every 336 were thus protected. Hill and De la Rue's ingenious machine for folding envelopes was patented March 17, 1845.

EOLODICON.—This musical instrument was invented by Eschenbach, in 1815, and an account of it was published at Leipsic in 1820.

EOOA, or MIDDLEBURG (South Pacific), the most eastern of the Friendly Isles, was discovered by Abel Jansen Tasman, who gave it the name of Middleburg, Jan. 19, 1643.

EPHESUS (Asia Minor) was founded at a very early date, and first inhabited by the Carians and Leleges. It was burnt by the Amazons B.C. 1141, and rebuilt by the Ionians, who entered Asia Minor under the leadership of Androclus, son of Codrus, B.C. 1045. Cræsus, king of Lydia, seized Ephesus B.C. 559, and the temple of Artemis or Diana was erected B.C. 552. Ephesus surrendered to Cyrus B.C. 544, and remained under the Persian yoke until B.C. 501, when, with other

Ionian cities, it revolted, and regained its independence. The Athenian and Eretrian fleets remained here previous to their assault on Sardis, B.C. 499, and the Spartan general Lysander established his head-quarters in the city, and defeated the Athenians in a sea-fight fought in its vicinity, B.C. 407. The temple was burnt by an incendiary, B.C. 356, on the same day on which Alexander the Great was born. Its re-erection occupied 220 years, and the new building was regarded by the ancients as one of the seven wonders of the world. Ephesus was destroyed by an inundation B.C. 322; but Lysimachus rebuilt it on a more elevated site B.C. 300. The Romans gave this city to the king of Pergamum, B.C. 190, and on the formation of their province of Asia in B.C. 129, erected it into the capital. It was reduced to ruins by an earthquake A.D. 17. St. Paul preached here A.D. 56, and made so many converts that a riot was stirred up in 59 by Demetrius, the silversmith, in consequence of the decreased demand for silver shrines for the goddess Diana (Acts xix. 23-41). Paul's Epistle to the Ephesians was written in 61, and in 65 he ordained Timothy to be first bishop of the diocese. Ephesus was one of the seven churches of Asia. The temple of Diana was destroyed by the Goths, A.D. 262, and on the occasion of the third general council, in 431, the city was the scene of disgraceful ecclesiastical riots. Councils were held here in 196; 245; 401; 431, June 22 to July 31 (the third General Council); 449, and 476.

EPHORI, magistrates instituted in Sparta by Theopompus, B.C. 757. They were five in number. Thirlwall (vol. i. c. ix. p. 407) says of them:—"The royal dignity was forced on all occasions to bow to them; and as they could control the proceedings of the kings by their orders, could fine them for slight offences at their discretion, and could throw them into prison to await a trial on graver charges, so they alone, among all the Spartans, kept their seats while the kings were passing, whereas it was not thought beneath the majesty of the kings to rise in honour of the ephors, and it was their acknowledged duty to attend, at least on the third summons, before the ephoral tribunal."

EPICUREANS.—This sect of philosophers was founded by Epicurus of Samos, who was born B.C. 342. He established a school at Athens B.C. 306, and continued to teach until his death, which occurred B.C. 270. He maintained that happiness is the object of life, and that it consists in the recollection or anticipation of sensual pleasures; and as a future state would interfere with his doctrines on this subject, he denied its existence altogether.

EPIDAUROS (Greece).—A congress convoked at this town, Dec. 15, 1821, proclaimed the independence of Greece in 1822.

EPIGRAMS were originally inscriptions upon tombstones, on offerings to the gods, &c., and were written by Archilochus, who flourished B.C. 688, and Simonides, B.C. 500. The Latin poet Martial (A.D. 43-104) is

considered to have excelled all other writers in this species of composition.

EPIPHANY.—This feast, celebrated Jan. 6, is said by Bingham (b. xi. c. vi. s. 7), to commemorate "the day on which Christ was baptized and manifested to the world." It was first observed by the Gnostic followers of Basilides of Alexandria, who flourished about A.D. 125, and does not appear to have been celebrated by the church at large till long afterwards, as it is excluded from the list of feasts given by Origen (230). Its observance as a separate feast commenced A.D. 813.

EPIRUS (Greece) was originally peopled by Pelasgians, but very little is known of its early history.

B.C.

1170. Arrival of Neoptolemus, or Pyrrhus, son of Achilles.
635. The Corinthians found the city of Ambracia.
340. Accession of Alexander I., uncle to Alexander the Great.
326. Alexander falls in battle in Italy.
295. Pyrrhus, the greatest sovereign of Epirus establishes himself on the throne.
291. He makes war against Demetrius, king of Macedonia.
289. Demetrius invades Epirus.
288. Pyrrhus invades Macedonia, and is expelled by Demetrius.
287. Pyrrhus again invades Macedonia, where he reigns, conjointly with Lysimachus, for about seven months.
280. Pyrrhus invades Italy, and gains a splendid victory over the Romans.
278. He gains the battle of Asculum, and conquers Sicily.
276. He again invades Italy.
274. He is defeated by the Romans, under Curius Dentatus, who expels him from Italy.
273. He wrests Macedonia from Antigonus Gonatus.
272. He is killed at Argos, by a tile thrown from a house-top.
219. The Epirotes unite with Philip V. of Macedon against the Ætolians.
167. Æmilius Paulus destroys seventy towns of Epirus, and carries away 150,000 of the inhabitants as slaves.
30. Augustus founds the city of Nicopolis, which becomes the Roman capital of Epirus.

A.D.

1204. The Despotat of Epirus is founded by Michael I.
1350. Epirus is conquered by Stephen Duscian, king of Servia.
1390. It is invaded by Charles Tocco, count of Cephalonia, and duke of Leucadia.
1431. The Turks take Joannina and Ætolia.
1466. Epirus is annexed to the Ottoman empire.
1854. Jan. 28. The Epirotes rise in insurrection.
- June 18. The rebellion is suppressed.

EPITAPHS.—Pettigrew says of the custom of placing inscriptions upon tombs, that "the Egyptians may lay claim to be the earliest recorders of this description, by the writing of their names, their descent, their functions, &c., upon their sarcophagi and coffins." Numerous epitaphs are found on Greek and Roman tombs, but the Saxons and Danes have left few memorials of this kind. Some interesting inscriptions of the latter part of the 7th century have, however, been discovered at Hartlepool. Epitaphs did not become general in England till the 11th century, when they were written in Latin, and chiefly inscribed upon the tombs

of kings and ecclesiastical dignitaries. In the 12th century Leonine verses were very general. French epitaphs were not used in France till the 13th century; they were afterwards introduced into England, where they continued in use till the 15th, after which time English epitaphs became general.

EPITHALAMIA, or **HYMENEAL HYMNS**, composed to be chanted at weddings. Sappho, who flourished B.C. 596, and Stesichorus, B.C. 560, are celebrated for the beauty of their productions of this kind.

EPSOM (Surrey).—The mineral springs from which Epsom salts are extracted were discovered A.D. 1618. The parish church was rebuilt in 1824.

EPULONES.—Three priests appointed by the pontiffes to superintend the feasts in the sacred games. They were instituted B.C. 196, and in the time of Sylla (B.C. 88—79) were increased in number to seven.

EQUATOR. (See **ECUADOR**.)

ERASTIANS, the name given to those who adopted the views of Thomas Lieber, or Erastus, a German physician and divine, who was born A.D. 1523, and died in 1583. They formed a separate party in the Assembly of Divines in 1643, and unsuccessfully advocated their peculiar views respecting the exclusively persuasive authority of the pastoral office, and the consequent impropriety of ecclesiastical excommunications, &c.

ERFURT (Prussian Saxony), founded in the 5th century, was, in the time of Charlemagne, one of the most important commercial towns of Germany. Its university was founded A.D. 1392, and is celebrated as having numbered Martin Luther amongst its students in 1501. In 1664 the town was taken by the French, who ceded it to the elector of Mayence in 1667. In 1803 it was annexed to Prussia, but was again taken by the French under Murat, Oct. 15, 1806, when 14,000 Prussians, including Marshal Mollendorf and the prince of Orange, were made prisoners. Napoleon Bonaparte and the emperor Alexander of Russia had an interview here, Sept. 27, 1808. It resulted in a letter which they addressed to George III., Oct. 12, desiring him to accede to offers of peace. A reply was sent Oct. 28, to the effect that England could only treat in concert with Sweden and Spain. Erfurt was restored to Prussia Jan. 6, 1814. Its university was suppressed in 1816. A German parliament assembled here March 20, 1850.

ERICSSON'S PATENT.—A small vessel built to test the capabilities of Mr. Ericsson's screw propeller, first patented in 1833, in an experimental trip on the Thames, May 25, 1837, towed a ship of above 600 tons, at the rate of $4\frac{1}{2}$ knots per hour, against the tide. In 1851 Mr. Ericsson changed the form of his engine and built another vessel of 1,000 tons, named after the inventor, to be propelled by hot air instead of steam. In her trial trip, in 1853, she is said to have equalled Mr. Ericsson's expectations; but she ultimately proved a failure, and never crossed

the Atlantic, for which she was specially designed. In 1855 the caloric engine was taken out of the *Ericsson*, and steam-engines were substituted.

ERIE CANAL, commenced A.D. 1817, was completed in 1824.

EBELANGEN (Bavaria).—The new town was founded A.D. 1686 and its Protestant university in 1743.

EERMIA (Knights of).—This order of knights was instituted by Francis I., duke of Brittany, A.D. 1450. The order became extinct when Brittany was annexed to France in 1532.

ERROAD, or **EROUAD** (Hindustan).—The English reduced Erroad A.D. 1768, and Hyder Ali recovered it soon after. They regained possession in 1790, but it was again wrested from them the same year by Tippoo Saib. It was, however, ceded to the East-India Company in 1799.

ERYX (Sicily).—This city, near Drepanum, was celebrated for a temple of Venus, of which Æneas was said to be the founder. The Carthaginians were defeated by the Syracusans in a sea-fight off Eryx, B.C. 406. It maintained several sieges, was taken by Pyrrhus B.C. 277, and was destroyed by Hamilcar, who removed the inhabitants to Drepanum, B.C. 260. The town was afterwards restored, and was warmly contested between the Romans and Carthaginians.

EEZEROUH (Asiatic Turkey).—This city was founded by Theodosius II. A.D. 415, and passed under the authority of the Seljuks during the 11th century. In 1241 it was taken by the Mongols, by whom the inhabitants were either massacred or sold into slavery, and in 1517 it was seized by the Turks. A treaty of peace was concluded here between Persia and Turkey, July 23, 1823. The city was taken by the Russians under Count Paskiewitch, July 9, 1829. It was destroyed by an earthquake, which lasted from June 11 to July 17, 1859.

ESCHEATS.—Stephens (Com. b. ii. pt. 1, c. 12) says of the word escheat, that it is "originally French or Norman, in which language it signifies chance or accident; but with us it is applied to the case where the tenant of lands in fee dies without having aliened them in his lifetime, or disposed of them by his last will and testament, and leaves no heir behind him to take them by descent, so that they result back, by a kind of reversion, to the original grantor or lord of the fee." By 13 & 14 Vict. c. 60 (Aug. 5, 1850), beneficiaries and mortgagors were protected from the ordinary law of escheat in the event of a trustee or mortgagee dying heirless and intestate.

ESCHENDUN (Battle).—Ethelred, with his brother Alfred, defeated the Danes in a great battle at Eschendun, or Eschedun, meaning "the hill of the ash," A.D. 871. Some authorities believe Aston, in Berks, and others Ashendon, in Bucks, is meant.

ESCORIAL.—This ancient palace of the kings of Spain was erected by Philip II., in consequence of a vow made during the battle

of St. Quentin, Aug. 10, 1557, that he would, if victorious, found a church, a monastery, and a palace. The three are said to be combined in the Escorial, dedicated to St. Lorenzo, on whose day the vow was made. In honour of the martyrdom of the saint, who was broiled to death Aug. 10, 261, the ground plan of the new edifice was designed in form of a gridiron. The first stone was laid April 23, 1563, and the building was completed Sept. 13, 1584. The library was added about 1580. A subterranean passage connecting the palace with an adjoining village, was added in 1770, for use during the hurricanes of winter, which are of astonishing fury. A French force under La Houssaye sacked the Escorial in December, 1808, and carried away a large quantity of valuables.

ESQUIMEAUX.—A tribe of savages, who are supposed to have been identical with the modern Esquimeaux, appeared in West Greenland A.D. 1349, and destroyed several of the Norwegian settlers. In 1733 the Esquimeaux were visited by some Moravian Brethren, who established a mission in Labrador in 1752; but the missionaries were compelled to return, in consequence of the ill-feeling of the natives. A second attempt, made in 1764, proved more successful. Hearne discovered Esquimeaux near the Polar Sea in 1772, and MacKenzie in 1789.

ESQUIRE.—This title is of considerable antiquity, and, like armiger, scutifer, scutarius, and écuyer, is derived from the shield, and other portions of the knight's arms which the esquire used to carry. Selden states that it was first used to express the next rank below a knight, about A.D. 850, and it is said to have been applied to other persons than attendants upon knights as early as 1245.

ESSAYS AND REVIEWS.—This volume, which created much controversy, was published in 1860, and quickly went through several editions. It contained the following essays:—"The Education of the World," By Frederick Temple, D.D.—"Bunsen's Biblical Reséarches." By Rowland Williams, D.D.—"On the Study of the Evidences of Christianity." By Baden Powell, M.A.—"Séances Historiques de Genève."—"The National Church." By Henry Bristow Wilson, B.D.—"On the Mosaic Cosmogony." By C. W. Goodwin, M.A.—"Tendencies of Religious Thought in England, 1688—1750." By Mark Pattison, B.D.—"On the Interpretation of Scripture." By Benjamin Jowett, M.A.

ESSECK, or ESZEK (Austria), the capital of Slavonia, is built on the site of the ancient Mursia or Mursa. The Turks defeated the Germans in a great battle at this place in 1537. The fortress, commenced A.D. 1712, was completed in 1719.

ESSENES, or ESSENIANS.—A sect of ascetics which sprung up amongst the Jews after the return from the Babylonish captivity. They were also called Therapeutæ.

Some writers are of opinion that John the Baptist belonged to this sect.

ESSEQUIBO (South America).—Pinzon discovered this river A.D. 1499, and in 1580 the Dutch formed a settlement on its banks. This was captured by the English in 1796. It was restored to the Dutch in 1802. Having been recaptured Sept. 20, 1803, it was finally ceded to England by the convention signed with the Netherlands Aug. 13, 1814. (*See BRITISH GUIANA, DEMERARA, &c.*)

ESSEX (England).—At the time of the Roman invasion, this county was in the possession of the Trinobantes. Erchenwin, A.D. 527, established the Saxon kingdom of the name, which comprised Middlesex and part of Hertfordshire, and continued in existence until its incorporation with Wessex in 823. In 1381 the inhabitants rebelled under Wat Tyler to oppose the poll-tax; and, in 1659, Mr. Thomas Fanshaw incited them to rise in behalf of Charles II. Previous to 1832 Essex returned two members to parliament, but the number was then increased to four. The earldom of Essex was created by Queen Elizabeth in favour of Walter Devereux in 1572.

ESSEX CONSPIRACY.—Robert Devereux, second earl of Essex, having shown great want of judgment in his administration of Irish affairs during his government in 1599, suddenly returned to England without orders, in September, and was confined to his own house, and denied the privileges of his rank and functions in consequence. He was restored to freedom, but not to royal favour, Aug. 26, 1600, and was induced by his secretary Cuffe to conspire to remove his enemies from the royal councils. On Sunday, the 8th of February, 1601, he detained several of the council who were sent to question him, and was proclaimed a traitor, and compelled to surrender, after several lives had been lost in his defence. He and the earl of Southampton were arraigned for high treason, Feb. 19, and found guilty. Essex was executed on Tower Hill, Feb. 25.

ESTAPLES (France).—Peace between France and England was concluded at this town Sept. 3, 1492.

ESTE (House of).—In a Latin history of this house by Pignon, its origin is carried back as far as A.D. 418. Its most direct ancestor is Albert Azzo II., who was born about 996. In 1071, Guelf IV. established his authority in Bavaria, and thus founded the German branch of the family, and in 1176 Azzo V. acquired Ferrara by marriage, and thus became chief of the Guelfs of Venetia. The town of Este was destroyed by Ezzelin in 1247.

ESTHONIA, or ESTLAND (Russia).—This province, conquered by the Danes A.D. 1220, was sold by Denmark to the Teutonic Knights in 1346, and was given up to Sweden by the peace of Oliva, May 3, 1660. Peter the Great captured it in 1710, and it was ceded to Russia by the treaty of Nystadt, Aug. 30, 1721. It is sometimes called the province of Revel (*q. v.*).

ESTREMOZ (Battle).—The Portuguese defeated the Spaniards at this strongly-fortified town, in Portugal, A.D. 1663.

ETAMPES (France).—Clotaire II. was defeated near this ancient town, A.D. 604. The Northmen pillaged Etampes in 911. It suffered greatly during the religious wars.

ETCHING.—The inventor of this art is not known, but it was very early practised by Albert Durer, whose print of the "Canon," A.D. 1518, is perhaps the first example of its employment. Parmegiano, who died in 1540, is regarded by some as the inventor of etching. Henry Schwanhard discovered the art of etching on glass A.D. 1670.

ETHANDUNE (Battle).—Alfred defeated the Danes at Ethandune, supposed to be Eddington, near Westbury, A.D. 878.

ETHER is thought to have been known in some form to Paracelsus, who flourished A.D. 1520—1541. Basil Valentine obtained it in the 14th century by distilling alcohol and sulphuric acid, and in 1681 nitric ether was discovered by Kunkel. In Middleton's "Women beware Women," printed in 1657, the following passage occurs:—

"I'll imitate the pities of old surgeons
To this lost limb; who, ere they show their art,
Cast one asleep, then cut the diseased part."
Act iv. sc. 1.

Its preparation was, however, forgotten, until rediscovered by Navier in 1742. Nitric ether was first analyzed by Boullay and Dumas in 1828. Hydratic, or, as it is incorrectly termed, sulphuric ether, was discovered by Gay-Lussac in 1734, and acetic ether by the Count de Lauragnais in 1759. Muriatric ether was first obtained by Gehlen in 1804, ceranthic ether by Liebig and Pelouze in 1836, and real sulphuric ether by Wetherill in 1848.

ETHIOPIA (Africa), the Cush of the Scriptures. The term was applied to the extensive territories between the Red Sea and the Atlantic, and in a more restricted sense to the kingdom of Meroë.

B.C.

1615. The Ethiopians establish themselves to the south of Egypt.

941. Terah, king of Ethiopia, is defeated by Asa, at Mareshah.

769. Sebichus, or So, leads an immense army into Egypt, where he establishes an Ethiopian dynasty.

710. Tirhakah, king of Ethiopia, marches to the assistance of Hezekiah against Sennacherib, but returns, in consequence of the miraculous destruction of the Assyrian army.

630. A great migration of warriors from Egypt to Ethiopia takes place.

600. Ethiopia is invaded by Psammiss, king of Egypt.

524. Cambyzes leads an army of 50,000 men into Ethiopia, all of whom are buried beneath the burning sands of the desert.

225. Ptolemy Energetes I. extends his power in Ethiopia.

22. Candace, queen of Ethiopia, is defeated by Petronius.

ETHNOLOGY.—This science, which treats of the various races of mankind, owes its origin to the researches of Thunmann,

Schlæzer, Buhle, Klaproth, De Sacy, Ritter, &c. A society for its pursuit was established at Paris in 1839, and the Ethnological Society of London was founded by Dr. King in 1843.

ETON COLLEGE (Buckinghamshire) was founded by Henry VI., as the "College of the Blessed Marie of Eton by Wyndesore," Sept. 12, 1440. The charter was confirmed by act of parliament at Westminster, May 4, 1441. The original foundation was a provost, ten priests, four clerks, six choristers, twenty-five poor grammar-scholars, and a master to teach them, and the like number of poor men. It now consists of a provost, seven fellows, two conductors, seven clerks, seventy king's scholars, ten lay clerks, ten choristers, and a number of inferior officers and servants. The duke of Newcastle founded and endowed three scholarships of the annual value of £50 each in 1829, and Prince Albert instituted the annual prize of £50 for promoting the study of modern languages in 1842.

ETON MONTEM.—This triennial procession of the scholars of Eton College is thus described by Lyson (*Magna Britannia*, i. 557):—"The chief object of the celebrity is to collect money for *salt*, as the phrase is, from all persons present, and it is exacted even from passengers travelling the road. The scholars who collect the money are called salt-bearers, and are dressed in rich silk habits. . . . This ceremony has been frequently honoured with the presence of his majesty (George III.) and the royal family, whose liberal contributions, added to those of many of the nobility and others who have been educated at Eton and purposely attend the meeting, have so far augmented the collections, that it has been known to amount to more than £800. The sum so collected is given to the senior scholar who is going off to Cambridge, for his support at the university." The date of the institution of this practice is not known, but it is of very early origin. At first it was celebrated on the 6th of December; but in 1758 it was transferred to Whit-Tuesday. The ceremony was finally abolished May 25, 1847.

ETRURIA.—By the 5th article of the treaty of Luneville, Feb. 9, 1801, the duchy of Tuscany was raised into the kingdom of Etruria, and bestowed upon Louis, son of the duke of Parma, who began to exercise authority July 21 in the same year. Napoleon I. suppressed this kingdom, adding it to the kingdom of Italy in 1807.

ETRURIA (Staffordshire).—This village, manufactory, and mansion, were founded by Mr. Josiah Wedgwood, the eminent improver of British pottery, in 1771. His death occurred here in 1795.

ETRURIA, or TUSCIA (Italy), the modern Tuscany.

B.C.

800. The Etruscans settle in Campania.

538. They unite with the Carthaginians in an expedition against the Phœcean colonists of Corsica.

- B.C.
 522. They attack Cumæ.
 506. Defeat of Persenna at Aricia, by the Greeks and Romans.
 474. Hieron of Syracuse defeats an Etruscan fleet.
 453. The Syracusans ravage the coasts of Etruria.
 396. The Romans capture Veii.
 384. Dionysius of Syracuse invades Etruria.
 351. The Etruscans conclude a forty years' truce with the Romans.
 310. On the expiration of the truce, they sustain a serious defeat at the Vadimonian Lake.
 295. They are again defeated at Sentinum, in Umbria.
 283. The Romans are again victorious at the Vadimonian Lake.
 265. Etruria is finally reduced to a Roman province.
 89. The Etruscans receive the Roman franchise.
 41. Etruscan nationality is extinguished by the capture of Perugia.

EU (France).—This town was burned by Louis XI. to save it from the English, A.D. 1475, and was never restored. In 1578 the duke of Guise rebuilt the castle, which Louis Philippe improved and extended in 1821. Here the monarch received Queen Victoria and Prince Albert, Sept. 2, 1843. A series of grand entertainments were given, and the royal guests returned to England Sept. 7, 1843.

EUBŒA (Ægean Sea).—This island was invaded by the Athenians, who defeated the inhabitants of its chief city, Chalcis, and established a colony of 4,000 of their own countrymen, B.C. 506. The city of Eretria was destroyed by the Persians B.C. 490, and the island soon afterwards became subject to the Athenians. It revolted B.C. 445 and 411, and was in each case speedily reduced to tranquillity; but after the battle of Chæroneia, B.C. 338, it was seized by Philip of Macedon, whose descendants retained possession of it till the Romans restored it to independence, B.C. 194. An insurrection against the Turks broke out in Eubœa in 1822. (See NEGROPONT.)

EUCARIST. (See SUPPER OF THE LORD.)

EUCHITES, or MESSALIANS.—This sect, says Bingham (Antiq. iv. b. xi. c. 2, s. 5), "were so called from the Greek word *εὐχῆ*, *prayer*, and Messalians from the Syriac word *metsalach*, which is much of the same signification, because *they resolved all religion into prayer*." They arose in the 4th century.

EUGUBIAN, or EUGUBINE TABLES.—These tablets of brass were dug up between Cortona and Gubbio, the ancient Eugubium, A.D. 1444. The number of the tablets is seven, of which five contain Umbrian inscriptions mixed with Etruscan, and two contain Latin inscriptions. They are generally ascribed to the 4th century B.C.

EUNOMIANS.—The followers of Eunomius, who was made bishop of Cyzicus A.D. 360, were so called. They adopted the extreme tenets of Arianism. Theodosius I. published edicts against them in 394, by which they were forbidden to appoint bishops, and were declared incapable of inheriting property or making a will.

EUPATORIA, or KOSLOV (Crimea), the

ancient Pompeiopolis. The mosque of Devlet-Ghiri-Khan was built A.D. 1552. This town was taken by the Russians in 1726 and 1771. On the commencement of the Crimean war, it was occupied by the allied forces, Sept. 14, 1854, who repelled an attack of the Cossacks, Oct. 11. Omer Pasha defended it against a Russian force under General Chruleff, Feb. 17, 1855, and it was finally restored to the Russians May 31, 1856.

EUROPE.—The Phœnicians founded colonies in Europe between the 12th and 8th centuries B.C. The earliest notice of this quarter of the globe is found in the writings of the Greeks, who began to form settlements in the south of Europe in the 6th century B.C.

EURYMEDON (Battle).—Near this river of Asia Minor, Cimon, son of Miltiades, defeated a Persian fleet of 350 vessels, 200 of which he captured, B.C. 466. He also encountered the land forces of the Persians on the banks of this river later the same day, and completely routed them.

EUSTACE, ST. (Battle).—The rebels were defeated at this place, in Lower Canada, Dec. 14, 1837. The insurgents laid down their arms, and their leaders took to flight.

EUSTATIUS, ST. (West Indies), one of the Leeward islands, was colonized early in the 17th century by the Dutch, to whom it now belongs. It was taken and retaken several times during the 17th and 18th centuries. Admiral Rodney captured it Feb. 3, 1781. The French took it Nov. 26 in the same year. The English regained possession, and the island was finally transferred to the Dutch by the convention with Great Britain, signed at London Aug. 13, 1814.

EUTAW SPRINGS (Battle).—The Americans were defeated by the English in a severely-contested action at Eutaw Springs, in South Carolina, Sept. 8, 1781. The American army consisted of 4,000 men, and the English force was greatly superior in point of numbers.

EUTYCHIANS, the disciples of Eutyches, abbot of Constantinople, who began to publish his views respecting the nature of Christ A.D. 446. He taught that after his incarnation the Saviour only possessed one nature, compounded of Godhead and manhood. This doctrine was condemned by the council of Constantinople in 448, and Eutyches was deprived of his office; but the council of Ephesus in 449 declared him orthodox, and reinstated him in his dignity. His doctrines were, however, again condemned by the fourth general council, held at Chalcedon Oct. 8, 451.

EVANGELICAL ALLIANCE.—A conference was held at Liverpool in October, 1845, to consider the possibility of uniting all branches of the Christian church into one grand confederacy. Two meetings were held at the same town on the 16th of December following, to consider the proposed alliance, and a conference, composed of members from all parts

of the United Kingdom and several foreign countries, met at Freemasons' Hall, London, under the presidency of Sir Culling Eardley Smith, Aug. 19 to Sept. 2, 1846, when nine propositions were adopted as the basis of the union.

EVANGELISTS.—This term, formerly applied to all writers or preachers of the Gospel, is now generally confined to the writers of the four gospels, Matthew, Mark, Luke, and John. Matthew's gospel is assigned by different authorities to various dates between A.D. 38 and A.D. 64; Mark's to A.D. 65; Luke's to A.D. 63; and John's to A.D. 97.

EVESHAM (Battle).—Near this town, in Worcestershire, Prince Edward, afterwards Edward I. defeated the English barons under De Montfort, and released his father Henry III., who had been kept in captivity since the battle of Lewes. De Montfort and his son Henry were both killed in the battle, which was fought Aug. 4, 1265. (*See BARONS' WAR.*)

EVIL MAY-DAY. (*See APPRENTICES.*)

EXARCH.—An officer first appointed by Justinian I. as the representative in peace and war of the emperor of the Romans, A.D. 553. Narses, the first exarch, administered the entire kingdom of Italy, but the jurisdiction of his successors in the office was limited to the province of Ravenna (*q. v.*).

EXCHANGE. (*See BURSE.*)

EXCHEQUER (Comptroller-General of the).—On the suppression of the offices of auditor, tellers of the exchequer, and clerk of the pells, by 4 Will. IV. c. 15, s. 1 (May 22, 1834), the same act provided for the discharge of their respective functions by creating a comptroller-general, with a regular staff of clerks and assistants.

EXCHEQUER (Court of).—This court was appointed by William I. A.D. 1079, to take cognizance of matters connected with the revenue. It also exercised jurisdiction over common-plea suits until a separate court was erected for their decision by Magna Charta, in 1215. (*See COMMON PLEAS.*) The name was derived from the table at which its sittings were held, which is described as "a four-cornered board, about ten feet long and five feet broad, fitted in manner of a table to sit about; on every side whereof is a standing ledge, or border, four fingers broad. Upon this board is laid a cloth, bought in Easter term, which is of a black colour, rowed with streaks, distant about a foot or a span." On the squares of this chequered cloth counters were placed, to assist in making the needful computations. Barons of the exchequer were first appointed July 6, 1234, and chief barons March 8, 1312. By 9 Edw. III. st. 1, c. 5 (1335), justices of assize, &c. were ordered to send all their records to this court annually at Michaelmas, and by 31 Edw. III. st. 1, c. 12 (1357), the lord chancellor and lord treasurer were authorized to examine its erroneous judgments. (*See EXCHEQUER CHAMBER.*) By 5 Vict. c. 5, s. 1 (Oct. 5, 1841), the jurisdiction of the exchequer was

transferred to the court of Chancery. The office of cursitor baron of the exchequer was abolished by 19 & 20 Vict. c. 86 (July 29, 1856), and the practice and procedure on the revenue side of the court was amended by 22 & 23 Vict. c. 21, s. 9, *et seq.* (Aug. 13, 1859). By 6 Anne, c. 26 (1707), a court of exchequer was established in Scotland, which was abolished by 2 & 3 Will. IV. c. 54 (June 23, 1832).

CHIEF BARONS OF THE EXCHEQUER.

- A.D.
 1312. March 8. Walter de Norwich.
 1329. Feb. 22. John de Stonore.
 1329. Dec. 19. Henry le Scrope.
 1337. March 20. Robert de Sudington.
 1344. July 2. William de Shareshull.
 1345. Nov. 10. John de Stonford.
 1345. Dec. 8. Robert de Sadington (again).
 1350. April 7. Gervase de Wilford.
 1362. Feb. 12. William de Skipwith.
 1365. Oct. 29. Thomas de Lodelowe.
 1374. Feb. 3. William Tank.
 1375. Nov. 12. Henry de Asty.
 1380. Dec. 6. Robert de Plessington.
 1386. Nov. 5. John Cary.
 1388. April 24. Thomas Pynchebek.
 1389. May 12. John Cassy.
 1400. Nov. 15. John Cokayn.
 1413. May 2. William Lasingby.
 1419. Nov. 4. William Babington.
 1423. May 5. John Juyn.
 1436. Feb. 9. John Fray.
 1448. May 2. Peter Arderne.
 1462. Sept. 10. Sir Richard Hilingworth.
 1471. May 22. Sir Thomas Urswyke.
 1479. April 3. Sir William Nottingham.
 1483. June 15. Humphrey Starkey.
 1486. Oct. 29. William Hody.
 1513. Jan. 8. John Scott.
 1522. Feb. 8. John Fitz-James.
 1526. Jan. 24. Richard Broke.
 1529. May 12. Richard Lyster.
 1545. Nov. 11. Roger Cholmley.
 1552. May 21. Henry Bradshaw.
 1553. Sept. 1. David Brook.
 1558. March 2. Clement Heigham.
 1559. Jan. 22. Sir Edward Saunders.
 1577. Jan. 24. Sir Robert Bell.
 1577. Oct. 12. Sir John Jeffrey.
 1578. Nov. 17. Sir Roger Manwood.
 1593. Sir William Pervam.
 1604. Oct. 27. Sir Thomas Fleming.
 1607. June 25. Sir Lawrence Tanfield.
 1625. May 10. Sir John Walter.
 1631. Jan. 10. Sir Humphrey Davenport.
 1644. Jan. 25. Sir Richard Lane.
 1648. Oct. 12. John Wilde.
 1655. May 28. William Steele.
 1658. June 26. Sir Thomas Widdrington.
 1660. Jan. 17. John Wilde (again).
 1660. June 1. Sir Orlando Bridgman.
 1666. Nov. 7. Matthew Hale.
 1671. May 23. Sir Edward Turner.
 1676. April 12. William Montague.
 1686. April 21. Sir Edward Atkins.
 1689. April 17. Sir Robert Atkins.
 1695. June 10. Sir Edward Ward.
 1714. Nov. 20. Sir Samuel Dodd.
 1715. June 10. Sir Thomas Bury.
 1722. May 4. Sir James Montague.
 1723. Nov. 16. Sir Robert Eyre.
 1725. June 1. Sir Jeffrey Gilbert.
 1726. Oct. 22. Sir Thomas Pengelly.
 1730. April 28. Sir James Reynolds.
 1738. July 8. Sir John Comyns.
 1740. Nov. 28. Sir Edmund Probyn.
 1742. Dec. 4. Sir Thomas Parker.
 1772. Oct. 28. Sir Sidney Stafford Smythe.
 1777. Nov. 29. Sir John Skynner.
 1787. Jan. 26. Sir James Eyre.
 1793. Feb. 14. Sir Archibald Macdonald.

- A.D.
 1814. Sir Alexander Thompson.
 1817. April 22. Sir Richard Richards.
 1824. Jan. 31. Sir William Alexander.
 1831. John, Baron Lynchurst.
 1834. Dec. Sir James Scarlett, afterwards Baron Abinger.
 1844. Sir Frederick Pollock.

CHIEF BARONS FOR IRELAND, SINCE THE REVOLUTION.

- A.D.
 1690. Dec. 5. Sir John Hely.
 1695. May 10. Robert Doyne.
 1703. Dec. 27. Nehemiah Donnellan.
 1706. June 25. Richard Freeman.
 1707. June 12. Robert Rochfort.
 1714. Oct. 14. Joseph Deane.
 1715. June 16. Geoffrey Gilbert.
 1722. June 9. Bernard Hale.
 1725. Sept. 2. Thomas Dalton.
 1730. Sept. 29. Thomas Marlay.
 1741. Dec. 21. John Bowes.
 1757. March 11. Edward Willes.
 1766. Sept. 5. Anthony Foster.
 1777. July 3. James Dennis, afterwards Baron Tracton.
 1782. July 2. Walter Hussey Burgh.
 1783. Nov. 29. Barry Yelverton, afterwards Viscount Avonmore.
 1805. Oct. 5. Standish O'Grady, afterwards Viscount Guillamore.
 1831. Jan. 6. Henry Joy.
 1838. July 20. Stephen Woulfe.
 1840. Feb. 11. Maziere Brady.
 1846. Sept. 1. David Richard Pigot.

EXCHEQUER (Tellers of the).—These officers existed as early as A.D. 1189, in which year they were ten in number, though they were afterwards reduced to four. They were abolished by 4 & 5 Will. IV. c. 15, s. 1 (May 22, 1834).

EXCHEQUER BILLS first appeared A.D. 1696, since which time they have been issued annually. Their first circulation by the Bank of England was in 1706. Double-day ("Financial History of England," p. 77) defines them as "nothing more than promissory notes *due at certain dates*, and bearing interest, issued by government when in want of money."

EXCHEQUER CHAMBER.—This court was erected by 31 Edw. III. st. 1, c. 12 (1357), to discuss questions which other courts find doubtful, and to serve as a tribunal of appeal from the court of Exchequer. By 27 Eliz. c. 8 (1585), its jurisdiction was extended over erroneous judgments in the court of King's Bench, and it was confirmed and further regulated by 31 Eliz. c. 1 (1589). The constitution of this court was again altered by 11 Geo. IV. & 1 Will. IV. c. 70, s. 8 (July 23, 1830).

EXCISE, or a duty levied upon articles of consumption, produced within the state in which the tax is levied, was introduced at Rome by Augustus, after the civil wars, B.C. 28. Gibbon says it seldom exceeded one per cent, that it was temporarily reduced one half by Tiberius, after the annexation of Cappadocia, A.D. 15, and that it was altogether abolished by Caligula (A.D. 37–41). An attempt, made in 1626, to introduce excise duties into England, proved unsuccessful. The Long Parliament levied the first

excise duties in England, May 16, 1643. Wines, ale, beer, cider, perry, and tobacco were the articles taxed. By 12 Charles II. c. 24 (1660), excise duties were levied as part of the revenues of the crown. The malt duty was first levied in 1695. A large number of articles on which excise was formerly levied are now exempted. The old Excise Office was built on the site of Gresham College in 1774. In 1823, the Irish and Scotch Boards of Excise were incorporated with the English establishment. The Board of Excise was incorporated with that of Stamps and Taxes, under the name of Board of Inland Revenue, by 12 Vict. c. 1 (Feb. 27, 1849).

EXCLUSION BILL.—The first Exclusion bill committed in the House of Commons, May 21, 1679, by 207 against 123, was lost by the dissolution of that parliament, May 27. A second measure "for securing the Protestant religion by disabling James, duke of York, to inherit the imperial crown of this realm," passed the House of Commons Nov. 11, 1680; and was rejected in the House of Lords, on the motion for its first reading, Nov. 15. Charles II. sent a message to the Commons, refusing to pass a bill of exclusion, Jan. 7, 1681. In the new parliament summoned to meet at Oxford, March 21, 1681, the Commons ordered, March 28, that the bill for excluding James, duke of York, was to be read a third time the next day. Charles II. at once dissolved the parliament, stating, "as we are not likely to have a good end, when the divisions at the beginning are such."

EXCOMMUNICATION, as an ecclesiastical punishment, is of two kinds, the major or greater, and the less. The major excommunication is also called anathema (*q. v.*). The lesser excommunication consisted in excluding persons from the participation of the Eucharist, and prayers of the faithful. The following are the most celebrated instances in which excommunication has been pronounced by the popes. When levied against an entire state, it is termed an interdict.

- A.D.
 535. Baronius asserts that Agapetus threatened to put France under an interdict, because of a murder committed by King Clotaire. This account is rejected as a fable.
 998. Gregory V. excommunicates Robert, king of France.
 1077. Gregory VII. excommunicates the emperor Henry IV. (*See CANOSSA.*)
 1160. Interdicts are said, by some authorities, to have become frequent from the time of Alexander III.
 1208. March 23. Innocent III. places England under an interdict, which is removed Dec. 6, 1213.
 1227. Gregory IX. excommunicates the emperor Frederick II. The excommunication is repeated in 1229, and the ban is removed in 1229.
 1239. Gregory IX. again excommunicates the emperor Frederick II.
 1245. July 17. The emperor Frederick II. is excommunicated at the 13th General Council at Lyons.
 1510. Julius II. excommunicates Louis XII. of France.

- A.D.
 1538. Dec. 17. Paul III. publishes a bull, dated Aug. 31, 1535, excommunicating and deposing Henry VIII. of England.
 1559. Paul IV. denies the right of Elizabeth to the English crown.
 1570. April 25. Pius V. publishes a bull declaring Elizabeth of England an usurper.
 1860. March 29. Pius IX. excommunicates all persons concerned in the rebellion, invasion, and usurpation of the Romagna. This sentence includes Napoleon III. and Victor Emmanuel of Sardinia.]

EXCURSION TRAINS were first started in England on Easter-Monday, April 8, 1844.

EXECUTIONS.—In 1039 the executioner is mentioned as a person of exalted rank, and even now the sheriff is nominally the finisher of the law by virtue of his office. Harrison's "Description of Great Britain," printed in 1577, states that 72,000 rogues and thieves suffered death in the reign of Henry VIII. that is, about 2,000 a year. By 9 Geo. IV. c. 31, s. 4 (June 27, 1828), the time for the execution of a murderer was fixed for the next day but one from that on which he received sentence. This was repealed by 6 & 7 Will. IV. c. 30 (July 14, 1836).

Date.	Name.	Crime.	Place of Execution.
1700. Aug. 22	Rev. T. Hunter	Murder	Edinburgh.

1860. Sept. 4	William G. Youngman	Ditto	Horsemonger Lane.
1860. Nov. 19	James Mullins	Ditto	Old Bailey.
1861. April 5	The brothers Wedmore	Ditto	Taunton.
1861. Aug. 27	Martin Doyle	Attempt to murder ..	Chester.
1861. Sept. 19	Peter Masterson	Murder	Maidstone.

* Twelve persons were killed, and upwards of twenty seriously injured, from the excessive crowding at this execution.

EXECUTORS were appointed in Greece and Rome. They are often mentioned in Anglo-Saxon wills. Mention is made in the Rotuli Parl. of the executors of the will of Bishop John of Kyrkeby, A.D. 1290.

EXETER (Devonshire).—This city is probably one of the oldest in England, some authorities ascribing its foundation to Corinnaeus, nephew of the mythic Brutus, B.C. 1100, while others state that it was built by Vespasian A.D. 49. But as it was anciently

called by British names, such as Pancair, the chief city; Caer-Iso, the city of the Iso or Exe; and Caer-Rydh, the city of the red soil, it was most probably settled by the Britons previous to the Roman invasion.

B.C.

54. Rougemont Castle is said to have been founded by Julius Caesar this year.

A.D.

633. Penda, king of Mercia, besieges Exeter.

868. Ethelred founds a monastery here:

- A.D.
 876. The Danes winter in Exeter.
 894. Alfred compels the Danes to raise the siege of the city.
 918. Edward the Elder holds a witenagemot at Exeter.
 932. Athelstan founds a monastery.
 1003. It is totally destroyed by Sweyn, king of Denmark.
 1050. Edward the Confessor and his queen Edith visit Exeter, and found a cathedral.
 1067. The inhabitants rebel against William the Conqueror, who besieges and takes the city.
 1112. The cathedral is founded by Bishop Warlewast.
 1140. The city surrenders to King Stephen, after a siege of three months, during which the cathedral was demolished.
 1200. The city is incorporated.
 1239. The priory of St. John the Baptist is founded.
 1250. A bridge is built over the Exe.
 1280. Bishop Lincoln rebuilds the cathedral.
 1286. Edward I. and his queen hold their Christmas revels here.
 1354. The first recorder is elected.
 1357. The inhabitants entertain the Black Prince and King John of France, after the battle of Poitiers.
 1463. Nine aldermen are appointed by Edward IV.
 1469. Exeter is besieged by the Yorkists, under Sir Hugh Courtenay.
 1497. Perkin Warbeck lays siege to Exeter.
 1536. Aug. 3. Exeter is erected into a separate county.
 1549. July 2. It is besieged by the Cornish rebels, who are compelled to withdraw Aug. 6, which day is still observed as an annual festival.
 1555. The first chamberlain of the city is elected.
 1558. Elizabeth grants the city "*Semper fidelis*" as its motto, for its fidelity during the Spanish invasion.
 1593. The Guildhall is erected.
 1643. Sept. 5. The royalists, under Prince Maurice, take Exeter.
 1646. April 9. The city surrenders to Sir Thomas Fairfax.
 1688. Nov. 8. William III. makes his public entry into Exeter.
 1696. William III. establishes a mint here.
 1725. The Topsham canal is completed.
 1738. Oct. 18. The duke of Marlborough reviews the troops here.
 1770. A new bridge is commenced, which is destroyed by a flood in 1775.
 1773. The castle is partially demolished, and the assize-hall built.
 1778. Exe bridge is opened.
 1789. Aug. George III. visits Exeter.
 1796. The gaol is built.
 1801. St. Thomas's Lunatic Asylum is founded.
 1807. The Bridewell is founded.
 1813. The Devon and Exeter Institution is founded.
 1817. Exeter is first lighted with gas.
 1819. The city prison is erected.
 1820. The Royal Subscription-rooms are built.
 1821. The public baths are opened.
 1825. The Mechanics' Institute is established.
 1835. The Western market is built, the Athenæum instituted, and the water-works are completed.
 1838. July. The Eastern market is opened.
 1844. May 1. The Bristol and Exeter railway is opened.
 1847. The Polytechnic Institution is founded.
 April 27. A destructive fire occurs. May 14. A serious food riot takes place.
 1848. May 5. The South Devon railway is opened.
 1849. The post-office is erected.

EXETER (See of).—On the erection of the see of Winchester, A.D. 660, its ecclesiastical jurisdiction extended over all the west of England; but in 705 Devon and Cornwall were formed into the separate diocese of

Sherborne. In 909 Edward the Elder created the sees of Wells, Cornwall, and Devonshire, the two latter of which were united in 1040, and in 1050 the see was transferred from Crediton to Exeter. The Scilly Isles were declared within this diocese July 30, 1838.

EXETER CHANGE (London) is mentioned as a recent erection by De Laune in "The Present State of London, &c.," published in 1681. It was designed for the use of milliners, hosiers, &c.; but did not answer; in consequence of which it was subsequently used as a menagerie by Mr. Cross. The elephant "Chunee" was shot here in March, 1826, and the old building was pulled down in 1829. New Exeter Change, otherwise Wellington Arcade, was completed in 1845, from the designs of Mr. Sydney Smirke.

EXETER COLLEGE (Oxford).—This college was founded A.D. 1314, by Walter of Stapledon, bishop of Exeter, by whom it was called Stapledon Hall. Two new fellowships for the diocese of Salisbury were added in 1404 by Edmund Stafford, bishop of Exeter, from whom the college received its present name, and in 1565 Sir William Petre added eight fellowships. Charles I. founded a fellowship for the islands of Jersey and Guernsey in 1636, and in 1770 Mrs. Shiers bequeathed certain rents, which were devoted to the purpose of forming two additional fellowships for Hereford and Surrey. These arrangements were amended by 17 & 18 Vict. c. 81 (Aug. 7, 1854).

EXETER HALL (London).—This building was erected in the Strand by Gandy Deering, during the years 1830 and 1831. It was intended for public meetings on religious and charitable matters; but has since been used as a concert-room for sacred music. A series of Sunday evening services was commenced here by clergymen of the Church of England, under the sanction of the bishop of London, May 24, 1857; but it was discontinued in consequence of the opposition of the incumbent of the parish, Nov. 6. The Dis-senters commenced a similar course Nov. 22. A very large meeting of the Sons of the Phoenix, a body of teetotallers, formed into societies called lodges, like those of benefit societies, was held here Nov. 9, 1859.

EXHIBITION.—The idea of collecting objects of industrial manufacture first occurred to the marquis d'Avèze, A.D. 1797; but he was unable to carry it out until 1798, when he opened what is termed in France an "exposition" of French goods. The undertaking proved so successful that the idea was adopted by the French government, and similar collections were exhibited in 1801, 1802, 1806, 1819, 1823, 1827, 1834, and since then every five years. A similar exhibition was opened at Ghent in 1820, at Berlin in 1834, and at Vienna in 1835. This led to the idea of a general exhibition, in which different nations appeared as competitors. The first on this extended scale was the Great Exhibition (q. v.), held in London in 1851.

At Cork	A.D. 1852	At Calcutta	A.D. 1855
At Dublin	1853	At Manchester	1857
At Paris	1855	At Florence	1861

EXILES (Battle).—The Austrians and Sardinians defeated the French and Spaniards at this place, near Mont Cenis, July 19, 1747. The French republican army failed in an attack upon the fort of Exiles in 1794.

EXODUS of the Israelites from Egypt occurred, according to the best authorities, B.C. 1491. The Exodus, the second of the five books of Moses, contains a full account of the departure of the Israelites from Egypt.

EXORCISTS, or persons who professed to possess the art of expelling evil spirits, existed in very ancient times, both among heathen and Christian nations. They were constituted an order in the Church towards the end of the 3rd century, when exorcism was added to baptism.

EXTREME UNCTION.—This ceremony of anointing persons on the point of death with oil, originated in the 7th century. In the 10th century the clergy contended that if it did not benefit the body it was of great service to the soul, and this doctrine was generally accepted in the 12th century. Eugenius IV., at the council of Florence (A.D. 1439—1442), decreed it to be a sacrament. This was confirmed by the council of Trent (1545—1563).

EYLAU (Battle).—Napoleon I. defeated the Russian army under Benningsen at this Prussian town, Feb. 8, 1807. The action was commenced by Augereau, whose division was defeated with immense slaughter; but Napoleon coming to the rescue, the fortunes of the day were retrieved, and the Russians compelled to retire to Königsberg. The loss of life was unusually great, though from the discrepancy in the reports it is difficult to arrive at a positive conclusion. Alison (ch. xlv. s. 74) says: "On the side of the Russians twenty-five thousand had fallen, of whom above seven thousand were already no more; on that of the French upwards of thirty thousand were killed or wounded, and nearly ten thousand had left their colours, under pretence of attending to the wounded, and did not make their appearance for several days afterwards."

F.

FABIANO, ST. (Battle).—John of Anjou, during his invasion of Naples, defeated Alexander Sforza and the count of Urbino, the generals of Ferdinand I., in a hotly-contested battle at St. Fabiano, July 1, 1460.

FACTORY.—The first fire-proof cotton factory was erected at Belper by the Messrs. Strutt in 1797. By the Factory Act (3 & 4 Will. IV. c. 103, Aug. 29, 1833), persons under eighteen years of age, and women, were prohibited from working more than twelve hours a day; and the employment of children under nine years was altogether abolished. This Act was amended by 7 & 8 Vict. c. 15 (June 6, 1844), which ordered

that all machinery should be guarded to prevent accidents; that eight, not nine, years should be the earliest age at which children could work in factories; that their hours of labour should not exceed six hours and a half a day; and that they should attend school daily. These acts were amended by 10 & 11 Vict. c. 29 (June 8, 1847), and by 13 & 14 Vict. c. 54 (Aug. 5, 1850).

FAENZA (Italy), the ancient Faventia, was the scene of the defeat of Carbo and Norbanus by Metellus, B.C. 82. It submitted to the emperor Frederick II. A.D. 1162. Frederick III. captured it, after an obstinate siege, in 1240. Rodolph I. confirmed the pope in its possession in 1275. The Bolognese seized it in 1282, and its walls were restored in 1286. Cæsar Borgia wrested it from the Manfredi in 1501, and it soon after passed into the possession of Venice (1504). The papal authorities recovered it in 1509, and it submitted to the French in 1512. It was, however, restored to the popes, and was annexed to the kingdom of Sardinia in 1859.

FÆSULÆ (Italy), the modern Fiesole, was devastated during the social war, B.C. 90 and 89. Belisarius captured it after a long siege A.D. 539, and the Florentines are said to have destroyed it A.D. 1010.

FAIRLOP OAK (Essex).—This celebrated oak, which formerly existed in Hainault Forest, was so old that, according to Mr. Gilpin, "the traditions of the country traced it halfway up the Christian æra." About the year 1728, Mr. Day, of Wapping, commenced the custom of dining here every year with a party of friends. Other parties joined him in these annual picnics, until at length the company became so numerous that the gathering assumed the character of a regular fair, recurring the first Friday in July. Mr. Day died in 1767, and was buried in a coffin made of wood from his favourite oak. In 1805 the tree was accidentally set on fire. The trunk and most of the principal branches were seriously injured, and in 1820 it was blown down. The trunk of this celebrated oak measured 36 feet in girth, and its branches covered an area of 300 feet in circumference.

FAIRS were established in Italy about A.D. 500, and at Aix-la-Chapelle and Troyes about 800. Alfred the Great introduced them into England in 886, and in 960 they were established in Flanders. Fairs for the sale of slaves were common throughout Germany and the north of Europe about 1000; and in 1071 they were encouraged in England by William the Conqueror. By 2 Edw. III. c. 15 (1328), it was enacted that the duration of fairs should always be declared at their commencement; and by 5 Edw. III. c. 5 (1331), any trader carrying on business after the stipulated time was to forfeit double the value of the goods sold. Disputes at fairs were adjusted at the courts of Pié-poudre, or dusty-foot, which were regulated by 17 Edw. IV. c. 2 (1477). The

time for holding fairs was specified by 27 Hen. VI. c. 5 (1443), which prohibited them on certain feast-days, and on all Sundays except the four in harvest time. This exception was repealed by 13 Vict. c. 23 (June 10, 1850).

FAISANS.—This island, in the river Bidassoa, that separates France from Spain, was the scene of conferences for peace between Philip IV. and Louis XIV. in 1659. The result was the peace of the Pyrenees, signed Nov. 7, 1659. From this circumstance the place was also called the Isle of the Conferences.

FAITH AND CHARITY (Knights of).—Established in France, to suppress public robberies, about A.D. 1230. They were approved by Gregory IX.

FALAISE (France).—Celebrated as the ancient seat of the dukes of Normandy. William I. was born here A.D. 1027, and a statue was erected to his memory Oct. 26, 1851. Falaise received its charter from Philip Augustus in 1207. Prince Arthur was imprisoned at Falaise, whence he was removed to Rouen in 1202.

FALCZI, or PRUTH (Peace of).—Peter the Great having invaded Moldavia, A.D. 1711, with a force of 38,000 men, was surrounded by a Turkish army of 200,000 men at Falczi, on the Pruth, and reduced to despair. The empress Catherine, who was with him, restored his confidence, and negotiations were commenced between the two powers, which resulted in the signing of this peace, July 10, 1711. Its chief conditions were the surrender by the czar of the fortress of Azof, the dismantling of his newly-built castles near the Turkish frontier, and an engagement on his part not to interfere in the affairs of Poland or of the Cossacks.

FALERII (Italy).—Its inhabitants joined the Fidenates and Veientes against Rome, B.C. 437. Camillus took the city B.C. 394. They made war against Rome B.C. 356 and B.C. 293. The city was taken and destroyed by the Romans B.C. 241.

FALERNIAN WINE, so called from Falernus Ager, the district in which it was produced. This district was ravaged by the Carthaginians B.C. 217. Some writers suppose that a town named Faleria once existed in this part, though no evidence of the fact has been adduced. The best Falernian wine was that produced at the village of Faustianum.

FALKIÖPING (Battle).—Margaret, queen of Norway and Denmark, called the Semiramis of the North, defeated Albert of Sweden at this place A.D. 1389.

FALKIRK (Battles).—The Scottish army under Sir William Wallace was surprised by the English, under Edward I., in the forest of Falkirk, in Stirlingshire, July 22, 1298. As Wallace was doubtful of the fidelity of some of his troops, he wished to avoid an action; but finding it impossible, he chose an advantageous position. Just as the two armies joined, his heavy cavalry fled without striking a blow, and he was completely defeated, with the loss of at least 15,000 men.—The royalist

forces, under General Hawley, were defeated at Falkirk Muir by the Scotch, under Prince Charles Edward, Jan. 17, 1746. The English loss amounted to less than 400 in killed and wounded, and that of the Scotch to about 120.

FALKLAND ISLANDS (South Atlantic Ocean).—Although it is sometimes asserted that these islands were described by Amerigo Vespucci, A.D. 1502, they were in truth discovered by Davis, A.D. 1592. In 1594, Hawkins explored their northern shores, and in 1690 they were visited by Strong, who anchored in Falkland Sound, to which he gave its name. M. de Bougainville arrived here Feb. 3, 1764, and planted a French settlement March 17; and Commodore Byron discovered Port Egmont in 1766, and took possession of the country by the name of Falkland's Islands. In 1767 the French ceded their claim to the Spaniards, who expelled the British in 1770, but were compelled to admit their right to the sovereignty of the islands by treaty, Jan. 22, 1771. As no attempts were made to establish an English settlement, the republic of Buenos Ayres planted a colony at Port Louis in 1820. This was destroyed by the Americans in 1831, and in 1833 was erected into a British station. In 1840 the government sent out a colony to Port Louis. It was removed to another situation in 1844.

FALMOUTH (Cornwall) was originally called Smithick. In 1613, Sir John Killigrew formed the project of erecting a town here, which received its charter and present name from Charles II. in 1661. In 1670, Sir Peter Killigrew built a new quay, which greatly added to the commercial importance of the town; and in 1688 its prosperity was increased by the establishment of the post-office packet to Lisbon and the West Indies. The hospital for disabled seamen was founded in 1750, and the gaol in 1831. Queen Victoria visited Falmouth Aug. 28, 1843.

FAMAGOSTA, or FAMAGUSTA.—This town, in the island of Cyprus, was taken by the Genoese A.D. 1373, and by the Turks Aug. 1, 1571.

FAMARS (Battle).—The allied army attacked the intrenched camp of the French at Famars, near Valenciennes, May 23, 1793. The French, who suffered considerably, retired during the night.

FAMILY COMPACT, between the Bourbons of France and Spain (Louis XV. and Charles III.), was concluded at Paris, Aug. 15, 1761. It was, in fact, a defensive and offensive alliance between France and Spain. Ferdinand IV., king of Naples, acceded to the alliance.

FAMILY OF LOVE. (See AGAPÆMONÆ.)

FAMINES. (See INDEX.)

FAN.—Pharaoh is represented surrounded by his fan-bearers on the walls of the tombs of Thebes. Fans of peacock's feathers were made in Greece in the 5th century B.C., and are mentioned in one of the tragedies of Euripides. The custom of using fans was introduced into England during the reign of Henry VIII., and in 1523 they were carried in winter as

well as in summer. The ladies had prodigious fans, with handles half a yard long, and with these they often administered correction to their daughters. During the 16th and 17th centuries they were used by gentlemen. Sir Edward Coke rode the circuit with one of these large fans. Folding fans were introduced in the beginning of the 17th century.

FANO (Battle).—The Alemanni defeated the Romans near this town, the ancient *Fanum Fortunæ*, in Umbria, A.D. 270.

FARCE.—One of the earliest extant is in German, called the "Apotheosis of Pope Joan," and was written about A.D. 1480. The French farce of "Maitre Patelin" was first printed in 1490.

FARMERS-GENERAL, or FERMIERS GÉNÉRAUX.—This company, which farmed certain branches of the revenue in France under the old monarchy, was formed A.D. 1728. The system was abolished in 1789.

FARNHAM (Surrey).—In 860 this town was bestowed upon the bishops of Winchester by Ethelbald, king of Wessex, and in 893 Alfred defeated the Danes in its neighbourhood. Waverley Abbey was built by Gifford, bishop of Winchester, in 1128. The castle, which was founded by Henry de Blois, bishop of Winchester (1129–1171), was taken by Louis the dauphin in 1216, and demolished by Henry III. In December, 1642, it was seized by the Parliamentary forces and again destroyed; but Bishop Morley commenced its re-erection in 1662. Farnham is celebrated as the birthplace of William Cobbett, March, 1762. Until about 1790 it exercised the rights of a borough.

FARNOVIANS.—The followers of Stanislaus Farnowski (Farnovius), who separated from the Unitarians A.D. 1568. The sect became extinct on the death of Farnowski in 1615.

FAROE, or FEROE ISLANDS (North Sea).—This group, discovered by the Norwegians between A.D. 858–868, now belongs to Denmark.

FARRINGTON MARKET (London).—The corporation were empowered by act of parliament in 1824, to remove the Fleet Market (*q.v.*) and erect a new one in its place. This was opened Nov. 20, 1829, under the name of Farringdon Market.

FARTHING.—This coin existed among the Anglo-Saxons, though no specimen remains. Farthings were first coined round A.D. 1210, when King John ordered a large number to be struck for use in England and Ireland. In 1279 they were called *Lundrenses*, and until the reign of Edward VI. were made of silver. The want of a small coinage subsequently led to the manufacture and issue, by private persons, of leaden farthing tokens, which were suppressed by a royal proclamation, May 19, 1613. A few copper farthings were struck in 1665, but they were not issued till 1672. Tin farthings were coined by William II. and Mary in 1690. Half-farthings were first struck in 1843.

FARTHINGALE, or VERDINGALE.—This hooped petticoat, to which the modern cri-

noline bears a strong resemblance, was introduced into England in the reign of Elizabeth. It was superseded by the hoop, which went out of fashion about 1820.

FASTS.—Moses fasted forty days and forty nights on Mount Horeb (Exodus xxiv. 18, and Deut. ix. 9), B.C. 1491, and abstinence was one rule for observing the day of atonement (Lev. xxiii. 26–32), B.C. 1490. In consequence of the preaching of Jonah, the king of Nineveh proclaimed a solemn fast for both man and beast (Jonah iii. 5–9), B.C. 787, and Joel ordered a fast, in which even unweaned infants should participate (Joel ii. 15–17), B.C. 787. Our Saviour fasted forty days and forty nights (Matt. iv. 2), A.D. 26, and Barnabas and Saul were ordained to the ministry with fasting (Acts xiii. 2), A.D. 45. Mosheim, writing of the first century, says: "Of any solemn *public* fasts, except only on the anniversary day of Christ's crucifixion, there is no mention in the most ancient times. Gradually, however, stated days of fasting were introduced; first by custom, afterwards by legal sanction. Whether anything of this nature occurred in the first century, and what days were devoted to fasting, we have not the means of deciding." The custom of fasting every Wednesday and Friday became general about 111, and the Quadragesimal fast, or Lent (*q.v.*), was appointed about 136. The custom of holding special fasts was introduced before 173, and the fasting system in general was fully established in 222.—For important special fasts, see ENGLAND.

FATIMITES. (See SHIITES.)

FAYAL (Atlantic), one of the Azores, was captured by Sir Walter Raleigh A.D. 1597.

FEASTS and FESTIVALS.—The principal feasts of the ancient Jews were the Passover, instituted B.C. 1491 (Exod. xii. 43–49); the feast of Weeks or Pentecost, B.C. 1491 (Exod. xxxiv. 22); of Trumpets, B.C. 1490 (Lev. xxiii. 24–25); of Tabernacles, B.C. 1490 (Lev. xxiii. 39–43); and the Jubilee, B.C. 1490 (Lev. xxv. 10–13). The love-feasts of the primitive Christians were instituted about A.D. 35; and Easter, Ascension, and Whitsuntide are believed to have been observed since 68. Mamertus, bishop of Vienne, instituted the solemn processions called Rogations in 469; the feast of the Purification was established about 526. Boniface IV. instituted the festival of All Saints in 611, and the Greek Church founded the festival of Orthodoxy in 842. Urban IV. instituted the feast of Corpus Domini, in favour of the doctrine of transubstantiation, in 1264, and Boniface VIII. founded jubilees in 1300. The festival of the Holy Trinity was first observed in 1320, that of the Spear and Nails in 1354, and the feast of the Visitation in 1389. The council of Basel confirmed the festival of the Immaculate Conception in 1431, and the feast of the Transfiguration was generally observed in 1456, though it was founded much earlier. In 1643 Urban VIII. published a bull to diminish the number of festivals, and in 1745 Benedict

XIV. sanctioned the celebration of the feast of the Seven Joys of the Virgin Mary.

FEATHERS.—Sir H. N. Nicolas is of opinion that the prince of Wales' feathers and the mottoes, "*Ich Dien*" and "*Hou-mont*" were derived from the house of Hainault, possibly from the comté of Ostrevant, the appanage of the eldest sons of the counts of that province.

FEBRUARY, the second month of the year, was, with January, added to the calendar about B.C. 700, by Numa, who placed January at the beginning, and February at the end of the year. The decemvirs placed February next to January, B.C. 452. Its name is supposed to be derived from the ancient Roman festival Februa.

FECIALES.—The heralds of ancient Rome, whose duty it was to declare war and proclaim peace. On the occasion of a dispute with another power, they made three appeals, with an interval of ten days between each, and if the matter was not then adjusted, they declared war by throwing a bloody javelin into the enemy's territory. They were instituted by Numa Pompilius (B.C. 716—673), and received a code and laws from Ancus Martius (B.C. 640—616).

FEELJEE, or FIJI ISLANDS (Pacific), were discovered by Abel Jansen Tasman in 1643, and named by him Prince William's Islands. They have been the scene of some successful missionary labours during the present century.

FEBRELLIN (Battle).—The Swedes were defeated by the Germans at this place, in Brandenburg, A.D. 1675.

FELDKIRCH.—The French, under Massena and Oudinot, failed in several attempts to wrest this town, in the Grisons, from the Austrians, in March, 1799. It fell into the hands of the French in 1800.

FENCING.—In consequence of the disorders perpetrated by proficients in this art in the reign of Edward I., all the fencing-schools in London were ordered to be closed by 13 Edw. I. st. 5 (1285). The old system of cutting in fencing was supplanted by the rapier-thrust in Italy before 1553, and the new method was introduced into England in 1578.

FÈRE-CHAMPENOISE (Battle).—The Austrians, under Prince Schwarzenberg, attacked and defeated the French divisions of marshals Marmont, Mortier, and Arrighi, at this place, in France, March 25, 1814. The French loss amounted to 5,000 killed and 10,000 prisoners, among whom were the generals Pachtod and Arney.

FERENTINUM (Italy).—The Volscians took refuge in this town after their defeat by the Romans, B.C. 413. It was afterwards given to the Hernicians. The Romans captured it B.C. 361, and Hannibal ravaged the territory B.C. 211. The modern town, called Ferentino, was the scene of a meeting between the emperor Frederick II., Pope Honorius III., and other rulers, in March, A.D. 1223, in favour of the fifth crusade.

FÈRIE LATINÆ.—An annual festival held

in commemoration of the union of the peoples of Latium. It was celebrated in March, May, or June, and consisted of the offering of sacrifices to Jupiter by all the tribes of the alliance. Some authors state that Tarquin the Proud founded this festival (B.C. 534—510); others consider it of earlier origin. At first it lasted one day; on the expulsion of the kings, B.C. 510, a second day was added to commemorate the event, and a third was afterwards added.

FERNANDO Po (Bight of Benin) was discovered A.D. 1471, by the Portuguese, who ceded it to Spain in 1778. The Spaniards abandoned it, and the English formed a settlement in 1827. They retired in 1834, and the Spaniards again took possession in 1844, calling the island Puerto de Isabel.

FERNs (See of).—This Irish bishopric was founded about A.D. 598 by St. Edan. Its earlier prelates were styled archbishops of Leinster. In 1600 the see of Leighlin was annexed to Ferns. By 3 & 4 Will. IV. c. 37 (Aug. 14, 1833), the sees of Ferns and Leighlin were to be added to Ossory on their next avoidance, which took place on the death of Bishop Elrington in 1835.

FEROZESHAH (Battle).—Lord Gough defeated the Sikhs at this village, in Lahore, Dec. 21 and 22, 1845. The British force consisted of 16,700 men and 69 guns, and the Sikhs mustered about 50,000 men, with 108 pieces of cannon, of which nearly all were captured. The English lost 2,415 in killed and wounded during the two days.

FERRARA (Italy).—This town was founded in the 5th century, and fortified about A.D. 585. It was made a bishopric in 661, and an archbishopric in 1735. In 1067 it became a free city, joined the Lombard League against the emperor Frederick I., in 1175, and soon after passed under the sway of the house of Este. Venice seized Ferrara in 1308, and Clement V. claimed it as a fief of the Church in 1309. The Este family regained possession, and Ferrara was made a duchy by Paul II., April 14, 1471, and was annexed to the papal dominions in 1597. It surrendered to the French June 19, 1796, was retaken by the allies May 24, 1799, and was once more resigned to France by the treaty of Luneville, Feb. 9, 1801. Restored to the pope in 1814-15, its inhabitants revolted in 1860, and Ferrara became part of the new Italian kingdom. It was nearly destroyed by an earthquake in November, 1570. The cathedral was founded in 1135, the university in 1390, and the library in 1740. Treaties of peace were concluded here in 1428 and 1433. A council was held here Jan. 10, 1438. The last sitting took place Jan. 10, 1439.

FERRARS'S ARREST.—Mr. George Ferrars, M.P. for Plymouth, had become security for a man, who failed to pay at the appointed time. The creditor consequently brought an action against Ferrars, who was arrested by the officers of the city of London, and imprisoned in the Compter. The Speaker laid the matter before the House of Commons, and they despatched the sergeant-at-arms

into the city to demand the release of the prisoner. A scuffle ensued, in which the sheriffs and city constables took part with the municipal authorities; and the sergeant, after having broken the mace in his efforts to defend himself, was compelled to retreat. The Commons next proceeded in a body to the House of Lords, where the judges declared the arrest illegal, and pronounced it a very great case of contempt. The sergeant was again sent to the prison, this time the officials offering no resistance, and Mr. Ferrars was released from captivity. At eight o'clock the following morning, March 28, 1542, the sheriffs, and other persons concerned, appeared at the bar of the House, and the sheriffs and creditor were committed to the Tower, the clerk of the Compter to a place known as "Little Ease," and the constables who had attacked the sergeant to Newgate. They were, however, released at the intercession of the mayor on the 30th, and in April the king expressed his approbation of the steps the House had taken.

FERROL (Spain).—An English fleet assailed this seaport, without success, Aug. 25, 1800. It was blockaded by a British fleet in 1805; and Sir Robert Calder, with fifteen sail of the line, defeated the French and Spanish fleet, consisting of twenty sail of the line, seven frigates, and two brigs, off Ferrol, July 22, 1805. Marshal Soult captured it in 1809.

FESTIVALS. (See FEASTS and FESTIVALS.)

FETHANLEA, or FRETHERN (Battle).—Ceaulin defeated the Britons at this place, near Stroud, in Gloucestershire, A.D. 584.

FEUDAL LAWS.—Alexander Severus (A.D. 222—235) and Probus (276—282) gave grants of land to their soldiers on condition that they and their heirs should do military service for them. The custom was afterwards imitated by the Lombards and other northern nations, by whom it was introduced into civilized Europe. The oldest codes of laws founded on the feudal principle are the Salic law, which was promulgated by the Salians or Franks about the year 481; the code of the Lombards commenced about 646; and the Capitularies published in 817. It is believed some such system was introduced into England by the Saxons, but it was not till after the Norman Conquest in 1066 that it attained its full operation in this country. It was introduced into Scotland by Malcolm II. in 1008. The "Liber Feudorum" was compiled by the emperor Frederick I. in 1170, and is regarded as the chief authority as to the feudal law of the continent. The "Coutumier de Normandie" was composed about 1229. The system was discouraged in France in 1470, limited in England in 1495, and finally abolished by 12 Chas. II. c. 24 (1680).

FEUILLANTS.—This name was given to a religious order founded by Jean de la Barrière, at Feuillant, in Languedoc, in 1577, and sanctioned by Sixtus V. in 1588. In 1587 it established itself in Paris, and in 1630 a separation took place between the Feuillants

of France and those of Italy. During the Revolution, a club that assembled in the old convent of the Feuillants (1791), was named after them. A ministry composed of their leaders assumed power in June, 1792. The Jacobins conspired against them, and the Feuillant Club was closed in July, 1792.

FEZ, or FAS (Africa), the capital of a kingdom of the same name, was founded by Edris, A.D. 829. His dynasty lasted till 907. Fez became subject to Morocco in 1550.

FEZZAN (Africa), the ancient Phazania, the country of the Garamantes, became subject to the Turks A.D. 1842.

FIDENE (Italy) was captured B.C. 496 by the Romans, with whom its inhabitants were frequently engaged in war. Fidenæ was taken and plundered B.C. 426, and its inhabitants were sold as slaves. The amphitheatre fell during an exhibition, A.D. 27 when 50,000 persons were killed or wounded. Its site is occupied by Castel Giubileo.

FIEF.—Ducange (iii. p. 433) states that the word fief, as applied to a possession held by a tenant of a superior, was not used until the year 884, in the reign of Charles the Fat. (See FEUDAL LAWS.)

FIELD OF MARCH, or FIELD OF MAY.—This name was given to assemblies of the Frankish people which were held in France under the Merovingian kings, every year in the month of March. They have been called Parliaments of the Champ de Mars. The people assembled in arms on these occasions. Pepin the Younger, after his accession to the throne (A.D. 747), revived this national assembly, changing the time of meeting from March to May. Charlemagne also convoked them. Sheppard ("Fall of Rome and Rise of the New Nationalities," sect. ix.) remarks: "Of these assemblies the chroniclers enumerate thirty-five between the years 770 and 813. That convoked in spring, and styled 'the field of May,' alone had the privilege of passing laws, and in it the third estate, or the people, were associated with the clergy and nobles."

FIELD OF THE CLOTH OF GOLD.—Henry VIII. of England and Francis I. of France held interviews between Guisnes and Ardres, near Calais, June 7 to 24, 1520. Such was the magnificence displayed, that the place of their meeting was called the Field of the Cloth of Gold.

FIERY CHAMBER, or CHAMBER ARDENTE.—The name given to a French tribunal usually convoked for the punishment of heresy. Francis I. established a Fiery Chamber in 1535. In 1679 it was employed to inquire into the reports of poisoning cases that were circulated on the trial of the Marchioness Brinvilliers, and its operations soon after ceased.

FIFTH MONARCHY MEN.—A sect of ultra-republicans who appeared in England A.D. 1645, and taught that Christ was about to reappear on earth, and establish a new universal monarchy. In 1653 they held weekly meetings in London, at which they denounced Cromwell as "the man of sin," "the old dragon," and

"the dissemblingest perjured villain in the world;" in consequence of which he put a stop to their preaching. They reappeared, however, at the Restoration, and stirred up a riot, in which several lives were lost, Jan. 6, 1661. This fanatical attempt to establish their fifth monarchy proved their ruin, as the more orderly sects of Puritans immediately denounced them and their views as equally dangerous.

FIG-TREE.—The common fig-tree was brought to England before A.D. 1548; and the Botany Bay fig-tree from New South Wales in 1789. Cardinal Pole is said to have planted fig-trees at Lambeth, during the reign of Henry VIII.

FIGUERAS (Spain).—The citadel was built by Ferdinand VI. (1746–1759). The French captured it Nov. 24, 1794. It was several times contested, and having again fallen into the hands of the French in 1808, was restored by the treaty of Paris in 1814.

FILBERT.—This fruit, said to have received its name from Philibert, a king of France, originally brought from Pontus into Italy, was introduced into England about A.D. 1612.

FILE-CUTTING MACHINES.—Various instruments for the manufacture of files have from time to time been invented, of which Duverger's in 1699, Fardonet's in 1725, Thiout's in 1740, Brachât and Germain's in 1756 and 1778, Raoul's in 1800, Ericsson's in 1836, and Sir J. Robinson's, improved by Johnson, Cammell, and Co., in 1843, are the most important. In February, 1860, Mr. Thomas Greenwood, of Leeds, read a paper at the Institution of Civil Engineers, in which he described an efficient, well-working machine, invented by M. Bernot, of Paris, which he stated would perform its work at an eighth of the expense of previous machines.

FILBUSTER.—The correct spelling of this word, a corruption of the English term free-booter, is filibuster. It was applied to the bucaners of the 16th century, and to lawless bands from the United States, who assailed Cuba in 1850 and 1851, and various parts of Central America in 1857 and other years.

FILTER.—The unglazed earthenware for filtering was patented by Mrs. Hempel of Chelsea in 1791. Mr. Peacock patented his ascending filter in 1791, and in 1856 Mr. H. M. Witt conducted some important experiments at the Chelsea Waterworks, which added considerably to the knowledge of the best materials for filtering-beds, &c.

FINES AND RECOVERIES.—The practice of evading the laws of entail by means of fines and recoveries was introduced in the reign of Edward IV., and sanctioned and regulated by 4 Hen. VII. c. 24 (1487). They were abolished by 3 & 4 Will. IV. c. 74 (Aug. 28, 1833), which ordered no more to be levied or suffered after Dec. 31, 1833.

FINLAND (Europe).—Eric IX., king of Sweden, obtained a footing in Finland about A.D. 1157, when he compelled the Finns to embrace Christianity. Peter the Great seized it in 1714. It was restored, again

taken, and finally ceded to Russia by the peace of Frederickschamm, Sept. 17, 1809.

FIORENZUOLA (Battle).—Berenger was defeated at this place, near Piacenza, by Rodolph II., king of Burgundy, A.D. 923.

FIRE-ARMS, as distinguished from artillery and cannon (*q. v.*), originated about the year 1364, when 500 hand-cannon were made at Perouse, or Perugia. Hand-guns were used at the siege of Arras in 1414, and of Lucca in 1430. Tubes for firing gunpowder, held in the hand, and termed Scorpions, appeared in England in 1440, and in 1471, 300 Flemings, armed with hand-guns, each of which required two men to manage, accompanied Edward IV. when he landed at Ravensburgh. A corps of harquebusiers was formed in 1476, and in 1510 the Swiss had a troop of 500 cavalry, armed with fire-arms, active in Italy. The wheel-lock pistol was common in Germany in 1512. In consequence of the employment of light fire-arms at the battle of Pavia, in 1524, the Spaniards defeated Francis I. of France. Muskets were first used by the duke of Alva against the Flemings in 1567, and were introduced into the French army in 1573. The earliest mention of a flint arm is dated 1588, and the earliest specimen of this kind of weapon is of the year 1614. The fire-lock came into use about 1639, and the fusil was adopted in the French army in 1671. A brass fire-arm, called the fancy gun, in the shape of a walking-cane, and which might be used either as a gun or pistol, was invented in 1712, but was never generally adopted. The harpoon gun was invented in 1731. The Rev. A. J. Forsyth took out his patent for igniting gunpowder on the percussion principle, April 11, 1807. All fire-arms were ordered to be proved before use by 53 Geo. III. c. 115 (July 10, 1813), which was amended by 55 Geo. III. c. 59 (May 12, 1815). Percussion-cap guns were adopted in the French army in 1830, and the Enfield rifle musket in the English army in 1853. The present small-arms of the British service, as regulated in 1854, are, the percussion musket, pattern 1842; the Victoria carbine; the regulation rifle musket, pattern 1851; the Enfield rifle musket, pattern 1853; and the artillery carbine, pattern 1853.

FIRE BRIGADE.—Each of the fire insurance companies of London had a separate establishment of fire-engines until 1825, when the Union, the Sun, and the Royal Exchange companies united their fire-engine establishments. Other companies joined from time to time, and in 1833 a new association, including all the principal fire-insurance companies, was formed. This, constituting the Fire-brigade, is managed by a committee.

FIRE-ENGINE.—Ctesibius, who flourished B.C. 250, is believed to have invented a species of fire-engine. Instruments for extinguishing fires are first mentioned in the accounts for the city of Augsburg A.D. 1518, but no distinct description of a machine of the kind exists till Hautsch of Nuremberg constructed his engine, about 1657. In 1672,

Jan Vanderheide introduced the flexible hose, and in 1699 Duperrier received a patent for making fire-engines for France. Newsham's engine was patented about 1700; and Leupold added the air-chamber in 1720. In 1792 Mr. C. Simpson patented an improved form of Newsham's machine; and in 1793 Mr. Joseph Bramah took out a patent for an engine on the vibratory principle. A steam fire-engine was invented by Mr. Braithwaite in 1830, and in 1832 the insurance companies adopted the engine now in use.

FIRE-ESCAPE.—Various ingenious contrivances to enable people to escape in cases of conflagration, have been from time to time invented. The Academy of Sciences at Paris, in 1761, expressed their approbation of M. Varcourt's invention for this purpose. The fire-escape which served as the basis for those used in London, was invented by Mr. John Davies in 1809. After having undergone several improvements, they were in 1836 brought into general use by the Society for the Protection of Life from Fire. There are now above 70 of these useful machines stationed in different parts of the metropolis.

FIRE-LOCK came into use, according to Merrick, A.D. 1669.

FIRES. (See INDEX.)

FIRE-SHIPS, filled with combustibles, were used amongst ancient nations. Mention of them is made in the 13th century. Fire-ships were launched against the Spanish armada in Calais roads, Sunday, July 28, 1588 (O. S.). In the English navy-list for 1710, five of these vessels formed part of the naval defences of the kingdom.

FIREWORKS.—The art of pyrotechny was brought to great perfection by the Chinese and Hindoos long before it was known in Europe. From a passage in Clandian, who wrote in the 4th century, it appears that the Romans celebrated triumphs, &c. by exhibitions of moving fires, though, of course, their ignorance of gunpowder rendered their efforts very limited. In 1258 the king of Delhi sent 3,000 carriages of fireworks to the ambassadors of Halaku. They were scarcely known in England till the reign of Elizabeth; but in the time of Charles I. they became common. By 9 & 10 Will. III. c. 7 (1697), the throwing or firing off of squibs, serpents, or other fireworks, was declared a common nuisance, punishable by fine. The chief improvements in the construction of fireworks for ornamental purposes were made by Ruggieri about the year 1743.—The following are some of the most remarkable exhibitions of fireworks:—

- A.D.
1697. Nov. 16. On the occasion of the entry of William III. into London, after the peace of Ryswick, £12,000 were expended in fireworks.
1748. Nov. 23. A grand display at London, to celebrate the peace of Aix-la-Chapelle.
1770. May 31. One at Paris, on the occasion of the marriage of Louis XVI. and Marie Antoinette. A panic arose, in consequence of some fire falling amongst the crowd, and 3,000 persons were killed or wounded. 712 bodies were afterwards found.

A.D.

1814. Aug. 1. At London, to celebrate the general peace.
1831. Sept. 8. At London, on the coronation of William IV.
1856. May 29. At London, on the conclusion of peace with Russia.

FIRST-FRUIT. (See ANNATES.)

FIRST PRAYERS.—A right exercised by Rodolph of Habsburg (A.D. 1273—1291) and his successors, which empowered the emperor, on his accession to the throne, to nominate a priest to a benefice in every immediate chapter and abbey in Germany.

FISHERIES were established among the Arabians about B.C. 1800, and the practice of salting fish was common in Egypt B.C. 1350. The Scotch carried on thriving fisheries about A.D. 1040, and an important herring-fishery was established at Schonen in 1204. The London fishmongers were placed under the direction of the Lord Mayor in 1384, the salt-fishmongers incorporated in 1433; and by 1482 the English fisheries formed a considerable portion of the national wealth. By 24 Hen. VIII. c. 4 (1532), hemp and flax were ordered to be sown for the manufacture of fishing-nets; and by 25 Hen. VIII. c. 4 (1533), the fishing towns of the east coast were brought under statutory regulation. In 1553 Spain agreed to pay an annual sum of £1,000 for leave to fish on the Irish coasts, and strangers were prohibited from fishing in our seas by a proclamation of Charles I. in 1636. In 1635 the Dutch paid £30,000 for the privilege of using the English fisheries; and in 1656 Sweden obtained liberty to employ 1,000 vessels in British waters. The Company of the Royal Fishery of England was established in 1677, but proved a failure. The Free British Fishery Corporation was established in 1750. The Society of Arts devised a machine for conveying fresh fish to London in 1761, and Parliament granted £2,500 to further the scheme in 1764. The British Society of Fisheries was established in 1786, the Northumberland Fishery Society in 1789, and the Irish Fishery Commission in 1819. A convention fixing the limits of oyster and other fisheries on the coasts of Great Britain and France, was signed at Paris Aug. 2, 1839.

FISHGUARD (Wales).—A French force of 1,400 men landed near this town Feb. 22, 1797, and surrendered Feb. 24.

FISHMONGERS.—Mention of the fishmongers of London occurs as early as A.D. 1290. They originally formed two companies, namely, the Stock Fishmongers and the Salt Fishmongers, and were united in one company A.D. 1536. Their ancient arms were confirmed in 1575. Before they were united, they possessed no less than six halls. The new Fishmongers' Hall was completed in 1835.

FITZWILLIAM MUSEUM (Cambridge).—Richard, Viscount Fitzwilliam, who died Feb. 5, 1816, bequeathed his collection of books, paintings, &c., and the interest of

£100,000, for the purpose of establishing a museum at Cambridge. The building was commenced by George Basevi, Nov. 2, 1837, and continued till 1847, when operations were suspended for a time, to allow time for the accumulation of sufficient funds to carry out the design.

FIUME (Illyria).—This seaport, in the possession of Austria, was made a free port A.D. 1722.

FIVE HUNDRED (Council of the).—The French Convention in 1795 vested the legislative power in two councils, that of the Ancients (*q.v.*) and that of the Five Hundred. To the latter was intrusted the sole right of originating laws. This council was violently dissolved by Napoleon Bonaparte, Nov. 10, 1799.

FIVE-MILE ACT.—This act (17 Charles II. c. 2, 1665) prohibited Dissenters who refused to take the oath of non-resistance, from approaching within five miles of any corporation where they had preached since the Act of Oblivion (12 Charles II. c. 11, 1660), under a penalty of £40. Nonconformists who consented to sign the declaration attached to the act for disabling papists from sitting in either house of parliament (30 Charles II. st. 2, c. 1, 1677), were relieved from this restriction by 1 Will. & Mary, c. 18 (1688).

FLADENHEIM (Battle).—Rodolph of Swabia defeated the emperor Henry IV. near this town, in Thuringia, A.D. 1080.

FLAGELLANTS, or WHIPPERS.—Many persons in Italy, holding no peculiar doctrines, formed themselves into processions, and inflicted chastisement upon themselves as they marched along, A.D. 1260. Milman (Latin Christianity, vol. v. b. xi. ch. 2) says they "seemed to rise almost simultaneously in different parts of Italy. They began in Perugia. The penitential frenzy seized Rome: it spread through every city, Guelph and Ghibelline crossed the Alps, and invaded Germany and France." It was a purely religious movement, which had been preceded in 1251 by that of the Pastoureaux (the Shepherds) in Flanders and in France. Clement VII. anathematized the new flagellants who sprung up early in the 14th century. An attempt to revive these practices was made in Thuringia and other parts of Germany, A.D. 1414. Conrad, the leader of the sect in Thuringia, with many others, suffered at the stake. Flagellation was much practised amongst the early monks.

FLAG OF TRUCE.—The Russians fired upon a flag of truce at Odessa, April 6, 1854, and at Hango, June 5, 1855.

FLAGS.—The earliest flags were suspended from two corners like a square sail. They were used by the Greeks as naval ensigns from the earliest period of their history. The present style of flag was introduced into Europe by the Moors when they entered Spain, A.D. 711. The embroidery of flags afforded occupation to the ladies of the Middle Ages; thus the celebrated raven standard of the Danes, which was captured by the English in 878, was said to have been

worked by the three sisters of Hubba. The renowned *carrocium*, or car-standard, of the Italians was invented at Milan about the year 1040. Flags were first attached to lances during the 11th and 12th centuries, and were distinguished by various badges by the crusaders in 1188. For a long period the dragon was the national badge of the English. It was used by Harold at Hastings, by Richard I. in 1191, and by Henry III. in 1264. Edward III. blazoned his banners with the arms of England and France quarterly in 1340. The Dutch yielded the honour of the flag to England in 1673. The flag-officers now in the pay of the English navy are the admiral, vice-admiral, and rear-admiral, of the white, red, and blue.

FLAMINIAN WAY.—The Flaminia Via at Rome was constructed by Caius Flaminius B.C. 221. This road terminated at Ariminum.

FLAMMOCK'S REBELLION.—In consequence of a tax levied to meet the expense of the Scottish wars of Henry VII., the Cornishmen rose in rebellion under Thomas Flammock, a lawyer, and Michael Joseph, a blacksmith, of Bodmin. They marched towards London, and at Wells were headed by Lord Audley. On arriving at Winchester, they compelled their leaders to conduct them to Kent, expecting to be joined by many natives of that county, and encamped on Blackheath, where the king resolved to give them battle. An engagement ensued, June 22, 1497, in which the rebels were defeated, and 2,000 of their number slain. Lord Audley was beheaded on Tower-hill, and Flammock and Joseph drawn, hanged, and quartered at Tyburn, June 29.

FLANDERS is believed to have been covered by the sea in ancient times. In 793 it was erected into a county, and in 802 was colonized by a Saxon tribe. It was annexed to France in 843, passed under the government of counts in 862, and acquired celebrity as a centre of woollen manufacture about 960. In 1100 a terrible inundation forced many families into exile, and thus led to the establishment of a Flemish settlement in Cumberland, and subsequently, in 1112, in Wales. The first commercial treaty between Flanders and England was concluded in 1274; but in 1309 disagreements broke out between the two countries, which, in 1322, led to open war. Peace was restored in 1325, and in 1369 the country was annexed to Burgundy by marriage. The insurrection of the "White Hats" broke out in 1378, and the country remained in a very unsettled state till the accession of Philip II., the Bold, in 1364. In 1477 Flanders passed into the possession of the house of Austria, in consequence of the marriage of the duchess Mary with the archduke Maximilian, and in 1556 the country was annexed to Spain. In 1581 the Flemings asserted their independence, and the country was more or less engaged in wars with Spain till the conclusion of the peace of the Pyrenees, Nov. 7, 1659. In 1668 many of the inhabitants emigrated to England, and in 1680 some parts of the country were seized

by Louis XIV. of France. By the peace of Radstadt, March 6, 1714, it formed part of Germany, and Dutch Flanders was annexed to France by the treaty signed at the Hague May 16, 1795. (*See* BELGIUM AND THE NETHERLANDS.)

FLANDRIANS, or FLEMINGS, were a branch of the Anabaptists. They arose in the 16th century, and rebaptized not only those who had received baptism in other denominations in their childhood or infancy, but also such as had received it when adults.

FLANNEL.—Various kinds were introduced into this country in the reign of Charles II. (*See* WOOLLEN MANUFACTURES.)

FLAX.—The culture and manufacture of flax, carried on in Egypt about B.C. 1706, were introduced from thence into Tyre B.C. 588. The manufacture was in operation in England A.D. 1189, and the business was practised in Scotland in 1210. By 24 Hen. VIII. c. 4 (1533), the culture of flax in England was made imperative, and in 1703 a bounty was paid on flax imported from the American colonies. A duty of 1*d.* per cwt. was imposed upon imported flax by 5 & 6 Vict. c. 47 (July 9, 1842), which was removed by 8 Vict. c. 12 (May 8, 1845). (*See* LINEN.)

FLEET MARKET (London).—A market for meat and vegetables was established in the centre of the present Farringdon Street, and exactly over the Fleet Ditch, Sept. 30, 1737. It was removed to its present site, and called Farringdon Market, Nov. 20, 1829.

FLEET MARRIAGES.—One of the most glaring abuses of the Fleet prison was the illegal performance of the marriage ceremony by clergymen confined within its precincts for debt. The earliest recorded instance of these marriages is in the year 1674. They were suppressed by the Marriage Act (26 Geo. II. c. 33, 1753), which took effect March 25, 1754. The register books of the Fleet marriages were purchased by government in 1821.

FLEET PRISON (London) was built on the east side of Fleet ditch, in the first year of the reign of Richard I., and became a prison for debtors in 1640. It was burnt down in the great fire of 1666, and again in Lord George Gordon's riots in 1780. It was rebuilt in 1781-2. By the act for consolidating the King's Bench, Fleet, and Marshalsea prisons (5 Vict. c. 22, May 31, 1842), this prison was abolished, and in consequence was pulled down in 1844. In 1845 the site was purchased by the Corporation of London for £25,000, and the outer walls were removed Feb. 20, 1846.

FLEETWOOD (Lancashire).—This port was laid out by Sir Hesketh Fleetwood, Bart., in 1836. It takes its name from the founder.

FLEURUS (Battles).—Several severe actions have been fought near this town, in Belgium. The first was between the Spanish (Roman) Catholic League under Gonzales de Cordova, and the Germans of the Protestant Union, Aug. 30, 1622. Marshal Luxembourg defeated the prince of Waldeck

here July 1, 1690. The prince of Saxe-Coburg and the Austrians were defeated by the army of the French republic under Marshal Jourdan, who employed a balloon to examine the position of the enemy, June 26, 1794. The engagement commenced early in the morning, and was continued without definite result till the evening, when the French were reinforced by a detachment of artillery, which enabled them to secure the victory. The number of killed in this battle has not been positively ascertained: in the official report to the Convention it was stated at upwards of 10,000. Napoleon I. defeated the allies under Blücher here, June 16, 1815. This engagement is also called the battle of Ligny.

FLOATING BATTERIES.—The Chevalier D'Arçon constructed ten large floating batteries, which were employed by the French at the siege of Gibraltar A.D. 1782. They were of prodigious strength, and were deemed impregnable; but the red-hot shot of the English proved too formidable, and all of them were destroyed during the siege. The construction of floating batteries as a regular branch of the English navy has been lately discussed, and various experiments have been tried to ascertain their efficiency. A commission for examining into the subject assembled Oct. 10, 1859, and published a report containing many suggestions as to the conditions necessary for insuring success.

FLODDEN FIELD (Battle).—James IV., king of Scotland, was defeated and slain by the English army under the command of the earl of Surrey, at this place, near Coldstream, in Northumberland, Sept. 9, 1513. The Scottish force amounted to 50,000 men, while the earl of Surrey only mustered about 26,000.

FLORALES LUDI, or FLORALIA.—This festival, in honour of Flora, was first held at Rome B.C. 238. It lasted from April 23 to May 2. Having been discontinued on account of its immorality, it was restored B.C. 173.

FLORAL HALL (London), adjoining the new Covent-Garden Theatre, was opened with a Volunteer ball, March 7, 1860. The first season that it was used for the sale of flowers commenced in May, and terminated August, 1861.

FLORENCE (Italy), the ancient Florentia, the capital of Tuscany (*q.v.*). A Roman colony was established here by Sylla about B.C. 80. Radagaisus besieged it A.D. 405, and the city, reduced to the last extremity, was relieved by Stilicho, who overwhelmed the assailants. Totila having destroyed Florence A.D. 541, it was restored by Charlemagne. It became an independent republic about 1198, and was long the prey of various factions. Cosmo de' Medici founded the university 1433, and his family gradually became powerful. Alexander de' Medici was appointed governor for life, Oct. 28, 1530, and Cosmo de' Medici was made grand-duke of Tuscany Sept. 1, 1569. A revolution took place at Florence, April 27, 1859. The people voted in favour of annexation to Sardinia,

March 11 and 12, 1860. A general council of the Greeks and Latins transferred its sittings from Ferrara to Florence in 1439, when the act of union between the Greeks and Latins was subscribed, and the council was transferred to Rome in 1442. Councils were held at Florence in 1055, 1105, and 1409. The academy of Della Crusca was founded in 1582. A treaty of peace between Napoleon Bonaparte and the king of the Two Sicilies was concluded at Florence, March 28, 1801.

FLORES (Atlantic).—One of the Azores (*q. v.*). An island sometimes called Eudé, in the Indian Archipelago, is also known by this name.

FLORIDA (North America) was discovered by Sebastian Cabot, A.D. 1497. Juan Ponce de Leon re-discovered it on Palm-Sunday (called in Spanish, Pasqua Florida), April 4, 1512; whence its name. The Spaniards failed in an attempt to colonize it in 1521, and the French Calvinists sent an expedition in 1562. The new settlers were assailed and defeated by a Spanish force, Sept. 4, 1565. Florida was ceded to Great Britain in exchange for Havana, in 1763. The Spaniards took it in 1781, and were guaranteed in the possession of the same by the peace of Versailles, Sept. 3, 1783. By a treaty concluded between Spain and the United States, Oct. 24, 1820, Florida passed into the possession of the latter. A constitution was adopted in 1833, and it was made a state March 3, 1845. It was one of the states that seceded in 1860. The tract of country formerly known by the name of Florida was of much greater extent than the present state.

FLORIN.—This coin is said to have been first issued at Florence, whence its name, A.D. 1252, and in the 14th and 15th centuries was current over all Europe. English silver florins, valued at two shillings, were declared by proclamation, in 1852, to be current and lawful money of the United Kingdom.

FLORINIANI.—The followers of Florinus, the pupil of Polycarp. They formed an obscure Gnostic sect in the 2nd century.

FLOWERS.—"There has been a class of men," says Disraeli, "whose patriotic affection, or whose general benevolence, has been usually defrauded of the gratitude their country owes them: these have been the introducers of new flowers, new plants, and new roots, into Europe."

Flowers, Plants, &c.	Introduced into England from	Date.

Victoria Regia	Guiana	1837
Wax-tree	China	1794

FLUSHING, or VLISSINGEN (Holland).—The inhabitants of this fortified town, on the island of Walcheren, threw off the Spanish yoke A.D. 1572. The French took Flushing in 1795. It was ceded to France by the king of Holland, Nov. 11, 1807, and formally annexed by a decree published Jan. 21, 1808. The English having captured it Aug. 16, 1809, destroyed the works and retired in November. (*See WALCHEREN EXPEDITION.*) It again fell into the hands of the French, who surrendered it by the treaty of Paris in 1814.

FLUTE.—This instrument was in use in very early times, and several kinds are described in the "Harmonie Universelle" by Father Merenne, published at Paris in 1636.

FLUXIONS.—This department of mathematical science was invented by Sir Isaac Newton A.D. 1665. He described it in a letter of Dec. 10, 1672, and published a description in 1704. The first work on the subject was published by John Harris, M.A., in 1702. Leibnitz published his method of the differential calculus in 1684, and a long controversy resulted as to whether he had borrowed the idea from Newton's former discovery. Recent disclosures, however, clear him from the imputation of plagiarism.

FOGGIA (Italy).—Manfred defeated the

papal troops at this place A.D. 1254. Its Gothic cathedral was destroyed by an earthquake in 1731.

FOKSHANI (European Turkey).—A congress for the settlement of peace between Turkey and Russia assembled at this town A.D. 1772, and broke up in September, without effecting the desired object. The Russians gained a victory over the Turks at Fokshani, July 31, 1789.

FOLIGNO (Italy).—An armistice between Napoleon Bonaparte and the king of the Two Sicilies was concluded at Foligno Feb. 18, 1801. It led to the treaty of Florence.

FONT, or BAPTISTERY, was, according to Bingham, for many ages, a distinct place from the body of the church. The same author remarks: "The baptistery, properly speaking, was the whole house or building in which the font stood, and where all the ceremonies of baptism were performed; but the font was only the fountain or pool of water, wherein persons were immersed or baptized." Fonts were erected inside the churches in the 6th century.

FONTAINEBLEAU (France).—A royal palace existed here as early as A.D. 999, and a chapel in honour of the Virgin was founded by Louis VII. in 1169. Louis IX. established the convent of the Holy Trinity in 1230. In 1518 it was much improved by Francis I., who established the library and great garden in 1530. The celebrated conference between the Roman Catholics and the Huguenots assembled here in May, 1600. Henry IV. formed the park in 1607. A treaty of alliance between France and Sweden was signed here Sept. 24, 1661, and peace concluded with Denmark Sept. 2, 1679. A treaty of union and alliance with Spain was signed Oct. 25, 1743; the preliminaries for a peace between Great Britain, France, and Spain, Nov. 3, 1762, and a definitive treaty of peace between the emperor of Germany and Holland, Nov. 8, 1785. Napoleon I. concluded a treaty of peace with Spain here Oct. 27, 1807, and bade adieu to the Old Guard previous to his retirement to Elba, April 20, 1814. The marriage of the duke of Orleans with the Princess Helen of Mecklenburg was celebrated here May 30, 1837. Louis Philippe restored the castle 1837—1840.

FONTAINE FRANÇAISE (Battle).—In this battle Henry IV. of France defeated the Spaniards, June 5, 1595.

FONTARABIA, or FUENTE-RABIA (Spain).—This ancient town was very strongly fortified. A conference was held here between Henry IV. of Castile and Louis IX. of France, A.D. 1463. The French captured it in 1794. It was taken by the royal troops during the civil war in Spain, May 18, 1837.

FONTENAY (Battle).—Fought June 25, A.D. 841, on this plain, in Auxerre, between the three sons and the grandson of Louis I. (the Pious), king of France. The emperor Lothaire I., who had joined his nephew Pepin, gained a victory, which did not, however, prove decisive.

FONTENOY (Battle).—The French, under Marshal Saxe, defeated the allied army at this village near Tournay, in Belgium, April 30 (O. S.), 1745. The French army amounted to 76,000 men in a position defended by 220 pieces of artillery, whilst the allied forces consisted of 50,000 men, of whom about 28,000 were English and Hanoverians. The English carried everything before them, but the Dutch took to flight. The victory was in a great measure due to a charge made by the Irish brigade, led by Lord Clare.

FONTEVRAULT (Order of).—This order of monks and nuns was founded by Robert d'Arbrissel, who erected a monastery at Fontevrault A.D. 1099. In 1106 it received the sanction of Pope Pascal II., and in 1113 was rendered independent of episcopal jurisdiction. Some monks of the order established themselves in England by invitation of Henry II. in 1177. It was reformed in 1507 by the abbess Renée of Bourbon.

FONTHILL ABBEY (Wiltshire).—This magnificent mansion, built from the designs of Mr. James Wyatt, was founded by William Beckford, Esq., M.P., in 1796. Warner says that in it "expense has reached its utmost limits in furniture and ornaments; every room is a gold-mine, and every apartment a picture-gallery." The cost of the building was £240,000, and in 1807 the proprietor fixed his residence here. In 1822 the house was sold, and in 1823 the pictures, statues, &c., were disposed of by an auction, which continued for 41 days. The grand tower fell in Dec. 21, 1825, and irreparably injured the building, which was consequently sold in lots, and converted into a private villa, a cloth-factory, &c.

FOOLS. (*See JESTER.*)

FOOLS (Feast of).—This festival, supposed to be derived from the Saturnalia of the Romans, was celebrated in France on the 1st of January, before A.D. 1230, and it lasted till the Reformation. It reached England in 1240, and was abolished about the end of the 14th century.—The *Feast of Asses* was celebrated at Beauvais about the same time. An annual fair held in the Broad Gate, Lincoln, Sept. 14, is called Fools' Fair.

FORBES MACKENZIE'S ACT.—The act for the better regulation of public-houses in Scotland (16 & 17 Vict. c. 67, Aug. 15, 1853), permitted grocers to obtain certificates for the sale of beer, spirits, &c., by retail, not to be consumed on the premises. It was originated by W. Forbes Mackenzie, M.P. for Liverpool, from whom it received its name.

FOREIGN ENLISTMENT ACT.—The enlistment of British subjects to serve in foreign armies was prohibited by 59 Geo. III. c. 69 (July 3, 1819). This act was temporarily suspended by an order in council of June 10, 1835, which permitted the Spanish government to raise a body of 10,000 mercenaries in Great Britain.

FOREIGN LEGION.—The name given to

regiments composed entirely of foreigners, who in various wars have served under the English flag. About 9,000 Hessians arrived at Chatham in May, 1756, to resist an expected invasion by the French, and in June, 1798, soldiers of the same nation were sent to Ireland to subdue the rebels. By 18 Vict. c. 2 (Dec. 23, 1854), permission was granted for the enlistment of foreigners to serve in separate corps during the Russian war, and for one year after the conclusion of peace. A regiment was consequently formed, composed chiefly of Germans and Swiss, who formed a camp at Shorncliffe, near Dover, where they were reviewed by the queen and the prince consort, Aug. 9, 1855.

FOREIGN ORDERS.—According to regulations issued by the Foreign Office, May 10, 1855, and published in the *London Gazette* May 11, no British subject may accept a foreign order, or wear the insignia thereof, without having previously obtained her Majesty's permission, signified by a warrant under her sign manual.

FORESTALLING is the name given to the offence of buying merchandise on its way to market, or persuading persons not to offer their wares for sale, or to increase the price of their goods. By 25 Edw. III. c. 3 (1350), persons convicted of it were liable to forfeit the things forestalled, or two years' imprisonment. Many subsequent acts were passed for its suppression, the most important being 5 & 6 Edw. VI. c. 14 (1552), all of which were repealed by 7 & 8 Vict. c. 24 (July 4, 1844).

FORESTS.—"The forests in England," says Coke, "sixty-nine in number, except the New Forest, in Hampshire, erected by William I., and Hampton Court Forest by Henry VIII. and by authority of parliament, are so ancient as no record or history doth make any mention of their history or beginning." The larger number of these forests have now entirely disappeared. Courts for levying amercements for offences against the forest laws have not been held since 1632. The surveyor-general of the land revenues of the crown, and the surveyor-general of woods and forests, &c., were united under a board, called Commissioners of Woods, Forests, and Land Revenues, by 50 Geo. III. c. 65 (June 9, 1810). By 2 Will. IV. c. 1, passed Feb. 13, 1832, the surveyor-general of works and buildings was united with the board, then named Commissioners of Woods, Forests, Land Revenues, Works, and Buildings.

FORESTS (Charter).—Magna Charta, which was signed by King John, June 15, 1215, contained several articles relating to forests, which were afterwards thrown into a separate charter, known as the *Charta de Foresta*, by Henry III., in September or November, 1217. It was confirmed by Henry III., Feb. 10, 1225, and by statute 25 Edw. I. c. 1 (1297).

FORFARSHIRE steamer was wrecked on one of the Farne Islands, Sept. 6, 1838, on the voyage from Hull to Dundee. Grace,

daughter of William Darling, keeper of the lighthouse, induced her father to assist her in rowing a small boat through the heavy sea, to the scene of the disaster, and succeeded in saving nine persons. This was accomplished on the morning of Sept. 7. The fame of this brave action brought numerous visitors to Grace Darling's lonely home, and a considerable sum of money was given to her. Consumption proved fatal to her Oct. 20, 1842.

FORGERY.—The laws respecting this crime were very indefinite until the passing of 5 Eliz. c. 14 (1562), which rendered forgers liable to pay double costs and damages; to be set in the pillory, and have their ears cut off, and nostrils slit and seared; to forfeit to the crown all their revenues of lands and tenements, and to suffer imprisonment for life. In 1634 it was made a capital offence, and in 1722 to forge letters of attorney for the transfer of stock was made felony, without benefit of clergy, by 8 Geo. I. c. 22. All capital forgeries were collected into one act by 11 Geo. IV. & 1 Will. IV. c. 66 (July 23, 1830), which was amended by 2 & 3 Will. IV. c. 123 (Aug. 16, 1832), whereby the sentence was commuted into transportation for life, except in the case of forgery of wills and powers of attorney. Capital punishment was abolished in all cases, and transportation substituted, by 7 Will. IV. & 1 Vict. c. 84 (July 17, 1837). The greatest number of executions for forgery in one year occurred in 1818, when twenty-four convicts suffered. The first execution for forgery took place June 4, 1732, and the last Dec. 31, 1829.

FORK.—The use of the fork was, according to Beckmann, first known in Italy towards the end of the 15th century. In France, forks at court were entirely new towards the end of the 16th century. Thomas Coryat, who saw forks in Italy in 1608, introduced them into England. His tour, entitled "Crudities," &c., was published in 1611.
